Austin — Legislature in regular session agreed to submit 14 more proposed constitutional amendments to voters in November 1972.

Among major ones is HJR 61, which would authorize the 1973 Legislature to serve as a constitutional revision convention.

Two others (HJR 58 and HJR 95) would provide for raise in salaries of legislators (to \$8,400) and lieutenant governor and House speaker (to \$22,500).

Other amendments on the general election ballot in 1972 will be:

* SJR 1—Providing four year terms for governor and other statewide officials now limited to two year terms.

* SJR 16—Guaranteeing that no rights will be abridged because of sex, race, color, creed or national origin.

* SJR 7—Permitting local governments on popular vote to exempt \$3,000 of assessed value of resident homesteads of persons 65 or older from all ad valorem taxes.

* HJR 68—Providing for advertising (twice) of proposed constitutional amendments in clear, concise language in all legal newspapers in Texas.

* HJR 35—Authorizing a tax exemption for disabled veterans and a partial exemption for partially disabled veterans.

* HJR 57—Permitting county commissioners to reduce the county permanent school fund and provide for payment of money to independent and common school districts on a per-scholastic basis.

* SJR 29—Providing that state employees can serve on non-paying school boards and city governing bodies without forfeiting state pay.

* SJR 20—Exempting soil and water conservation district directors from dual office holding prohibitions.

* HJR 61—Relating to rates of interest to be borne by bonds.

* HJR 41—Requiring that justices of the peace be compensated on salary basis.

* HJR 31—Abolishing Lamar County hospital district.

JOBLESS ROLL DROPS — Number of unemployed in the state decreased 6,000 during April to 181,000, Texas Employment Commission reports.

TEC said the jobless rate was

only 3.8 per cent of the total labor force, thus the decline may signal a "possible end to the doldrums of the past year."

Mid-April figure was identical with December 1970 and considered probably the lowest of the year.

Thirteen labor areas reported improvements. Austin enjoyed the lowest rate of unemployment in the state—1.8 per cent of labor force.

LIQUOR TAX PASSED—Tax on liquor by the drink passed in the first days of the special legislative session.

Measure (HB 3) will place a 10 per cent gross receipts levy on sales and service of mixed drinks in bars and private clubs. Cities and counties each will get 15 per cent of the revenue collected within their boundaries.

Bill also boosted the tax on liquor from \$1.68 to \$2 a gallon and upped the wine gallonage tax depending on strength of the wine.

Beer tax on July 1 will go up from \$4.30 to \$5 a barrel. This rate supercedes the \$6 a barrel ordered in the regular omnibus tax bill (HB 730).

About \$28 million in new revenue for the next two years is expected from the bill.

COURTS SPEAK—Clark's discount house in Abilene cannot legally arrange with an allied concern (Sundaco Inc.) to offer Sunday sales in its store, State Supreme Court ruled.

High Court also reversed and sent back for a new trial a Dallas auto accident case where the jury returned two different verdicts as to which driver failed to yield the right of way.

Court of Criminal Appeals, reversing a Galena Park robbery by assault conviction, held that jurors are not qualified without expert advice to decide whether signature of a defendant is the same as that on criminal records.

A San Antonio man's claim that removal of a bullet from his back was an illegal search because the surgeon turned the slug over to a policeman was overruled by Court of Criminal Appeals.

AG OPINIONS—A called session of the Legislature cannot pass a legislative redistricting bill, Atty. Gen. Crawford Martin said in a recent opinion. Martin held that unfinished Senatorial reapportionment must be accomplished by a five member committee of state officials.

In other recent opinions, Martin concluded that:

* State Treasurer will receive fines collected in district court for violation of the Texas Motor Carrier Act, and neither district attorney nor district clerk may retain a percentage.

* A bill providing for establishment of a schedule of abused drugs by rule of the State Board of Pharmacy and for dispensing of drugs is constitutional.

Short Snorts

Bureau of Outdoor Recreation has approved a \$296,150 grant for the development of Pedernales Falls State Park in Blanco County.

State Industrial Commission officials are in Munich, Germany, to promote development of international trade for Texas.

Texas construction showed a seven per cent gain in April over March, five per cent of which was accounted for by residential building, reports University of Texas Bureau of Business Research.

State economy and immediate prospects for significant recovery is described as "checkered" by the Bureau of Business Research, but encouraging indications must be weighed against "soft spots."

WASHINGTON
 "As it looks
 from here"
OMAR BURLESON
 Congressman
 17th District

Washington — There was a time when golfers went to the course to forget about everything except to keep the head down, a straight left arm on the backswing, shift weight to the left side on down swing and carry the club through with a high finish.

Now worries are besetting some older clubs and their members with courses closed in with building developments. The space is needed for other things, some say (other than golfers). But there are other problems too.

Pending lawsuits allege that it is discriminatory to limit or qualify memberships or to charge fees of any kind. Contention is made that golf courses are a public responsibility and should be publicly owned and operated as a service.

Safety on the golf course is getting attention too. Several years ago someone came up with statistics to show that in proportion to the number of players, golf was the most hazardous of all American sports. Doubts on such a conclusion are, of course, in order. As recalled, included in the statistics were heart failures, lightning and probably apoplexy following a slice or a missed putt.

The National Safety Council now adds a dimension not present a few years ago—the unsafe golf cart. The Council confidently predicts "several thousand" injuries from golf cart accidents during the summer season.

The Council calls the carts "a safety problem that warrants attention." It says that many carts are unstable and roll over while traversing slopes on the bias and others lose their brakes completely, crash into players, other carts, trees and fences, resulting in some serious injuries.

America being what it is, there is, of course, an American Golf Car Association. It claims to be working on the safety problem right at this minute. According to their report they are financing a study on proposed new standards to provide greater cart safety.

Safety, though, is not really the thing that sort of saddens the heart about all this. It is rather the idea that grown men can't use a little common sense for their own protection. If everything is going to be fixed up where no judgment is necessary, then the golfer should also be forbidden to take a shower before changing into his other

clothes. Just let him smell like a golfer, whether he plays well or not. And then too, there is that 19th hole which could hold some hazards. Better still, maybe he should give up golf for croquet. (There are probably records to show some nasty falls over wickets.)

Everybody is in the act some way or other. The Transportation Department doesn't want under 21 year olds to drive farm trucks on the highway. It proposes that those who do be required to have a medical certificate not more than 24 months old and to pass a federal written test.

We could live without the pleasant, quiet, natural activity of the golf course—but not as well. Many farmers or ranchers would be in pretty bad shape if their boys are prohibited from operating trucks and tractors. There's not much future in croquet if it's depended on for a living.

Roy L. Ford, New County Attorney, Takes Over Duties

Roy L. Ford, 33, formerly of Big Spring, has assumed his new duties as Coke County Attorney. He was recently appointed by the Commissioners Court to fill out the unexpired term of the late Frank C. Dickey. His office is on the second floor of the court house, in the office formerly occupied by the county surveyor. It is adjacent to the Soil Conservation office.

Ford graduated with a B. S. from Howard Payne College in Brownwood. Prior to going to Howard Payne, he attended Hardin-Simmons University in Abilene for three years. He received his Doctor of Jurisprudence Degree from Samford University, Cumberland School of Law, in Birmingham, Ala., in 1968.

He has been in private practice in Big Spring since then. In Big Spring he was associated with George T. Thomas, and received practice in both criminal and civil work.

Ford is a member of both the Texas and American Bar Associations. He served on the board of directors of the American Cancer Society in Big Spring and on the board of directors of Civitan International.

He is married to the former Geraldine Rodgers of Abilene and they have two daughters, Pacca, 13, and Felecia, 6. They live in Lakeside Estates, on the south shore of Lake Spence, and receive mail on the Edith Route.

The new official was reared in Snyder and Big Spring and is a graduate of Snyder High School.

He is a member of the Baptist Church.

Ford said, "I am looking forward to serving the people of Coke County, and my office in the courthouse will always be available to serve the people as needed."

1948 SENIORS TO HAVE ANNUAL REUNION JUNE 19

The Bronte High School Senior Class of 1948 will hold its annual reunion Saturday, June 19, at 7 p.m. in the Bronte County Park.

It was mistakenly announced in last week's Enterprise that the event would be held June 12.

There will be a covered dish supper in addition to visiting.

No individual invitations will be sent out and this notice will be the only one residents of Bronte will receive.

SHEEPMEN VOTE JUNE 7-18 ON PRODUCT PROMOTION

A nationwide sheep producer referendum is in progress June 7-18, called by Secretary of Agriculture Clifford Hardin. The referendum, being conducted by mail ballot, will decide whether or not the sheep industry wants to continue promotion of its products through the American Sheep Producers Council.

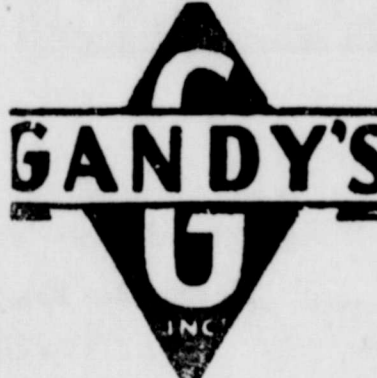

For approval, this promotion program for lamb and wool requires a "yes" vote by more than two-thirds of the individual producers voting, or producers owning more than two-thirds of the sheep represented in the referendum by those voting.

Mr. and Mrs. Bobby Edmiaston and family of Snyder spent last weekend in Bronte with his parents, Mr. and Mrs. Don Edmiaston.

Consumer Protection

Two new consumer protection laws have recently been passed by Congress and became effective April 25.

One new law states that an individual will not be liable for any loss from unauthorized use of his credit card after he has reported its disappearance to the issuer. The other law, titled the "Fair Credit Reporting Act," gives consumers some rights against the use of erroneous data in files of credit bureaus.

According to the law affecting lost credit cards, an individual may report the loss by telephone or by letter to the issuer. Most companies will cancel use of the card once they

have been notified. If the notice is by letter, cancellation is effective the day the letter is postmarked. For losses occurring before notification, liability is limited to \$50.

The \$50 liability applies separately to each card that is lost. So, if a billfold or purse containing five credit cards is misplaced, the potential maximum liability is a total of \$250. If a husband and wife lose their cards on a joint account, however, the total liability is limited to \$50.

The new law also prohibits banks and other firms from mailing out unrequested credit cards. Companies must inform the user of his rights and potential liabilities, plus they must assume the legal burden of paying for liabilities the card holder may suffer.

The Fair Credit Reporting Act, the second new law protecting consumers, generally forbids bureaus to send out adverse information that is more than seven years old. The exceptions include bankruptcy, which may be reported up to 14 years; and information in reports on those applying for a loan or life insurance policy of \$50,000 or more, and those applying for a job with an annual salary of \$20,000 or more, both situations having

Once informed that a credit bureau has hampered your credit, insurance or employment status, you have the right to obtain from that bureau all information in your file. The exception is medical information.

If the file contains false, incomplete or inaccurate information about you, the material may be re-investigated by the credit bureau, and the findings sent at your request to all who have received your report within the past six months or within the last two years, if the file was sent for employment purposes.

If the credit bureau's investigation doesn't settle the dispute, you are entitled to insert a personal statement of 100 words in your file. Your side of the story, then will be included in any future report, and it also may be sent to those who have already received the disputed information.

Planning for Retirement

One secret to always staying "young" is learning to face retirement.

Retirement doesn't just happen. It requires much thought and considerable planning on such decisions as what you will live on, where you will live, and what you will do.

And since life span figures keep changing, it is best to start preparing early in life. Women aged 65 can plan on at least 16 additional years of life; for men there should be at least 13 years.

The average person today cannot be considered old until the late 70's or 80's. Even then there are people up into their 80's and 90's who are busy, useful and happy—and they don't seem old.

To aid you in planning for the cost of living during retirement, you should keep accurate records on current living expenses for several months. Then estimate what you think retirement living costs will be. If the cost is high, you should start saving and investing now, or increase your savings plan.

Don't wait until you are 65. Start right now and plan ahead!

Home Economics Briefs

SOMETHING TO THINK ABOUT — The average family of four eats 2½ tons of food per year. It breaks down about this way: 1,000 pounds of meat, fish and poultry; 1,500 pounds of dairy products; more than 1,000 pounds of fruits and vegetables and over 1,500 pounds of flour and cereal products, sugar, po-

tatoes, fats, oils and eggs. Each million people we add to our population requires another 172,000 beef cattle; 25,400 dairy cattle; 430,000 hogs and 1.3 million hens at today's consumption rates.

COMPARED WITH OTHER PRODUCTS

— Food costs have risen less since 1947-49 than most other consumer items in the cost of living index. For all items on the list, the increase in cost to 1969 was 57 per cent. For all food, the increase was 48 per cent. For rent, it was 63 per cent and for medical care 124 per cent. The farmer received 8 per cent more for the farm food "market basket" than he did in 1947-49. The cost of farm grown food has risen 32 per cent, although processing and marketing costs have risen 55 per cent. And Texas farmers and ranchers are battling a drought.
