Stars Win Game.

The Brady Stars showed their ability to "come back" by defeating the Brady "ex-professionals" in a closely contested game at the ball park Tuesday afternoon, by a score of 8 to 3. The game was enjoyed by the rooters and was interesting throughout. The feature of the game was the batting of J. J. Dent, of the X-Ps. Batter-

ies: Davidson and Hurlbut for the ex-Professionals; Tipton and Fuller for the Stars.

J. W. Norris and wife were here yesterday enroute to the San Saba to spend a week fishing. They are former Brady residents, but are now living in Brownwood.

PROHIBITION PARTY.

To Meet in Fort Worth Saturday, July 29.

Houston, Texas, July 25.—Hon. Thos. H. Ball, chairman of the Statewide Prohibition Amendment Association, has issued a call requesting the executive committee of the association to meet at Fort Worth on Saturday, July 29, to determine the advisability of contesting the recent election. A short time before the issuance of the call Col. Ball issued a signed statement, in which he stated the antis had probably won by not more than 5,000 majority, although he was confident the opposition had not won legally.

His call to the executive committee follows:

To the members of the Executive Committee State-wide Prohibition Association: You are hereby called to meet in session at Fort Worth Saturday, July 29, at 10 a. m., to determine the advisability of contesting the result of the prohibition amendment election and consider such other matters as may properly come before the meeting.

Be present, if possible, at so important a meeting.

If impossible to come, send a cool-headed and well-informed proxy.

Chairmen and members of the county executive committees are invited to come in person or by proxies, and if not convenient to attend I will be glad to have them address me at Fort Worth care of Judge A. W. Walker, giving me their views and information as to conditions surrounding the late election and advice as to our course.

Prohibitionists generally are requested to write their views and send such information as they have or can procure in time to reach me at the meeting, as to any fraud or irregularities in the recent election, and particularly as to the negro and Mexican vote and of foreigners who may not have been naturalized or who have not properly declared their intentions.

We want particularly information as to the number of these classes voting, as compared with their normal vote, and the way in which their poll taxes were paid and also as to the methods used to solidify the vote for the antis.

We especially desire to know, if possible, how the election was conducted in each box in the State and as to any illegal voting or returns.

Daily and weekly press not

receiving this call, please copy.

County chairmen and friends will please verify the returns when cast up by the commissioners courts.

Regarding the result of the election, Mr. Ball said on Monday afternoon:

"Complete returns will likely show an anti majority of less than 5,000 votes.

"The law passed by the last legislature provides for a contest of the election by either side if dissatisfied with the result on account of fraud or illegal voting or irregularities that affect the result.

"Of course I am not in a position to say whether or not the pros will contest. That can only be determined by a conference with friends of the cause.

"I am sure, however, that the question will be taken either into the courts or back to the people as soon as it can again be submitted, which can be done at any regular session of the legislature.

"It appears from the reports received that large numbers of negroes and Mexicans and a large element who do not usually pay their poll taxes have used poll tax receipts paid by themselves or paid for them and that the election result has thereby been determined adverse to State-wide prohibition.

"The local prohibitionists have voted larger majorities for State-wide than for local prohibition, just as we claimed.

"I advise deliberation and calm judgment and action, and that prohibitionists consider and proceed to solve the great question of how constitutions should be made with patriotic and thoughtful purpose."

Mr. and Mrs. Frank Watters left on Saturday night for Temple, where Mrs. Watters entered the King's Daughters hospital for treatment. Advices from Mr Watters are to the effect that Mrs. Watters was operated upon Monday morning. The operation was a serious one, Mrs. Watters being under the knife one hour and fifteen minutes. Later reports are that she is doing as well as could be expected, although suffering considerably. She is under the care of Miss England, a trained nurse, who became well and favorably known to the people of Brady during her stay here a few years ago.

Dr. W. M. Burgess returned Tuesday with his family from Winchell, where he had been conducting a very successful

Bargain Days are Not Over

Here are a Few Specials We Offer in Piano Bargains

Some of these pianos have only been used a week, some a month and some only a few years, but they are guaranteed to be in good shape. We are going to sell every used piano on our floor, as we are cleaning out our stock. Remember, it is better to buy a good used piano than it is to buy a cheap new piano.

We can make prices the other concerns can't, and our terms will meet your requirements.

We will ship any piano we handle on trial, prepay the freight, and after you have tried it if you think it a bargain all right; if not we will call for it without one cent of expense to you. Is this fair? Here are a few of the many bargains we have to offer now. Of course we could not guarantee to keep them long at these prices.

A \$350 Emerson piano in fine shape	\$175
A \$325 Davis & Sons piano, case only scratched	\$135
A \$450 Chickering & Sons piano, good shape	\$190
A \$500 Peas piano, ebony case	\$75
A \$400 Kimball in good shape, used a year	\$185

Remember we have more bargains. If you don't find what you want, write us for catalogue and prices. We are factory distributors for the following well known makes of pianos: Weber, Mahlin & Sons, Chickering Bros., Packard, Bush & Lane, Kimball, Leyhe; also the Steinway, Weber, Steck, Wheelock & Stuyvesant pianola pianos.

TRAINS TO SAN SABA

G. C. & S. FRY ANNOUNCES SERVICE TO THAT CITY.

Keenan Announces Round Trip Fare of \$1.95—Tickets Good Until August 12th, 1911.

W. D. Crothers is in receipt of advice from General Passenger Agent Keenan, of the Santa Fe, to the effect that two trains a day will be run to and from the San Saba Fair on all four days of the celebration, August 8 to 11, inclusive. The following is in part the letter received.

"Our San Saba extension between Lometa and Brady will be formally opened for business commencing August 12th, and for the time being we will operate a mixed passenger and freight train leaving Lometa at 9:20 a. m. and arriving at Brady at 2:10 p. m.; returning, leave Brady at 3:00 p. m., arriving at San Saba at 5:25 p. m. and Lometa 7:20 p. m.

"The schedule will make connection with all trains at Lometa and will make direct connection to all points reached by the Santa Fe lines. As a temporary measure, we will during the San Saba fair, operate a train between Lometa and Brady as follows:

First Train.

Lv. Brady	5:30a.m.
Ar. San Saba	7:45a.m.
Lv. San Saba	7:50a.m.
Ar. Lometa	8:50a.m.
Lv. Lometa	9:50a.m.
Ar. San Saba	10:50a.m.
Lv. San Saba	6:30p.m.
Ar. Brady	8:45p.m.

Second Train.

Lv. Lometa	8:00a.m.
Ar. San Saba	9:00a.m.
Lv. San Saba	9:10a.m.
Ar. Brady	11:25a.m.
Lv. Brady	12:45p.m.
Ar. San Saba	3:00p.m.
Lv. San Saba	6:00p.m.
Ar. Lometa	7:00p.m.

Mr. Keenan goes on to state that this latter schedule will be in effect from August 8th to 11th, inclusive, and calls attention to the fact that the excursionists may spend the entire day or 3 1/2 hours at San Saba as he may desire. On account of the track not being properly ballasted, Mr. Keenan advises that the trains will, of necessity, be run slowly, and also advises that there will be no ticket agent at Brady until the 12th. Consequently tickets will be sold on the train at all points between Brady and Algeria, inclusive. A round trip fare of \$1.95 is announced, tickets on sale August 8 to 11th, inclusive; return limit, August 14th.

Grading Depot Site.

D. J. Griffith's grading outfit has just completed a crossing beyond the material yards and are back again at work on the depot site. When it was at first announced that the grading of the depot grounds would begin it did not look like very much of a task to the layman, but those who have observed the operations have begun to realize before now that the task was no small one. Little by little, the bluffs and rocks are being torn away and the site graded and leveled. And in this connection the grader attracts no little attention. It is a monstrous affair, using sixteen head of big mules, ten being driven in front of the grader, while six are worked behind. The dump wagons follow alongside the grader, being loaded by means of an elevator which carries the dirt as it comes off the plows through a chute and dumps it into the wagon. As fast as one dump wagon is filled another is waiting to take its place. The dirt is then dumped into the ravines and gullies alongside the right-of-way.

The grading on the depot site is rapidly nearing completion, and it is expected that the work will be finished within the next two weeks. The depot will be placed on the north side of the track, west of Bridge street. Work will probably begin on the depot as soon as the track is in shape for the material to be hauled over it, and be completed by the time regular passenger service is inaugurated on the Santa Fe.

Antis Win by 5,144.

Late returns did not materially change the result of the Prohibition election as announced in the last issue of The Standard. According to the Fort Worth Record the following are the figures:

For Prohibition	231,821
Against Prohibition	236,965
Majority Against Pro.	5,144
Total vote ac'ed for.	468,786

Zapata county has the unique distinction of being the only county where every man thinks alike. It cast 286 votes against the amendment, and none for.

WOOL BILL ASSURED.

Passage Thursday in the Senate Likely.

Washington, July 25.—A lightning change came over the Senate situation today as a result of the sudden decision of several insurgent Republicans to support the House wool bill rather than to accept responsibility for failure of all attempts to correct the evils of Schedule K, and even Senator Penrose conceded this evening that the present outlook for the passage through the Senate on Thursday of the Democratic revision of the wool schedule as it came from the House of Representatives.

GETS RESULTS.

Last week G. A. Nelson lost \$15 in currency somewhere on the streets of Brady between the Commercial National bank and the postoffice. He placed an ad in the local columns of The Standard, more as a matter of course than in hopes of having his money returned. Within 24 hours after the issue was placed in the postoffice the money was returned to him by F. M. Campbell, whose little son had picked it up on the east side of the square. The bringing of the finder and loser together was the direct result of The Standard ad.

This little incident proved two things conclusively: First, that Brady citizens are, above all, honest; second, that Standard ads are read and bring results.

Every week we receive voluntary testimonials as to the efficiency of Standard ads. W. K. Gay's pony disappeared a short while ago, and for several weeks no trace was to be found of the animal. A little "lost" local in The Standard was seen by a reader and through it the horse was returned to its owner. A friend of ours offered two cows for sale and within a few hours after the paper was published he received half a dozen inquiries about the cows. Some several months ago a gentleman had money to loan on vendors lien notes, and although the ad appeared in but one or two issues, we are still receiving replies.

These are but a few instances noted at random. They are illustrative of what a small ad placed in our columns will do. Standard advertising pays because it reaches the people. That's what brings results.

Add to Brady's many other advantages, good roads and good water. The bonds are being printed.

King Manuel is said to be homesick and anxious to see his native Portugal. That's nothing, Claude Callan has been homesick ever since the day he left Brady.

Don't forget to begin now to prepare your exhibits for the Brady Fair in October. Every community should be represented, and every community can have a creditable showing if they will but take interest in an exhibit and prepare for it now.

The editor of the Carrizo Springs Javelin proposes to shake hands and call it off. This is the way he does it: To all my friends, both anti and pro, who have at times been un-courteous enough to call me a "pro", an "anti", a "rider on the fence", a "Christian", a "heathen", the "publisher of a rag unfit for Christian homes", the "publisher of the best and cleanest paper in Carrizo Springs", and many other kind and unkind things, I hereby extend the right "paw" of good fellowship, promise never to do it again.

Lady in Goodwater Describes Her Distressing Experience and Tells How She Was Finally Relieved.

Goodwater, Mo.—"Ever since I was a little girl," says Mrs. Riley Laramore, "I was a great sufferer from dyspepsia. I suffered misery after eating, and had terrible heartburn. I thought I had to suffer this way as long as I lived, but when I began to take Thedford's Black-Draught, in small doses, every night, the heartburn was all gone in a few days, and I could eat without distress.

I took two small packages in all, and although that was some time ago, the dyspepsia has not returned. I speak a good word for Thedford's Black-Draught whenever I have the opportunity."

If eating causes distress, we urge you to try Thedford's Black-Draught. It cleanses the system, helps the stomach to digest its food, regulates the bowels, and stimulates the liver.

It acts gently and is without bad after-effects. Try it. Price 25c.

INTRODUCING OUR PROFIT SHARING PLAN

For some time past we have been thinking of some plan whereby we could show our appreciation of the patronage with which we are honored by the people of this community. We wished to show this appreciation in a substantial and practical way. We believe that we have decided upon a plan that will be more than satisfactory to our customers. We call it

Our "Profit Sharing" Plan

whereby part of our profits of this business will be returned directly to its patrons, viz: We have purchased a large assortment of housewares in crockery and glassware and domestic and fine imported china, in both useful, needful and decorative ware. This assortment is now on display in the store.

Hereafter each patron of this store will be given a "COUPON," representing each 25c purchase made here. We will also issue "CERTIFICATES," one of which is equal to four coupons. In our gift assortment each article will be tagged with the number of certificates required to obtain that article. Thus you can add constantly to your household needs and decorations FREE OF CHARGE.

This assortment of gifts will be added to from time to time by us according to the indicated wants of our patrons. There will always be a large variety for you to select from.

Now, don't let anyone tell you that you pay for all these gifts, for we will sell dependable merchandise as low in price as any competitor.

Always we will crowd the last penny's worth of merchandise in a dollar that it is possible to get anywhere. Come and look through our New Gift Assortment. Save your coupons. See the beautiful presents you can get here ABSOLUTELY FREE OF COST.

We expect by our PROFIT SHARING PLAN to promote continuous patronage at this store, which will prove very beneficial to all concerned, you and us.

Leak! Leak! Leak!

For years and years a great objection to using a fountain pen has been on account of the pen leaking ink, and either blotting and blacking the paper, or "inking the fingers," or both. At last a man by the name of Geo. Parker, of Jainesville, Wis., invented a fountain pen with a "Lucky Curve," thus prohibiting any leaking on the fingers or at any point of the pen.

The name of the pen is Parker's Lucky Curve Fountain Pen and everyone is guaranteed by Jones Drug Co., "Where the People Trade," SPECIAL AGENTS.

BALLOT BOXES

Commissioners Courts Can Not Count Vote.

Austin, Texas, July 25.—County Judge C. E. Johnson, of Coryell county, was today advised by Assistant Attorney General C. E. Mead that under his construction of the law the County Commissioners' Court has no right to open ballot boxes and count the votes polled at Saturday's election. A number of requests for a ruling on the same question has been made upon the Attorney General's Department during the last two days.

BRADY, TEXAS, July 28, 1911

LOYALTY TO TEXAS.

There is nothing that appeals to the citizen with rich, red blood in his veins, so much as patriotism. Loyalty to home, to state, to country. And no state can boast of greater loyalty than can Texas. Wherever her citizens may be, whether in the north, east, south, west, you will find them devoted to the greatest state in the Union. It makes no difference if they are Texans by nativity or Texans by adoption, the same feeling predominates.

Visitors abroad who meet up with former Texans all tell the same story—the interest exhibited in Texas and Texas' affairs, and the expressed desire to return and again make their home in Texas. Small wonder it is, with such patriotism on the part of her citizens that Texas has taken foremost rank among the states.

Every year sees the homecoming of hundreds and thousands of former Texans, bringing with them friends who have heard of and are interested in Texas. And thus it is that the fame of the greatest state is carried to every corner of the Union, for Texas never fails to impress the visitor with her grandeur, her unlimited resources, her wonderful opportunities, her development and her possibilities.

CORRECT DATES.

Unintentionally in our last issue, The Standard editor endeavored to have the date of our annual celebration come a month earlier than it should have been. The dates for holding the Brady Fair, the Confederate reunion and the celebration of the advent of the Santa Fe into Brady, are October 11, 12 and 13th, and unless the unexpected happens, these dates stand.

These are the days when joy will be unconfined; when Brady will don her best frock and play hostess to the hundreds of citizens who will come to help make the occasion a memorable one.

So, while September 14th is the date set for the arrival of the first Santa Fe train, October 11, 12 and 13th are the dates for the celebration of the event, in conjunction with the others above mentioned.

C. H. Haggard, a farmer near Mt. Pleasant, claims to have discovered a novel method for keeping his cotton clean. A drove of twenty-five geese was turned loose in the cotton field and they cut out the grass and have kept it out ever since. This is not a new discovery by any means. Long ago farmers in the older Southern States used flocks of geese to chop the grass out of their cotton fields and found them very serviceable, but it is not written that geese have anywhere been depended upon to any great extent to keep the fields clean of grass and weeds.—San Antonio Express.

PUBLIC OWNERSHIP.

Before the close of 1911 Winnipeg will be looked upon as the greatest exponent of public ownership on the American continent. It will have by that time an investment of over \$3,000,000.

It is nearly a quarter of a century ago since the city council laid the foundations of this program by buying out the Winnipeg waterworks company, and from that day the citizens of this city have been supplied with civic water at civic rates. So successful did the venture prove that when the city decided to lay asphalt pavements some years later it was decided to install a municipal asphalt plant, and the many miles of pavement in this city have been laid from the product of this plant.

Whenever a new street is to be paved with asphalt the city calls for bids for the work. At first several firms tendered, but their figures could not compare with the estimates of the city engineer, so the city did the work by day labor. Once, however, a private firm secured the contract for asphalt paving a street, but the work was done so poorly it had to be pulled up and relaid by the city a year later, despite the fact that it had been little used.

Today all the streets in the business districts and many of those in outlying sections are paved with asphalt which has proved eminently satisfactory, despite the excessive cold during the winter months and the summer heat.

From the small steam pumping plant which supplied Winnipeg with water from the Assiniboine river the waterworks system has grown into seven artesian wells and ten pumping engines. The average daily consumption is approximately 7,000,000 gallons. In ten years the population of Winnipeg has grown from 50,503 to 107,000, and the city fathers, looking for a corresponding, if not greater increase during the next ten years, are now arranging for sinking two more artesian wells.

For fire purposes the city has a high pressure plant which pumps water from the Red river in specially constructed mains. It has a capacity of 9,000 gallons per minute and cost slightly more than \$1,000,000, including the mains, hydrants, machinery, etc. In all, Winnipeg's water system has stood the city barely \$5,250,000.

Trouble with the Winnipeg electric company, which controls the street railway, gas, electric light and power franchises here, resulted in the city voting \$3,000,000 for a municipal power plant to be erected on the Winnipeg river, sixty miles from here. The plant has taken two years to build and will be ready for operation by July 1 of this year.

With the near completion of this plant and the prospects of the city building its own street railway system, Sir William Mackenzie, president of the Winnipeg electric, who, with Sir Donald Mann, is owner of the Canadian Northern railroad system, made an offer to the city. Both parties to the negotiations were very reticent for some days over the terms of the offer, but it has been announced that the company offered to turn over all the bonds of the company at 250, making the purchase price some \$18,000,000.

At the last meeting of the city council, W. Sanford Evans, mayor, announced that application will be made at once to the Manitoba Parliament, permitting the city to buy out the Winnipeg electric company, with all its plants, works, holdings and franchises. Last year the company made a net profit of over \$1,000,000, after paying the city five per cent of its gross earn-

This Newspaper-- And Your Store!

Would you consider that this newspaper was well managed if it issued according to the mood of its publisher—instead of at regular, stated and invariable intervals? Would you think it a good newspaper if it printed a 12-page issue at one time—and a one-page, hand-bill size, issue at another time? Would you feel that it was serving its constituency effectually if, now and then, it suspended issue entirely—to be resumed at some time when the publisher felt inclined?

Your store serves your patrons with store-news through its advertising. They assume that there is always store news worth telling—store news that is important to them.

Is it not a poor policy for a store, as it would be for a newspaper, to serve its patrons in a spasmodic, undependable way? If your store is important to the people of the city, your advertising is important to them all of the time—not merely now and then.

The size of your advertising space should not vary any more than the size of a newspaper varies, and the appearance of your advertising should be as frequent and as regular as the appearance of this newspaper.

ings and taxes, so by buying the holdings of the company at \$18,000,000 the city will make a profit of more than 11 per cent under present conditions.

Winnipeg's telephone system is also conducted under public ownership, for it is a portion of the system extending all over the Province and owned by the Manitoba government. In this city are more than 17,000 telephones, the rates being \$24 per year for residences and \$48 for office telephones.

Winnipeg owns its stone quarries in the vicinity of the city, and there under a staff of civic employes mines the products for paving the macadam streets and crush stone for many purposes.

A force of city employes also collect the city garbage and refuse and take it to the civic incinerators for destruction and when a Winnipegger dies he can be buried if he so desires in the municipal cemetery.

The success of municipal ownership in Winnipeg, for every utility has shown a profit under civic management, has urged other Western cities to action along the same lines and many of the public utilities in Edmonton, Calgary, Regina, Saskatoon, Medicine Hat and a dozen smaller places are owned by the people.

There is now but little more for Winnipeg to own in the way of public conveniences. It already has several large parks and some two dozen smaller ones, but now that the opening of St. Andrew's Rapids has made navigation on the Red river possible the city has let a contract for a large wharf within the city limits, and several of the city fathers have been inquiring the cost of barges, with a view to bringing down wood from the far North for the municipal wood yards.—Winnipeg (Man.) STUNG!

An invitation saturated with attar of roses and signed by 31 of San Saba's sweetest and most lovable young ladies, has been received by us. We accept and will attend the big fair, August 8-11. Harry Schwenker, the old-maid quill driver of the Brady Standard is not in a position to realize the joy and bliss that an invitation like ours causes.—Rochelle Record.

We asked 437 San Saba girls about this and they all, as with one voice, plead not guilty. The above 31 must be Richland Springs girls. Anyway, we presented the matter to the fair directors and they agree to give a pass to any young man editor who can present such an invitation. Come right along and bring Schwenker, of the Brady Standard, with you.—San Saba News.

Forgetfulness.

A minister's wife, a doctor's wife and a traveling man's wife met one day recently and were talking about the forgetfulness of their husbands, the Odessa Democrat records. The minister's wife thought her husband the most forgetful man living, because he would go to church and forget his notes and no one could make out what he was trying to preach about. The doctor's wife thought her husband had a poorer memory still, for he would start out to see a patient and forget his medicine case and travel nine of ten miles for nothing. "Well," said the traveling man's wife, "my husband beats that. He came home the other day and patted me on the cheek and said: 'I believe I have seen you before—what's your name?'"

"Yes, sir," Jim admitted, "but at the month's end they are going to hang him."

A religion that can swim, skate, play ball, tennis, row a boat, sing, laugh and enjoy life in every bright, wholesome way. We have made religion oppressive, depressive, repressive and rarely expressive of any feeling except painful seriousness. Our religion lacks rich blood, tense, vigorous muscle; a strong, regular pulse.

Why not tell the people of our churches and Sunday schools that religion brightens the eye, lightens the heart and brings to life its richest enjoyments?

What we need is not a religion for a cemetery, but for the office, the store, the shop, the school, the farm and the home. Tombstone piety is impressive in the moonlight, but sunlight means health, heartiness, long life, success and contentedness of mind.—The Christian Republic.

Cutting Them Short.

A minister, during his discourse on a Sabbath morning, said:

"In each blade of grass there is a sermon."

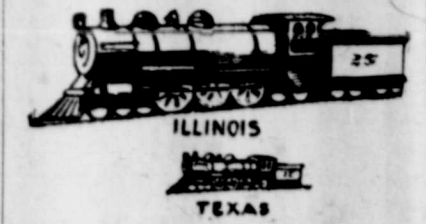

The following day one of his flock discovered the good old man pushing a lawn mower about his front yard and paused to say:

"Well, parson, I'm glad to see you engaged in cutting your sermons short."

The Steam Engine

The record of civilization is accurately written in the progress of the steam engine. The use of steam has enlarged the purposes of the human race, built up civilization and developed mankind. Of all the potential energies, it is the most useful and it renders a service to every living creature.

The steam engine has been in more political brawls than any other force in nature and the politicians have been trying title with the owners ever since it became a factor in transportation. This mighty force of nature has often been handicapped by having boards and commissions placed over it who have neither knowledge or experience in the business and free railroads have become as popular a campaign issue as free trade.

Railroad mileage is the yard stick of progress. We have in Texas 14,000 miles of railroad and rank first of all states in the Union in mileage. In miles per area, we rank fourth, having 615 miles of railroad per 100 square miles of territory. In mileage per population, we rank nineteenth, having 38.42 miles of railroad per 10,000 people.

The comparative test of railroad facilities is in miles per area. If we had the mileage per area that the state of Illinois has we would have 55,500 miles; that Indiana has 54,000 miles and that Iowa has 46,000 miles. We have only 14,000 miles.

According to the last interstate commerce commission report, compiled June 30, 1909, we constructed 273 miles during the previous year and ranked fourth in the list of states in the Union in construction during the year. We are more in need of railroad construction than any other state in the Union. The railroad development of Texas has not kept pace with the development of other lines of industry. Our railroad mileage during the past ten years has increased 35 per cent; the value of manufactured products has increased 92 per cent; the value of farm lands 157 per cent and the development of all lines of industry has been retarded for want of railroad facilities.

Texas is the most important field in railroad construction of any state in the Union. According to the 1910 comptroller's report, we have forty-seven counties in Texas without railroad facilities and we have approximately 40,000,000 acres of territory that is a distance of ten miles and over from a railroad.

The Texas Negro

The Texas negro is primarily a farmer and the race has made little progress in commerce, mechanics, science and art. Freedom has carried with it responsibilities which have weighed heavily upon the colored race and after a lapse of half a century of freedom they are still the "drawers of water and the hewers of stone." The young are dependent upon the white man for their education and the aged and infirm are his wards.

The Slave Negro.

In 1850 there were 158,595 slaves in Texas, rendered for assessment at \$106,888,920, giving an average value per slave all ages of \$672.71. The assessed value of all land in Texas at that time was \$122,294,764. The slaves were almost equal in value to all farm property, constituting 36 per cent of the taxable wealth of the state. The state and county revenues derived from taxing slaves annually was approximately \$1,000,000.

Taking into consideration the per cent of true value of property rendered for assessment in 1850, and the rate of interest prevailing at that time, we find the negroes of all ages producing a net revenue of \$100 each per annum. Since the war the colored race in Texas has been able to accumulate approximately \$75,000,000, which is equivalent to \$2 each per annum while masters of their own destinies against a net production of \$100 per annum when under the direct supervision of the white man.

The Free Negro.

In 1900 the census shows 620,772 negroes in Texas. They owned 65,526 farms, valued at \$54,239,210. Their farms averaged fifty-nine acres each, although fifty-five negroes owned 1,000 acres and over. Over 86 per cent of our negro farmers raise cotton and 18.6 per cent of all the farmers in Texas are negroes.

There are 184,473 negro children of school age in Texas who receive from our state school fund \$6 per annum per scholar. We have 2,471 negro schoolhouses and the education of the negro costs \$1,000,000 per annum. The average salary of the teacher in colored schools is \$45.88. The school tax paid on property owned by the negro is approximately \$60,000 per annum, leaving a net amount of \$940,000 per annum given to the negro annually for educational purposes.

The educational and industrial advantages of the negro in Texas excel

NOTICE

After ten years' experience in the practice of medicine and surgery and one year's recent study in one of the largest hospitals in the U. S., I have decided to confine my practice principally to the treatment of

CHRONIC DISEASES, RECTAL DISEASES AND PRIVATE DISEASES OF MEN

WHY? First, because of the study I have made, and the wonderful success I have met with in the treatment of these diseases. Second, since locating here, nine-tenths of those unfortunate enough to contract blood poison and other diseases of this character owe their final cure to me, after others have tried and failed.

I have made Special Study and preparation for this work, and have the most modern office equipment for scientific treatment that money can buy.

It is a well-known fact among scientific surgeons, that many diseases can be cured by late scientific methods that were formerly supposed to be incurable, or cases for the knife.

TEXAS INDUSTRIAL
NOTES.

One of the wisest laws enacted by the 32nd, or any other legislature, was the one which authorized the commissioners court of any county to make an appropriation of not to exceed a thousand dollars to be used in farm experiment and demonstration work. Every county in Texas will make a good investment by appropriating the entire thousand dollars and demonstrating to the farmers what crops and what manner of cultivation will be most successful to local conditions and to educate the farmers to farm by the most improved methods and to discontinue the system of long ago.

If all other lines of business had adopted the ideas of many farmers that the old system of farming could not be improved upon, we would still be using the forked stick, with a one-eared ox, one man driving and one holding the plow, while the old reap hook would still be used instead of the modern binders and the old flail instead of the threshing machine. A remarkable condition is that farmers have had their machinery improved upon, but will not listen to the soil culture theories, conservation experiences and results of demonstration work.

On July 29th the third annual Cotton Carnival of Galveston will open and hundreds of visitors will worship at the shrine of King Cotton. This Exposition was planned and carried out by the public-spirited citizens of Galveston for the purpose of increasing the cotton production and increasing interest in the South's greatest staple, and has been made a permanent organization. Cotton in every shape and form will be on display and a replica of the Galveston sea wall will be an interesting feature of the Exposition.

The buildings and other improvements for the big gin plant at Franklin are well under construction. The deep well which is to supply the plant with water has been completed at a depth of 250 feet. It will be one of the most up-to-date gin plants in the state.

A charter has been issued by the secretary of state to the Idaho-Texas Land Co., permitting them to do business in Texas. The company has a capital stock of \$50,000.

The election voting \$200,000 for good roads in Cameron county carried by a vote of 61 to 11.

The Red River to the Gulf highway now being laid out by R. J. Potts of the A. & M. College, and party, is exciting state wide interest and an effort is being made by the commercial clubs in the Panhandle to run a loop from the Ft. Worth branch through the Plains country. The Bowie Chamber of Commerce is working out a route through Montague county to Wichita Falls and the Commercial Secretaries will ask the path finding party to blaze a route that will encircle the cap rock and return to Fort Worth through the Stamford country.

The Commercial Secretaries have been conducting an investigation into the patronage of home industries by Texas citizens. The cotton factories were the line of industry first taken up, as cotton is our leading product, and the mills reporting indicate a woeful lack of patriotism on the part of the home people in buying their goods. Only 17 per cent of the Texas-made product finds a market in Texas.

the bulk of the output going to the North Central tier of states, and goods are shipped to all states in the union. The bulk of the cotton goods consumed in Texas is manufactured in Massachusetts and a portion of it comes from England. The Texas cotton manufacturer, with goods and prices equal to his foreign competitor, is compelled to fight for local trade and finds northern and eastern states looting more favor upon his product than home people. The Secretaries urge all citizens of the state to demand the Texas-made product, as the most effective way to build up the manufacturing industry in Texas is to take care of the factories we now have.

Texas is leading all states in the Union in the good roads movement.

The million and a half dollar dam across the Colorado river near Austin is to be rebuilt at an early date. The city council has accepted the proposition of the Johnson Contracting Co. and the matter will be referred to the voters at an election early next month. The citizens of Austin are jubilant over the prospects of having the dam reconstructed and there is little doubt but that the election will be carried by a large majority. The Austin dam is the largest dam in the world across a stream, and the first dam gave away a few years ago due to an unsound foundation.

The Cotton Palace Association of Waco, will erect two new buildings to be in readiness for the opening of the Cotton Palace in October.

Brownwood has organized a Waterways Association, the object of which is to promote and foster deep water at Brazos Santiago.

The M. K. & T. Railway Co. has purchased the twenty-four miles of road owned by the Denison, Bonham & New Orleans Railroad Co., running between Denison and Bonham.

At an election held at Granger to determine whether the streets of Granger should be paved, 103 votes were cast for the proposition and only 9 against it.

The Comanche High School will take advantage of the offer by the state to appropriate \$2,000 a year to high schools that will appropriate a like amount and will establish courses in agriculture, domestic science and manual training.

Work has begun on the new cotton gin for Corpus Christi, and will be completed in time for the cotton season.

The Illinois Central is preparing to open an office in Texas, which will be located in San Antonio, and will go after Texas business this fall.

Bexar county is preparing to improve their highways by the application of oil, the county commissioners taking the position that oil is a road saver. All the roads in the county will be oiled.

Mt. Pleasant reports the first shipment of Elberta peaches from that place which went North last week. The shipment was made to Columbus, Ohio, and was loaded by the local fruit growers and consisted entirely of the Elberta variety of peaches. M. J. Wallace, one of the heaviest fruit growers of that county, estimates that the Mt. Pleasant peach crop this year will amount to one thousand and bushels, against three thousand last year. Texas is known as the home of the Elberta and this delicious fruit finds its way to all markets of

the world. The Texas Nut Co., at Denison is erecting a large peanut warehouse that, when completed, will hold 30,000 bushels of peanuts. The warehouse is over a hundred feet long and fifty feet wide and will be constructed of galvanized iron and will be fire proof. Indications are that the crop will be the largest in the history of the state this year. The acreage has been increased 500 per cent over last year and the peanut is fast taking rank as a leading commercial crop of the state.

A British army captain, Fred W. Packer, who has been for a number of years employed in the diamond mines of South Africa, came to Texas recently and has been prospecting for diamonds in Montgomery county in Southeast Texas. One stone has been unearthed weighing more than two carats which, while it has no commercial value, is proof, so Capt. Packer believes, of the existence of a diamond mine in Texas. Capt. Packer has employed a force of men to follow up his discovery and declares that the continual appearance of "indicator" stones such as are thrown up in volcanic disturbances is proof of the presence of diamonds.

Mr. Wilkinson also visited in New Orleans and other places, and previous to going to Mississippi had spent several weeks at Mineral Wells. He returns much improved in health by the trip, and says he enjoyed the visit immensely. He says he never saw finer crops than are to be found all the way from the Colorado river to the eastern states.

HIDDEN DANGERS

Nature Gives Timely Warnings That No Brady Citizen Can Afford to Ignore.

DANGER SIGNAL NO. 1 comes from the kidney secretions. They will warn you when the kidneys are sick. Well kidneys excrete a clear, amber fluid. Sick kidneys send out a thin pale and foamy, or a thick, red, ill-smelling urine, full of sediment and irregular of passage.

DANGER SIGNAL NO. 2 comes from the back. Back pains, dull and heavy, or sharp and acute, tell you of sick kidneys and warn you of the approach of dropsy, gravel and Bright's disease. Doan's Kidney Pills help sick kidneys. Here is proof in the statement of a nearby resident.

Joseph Taff, prop. of Rock Hotel, Goldthwaite, Texas, says: "For two years I was subject to attacks of backache that came on suddenly, especially when I stooped. Learning of Doan's Kidney Pills, I procured a supply and after using them a short time I was relieved. I have had no return attack of the trouble for several months and in view of my experience, I can say that Doan's Kidney Pills live up to representations."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

COMMERCIAL CORNER
 By the Secretary.

Our road bonds have finally reached the printer. This has been a long and rather expensive fight for the bonds. The commercial club has led in two campaigns for the bonds and at last succeeded in getting them through. A great deal of work in the way of distributing literature, public and private speeches, had to be done to carry on the work. In the face of the severest drouth known in this country for many years, we feel that all parties concerned in the passage of the bonds deserve congratulations at this time.

The following telegram to Thos. Bell, in answer to one sent by the Secretary, was received this morning:

Austin, Texas, July 24.
 Thos. Bell.

Brady, Texas.
 Records for the road bonds will be given to the printer when information requested of county clerk is received.

SEB. F. CALDWELL,
 Asst. Attorney General.

The information referred to in the telegram was sent Saturday by Mr. Yantis. So we feel safe in saying that the bonds are being printed. They had to be passed upon favorably before they could be allowed to go to the printer. They will be on the market in the next few days.

Mr. Gayle, the civil engineer who has been employed by the commissioners court, has gone to work with the surveys. In the course of thirty or forty days, the field notes of the surveys will be ready, and then actual grading and work will begin. It seems to me that it is coming at a very good time for our home folks to get a deal for their idle time profitably employed. We trust the money will be judiciously spent and used so that our people can get the benefit of both the roads and the money.

A meeting of the directors of the fair association was held a few days ago. It was decided at that meeting to hold the fair on the 11, 12 and 13 of October. At the same time to have the Confederate reunion. Unless there will be a change made next Monday, these dates will be fixed. The only thing now in the way is conflicting dates near us. We are determining this now, and reports will be made on the 31st to the directors.

NOBLE BROTHERS COMPANY

**ARE YOU IN LINE FOR A NEW BUGGY OR HACK?
 IF NOT, GET IN LINE**

We keep the best to be had at a "let live" price, with terms as broad as anybody. Don't be fooled by the slick tongued peddler. Remember he is paid to skin you and the more he skins you, the more he is paid. (Note that most peddlers are imported.) You pay from \$10 to \$40 more for a buggy from a peddler, owing to how easy you are to sell. Do some figuring for yourself: A peddler must pay expenses of a team and himself, also a salary for himself and a profit to the factory. He spends no less than \$30 every time he sells a buggy and the man who buys the buggy pays it. The buggy peddling business reminds one of the balmy days in the sewing machine business when the peddler charged \$65.00 for a machine that can now be bought in any store for \$30.00. We are not attacking the quality of the machine or buggies, but we do say that there is not a peddler on earth who can compete with us. We put the goods in Brady in car lots, at manufacturer's cost, our men, when not actually engaged in selling buggies, are busy at something else, thereby not wasting time. We have no expense of idle teams and idle men laying around town waiting for a sale to show up once a week. Can a farmer stay in town and go out and plow once a week and make a living. Not much; not unless he has some "catch the sucker" plan of selling his cotton for a dollar a pound. Figure it for yourself.

SUSPECT ARRESTED.

Alleged to Have Killed Two People in San Saba County.

McAlester, Okla., July 24—W. T. Chamberlain, a deputy sheriff of San Saba county, Texas, arrested an old man he met on a train between here and Durant this afternoon, declaring that he recognizes him to be Ike Cravens, who fled from that county in 1891, after killing a Mr. Moody and Moody's 6-year-old son with a Winchester.

Chamberlain is positive in his identification, but the old man claims his name is Mitchell Pickett, is a grand nephew of General Pickett of Gettysburg fame, and that he never bore any other name and never lived in San Saba county.

He says that twenty years ago he lived at Unitia, Delta county, Texas. He gives the name of John Costen as postmaster then, mentions a Dr. Henry, and an old blacksmith named Anderson as having been acquaintances there twenty years ago.

McAlester, Okla., July 25.—J. Mitchell Pickett, arrested here last night by Deputy Sheriff Chamberlain, of San Saba county, Texas, charged with being Ike Cravens, who killed a Mr. Moody and his six-year-old son in the southeastern part of that county in August, 1891, expressed a willingness to go back, but citizens who investigated the story of his marriage in Tennessee and other events of his life finding he had told the truth, insisted on regular extradition.

Sheriff Hugh Miller is expected here tomorrow and regular court proceedings will be held.

Pickett gives a story of his life from boyhood spent in Lincoln county, Tennessee, Lamar, Johnson, Delta and Dallas counties, Texas up to the time of the San Saba killing, giving the names of people he knew.

Some Texans here say that he knows the communities he describes as they existed at that
