### Christmas Packages for Boys Overseas

The American Red Cross has undertaken the task of supplying a Christmas package to each boy in the American Expeditionary Forces in Europe, who has neither relatives nor friends able to send him a Christmas parcel, or to whom, for any reason, the individual soldier does not desire to forward the Christmas parcel coupon furnished him. This will necessitate the American Red Cross furnishing a tremendous number of Christmas parcels. The procedure in handling these will be as follows:

"Such boys in the overseas service as have no parents or relatives to whom to send the coupon, or parent, relative or friend to whom he desires to send his coupon, may mail the coupon label to the American Red Cross in Washington or may deliver the coupon label to the American Red Cross Field Representative with the unit to which he is atttached. If the coupon label is turned over to the American Red Cross representative it will be forwarded through Red Cross channels to the Red Cross headquarters in Washington and thence forwarded to some division headquarters in the United States, where a package will be provided."

division will receive several chapters located near posts, canthousand of these coupons bear- tonments, etc., are arranging for ing the names and addresses of Christmas celebrations at these ment, goes into effect. not receive Christmas parcels ex- has made no plans for providing attending to business matters Cross. their own relatives or friends, building programs. Commission- cal examinations but after a confrom whom they receive direct a Christmas parcel coupon label.

The preparation of these packages will not be a proper charge against Red Cross funds, nor should there be any special campaign for funds for this purpose. In other words, only such parcels as individuals are willing to prepare and donate will be available for this purpose.

Numberless people have applied to headquarters and to chapters asking if they could not fill cartons for boys without relatives or friends, and we are confident that the mere statement that there are boys who have no one to send them a present will produce many who are able and eager to help.

No coupons will be sent directly to branches nor will any offers of parcels directly from branches be considered, as all coupons must go to the chapters from divisional headquarters, in response to definite orders received by division headquarters from the chapter headquarters only. The final date for mailing these parcels is November 20th. Immediate action therefore is necessaoy if this plan is to be puc

## HOT BROTH FOR "BUDDIE"

Hot broth is always welcomed by our men "over there," but when it is served by a "regular American woman" it is doubly welcome. Photo above was taken at a French field hospital "somewhere in France," and shows two Y. M. C. A. canteen girls serving the convalescents. "Something to warm you up a bit, buddle," heard at the outer edge of a tent is sure to bring instant response from the inside of the tent. The American Red Cross nurses, Salvation Army lassies and Y. M. C. A. canteen girls hold themselves in readiness for any and every kind of service. "Buddie" is glad to see them, whatever their mission, for, being Americans, it is good just to feast one's eyes on

## N. M. Women Sell \$1,625,350 for Liberty

Liberty bonds to the amount of \$1,625,650 were reported sold by the women of New Mexico in a partial statement to Mrs. Howard General Crowder. The men will Huey, state chairman of the women's committee of the Fourth Liberty Loan.

## Notice

Co. B Home Guards will meet

By order JOE BEASLEY, Capt.

This is simply an overflow crowd at a concert given at a Y. M. C. A. building in Camp MacArthur, Waco, Texas. There is plenty of standing room—outside the building. Apparently good singers and entertainers do not need to fear a slim crowd at their performances before the soldiers. Some of the best musical, dramatic and athletic talent of the country is at the disposal of the army Y. M. C. A. for the benefit of the soldiers. Entertainers who volunteer their services are "booked" by the "Y" secretaries for "circuits" throughout the different camps and several buildings of each. A week's program of an average "Y" building in camp provides at least one of these entertainments, as well as moving pictures, boxing and wrestling contests, an illustrated lecture on a topic of interest to soldiers, and a midweek religious service.

### Andrew Miller Writes Camp Funsten, Oct. 21, 1918 Dear Mother:

I received your dear and ever welcome letter today. I was surprised to hear that F. C. was going "across." I thought that he would winter in this country and go across in the spring. Well I would sure like to go with him. Just think of the experiences that he will have. I look at it this way, Mother. What a nice trip if he comes back O. K., which we all hope and pray that he will. And if he don't, how could a boy die better than fighting for "Old Glory," the dear old flag that never knew defeat-and here's hoping that she never will. And another thing, the chances are sure good, now, that boys will come back all together for it can not last much longer. Germany knows now that she has been defeated and it is only a matter of coming to terms. I am glad that Frank is going to get to go over. If they would give me my choice I would go in a minute.

I noticed in today's casualty list a boy that came into the service with me. I met him in Socorro. He is the first one of the boys that I knew, so you see if I had passed the examination 1 would have been in the front line trenches by now. But you need not worry about Frank, for I don't think that he will ever be on the firing line. You know for two or three months after they go over there, and by that time the Huns will lay down.

Mother, I am going to write to Frank and if I hear from him again I am going to send him a 'ten spot' and if I don't hear from him I will send it to you. I will also drop Emmett a few lines. I was sorry to hear that he had the influ. Well, the influ is much better here. They have moved out of the Y. M. C. A. auditorium and all the emergency hospitals here in Funston. But if it isn't one thing it's another. They have extended the quarantine for another 60 days on account of spinal menigitis. It has not got started here yet, but they have it at Junction City and they will not allow a soldier or officer in J. C. unless he has a pass signed by Maj. General Wood. I do hope that S. Men. does not get started here this winter. It is much worse than the influ. They say a person never gets entirely well of it. You know that they had lots of it here last winter.

Well, Mother, I will close as I want to write to Frank and E. Answer soon.

Your loving son,

ANDY. Andrew J. Miller. Q. M. C. Bldg. 629. Camp Funston, Kans.

Last week Carl Moss bought the produce business of J. A. Saylor. This is the oldest business of this kind in Portales, having been established here by Mr. Saylor some eight or ten years ago. For several years past this has been a prospering business. and it has made Mr. Saylor wellto-do and no doubt Mr. Moss will do well as he is experienced in that line of business, having been the former owner's main help during rush seasons.

LAZY PIGS.

"Ha, ha," grunted Mr. Lazy Pig. "Ha, ha," squealed Mrs. Lazy Pig. "Ha, ha, ha," squeaked the little

Now the pigs belonged to a farmer who had thought they would be fine for eating later on. He had bought Mr. and Mrs. Pig and the little pigs had arrived at the pig-pen some litly quite loved them. It is not always the case that a mother pig will love

"Why did we ever get the name of the Lazy Pig family?" asked Lawrence Lazy Pig.

"A very good reason, ha, ha," laughed Mr. Lazy Pig.

"A most excellent reason, ha, ha," squealed Mrs. Lazy Pig. delightedly. "But we'd like to know what the rea son may be," asked Letty Lazy Pig.

"Shall we tell the children?" asked Mr. Lazy Ptg. "Whatever you say," answered Mrs.

Lazy Pig. "We wouldn't, of course, want them

"What's that?" asked Lawrence Lazy

"He can't be disrespectful if he doesn't know what it means," said Mrs.

"Oh yes, he can," said Mr. Lazy Pig. "He knows the way to be disrespectful even if he doesn't know the meaning of the word. It's too large a word for him-that's all."

"That's so," agreed Mrs. Lazy Pig. rence Lazy Pig once more.

"It means rude, rude to your elders," said Mr. Lazy Pig.

"And if I knew why we were called the Lazy Pigs would I be more apt to be rude than if I didn't know?" he asked.

"Would that be the case?" asked Letty Lazy Pig.

"I'm not sure," said Mr. Lazy Pig. "You might as well tell the children," Mrs. Lazy Pig said.

But Mrs. Lazy Pig shook her snoot which meant that she wasn't always

Better Than Calomel For Liver Calomel sickens! If bilious, constipated and headachy read my guarantee.

Tonight! Take Dodson's Liver Tone!

constipated. Don't lose a day's work!

Calomel is mercury or quicksilver which causes necrosis of the bones. Calomel, when it comes into contact with sour bile, crashes into it, breaking it up. This is when you feel that awful nausea and cramping. If you are sluggish and "all knocked out," if your liver is torpid and bowels constipated or you have headache, dizziness, coated tongue, if breath is bad or stomach sour, just take a spoonful of harmless Dodson's Liver Tone.

Here's my guarantee—Go to any drug store and get a bottle of Dodson's Liver Tone for a few cents. Take a spoonful tonight, and if it doesn't |-Adv.

Listen to me! Take no more sicken- straighten you right up and make you ing, salivating calomel when bilious or feel fine and vigorous by morning, I want you to go back to the store and get your money. Dodson's Liver Tone is destroying the sale of calomel because it is real liver medicine; entirely vegetable, therefore it can not salivate or make you sick.

I guarantee that one spoonful of Dodson's Liver Tone will put your sluggish liver to work and clean your bowels of that sour bile and constipated waste which is clogging your system and making you feel miserable. guarantee that a bottle of Dodson's Liver Tone will keep your entire family feeling fine for months. Give it to your children. It is harmless; doesn't gripe and they like its pleasant taste.

Would Have Huns Warned. A negro in a precinct of the Fifth vard added a little humor to the stern feelings of those who were filling out heli cards.

"My name's Elisha Smith," he said o the registrar.

"Any middle name?" the officer

"Yes, N.," replied the negro.

But he didn't know that the "N"

stood for, so he said: "Make it 'Nick.' When I was little

my mother used to call me Nick because I was so mean and always had blood in my eye. You can send a message to those Hun devils that Nick "What does it mean?" asked Law- is coming after their scalps."-Kansas City Star.

### His Last Name.

The teacher was questioning the class in history. "Who is the king of England, Mildred?" she asked.

"George is his first name," came the answer. "His last name isn't in the book, but it begins with a V."—Passing Show.

man with a conscience rarely gets "You're always spoiling them," said lonely. He's always got something to argue with.

Both to Get What They Wanted. "I thought you said when we began this case in court," said the lawyer, "that it wasn't the money you were after, but the principle of the thing."

"I did say that, but what of it?" "Do you still feel that way about

"Of course I do." "Well, in that event, since we have just won a splendid victory, I'll keep the money the jury awarded you, and you may have the verdict."

### His Interpretation.

They were discussing the many interpretations of the mystic "P. F. 9-20." Each had had his fling except the meek little man.

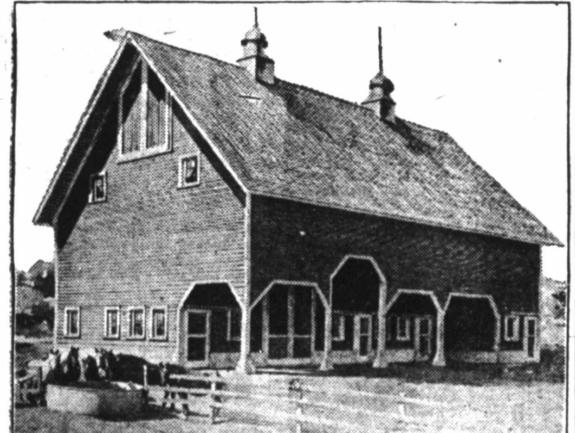

"I thought it was a kinda slogan the profiteers had got up against us poor public, meaning 'Poor Fish.'"

"Well, but where does the '9-20' come in?" asked the guy with the furrowed brow.

"Why that means if sumpin's worth 9 cents we gotta pay 20."

The man who handles the truth recklessly is sure of a large crop when it comes to raising doubts.

Some foolish people play with fire | Salt water is a better fire extinfust to see whether it will burn them. guisher than fresh.

ers that use during these seasons as | rack for stormy days, and a few many as ten horses say that a good stanchions in a separate stable for barn for them is the best kind of the cows and calves, where he could sconomy. It keeps the horses in fine feed them differently. The arrangecondition and makes it easy to regu-ment as shown fitted into his stocklate their feed and take care of them raising plans so he could kes; the so that they can work ten hours a day if necessary.

By building a special barn it is possible to provide the various convenlences such as feeding devices, manure carriers, etc., that help in making the handling and conditioning of the animals very easy work.

The stable should be large enough to hold the horses that are needed during the busy season. Concrete is not a satisfactory material as a general rule for the stalls of horse stables as shod horses are apt to slip and perhaps injure themselves. It is very demirable to provide a material that can be washed down in the same way as concrete and yet provides a surface that is resilient and that will not become slippery.

## Two Good Flooring Materials.

There are two materials that have been used for this purpose with conaiderable success. One is the cork brick and the other is the treated wood block. The wood block is in various forms and is treated with many different substances of which the most common is creosote.

Cork brick is made of granulated cork which is mixed with refined asphalt and then pressed under heavy er back into the far end of the mow pressure into a brick. The brick is to be kept bright and clean for winvery resilient and never becomes slip- ter feed and bedding.

breeding stock separate and feed accordingly.

The stable part is built with a solid concrete foundation wall and floor. and both the horse and cow stalls are arranged and built according to the best farm building practice.

Stables Well Lighted.

It will be noticed that there are a good many windows placed to light the stables from every direction. Light in a modern stable is one of the most noticeable improvements. Old-fashioned dark, dingy stables were dirty and loaded down with foul air. Pure bred valuable farm animals have caused the change.

Building barns to stable animals worth from \$100 up is a different proposition from the old buildings that were considered good enough to stable animals worth from \$50 down.

The high opening through the shed is the entrance to the barn. This arrangement gives a convenient thrashing floor for oats when the crops are heavy and overflow the other barns. Hay settles considerably in a big mow like this before oats harvest, and the space may be used to advantage in such emergencies.

The oats straw is blown by the stack-

We Stay Thin and Still We Eat.

spoiling them at all. "I make them grab for their own food, and I always try to grab first," she said. "No, I'm a regular pig, and so I don't spoil

"Very well, 1 will tell them," said Mr. Lazy Pig. So Mrs. Lazy Pig, Lawrence Lazy

Pig, Letty Lazy Pig, and four other Lazy Pig children listened while Mr. Lazy Pig told his story.

"We had the usual family name of pigs," he said, "until a short time ago. "We were fed and fed-ah, such goodies as we had, and nothing seemed to make us fat. That was the great joke over which your mother, Mrs. Lazy Pig, and I were laughing about when you asked the meaning of the

family name. "The farmer couldn't understand why we didn't grow fat, for he was fattening us up so we would sell for good big sums of money and make him rich.

"But we didn't grow fat! No, we didn't! That's a joke, eh? And why didn't we grow fat? We don't knowor if we do-we won't tell, for that is our secret. And the farmer most certainly doesn't know what keeps us from growing fat.

"If he did know he would give us whatever would make us fat, yes, he would! But we stay thin and still we eat and eat and eat.

"Ah, what good meals we have, for the farmer still hopes we will grow fat, but we won't for we are the Lazz

"Ah, it's our great secret, to eat s lot and stay thin, and you all seem to understand the secret too, and we'll all fool the farmer!"

"Instead of being disrespectful or rude to you, Daddy," said Lawrence Lazy Pig. "we think you are very clev

## Helping the Meat and Milk Supply

(Special Information Service, United States Department of Agriculture.) PROTECT HOGS THIS WINTER

An A-Type Movable Hog House. One or More of These Colony Houses Can Be Put to Profitable Use on Nearly Every Hog-Producing Farm.

# **DURING WINTER**

Making Pigs Comfortable in Cold Weather.

## HOG RAISING IS PROFITABLE

Little Pig to Thrive Must Be Kept Dry, Warm, Away From Drafts and Provided With Fresh Air -Sunshine Also Needed.

The corn belt hogs furnish one of the most important means of marketing the corn crop. With the exception of chickens, they are the most numerous of all farm animals, and are grown for market on more farms than any other stock. Hog raising has probably made more clear money for the cornbelt farmers than any other enterprise. In view of this one might expect to find hogs the best housed of any animals on the farm, but the opposite is the case. It is still hard for many farmers to get rid of the notion that anything is good enough for a hog. Yet there is no animal on the farm which requires better protection from cold than the hog; none for which a good bed is more necessary, and none so much in need of sunshine as the little pig. The horse and the cow have good coats of hair-even a calf or a colt when left in the cold is provided with a good fur coat; the hen's feathers are the best of protection against cold; but the hog has almost nothing between his skin and the weather.

One of the first requisites for success with hogs is a shelter where young pigs can be kept warm and well supplied with sunshine and fresh air. recovers slowly if at all. To prevent taking cold he must be kept dry, warm,

Most good hog raisers who have warm buildings try to have their sows commence farrowing about March ). but without good bouses this is impracticable. Breeders find it necessary to have their pigs come about this time in order to have them large enough market hogs find the practice profitable. Early pigs have several marked advantages. Without a good house two litters a year cannot be raised to advantage, because the spring pigs must be put off until so late that the fall litters do not get well started before cold weather, but with a good house two litters can well be raised. Most farmers do not feel that they can keep litters it becomes a different proposition. It is universally conceded that old sows raise better pigs than young ables one to select and keep only the best producers.

Types of Large Houses. The variety of hog houses is almost as great as the variety of individuals front of the house is in two sections, using them. It is rare, indeed, to find even a semblance of uniformity prevailing in a community. There are, however, only two or three general types which commend themselves to the top, and when raised serves as a the careful hog man. Of the two styles | shed. The A-type house usually has of large houses, the larger has two a floor space of eight feet by six feet, rows of pens, an alley through the and the boards used for the side walls middle, and a jog in the roof for windows to light the north pens, while the smaller has but one row of pens, house may be removed to admit sunwith an alley and a row of windows on light and air. Both of these types of the south side. The double house is houses are built on runners, so that much cheaper per pen, and for that they can be moved about easily.

reason is to be preferred. Less work is also required to care for the hogs than where a single row of pens is

Probably the cheapest house possible is a low building with a single row of pens and no alley, but such a house is much less convenient, especially in stormy weather.

In the majority of large hog houses the upper windows are not so placed that sunshine will strike the floor when it is most needed there. Indeed, a hog house with the windows in the proper position is rarely seen. Direct sunshine should strike the floor in every pen for as many hours in day as possible at the time when the pigs are farrowed. Nearly everyone realizes this is a matter of the greatest importance, but too often the builder does not take the trouble to find out whether he is getting it or not. Ordinarily the farmer has no means of ascertaining where to put the windows so as to get the maximum amount of sunshine at the time he wants it unless he happens to be building just at that time, which is very unusual. The country is dotted with hog houses in which the owner thought he was putting the windows where he wanted them, but found later they were in the wrong place.

In double houses the windows for lighting the south pens must be as tight as possible in order to get them away from the hogs.

## Advantages of Colony House.

Whether the large house with individual pens is better than the individual cot or colony house is an open question, perhaps largely a matter of individual preference. Each has its distinct advantages which cannot be secured in the other. Many of the best hog raisers are now providing themselves with both types of houses, and this seems to be the most satisfactory method. It is no more expensive in the long run, for all the buildings can be kept in use the year round. In such cases the large houses are used for A little pig takes cold very easily and farrowing quarters, and as soon as the pigs are a week or two old, or as soon as the weather permits, the sows and away from drafts, and provided with litters are removed to the individual cots. During the remainder of the year the large houses are utilized for sleeping quarters.

The movable or colony hog houses are especially suited to the needs of the farmer just starting in the hog business, and also for pig-club members. These houses can be moved from for the fall demand, and producers of field to field as the pigs are changed from one grazing crop to another. Their use makes it easier to keep the hogs healthy, as the house may be moved as soon as one place becomes insanitary or unclean.

There are two common types of col ony houses—the box shaped and A. type house. The box-shaped house is the most desirable of the two, especially for those who have a sow and an old sow for one litter, but with two litter to care for. This house has an advantage over the A-type house in that it is cooler in summer, for the roof is not so near the floor, thus givones, and the keeping of old sows en- ing more air space. It is easier to clean, easier to work in, gives better ventilation and admits more sunlight. The box house is usually built eight feet square by six feet high. The each containing a window, and both of which are hinged at the top and may be lifted in warm weather. The back way is also provided with hinges at are eight feet long. Under favorable weather conditions the front of the

## PERUNA

Made Me a Well Man

Mr. Louis Young, 205 Merrimac St., Rochester, N. Y., writes:

"I suffered for thirty years with chronic bowel trouble, stomach trouble and hemorrhages of We bought a bottle of Peruna and I took it faithfully, and I began to feel better.

My wife persuaded me to continue, and I took it for some time as directed. Now I am a well man." Suffered thirty years with stomach trouble and

### WOMEN ENLIST IN BATTALION OF LIFE

Sunshine Division of Home Service Rivals Battalion of Death in Real War Work.

Russia's Battalion of Death made, its women immortal by death-defying action at the front. America's Battalion of Life bids fair to merit immertality by its life and strength giving action in the home trenches, connecting directly with the men who go: over the top.

A new kind of women's army has come into being. It is called the "Sunshine Division." It started under unusual circumstances. Margaret Woodrow Wilson, the president's daughter, known for her patriotic war service; her aide, Major Oakes, and a small group of friends, including Miss Mardorle Brown of Atlanta, Ga., daughter of one of the leading men of the south, and a relative of the president, were discussing women's part in the war and the importance of enlisting the effort, talent, and activity of every woman in the country. The need of and talent not already devoted to defipite war work was recognized, and, out of the discussion came plans for conserving the patriotic effort of every: patriotic woman, and more especially. the young women of the country. The "army" to be recruited was designated the "Sunshime Division." Its scope of service is limited only by the ability of the enlisted women to serve, and there is no woman ineligible for service except she who is already doing ter utmost to help win the war. Particulars are available from Maj. A. P. Oakes, now stationed at United War Work headquarters, Dallas, Tex.

## HAS A BIG JOB

G. S. Bilhelmer.

G. S. Bilheimer of Denver, Colo., has been appointed Southern department campaign director for the next big sirive for funds to continue the war work being done by the Red Triangle forces in the army camps of the United States and overseas, army Y. M. C. A., the Y. W. C. A., the War Camp Community Service, the Salvation Army, the National Catholic War council, the American Library association and the Jewish Welfare board.

Mr. Bilheimer is one of the foremost men in the Y. M. C. A. movement. He is a member of the international committee of the organization, a member of the National War Work council and a master organizer and executive. He successfully directed the last army Y. M. C. A. drive for the Southern department, comprised of Texas, Arkansas, Oklahoma, Louisiana, Arizona and New Mexico, and was unanimously

## War Time Sweeteners

MERICA has several excellent war time sweeteners that will be used largely during the shortage in the sugar supply. They are maple sugar, syrups, honey and

molasses and may be used in preparing desserts and other dishes requiring sweetening. When a cup of syrup or honey is used to replace a cup of sugar the liquid in the

recipes should be decreased one-fourth.

One-third of a cupful of sugar is equivalent

to one-third of a cup of honey, about onehalf cup of syrup and about one-half cup of corn sugar. One-fourth of a cup of sugar is equal to about one-half cup of syrup or one-third cup of corn sugar. One tablespoon of sugar is equal to one tablespoon of honey, about one and one-half tablespoons of syrup and one and onethird tablespoons of corn sugar.

Sugar may be saved by the use of raisins, dates, figs, dried pears and fruit pastes used on the breakfast cereals. Fruit marmalades, butters and jellies should be used to take the place of the ordinary sweetening at a meal and not as accessories to it. Fruits may be preserved without

sugar. It may be added when sugar is more plentiful. Preserving demands this year a thin syrup instead of a If sugar is used one-half of the amount may be replaced

by another sweetener. Drying is a means of preserving (without sugar) ap-

ples, cherries, strawberries and black caps. When ready to use they may have added the needed sugar in the form of a syrup. When sugar is more plentiful fruit juices may be made into jellies or may be used as fruit juices with or without sugar, as beverages, fruit gelatins and frozen desserts.

Fresh fruits supply the place of sugar in the diet. They should be used freely. Desserts where sugar is scarce may be made of gelatins, junkets, custards, puddings and cakes.

chosen for the larger responsibility of the approaching campaign, during which the country will be called upon organization and direction of that time. | to support the Y. M. C. A. and other important war work agencies.

Mr. Bilheimer will be located at Dallas during the campaign period. He will have an able corps of assistants and specialists on his staff to carry out the various activities connected with a campaign of the magnitude of the forthcoming financial drive.

Mr. Bilheimer was chosen to direct the entire United War Work campaign for funds to finance the work of the seven war work agencies because of his successful experience and his unusual ability. His selection came direct from the New York headquarters of the consolidated campaign, with the solid approval of the people of the six Southwestern states, who are under his leadership, to furnish their part of the \$170,500,000 which the nation will be called on to contribute between November 11 and 18.

## WOMEN'S ARMY TO BUILD MORALE

Happy Idea Meeting Hearty Response Among Patriotic Women.

A new "army" has been born. It is called the "Sunshine Division," and it is made up of women-mostly young, women-who are eager to become a part of definite-organized effort to help win the war. The soldiers will not bear arms and court death like their sisters among the Russians. Instead. their line of duty will have to do with! service that will strengthen morale. and help win the war by promoting ife among the American and allied soldiers, rather than death among the en-! emy-the final result, according to military authorities, being equally as

effective in its relation to victory. The "women soldiers" of the Sunshine Division will enjoy a definiteness of war work which they have not had before unless they have become members of the leading war work agencies, such as the Red Cross. The plan, which had its inception with a group which composed the concert party headed by Miss Wilson, the president's daughter, which gave concerts! in all the army camps, suggests a happy and suitable disposal of the available time and talent of patriotic. young women not engaged in definite war activity. Interested persons are being referred to Maj. A. P. Oakes, at offices of the United War Work Activ-

# Who Pays the Road Tax?

## STATE OF NEW MEXICO

HARRY L. PATTON, Attorney General

Santa Fe

January 24, 1918.

Mr. D. W. Jones, County Highway Superintendent, Portales, New Mexico.

Dear Sir:

We have your favor of January 22nd, wherein you ask whether the road tax law is still in force and effect. also whether citizens of incorporated cities and towns are liable for payment of this road tax. It is the opinion of this office that the road tax law is still in effect, and, has not been repealed. We are also of the opinion that citizens of incorporated cities and towns are not exempt from payment of this tax. In this connection we refer you to the case of State v. Byers, 16 N. M., 92, 134 Pacific 234, where the Supreme Court of this state said:

"The inhabitants of incorporated cities and towns are obliged, under the statute, to perform labor on public highways, or, to pay a road tax in lieu of such labor."

> Very truly yours, C. A. HATCH, Assistant Attorney General

**THE ANSWER**—"Every able-bodied man between the ages of twenty-one and sixty years shall annually pay to the county road board a road tax of three dollars, or in lieu of such sum shall labor on the public reads three days, whenever notified by the board as hereinafter provided." - Section 2674, New Mexico Statutes, 1915.

## THE DEEP SEA PERIL By VICTOR ROUSSEAU

\_\_\_\_\_\_\_

(Copyright by W. G. Chapman)

THE VILLAIN MAC BEARD, POSSESSED OF THE DEAD MAS-TERMAN'S SECRET, GOES TO FIND THE ABODE OF THE WEIRD THINGS NEAR SHETLAND ISLANDS—HAS DEADLY PURPOSE.

Naval Lieutenant Donald Paget, just given command of a submarine, meets at Washington an old friend and distinguished though somewhat eccentric scientist, Captain Masterman. Masterman has just returned from an exploring expedition, bringing with him a member of the strange race, the existence of whose species, he asserts, menaces the human family. At the club, the "March Hares," Masterman explains his theory to Paget. The recital is interrupted by the arrival of a lifelong enemy of Masterman, Ira MacBeard, and the former is seized with a fatal paralytic stroke. From Masterman's body Paget secures documents bearing upon the discovery and proceeds to the home of the scientist. Paget proceeds to sea on his submarine, the F55, and encounters a German cruiser. He sinks the enemy, which had destroyed the Beotia, on which Ida Kennedy, his fiancee, was a passenger. The girl escapes in a small boat. He rescues her, but finds himself unable to take the skiff to the submarine because of invisible forces. Paget, Ida, Midshipman Davies and Seaman Sam Clouts barely escape death. Clouts plays the mouthorgan.

### CHAPTER VI-Continued.

pedo room below. A moment later his ken only by a passing word and the ocvoice came up the funnel. "I'm ready casional tunefulness of Clouts' mouth for the lady, sir!" he called.

Donald raised Ida in his arms and ley." lowered her through the tube.

"After you, sir," said Davies. "I have assumed command, Davies," Donald replied.

"Very well, sir," said the middy quietly, and descended. Donald followed men who are recognized by their conhim. As he jumped for the floor of temporaries as master minds. an army to victory, not to sit back and watch the working out of blind forces that he had set in motion.

Besides, destruction must be followed by construction, to satisfy his scientific mind.

His second thought was to produce a race of men, somewhere in the icebound wastes of Greenland, that should grow to maturity in a few years; a race organized for war, a primal blend of man and tiger. It had been done with the plants.

But he was too old. He would be seventy before this plan could be carried to perfection. And then it was improbable that the details would work out as he anticipated. His final idea came through Masterman.

men whom he had broken in his days of power. But Masterman was of a 87 were not treated, 123 were treated different caliber from the rest. Masterman had tried to come back, and ceived irradiation merely as a precauhad almost succeeded.

MacBeard, at first contemptuous of the old dreamer, came at last to watch Masterman uneasily. He knew that the old captain was crazed upon the subject of deep-sea life; but he knew, too, the facts that underlay his letters to the newspapers.

He had sent a paper embodying this subject to the magazine of the Inventors' club. Unfortunately, Halfield had won the ballot for the editorship that month. Masterman's scholarly contribution had been consigned to the waste basket, and the articles in the magazine had been as follows: "A King in Masquerade." "King James I as Universal Man," "Shakespeare and the JIM cipher," "Bacon and the MIJ Cipher," "What Civilization Owes to

When Masterman's proxy ballot won the editorship during his absence, the printers, instead of inserting his latest paper, as he had requested, used a quantity of his old, unpublished ma-

mans still regarded "Lallah Rookh" as

Metternich says, in his Memories, that he was sent to Strasbourg in the summer of 1788, and that he had the same fencing master as Bonaparte, who had just left the school. This of adversity has a mortgage on success. fencing master, a M. Justet, called on Metternich when he was passing through Strasbourg, in 1806, and remarked that it was a funny thing that he should have given Metternich fencing lessons shortly after having given some to Napoleon. "I hope," he added, "that my pupils, the emperor of the French and the Austrian ambassador in Paris, will not think of fighting each other!" An old Almanac d'Alsace also witnesses to the fact that there was, in that year, a fencing master of the name of Justet living in Stras-

Danger of Sleeves and Ties. Although time and again workmen have been warned regarding the danger of loose clothing when working around machinery, it appears that many of them persist in ignoring the danger. As a result 986 workmen were killed in the United States by being drawn into the wheels of machinery or thrown to death when parts of their clothing became caught in rotating members. Loose sleeves and neckties are prolific sources of danger, and should not be tolerated for a single moment by the careful worker.—Scientific American.

## Soy Beans as Food.

Soy beans, introduced into the Unit ed States more than one hundred years ago primarily for use as a forage crop, are in reality one of the most nutritious of the bean family when used as human food, according to specialists of the department of agriculture.

## Shotguns and Shotshells

GET the full benefit of your spare time for shooting this Fall with a Remington UMC Pump Gun or Autoloading Shotgun and Smokeless "Arrow" or "Nitro Club" Wetproof Steel Lined "Speed Shells"—made to shoot right.

## Remington, UMC for Shooting Right

There is not a single out-of-date mechanical principle or old-fashioned feature in the Remington UMC Shotguns. They look, fit, work and shoot equal to highest expectations.

Likewise, Remington UMC Smokeless "Arrow" and "Nitro Club" Wetproof Steel Lined "Speed Shells," made completely waterproof by a wonderful and exclusive process, richly justify their selection.

You buy the same popular "Arrow" or "Nitro Club" brand, at the regular price, and get the Wetproof improvement besides, without extra charge. The same shells, having highest speed, best pattern and penetration, made still better. When they "ought to" be affected by damp storage or soaking wet from a shower, they will be found hard and smooth as usual, will work through the gun perfectly and shoot right.

In black powder shells, buy the old reliable "New Club," now Wetproof sealed at turnover and top wad.

# GUNNER DEPEW

ALBERT N. DEPEW

Ex-Gunner and Chief Petty Officer, U. S. Navy Member of the Foreign Legion of France Captain Gun Turret, French Battleship Cassard Winner of the Croix de Guerre

dal Arrangement With the George Matthew Adams Service

DEPEW FINDS HIS PAL, MURRAY, HAS BEEN MADE A VIC-TIM OF HUN FRIGHTFULNESS.

Synopsis.-Albert N. Depew, author of the story, tells of his service in the United States navy, during which he attained the rank of chief petty officer, first-class gunner. The world war starts soon after he receives his honorable discharge from the navy, and he leaves for France with a determination to enlist. He joins the Foreign Legion and is assigned to the dreadnaught Cassard, where his markmanship wins him high honors. Later he is transferred to the land forces and sent to the Flanders front. He gets his first experience in a front line trench at Dixmude. He goes "over the top" and gets his first German in a bayonet fight. While on runner service, Depew is caught in a Zeppelin raid and has an exciting experience. In a fierce fight with the Germans he is wounded and sent to a hospital. After recovering he is ordered back to sea duty and sails on the Cassard for the Dardanelles. There he sees the wonderful work of the British and French in the Gallipoli campaign.

### CHAPTER XI-Continued. -10-

Helles I was amidships in the galley plunge, and it was a sight to rememme it was a sub on the port bow, but men. I only caught a glimpse of the little whiripool where her periscope submerged. I do not know wty she did not let loose a torpedo at us. The officers said she was trying to make the entrance to the Dardanelles and came up blind among our ships and was scared off by our guns, but I thought we had just escaped by the skin of our teeth. Later on our destroyers claimed to have sighted her off Gaba Tepe.

At noon we were at mess when one of the boys yelled, "She's hit," and we all rushed on deck. There was the British ship, Triumph, torpedoed and listing away over to starboard. She was ready to turn over in a few minthat has been torpedoed, because the chances are the sub is still in the neighborhood laying for the second ship with another torpedo. But one of the British trawlers went to the dock about a mile and a half long. assistance of the Triumph to pick up the crew.

the water. Then we breezed out sounding as she went. Suddenly, when toward the horizon, full speed ahead. she was within 500 yards of the shore, All about the Triumph was a cloud of I saw her swing around and steer in black smoke, but when we looked a crazy fashion. We began asking through the glass we could see she was each other what was the matter with going down. Then our guns began to her, but we learned afterwards that bombard the Turkish positions and I her rudder had been torn off, though had to get busy. When I saw the we never found out how, nor do I think Triumph again she was bottom up. anyone ever knew. She must have floated upside down for almost half an hour, then she went stern toward the shore and listed over down as though there was somebody to port. You could see different artion the bottom pulling her.

his telephone on the bridge rail and swore at the Huns and Turks and broke his telescope lens to bits. About fifty from the Triumph were lost.

It was decided that the place was too hot for us with that sub running I thought I was blinded. loose, and when they reported that afternoon that she was making her in on us and on the Champagne. way south from Gaba Tepe to Cape When I could see again I saw the men Helles all of the fleet but the Majestic on the Champagne climbing down the got under way, and the Majestic was the only ship left off the cape.

> Then along came a cart making a somrades. I was in the third line, but lot of racket. One of the fellows in it seen it once, it was too sickening. as the rest were doing. They were Our casualties were sent back to the Anzacs, and were pretty badly shot up.

The word "Anzac," as you probably know, is made from the initials of the Australian and New Zealand army scratching out shallow trenches for corps. They had a regular town, called ourselves, finding what natural cover Anzac, on the peninsula. At Suvia next trip the weather was really fine, there was and otherwise getting ready bay and around Gaba Tepe the Anzacs but it did not please us much, for as for the night, which was near. It got further into the Turkish lines than soon as we got in range the enemy began to rain and we could hardly any other unit in the allied armies.

By this time the Turks were making had been in before, though not more the enemy could not spot us, and the an attack, and all you could see to quarter cupful of corn strup, one tablethe front was one long line of smoke and spouting earth. Then our guns Every once in a while we would started and the noise was deafening. stand by to repel ar attack, whether it It was worse than in the turrets was a real one or not, and we were aboard ship during an engagement. My head rang for days after we left the Dardanelles.

> The Turks were getting a better idea of our range now and the shells were falling pretty close to us, but finally we tore in with the 14-inch navals and ripped up three of their batteries. In the lull that followed we made good time and reached our front line positions at Sedd-el-Bahr during the after-

The next morning we made our first attack. I had had a bad night of it, thinking about Murray, and when the time came there never was a chap more glad to charge and get a chance at the enemy with the bayonet than I was.

We attacked according to a program. Time cards were issued to the officer of each section, so that we would work exactly with the barrage. To be ahead of, or behind the time card, would mean walking into our own barrage. The time of attack is called zerothat is, the minute when you leave the trench. Some of the Anzacs said it meant when your feet got the coldest, but I do not think they suffered very much with trouble in the feet-not when they were advancing, anyway.

The time card might read something like this: First wave, zero, advance, rapid walk, barrage 25 in 10 seconds, take first trench, 0:20; second wave, same as the first, pass first trench, waves might be instructed to occupy 12:45. Here, zero is understood, the I left my fatigue party, without first figures standing for minutes and

I was in the sixth line of the third wave of attack and zero was 4:30 a. m. Whistles were to be the signal There was poor old Murray. They for zero and we were to walk to the were just taking him down. He had first line Turkish trench. As we came been crucified against the wall of the out our barrage fire would be burststorehouse. There was a bayonet ing 50 yards ahead of us and would

> Depew goes over the top in an attack on the Turkish trenches and has some close calls before he gets back to his own lines. Don't miss reading about it in the next installment.

> > (TO BE CONTINUED.)

For the courage which comes when

While troubles like hallstones fall; For the help that is somehow nigh In the deepest night when we cry: For the path that is certainly shown When we pray in the dark alone, Let us give thanks, -Ella Wheeler Wilcox.

### TABLE HELPS.

RAB meat makes a most tasty dish used as a main dish for luncheon. Brown or cook until tender a tablespoonful of chopped green pepper and a tablespoonful of chopped onion in the same amount of corn oil.

Take a cupful of crumbs, mix with one beaten egg and a large ripe tomato, add a cupful of crab meat, season well with salt and pepper and if not moist enough add a little soup stock or milk. Butter or oil a baking dish and turn in the mixture, cover with two slices of bacon and bake until the bacon is crisp. Canned crab meat mixed with shredded cabbage with a little onion and green pepper for seasoning and a good salad dressing makes a salad good and not at all common.

Grape Sherbet .- Crush and squeeze through a cheesecloth two pounds of ripe Concord grapes. Add a quart of cold water, the juice of two lemons and honey to sweeten to taste, then freeze as usual. If one has bottled grape juice, that may be used, taking one cupful of grape juice, two tablespoonfuls of lemon juice and a pint of thin cream; freeze and serve in sherbet cups. This is a most beautiful watermelon pink and tastes as well as it

Potato Flour and Honey Sponge Cake.—Boil half a cupful each of honey and sugar to the soft ball stage (238 degrees Fahrenheit). Beat until thick the yolks of five eggs, beat the sirup into the yolks, add the grated: rind and juice of half a lemon, then fold in a half cupful of potato flour and the stiffly beaten egg whites. Bakein a tube pan 50 minutes.

Oatmeal Fruit Macaroons.—Beat together one-half cupful of sugar, onespoonful of melted shortening with twobeaten eggs. Take two and a half cupfuls of rolled oats, a half teaspoonful of salt and one-half cupful of dates or raisins. Combine the two mixtures and drop in rounds on a baking sheet. Bake in a moderate oven. This recipenakes three dozen macaroons.

For the growth of the spirit through

Like a plant in the soil and the rain-For the dropping of needless things Which the sword of a sorrow brings; For the meaning and purpose of life Which dawns on us out of the strife. Let us give thanks. -Ella W. Wilcox.

## THE EMERGENCY SHELF.

HERE is the housewife however well equipped with resources who does not enjoy the feeling of security which a well-stocked emergency shelf gives her? Usually It is wise to have two caus or jars of

each kind and be sure that they are replaced in the next regular order for groceries, as company is often like calamity-it travels in threes.

Condensed milk should be provided in large quantities, for often it is needed in more than one dish.

Canned soups, two of each of your favorite kinds; fish, dried beef, bacon, lamb or ox tongue, cheese of various kinds, corn, spinach, lima beans, and string beans, tomatoes, asparagus, pimentoes, olives, nuts, canned fruit. peanut butter, grape juice, salad dressing, choice raisins and a box of marshmallows. Crackers, macaroni, cookies and fruit cake are all good things which will be found most useful in preparing a quick or unexpected meal.

Let us see what can be done with some of these for a good and substantial meal. It is wise to have at hand several well planned menus, with the recipes ready in case one's wits leave one in a sudden emergency.

The fish or shell fish may be used as an escalloped dish or as a salad, the green vegetables served hot with any desired sauce. Bread, rolls or hot biscult with tea, coffee or cocoa with a simple dessert of fruit will make a most satisfying meal.

Bean Salad.-Open a can of tender green peas and add one small shredded onion. Fry until crisp and brown a few slices of bacon cut in strips, pour over the beans, season well, and then add sufficient boiled vinegar to make a good snappy salad. Serve this with sliced tongue or fish croquettes

No matter how careful a man may be in preventing weeds from going to seed on his land, most of his work will be for nothing if he permits seeds to be constantly brought to his farm from the outside. Another important point regarding weed control is to destroy pernicious weeds before they have gained sufficient headway to do serious damage. Farmers should ever be on the alert for the appearance of new weeds which are being introduced and for old weeds which are developing noxious tendencies. When a plant shows any tendency toward becoming a troublesome weed it should be called to the attention of someone in authority and every effort made to keep tt under control.

Weeds may be brought to the farm in various ways. The principal source of introduction is through seeds.

Many of the purchased grain, clover and grass seeds contain weed seeds as impurities. How can the farmer purchase clean seed? In no permament way will the quality of seed offered for sale be greatly improved except by greater knowledge and alertness on the part of the consumer.

Characteristic Root Growth of Canada Thistle, a Permanent Weed.

First, the farmer should know what constitutes good seed; second, he should know fairly closely what highgrade seed is worth; and, third, he should be willing to pay a fair price for it. Laxity on one or more of these points is responsible for most of the farmer's trouble over poor seeds. Seedsmen say that they are forced to carry poor seeds in stock because many farmers will not pay for the better grades. Cheap seeds are really the most expensive kind that can be

In improving his knowledge of what constitutes good seeds, the farmer will find the advice of the state agricultural experiment stations and the United States department of agriculture of great assistance. These institutions gladly test samples of seeds for farmers free of charge. That test will show whether there are any weed seeds or other impurities present and the percentage of germination of the crop seed. In purchasing seed of alfalfa and clover the most important point to consider is the presence of dodder seed. Clover seed should also be examined for seeds of the plantains.

Introducing Weed Seeds in Stock Feeds.

Some kinds of stock feed are free

Cottonseed meal, off meal, brewers and distillers' grains, corn bran, middlings and the gluten feeds are practically free of weed seeds; but molasses feeds, oat chop, wheat bran and the mixed feeds are apt to contain more or less seeds of various weeds. This is especially true of that class of mixed feeds made from mill by-products, for the reason that such byproducts are partly composed of screenings. These screenings contain weed seeds resulting from the cleaning of grain. Some firms grind or heat the screenings that go into-mixed feeds, and in such cases the percentage of live weed seed is very low. Introducing Weed Seeds in Manure.

Nearly all purchased manure is full of weed seeds. If it is hauled to the farm when fresh many thousands of weed seeds are introduced, so that the farmer is storing up future trouble for himself. As this manure usually has to be removed from the town in the fresh state, the only chance to compost it in order to make the weed seeds rot is after it reaches the farm. It has been found that the weed seeds in manure piles rot quickly under ordinary conditions, so that practically all of them have lost their vitality in two months. Whether the farmer should compost city manure by leaving it in

## DISTRIBUTING LIME ON SOIL

is questionable.

piles after he has drawn it to his farm

Homemade Wind Shield Prevents Breezes Blowing Particles Away -Gunny Sacks Useful.

(From the United States Department of Agriculture.)

Many farmers spread lime on corn stubble which is destined for winter wheat production. Often the lime-distributing work is discontinued temporarily because of prevailing winds which blow for several days at a time. Most kinds of lime are finely powdered so that their uniform distribution is impossible when the wind is strong.

Any farmer can equip his lime spreader with a homemade, improvised wind shield which will promote the effective use of the machine at any time no matter how the wind blows. Gunny sacks or an old tarpaulin of sufficient length to reach from the lime box to the ground should be attached to the machine in order to protect the spouts through which the lime is distributed. It is necessary to weight the free ends of the sacks or canvas with pieces of wood or iron so that these shields will be held perpendicularly.

Another plan is to equip each spout of the lime spreader with a piece of rubber tubing such as is commonly used on grain drill spouts through which the lime may flow from the supply box to the ground. The use of this tubing protects the lime from the action of the wind and is an inexpensive medium which favors the efficient use of the lime spreader during periods, when, without such equipment, the implement would be idle.

## VALUE OF MANURE SPREADER

Particularly, Useful Implement When Labor is Scare and Fertilizer Needed for Crops.

(From the United States Department o Agriculture.)

It takes as long to load a manure spreader as it does a wagon box, but the spreader will unload and spread the manure in a third of the time. Hauling manure in a wagon box and spreading it on the field with a hand fork is hard and disagreeable work. It can be done much easier with a spreader and the material is more evenly distributed. The spreader is a useful implement to have at any time when manure is to be spread, but particularly so now when labor is scarce and the need for increased crops demands that not a pound of fertility be wasted. Save time and avoid wastebuy a spreader. If the amount of hauling is not sufficient to justify the investment, it may be worth while to of weed seeds, while others are not, rent or borrow your neighbor's.

## STORAGE PLACES FOR CROPS | STORE VEGETABLES IN HOME

Protection Should Be Afforded Potatoes and Roots-Storage Cellar May Be Needed.

Home gardeners who have not already provided storage rooms for the supply of storable tubers and roots growing in their gardens should immediately take steps to make provision for protecting these products so as to make them available for use long after conditions outside are unsultable for growth.

Such storage rooms can be provided by partitioning off a corner of the celtar of the house or, where the supply is large, the cellar of an outbuilding or a specially constructed storage cellar may be meeded to serve the purpose.

Place for Root Crops. If permanent facilities are not available late root crops can be kept in outdoor pits or banks, requiring no cash outlay except for labor.

Farm Cannon

Make Use of Cellar, Attio or Closet Much Depending on Product to Be Stored.

(Prepared by the United States Department of Agriculture.)

The successful storage of vegetables is not at all difficult; in fact, good storage facilities already exist in most homes, it being only necessary to make use of the cellar, the attic, the large closet, or other parts of the dwelling, depending upon the character of the product to be stored.

Use of Corn Patriotic.

Corn isn't one food-it is a dosen -cereal, vegetable, bread, dessert. It has more food value, dollar for dollar. than eggs, meat, or most vegetables. Corn is pientiful; its use is patriotic.

Hay Supply for Calf.

When the calf is two weeks old ground grain or prepared meal and bright clean hay should be offered; the quantity fed should be increased as the calf's appetité demands.

These are worn in Paris, or rather ing tide of women who are trying to they were worn at the Paris open- make every dollar realize its full value ings, says a fashion writer. They have arrived in this country, and their ac twin doctrines of conservation and ceptance is debatable.

There are women who will wear anything new, regardless of its effect on heart of every worker. We must buy, their appearance, and these women for we must be clothed, and we wish may make the new fabrics fashionable. to keep in service those who have At first glance, they are rather ter- served us; but we must not buy idly, rifying. One has a slight creeping of nor foolishly, nor with an eye to our feeling for the opposing side" to the selfish comforts, rather than the good legions of Caesar. Even a stout- of the majority. hearted warrior would hate to face a great rush of animal skins moving toward him with rapidity.

That will be the situation that must against such a statement, but it is be faced by every stout-hearted man this winter, if these shaggy materials take first place in fashion. To the observer they are the leading phase of the season's output. They are purely a French invention, and even if they are not accepted in their entirety of shagginess, they will undoubtedly pave the way for an immediate output of silky materials with rough surfaces.

The first of these materials was called "Lionceau," and was invented hides in fabrics, but that one should late last winter, I think, and then used as a substitute for fur.

Magnificent as Well as Shaggy.

The majority of those who dip deeply into the sources of fashions and fabrics insist that the entire output of these animalistic materials is due to the recrudescence of monkey fur. That. however, would not explain the other fabrics which are used in the new it when they see piled up against it French gowns that are arriving in this country, and which have hunting scenes, magnificently ornamental, on a dark background. Jenny uses this the cold. It is used by such artists as material for panels and for large pieces of evening frocks.

Then there are other fabrics which show birds and birds' plumage as the ornamental design, but these are of minor brilliancy as against the animal fabrics, which not only toss about the red and burnt-orange hair of monkeys and orang-outangs, but also the manes of animals such as never existed on land or sea; these are made from fiveand six-inch strands of curled silky floss interwoven with metal.

The bird fabrics are called "Oisella" and the burnt-orange hides are called "Orang-outang." In other gowns, especially one from Bulloz, there is used a new material called "Toison d'Or," which means "The Golden Fleece."

Still another material—and the loveliest of all because it is the most practical for American usage is the imitation of a medieval coat of mail This fabric, alongside the shaggy ones, seems to be cultured and modern.

I am dwelling in detail on all these fabrics of the hour because I believe that the great masses of women over this continent are going into the shops very soon to buy materials for their new clothes. Every woman does not have an expensive dressmaker or a great department store to furnish her costumes for the season. Such tricks of fortune favor only the few. The war has brought about an immense amount of home dressmaking, for all the seamstresses in the world cannot go into munition factories and earn large wages. Some of them must stick to their trade, and those who do can reap a harvest.

## HIGH NECKS AND NO SLEEVES | gown; it is intended to show the arm

New Evening Gown is a Revival of an Old Historical Fashion Expioited Years Ago.

The long skirt has been accepted by America, France and Great Britain for the day as well as the evening, an authority states, regardless of the fact that wartime activities seem to demand the shortest skirt we have ever

Another feature of apparel upon which there is such a general unification of spirit is the introduction in America of a type of gown that many Americans like. It is for the evening, and has a high collar and absolutely no sleeves. This is a revival of an old historical fashion which was exploited in this country over a quarter of a No gloves are to be worn with this highly attractive.

at its best.

France persists in the use of black and white checkerboard fabrics for trimming, and they appear in America. but are not greeted with much enthusiasm. It is a difficult design to handle unless the checkerboard comes down into such small dimensions that it evaporates into checks. Worth has insisted upon the broad form as an excellent ornamentation for top coats and capes, and the Americans have taken up the idea as a lining for capes with considerable success.

There is to be no end of capes, you know. They belong to the slip-on, slip-off-easily variety of clothes, which all women consider part of the effort toward economy in time.
