Mr. Riffle's experience is especially interesting at this time of the year because it shows the close relationship there is between a nervous breakdown and a neglected cold.

Pe-ru-na should be kept in the home at all times, that a cold upon its first appearance may be treated promptly and successfully. This often saves money and time, and what is more important, a great deal of vitality. Mr. Riffle, of 758 Gautenbein Ave.,

The Farmer and His Bank Account

The farmer, more so than other business man, requires the services of a bank, if he manages his farm in a systematic way. While he has no need for a set of books in which to keep a record of every transaction made, yet, during the course of a year he must pay out large sums of money for various purposes, and a record for future reference is important. Merchants may fail to give a receipt for cash-a neighbor may not recall the payment of money owed - but the farmer who pays his obligations by check has written evidence of such payments which any court must recognize. In the same way he has a record of monies received by the deposit entries on his bank book.

To the farmer, who desires such a record for his business, we extend an invitation to open an account with this bank. We keep a record of all checks paid by this bank
