PORTALES, ROOSEVELT COUNTY, NEW MEXICO, FRIDAY, AUGTST 9, 1918

NUMBER 9

From Archie Stephenson

July 26th, 1918, Palham Bay, and it was a row boat.

all the crew.

who were excited. One man stood it up on the row boat.

to get back to sea.

Your loving son, Arch Stephenson.

Memorial Services

The memorial services at the Methodist church last Sunday were well attended. The people of the city and country gathered in large numbers to do honor to the memory of our first young man to fall a victim to the ferocity of the Hun. The program, as published in last week's Journal, was carried out, Judge G. L. Reese, in behalf of the county council of defense, making the principal address. He was followed by Rev. W. W. Turner. The music and singing was appropriate and good.

h day fitted

e you prices one.

Thursday evening the largest rain fell here that has been known since September 15, 1915, the precipitation being 1.32 inches. This was followed Friday evening by another in which more moisture fell than on Thursday. Just how general these rains were is not known here, but it is believed that some time during the week about all sections of the county have had rains.

Some Good Cattle

The Journal man was invited New York. - Dear Mother: - Will by Mr. George M. Williamson with Ed J. Neer, was taken over try to write you this afternoon as last Sunday to take a ride through the new road now under course we are stationed again. Don't know just how to be endured without complaint. long will be here. I will be glad The turf in all these pastures is heavy and, with any rain at all within a reasonable time, this fall and winter, there will be an abundance of grass for many times the number of stock being run. During the past year the loss from poverty, blackleg, or other causes, has been negligible, scarcely enough to be taken into account. Of course, they were caked through the winter and for a few days in the spring, during a particularly bad time, but aside from this, they have been carried on grass exclusively. Aside from a very few old grade cows, there is not a poor animal on the ranch, and some of them are better than is being butchered in some localities. Taking general conditions into consideration, the managemement is pleased with the outlook for this proposition and is looking forward to a nice profit from this ranch.

> Miss Thelma Trimble, of Lubbock. Texas, is here visiting her sister, Mrs. Maude Smith.

Good Piece of Work

The Journal man, in company Kemp Lumber Company.

This road, when completed will cost \$8,000.00, half of which is paid by the government and half by the county and state. There has been double the amount of sand to handle that there was on the Portales-Clovis road, which cost \$16,000.00; also on the latter road: teams were paid \$5.00 per day as against \$7.50 on the Lovington road; and labor, \$1.50 as against \$2.25. This has been an accomplishment that is little short of the miraculous. It has opened a good road, one that can be traveled without shifting gears, through a heretofore absolutely impassable range of sand hills, one that it would require four horses to pull one thousand pounds.

This system of handling sand is one that has been worked out by Mr. Jones after a rather disappointing experience with all other methods. It makes a better road, one that is more permanent and one that will require less expense in up-keep. There is two stages in this system, the first when the excavation is completed and the second afterwards, when the wind has cleaned out the sand and the leveling and filling is done. Of course during the first stage the road bed is rough and bumpy, but in the secondary to paved streets.

From Camp Travis

Mrs. F.R. Smith, writing from Camp Travis, where her son is ill, states that all who have sick folks in the hospital may find the very best of acommodations at Y. M. C. A. headquarters; that the officers and attendants see that every convenience is at your disposal; that you may make the Y hour home while there and be in clore touch with your sick at all times. Through a mistake the letter describing all this was not put into type. It was an interesting letter and will appear next week. The second letter follows:

My Dearest Husband: - I am leaving San Antonio to night at 11:30 for Houston. Albion is getting along nicely and is now out of all danger if no other complications set in. They surely do take good care of the patients. I was surprised at the good attention they get. I have stayed right here at the Red Cross house since I have been here. visiting hours at the hospital are from 9 to 10 o'clock in the morning 2 to 4 in the evening. I have enjoyed being here, everything is new to me. I will have lots to tell when I get home. Everything is so nice here and every body friendly. I have met people from every where here. A lady is here from Muskogee, Oklahoma, that has a son in the pneumonia ward where Albion is and she and I have chummed together. It is just about 8 o'clock. I will close and go over to the hospital and stay with Albion until 8 o'clock and then go to the depot. I hate to leave him sick but I will leave knowing he is being taken care of. Let me hear from you at once. Your true and loving wife. Mrs. F. R. Smith.

M. B. Jones this week sent to the Journal office a box of nice Wilcox and Williamson, and grapes raised by them on their irrigated farm which joins the town on the east. This is what is known as the Dwight Reynolds farm, the improvements and fruit having been put on by him. Mr. Jones has owned this place about two years and has added much to its beauty and to its value. The Journal bunch sure appreciated the fruit.

> Miss Maurine Seay, daughter of Mr. and Nrs. A. B. Seay, and Milton Hardy, arrived Monday from Ardmore, Oklahoma to visit with their grandfather, Mr. R. Hardy. Miss Maurine and Milton have a host of young friends in Portales who were tickled to death to see them.

The Deep Sea Peril

By VICTOR ROUSSEAU

CHAPTER XV-Continued.

-16-She ran unchallenged through the

Jestroyer flotilla and came alongside the rear-admiral's flagship, a monster cruiser armed with a powerful battery, on which he had hoisted his pennant. A few minutes later Davies and Ida clambered aboard, leaving Clouts in charge of the submarine and of the queen of the swarm.

Half an hour later Clouts received the command to take the F55 to London as best he could. Davies' interview with the rear-admiral had decided the latter to open hostilities immediately. The squadron spread out and approached the Dogger fanwise, to en-knows that he will fulfill his pact?" circle the monsters.

MacBeard, who had just awakened aboard the motorboat, saw in terror the great shells dropping all about him. He thought this was the end of all his plans. It seemed impossible to escape.

But the monsters, terrified by the vibration, dashed wildly in all directions, and, finding themselves ringed in, churned up the water madly. The man in the chains on the flagship looked at his lead incredulously. It marked 12 fathoms, where it should have marked 25. It marked ten, seven, four-and suddenly the sea seemed to open. Half the vessels in the attacking squadron grounded. They lay on their sides in the North sea sand, one set of guns pointing heavenward, the other toward the bowels of the earth.

Then a huge, agitated wave, radiating outward from the still vortex in which the motorboat reeled dizzily, lashed them and buffeted them affoat. Beyond control, the dismantled, fleeing squadron drove under the pounding waves in all directions.

she drew alongside. In her stood Mac- over them if—if we give her her head. Beard, triumphant in this display of I wonder if we couldn't use her to outhis power.

Five minutes later he stood in the presence of the rear admiral, Davies let me have another look at her." and Ida, as well as of the junior of-

"You see, we are unconquerable," he said grimly. "But I have come to offer you terms."

As a public enemy, many afterward said that he should have been hanged then and there, in spite of his envoyship. But the rear admiral refused to violate the traditions of the sea-or perhaps he realized that, MacBeard dead, he could hope for no means of subduing his unchained devils.

"What are they?" he inquired courteously.

"First," said MacBeard, "personal indemnity."

"In return for what?"

"In return for the destruction of this menace. I pledge my word that it shall disappear forever."

But how?" MacBeard hesitated. Eager as he now was to destroy the herd, he was not overanxious to reveal his plans, However, he yielded the point.

"As you have observed," he said, "they are completely under my control. I will take them into Skjold fjord, on the Norwegian coast. As you know, it is a huge body of water, surrounded by cliffs of high basalt, and having an entrance barely large enough to admit a small steamship. Once they are there, the entrance can be blockaded until they are dead of famine. In return I demand possession of-" and he looked toward Ida.

He did not know her name, but it did not strike him as peculiar.

A glance at Ida's horror-strickken face was sufficient to enable the admiral to decide.

"We refuse," he said.

But Ida stepped forward and laid her hand on the admiral's arm. "I cannot let you refuse," she said.

"I am nothing-"No!" cried Davies. "You shall not accept his terms !"

"Yes," answered the girl, facing him quietly. "It is only myself, and there is the whole world at stake. Wouldn't Donald do as much for me?"

And Davies was slient. For Donald had said very much the same thing when he thought Ida dead on Fair

Ide turned to MacBeard. "You wish me to be your wife?" she asked. "Yes-if you like to call it so," he

stammered in answer. "I will go with you," she said.

The admiral interposed. "But it can only come from you." He and then—where was it MacBeard addressed MacBeard. "I am willing so had gone?" far," he said. "The government cannot refuse to ratify those terms. What
is your next?"

In an willing so
that gone?

Skjold fjord. I was there on my
first cruise, sir. It's a deep, almost they were within twenty miles of their from varnished furniture and keroland-locked harbor in a wild part of destination when the speed of the F55

sene from oiled furniture.

"My third and last demand is-fifty gallons of gasoline."

CHAPTER XVI.

The Queen's Call.

It would be difficult to estimate the mingled rage and horror that swept over London that night when the news came of the admiral's treaty.

The admiral felt that he had rid the world of a dangerous menace for a bagatelle. But the feeling in the Admiralty was one of humiliation and vindictiveness.

"The scoundrel!" muttered the second sea lord, clenching his fists. "Who

"He must," said Donald.

"Why, sir?" terms shows that MacBeard has no ulterior motive. I think," he added.

'that the admiral did perfectly right." "And Miss Kennedy?" inquired the sea lord.

"Sacrificed herself for her countryas others have done," Donald replied. But the second sea lord did not under-

The news of the expected arrival of the F55 having become public, Donald sent a wireless message to a patrol ship, ordering her to intercept the vessel and bid it anchor off the Nore, where he could go aboard without publicity. When he arrived early the same morning the first person who welcomed him from the deck was Davies.

"Do you know, sir," he said, "I think we shall checkmate that scoundrel

"It isn't possible," groaned Donald. We have pledged our faith."

"I wonder if there may not be human beings under the sea, sir, who rule those devils. I wonder whether Out of the vapor chugged a motor- that fish-girl Clouts has got in the wit MacBeard."

"Absurd!" said Donald curtly. "But

"Clouts!" called Davies down the engine room tube.

A minute later Clouts appeared, hurriedly pocketing his mouth organ and wiping his lips. "Aye, sir!" he said.

"Captain Paget wants to see youryour friend, Clouts."

Donald entered alone and stood ooking across the messroom toward the phantom shape at the further end.

The queen shrank back against the wall and stared at Donald with her mournful eyes. The face was wavering, half-visible; but the eyes were fixed on his intently, and there was the pathos of a soul struggling for life in them, such as we see in the eyes of suffering beasts.

She came to him and put her arms about him. Her face lay for one instant against his own. And to his amazement, to his horror, Donald seemed to know that Ida was nothing, and that this woman was all.

A soft murmur came from the queen's throat. It rose and fell, and rose again until it seemed to fill the entire submarine with sound. It was the swarming call. It was the call of the queen when she has found her mate and leads forth her army to new land, new conquest, new dominion.

From the east shores and from the Baltic, from the Thames Estuary, the channel and the Seine, the monsters came. They knew that swarming call, though they had only heard it once before, and that cut short.

Sam Clouts burst open the door. Donald was lying upon the floor within, and, standing beside him, was the queen. He heard the call die on her lips.

Shaking with terror, the sailor dragged Donald outside and locked the door. He carried his captain up on deck. In a few moments Donald opened his eyes.

"What happened, Clouts?" he asked. "You fainted, sir. Excuse me, sir, but you oughtn't never to have gone in there. She's a devil, sir, one of them vampires like that we used to hear about when we were children. Mrs.

Donald staggered toward Davies. who was running out of the conning

"You were right, Davies," he said. "We've got him. You heard that call? "Listen, Davies! If I'm not mistaken that call will bring the monsters to us. Let's make for the deepest part of the "If you wish to go, Miss Kennedy, sea, first, so that we won't drive on a must accept the sacrifice," he said, sand bank when the water evaporates.

could disport themselves in there and knots, to eight. The sounds of the it would be easy to block the entrance, gasoline engine were growing fainter.

"Never mind that, Davies. Don't Bring her up!" he shouted. you see that this releases us from our faith toward him? He'll be making for Skjold fjord with Miss Kennedy, and as many of the monsters as he has been able to gather together by means of that tuning-fork sound, which resembles the call we heard about as The point is, MacBeard is not to be undeceived."

Davies looked at Donald strangely. He did not understand his sudden high the Nemesis upon his heels. spirits; he could not yet see, altogether, at what his chief was driving.

"The herd will accompany us, but we'll keep near MacBeard and-why; let him think that it's following him. He mustn't see us till we're within the harbor. Understand? And theu-there are still two torpedoes left, aren't there? Well, then, we'll blow his craft to pieces, and-"

"And save Miss Kennedy somehow first," said Davies.

Already the horizon was black with vapor on the three seaward sides. The shore lay about two miles to port. The anchor was hoisted, and soon the F-55 was making rapid surface headway in the direction of the Belgian coast.

"It's blowing up pretty thick, sir." said Davies, looking out through the "Because the moderation of his port at the dense clouds of murky hydrogen that rolled under the cumulus clouds.

> "Davies!" cried Donald. He snatched his glasses and put them to his eyes. "Look, Davies!" he

> In the distance, a tiny point amid the rolling clouds, they saw the motor-

The submarine began to dip. The water covered her bow, her stern. Donald went to the mirror of the periscope, which, fixed because there was no one to start the motor, afforded him a vision of less than a right angle.

But he saw only the thickening clouds, and presently these blotted everything out. The mirror was black as ink. He turned away. A groan escaped his lips. He clenched his hands and prayed that the plan might not miscarry.

CHAPTER XVII.

The Pursuit.

Within the coming tower Donald boat. Slowly, as the haze subsided, messroom may not have some power could hear distinctly the chugging of the engines of MacBeard's motorboat. Had he risen to the surface both vessels would have been invisible in the hydrogen gloom; but then he might have lost his quarry. Under water he could hear the sound greatly increased in volume, and could better determine its direction.

He surmised correctly that Mac-Beard, having followed the swarm, would attempt to lead it northward by means of his tuning-fork. And the swarm, sensing the presence of the queen, would accompany the F55, while MacBeard believed that he had himself mustered them.

With the tip of her periscope just submerged, Donald steered the F55. Never had he followed so shrewdly upon an enemy's track. Now to port, now to starboard, he followed the sound of the gasoline engines, while Clouts watched them and Davies, in the diving station, sent up an occasional cheery message.

Night fell and passed. Dawn came up, although not a vestige of light could have been seen, even afloat. A sooty column, hydrogen surcharged with atmospheric dust, was passing up the Norwegian coast.

At noon Davies, whose duties had not been constant enough to prevent him from enjoying a short slumber, begged to take Donald's place. But Donald refused.

As he ran the boat his brain hammered out the clear outlines of his plan. He would lead the herd into Skjold fjord, leave Davies in charge, kill MacBeard and rescue Ida. Then he would send her overland southward with Clouts, and remain until a ship could arrive with materials to block the passage.

The high, precipitous cliffs of the fjord would effectively bar in the monsters. For a few days or weeks the world's menace would writhe there like a wounded snake. Then it would pass. Donald had no doubt of his plan.

But he did not dare to dream of Ida: only he set himself resolutely to the pursuit.

So they drove on up the Norwegian

coast all day, and when night fell they were still hard on the chase. Davies called through the engine-

com tube. "There isn't much power in the batteries, sir," he said. "That salt water cut our running reserve in half, and we've been using it pretty freely. The dynamo coll was injured by the sea water."

"Go on, full speed," said Donald. "MacBeard must have been running slowly, sir, to save his gasoline. If he puts on a spurt we're done."

"Drive till the electrics fall, then we'll come up and use the petrol mo-

the Norwegian coast. The whole herd began to fall. She dropped to nine Donald called down the tube.

> "Aye, aye, sir!" Clouts called back, And the F55, climbing out of the water like a sea otter, seemed to shake the drops from her, and continued under the moon.

Far in the distance Donald could see the dense column of fog, as it dismuch as- Well, never mind that, appeared toward the Norwegian shore. That smoky devil MacBeard had wrapped himself in obscurity to his own undoing. He did not dream of

"He's spurting for Skjold fjord," said Davies.

(TO BE CONTINUED.)

Temperamental Mountain Canary Not Blamed for Planting Hoofs in Back

of Her Only Friend.

MULE MISSED HER TOBACCO

Thinking the animal made a mistake in not knowing whom she was kicking or it was his fault because he forgot to give her the usual chew of tobacco, Fred Wales of Grass Valley, Cal., who carried his arm in a sling for some time as the result of a kick from Bessie, excuses his partner of fourteen

years for injuring him. The mule is known to every employee of the mine, 450 in all, and while there is no affection for her among 449 of them, they all have a wholesome respect for her in spite of her contrary disposition. It is a mine classic that she kicks the airpipe two feet above her for exercise.

With Fred Wales, however, it is different. He has worked with Bessie for fourteen years and has become attached to the animal. He excuses her vagaries as an indulgent mother condones the actions of a spoiled child.

It is merely a matter of temperament, he says, and the other men do not understand her. His faith was shaken temporarily, but not for long. In the physician's office he took offense at a suggestion that the mule should be killed on account of her

viciousness and rushed to her defense. "It was perhaps my fault; it certainty was not hers. Bessie either did not know who it was when she kicked or I had forgotten to give her the usual chew of tobacco. I am willing to take all the blame."

Ancient English Tree.

There grows in the beautiful garden of the dowager counties of Derby, in England, an ancient oak tree which is said to be the oldest one in England.

The size of the trunk of this venerable oak testifies to its antiquity, but on a stone seat by its side is more direct evidence. The seat bears a tablet recording that Wilberforce wrote in his diary in 1788 that he well remembered, after a conversation with Pitt. and before descending into the Vale of Keston, sitting at the foot of "an old tree" and resolving to give notice in the house of commons that he would move the abolition of the slave trade.

The tree in question, which was therefore a good age 130 years ago, is carefully preserved with zinc plates where the damp might gather, and the branches are held up with iron bars, but it bears a goodly crop of leaves, and seems good for many years of life.

Being One's Self.

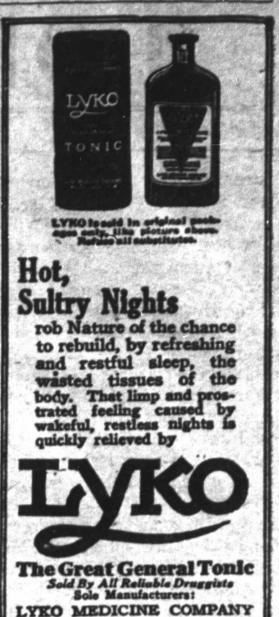

We owe it to mankind to give ourselves as we are to earth's aggregate of attainment and experience. We are indeed to raise ourselves to our Nth power of existence and achievement. but that highest power must still be our own, individually expressed. Even though our best be poorer than some one else's indifferent medium, ic will be a thousand times better for us and for all, that humanity get each underived and incommunicable self rather than that it receive an imperfect and disappointing duplicate of another. And let us remember, also, both for our comfort and our inspiration, that he who gives his utmost is at the last analysis rendering a greater service than he who, though seemingly bestowing much, gives but a fraction of his possible being and doing to his fellow men.-Philip Burroughs Strong.

New Use for Motorcycles.

That new uses for motorcycles are still being discovered is shown by the fact that a Californian with a big lawn to care for drives his mower with the aid of his powered cycle. After several unsuccessful attempts he devised satisfactory means of attaching the grass cutter to the front forks of his machine, and now he asserts that he can trim the lawn in about one-tenth the time formerly required. The only consideration that limits his speed apparently is the fact that the mower must be oiled frequently.-Popular Mechanics Magazine.

Not Out of Date.

Says an old proverb: Some wives can throw more out the back door with a teaspoon than their husbands can bring in with a scoop shovel at the front door.

PLANS OUTLINED FOR MAKING HAY

Three Men and Two Horses Is Most Economical Crew for Gathering Up Crop.

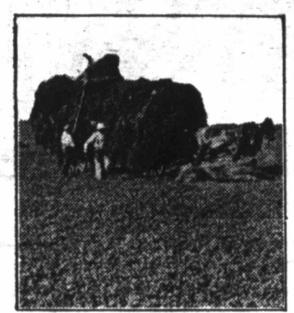

HAULING DONE IN AFTERNOON

Amount That Can Be Handled Under Conditions Given Will Be From 40 to 60 Acres, Much Depending Upon the Yield.

(Prepared by the United States Department of Agriculture.)

On many farms haymaking is carried on in a more or less haphazard manner, resulting in a loss of time, as now and then a part of the crew is idle. With small crews there is usually less loss of time than with larger crews, where some are mowing and raking, loading and hauling, and others working at the barn all of the time.

The smallest economical crew for bringing hay from the field and putting it into the barn is the three-man and two-horse crew. In the East, the common practice is to load the wagon with hand forks and unload it with

Hay Making With a Small Crew.

the horse fork or sling. This arrangement allows two men to pitch on the the wagon and drive the team, When the load is on, all three men go to the barn to unload. At the barn one man works in the mow, one sticks the hay fork on the wagon, and the third man drives the team on the rope. No time is lost, except that lost by the two pitchers in traveling between the barn and the field. In the East the average distance between these points is a quarter of a mile or less.

Custom in East.

On most average-sized farms in the East the general custom is to haulhay in the afternoon only. In the forenoon, one man mows enough hay in about four hours, starting after the dew is almost gone, for half a day's hauling. Three to five acres, yielding 1.5 tons to the acre, is about all the ordinary three-man crew can handle.

The second man rakes every morning, at the beginning of the haying season, the hay that was mowed the day before. In the forenoon the third man does not work at haying at all, but is free to do other farm work, such as plowing corn, etc.

Let us see what the effect will be on the size of the crew if the hay is not cut until well past "full bloom," the stage of maturity at which hay (timothy, for example) must be cut if choice or "tea green" hay is to be se-

Hay cut when past full bloom cures quite rapidly if the weather is favorable, and hay moved in the forenoon likely to increase as one gains experican be put into the barn in the af- ence. Under favorable circumstances ternoon. This arrangement requires it is capable of expansion into a serian extra man and two extra horses to lous vocation.

rake the hay. To facilitate matters. the side-delivery rake should be used, so that loading car be started as soon as the rake has made one round. The fourth man will usually finish raking by three or four o'clock in the afternoon, and can help load during the remainder of the day. However, three men pitching onto one wagon is not ordinarily a very economical arrange

Mowing in the Afternoon.

Now let us suppose that it is decided to do the mowing in the afternoon as well as the raking, and see how this arrangement affects the size of the crew. Such a method requires another additional man or team, making a crew of five men working in the hay field in the afternoon only. There will be one man mowing, one raking the hay mowed the day before, and three men bringing hay from the field and putting it into the barn. Two more horses will also be required with this method, making a total of six, yet this larger crew will handle no more hay per day than the three-man crew above described.

The amount of hay that can be handled under these conditions will be from 40 to 60 acres, depending upon the yield. If the hay loader is used, more hay can be handled per day. The two pitchers work on the wagon building the load, and the third man drives the team.

LESSEN DISEASE OF CABBAGE

Old Stubs Should Be Pulled and Those With Swellings on Roots Carefully Burned.

(Prepared by the United States Depart ment of Agriculture.)

The old stubs of cabbage plants should never be left standing in the field. They should be pulled up at harvest time and all that show swellburned. This precaution will lessen the disease in badly infected fields and will hold it in check in fields where it appears only in spots.

PREVENT DISEASE ON FARMS

Disinfection of Seed, Location and Care of Seed Bed and Crop Rotation Are Important.

(Prepared by the United States Deparament of Agriculture.)

eases on his farm. In order to accomplish this, several precautions should be observed, of which the more important are (1) the disinfection of seed, (2) the location and care of the seed bed, and (3) crop rotation.

******************** HOW FARMERS GET HELP

(Prepared by the United States Department of Agriculture.)

In every agricultural district Mere are farmers who have succeeded in holding their employees in spite of all the attractions offered by other industries. These farmers have usually employed married men and have furnished them with a small but comfortable house. Moreover, the laborers have enjoyed the privilege of raising a small garden and a few pigs and chickens, -Clarence Ousley, Assistant Secretary of Agriculture.

Can Raise Rabbits Anywhere.

While not affording large profits, the business of raising rabbits in a small way may be made interesting as well as reasonably remunerative spare-time work. It is adapted to town and city places as well as to farms, and under careful management the returns are

Dusting for Brown Rot.

Dusting peaches through the season for brown rot and scab is fully as effective and much quicker than spraying. Two applications are necessary in a dry season; three if rainy. The last application should be made about three weeks before picking.

Inoculate Alfaifa Soil.

Soil for inoculating alfalfa or sweet clover should be obtained from fields where either of these crops have been grown successfully; one will do for the other.

Milk for Dairy Calves.

Dairy calves should be fed sweet milk of a uniform temperature. This is essential to their health, which is in full bloom. particularly important in winter.

Basis of Profitable Dairying. High producing cows are the basis

of profitable dairying. The most economical results cannot be obtained with poor producers.

Beans may be used as a succession for the herd bull is the reason for

Effective Fungicide.

Lime-sulphur solution at dormant spray strength is an effective fungicide, and subsequent sprayings with the summer strength of one and onehalf gallons to fifty gallons of water will aid in the control of several destructive fungus diseases.

Soli for Navy Beans.

Ground for navy beans should be plowed and harrowed several times until the soil is pulverized as for a garden.

Harvesting Alfalfa Hay.

Alfalfa hay is harvested and cured in much the same way as clover, except that it should be cut before it is

The surest way to increase food production is to save all the manure and apply it to the fields.

Increase Food Production.

Reason for Weak Calves. Failure to provide suitable exercise crop for grass, spinach, or onion sets. | many weak calves.

GOOD HIGHWAYS SAVED PARIS

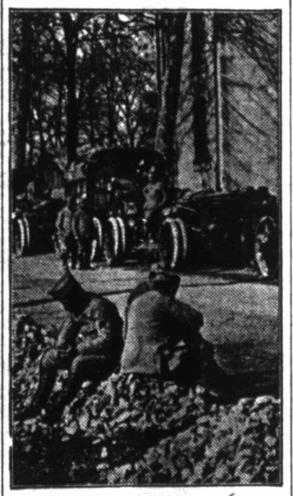

Example of French Capital Cited to Press Home Plan of Improved Roads in This Country.

The congestion of traffic which has so seriously handicapped war preparations and industrial and commercial activity during the last few months has emphasized to all the vital importance of good roads. The shortage of freight cars has caused the government to recommend the use of motortrucks for handling freight on short hauls, in order to save freight-car equipment for long hauls. Freight cannot be successfully handled by motortrucks without good roads.

There is also a growing tendency on the part of manufacturers and wholesalers to have their salesmen travel by automobile instead of by railroad trains, writes C. S. Rieman, president of a large motorcar concern, in Chicago Post. This also further helps to solve the traffic problem. But the extensive use of trucks for cross-country hauling and of passenger automobiles by salesmen and others, instead of traveling by train, will depend to a large extent upon road conditions.

It also occurs to me that since our transportation facilities have been so seriously overtaxed by extra traffic resulting from our war preparations to ings on their roots should be carefully date, the enormous increase in war activities for which preparations are now being made will result in further serious delays, unless a large portion of the traffic can be handled by motortrucks. In order to appreciate the importance of good roads from a military standpoint, we have only to recall the fact that in all probability Paris would have been captured by the German army in their first great drive had it not been that the excellent French roads permitted the quick concentrating of French troops by means of The first aim of the farmer should motortrucks, passenger automobiles be to prevent, if possible, the introduc- and taxicabs, which played so imporload and one man to build the load on tion and distribution of destructive distant a part in helping out the French railroad system.

The prosperity of any country an the advance of civilization are alway measured by the transportation facili-

Cenvoys of Rapid-Fire Cannon on Way to Front In France.

ties. As a manufacturer of motorcars, the good roads problem has been brought very forcibly to my attention, and I have given the subject much thought and study. It is my firm conviction that the continued prosperity of this country and the quick and efficient handling of war preparations cannot be better promoted than by keeping our streets and highways in first-class condition. I believe whatever expenditures are necessary to this end should be made.

NOW CALL ROADS MILITARY

Bill Before Senate Says Government Should Assist in Keeping Highways in Repair.

A bill before the senate says all state roads used by the government should be treated as military highways and the government should assist in keeping them in repair. The bill was introduced by Senator J. T. Smith, who has investigated the deterioration of the Maryland highway system. The bill states the government is not to contribute more than two-thirds of the money for repairs nor more than \$1, 000 per mile. It has gone to the sem ate committee on appropriations.

The quality of mercy may not be trained, but it's a safe bet the price

Cold Drinks Bad for Your Stomach

How to Avoid the Digestive Miseries That Hot Weather Brings

Cold drinks in hot weather are bad enough for any stomach but doubly so, in fact, dangerous—when the stomach is out of fix and you suffer from indi-gestion, acidity, food-repeating, heartburn, sour stomach, and that awful puffed-up, bloated condition after eating. In fact, all stomach and bowel miseries are greatly aggravated in hot weather. You can't be too careful. Sunstroke can be traced in many cases to poor digestion. Everyone should watch their stomach in hot weather. Keep it sweet and cool. Here is an easy and pleasant way to correct stomach ills. A compound has been discovered which surely takes up the harmful juices and gases from the stommach, leaving it sweet, clean, cool and

comfortable. You won't know you

have a stomach if you take one or two

EATONIC tablets after your meal, so light and pain-free you will feel.

There is not a harmful thing in EATONIC tablets. They taste fine! Just like eating candy. Druggists will tell you that EATONIC users say they never dreamed anything could give such quick and wonderful results; you can insure yourself a good, cool, sweet stomach, you can eat what you like,

and always have the appetite to eat it. EATONIC is absolutely guaranteed. Get a box from your druggist today. Use it to get rid of and prevent the stomach and bowel troubles that are bound to come in hot weather. If EATONIC fails, return to your druggist and get your fifty cents back. If you cannot obtain EATONIC where you live drop a card to Eatonic Remedy Co., Chicago, Ill. They will mail you

PRESERVING FRUITS

The government wants all the fruits and vegetables put up that are harvested this year, that is so much of it as is not consumed in its natural state. This is a duty as well as an economy, and one who can and won't is just as truly a slacker as is the man or woman who avoids any other part of the public sacrifice. By canning add otherwise preserving these food stuffs much that is edible can be saved for our and the allied armies. This does not mean, however, that everything must be preserved in sugar. Apples may be dried, as well as many vegetables, so with peaches. True, they are not so delicate and not quite so palatable when thus cared for as they would be if put up in sugar, but who, in these filed against you in the justice court, of precinct number one, in and for Rooseyelt county. New days of sacrifice and helping to win the war would be a stickler for foodstuffs that are aesthetic, fashionable and ultra delicate?

How many of us are today eating

olp timer in this country, but who sold out and went to Texas, was a Portales visitor for a short time this week.

The local draft board has been busy the latter part of the week re-classifying the draftees. It is understood that many changes have been made.

Joe Smith lost two fingers this week roping calves. Mr. Smith is a relative of Ben Smith, cashier of the Security State bank.

The county food administration this week confiscated 350 pounds of flour in the Kermit neighborhood, all being hoarded contrary to the orders of Mr. Hoover.

Clyde Knapp, who has been away on an extended trip in his service car, returned Friday. Clyde says that he had a nice trip and enjoyed it very much.

FOR SALE-One 7-passenger Studebaker automobile' splendid condition, only run about 8000 miles, new battery, see A. D. Ribble, Partales Lumber Company.

Miss Grace Foglesong, formerly teacher of English in the public schools of this place, is here from Idaho Falls, Idaho, visiting her sister, Mrs. Walter Jackson, of west of town.

Dr. J. E. Camp, pharmacist at the Portales Drug store, returned from his month's vacation this week and is again on duty. He visited friends and relatives at Nashville. Tennessee.

The draft ages will be changed so as to include all ages from 18 to 45. It is expected to put five million men in the field during next year. Practically, the whole world is camping on the trail of the kaiser and his goat is due for the block sometime in the year 1919.

The preliminary hearing of A. C., Wantland, charged with assult with intent to kill, was held this week by Judge Henderson. He shot a man by the name of Trotter about one month ago. The bond was placed at \$15,000. Mr. Wantland says that the shooting was done in self defense and the sentiment of the community where it occurred appears to be that he is telling the truth.

B. R. Anderson returned this week from Amarillo, Texas, where he had been for the past month. Mr. Anderson expects his call to the colors some time this month and wants to be at home with his family as much as possible before leaving for the training camps. He says that it is some hard to leave his wife and baby but that if his country needs his services he could never again face his friends if he refused the call.

Jule Stone received his call this week for the navy and is now on his road to active service on the water. Jule has had just enough military service to acquaint him with the fact that discipline is the one big thing in the army. USE LESS WHEAT.

The allied nations have made further increased demands on us -for breadstuffs -- demands that Americans are obligated to meet.

In the meantime America's meat supply has been greatly increased for some months to come by the unprecedented shipping to market of hogs that averaged 232 pounds each instead of 203 pounds—the normal.

The United States Food Administration, endeavoring to adjust the international food balance, promptly removed certain restrictions in this country on the use of meat and at the same time asked for a smaller consumption of breadstuffs.

We are asked to observe only one meatless day each week-Tuesday. We will have larger meat stocks for awhile. But our bread ration must be held to a minimum.

In altering its food conservation program the Food Administration emphasizes that the food situation is of necessity. subject to radical changes, caused by crop conditions at home and abroad and by the precarious transportation problem, both in overseas shipping and in America's overburdened transportation system.

The Food Administration will keep the American people fully and frankly advised of each change in the developing situation that they may know definitely the part their food sacrifices play in the world war.

O MARY GRAHAM BONNER

SWIMMING PARTY.

"Now the Every-Day-Is-Nice club hadn't had any special celebration for a long time," commenced Daddy, "and Peter Gnome thought it was high time

to have one. "You know Peter Gnome started a club which he called the Every-Day-Is-Nice club, for all the members promised to enjoy every day, never grumbling about the weather, which of course they couldn't control!

"And it was surprising how every day seemed nice to them after this club had been well started.

But they hadn't had a regular celebration for a long, long time. "'How about a party for the Every-

Day-Is-Nice club this afternoon?' asked Peter Gnome. "He was talking to Billie Brownie.

They hadn't seen each other in a long time, so as usual, they hugged each other so hard that each fell down. "What sort of a party would you

suggest, Peter Gnome?' asked Billie

"Well, as it's hot, mighty hot, and as the water is cool, mighty cool, I think a swimming party would be as nice as any.'

"'Fine!' shouted all the brownies and gnomes.

"'Shall we call together all the other members of the club?' asked Bennie Brownie.

"'By all means,' said Billie.

"Til get Mr. Giant to call out to them with his great and powerful bugle.'

"So Bennie Brownie went off to Mr. Giant's cave. Mr. Giant was sitting by the door of his cave, fanning himself with a branch of a pine tree.

"'Hot day,' he said.

"'Yes, it's a hot day,' agreed Bennie

"'It's nice, though,' said Mr. Giant. "I enjoy a hot day when I have the cooling breezes of my beautiful pine fan. The fairy queen gave me that

And Dive Off Into the Water.

fan last Christmas. She said to me that I wouldn't be able to use it in the winter, of course, but that it would be most useful to have when the summer came, and as it was often a good plan to think ahead and have things ready in plenty of time, she would give it to me along with the new winter mittens she gave me.'

"It's a wonderful fan,' said Bennie Brownie.

" Til fan you a little,' said Mr. Glant. "But as soon as he started to fan Bennie Brownie, poor Bennie Brownie fell over, for to him it was like a great blast of wind. He was so much smaller than Mr. Giant!

"Tm so sorry,' said Mr. Giant. I beg your pardon. I do indeed.' "'No harm done,' said Bennie

Brownie, laughing, while Mr. Giant put his fan away inside his cave. "'Tve come,' Bennie Brownie con-

tinued, to invite you to the swimming party of the Every-Day-Is-Nice club. And will you call on your powerful bugle and ask all the other members? It's to be this afternoon at the lake. " Good, said Mr. Glant, Tve got a handsome new bathing suit, too!"

"Mr. Giant called on the bugle: 'Come to the swimming party, come all, come all. Peter Gnome, president of the club, is giving a swimming party. Come to the lake.

"And how they all did come! They wasted no time, and many of them were there almost before they received the end of their invitations!

"Such splashing and water fights as they had! Such swimming and diving races, such boat races where they all upset! Such water ball games and tilting of canoes, and all the wonderful water sports as they all did have!

"And Mr. Giant, who could stand up in the water which was well above everyone else, let them all climb up on his shoulders and dive into the water.

"Witty Witch made one of the best dives of all, for she did a backward dive which was quite perfect, but how they all did laugh when they saw it, for she surprised them all. They had thought she was going to dive forward, but not a bit of it-she made the finest backward dive that was ever made. And they all felt cool and happy after the gay swimming party !"

GIRLS! USE LEMONS

FOR SUNBURN, TAN

Try It! Make this lemon lotion to whiten your tanned or freckled skin.

Squeeze the juice of two lemons into a bottle containing three ounces of Orchard White, shake well, and you have a quarter pint of the best freckle, sunburn and tan lotion, and complexion whitener, at very, very small cost.

Your grocer has the lemons and any drug store or toilet counter will supply three ounces of Orchard White for a few cents. Massage this sweetly fragrant lotion into the face, neck, arms and hands and see how quickly the freckles, sunburn, windburn and tan disappear and how clear, soft and white the skin becomes. Yes! It is harmless.—Adv.

Are the Packers Profiteers?

Plain Facts About the Meat Business

The Federal Trade Commission in its recent report on war profits, stated that the five large meat packers have been profiteering and that they have a monopoly of the market.

These conclusions, if fair and just, are matters of serious concern not only to those engaged in the meat packing business but to every other citizen of our country.

The figures given on profits are misleading and the statement that the packers have a monopoly is unsupported by the facts.

The packers mentioned in the report stand ready to prove their profits reasonable and necessary.

The meat business is one of the largest American industries. Any citizen who would familiarize himself with its details must be prepared for large totals.

The report states that the aggregate profits of four large packets were \$140,000,000 for the three war years.

This sum is compared with \$19,000,000 as the average annual profit for the three years before the war, making it appear that the war profit was \$121,000,000 greater than the pre-war profit.

This compares a three-year profit with a one-year profit—a manifestly unfair method of comparison. It is not only misleading, but the Federal Trade Commission apparently has made a :aistake in the figures themselves.

The aggregate three-year profits of \$140,000,000 was carned on sales of over four and a half billion dollars. It means about hee cents on each dollar of sales or a mere fraction of a cent per pound of product.

Packers' profits are a negligible factor in prices of live stock and meats. No other large business is conducted upon such small margins of profit.

Furthermore and this is very important only a small portion of this profit has been paid in dividends. The balance has been put back into the businesses. It had to be, as you realize when you consider the problems the packers have had to solve and solve quickly—during these war years.

To conduct this business in war times, with higher costs and the necessity of paying two or three times the former prices for live stock, has required the use of two or three times the ordinary amount of working capital. The addi-

condometal out too handy to a

tional profit makes only a fair return on this, and as has been stated, the larger portion of the profits earned has been used to finance huge stocks of goods and to provide additions and improvements made necessary by the enormous demands of our army and navy and the allies.

If you are a business man you will appreciate the significance of these facts. If you are unacquairted with business, talk this matter over with some business acquaintance-with your banker, say-and ask him to compare profits of the packing industry with those of any other large industry at the present time.

No evidence is offered by the Federal Trade Commission in support of the statement that the large packers have a monopoly. The Commission's own report shows the large number and importance of other packers.

The packers mentioned in the statement stand ready to prove to any fair-minded person that they are in keen competition with each other, and that they have no power to manipulate prices.

If this were not true they would not dare to make this positive statement.

Furthermore, government figures show that the five large packers mentioned in the report account for only about one-third of the meat business of the country.

They wish it were possible to interest you in the details of their business. Of how, for instance, they can sell dressed beef for less than the cost of the live animal, owing to utilization of by-products, and of the wonderful story of the methods of distribution throughout this broad land, as well as in other countries.

The five packers mentioned feel justified in co-operating with each other to the extent of together presenting this public statement.

They have been able to do a big jeb for your government in its time of need; they have met all war time demands promptly and completely and they are willing to trust their case to the fairmindedness of the American people with the facts before them.

BREEDING POULTRY IN YARDS

More Difficult Than Keeping Small Flock of Hens for Eggs for Family Table.

Prepared by the United States Department of Agriculture.)

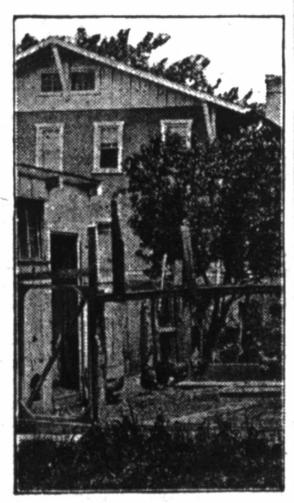

The average city family will, percaps, do best by keeping hens for eggs ilone, but a considerable degree of success can be attained in breeding poultry in back yards and in many instances it may be desirable.

up ss, ie, ur d-

By breeding poultry is meant mating a male and one or more females to reproduce the parent type; hatching the young, and so rearing them that they will attain the full development of good typical specimens of their race. In a small way this can be done in quite a limited space. It is more difficult than keeping a small flock of hens for eggs for the table, or growing a few chickens for the table in the same space, but with regular attention and good care very satisfactory results are obtained.

The smallest breeding pen for work ing should have a male and two fethus making it possible to set all eggs while the germs are strong. If a small flock is kept also for eggs for the table, hens from that flock may be used to hatch and brood the chickens. If the laying hens lay eggs of a different color from those laid by the breeding hens, all may be kept together. The layers may not produce as many eggs while fed as breeders should be, but there is a saving in space and work, and the net result may be as good as if more eggs were

Rations for breeding stock differ from laying rations in that much smaller proportions of commercial animal foods are used, and special atten-

Poultry Raising Under Such Conditions While Profitable, Requires More Attention Than Where Greater Space is Available.

tion is given to supplying green feed regularly and abundantly. Heavy egg production is not desired. The object is to have the birds in perfect physical condition and at the height of vitality, that they may more surely transmit these qualities to their off-

The greatest difficulty in back-yard breeding is rearing the young birds to secure their best development. As growing birds are more susceptible to adverse conditions than mature birds, and birds in close confinement are less rugged than those at liberty, the backyard breeder must give the most scrupulous attention to every detail of the care of his young chickens. Shortcomings which might have no bad consequences with the adult birds, or with young chickens under more favorable conditions, may have very serious Ill effects upon his young stock. .

MAKING BEST USE OF GRAIN

AP Old Hens and Poorly Developed Chickens Should Be Culled Out and Sold for Meat.

(Prepared by the United States Department of Agriculture.)

If efforts were made to dispose of ill hens when their best laying days were over a large quantity of poultry meat would be placed on the market. All poorly developed chickens should be culled out and sold for meat, also. This would allow the poultry Reeper to make the best use of his grain by feeding it to younger and more prosactive fowls.

A CROSS, FEVERISH CHILD IS BILIOUS

LOOK, MOTHER! SEE IF TONGUE IS COATED, BREATH HOT OR STOMACH SOUR.

"CALIFORNIA SYRUP OF FIGS" CAN'T HARM TENDER STOM-

every mother realizes, after giving on this scale and with only one mat- her children "California Syrup of Figs," that this is their ideal laxative, males. With two hens, the pen will because they love its pleasant taste provide eggs for hatching at the rate and it thoroughly cleanses the tender Aq mojjoq eqj oj jues ueeq seq 'suil of a sitting every week or ten days, little stomach, liver and bowels without griping.

When cross, irritable, feverish, or breath is bad, stomach sour, look at the tongue, Mother! If coated, give a teaspoonful of this harmless "fruit laxative," and in a few hours all the foul, constipated waste, sour bile and undigested food passes out of the bowels, and you have a well, playful child again. When the little system is full of cold, throat sore, has stomach-ache, diarrhea, indigestion, colic-remember, a good "inside cleansing" should always be the first treatment given.

Millions of mothers keep "California Syrup of Figs" handy; they know a teaspoonful today saves a sick child to-morrow. Ask your druggist for a bottle of "California Syrup of Figs," which has directions for babies, children of all ages and grown-ups printed on the bottle. Beware of counterfeits sold here, so don't be fooled. Get the Syrup Company."-Adv.

Hay in Explosives.

The statement has been made by a representative of the United States government that 5,000,000 tons of coarse and grassy hay will be required this year in the production of a filler in the manufacture of high explosives. This hay is thoroughly macerated and 20 per cent of the bulk of the explosive is said to be made of the resultant fiber, replacing the cotton formerly

Why We Fight

Because Germany for Years Sought to Undermine Our Government and Our Ideals

By CLARENCE L. SPEED Secretary of the War Committee of the Union League Club of Chicago.

We are fighting Germany for the ight to live our own lives as we see fit. We are fighting for our laws, our ideals, our homes, our institutions.

"But, how," one may ask, "were all these things threatened by Germany before the war started? It is easy to see how they may be threatened now, for if we are defeated we are lost, but before the war started did Germany menace those things we hold most sa-

Let the Germans themselves answer. After you have read the evidence out of their own mouths, you may decide whether or not Germany planned to upset our institutions, our ideals, our very mode of life.

In 1901 the National German-American alliance was formed in the United States. In 1907 it was incorporated by act of congress. Its charter is now being attacked in that same body. One of the objects of the alliance, as officially announced, was "to check nativistic encroachments." In other words, to keep the Germans from becoming Americans. Another object was "to awaken and strengthen the sense of unity among the people of German origin in America."

"This alliance," its preliminary statement of aims concludes, "is pledged to bring its entire organization to the support of any state federation which is engaged in the struggle for any of these objects."

It was pledged, in other words, to have its members vote, not as individuals, but as German controlled units, for or against anthing of which they did not approve.

The desire for resisting "nativistic encroachments," was particularly abhorrent to American ideals, because the effort in this country has always been to keep politics free from racial or religious influences. Yet here was a body, proclaiming itself German in origin and thought, seeking to perpetuate this German feeling in the midst

From its very start the alliance sought to foment discord with England. It always spoke of the American press as "the Anglo-American" press, and it carried out a long and well-directed campaign for the introduction of the German language into the schools and its use in civil life.

"The National Alliance," according to an issue of its official Bulletin before this nation entered the war, "is waging war against Anglo-Saxonism, against the fanatical enemies of personal liberty and pelitical freedom, it is combating narrow-minded, benighted know-nothingism, the influence of the British, and the enslaving Puritanism, which had its birth in England."

"The race war which we will be compelled to go through with on American soil will be our world war." said

the New York Staats Zeitung in nghting a proposal to amend the New York requisite for suffrage.

Ludwig Fulda wrote a book, "American Impressions." They were imled this nation with a view to seeing to be effective. it ultimately Germanized. "German-" ization is synonymous with causing to speak German," he said, "and speaking German means to remain German."

Wherever there were signs of discontent, of a movement which might tend to disrupt this country, or any other which Germany might find as a commercial rival, the German-American alliance was sure to be on the job. It gave support to the Irish-American societies, because these societies, before the war, were working for the separation of Ireland from England, a matter in which Germany, at that time, could have no legitimate interest. But Germany, even then, was preparing for war, and was doing every possible thing to weaken its coming enemies. A disorganized America, one filled with German reservists, would be in no position to side with her enemies, Germany figured. On this subject the much-quoted Bernhardi wrote:

"Measures must be taken at least to the extent of providing that the German element is not split up in the world, but remains united in compact blocks, and thus forms, even in foreign countries, political centers of gravity in our favor. The isolated groups of Germans abroad greatly benefit our trade, since by preference they obtain goods from Germany; but they may also be useful to us politically, as we discover in America. The German-Americans have formed a political alliance with the Irish; and, thus, united, constitute a power in the state with which the American government must reckon."

With the outbreak of the war in Europe the actions of the German-American alliance became bolder. The campaign for membership took on new vigor.

Can we talk of peace with a Germany, that, even in times of peace, is trying to disorganize our country, foment strife, and destroy our unity, simply because a strong, united nation on the other side of the world is not country that fills our land with paid emissaries in an effort to make its language supplant our own? Can we talk of peace while a government that considers the world its prey dominates Germany?

Why We Fight

Because Germany Menaces the Freedom of the World and Russia Can no Longer Resist

By CLARENCE L. SPEED etary of the War Committee of the Union League Club of Chicago.

We are in this war with Germany because it is a war for freedom more truly than ever before was a war fought for the liberty of man. In times past, it is true, men have fought for freedom from oppressors. Sometimes they have won and sometimes they have lost. But always there has been a place in this big world where those who had lost in the strugle at home might go and find a country where they might enjoy the liberty they

Now all is different. If the forces thich are fighting for freedom in this war are defeated, there will be no place in the whole world to which they may go to find a refuge from Prussian domination. Every land under the sun will be directly or indirectly under control of the victor; and if the victor is autocracy, freedom per-

The land where freedom is most imminently menaced by the legions of Prussian autocracy, at this moment, is the land where unwonted freedom temporarily has run riot and has lost the power to fight for itself-Russia. We are fighting for the freedom of Russia, and must continue to fight for it until Russia learns what freedom means, and is again able to fight. If we do not, freedom will die in Russia; Prussian autocracy will rule and exploit the country for its own benefit; and the very forces which overthrew the czar will be turned against the freedom not only of themselves, but of other lands.

In years gone by, when the forces of revolution were showing themselves here and there in Russia, they had the sympathy of America in spite of the methods of terrosism of which we did not approve. When the czar and the kaiser, leaders of autocracy, were locked in a death grapple, Russia still had our sympathy, because she was fighting on the side of those who were seeking to safeguard the world from Prussian militarism.

When the czar was deposed over night American feelings were mixed. constitution to make ability to speak There was joy at the downfall of an and write the English language a old, and sometimes cruel autocracy, but there was fear that Russia would become too disorganized to fight further, coupled with the thought that perpressions of a German who had stud- haps the revolution had come too soon

> Then followed the brief regime of Kerensky, when it began to look as though freedom in Russia might be an organized freedom, prepared to fight for its rights, and all America hailed the Russian revolution as a blessing. It had become absolutely correct to say that the war was a war of democracy against autocracy. No pro-German could longer point to the czar, whenever an argument arose.

Finally came the bolsheviki revolution, in which Kerensky was overthrown. Russian industry and Russian society were disorganized, and Russian armies ceased to fight. The kaiser's armies pressed on unopposed, took what they desired in spite of a signed peace, and Russia appeared to be about to pass completely under control of Germany. America stood aghast at the prank freedom had played, and American opinion turned largely against Russia, but thinking men refused to give up hope. Russia was and still is incapable of offering resistance, but Russia is not resigned to autocracy. It devolves upon others to fight for the freedom Russia must have.

The experience of other nations has been that men who loved freedom were willing to fight for it, and to die for it if necessary. The Russian attitude of nonresistance was something new in the world, and is hard to understand. The bolsheviki represented the extreme idea of liberty. To them freedom meant not the right of the majority to choose their form of government, but the right of the individual to be free from all forms of governmental restraint. They would tear down the old order completely, at one stroke, and set up the millenium. They would divide the land, the factories and the tools among the workers, and have no masters hence-

Even in Russia, however, there were dissenters. Some took up arms; and the bolsheviki, who fought the Germans not at all, fought their brothers most feroclously. The result was anarchy, lawlessness, massacre, the disorganization of the railways and the failure of the food supply. The millenium refused to come at the mere decree of the bolsheviki. It was shown that there must be organization and government of some sort.

Russia will not longer fight side by side with her former allies. So insiduous has been the German propaganda that, in many instances, Russian hatred of the allies seems to be deeper than hatred of Germany.

Therefore the United States cannot render direct aid to the struggling people of Russia. She cannot send them armies and supplies, for they have refused to do battle for themselves. To 1ght for Russia she must fight on the western front. She must do her share toward humbling the kaiser, and forcing him to relinquish his grasp on the

That is why we cannot talk peace with Germany as long as the kaiser has one single Russian province under-his heel.
