Our new house will be the most modern in the Pecos Valley.

## GREAT REMOVAL SALE

Our new store will be the largest exclusive dry goods, clothing and shoe store in the Territory.

COMMENCES MONDAY, JUNE THE 19th.

### A Sale Which Will Eclipse Any Other Sale And Break All Records

When the summer is waning we expect to move into our large new quarters which is now being built for us. Our store, when completed, will be modern in every sense of the word and will cater to the best and exclusive merchandise of the highest standard.

We do not want to move our stock if possible. We would much rather dispose of it now in our old store. The less we have left the better we will like it. If low prices are sufficient inducement to move any merchandise, our stock will go in a "jiffie." It is up to you now.

It matters not whether it is summer or winter goods, we will save you from 25 to 50 per cent. on your purchases. Everything must go. Profits are not considered now. We are willing to sacrifice it for a while for the sake of less work and a new stock when we move.

PEACE MOVEMENT STARTED.

St. Petersburg, June 12.—The warring countries both having formally agreed to try to conclude peace, the next step it is explained here will be the first direct exchange in which Japan is expected to take initiative by indicating doubtless through an intermediary at Washington her views as to the time and place of the meeting.

Russia will offer no objections to any reasonable suggestion in this respect, being prepared to at once issue instructions to her preliminary plenipotentiary, whose personality for the moment depends upon the place Japan names. The statement is now made that M. Witte is going to Berlin to meet Prince Arisugawa, who represented the Japanese emperor at the wedding of Crown Prince Frederick William, but no confirmation of this can be obtained.

In the public mind, Mr. Witte stands out prominently as the one Russian statesman who should direct the peace negotiations. But an intimate friend of the Russian statesman assures the Associated Press that he knows M. Witte has not been approached on the subject. Court influence would be solid against the selection. M. Witte is thoroughly familiar with the Far Eastern question in all its bearings.

He understands the Japanese position and fully realized before the war that the aggressive policy being pursued under the lead of the Viceroy Alexieff and M. Bezbraffov, president of the Lulu Lumber Company, and the coterie of adventurers connected with them would drive Japan to take up the sword. At one time he talked over the situation with Marquis Ito.

Practically, it was M. Witte's disapproval of the Far Eastern problem and the creation of a viceroyalty in the Far East which caused his downfall as Minister of Finance. During his trip to Port Arthur in 1903, M. Witte was invited by the Japanese government to visit Japan. The Japanese therefore probably would welcome his selection to conduct the preliminaries in behalf of Russia, knowing that they would be dealing with the Russian statesman who best understands the situation and who is most likely to reach an agreement mutually advantageous.

Last summer while M. Witte was Chancellor von Buelow's guest at Norderny, Hanover, he is said to have seen M. Kurino, former Japanese minister at St. Petersburg, and, it is added, they both agreed that the war should be succeeded not by peace, but by an alliance.

Russia's official reply will be printed in the Official Messenger today or Wednesday. At the foreign office this afternoon the Associated Press was informed that Japan's reply as to time and place of meeting for the plenipotentiaries is expected within twenty-four or forty-eight hours at the most. "Russia's plenipotentiaries," continued the informant of the Associated Press, "will be clothed with full power to receive Japan's terms and give Russia's answer which will involve power to conclude a temporary suspension of hostilities. Such suspension probably will be limited to from three to eight days, in which Russia will decide whether it is possible to proceed."

According to the Russian view it is impracticable to attempt to inhibit the movement of troops or supplies during the armistice and fears continue to be expressed that there will be a broad gap between Japan's minimum and Russia's maximum. But diplomatic fencing is now the order of the day.

Gen. A. P. Stewart, ranking officer of the Confederate Army, is seriously ill at Borden Springs, Ala. He is the resident member of the Chickamauga Park Commission, and has had many honors shown him, as he made a brilliant record during the Civil War.

Louis Stevenson, manager of the Porfirio Diaz Hotel at Juarez, Mexico, opposite El Paso, and whose home has been at Las Cruces, N. M., fell from the second story of the hotel and dying a few hours later.

Paupers in the Kings County, N. Y., poor house, in the bakery department went on a strike a few days since to go on the payroll. They were given choice of going away, going back to the bakery or going to the rock pile.

C. R. Duty, wife, son and two daughters, left Paris in a wagon May 20 bound for Bokchito, I. T. They have not since been heard from and it is feared the entire family was drowned, as the streams were all swollen at the time.

General William J. Palmer of Colorado Springs, Col., and Andrew Carnegie have donated respectively \$100,000 and \$50,000 as a nucleus to a \$500,000 endowment fund which the Colorado college is raising.

The Moores and Leeds, head of the Rock Island interests, have organized at \$4,000,000 coal company to develop Illinois and Indiana coal fields. They have purchased a 10,000-acre tract of coal land which they propose to develop.

The first load of wheat for 1906 for Michigan County has been sold in McGregor. It was No. 4 and brought 97 cents. The yield is quite satisfactory in this section, and threshing has commenced in earnest.

SOUTHWESTERN COTTON CROP.

Outlook for 1906 as Compared With That of 1904. Dallas, Texas, June 12.—Summarizing a southwestern cotton crop report, the Dallas News this morning says: The News' first cotton crop report for the season of 1906 is based upon reports from 422 points in Texas and 65 points in Indian and Oklahoma Territories, all written on June 8.

Summarized, they show that the acreage is not yet definitely determinable for while the picking of cotton will begin with the month in Deval county, planting is still in progress in many of the counties of the northern half of Texas, and even as far south as Montgomery County, while, upon the other hand, weather conditions are such as to render it uncertain whether the late planted cotton will germinate, and furthermore, the reports indicate that many crops are being abandoned because of grass and weeds, the scarcity and high price of labor, and, in some instances, the ravages of crop pests.

The reports as to acreage indicate the following:

Table with 2 columns: Region and Acreage. Includes entries for East Texas, North Texas, Central Texas, South Texas, Northwest Texas, Middle West Texas, Southwest Texas, Panhandle, The State, Indian Territory, Texas and L. T., and Oklahoma Ter.

Production of cotton in 1904 as given in the foregoing table refers to quantity ginned, as reported by the United States Census Bureau.

END OF AUTOCRACY.

Peace and Constitutional Government Simultaneously.

St. Petersburg, June 12.—The Russian experiment in parliamentary government will begin in September. The Associated Press is now in a position to make this positive announcement.

The Emperor has already given his approval to the scheme now being finally but formally reviewed by the Council of State for a legislative body consisting of a lower house called the Gosudarstvenna Duma (Imperial Duma) and an upper house, Gosudarstvenna Sovet, or the present Council of the Empire, with power to formulate legislation, discuss the budget, interpellate Ministers, etc., but reserving in the Emperor's own hands the final authority. The elections will take place during the coming summer.

Although the concession clings with desperation to the essence of autocracy, it marks the beginning of the end. The die once cast there can be no retreat and the quasi-parliamentary regime which will be inaugurated will prove to be only a transitory bridge over which absolutism must cross to constitutionalism.

Peace and a Constitution appear simultaneously on the Russian horizon. The proclamation of Parliament, either in the form of a manifesto or a ukase, will be promulgated within a few days.

Isaac Hamilton was killed by lightning at his home, near Stroud, Ok. He was standing by a partially open window.

Contract for the North Fort Worth school house has been signed by Contractor J. W. McPherson and the school board. The price is approximately \$25,000.

The Veterans Assemblé.

Louisville, Ky., June 12.—The braying of bands and the steady swelling of throngs on the streets indicate that the vanguard of the visiting army has reached Louisville for the reunion of the United Confederate Veterans. By 6 o'clock Wednesday morning fifty special trains on all roads running into Louisville from the South will discharge their thousands, while extra heavy trains of the regular equipment will add yet other thousands to the total.

The parade on Friday promises to eclipse all previous pageants in the matter of numbers. The fact that most of the battle flags recently returned by the United States whence they came will be borne in the parade has aroused great enthusiasm among the veterans, and every Confederate who can will probably be in line.

The only two cities thus conspicuously mentioned for the honor of entertaining the veterans at their next reunion are New Orleans and Chattanooga.

To Rival Beaumont.

Denison: An oil strike which promises to rival the discovery at Beaumont is that which has recently been struck near Stringtown, I. T. The strictest secrecy exists among the only five persons who know of the strike as to its exact location. Extensive land interests in that vicinity are held by a Denton man, but he will give no information regarding the discovery. The oil is said to be of the finest quality and in great abundance.

Strike About Dead.

Chicago, Ill.: The teamsters' strike has come to the stage where it will die a natural death, unless new life is injected into it by the strikers. Lately nothing of any importance has developed, neither side to the contrary having made any aggressive move. According to the employers involved in the trouble, they have succeeded in getting their business almost back to normal conditions and that in a very short time the strike will be a forgotten incident.

GAS AND WATER

IS ONE AS NECESSARY AS THE OTHER?

Citizens of Large Cities Say It Is. New York, June 12.—In the recent agitation here about the price of gas, the demand for lower rates was supported by the argument that every resident is as dependent upon a supply of gas as upon a supply of good water.

It has come to pass that the day laborer uses gas as his only fuel for cooking, because of economy, and the rich man uses gas on account of its convenience. Gas for lighting, with modern improvements and safety, is cheaper, better and more satisfactory than any other kind of light. Gas sells at \$1.00 per thousand cubic feet in large cities and from that to as high as \$3.00 in smaller towns.

The consumer of gas in the country uses Acetylene (pronounced a-set-ylene), and each user makes his own gas and is independent of Gas and Electric Companies. Acetylene is a more perfect illuminant than the gas sold by the big gas companies in the cities, and the cost to the smallest user is about the equivalent of city gas at 85 cents per thousand.

Acetylene is the modern artificial light, the latest addition to the many inventions that have become daily necessities. The light from an acetylene flame is soft, steady and brilliant, and in quality is only rivaled by the sun's rays. If water and a solid material known as Calcium Carbide are brought into contact, the immediate result is the making of this wonderful gas. The generation of acetylene is so simple that experience or even apparatus is not necessary to make it. It is desired to make it for practical lighting, and to keep it for immediate use, then a small machine called an "Acetylene Generator" is employed. There are many responsible concerns making acetylene generators. In practice, this gas is distributed in small pipes throughout buildings, grounds, or entire cities and towns, in the same manner as ordinary city gas. Acetylene is the only satisfactory means of lighting isolated buildings located in the country or in suburbs at a distance from city gas or electric plants.

Alaska, Terra Incognita.

We scarcely know Alaska as yet, not even the number of square miles of land and water surface. Of wholly unknown regions in the vast territory of nearly 575,000 square miles (estimated) there are three of considerable extent. The smallest embraces the great snow-covered St. Elias range, which, though by a short distance from tide water, is so inaccessible that practically nothing is known of its geography or geology. A second unexplored area lies adjacent to the Arctic coast and the international boundary, extending southward down to the Yukon basin and embracing some 40,000 square miles. A third unexplored area lies in the northwestern part of the territory, which also includes about 40,000 square miles. The Kuskokwim basin embraces 15,000 miles of unexplored country.

Flag Salute Regulation.

Lieutenant General Chaffee, chief of staff, recently made a decision regarding the proper construction of the infantry drill regulations requiring troops to "stand at attention" while the national air of "The Star Spangled Banner" is being played. He holds that the regulations do not mean that the troops shall uncover when out of doors, but it does not mean for them to uncover if indoors without side arms. The question was raised by Captain George L. Byrroade, retired, military instructor at the Culver Military Institute, Culver, Ind.

RAILROAD RATE LEGISLATION.

Testifying before the Senate Committee at Washington, Inter-State Commerce Commissioner Prouty said in discussing the proposition to give to that Commission the power to regulate railway rates: "I think the railways should make their own rates. I think they should be allowed to develop their own business. I have never advocated any law, and I am not now in favor of any law, which would put the rate making power into the hands of any commission or any court. While it may be necessary to do that some times, while that is done in some states at the present time, while it is done in some countries, I am opposed to it. . . . The railway rate is property. It is all the property that the railway has got. The rest of its property is not good for anything unless it can be charged at rate. Now it has always seemed to me that when a rate was fixed, if that rate was an unreasonable rate, it deprives the railroad company of its property pro tanto. It is not necessary that you should confiscate the property of a railroad; it is not necessary that you should say that it shall not earn three per cent or four per cent. When you put in a rate that is inherently unreasonable, you have deprived that company of its rights, of its property, and the Circuit Court of the United States has jurisdiction under the fourteenth amendment to restrain that. . . . I have looked at these cases a great many times, and I can only come to the conclusion that a railroad company is entitled to charge a fair and reasonable rate, and if any order of a commission, if any statute of a state legislature takes away that rate, the fourteenth amendment protects the railway company."

His Complaint.

First Artist—Well, old man, how is business? Second Artist—Oh, splendid! Got a commission this morning for a millionaire. Third Artist—Well, old man, you're the very man to do that for him.

Napoleon and Mothers.

A charming story is told of Napoleon which illustrated well his reverence for mothers, when he rightly regarded as the "makers of men." When his army lay at Boulogne an English sailor who had been taken prisoner tried to escape on a rude sort of skiff which he had contrived with bits of wood and the bark of trees. Hearing of the poor fellow's unsuccessful attempt, Napoleon had him brought into his presence, and he then inquired whether the man had really intended to try to cross the channel in such a frail little boat. The sailor replied that he had meant to try in order to see his mother, who was old and infirm. "You shall see her," said Napoleon, "and take her this money from me, for she must be a good mother to have such an affectionate son."

Strongest Safe Ever Made.

A safe now being made for the Premier Diamond Mine Company is intended to hold \$10,000,000 worth of diamonds. It will be the strongest safe ever constructed. Seven feet wide and weighing twenty-one tons, it will cost between \$7500 and \$10,000. The steel door alone will weigh five tons.

It Pays to Read Newspapers.

Cox, Wis., June 12.—Frank M. Russell of this place had Kidney Disease so bad that he could not walk. He tried doctors' treatment and many different remedies, but was getting worse. He was very low. He read in a newspaper how Dodd's Kidney Pills were curing cases of Kidney Trouble, Bright's Disease and Rheumatism, and thought he would try them. He took two boxes, and now he is quite well. He says: "I can now work all day, and not feel tired. Before using Dodd's Kidney Pills, I couldn't walk across the floor."

The Hedgehog's Frown.

A hedgehog curls itself up by a frown—that is, by muscles like those which produce a frown—and it frowns severely or gently, according to circumstances. If it is poked hard it "sighs" itself tighter. If really hurt it frowns into a tight ball. The prickles can be erected in a measure, though as they point all ways this is not needed. They are as sharp as needles. We have only known one dog, a large black and white setter, which would deliberately bite a hedgehog till it killed it. But this dog was quite mad and shared some of the anaesthesia common to certain lunatics.

Will Raise Milk Goats.

A newspaper man who is tired of wielding the pen (or typewriter) is going to start a great ranch on Long Island and sell milk in the Italian and German way—that is, deliver it in the goat at your house, either cellar or attic, or in the dining room while you eat. Germany has 3,000,000 milk goats, Angoras all, worth \$12,000,000. They yield milk and kids each year worth \$30,000,000, or three times their original value. Every traveler in Europe is familiar with the sturdy little animal which does not hesitate to climb to the roof of a dwelling, if need be, and allow itself to be milked. A good goat gives four or five quarts of milk a day and will subsist on any kind of old junk. And the milk is richer and freer from tuberculosis than cows milk. If kept clean it is luscious.

Poverty, a wretched state at best,

has no harder feature than the fact that it often makes men the object of ridicule or contempt.

FEED YOUNG GIRLS.

Great care should be taken at the critical period when the young girl is just merging into womanhood that the diet shall contain all that is up-building and nothing harmful. At that age the structure is being formed and if formed of a healthy, sturdy character, health and happiness will follow; on the other hand unhealthy cells may be built in and a sick condition slowly supervene which, if not checked, may ripen into a chronic disease and cause life-long suffering.

Must Have Right Food While Growing.

"I tried to use tea in its stead, but found its effects even worse than those I suffered from coffee. Then for a long time I drank milk alone at my meals, but it never helped me physically, and at last it palled on me. A friend came to the rescue with the suggestion that I try Postum Coffee. "I did so, only to find at first, that I didn't fancy it. But I had heard of so many persons who had been benefited by its use that I persevered, and when I had it brewed right found it grateful in flavor and soothing and strengthening to my stomach. I can find no words to express my feeling of what I owe to Postum Food Coffee."

The Soy Bean.

The soy bean (glycine hispida), also known as soja bean and coffee berry, is a native of southeastern Asia. This leguminous plant has been cultivated for centuries in China and Japan. In those countries it is one of the important articles of food, but as such has never found favor in the United States. In the countries mentioned it has developed many different forms and varieties. This plant was imported into England about 100 years ago, but received there no attention, and no one considered it a food plant for man or beast. It was grown for a long time in the Southern states before it attracted attention, but finally its great worth was recognized. Now it is famous.

Crops on Tiled Lands.

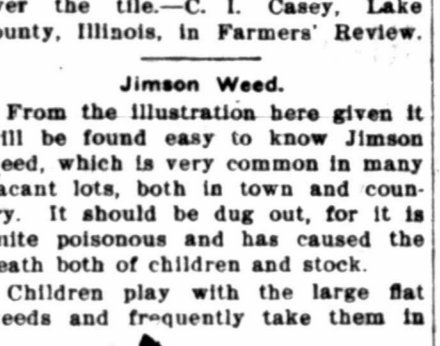

My attempt several years ago to get a catch of clover was a failure, as the clover froze out. But I sowed the clover this spring with rye and it caught. The rye was sown last fall and made a good growth over winter. The clover seed was sown this spring on the last snow, and the clover plants and the rye is a foot high. I tried to grow alfalfa and got a good start with it about seven years ago, but it killed off the winter the ground was bare of snow and the frost went in deep. That was the year my clover froze out. But since that time the alfalfa has been coming up between my fruit trees and looks thrifty. Most of my farm is now tiled.

used to have a four-acre lot in one part of the farm where there were four or five small ponds. Since the tiling that is one of the best pieces of land I have. I have had a very large crop of timothy hay here each year for the past four years.

Here is a thing I would like to have some one explain, for I cannot. There is one field where I had oats last year and through the field runs a tile drain, comparatively new. The oats were very rank directly over the drain, growing waist high. In the rest of the field the oats were very short. Now it is a fact that I carefully noted that the rank oats were badly rusted, so much so that the binder when cutting them was covered with the smut, while in the rest of the field no smut could be detected. Why were the rank oats smutty and short oats free from smut? The whole field comprised ten or eleven acres of ground and no rust was to be found except over the tile.—C. I. Casey, Lake county, Illinois, in Farmers' Review.

Jimson Weed.

From the illustration here given it will be found easy to know Jimson weed, which is very common in many vacant lots, both in town and country. It should be dug out, for it is quite poisonous and has caused the death both of children and stock. Children play with the large flat weeds and frequently take them in

Jimson weed (Datura stramonium), a flowering spray; A, fruiting capsule—both are third natural size.

Microbe of Laziness. It turns out that the "microbe of laziness" is no joke after all, but is a living actually. In his report to the legislature of the island, Dr. Bailey K. Ashford, U. S. A. states that probably 90 per cent of the rural population of Porto Rico suffer from anemia. People thought the deficiency of blood and red corpuscles and the chronic prevalence of "that tired" feeling were the result of poor food, worry, destitution, etc., but Dr. Ashford has identified the condition as the same disease as tropical animals, which is so troublesome in Mexico and elsewhere, and is caused by a parasitic worm in the intestines. The worm usually gains entrance through the skin.

Get Rid of It.

You can't scratch it off. You can't wash it off, but you can rub it off with Hunt's Cure. We mean the itch—any kind on earth. It simply kills any form of itching humor. It's worth your while and it's guaranteed.

Names Best Doctor.

MR. BAYSSON PUBLISHES RESULTS OF VALUABLE EXPERIENCE. A Former Pronounced Dyspeptic He Now Rejoices in Freedom from Miseries of Indigestion. Thousands of sufferers know that the reason why they are irritable and depressed and nervous and sleepless is because their food does not digest, but how to get rid of the difficulty is the puzzling question.

Good digestion calls for strong digestive organs, and strength comes from a supply of good rich blood. For this reason Mr. Baysson took Dr. Williams' Pink Pills for the cure of indigestion. "They have been my best doctor," he says. "I was suffering from dyspepsia. The pains in my stomach after meals were almost unbearable. My sleep was very irregular and my complexion was sallow. As the result of using eight boxes of Dr. Williams' Pink Pills, about the merits of which I learned from friends in France, I have escaped all those troubles, and am able again to take pleasure in eating."

A very simple story, but if it had not been for Dr. Williams' Pink Pills it might have been a tragic one. When discomfort begins with eating, fills up the intervals between meals with pain, and prevents sleep at night, there certainly cannot be much pleasure in living. A final general breaking down must be merely a question of time.

Mr. Joseph Baysson is a native of Aix-les-Bains, France, and now resides at No. 2489 Larkin street, San Francisco, Cal. He is one of a great number who can testify to the remarkable efficacy of Dr. Williams' Pink Pills in the treatment of obstinate disorders of the stomach. If you would get rid of nausea, pain or burning in the stomach, vertigo, nervousness, incontinence, or any of the other miseries of a dyspeptic, get rid of the weakness of the digestive organs by the use of Dr. Williams' Pink Pills. They are sold by druggists everywhere.

Proper diet is, of course, a great aid in forwarding recovery once begun, and a little book, "What to Eat and How to Eat," may be obtained by any one who makes a request for it by writing to the Dr. Williams Medical Co., Schenectady, N. Y. This valuable diet book contains an important chapter on the simplest means for the cure of constipation.

THREE YEARS AFTER.

Eugene E. Lario, of 751 Twentieth avenue, ticket seller in the Union Station, Denver, Col., says: "You are at liberty to repeat what I first stated through our Denver papers about Doan's Kidney Pills in the summer of 1898, for I have had no reason in the interim to change my opinion of the remedy. I was subject to severe attacks of backache, always aggravated if I sat long at a desk. Doan's Kidney Pills absolutely stopped my backache. I have never had a pain or a twinge since."

Forgiving.

Constance was threr. Her mother, having forgotten to do something for her which she had promised, said: "Oh, darling, I forgot it! Wasn't it naughty of me?" Constance replied consolingly, "Oh, no, mother, dear; not naughty, only stupid!"

AN AWFUL SKIN HUMOR.

Covered Head, Neck and Shoulders—Suffered Agony for Twenty-five Years Until Cured by Cuticura. "For twenty-five years I suffered agonily from a terrible humor, completely covering my head, neck and shoulders, discharging matter of such offensiveness to sight and smell that I became an object of dread. I consulted the most able doctors far and near, to no avail. Then I got Cuticura, and in a surprisingly short time I was completely cured. For this I thank Cuticura, and advise all those suffering from skin humors to get it and end their misery at once. S. P. Keyes, 149 Congress Street, Boston, Mass."

The atheist can not find God for the same reason that the thief can not find the policeman.

Get Rid of It. You can't scratch it off. You can't wash it off, but you can rub it off with Hunt's Cure. We mean the itch—any kind on earth. It simply kills any form of itching humor. It's worth your while and it's guaranteed.

Microbe of Laziness.

It turns out that the "microbe of laziness" is no joke after all, but is a living actually. In his report to the legislature of the island, Dr. Bailey K. Ashford, U. S. A. states that probably 90 per cent of the rural population of Porto Rico suffer from anemia. People thought the deficiency of blood and red corpuscles and the chronic prevalence of "that tired" feeling were the result of poor food, worry, destitution, etc., but Dr. Ashford has identified the condition as the same disease as tropical animals, which is so troublesome in Mexico and elsewhere, and is caused by a parasitic worm in the intestines. The worm usually gains entrance through the skin.

Names Best Doctor.

MR. BAYSSON PUBLISHES RESULTS OF VALUABLE EXPERIENCE. A Former Pronounced Dyspeptic He Now Rejoices in Freedom from Miseries of Indigestion. Thousands of sufferers know that the reason why they are irritable and depressed and nervous and sleepless is because their food does not digest, but how to get rid of the difficulty is the puzzling question.

Good digestion calls for strong digestive organs, and strength comes from a supply of good rich blood. For this reason Mr. Baysson took Dr. Williams' Pink Pills for the cure of indigestion. "They have been my best doctor," he says. "I was suffering from dyspepsia. The pains in my stomach after meals were almost unbearable. My sleep was very irregular and my complexion was sallow. As the result of using eight boxes of Dr. Williams' Pink Pills, about the merits of which I learned from friends in France, I have escaped all those troubles, and am able again to take pleasure in eating."

**His Health Was Wrecked  
Peruna Gave New Life.**

**HON. JOHN TIGHE.**  
Assemblyman Tighe's letter should be read by every brain worker leading a strenuous life.

Hon. John Tighe, No. 98 Remson St., Cohoes, N. Y., Member of Assembly from the Fourth district, Albany county, N. Y., writes as follows:

"Peruna has my hearty indorsement as a restorative tonic of superior merit. At times when I have been completely broken down from excess of work, so that my faculties seemed actually at a standstill, Peruna has acted as a healing restorer, starting the machinery of mind and body afresh with new life and energy."

"I recommend it to a man tired in mind and body as a tonic superior to anything I know of and well worthy serious consideration."—J. Tighe.

Excess of work so common in our country causes impaired nerves, leading to catarrh and catarrhal nervousness—a disease that is responsible for half of all nervous troubles.

Peruna cures this trouble because it cures catarrh wherever located.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving full statement of your case, and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

**Peace in the Far East  
Only a Matter of Terms.**

Tokio, June 12.—Tokio has calmly received the news of American intervention and prospective peace. The absence of assurance that Russia will accept President Roosevelt's proposal, and the knowledge that the final consummation of peace involves the adjustment of a series of questions of paramount importance, requiring the most careful diplomacy extending over weeks of negotiations, coupled with the recollection of a previous experience in the thorny path of the world's politics seem to create a disposition to await final results. There is nevertheless, the keenest satisfaction over the preliminary step and a feeling of deep gratefulness over President Roosevelt's action.

There is also genuine thankfulness at the thought that the carnage and horror and waste of war will soon end and a genuine hope that the negotiations will bring a satisfactory and enduring peace.

St. Petersburg, June 12.—There is an infinite amount of gossip here about Japan's terms, but it is almost altogether irresponsible, the best informed members of the diplomatic corps, even the British Embassy, being convinced that while the main outlines are matters of common knowledge in America and in the chancelleries of Europe, Japan has not revealed her exact terms even to her ally.

Russia is not likely to prove recalcitrant. According to the best opinion she is prepared to abandon the whole of her Manchuria adventure and give guarantees. The rub will come on the question of indemnity, which is the consensus of opinion in diplomatic circles. Japan will exact; but if it should be made moderate and sugar coated so that it could be liquidated

by the sale of the Chinese Eastern Railroad and the cession of Russian property and leases in the Kwangtung Peninsula, it might be overcome. Russia probably will insist on holding the railroad to Vladivostok through Northern Manchuria and will never submit to the humiliation of disarmament in her only port in the Pacific, nor to the inhibition against having warships in those waters.

Considering the situation of the two countries, members of the diplomatic corps feel that Japan's status in the Pacific is so firmly established that she can afford to dispense with the evocation of so bitter a condition. Though the feeling against the cession of actual territory is strong the island of Sakhalin, over which Japan and Russia once exercised co-dominion, might be ceded or as an offset to the cession of that island all fishing and other Russian rights in the Kommander Islands might be handed over to Japan.

Paris, June 12.—President's success in opening a way for peace negotiations between Russia and Japan is the one absorbing topic here, and France has forgotten her own troubles with Germany in Morocco to join in the enthusiastic approval of the American initiative. Portraits of President Roosevelt, Ambassador Meyer, Minister Takahara and Ambassador Cassini appear in all the journals, with pictures of the White House as the scene of the historic origin of the peace movement.

The comment on President Roosevelt's action is favorable, with the exception of a slight sense of disappointment that France, as the ally of Russia, has not taken a more prominent part in effecting the preliminaries.

**EIGHTEEN ARE HURT.**

**A Strenuous Day Among The Oklahomans.**

One Hundred and One Ranch, Ok., June 12.—Fifty or more yards of the mile and a quarter grand stand surrounding the exhibition arena at the 101 Ranch collapsed at 1:30 o'clock Sunday evening, eighteen persons being more or less seriously injured. The accident was witnessed by 50,000 spectators attending the entertainment.

The entertainment, including a buffalo hunt by Indians, an Indian ball game, riding and roping contests and other wild West sports, was given by the Miller brothers, owners and operators of the 101 Ranch for the benefit of the delegates attending the National Educational Association. More than a thousand newspaper men attended the sports and hundreds of these were accompanied by their wives. The excursion trains brought in thousands upon thousands from all adjoining States, while the farmers for forty miles around came in wagons and carriages.

On two different occasions while the crowds were cheering some of the pleasing numbers on the program sections of the grand stand fell and the cries of the injured could be heard above the noise of the crowd and the shouts of cowboys and Indians.

Col. Zack Mulhall was the hero of the day, at one time by breaking loose the latch that held the gate into the arena, thus freeing a herd of wild buffaloes. These animals had been turned into the chute leading into the arena. The shouts of the crowd excited them and they charged viciously through the

chute underneath the press stand, only to be stopped by the arena gates. Piling on top of one another these wild beasts broke down the chute and threatened to break through the fence into the adjoining thousands of people.

Col. Mulhall quickly realized the situation and after much effort broke the latch. A charge by the buffaloes into the crowd would have meant the injury and probable death of scores of spectators.

The large crowd was orderly and quiet, the two companies of Oklahoma National Guard and a troop of regular cavalry from Fort Sill policing the ranch. Their presence, however, was unnecessary.

There was no cruelty to animals, no intoxication and no boisterous outbreaks.

**The Roosevelts at Home.**

Richmond, Va., in the depths of the woods of Virginia President Roosevelt ate a breakfast Saturday morning cooked by his wife. President and Mrs. Roosevelt, unattended, went to their new farm Friday night and spent the night unguarded and alone. Mrs. Roosevelt arose early leaving the head of the Nation sleeping peacefully, and went down to the kitchen to prepare breakfast. Not a match was to be found in the kitchen and the President had none. Fortunately, however, a Virginia negro passed along, and from him a match was obtained, and the stove soon had a fire blazing in it.

**Bank President Given Ten Years.**

Milwaukee: Frank G. Bigelow, the could not have been recognized, but pleaded guilty to an indictment of ten counts returned by the Federal Grand Jury charging violations of the National banking law, and was sentenced by Judge Quarles to a concurrent sentence of ten years at hard labor in the Federal penitentiary at Fort Leavenworth, Kan., the sentence to date from noon Saturday.

**Old Fort Worth Packer Burned.**

Fort Worth: What is known as the old packing house plant in Fort Worth, comprising eight buildings, seven of which were built of stone and one of brick and ranging in height from one to five stories, was destroyed by fire Sunday morning. The plant when constructed in 1889, 1890, 1891 and 1892 cost something like \$450,000 and nothing is left of the once leading manufacturing enterprise—the pride of this city—but heaps of debris and a few wrecked walls.

**Camp County Goes Dry.**

Pittsburg: The prohibition election in Camp County Saturday resulted in a majority of eighty-five for the prohibitionists. This precinct went dry by 148 majority against an anti majority two years ago of sixty-one. The county went wet two years ago by sixty-eight majority.

It is with great pleasure we publish the following letters, as they convincingly prove the claim we have so many times made in our columns that Mrs.

**Mrs. Mary Dimmick**

Pinkham, of Lynn, Mass., is fully qualified to give helpful advice to sick women. Read Mrs. Dimmick's letters.

Dear Mrs. Pinkham:—  
I have been a sufferer for the past eight years with trouble which first originated from painful menstruation—the pains were excruciating, with inflammation and dislocation of the womb. The doctor says I must have an operation or I cannot live. I do not want to submit to an operation if I can possibly avoid it. I have put me to Mrs. Mary Dimmick, Washington, D. C.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in the last 30 years, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known for the same. It is a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing her work. The proprietors have so much faith in its curative powers that they offer \$100 reward for any case that it fails to cure. Send for list of testimonials. Address: F. J. HENRY & CO., Toledo, O. **Contest Notice.**  
Department of the Interior, U. S. Land  
Office at Roswell New Mexico, April  
10, 1905.  
A sufficient contest affidavit having  
been filed in this office by Newberry  
O. Jones, contestant, against Home-  
stead entry No. 3732, made February  
13, 1903, for the north west quarter of  
section 31, Twp 2 S, Range 36 E, by  
Conrad Hudspeth contestee, in which  
it is alleged that the said Conrad Hud-  
speth has wholly abandoned said tract;  
that he has changed his residence  
therefrom for more than six months  
since making said entry and next  
prior to the date of filing said affidavit,  
that said land is not settled upon and  
cultivated by said party as required by  
law, and that said alleged absence  
from the said land was not due to his  
employment in the Army, Navy or  
Marine Corps of the United States in  
time of war, said parties are hereby  
notified to appear, respond and offer  
evidence touching said allegation at 10  
o'clock a. m. on July 21, 1905, before  
W. E. Lindsey, U. S. Commissioner at  
his office in Portales, Roosevelt county,  
New Mexico, (and that final hearing  
will be held at 10 o'clock a. m. on  
August 4, 1905, before) \* the Register  
and Receiver at the United States Land  
Office in Roswell, New Mexico.  
The said contestant having, in a  
proper affidavit, filed May 24, 1905, set  
forth facts which show that after due  
diligence personal service of this notice  
cannot be made, it is hereby or-  
dered and directed that such notice  
be given by due and proper publication.

**No Secret About It.**  
It is no secret that for cuts, burns,  
ulcers, fever sores, sore eyes, boils,  
etc., nothing is so effective as Buck-  
len's Arnica salve. "It didn't take  
long to cure a bad sore I had and it is  
all O. K. for sore eyes," writes D. L.  
Gregory, of Hope, Tex. 25c at Pearce

It is estimated that nearly a  
million emigrants will arrive in  
this country this year. That  
means 200,000 more voters for  
the next congressional election  
unless the federal government  
gets to work in earnest on the  
justice shops where one year's  
residence is recognized as consti-  
tuting citizenship.

**Beyond Expression.**  
G. W. Farlow, East Florence, Ala.,  
writes: "For nearly seven years I  
was afflicted with a form of skin dis-  
ease which caused an almost un-  
bearable itching. I could neither work,  
rest or sleep in peace. Nothing gave  
me permanent relief until I tried  
Hunt's Cure. One application relieved  
me; one box cured me, and although  
a year has passed, I have stayed cured.  
I am grateful beyond expression."  
Hunt's cure is a guaranteed cure for  
all itching diseases of the skin.

Dr. Miles' Restorative Nervi-  
ne has been so successful in  
curing these brain-wrecking  
diseases that there is every  
reason to believe that even the  
most hopeless cases can be  
benefited, if not fully restored.  
We will be pleased to refer  
any one thus afflicted to many  
who now enjoy the blessing of  
health, after years of hopeless  
suffering.  
"I have a son that had brain fever  
when two years old, followed by fits of  
the worst type, and he was pronounced  
incurable. I spent hundreds of dollars  
for him, without relief. After about  
fifteen years he became so bad that we  
sent him to Longhill hospital for the  
insane, at Longmont, Ind. He was  
there nearly three years, but he con-  
tinued to grow worse, so we brought  
him home July 20, 1902, in an awful  
condition. He had lost his mind almost  
entirely. His hardy nature, one of the  
family, could not even find his bed;  
was a total wreck. He had from 15  
to 18 fits a day. We were urged to try  
Dr. Miles' Nervine, and before the first  
bottle was used, we could see a change  
for the better. We have given it to  
him ever since, and he has had but  
two very light spells since last August,  
1903, and then he was not well clear  
away. We pronounce him cured, as he  
can work and go anywhere. If any one  
wishes to ask any questions concerning  
this, they may do so by writing to me."

first bottle will benefit. If it fails, he  
will refund your money.
