## Coke Gives \$1189 to Red Cross Drive This Year

JUDSONIA, ARK.—Their homes among more than 2,000 Arkansas and Missouri homes destroyed or damaged by March tornadoes, these men, like thousands of storm victims, turn to the Red Cross for help. After emergency needs for food, clothing, medical care and shelter are met, Red Cross workers will stay on the job until rehabilitation needs of more than 1,600 families registered for help in these two states are determined. Based on need, Red Cross will assist in repairing and rebuilding homes and providing furniture. Of the nearly 500 persons hospitalized by tornado injuries, many will need Red Cross help with medical bills. Revised by  
The Texas Department of Agriculture  
By John C. White, Commissioner

## THE PINK BOLLWORM

Two problems in Texas Agriculture come to us across the Rio Grande—the "wetback" and the cotton Pink Bollworm.

The insect, or Pectinophora Gossypiella, has this in common with the "wetback": things look better to it on this side of the border, and it comes across to work in our cotton crops. It will "hitch" a ride across the international bridge on trucks and cars and clothing, or anything else that has been in contact with cotton or cotton products in Mexico. Or, in the most stage it will fly across.

The first Pink Bollworm was discovered in Texas near an oil mill in Robinson County in 1917. Since then, it has become the greatest threat our cotton industry has ever faced, with 193 counties now under quarantine.

The worm comes from an egg laid by the moth on the cotton plant. The larva burrows into the fruit, square or boll and reaches maturity in 10 or 15 days. It pupates, and in about 30 days from the time the egg is laid it has developed into a moth. After mating, the female moth deposits

its eggs for another generation. The worm grows to about one-half inch in length. It's made up of segments, like the tail of a crayfish. Each segment is ringed by a pink line.

The moth is less than an inch long, brown in color, and shy—hiding from the light of day under stones or brush and flying in the late evening. It can make long distance flights of hundreds of miles, at an altitude of 2,000 or 3,000 feet—for example, from the Laguna district of Mexico to as far away as Arizona, New Mexico and the Plains of Texas, which is a rather respectable performance.

These little moths live only two or three weeks. But as many as five and six generations appear in one season. That means if every egg laid by one female moth should develop into an adult moth, in five generations one moth would have produced more than 10,000,000,000 hungry Pink Bollworms.

Multiply that by millions of moths on thousands of acres of cotton, and we get a rough idea of what we're up against.

(Continued Next Week)

to be interesting as nine names are. Candidates are Fred Jackson, Robert W. Walker, J. L. Legg, Raymond Bloodworth, J. B. Walker, Jr., C. L. Price, Harry Newton, H. P. Pew and Hale Kincaid.

## Workers Hauling Trash This Week; Have Yours Ready

City Councilman H. A. Springer announced Wednesday that the city will have men working this week and part of next week picking up tin cans and other trash which the residents of Bronte have accumulated.

"It's getting to be the time of the year when everyone is interested in cleaning up around their premises and we want to do everything we can to help," the Councilman said. "So if the people will have their trash ready, we'll haul it off for them."

### The Little Things of Life

The little things of life are too often the things we forget. It takes only a few seconds to smile, yet a smile has often been known to change a person's outlook for a whole day. A word of encouragement to a fellow student, who is trying to put something over, will help for more than we

realize. When a person is down, it is easy to just pass him by, when a kind word or a slap on the back would do a world of good. Let's not forget to do the little things, as along life's way we go.

### Chatter

Say Rickie, we think we saw Harold McCutchen with Scooter Snead the other night.

Billy Jack, we have noticed that Arbie Phillips saves a place in the line at the lunchroom for Ginger real often. Is this just an old friendship???

From all of the BHS Bear Drivers: "We would be so happy if the Junior boys would decide to attend classes."

**QUESTION:** Warren, when did girls start taking the place of your beloved automobiles? Is it true that you are beginning to notice a Freshman brunette???

**MASTERPIECE**—Mrs. Newman: With a single stroke of the brush the painter, Rembrandt, could change a smiling face into a frowning one.

John Holcombe: "So can my mom!"

Is it true that you ladies—Mrs. Thomas, Mrs. Flores, Mrs. Fancher, Mrs. Miller, Miss Sanderson, are going to leave the teaching profession to join a road show?

### ATTEND CONVENTION

Mrs. Charlie Phillips and Mrs. Noel Percifull were in Cisco late Monday and Tuesday, March 31 and April 1, where they attended the 37th annual convention of the sixth district of the Texas Federation of Women's clubs. The convention was held at the First Methodist church there. Some 300 club women from the sixth district attended the convention which had as its theme "What Price Freedom?"

The Will Thomasons were visitors in Bronte last weekend. The Thomasons' are now living at Taylor, Texas and are former residents here.
