Dr. Williams' Pink Pills explain it. "My oldest girl's health began to fail when she was about fourteen. She was nervous, complained of sharp pains in her head, would get deathly sick and have to leave the school room to get fresh air to revive her. I gave some pills byher. She took only a few boxes, but they cured her troubles, and caused her to develop into a perfect picture of health. Then my husband took them for rheumatism and found that they would cure that too. So you see we have all got great good from using them, and that is why we recommend them to others."

"Nothing is easier," explained Ezra Kendall to the attentive reporter, than to tell a story. Now, for in-You are up against it, but the man opposite you has the food problem beaten to a frazzle. You say to the audience that he opened up the game with a homemade combination sandwich. Perhaps one person laughs, perhaps all-it all depends on their knowledge of sandwiches. But right here you turn to the audience and ask it if it ever had a homemade sandwich. Then you repeat the question, laying the foundation for joke number one: 'Ever had one of 'em, ever had a homemade combination sandwich?' you ask, 'with everything in it they don't want at home.' Then you say quickly: 'Everything in the ice box that wants to leave quickly travels in that sandwich.' Now you have impressed the man's sandwich on your audience and you begin to use a few illustrative gestures. You go on: 'The first thing he did was to unbutton the sandwich'-with a pause just long enough to let that work in-then he lifted the lid and took out a couple of pickles and a stove lifter and closed it again.' A short pause. 'Then he opened his mouth'-and you get in a little side quip, such as 'I never saw such an alcove in a man's face before.' Continuing, you say: 'After he'd eaten the sandwich he began to devour a mince pie, and after that he began to double up and shut like a jackknife.' Here you place your hand on your stomach and move backward and forward a little. 'I asked him what was the matter.' you say, and he rejoins, 'I think my wife put

some nuts in that pie without cracking them.' You say then: 'Can you crack 'em that way? If so, I'll eat mine with the shells on and crack 'em good music; he will take pains to tell when I feel like it.' And there you

Settling the War on Crutches. In an article in the World's Work on the betterment work of the Colorado Fuel and Iron Co. is a funny story of the hatred between the Japanese and the Russians in the company's hospital at Minnequa. The writer says: The Russians and Japanese are as hostile irdividually in Colorado as in .Manchuria. Even on the hospital lawn, convalescent Russian and Japanese patients have hurled crutches and canes at one another; and on the school rounds, children have fought with fists and stones. The management had to make the wards in the hospital small, so that subjects of the Mikado and of the Czar could not glare at one another from beds on opposite sides of the same room, and to arrange the camps so that each race or nationality could live by itself.

Vastness of the Canal Project. The celerity with which under mod err conditions the isthmian canal can

be dug is indicated by the estimate of the chief engineer that with 100 steam shovels installed, with a complete system of tracks serving them, a yearly record of 30,000,000 cubic vards of excavation may be reached without requiring a greater output per shovel or greater speed in working than has already been attained. And the magnitude of the undertaking is shown by the statement that, at this rate of progress to complete sea-level canal with a tidal lock 1,000 feet long and 100 feet usably wide, at Miraflores. will take from ten to twelve years.

Not all of these symptoms are present in every case.

To tone up and invigorate both stomach and liver and start the digestive processes into healthy action, there is, to say trouble. Had a physician but he did not help me. After I had been suffering like this for some time, a man who had used Dr. Pierce's Golden Medical Discovery, teld me about the medicine and I procured a bottle of it. I felt a slight improvement by the time I had used the first bottle, so continued the use of the "Discovery" for several weeks until I was myself again. EFFECTS OF PROSPERITY. In the six years of the country's greatest prosperity, from 1897 to 1903. average prices of breadstuffs advanced 65 per cent., meats 23.1 per cent, dairy and garden products 50.1 per cent, and clothing 24.1. All these were products of the farmer and stockman who profited more than any other class of the community by these advances. The miner benefited 42.1 per cent by that advance in the average price of metals. The only decrease in the average prices of commodities in that period was in railway freight rates which decreased from .798 per tonmile in 1897 to .763 in 1903, a loss of 4.4 per cent. The action of the Commissioners Court in voting bonds for jail is a commendable action. The county has long needed a jail and we are to get one at last. No county is so law abiding as to make a jail unnecessary to the peace of the community.

Irrigation Projects Under Way. From Maxwell's Talisman.

An English engineer who recently visited this country was surprised to find that, though the reclamation act was passed less than three years ago, much has been done in the direction of Department of the Interior, Land Office practical irrigation work. Six irrigation projects have been practically begun and call for an expenditure of \$10,400,000. They are located in Nevada, Nebraska. risona, Colorado, Idaho and New Mexico. Some preliminary work in road and telephone buildng is under way in Wyoming. Over therty large irrigation procots have been examined and Northeast Quarter of Section 30, T. 28., it. 34 E.

mestic use, and the structure is just nearing completion. It is of course, essential to proceed with such immense permanent engineering works deliberately and thoroughly.

It is stated by the geological survey that by June, 1907, which will be five years after the passag of the irrigation law, there will be fifteen large constructions under way, and that half of them by that time will be far enough advanced to admit of settlers moving on the irrigated land. All the banks in the District That is certainly quick work, considering its nature. Nearly der special official supervision. \$30,000,000 has accumulated in from the sale of lands in the arid region. In this important respect also the headway made is highly satisfactory. No other nation in the world has on hand so many important engineering undertaking.

Suit Over a Land Deal.

D. E. Leverton; a citizen of

Fulton county, Illinois, through his attorneys Freeman & Cameron and Louis O. Fullen, has filed suit in district court against C. L. Tallmadge and the First National Bank of Roswell. It is an injunction suit and the only part the bank has in it is to be enjoined from allowing C, L. Talmadge to draw all his money from the bank until the suit is settled. The claim of the plaintiff is that he paid Tallmadge \$6,400 cash for a farm of 160 acres in section 9, township 15 south, range 26 east, and that Tallmadge gave him only a receipt for the money. Further, that Tallmadge had no title to the land, and that when he found out that Tallmadge had no right to it, he (complainant). filed on the land as a homestead. Plaintiff further states that there is an artesian well on the land that is flowing, but which Tallmadge agreed to put down deeper until it would irrigate the whole 160 acres. Plaintiff claims that he was induced in a plot to sign a paper which he believes, in the well. He states that he did not know what the paper was when he signed it, being induced to do so through mis-representation. He states further that he does not believe Tallmadge has paid for the well, He asks that Tallmadge be compelled to return his \$6,400 and and surrender the paper he signed. He offers to relinquish his homestead filing on the land and leave the land in The Great the same condition and title as it was before the transaction.

Every Heart-Ache

ficult breathing, palpitation, fluttering or dizzy spell means that your heart is straining itself in its effort to keep in motion. This is dangerous. Some sudden strain from overexertion or excitement will completely exhaust the nervel

or rupture the walls or arteries

of the heart, and it will stop. Relieve this terrible strain once with Dr. Miles' Heart Cure. It invigorates and strengthens the heart perves and muscles, stimulates heart action, and relieves the pain and misery.

Take no chances; make your heart strong and vigorous with Dr. Miles' Heart Cure.
