#### SHE'S THERE BECAUSE SHE PERFORMS-THE 3400 r. p. m. CHALMERS

Most cars start alike. But very few finish alike. Therein comes a mighty difference.

Step on the little button 10 months after date and you'll readily note the inequality.

One is sluggish, "dead", without emotion, and responds to the touch with the speed of old-time oxen responding to the lash.

The other is alive, alert, ready; radiates desire to plunge ahead.

This is the 3400 r. p. m. Chalmers kind. The other kind is the species known to the trade as "one-year" cars.

Chalmers makes a five-year car. There's many an old 1909 Chalmers 30 Blue Bird giving a good account of itself today. You'll find the everlasting pep there five years from the day you take your first turn at the wheel.

Largely because of the 3400 r. p. m. engine. Which delivers mighty power with easy effort.

It's mostly in the design. The pistons are aluminum. about two pounds lighter per piston; the reciprocating parts lighter, which eases up the thrust on the bearings.

Then the crank-shaft, which is very heavy, and balanced to the weight of a hair in a special Chalmers device, spins at the rate of 3400 revolutions per minute.

It means excellent reserve power. For at 10 miles an hour the engine is turning up only 500 r. p. m. while at 20 she is doing about 1000 r. p. m. So that at excessive road speed she has the punch to deliver when called upon.

16% of her power is used at 10 miles an hour. So that she has 60% to 84%—when a twisting, hilly road looms ahead, when a sharp corner with a rugged grade hoves in sight; when the man ahead is showing you too

much dust. You'll like the 3400 r. p. m. Chalmers for one single little reason. She sure can perform.

Ask your dealer about Chalmers service inspection coupons, negotiable at all Chalmers dealers everywhere. This system is a most important consideration in buying your car.

Five-Passenger Touring Car, \$1090 Detroit. Three-Passenger Cabriolet, \$1440 Detroit. Two-Passenger Roadster, \$1070 Detroit.

Color of Touring Car and Roadster-Oriford maroon or Meteor blue. Cabriolet-Oriford maroon, Valentine green or Meteor blue. Wheels-standard dark, primrose yellow, or red. Wire wheels optional on Roadster or Cabriolet at extra cost.

#### RICHLAND SPRINGS RIPPLES

From Richland Springs Eye-Witness:

Kit Prescott who lived near Algerita, died Thursday morning of last week from blood poisoning caused from stepping on a nail three weeks before. At the time he paid but little attention to the wound and as it healed readily he supposed the danger was past. However, early last week the wound began giving pain and a doctor was summoned and found that it had healed from the outside and that a severe case of blood-poison had set up, which could not be counteracted. He leaves a wife and several children to mourn his

Mrs. I. O. Williams left Monday for an extended visit with her mother at Brady.

Misses Yrma Davenport, Ruby and Nolia Wise, John Richards and Jake Miller spent Sunday with friends in Brady, and attended the revival conducted by Rev. Arthur Jones at the Christian tabernacle.

# Impossible To Get So Much Motor Car Value For The Money

E FIND this is the attitude of many people who come into our salesroombefore they know anything about the Maxwell.

Not until the Maxwell is shown and demonstrated to them—until they sit in it and examine the finish—until they ride in it—or perhaps not until they drive it themselves, do they realize what a tremendous value is offered in the Maxwell car.

It is not unusual that Maxwell value should not be known to everyone, because it is uncommon to find such a car for a good margin more than the Maxwell price.

The Maxwell stands absolutely alone in a highly competitive field, for the amount of value it offers for the price.

Appearance-The lines of the Maxwell are decidedly attractive. There is no break in the contour from the radiator to the back of the car. The fenders are gracefully shaped. All metal parts are enameled or nickel-plated. The upholstery is deep and well-finished. From any angle it is a car that the owner can be proud of.

Motor-The engine in the Maxwell car is not equalled by any other four-cylinder engine of its size. And we know of larger and more expensive cars that have less able power plants. The Maxwell engine carries its load through mud and sand or over the steepest grades without a falter.

Quality-The materials in the Maxwell car are the best that can be bought and the workmanship that turns them into finished parts is no less excellent. It is only the large production of the Maxwell factories that makes it possible to put such quality of materials and workmanship into a car selling at the Maxwell price.

Economy-With its other attractive features, the Maxwell is a most economical car to own. Owners get 22 to 25 miles per gallon of gasoline and 8,000 to 12,000 miles per set of tires. And the car is so durably built that repair expense is negligible.

We are sure you want a car such as we have described the Maxwell to be. If you will give us a few minutes of your time we are sure we can convince you that the Maxwell Car is an exceptional value. Come in today.
