OUR FOREIGN POSSESSIONS.

THE CITY OF MANILA.

Description of the Place by a Paper Published There.

The city of Manila is the capital of the Philippine islands and is situated on the island of Luzon, on Manila bay, and has a population of some 300,000 people, divided as follows: Natives, 225,000; Chinese, 65,000, and others, principally Americans, 10,000.

It is a quaint, old fashioned city, built upon the northeastern shore of the bay, which is nearly round, and about twenty-four miles across.

The houses are principally built of manufactured stones, and are one, two and three story structures. The walls are from two to four feet thick, and built to withstand the earthquake, and do-i. e. the less severe ones. The streets are generally tolerably straight and from thirty to sixty feet wide, with the majority of them about thirty-five feet.

The city is lit very poorly with electric lights. There is a street car line, the cars being drawn by small ponies. The telephone system is poor. Manila has a very good water works system, presented to the municipality by a Filipino who has departed this life. The condition of the gift was that the poor people should always have water free, and the public hydrants are accordingly well distributed about the city.

The Pasig river flows through the city from the northeast to the southwest. Below the first bridge above the mouth of the river, the famous "Bridge of Spain," the river is wide and deep, and is constantly crowded with commercial boats of all descriptions. It is a sight worth a long journey to see.

The churches and cathedrals are a marked feature of Manila. Their grandeur, and in many instances elegance, is a wonder and surprise to the stranger. And the bells, the "beautiful bells," the devotion of the people their music foretells. Those who do not like them think they are something "awful" to contemplate. On feast days—and there are many—business in the immediate vicinity has at times to be

suspended during their ringing (and that is many times during the day,) and it is not unusual for them to be heard at midnight and they always mingle with the voices of a myriad of cocks crowing all over the city at 5 to 6 o'clock in the morning.

The people rise early and go to bed early. The first thing we hear in the morning is the sweeping of streets or the running of hydrant, after the cock crowing and the ringing of bells. Fires are lit by the poorer class at an early hour—by many before it is fairly light—and the women prepare breakfast so the men can go about the livelong day, in many instances doing nothing. And an easy time they have. The women, too, for that matter. It is safe to say that there are no poor people on earth who are more content and suffer less for the necessities of life than do the Filipino people. It is not because "ignorance is bliss," either. They simply obtain without much exertion the comforts of life.

The Chinese are the bone and sinew of Manila, and the only people here who takes kindly to manual labor. The Americans here are no fonder of work than the Filipino.

The "walled city" contains probably two-fifths of the population of Manila, though but a little portion of the wholesale and retail business. The courts, the government buildings, both civil and military, and the principal schools are in the walled city.

The climate—we may be prejudiced, because our health during the year we have resided in Manila has been splendid—to our liking is perfect; never hot like it is in the states when it is hot there. During the rainy season there in a cleanliness and a freshness that are always invigorating and the dry season is a change, but not so healthy.—Manila Justicia-

Murder Or Suicide?

At Raton an aged man was found in the arroyo, throat cut and the arteries of his wrists severed, a gold watch and a large sum of money were found on his person. Nothing further about the man or the manner of his death is known.

The doctors and lawyers of Las Vegas crossed bats in the great American game of base ball last week, and Hon. O. A. Larazola had a leg broken as result of a fall.

ZIEGLER BROTHERS'

GREAT CLEARANCE SALE OF SEASONABLE SUMMER MERCHANDISE.

We are overstocked on a great many light weight Summer Dry Goods, and we do not want to wait till after the Season is over before we start our Clearance Sale, but we want to give our Customers the benefit of a lot of very choice Goods, now at exactly Eastern Cost and just at a time when the goods are NEEDED.

PRICE CUTTING IN EVERY DAY MERCHANDISE.

Printed Lawns, regular 7c goods, now.....4c
 Nice Calicos for Waists, Wrappers, etc.....4c
 Good quality Percales, regular 10c and 12½c goods, now.....8½c
 Fine quality Batiste, Dimities, Zephyr Gingham, former prices 12½c and 15c, all at....8½c
 A lot of Apron Check Gingham.....5c
 White Goods, in nice quality, from 5c up.

Price Cutting In Boys & Youths' Clothing.

WE have too many Boys and Youths' Suits and, as we want to give every boy a chance to get a Summer Suit, we have cut these prices just in two, and you can get a Suit for your Boy for a great deal less than these Goods have ever been sold here before.

100 PRS. OF LADIES SLIPPERS AT \$1.00 A PR. SOME OF THESE SOLD AS HIGH AS \$2.50.

We have 100 Corsets we offer at 50c on the dollar.

Every Corset and Corset Waist for children just exactly **ONE-HALF PRICE**, and a great many are the very latest Military Shape—Straight Front Corsets.

WE HAVE NOT SPACE ENOUGH TO QUOTE ALL OUR GOODS INCLUDED IN THIS SALE, BUT THIS IS Going to be the most remarkable

BARGAIN EVENT

We have ever inaugurated. We are bound to unload, and in order to do it quickly and successfully we make this Price Cutting sale the great Lever.

SALT LAKE IS VANISHING.

Scientists Declare Nothing Will Be Left of it in Fifty Years.

Within fifty years from the present time the Great Salt Lake of Utah—the most remarkable body of water of its kind in the world—will have ceased to exist. It will have dried up and its place will be occupied by an unattractive desert, save perhaps for a few irrigated farms.

Such, at all events, is the opinion of geologists. Prof. W. J. McGee of Washington remarked in conversation the other day that half a century was an outside estimate for the survival of the lake. He was inclined to think that it would be dried up twenty-five years from now. Already its waters show signs of receding from the shores, and causes are in operation which lessen to a great extent the supplies furnished to this curious inland sea by streams.

The lake is about seventy-five miles long by half that in greatest breadth, being in shape somewhat irregular, and is rather shallow. There may be places where it has a depth of as much as 100 feet, but over most of its area it is less than 50 feet deep. The reason why it is so salty is simply that it has no outlet save through evaporation, and the streams during ages past have been carrying salt into it.

The contributing streams are now beginning to be utilized on a large scale for irrigating purposes, and thus the customary water supply is being withheld to some extent from the lake. Before long immense reservoirs will be constructed in the mountains to hold the storm waters during the rainy season, in order that they may be conserved and poured out over the fields in the dry time. Operations of this kind, conducted so extensively, must lower the level of the lake quite fast.—X

NEW MEXICO.

Very Old Mill Discovered.

A. Rusby brought in a load of pelts from the Rock Island country today and brings a story of a trip to the old reduction mills that have been uncovered on Montoya's place at Tecolote recently, says the Las Vegas Record. The mills are supposed to be over 300 years old, and extend along a distance of some six miles. Charred corn still on the cob was found, and evidently was used to some extent for fuel. The old mills had been buried by the drifting sand, and were brought to light by some of the prospectors recently. It is evident that copper was the ore treated.

The School of Mines at Socorro reports a very successful year.

British Losses in South Africa.

Official statements issued by the war office at the end of the war in South Africa shows British losses up to May 30, this year to have been 97,477. This includes killed, wounded, prisoners and deaths from disease and invalidated.

Of this number many have recovered and returned to their regiments, leaving, it is claimed 28,434 dead or permanently incapacitated. The total number of troops killed in action is given at 7,792 and the total number of deaths from disease 13,250.

It is not surprising that Great Britain was anxious to end the war in the Transvaal? Kruger's prophecy that if the Boers were vanquished it would be at such a cost to Britain that it would appall the world, was fulfilled to the letter.

The war is over sure enough in South Africa and the Boers have surrendered on their own conditions. England might have done as well long ago. It must have been interesting though to have heard the old Boer veterans singing "God Save the King."

Notice Of Suit

In the District Court of the Fifth Judicial District of the Territory of New Mexico, within and for the County of Lincoln.

SADY HARDING, Plaintiff } No. 1371.
Vs. }
GRANT HARDING, Defendant. } Divorce.

The above named defendant is hereby notified that a suit has been brought against him in the above named Court by said plaintiff, in which she asks for a divorce from the bonds of matrimony now existing between plaintiff and defendant, because of defendant's confinement in the State Penitentiary of Missouri, for custody of her two children and for other relief.

Defendant is further notified that unless he shall enter his appearance in the said cause on or before the 26 day of July, A. D. 1902, judgment and decree will be entered against him in said cause by default.

Plaintiff's Attorney is J. E. Wharton, whose Post Office address is White Oaks, New Mexico.

John E. Griffith,
Clerk.

Change Of Schedule.

Alamogordo And Sacramento Mountain Railway.

Effective June 2nd, first class passenger train will leave Alamogordo at 8:00 a. m., arriving at Cloudcroft 10:50 a. m., daily. Return train leaves Cloudcroft 5:30 p. m., arriving Alamogordo 8:00 p. m.

Passengers for these trains can take breakfast at Alamogordo and five o'clock dinner at Cloudcroft.

ALL WOMEN

Wine of Cardui is the guardian of a woman's health and happiness from youth to old age. It helps her safely into womanhood. It sustains her during the trials of pregnancy, childbirth and motherhood, making labor easy and preventing flooding and miscarriage. It gently leads her through the dangerous period known as the change of life.

WINE OF CARDUI

cures leucorrhœa, falling of the womb, and menstrual irregularity in every form. It is valuable in every trying period of a woman's life. It reinforces the nervous system, acts directly on the genital organs and is the finest tonic for women known. Ask your druggist for a \$1.00 bottle of Wine of Cardui.

Batesville, Ala., July 11, 1900. I am using Wine of Cardui and Theford's Black-Draught and I feel like a different woman already. Several ladies here keep the medicines in their homes all the time. I have three girls and they are using it with me.
Mrs. KATE BROWDER.

Copper Interests Booming.

The Colorado Springs Mining Record and Arizona News give prominence to the recent influx of capital to southern Arizona and northern Mexico. The copper interests of these sections are booming, and the large investments are indicative of an advance in the price of copper metal in the world's markets. The Record which is the only daily mining publication in the world and unquestionably the greatest authority on industrial conditions of mining says of these districts:

"We have repeatedly of late called attention to the condition of activity prevalent in Arizona mining. Our special correspondence from the territory shows that there is much capital seeking investment in that inviting field, and that as work progresses very important finds are being made. In some instances the strikes are of monster proportions. This is particularly the case in the vicinity of Wickenburg, where operators are developing tremendous ledges of gold-bearing ore, the descriptions of which can hardly be appreciated by people used to the smaller veins of other sections.

As money is invested in mines and the mines develop their new ore bodies, there is evident commendable enterprise in the matter of the upbuilding of the sister industries. Mills and smelters have been projected, and some are already under way. In addition, the railroads are building to the new camps, and are doing their share in pushing along the mining industry of the territory. The new Stock Exchange at Prescott is designed to the end of advertising the possibilities for the investment of capital in Arizona mines, and generally there is a healthy activity and a commendable enterprise evidenced by the mining men of the territory.

L. H. Hamilton, in the Arizona News, reviews what he characterizes as boom conditions in the following items:

"In all the mining history of the southwest there has never prevailed such a condition of intense activity as now exists in Arizona and northern Mexico. From the great copper country all along the international boundary line, clear to Utah on the north, capital is pouring in and making mines out of prospect holes, and bonanzas from mines.

"It is conservatively estimated here that not less than \$60,000,000 has been put into Arizona and northern Sonora mines within the past sixty days. Since the purchase, less than a month ago, of the South Bisbee group by the Calumet and Hecla company, the influx of foreign capital has assumed the proportions of a flood. New York, Chicago,

Cleveland, Buffalo, Cincinnati and Rochester capitalists are making the heaviest investments. It is known that a deal has been made by which an eastern syndicate has secured large interests in the copper mines of the Green Consolidated company, at Cananea, and it is stated that the General Electric company is behind the deal, while another report declares that E. H. Harriman and H. E. Huntington are in the purchasing syndicate. The exact status of the big purchase cannot be ascertained, but W. C. Greene, president of the company volunteered the information while in Prescott, a few days ago, that the price ran well up into the millions. The Cananea mines are immense bodies of ore, with more than a sufficient quantity in sight to keep busy for fifty years the largest reduction plant in the world. Another of similar size is authoratively reported from Nogales, an eastern syndicate of New York capital, having closed negotiations for the purchase of the silver and copper mines of the Sonora Mining and Milling company, located at Tubutama. These properties are very similar to the Cananea mines, except that silver predominates at Tubutama, and copper at Cananea.

"New York, Ohio and Illinois capital is going into the country ranging east, north and west of Wickenburg. If that locality were located in Colorado, Wyoming or California, it cannot be doubted that such a rush as has not been known since the early days of California gold would occur. It is not exaggeration to state that for fifty miles about Wickenburg and west of the Colorado river, gold ore of the richest quality can be found everywhere. The wonderfully rich strikes which have been made recently at the Oro Grande mine, north of Wickenburg, have never been equaled in their enormity, and richness of the ore bodies, while every day brings reports of big finds in the country ranging from the White Picacho district west to the Harqua Hala mountains. The sale of a groupe of three mines adjoining the McCabe mine, near Prescott, for a total of \$150,000, was closed a few days ago by Frank Jager, at the head of a Chicago syndicate, and the Picacho Blanco company has added two more large groups of claims at a consideration of \$100,000 to its recent purchases of the Exposition and San Domingo mines.

"Denver capital in large quantities is going into the country south of Bill Williams Fork, and into placer fields in the Harqua Hala desert. Plans are being laid for several dams for the diversion of the water of the Colorado river and Bill Williams

Fork, for the operation of ancient and rich workings on the desert, where Indians, Mexican and Aztec workmen have worked out gold for centuries by their crude dry processes, while a score of dredging companies are cleaning the sands of the Hassayampa and Colorado rivers."

A MEAT FAMINE.

A shortage of meats is threatened in eastern markets this week as the result of falling off of the supply of western stock shipments. Receipts of cattle, hogs and sheep in the western markets during May shows a startling decrease, as the following figures will show:

The total receipts of cattle in Chicago, Kansas City, Omaha, St. Louis, St. Joseph and Sioux City for May, 1902 were 440,857, against 544,148 for May, 1901, a decrease of 103,291. For the same cities the receipts of hogs for May, 1902, were 1,411,446, against 1,793,625, a decrease of 382,179; of sheep for the same cities for May, 1902, 498,678, against 638,600 for May 1901, a decrease of 139,922 head. The total net decrease of cattle, hogs and sheep in May 1902, against May 1901 is 622,398 head.

A New Branding Device.

The new branding iron is a self-heating arrangement. The handle is a hollow tube wherein is held gasoline. On the end of the tube is an air pump to force the gasoline down and assist in generating a gas to heat the brand on the other end. This brand is made of copper and is heated from the inside. As no fire reaches the outside of the brand it always remains clean and also preserves its perfect lines. The heat on the brand is kept at a certain continuous temperature as long as the gasoline remains in the tube. Three hours branding can be done with one filling, and it only requires a few minutes to refill, not as long as it takes to heat a new iron under the old method. As fast as an animal comes into the chute and is squeezed the iron is there ready to do its work. The action is more rapid and created quite considerable interest among stockmen who saw it work. It can be used in wind or rainstorm, for when once the gas heat is generated, which is accomplished in from five to ten minutes, the machine is ready for continuous use. Tests for speed as compared to the old way have been made and have resulted in branding at the rate of better than 100 head an hour, but then the cattle were not brought from the cars fast enough, and the full service of the machine was not shown—Record Stockman.

Dr. Welch, dentist, Capitan, is in the city.

ANNOUNCEMENT.

I hereby announce myself as a candidate for sheriff of Lincoln County, subject to the action of the democratic convention.

JOHN W. OWEN.

I hereby announce myself as a candidate for Probate Clerk of Lincoln County, subject to the action of the Democratic Convention.

LESLIE ELLIS.

EASY TO FIND A MINE.

New Mexico is full of good mines, and capital is seeking investments in our territory, but development is retarded in many instances by the prospector holding his claim at prices that in the mining world, would be considered high enough for developed properties. This is not always so, but it is practiced to a degree that makes the results felt in nearly every mining district in our territory, the White Oaks country and its adjacent camps being no exception to the rule. The prospector and the operator occupy entirely different spheres in a mining district, and greater results would certainly come if each would avoid conflicting the interests of the other. Mr. P. C. Bicknell, who has studied these conditions carefully and who has at various times called attention to such matters through the mining press of the country, says in an article recently published in Prescott Prospector, that "any experienced prospector can get out and find a valuable mine within a few months," but who can get out and find two or three thousand dollars when he needs it? A prospector should confine himself to selling prospects—not mines—until he acquires enough by selling prospects to embark regularly in the mining business.

The Wickensburg News Herald says of Mr. Bicknell's statement:

Mr. Bicknell strikes the keynote to the whole proposition. How many old prospectors have we known or heard of who have prospected from British Columbia to Cape Horn, and who finally

died in harness—they all do with a few exceptions—that could have sold one or more prospects, at some time during their many years prospecting, for several thousand dollars—in many cases for enough coin to have supported them in comfort for the remainder of their days. But they never sell—with few exceptions—their prospects at prospects' prices when opportunity is offered, and we all know the final endings, whether in Patagonia or Alaska.

NO INSURRECTION.

It is now claimed that the insurrection is ended in the Philippines, in every part of the archipelago, except the few minor provinces, far distant from Manila. It is further alleged by the acting Governor that no armed insurrection exists in any of these, and that there is no reason why civil government should not be established in every province.

This may, in a measure, be true, but the hatred of American encroachment is so thoroughly inculcated into the Filipino, that temporary subjugation is all that can be claimed. The Filipino has fought the grinding despotism of Spain for the past three hundred years; he aided this government to drive the Spaniard from the Islands; he hoped that independence and self-government would be his reward, but when the flag of this country was hoisted over his domains, and he was made a subject of this, instead of a sovereign of his own government, his disappointment can only be measured by the effort he has made against American arms.

Filipino houses have been laid waste and the inhabitants slaughtered; those who have not met a worse fate, at the hands of our armies, have been reduced to beggary and its subsequent miseries; hence our opinion that the present inactivity of the Filipino does not mean acceptance of American domination, but is only a temporary stay of hostilities that will be renewed so soon as the broken strength of the Islander can be sufficiently mended to enable him to make a further fight for independence. So we believe will continue to be the conduct of the Filipinos toward this government for an indefinite period, or until his independence is completely and thoroughly established. We are pointing with pride to a free people in Cuba and at the same time shooting to death the Filipino who is fighting, starving and dying for this same freedom and self-government, in another hemisphere. That it is impossible to shoot christianity into, and patriotism out of, a people seeking the management of their own affairs, has been satisfactorily demonstrated by the English in India, where it has since English occupancy, required large stand-

Stock Farm For Sale

RANCH on the Ruidoso, 6 miles below Dowlins mill, 8 miles above Coe's orchard, 560 acres, 300 acres under fence and ditch, and in cultivation; 1 1/4 miles on the creek; two adobe houses. Good range adjacent; small orchard in bearing; a few acres in alfalfa. Rented for 1902; purchaser to take it subject to lease, receiving the rental. A considerable portion could probably be taken off the hands of the renter.

Inquire of or Write

Wharton Bros

WHITE OAKS, N. M.

ing armies to keep down insurrection. The results also, as they effect the inhabitants and the prosperity of the country, are again manifest in English-Indian rule, where one third the country produces is extorted as tribute to support the military power necessary to perpetuate English control, and so far as the propagation of christianity is concerned, it is a failure.

Will it not be so in the Philippine Islands? The Filipino will not take kindly to the doctrine of his oppressor neither spiritually nor in matters of government. The infusion of American blood, or the amalgamation of the Filipino race by the immigration of Americans is not even probable; the advantages of commerce to this country can never be what enthusiasts have claimed it would, neither will it ever be what it should be, for the reason that profitable trade relations cannot be established and successfully conducted with a hostile people, and it is not exaggeration to say that so long as they are held under the yoke of American control and treated as subjects instead of citizens of this government that they will remain hostile, and the ending of one insurrection will be the beginning of another, carrying with it the hatred and desparation of the previous one.

On the other hand, if the Fili-

pino were made to understand that the same course this country has taken with Cuba, was our intention in the Philippine islands, the war would be forever ended, and then we might be benefited as well as the Filipino by the friendly commerce that would follow. However, so long as American armies must stand guard around the islands there is little probability of ending insurrection or of establishing profitable commerce between the two countries.

A Combine to Beat Morgan.

Great Britain is threatening to build a large fleet of swift vessels, larger than the Oceanic, armed with rapid firing guns, to compete with the Morgan lines in the north Atlantic. There are to be six new 25-knot triple screw steamers, larger than the Oceanic and luxuriously fitted. Each ship is to carry eight rapid firing guns, having a broad-side of three 4.7 guns of the latest type. There is also to be a fleet of fast cargo boats, having a 16-knot speed, carrying 7,000 tons. Canada will grant a \$1,250,000 subsidy, annually, and the British government also increases its subsidies and will guarantee interest to the extent of 2 per cent on the capital invested.

The move is considered necessary as a countermove to the Morgan combine.

Children's Day Services.

It was children's day at Plymouth Church last Sunday, and the services were appropriate for the day. The decorations were handsome, the flowers abundant, beautiful and fragrant, the music and song-by instruments, birds and children, gladsome and full of sunshine; but the most attractive of all were the happy children in their holiday attire and joyful spirits. At the morning services the pastor gave a short sermon to the children. At night for the children's entertainment the church was crowded, and as suggested in last week's EAGLE, the program was immensely attractive. The mandolin club, led by Prof. J. L. Reyes, rendered several delightful marches. The singing by the Sunday School was excellent. The recitations by the children could not be surpassed any where, and some of the little ones did so well that we could not help feeling, that they were in line, some day, to rival Mrs. Scott Sidden or Clara Morris, so real and effective did they render their pieces.

The closing number, "Now I lay me down to sleep," was given by eighteen of the smallest girls in the school, clad as they would be when dropping off to sleep at night. It was a beautiful picture, as the groups of these little ones sang the "old-little prayer" and then dropped their little curly heads on each others shoulders, and fell asleep, singing and humming the melody of the prayer. And thus closed the day.

A. H. Norton has returned from a nine months prospecting trip into southwest Texas, in the Cinnabar fields of Brewster county. He represented a company of which S. C. Weiner of this place, is a member. The other members are business men of St. Louis. They have four sections of mineral lands in Brewster county, and have a dozen or more openings, some of them being very good showings, but it is the opinion of Mr. Norton that greater depths must be obtained before profitable mines can be had. The company intends to continue prospect work, and Mr. Norton will probably return, and take charge of the development work again as soon as he finishes his assessments at Jicarilla. He is interested in a number of claims in the Jicarilla district and is here now for the purpose of looking after them. His health is impaired from the long siege of hot weather he has gone through in Texas, and he must necessarily spend some time in the mountains to regain his health.

The oil people hung the tools in the well this week and were delayed several hours, but are pounding away again.

LOCAL and PERSONAL NEWS.

Mrs. J. W. Smith and children arrived from Texas, last Saturday.

Mrs. J. H. Canning came in from Nogal on yesterday's stage.

Miss Florence Wharton arrived home from Las Cruces, Thursday.

Mrs. Wallace Gumm is visiting her parents on Bonito.

The Jicarilla placer dredge is closed down temporarily.

There are now 250 men at work in the car shops at Alamogordo.

Chas. R. Keyes of Des Moines, Iowa, has been elected director of the School of Mines at Socorro.

Mrs. J. J. McCourt is here from El Paso visiting home folks. She will spend most of the summer here.

Brent Paden is home from Roswell, where he has finished another term in the Military School there.

F. C. Matteson, attorney at Capitan, is visiting his parents at Portland, Oregon.

The Nogal Republican says of Nick Bastion: "We understand that Nick is a candidate for sheriff.

Mrs. Ida Breed, teacher in the El Paso public schools, is in the city, guest of Mrs. Wm. Litell.

The Baptist Church will serve ice cream Saturdays afternoon and evening, across the street from Dr. Paden's drugstore.

Frank Cook, nephew of Mrs. A. Schinzing, Kansas City, returned home Monday. Mr. Cook has visited here more than two months and goes home delighted with our climate.

W. A. McIvers has struck water on his ranch north of White Mountains at a depth of 102 feet. This makes Mac a good stock ranch.

Mrs. G. W. Prichard, wife of the able attorney for the fifth judicial district, arrived in the city Sunday and is the guest of Mrs. C. F. Blackington on McCutchen avenue. It is rumored that Mr. and Mrs. Prichard contemplate becoming residents of Socorro. It is greatly to be hoped that the rumor is well founded.—Socorro Chieftain.

C. D. Mayer informs the EAGLE that we were too rough with Judge Collier's action in discharging the prisoner referred to in last week's EAGLE. Mr. Mayer states that Clark gave no instructions regarding the time the prisoner should be retained and that Clark did not see Collier at all. We find that the witness in the case, Ernest Asbury, was in town here Monday and that the Justice of the Peace did not even know who the prosecuting witness was, hence after holding the victim from Sunday to Tuesday evening at 6 o'clock he was turned loose without coming into court.

ANGUS HAPPENINGS.

[Bonito Valley Items.]
Regular Correspondence.

P. G. Peters is building an addition on the east side of his store building. Evidently the trade has greatly increased during the past season. Our post office is doing about as much business as any office in the county.

We are to have a telephone. The Eagle Co is building it from Carrizozo to Walnut, Nogal, American Mine, Parsons, Angus and to their Eagle Creek properties. They also expect to extend the line from here to Capitan. Our section, you see, is full of great possibilities.

A photographer has just taken a view of Angus which shows up a good size village.

Our section has not been blessed with much rain yet, although there has been good showers all around us.

Cattle Reported Dying.

Hon. I. B. Hanna, superintendent of forest reserves in New Mexico, who returned from the Gila forest reserve yesterday afternoon rode over 400 miles over the reserve the past ten days. He reports that cattle are dying by the score for the lack of water and feed and that all along his way were strewn dead and dying cattle; watering places had to be watched by the cowboys as the cattle were too weak to leave the water after they had reached it. He predicts that unless there are heavy rains soon in southwestern New Mexico many cattlemen will have to go out of the business.—Socorro Chieftain.

The White Oaks Social Club was entertained by Mr. and Mrs. L. W. Stewart Tuesday night and general good time is reported by those who attended.

Mr. and Mrs. W. C. McDonald, their daughter Frances, and Miss Margie McCourt, were up from Carrizozo ranch Tuesday.

Case United States Vs. D. Perea for embezzeling postoffice funds was continued at the present term U. S. court at Socorro and bond raised from \$2,000 to \$4,000.

It now looks as though the rainy season has begun, showers are coming now almost daily.

Nogal has organized a baseball club and is offering to play anything in Lincoln County.

The statehood bill and delegate Rodey have both gone over to another term. So mote it be.

Binger Herman has gone on record as against any measure of legislation for the leasing of the public domains.

Las Vegas has a \$10,000 damage side walk suit. Good hint for New Mexico towns to put side walks in better condition.

The Pecos Valley Lines.

For The Stockman Greatest

stock raising country in the world, with a direct transportation route above the southern quarantine line to and from all markets and the great pasture lands of the west and northwest.

or The Homeseeker Cheap

farming and grazing lands in the Pandhandle of Texas. Lands under irrigation in the Pecos Valley of New Mexico, producing the finest fruit, melons, alfalfa, celery, garden produce etc., etc. Business opportunities of all kinds in a new and prosperous country.

For The Healthseeker A

climate already famous for its health producing qualities. Altitude not too high, air pure and dry, temperature even with no extremes of heat or cold.

And the pleasure seeker will find something to see and something to do.

Plymouth Church.

At Plymouth church next Sunday morning at 11 o'clock. The pastor Dr. Miller, will preach on "what is pure religion." No services at night. Christain Endeavor meeting at 7 o'clock—every body invited.

What about that Fourth of July celebration? Are we going to do something?

Buchanan and wife were here from El Paso the first of the week. Mr. B. represents Brown & Manzanares Co.

F. A. Du Bois was here from Corona yesterday. His company is doing quite a good business there and the country is rapidly settling up with a progressive class of people.

In cleaning up the old hotel across the street from the EAGLE block, a small bag of rich gold ore was discovered, showing small nuggets and many wires of pure metal.

RED CLOUD MINING DISTRICT.

What Outside Parties Are Saying About This Camp and Its Future Possibilities.

NEAR THE ROCK ISLAND RY.

Plenty of Timber and Water-- Growth Being Watched by Outside Capital.

W. H. Worden, who is interested in the district was interviewed by the El Paso Herald as follows:

W. H. Worden, special agent of the Equitable Life Insurance society and formerly a railway conductor, is in the city. Mr. Worden is interested in mining in New Mexico.

With C. E. Ames and S. F. Hostetler he is interested in some very promising prospects in the Red Cloud district, in the Gallina mountains, and seven miles north of Gallina station on the El Paso & Rock Island railroad.

Mr. Worden reports that their properties consist principally of the Lead King and the Willie, that adjoin on the south of the Red Cloud mine, the property of Judge McDougal and Judge Lowe, the Rock Island attorneys.

On the Lead King the owners have a shaft sixty-five feet deep which shows up a four foot vein of lead carbonates, showing a fair percentage of copper, a thirty foot drift is being run from the main gulch which shows considerable ore in spots but have not struck the vein as yet.

Three miles west of these claims Messrs. Worden, Ames and Hostetler also have the Blue Cloud mine and four other claims entirely unprospected excepting the first. On this they have a twenty-five foot shaft, and the six foot ore body running well in silver and lead assays 24 per cent copper.

Mr. Worden says they have had six men working on these claims doing assessment work and but little more, but that they look so promising they are now fixing up their camp in the way of houses and more permanently and preparing for considerable development work.

He says the veins in this section are of good size, lime porphyry contact, with iron cropping, and almost vertical.

Water is low this year but plenty can be developed at no great expense. There is plenty of oak, pine and quaking asp timber.

The district is only seven miles from the Rock Island railroad at Gallina station, and Mr. Worden figures that ore can be put on the cars for seventy-five cents per ton.

The Red Cloud mine is owned by Judge McDougal and Judge Lowe, attorneys for the Rock Island, and other men interested in the road are also owners in the

mine. Judge McDougal is expected this week to resume work on this mine, to put in a hoist, etc. This is a very promising mine. They have about a car load of ore on the dump that runs 35 and 40 per cent copper and runs well in silver.

The Taliaferro mine in the same district is a very promising property owned by Taliaferro and Spence of White Oaks N. M. They have a shaft down 200 feet and have ore running as high as 35 and 40 per cent.

Owing to the nearness of transportation, timber and ease of getting water, and the rich ores, Mr. Worden says miners are highly encouraged at the prospect of this camp and its growth can be watched with much interest.

J. E. Hunter, conductor on the El Paso and Santa Rosa and Rock Island, who has a run between El Paso and Santa Rosa has interests in some promising mining claims in the Gallinas mountains in New Mexico. G. W. Kennedy and John A. Phalen, also R. I. men and A. C. James an outsider are partners with Hunter.

Their claims are in the Red Cloud district, right near the Red Cloud mine about seven miles from Gallinas station on the Rock Island. They are all new locations and nothing has been accomplished yet but doing the assessment work. Out of assays of surface rock from two of the claims 22 per cent copper and 12 ounces of silver were obtained.

Jail The Beef Trust.

Mr. Bryan asks President Roosevelt, through the Commoner, to send the beef trust to jail. He declares the President is a courageous man, and asks him why he hesitates to punish the misdeeds of concentrated wealth. He says the President has shown by beginning a civil action that he believes the law is being violated. A fine, he says, is insignificant, and a term in the penitentiary is the proper remedy.

"The Best is the Cheapest."

Not how cheap, but how good, is the question.

The TWICE-A-WEEK REPUBLIC is not as cheap as are some so-called newspapers. But it is as cheap as it is possible to sell a first-class newspaper. It prints all the news that is worth printing. If you read it all the year round, you are posted on all the important and interesting affairs of the world. It is the best and most reliable newspaper that money and brains can produce—and those should be the distinguishing traits of the newspaper that is designed to be read by all members of the family.

Subscription price, \$1 a year. Any newsdealer, newspaper or postmaster will receive your subscription, or you may mail it direct to THE REPUBLIC,

A bill has been introduced in Congress appropriating \$10,000,000 for the purchase of 2,000,000 acres of land for a national forest reserve in Virginia, North Carolina Georgia, Alabama and Tennessee. Depew said the project was favored by President Roosevelt. He predicted that unless the reserve was established, that within ten years, the great hardwood forests within the proposed reserve would be destroyed.

HOW TIMBERS ARE PICKLED.

Special to The Herald.

ALAMOGORDO, June 2—The tie and timber preserving plant was started up last week at Alamogordo, as noted several days ago in The Herald. The plant is owned by and is a side issue with the big lumber company here. Thinking that the principal features of the process would be interesting, The Herald's representative visited the plant, and was courteously received by S. S. Hopper, manager of the lumber company, and conducted over the plant. The buildings contain a retort room, 22x120 feet; boiler room, 32x70 feet; machinery room, 22x70 feet; also ware rooms, etc. A system of tracks extend from the big retort room over the yards upon which the cars are moved by means of stationary engines and cables. These cars are steel throughout with curved arms on the side, and thirteen of them will go into each retort loaded with ties, at one time.

The process employed is the zinc-tannin process which is probably the most efficient cheap method of preserving railroad timbers. The two very essential appliances of the process are two long cylindrical retorts, 106 feet in length and six feet in diameter, each will hold about 500 ties with the cars.

When charged the big circular end door is closed steam tight by heavy bars. The first step in the treatment consists in subjecting the big boiler-like retorts and contents to a steam pressure. This serves to free the wood from natural saps and volatile matter and in consequence leaves it rather porous. Samples of water from the steam condensers are frequently drawn and as the steaming continues the water becomes darker and darker; this is continued until the water becomes clear again. After steam is turned off the air pumps are set to work and a twenty-two inch vacuum created which serves to draw the moisture and condensed steam from the wood.

The next step is the introduction into the retort of a solution of zinc-chloride and commercial glue, one and a half to three per cent zinc chloride, depending on the character of the timber being treated, and at the same time one half of one per cent of the glue. The solution is kept under a 100 pound pressure for several hours by means of pumps. Hydrometers indicate the amount of chemicals absorbed and when it becomes sufficient the solution is forced back into its 100,000 gallon tank by means of compressed air.

The next step is the introduction into the retort a one half of

THE NEW YORK WORLD THRICE-A-WEEK EDITION. The Most Widely Read Newspaper in America.

Time has demonstrated that the Thrice-a-Week World stands alone in its class. Other papers have imitated its form but not its success. This is because it tells all the news all the time and tells it impartially, whether that news be political or otherwise. It is in fact almost a daily at the price of a weekly and you cannot afford to be without it.

In addition to news, it publishes first-class serial stories and other features suited to the home and fireside.

The Thrice-a-Week World's regular subscription price is only \$1.00 per year and this pays for 156 papers. We offer this unequalled newspaper and WHITE OAKS EAGLE one year for \$2.00.

THE COMMONER.

[Mr. BRYAN'S Paper.]

The Commoner has attained within six months from date of the first issue a circulation of 100,000 copies, a record probably never equaled in the history of American periodical literature. The unparalleled growth of this paper demonstrates that there is room in the newspaper field for a national paper devoted to the discussion of political, economic, and social problems. To the columns of The Commoner Mr. Bryan contributes his best efforts; and his reviews of political events as they arise from time to time can not fail to interest those who study public questions.

one per cent solution of tannin, which is held under the same pressure as the previous solution. After several hours in this the liquid is forced back into another 100,000 gallon tank by means of compressed air, and the treatment has been completed, and the ties are ready for shipment.

The practical effect of the treatment is that the zinc chloride acts as a preserving agent and the tannin acting on the gelatin in the glue fills the tissues of the wood with a tough substance which is more or less impervious to water. The process has long since passed the experimental stage, and makes underground timbers last two to four times as long as those not treated.

Mr. Hopper states that they have far more orders than they can fill, having been forced to turn down a large order from New York. The product for the next few months will be used on the Dawson branch of the Rock Island.

President Roosevelt has promised to try to visit the Albuquerque fair.
