My Flag

Wave on, dear flag, as you point toward the sky,
Many millions of hands will hold you high.

Your beautiful stripes of deep crimson red

Remind us of those who for freedom bled.

The other broad stripes all spotless and white,

Mean honor, courage, firm stand for the right.

The white stars of hope in bright field of blue

Stand for all that is holy, brave and true.

I'm glad I live in the land of the free,

With the stars and stripes waving high o'er me.

I love your colors of red, white, and blue,

And to you, dear flag, I'll ever be true.

So, wave on, proud flag, point up toward the sky,

Loyal hearts and hands will hold you up high.

Trading on It

With the difficulty arising over the changing of Thanksgiving we are made aware of the commercializing of almost every holiday that Americans celebrate. Editors do not scorn increased business to manufacturers and merchants, they too profit from the trade at such times. But it is best to face the fact that perhaps we have become too commercial for our own good.

Easter and Christmas, our most religious of days, are greatly commercialized, with Mother's, Memorial and Arbor Days a boon to florists and nurserymen. The Glorious Fourth and Labor Day come in for their share of money making with increased traffic in gasoline and travel tickets. The honored birthdays of our famous statesmen add to the ring of the cash register and what a difference all these holidays make to the balance sheet of business houses!

Along comes the changing of the Thanksgiving date when 23 states will observe the day on Nov. 23, and 23 other states on Nov. 30. There have been widespread remarks regarding the act from a political angle, and horrified gasps considering the change to help the Christmas trade. "Commercializing Thanksgiving!" There is nothing unusual in this aspect however else we may consider the move. There is no way of avoiding this matter of trading in on the name. We commercialize our food products, churches commercialize with suppers and bazaars, schools with football games.

YOUR HOME TOWN

It does not take a city with a large population, miles of pavement and huge department stores to make an ideal home town and trading center. A small town with good schools, churches, homes, business houses and enterprising merchants can fill the qualifications.

If the people of a community are friendly, loyal to their home town, and eager for growth, you will find a town with good, comfortable homes, well-kept yards, flowers and shrubbery, good

him our most careful consideration before trading elsewhere.

It does pay to advertise—although some people do not believe it.

The people who put their faith in goods advertised in some distant town, have become accustomed to the huge catalogs, preceding the fall harvest, and they know next August a new book will be received—and besides, before then a few small "teasers" will be in the mail box. It costs money to assemble a big catalog—the paper, the printing, the binding, the shipping and postage, mounts into millions.

The only way to off-set this catalog advertising is for the small merchant to use regularly the small ad system in the local paper that is read in most every home each week.

Yes, it costs a little—so does "loss of business". Most people buy on suggestion.

churches and growing businesses, because the people are proud of their town and trade at home.

A town cannot prosper if all the money is spent elsewhere.

When a man believes in his home town and spends money developing and advertising his business and helping to improve the community, we should give

WINTER DISARMED

90-hour threat ended by OIL-PLATING your engine today

You can probably agree that these are certainly conservative figures . . .

- 4 or 5 months of nasty weather right ahead of you now
- 8 or 10 daily cold starts for your car
- 6 to 8 minutes per start, till your engine's near-warm

And yet even that can run up your engine's cold-weather "starting-stretch" to right around 90 hours! . . . The foulest 90 hours that Gangster Winter could fire at your engine—your battery. And don't ever hope to halt him with motor oils whose biggest brag is "fast flow." That's not enough—and it's not your money's worth, considering that "fast flow" is mighty slow Winter lubrication compared to OIL-PLATING.

OIL-PLATING in your engine will lubricate before any oil can circulate. That's because the minute you start up with patented Conoco Germ Processed oil it makes OIL-PLATING "magnetize" to all inner engine surfaces, so that it cannot drain down again. It cannot retire to the crankcase as you park the car. Like any other good plating, OIL-PLATING stays right where it's plated by Germ Process action—all over the working parts. They've "got on" their OIL-PLATING all the while you're indoors. They never "take off" their OIL-PLATING. When you come out to start then, your OIL-PLATING can't be delayed even 90 seconds—or one-ninth of

a second! And away you go. The battery hardly knows it was working. And it's a good long while before the gauge-stick calls for an added quart of Germ Processed oil. Your Mileage Merchant has your right Winter grade. Change today—to that Conoco station of his. Continental Oil Company
