ROBERT LEE, COKE COUNTY TEXAS

FRIDAY, Oct. 29 1943

NUMBER 11

## HOME AGAIN

After attending Conference and spending the two weeks vacation the church so graciously gave us, we are "Home Again" and glad to be back with the good people of Robert Lee for another year.

We will be glad to meet you in our services next Sunday.

Brother and Sister Teers.

The Youth Fellowship (League) met Sunday October 24, and discussed the Birth of Jesus, led by Mrs. Gardner. It was a very interesting program.

On Sunday, October 31, the "Youth Fellowship" will continue the discussion on the book of Matthew. The program will start at 7:00 o'clock, P. M. We would like to see a good many young people come to the program next Sunday at the Methodist church.

M.I.M.

The courthouse lawn and the cemetery are the next coveted improvements for the capital city of Coke county.

Mrs. Frank C. Hearrell returned to her home in Long Beach, California last Tuesday, after attending the funeral of her father, J. N. Buchanan.

Howard B. Millican has been promoted from second Lieutenant to first lieutenant. He is stationed at Laughlin Army Air Field, Del Rio, Texas.

Lt. Millican was commissioned second lieutenant at Camp Lee, Virginia, last October.

FOR SALE—House and ten acres of land close in. A dandy chicken farm, river front. See.

Clarence Vestal.

## STREETS PAVED AT LAST CIVIC IMPROVEMENTS;

Believe it or not, after wishing and scheming for many years, Robert Lee can now enjoy paved streets of several blocks, as fine and modern as there is in the State, connected with the paved highway outlets.

The paving has given civic pride a new pitch and lots of folks are taking advantage of the boost and adding little features that will help our little city become a proud home town. Look your place over and see what you can do to help.

Notice is hereby given to all members of the Coke County Cooperative Association that a meeting will be held in the court house at Robert Lee Saturday, October 30, at 3 P. M. for the purpose of electing directors for the coming year, and also the consideration of other important matters. Anyone wishing to join the Coke County Cooperative Association is welcome to attend also. This organization is of the farmers and ranchers is for them, too. It will amount to just what the farmers and ranchers make it.

Mrs. Owen Smith and sons, Danny and James, returned to their home at Arlington, after a visit with her parents, Mr. and Mrs. Will Millan.

**"Wanted—Parachute At Once"**  
FOR ANYTHING YOU NEED  
TRY OUR WANT ADS

Miss Maxine Robbins and were married at Lake View last Te.h. Cpl. John R. Cockburn Sunday, October 17, at 5 P. M. Their future home is army orders. Mr. Cockburn is with the Signal Corps at Davis, California. Mrs. Cockburn is a daughter of Mr. and Mrs. L. C. Robbins of Hayrick.

Mrs. Inez Franklin and children of Bronte spent Sunday in the F. C. Wojtek home.

Mr. and Mrs. J. M. Rippe-tor of Bronte visited Mr. and Mrs. A. W. Littlefield and family Sunday.

Mrs. J. A. Ulmer of San Angelo spent last week here with her brother, J. S. Craddock, and Mrs. Craddock.

1472 ration books were issued in Robert Lee.

Sfc. Lawrence E. Higgins came in from Baltimore for a 15 day furlough with home folks.

Mrs. Allen Davis and two girls and Wallace Clift were here on a visit this week.

Juanelle Jay led the freshman class with 94 average, in Lake View school.

Cpl. James E. Rives visited home folks in Robert Lee last week.

Addie Bell Fish came home Sunday for a two week vacation and then on to Austin where she will spend two weeks with the Simpsons and then back to her school work.

**What You Buy With WAR BONDS**

One of the most essential articles of equipment for our soldiers is his canteen. In equatorial countries and in other warm climes they are particularly important to the welfare of our fighting men.

The canteen, now being largely manufactured of plastics, costs about 43 cents. The canvas cover . . . about 41 cents or 34 cents in all. Your purchases of War Bonds, or People's Bonds, will buy many of these for our men in the Solomons or in Africa where they are badly needed. Buy War Bonds every payday . . . at least ten percent of your income . . . through a Payroll Savings plan. U. S. Treasury Department

## Ranch Wanted

## "THE SIN OF FORGETFULNESS"

Gen. 40:23

Here is a story of a man in prison on a charge that was untrue. While he was imprisoned he befriended another, and then requested this one to remember him to the king when he was freed—"yet did not the chief butler remember Joseph but forgot him." Jesus was innocent, for Pilate said, "I find no fault in this man." Yet He was the friend who died in our stead, and He requested us to witness for Him—have you forgotten His love for you? You can remember Him by being in His house each Lord's day. Were you at church Sunday—or did you forget? Let's make it 85 in Sunday school, Sunday.

Harry Hames,  
Pastor Baptist Church.

## CARD OF THANKS

We want to thank our many friends for their kind thoughts and deeds during the illness and death of our husband and father, J. N. Buchanan, and for the many beautiful floral offerings. May God bless each and every one of you.

Mrs. J. N. Buchanan and children.

Austin, Texas, October 23.—Schoolboy basketball is due to be a big drawing card again this year in University of Texas Interscholastic League competitions, Rodney Kidd, League athletic director, has predicted.

The deadline for entering basketball teams is November 15, Kidd has announced.

Nearly 800 schools are eligible to enter teams this fall, with 441 schools listed in Conference B, 237 in Conference A and 104 in Conference AA.

Mrs. Anna Sparks has returned home after a few days visit in Brownwood with her daughter, Mrs. Wayne Hulse. Mr. and Mrs. Hulse returned with her for a short visit.

## THE COWBOY PREACHER

The cowboy preacher, Rev. Clive Calley will begin a meeting November 1st, in the courthouse in Robert Lee. Prophecy will be explained in its true light.

Every body come—everybody is welcome.

## ATTENTION FARMERS

Farmers who have turkeys for fall market should begin to finish them on grain for the Christmas market which will begin about December 1st.

Your county agent may be able to give you some helpful advice on marketing your turkeys.

Marvin Stewart renews his Observer.

## REQUEST

Beginning November 1st, owing to conditions in general, I will have to ask you to PLEASE wash and place your bottles out every day—or else I cannot deliver you milk daily.

This conforms to regulations—THANK you.

Bryan's Dairy.

Christmas is just around the Corner. We have a nice selection of Gifts. Use our lay way plan. A small deposit will hold anything in our Store.  
**CUMBIE & ROACH**

Mr. and Mrs. Tony Queen of Winters visited in the home of Mrs. Biggs and Mrs. Danford last week.

Jack Austin who has been at home on a visit returned to his post of duty, Saturday.

T. R. Harmon renews his Observer.

Mrs. Elva E. Stagner adds her name to the readers of the Observer.

The Baptist General Convention of Texas will meet in Dallas, November 8-11.

W. J. Martin renews the Observer.

Sgt. Madison (Mack) C. McCutchen won a marksman expert medal for rifle practice and was awarded a miniature machine gun. Mack was one of eleven in his squadron to win this honor.

G. E. Davis renews his Observer.

Coke Austin Jr., passed the first examination for the Navy and left for Lubbock Monday to take the other test.

Mr. and Mrs. Jack Duncan have returned from Riverside, California, where Jack was stationed before he received a medical discharge from the army.

Mrs. Murl Day and son, Frank Edward, visited in Robert Lee, Wednesday.

Miss Hazel Ruth Peays of Texas Tech spent the week end with her parents.

Mrs. Adams of Beaumont is here visiting her daughter, Mrs. Dennis Markham.

One-room apartment for rent. Inquire at the Observer office.

## CARD OF THANKS

I take this method of thanking our many friends for the kindness shown us the past few weeks in our illness. May He who giveth all good things richly reward.

Mrs. S. R. Young.

Otis Wigington from near Lamesa was here on business last week.

Mr. and Mrs. Walker Cobb and J. C. Wojtek of San Angelo spent last week end with Mr. and Mrs. V. V. Wojtek and family.

Rev. Lloyd McGallion was here recently visiting relatives.

**LOVELY LEGS!** Lovelier because they're wearing Larkwood Hosiery. Price \$1.04 pr.

# The Plow Is NOT the Enemy of the Farmer, Says a Noted Agronomist, Who Replies to That Charge in a Recently Published Book

By **ELMO SCOTT WATSON**  
Released by Western Newspaper Union.

**I**S THE plow the arch-villain in the tragedy of soil erosion that costs American agriculture two billion dollars a year through the loss of precious nitrogen, phosphorus and potash from the nation's farms? Or is it one of mankind's traditional benefactors? Will the plow eventually become an obsolete implement and a museum piece, or will it continue to be one of farming's main reliances?

Americans, especially farmers, who have learned to "revere the plow" and who read the book "Plowman's Folly" written by Edward H. Faulkner and published recently by the University of Oklahoma Press, or who saw articles in the newspapers based upon that book, no doubt were startled when Mr. Faulkner told them that the plow was an enemy rather than a friend of agriculture. But the old saying about there being "two sides to every question" has proved true again, for no less an authority than Dr. William A. Albrecht, head of the soils department of the University of Missouri, now comes forward to defend the plow and to offer a rebuttal to Mr. Faulkner's charges against it.

Dr. Albrecht both agrees and disagrees with the author of "Plowman's Folly." He acknowledges that farmers in the silt loam soil areas of the United States have, in the past, plowed too much. As a result, the heavy rainfall in these regions has washed away priceless soil. But the question, "to plow or not to plow," cannot be answered "yes" or "no" nor is it safe to make hasty generalizations in any other respect while dealing with this subject. The crux of the whole question lies in the soil and climatic conditions of the geographical region involved.

"We need to plow less on some soils and, conversely, we need to plow more—and deeper—on others," asserts Dr. Albrecht. "We need to learn that the differences in degree of soil development according to climatic differences are factors in determining how important the plow is."

In "Plowman's Folly," Mr. Faulkner charged that the moldboard plow "now in use on farms throughout the civilized world is the least satisfactory implement for the preparation of the land for the production of crops. . . . The truth is that no one has ever advanced a scientific reason for plowing." Moreover, he says that the plow is responsible for "all the erosion, the sour soils, the mounting floods, the lowering water tables, the vanishing wild life, the compact and impervious soil surfaces" that have harassed American farmers for a generation.

And there the University of Missouri scientist disagrees. He holds that even though the average farmer can't give a scientific answer to the question "Why plow?", the men of science can provide plenty of valid reasons for doing so. High on his list of reasons is the fact that this practice supplies the soil with oxygen which helps transform its chemical components into usable plant food for growing crops.

### Aerating the Soil.

"Any microbiologist will testify that plowing aerates the soil," he says. "As a consequence of the change of atmosphere in the soil and because of the stirring by the moldboard plow, there is new 'life.'"

"The soil is a factory in which energy is expended. Tons of carbon are being burned to form carbon dioxide. Sulphur is oxidized into sulphur dioxide. Ammonia is changed to nitrate. Other similar combustions are taking place.

"A 40-acre corn field under maximum growing activity in July burns an amount of carbon equal to the coal used in running a 40-horsepower steam engine in order to form carbon dioxide. Can anyone deny the necessity of air for such a performance? Surely no one would close the draft by refusing to plow and thus destroy such crop producing power.

"This burning business in the soil by means of oxygen from the air must go on, if the plant nutrients tied up in chemical combination with carbon are to be released for repeated use by other plants that follow. Were this performance not proceeding in the soil, life on the globe would soon become extinct. The soil's productive power would soon be expended. As a result, the

Plowing scenes such as this will not soon vanish from the American scene, says a noted agronomist who refutes the charges in a recently published book that the plow is the enemy of agriculture.

soil could offer nothing and no growth could occur."

Plowing has the further scientific value of helping the soil supply a larger amount of soluble nitrogen for growing crops than would otherwise be available, according to Dr. Albrecht. Studies of the nitrate supply in soil planted to corn forcefully support this finding.

Tests were made on three adjoining plots planted to corn. One plot was unplowed. The second was plowed. The third was both plowed and cultivated. The soluble nitrogen supply in the plot that was plowed and cultivated was at least 30 per cent greater than in the unplowed tract. In the plowed tract it was between 25 and 30 per cent greater.

"Crop yields correspond to the level of these nitrate supplies," says Dr. Albrecht. "The farmer may not know that these higher levels of nitrate are responsible for his improved crop yield. Nor may he understand that they are the result of his making the soil 'turn turtle' with his plow. He simply plows ahead of the corn to get a better crop. His inability to point out the underlying scientific channels through which the effects of plowing are transmitted to the crop, does not put the plow into bad repute in his eyes.

"Surely the hundreds of thousands of corn producers will not suddenly discard so ancient an implement merely because they cannot call to

tends the period of sterility of the soil due to dryness.' Crops are not declining or failing because plowing is drying out the soil.

"The forces that turn plowed land into bare, eroded fields are not the mold-board plow and the horses or tractor that pull it. They are the continued removal of soil fertility with little or no return of needed plant foods. Plowing is not the cause of the depletion of the fertility supply. Depletion occurs because of the fertility removed when the crop is hauled off to market. The plow is not the exploiter; rather it is the farmer. The plow is merely the tool that facilitates his exploitation at a faster rate and over more acres than before the plow was given him. The plow has helped him feed many of us too far removed from the land to appreciate its exploitation."

In urging that the plow be junked as an agricultural implement, Mr. Faulkner's book advocated the use of the disk harrow as a means of producing more and better crops, because it would incorporate crop residues, green manures and organic matter into the top soil. To this suggestion Dr. Albrecht had the following to say:

"The author of 'Plowman's Folly' condemns the plow because it inverts completely the upper portion of the soil profile. In its place, however, he advocates the use of the disk harrow which carries out a similar process, differing only in degree."

To Mr. Faulkner's contention that crop residues or organic matter from plants allowed to grow of their own accord should be incorporated into the top soil without the addition of manure, lime or other fertilizers, Dr. Albrecht replies:

"Such a proposal does not take into account differences in vegetation in type or quality. Weeds or forest trees as ancient as the sequoias are taken on a par in the 'Plowman's Folly' thesis with legumes as soil rejuvenating agencies. The author cites 'every wooded country' as a perfect example of soil maintenance, but neglects to mention the low level of fertility and the difficulty involved in maintaining life."

Mr. Faulkner's belief, that the prevalence of wild life on the western plains was due to the fact that this region was unplowed, comes in for some critical analysis, also. Dr. Albrecht points out that the unplowed wooded areas of New England which our Puritan ancestors first settled, supported only a few wild turkeys and squirrels.

In further refutation of the contention in "Plowman's Folly" that "principles which are valid in the forest are valid in the field," Dr. Albrecht asserts:

"In view of the fact that the soils differ as widely as they do under forest and under prairie, we surely cannot subscribe to the belief that all 'principles valid for the forest are valid for the fields.'"

Summarizing his views on the entire subject, Dr. Albrecht concludes: "The indictment of the plow by the book 'Plowman's Folly' will not stand against the facts of science nor the judgment of experienced farmers. This publication will fall far short of helping us to realize that 'the Garden of Eden, almost literally, lies under our feet almost anywhere on earth we care to step,' provided we allow vegetation to grow and we cling to the disk harrow as a means of turning it under rather than to the mold-board plow."

DR. WILLIAM A. ALBRECHT

their aid scientific evidence, when someone concludes for them that the plow is the cause of increased erosion and other devastation that is so easily associated with it."

### Villains of Erosion.

To Mr. Faulkner's charge that plowing is solely responsible for erosion, Dr. Albrecht counters with the assertion that the real villains are continuous cropping and the steady removal of plant food elements year after year without any effort to replenish the soil's resources of nitrogen, phosphorus and potash.

"It is true that plowing and cropping a soil year after year bring with them declining crop yields," he says. "For these one might readily pounce upon the plow as the culprit in the case. But the fact is that declining crop yields have other causes than merely the plowing operation. They cannot be explained away by the simple belief that 'the explosive separation of the soil mass wrecks all capillary connections temporarily'; and that 'the organic matter sandwiched in further ex-

## ASK ME ANOTHER?

A quiz with answers offering information on various subjects

1. What were Clotho, Lachesis and Atropos in mythology?
2. How many nations are included in what we call "The United Nations"?
3. How many tons of blueprints go into the making of a 35,000-ton battleship?
4. In law what is the meaning of pro tempore?
5. Which continent has the greatest area?
6. What fraction of the total radiation of the sun does the earth get?

7. Who owned the sword called Excalibur?

### The Answers

1. The three fates.
2. Thirty-four.
3. Approximately 37 tons of blueprints are needed in the building of one 35,000-ton battleship.
4. For the time being.
5. Asia.
6. One five hundred millionth of the total radiation.
7. King Arthur.

## Sunflower Quilt Is Fascinating to Make

THE "Sunflower" is one of the easiest of the quilt designs to make—the diamond-shaped pieces are easy to cut and a block works up quickly. Use brown-flecked percales, tiny patterned cream and yellow calicoes, grass-green and leaf-green cottons. Do the center in vivid yellow. Quilt has 12 pieced blocks, each 14 inches square—12 plain blocks.

To obtain cutting patterns for the Sunflower Quilt (Pattern No. 5161) complete piecing and finishing directions, amounts of all materials specified, send 16 cents in coins, your name and address and the pattern number.

HOME NEEDLEWORK Chicago, 530 South Wells St.

Wages in Washington  
The average salary of the 280,000 government employees in Washington today is about \$47.75 a week.

## Relief At Last For Your Cough

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

## IF YOUR DEALER IS OCCASIONALLY OUT OF CAMELS

—it's because hundreds of millions of Camel cigarettes are now being sent to men in the service. In addition to the government's own purchases for our fighting men, veterans' organizations, fraternal orders, clubs, friends and relatives everywhere are sending them Camels. Yes, Camels! After all, Camels are the favorite cigarette with men in all the services—Army, Navy, Marine Corps, and Coast Guard.\*

*First in the Service*  
—AND THE SERVICE COMES FIRST!

WHILE we have pushed Camel's production to new peaks to meet this overwhelming demand from Uncle Sam's fighting men and from the folks at home, yet if your dealer does not always have Camels for you, he asks you to be patient while he is temporarily out of them, believing you will agree that the men in the service should come first.

\*Based on actual sales records, the favorite cigarette with men in the Army, the Navy, the Coast Guard, and the Marines is Camel.

**THE CHEERFUL CHERUB**

Salads Belong in Autumn Menus (See Recipes Below.)

**Salads for Fall**

Is a salad an integral part of your diet or do you set it aside just for summer months when vegetables are easy to obtain and serve in salad form?

Food authorities and doctors have long recommended the use of raw fruits and vegetables in the diet not only to guarantee more vitamins and minerals to the dietary, but to give the necessary roughage to the system. Vegetables contain a great deal of cellulose and are not as easily digested as the softer foods. This means they aid in proper function and elimination and belong daily in every diet.

Although we are limited in the amount of fresh vegetables obtainable in the fall and winter months, there are some available which offer many possibilities for salads. Cabbage, carrots, citrus fruits and apples are the most common. For a more substantial salad item, use cottage cheese. It will also give you a goodly amount of calcium, needed for proper bone and tooth development.

**Green Bean Salad.**  
(Serves 2)

Place green stringless beans, cooked and chilled in individual lettuce cups. Combine 1 tablespoon vinegar, ¼ teaspoon salt and pepper to taste. Beat with egg beater or shake in a jar until well blended. Mash 3 tablespoons Roquefort cheese and then add oil and vinegar mixture slowly, stirring until very smooth. Pour over beans and serve at once.

**Surprise Vegetable Salad.**

Sliced boiled beets  
Sliced boiled string beans  
Sliced boiled carrots  
Boiled green peas  
Boiled lima beans  
French dressing  
Chopped chives  
Boiled potatoes

Prepare and cook separately, in the usual manner, an equal quantity of all the vegetables mentioned in recipe. Boil potatoes with their jackets, peel while still warm and marinate in french dressing while still warm. When ready to serve vegetables, have them well chilled and arrange in layers in a large salad bowl, starting with beets at the bottom, followed by lima beans, then string beans, next with carrots, followed by peas. When all vegeta-

**Lynn Says:**

Salad Notes: Ingredients for a salad should be large enough to retain their identity. It's not a good idea to hide a vegetable the family does not like by chopping it very fine. Shred, but do not chop vegetables.

Simplest salads are the most attractive. A salad should taste as good as it looks.

Toss ingredients lightly, never stir ambitiously. Dressing need not cover every piece. Salad greens should always be clean, crisp, fresh.

Vary salads from day to day. Try new combinations of color, vegetables and fruit.

**Lynn Chambers' Point-Saving Menu**

- Pan-Fried Liver and Onions
- Creamed Potatoes
- Parsleyed Carrots
- Apple, Carrot Salad
- Whole Wheat Bread
- Lemon Chiffon Pie Beverage

bles are used, pour over them a tart, well-seasoned french dressing. Cover the whole with a layer of potatoes, being sure that all the peas are covered. Sprinkle top with fresh, chopped chives and serve.

Greens, be they lettuce, romaine, chicory or escarole, need little else but a dressing for they are perfectly delicious just so and a splendid course for a heavy type of dinner:

**Salad With Egg Dressing.**  
(Serves 6)

- 2 heads of lettuce
- 4 hard-boiled eggs
- ½ cup cream
- ¼ cup lemon juice or cider vinegar
- Salt and pepper
- Prepared mustard

Wash lettuce carefully and dry thoroughly. Put the yolks of the eggs through a ricer and let them drop to the bottom of a well-chilled salad bowl. Add a little prepared mustard and stir with a wooden spoon, adding the cream gradually. Season to taste with the salt and pepper, then add lemon juice and vinegar. Add the lettuce, toss lightly and sprinkle the chopped whites of egg over all. Serve on cold plates.

The use of cottage cheese with salads gives them a heartiness which is particularly necessary in the cooler weather. Here is a well-seasoned salad, pretty and colorful:

**Apple, Carrot, Cottage Cheese Salad**  
(Serves 6)

- 3 apples, coarsely diced
- 2 cups shredded raw carrot
- 1 tablespoon onion, finely minced
- 1 cup cottage cheese
- ¼ cup mayonnaise
- 2 tablespoons lemon juice
- ¼ teaspoon salt
- ¼ teaspoon pepper

Dice unpeeled apples and combine with grated carrot and onion. Add the cottage cheese blended with mayonnaise, lemon juice, salt and pepper. Mix well. Serve on lettuce.

**Molded Cranberry Salad.**  
(Serves 8 to 10)

- ½ pound cranberries
- 1 medium-sized apple, unpeeled
- 1 orange and rind
- ½ cup sugar
- ¼ teaspoon salt
- 1 package orange-flavored gelatin
- 1 cup hot water
- ½ cup cold water
- ½ cup chopped celery

Pick over cranberries, wash and drain well. Grind cranberries, apple and orange (including rind), saving any liquid which remains. Stir in sugar. Cover and set aside while gelatin is dissolved in hot water. Add cold water and allow to become partly jellied, then add cranberry mixture and jelly. This may be poured either into a loaf pan or individual molds rinsed with cold water. Allow to jell, then unmold on lettuce.

Are you having a time stretching meats? Write to Miss Lynn Chambers for practical help, at Western Newspaper Union, 210 South Desplaines Street, Chicago, Ill. Don't forget to enclose a stamped, self-addressed envelope for your reply.

**AROUND THE HOUSE**

Some chopped olives and sweet or sour pickles added to cole slaw gives an interesting new flavor.

To sprinkle clothes for ironing, use a clean whisk broom or a bottle with a perforated top.

When washing fails to remove stains on your oven try using ammonia. Saturate a cloth pad, place it over the stain, and let it stand. After about two hours, you can wipe away most or all of the stain. Wash the oven thoroughly with soap suds after using ammonia.

To avoid losing a handkerchief placed under a bed pillow, try sewing a pocket on one side of the pillow case.

Spaghetti, macaroni, noodles, rice, are high in carbohydrates and should be counted with the cereals and breads, not as vegetables, when planning and balancing your menus.

Three tablespoons of light molasses substituted for three tablespoons of the liquid used in making bread pudding will add much to the flavor of the pudding.

Do you know the new regulations on packages sent to men in the service? Here they are: You can send packages to soldiers anywhere in the U. S., although there are now Post Office restrictions on packages to overseas Army men; and you can send packages to men in the Navy, Coast Guard, and Marines, wherever they are. And when you send that package from home, remember—the gift men in the service always appreciate is cigarettes. And the favorite with men in the Army, Navy, Coast Guard, and Marines is Camel (based on actual sales records in Post Exchanges and Canteens). So stop in at your local dealer today—and mail him a carton of Camels.—Adv.

**RIGHT** You breathe freer almost instantly as just 2 drops Penetro Nose Drops open your congested nose to give your head cold air. Caution: Use only as directed, 25c, 2½ times as much for 50c. Get Penetro Nose Drops

**WANTED: Sales Representative**  
Man or woman, to call on merchants in your vicinity—offering service urgently needed by every small business. Full or part-time proposition. Sales experience helpful but not essential. Unlimited opportunities; excellent earnings. Write—**P. O. Box 721 - Dallas, Texas**

**Responsibility**

Over two billion people walk daily on the earth. Probably 75% of them never do any broad thinking. They keep so busy trying to earn food, clothing and shelter that vague notions about social, scientific and governmental progress seem hopelessly high and rarefied. Of course these generalities don't apply to the United States. We do things better in this country.

Realizing what a big share of the human race struggles daily for a bare existence, one may ask—Why don't their governments do something about it? The shameful answer is that they do. Government restrictions are themselves responsible for most of the poverty and ignorance in the world.

**Freedom at Work**

Good ideas put into execution benefit a great many people. Henry Ford had a good idea, for example. It enriched him; it benefited thousands who helped him execute it and made broader horizons for millions of others. But if a man with an idea can't do anything about it (not having enough learning or enough capital or enough freedom) everybody loses, nobody benefits. The more liberty people have to solve their own problems, plan their own work and determine their own destinies, the more abundant lives they lead.

China, where I spent 20% of a normal lifetime, is a much governed country. For centuries, literally, Chinese war-lords consumed the fat of the land and managed to keep the masses poor, groping in ignorance. Coolies toil from sun to sun with crude tools, live on half rations and earn less in a month than a Detroit welder draws in two hours. Living standards in any two countries differ as their measure of freedom differs.

**Fruits of Liberty**

Individual liberty in America has been greatest; governmental supervision the smallest ever known since the history of nations has been recorded. And what has been the result? Living standards in America reached a much higher plane in ten generations than they attained in China in forty centuries. Americans are all free to have ideas and develop them, so our gain from constructive thinking and working has been enormous. Already America is rich, and Oriental countries are still poor.

There is more to good living, of course, than simply being at liberty to live well. Prosperity such as America has (such as no other country ever had) is a direct result of volume production which is characteristic of America. The hood carrier drives a car and the farmer's wife, far from the city's noise and soot, has an electric refrigerator and washing machine. The fact that makes our country marvelous is that most people can afford such things, that retail prices are within their reach. And it is volume production that keeps prices down, along with the competition afforded by Free Enterprise.

**Our Wealthy Poor**

It is also volume production that keeps wages high and working people prosperous. The Chinese peasant produces little and therefore earns little, working as hard as he can and using all the knowledge he possesses, which is not much. The American worker can master one skill and draw \$1 an hour for the obvious reason that he produces much and actually earns \$1 an hour; nor does he hurt himself working.

American workers know more than Coolies because they are permitted to know more, not because they have better brains. American workers produce more because they have better tools. Plant owners who provide the jobs are interested in production, so they also provide the tools at an average investment of \$6,000 per job. Some industries, railroads, for example, invest as much as \$25,000 in equipment per one-man job. It is no accident that an American workman produces three times as much as a German and six times as much as a Japanese. Freedom of progress does it—Private Enterprise.

**Freedom to Think**

The ruling class in China does not have a monopoly on the nation's brains. Some war-lords are pretty stupid; just smart enough to destroy other men's opportunities. In fact no small set of people anywhere can do a whole nation's thinking without retarding progress, destroying opportunities, cutting off sources of great wealth and, in so doing, lowering everybody's living standard.

The United States is still a long way ahead of China but American living standards will go appreciably lower if a handful of people insist

upon doing the national and industrial thinking after the war. War work has to be co-ordinated; it must be. But managing absolutely everything is too big a job for any mundane few. It results in rationing sugar beyond necessity and letting fruit worth many fortunes rot on the ground for want of canning sugar. But why go into all that again?

In America, as in China, the ruling class holds no monopoly on thinking equipment. Denying people the right to do the best they can with what they have is not regulation; it is restraint; it is a ball-and-chain on the ankle of a nation,

# WHEN WILL THIS WAR BE OVER?

**A** FATTISH MAN we overheard in a Pullman diner said it would be over some time during the week of November 11.

He'd talked to "a man who knew a man who was high up in the army" who'd said the Allies were planning to terminate the war on the 25th Anniversary of the Armistice.

*The fattish man doesn't know.*

A woman, who is president of a literary club in a medium-sized town in Colorado, says the war will be over in April, 1944.

This is (we quote her) "just a year after the fall of Tunisia, which is about the time it ought to take us to beat Hitler and clean up the Japs."

*The lady doesn't know.*

The fact is that nobody can look into a crystal ball and tell *when* this war is going to end. Nobody, not even the General Staff, can look at the war maps, survey the disposition of troops, weigh our might against the enemy's might, and tell *when* this war will end.

There's only one thing we can be sure of—*just this one thing:*

This war will end *sooner* if everybody on our side—and that includes *you*—pitches in and does everything he can to help end it. "Everything" means, among other jobs, buying all the War Bonds you can afford. All.

Your government is asking every citizen to purchase—during September—\$100 extra in War Bonds. At least \$100 over and above what he has been buying.

Does this sound like a lot to you? Well, the only answer is *our men need a lot*. A General Sherman tank still costs \$90,000; a Flying Fortress still costs \$450,000.

You can buy your extra \$100 worth, can't you? If you think you can't, read over every story in today's paper that tells about some soldiers, some sailors, some marines, some merchant seamen dying somewhere in this war-ripped world.

And remember—they're dying for you.

**Betty's Bean Is Calling**

"I'd love to go," Betty says, her face all smiles.

The young fellow she met Saturday—the one Dad liked so well—is calling to suggest a movie.

There used to be long, lonesome evenings. But since Dad got a telephone . . . well, Betty has a beau.

To the Betty's of this world—as well as to the rest of us—the telephone brings happiness, give-pleasure. If you don't have one in your home, you're missing something. Ask at our business office . . . today.
