Veribest-Bronte Game or Games to Be Here Sunday

Postponed because of the rain last Sunday, the Veribest Cultivator Jockeys and Bronte Longhorns tangle here Sunday in a Shaughnessy play-off game or games. The Veribest team is one up on the Longhorns as a result of the first play-off game in which the Veribest team won 13 to 6. Bronte must take both ends of the double bill this Sunday to stay in the race for the championship.

The Miles Giants and Robert Lee Rabbit Twisters evened the series last Sunday in Miles with the Miles team winning 8 to 7. Robert Lee won the first game on their home diamond by a score of 3 to 2. The Miles and Robert Lee teams will play the deciding game this Sunday in Miles.

Following the Sunday games, the play-off for the championship will continue with the winners of the first series playing for the first and second place in the Concho Basin league.

CHILD SHOULD HAVE HEALTH CHECK-UP BEFORE SCHOOL STARTS

The month of September brings a return of school days, and thousands of Texas boys and girls will be returning to classrooms for the next nine months. Every one of these children, according to Dr. Geo. W. Cox, State Health Officer, should be as free as possible from all physical defects that can be corrected, and protected against other diseases which frequently spread through classrooms.

A complete medical and dental pre-school check-up is of the utmost importance in getting the child ready for school. Eyes, ears, nose, throat, and teeth should be carefully examined, and all remediable defects corrected or placed under treatment. Such defects can lead to serious impairment of growth and progress academically, socially, and emotionally.

Defects of hearing and vision handicap a child in his class work, and often result in the false impression that he is backward and unable to learn. Such defects can often be corrected, and the child is not only more progressive in his school work, but is a happier, better balanced individual as a result of being more socially acceptable. Dental defects should be corrected not only for cosmetic reasons, but because good teeth enable a child to chew his food properly and thus promote good digestion and bodily nourishment.

"In addition to correcting such defects as already exist, young children should be protected by immunization against disease, when possible," Dr. Cox said. "Immunization is safe and dependable, and every child is entitled to this protection against disease."

LIONS HEAR ANGELO MAUFACTURER TALK AT WEDNESDAY MEET

D. J. Kreager, owner and operator of the Jay-Kay Paint Co. of San Angelo, told the Bronte Lions Club Wednesday that West Texas needs to develop industry to care for the manufacture of the raw materials which are produced in this section of the country.

Kreager said, "We have all the potential wealth of Texas, but we do not have enough industry to utilize these materials and to employ our children who are trained along industrial lines." He stated further that what West Texans need to do is to "help make West Texas important in the national economy."

Nona Rippetoe Has Polio; Belva Shows Some Improvement

Physicians diagnosed Nona Rippetoe's illness as being polio this week. The small daughter of Mr. and Mrs. J. M. Rippetoe became ill the latter part of last week and was taken to San Angelo for observation. Mrs. Rippetoe said, however, that the attending physician reported to her that Nona's case is very light and that she is getting along fine.

Meanwhile, Belva Rippetoe, who has had polio and rheumatic fever, is showing quite a bit of improvement. Her mother said that she still suffers a lot, but that she is a great deal better than she has been.

Dr. John R. Harris, city health officer, said Wednesday that Bronte citizens should continue to observe all the precautions outlined by him when the polio epidemic first started. He said that this latest case of polio definitely shows that the danger of contracting the disease is not over.

Humble 2 Lowery Drilling Ahead; Rice Near 5M Ft.

One new location was made the past week in the Bronte field. It is Humble No. 2 Lowery Estate. Location is south of the No. 1 Lowery and east of the Humble No. 2 Ash. Thursday morning the No. 2 Lowery was drilling at 2,250 feet in lime and

shale. Work was started on the new well Saturday after the rig of McQueen & Clevenger Drilling Co. was skidded Friday.

Rice No. 1 Stephenson was drilling Wednesday night at 4,904 feet in chert. This wildcat is scheduled to

go to 6,000 feet or pay. It is located southeast of Bronte, just south of the Colorado river.

A report Wednesday night said that Barnsdall No. 1 Harris Davenport had reached the Ellenburger and recovered salt water on a drillstem test. The report said further that operator was plugging back to the Strawn where good shows were found on several tests. This wildcat is north of Fort Chadbourne.

Humble No. 2 Sallie Odom drillstem tested from 5,805 to 5,835 and recovered 40 feet of mud. Another drillstem test was scheduled from 5,835 to 5,865 feet. The Ellenburger was topped at 5,680.

Hickok & Reynolds, Inc., and Dan Auld No. 1 J. L. Keeney was treated with 500 gallons of acid this week, and it was reported that water broke in after acidizing. No plans for this well have been announced by the operator.

Farmers Welcome Weekend Moisture

Farmers in the Bronte area welcomed the recent rains, which fell last Sunday. Bronte seems to have been the biggest recipient of the moisture with 2½ inches.

The rain started falling shortly before noon Sunday and continued until about 3 p. m. After that time, slight showers made their appearance every little while throughout the day.

Robert Lee reported .43 inch, while farmers northwest of here said they had a good rain. The moisture seemed to get lighter east of Bronte, also, a small amount falling at Maverick.

Cotton in this section has not been suffering for rain, but some of the feed crops have been in pretty bad condition. At any rate everybody was all smiles Monday morning.

CONSOLIDATION VOTE CALLED FOR AUG. 23

Notices have been posted calling for an election on the consolidation of the Maverick and Bronte Schools for August 23. Local voters will cast their ballots at the City Hall. D. K. Glenn will be election judge here.

The election was called after a petition was presented to Runnels County Superintendent E. H. Elkins. The Runnels County school board had decided to consolidate Maverick with Norton, when the objection was made by Maverick school patrons.

Consolidation of the districts would mean more students and more money for the Bronte school. Consequently, local officials are urging everyone to vote for the measure.

PROVE YOUR PLAN

When old Columbus called on the queen,

A man who could prove the world is flat."

And old Columbus proved the world was round.

Our WASHINGTON Letter

By Congressman **O. C. FISHER**

By an impressive majority of 273-to-116 the House last week passed the perennial anti-poll tax bill, and thereby accomplished exactly nothing except to kill two days in debate and to doctor up political platforms in districts where the civil rights agitators hold forth.

It was the fifth time in the past ten years the same thing has happened. Usually authored by the left-wing Congressman from New York, Vito Marcantonio, the anti-poll tax bill had about as much enthusiasm among its supporters as a termite during a cyclone. But the Members who vote for it know the Senate won't let it pass anyhow, and they want to curry the favor of the minority groups who advocate it and whose votes might come in handy during a close election. After all, the Southerners don't vote in their districts.

There are only seven states that now impose a poll tax. The Constitution itself provides that the individual States shall be the judges of the qualifications of the voters in the election of federal officials in such States. But those who favor the anti-poll tax ban by the Congress aren't concerned about the Constitution and the rights of the States to determine such questions.

Texas and the other poll-tax States are quite capable of deciding whether they do or do not want to continue to impose a poll tax, and they need no help or interference from the Federal government in carrying out that responsibility which is delegated to them by the Constitution of the United States.

The Bureau of Mines has just given me a report on investigations that have been made of soapstone deposits in Gillespie County and vermiculite deposits in Llano County.

The mineral known as vermiculite is found extensively within a radius of twelve miles of the town of Llano. Most of this is now under lease. Commercial production has been limited, and the extent of its future will depend somewhat upon a possible increase in demand.

The vermiculite is a highly desirable material for insulation against heat, cold and sound. It is also used as an aggregate in plaster and as an aggregate in concrete.

The Bureau reports on a survey of soapstone formations on the Alfred Davis Ranch near Willow City in

Gillespie County. Considerable deposits were found to exist. Right now about 20 tons per day are being mined. This mineral is used principally in the manufacture of roofing paper, foundry facings, insecticides and as a filler in asphaltic paints. Copies of these reports may be obtained by writing to my office.

A hundred years ago the first settlers came to Kendall County and named their settlement on the banks of the Cibola, Boerne. So this year on August 26, 27 and 28, the citizens there will celebrate this Centennial year "in a manner that is befitting a town and its people that are proud of their heritage".

Tom Roberts, the Centennial Chairman, has sent me an invitation to attend and I shall certainly do so if at all possible.

Among recent visitors have been Mr. and Mrs. C. A. Davis and their daughter, Janette, of Brownwood; Carroll Land, REA Manager of San Angelo; Mr. and Mrs. Jimmie West,

enroute back to Eldorado from the Lions' convention in New York; Tommy Kirkpatrick of Robert Lee and his sister, Mrs. Betty Hillman of Washington, D. C.; W. C. Fawcett, Jr. of Kerrville; and Arthur Stehling of Fredericksburg.

Joe Bailey Swanner of Brownwood, a recent graduate of Howard Payne, is now working in the Disbursing Office of the House of Representatives. He plans to enter George Washington University Law School this Fall.

many uses the aggie boys will have for it. Their mechanics will also check it regularly. It was stated that the vehicle will be used for field trips, to attend fairs and judging contests wherever they may be. Previously, the instructor's car was used for this purpose.

Henry said that an FFA emblem and a sign saying "Courtesy Caperton Chevrolet Co." will be painted on the new pickup. He also said that this free service from the local company "is about the best thing that ever happened to us."

The plan now is to replace the pickup each year with a new one, so the agriculture department will have a new vehicle at their disposal all the time.

Caperton Chevrolet Co. the past week delivered new automobiles to McGuire Bros. Welding Co. and to Sid Evans.

CONSERVATION PLANS DISCUSSED AT MEET

C. M. Anderson, a member of the Valley View Conservation Group, and a District cooperater with the Coke County Soil Conservation District, is building a 2,000 cubic yard stock pond. James W. Allen, H. R. Holcombe, and H. T. Parker are landowners and operators who were assisted the past week in working up a complete coordinated soil and water conservation plan.

"Now is the time for landowners and operators to take care of their grass that they have grown this year," said W. E. Burns, member of the Green Mountain Conservation Group, and also the Board of Supervisors, of the Coke County Soil Conservation District. "If landowners will leave vegetation on their ranges now it will aid in water intake during rainfall," Burns pointed out.
