'It thirsts and burns for distinction; and, if possible, it will have it. Is it infressenable, then, to expect that some men, possessed of the loftlest genius, coupled with ambition sufficient to push to the utinost stretch, will at some time spring up among us? And when such a one does, it will require the people to be united with each other, attached to the government and laws, and generally intelligent, to successfully frustrate his design.

"Distinction will be his paramount object, and although he would as willingly acquire it by doing good as harm, yet nothing left in the way of building up he would sit down boldly to the task of pulling down. Here, then, is a probable case, highly dangerous."-Frem Mr. Lincoln's Speech Before the Young Men's Lyceum, Springfield, ML

-From the Omaha Daily Bee, March 19, 1918.

home and the child.

800,000 women, embracing clubs of our modern mode of living and considered and remedies for social and economic problems are being proposed and agitated which has and will continue to revolutionize modern thought and action.

To enumerate these many interests would be impossible. One of the fireatest victories gained was the passage of the Pure Food Bill which we are all familiar with. Then the great work in civic matters has been the cause of literally hundreds of towns and cities being cleaned and made more sanitary and healthful and more beautiful with civic attractiveness. The great hygienic movement, embracing pure water, pure air, pure food, drinking fountains, ventilated school houses, everything pertaining to preservation of health has been due to this agitation. The civil service reforms, the educational committee, library extention, legislative, child labor committee which was instrumental in getting the child labor law, large philanthropic tioned.

Lawyer's Tart Remarks Not Greatly Softened by His Rejoinder

When "Called Down."

Andrew Lipscomb, who practices law before the courts of Maryland, was trying his first case before a judge named Merrick. Lipscomb, wishing to impress the judge, was, in the language of the bar, right lippy in his remarks to the eminent gentleman. Finally, Merrick lost patience and exclaimed.

"Sit down! Sit down, sir! If you don't sit down I'll fine you for contempt of court."

Lipscomb sat down, but turned to a young lawyer beside him, and remarked, in an undertone:

"That's the crustiest, most opinionated old judge I ever saw. I'll show him where he gets off. He's an old fool." "If you talk like that, I'll beat you

up!" replied the young lawyer. "He's my father!"

"How sad!" said Lipscomb, smoothly. "How sad."-Popular Magazine.

Unusual Occurrence.

Richard Harding Davis, during his Atlantic City honeymoon, said at a fish luncheon:

"I confess that I am not pleased with the modern trend of fiction. The newest fiction leaves a bad taste in the mouth. It is full of double entendre-like the parlor maid's remark.

"A gentleman came down to breakfast one morning with bloodshot eyes. He drank eight glasses of ice water hurriedly, then he muttered hoarsoly to the pretty parlor maid: "Tell me, Adele, did I reach home last night very much under the weath-

When a restaurant orchestra takes one of its occasional lapses from ragtime into a dirge some arrangement should be made to prevent the waiters from weeping into the bouillon.

Baltimore scientists propose to make a careful study of the mental affection known as "the blues." Any town that has a tail-end baseball team will be able to furnish plenty of subjects.

About the only person who does not pay according to what he receives is the bald-headed man, who is charged just as much for a hair cut as any male relative of the seven Sutherland sisters.

Southern Illinois reports a shortage of spring chickens. Stories of disaster to the peach crop of Michigan can be and are received with indifference, but this, if true, is a matter of importance.

That the lobster is becoming extinct is the foreboding of many who may be presumed to be informed on the subject, and the next generation may know it only as a human type.

"Find Well-Dressed Girl; Mind Blank," says the headline in a Chicago paper. It's easy to find well-dressed men anywhere whose minds are so near a blank that the difference isn't worth mentioning.

As lightning six times struck a castle where the reigning family of Belgium is staying with royal guests and hurt nobody, modern science will at once begin investigating whether royalty has any peculiar insulating power which might be developed for moders benefit.

The advent of the auto, many feared, would result in decreasing denands for the horse, whereas the contrary would seem to have happened, with New York state officially taking up the problem of an actual scarcity of steeds. There is still work for old Dobbin to do.

That youth is not necessarily a mat ter of years, despite the Oslerian theory, is proved by a Philadelphia woman, who at the age of seventy. four is not only preparing to wed, but is also about to take a trip to Europe sto do it.

Philadelphia women are so prone to primp that it has become necessary to remove mirrors from elevators in that city. We hope it may not be come so had that Philadelphia mer chants will be compelled to have their plate glass windows frosted.

Rings Tear Stockings.

Many women who wear silk stockings complain of small rips and broken stitches, and imagine that the stockings are faulty of make. But this is not always the difficulty. The cause of the little break often comes from running one's hand within the stockings while rings are on the fingers. These rings and the stones in them catch the tiny threads and break them, causing the damage.

An Afternoon Party.

As I have often been benefited by ered more helpful than the salt and your splendid answers, I shall appreit is best bought in crystal form. Put ciate it very much if you will kindly a teaspoonful of the crystals in a glass help me in regard to an afternoon enof bolled water, cover the glass, and tertainment. Two Queries.

Is it customary for a bridal couple more beautiful than the curves ones to go into the dining-room for reonce admired the very arched brow is freshments first, and is the groom In the soil it is the principle element inever painted at the outside end. A obliged to wear a dress suit at a seven

The bridal couple are usually served with regard to the other elements and the powder transferred to the lids first and etiquette prescribes full which make up the soil. It is from with a finger. This gives a softer and dress for a bridegroom after the hour the soil that most plants get their more blurred shadow than if lines of six. Circumstances may alter cases, but I can only tell you what custom and society demand.

Proper Wording of Cards.

When there are three sisters in a family, all unmarried, how should the visiting cards be worded and should the address be on the card of each one?-Inquirer.

The eldest daughter has simply the prefix "Miss" and the last name; the other girls use their full given names and the address is on each card. MADAME MERRI.

er? "'Indeed you did, sir,' the maid replied. 'Why, sir, you kissed the misses!" "-- Washington Star.

An Oversight.

"There has certainly been a serious miscalculation about this year." "What's that?"

"So many dreadful things are happening, and they forgot all about presaging them by a comet."

Real Worries.

"What's the trouble with the maids?"

"Servants are so silly. Seems the maid who has charge of Fido has been snubbing the maid who takes care of baby."

No Chance.

Office-What's the trouble here? Mrs. Rooney-There's no trouble! Me ould man started in to try and make some, but he found the could not do it!

THIRTEEN YEARS

Unlucky Number for Dakota Woman.

The question whether the number "13" is really more unlucky than any other number has never been entirely settled.

A So. Dak. woman, after thirteen years of misery from drinking coffee, found a way to break the "unlucky spell." Tea is just as injurious as coffee because it contains caffeine, the drug in coffee. She writes:

"For thirteen years I have been a nervous wreck from drinking coffee. My liver, stomach, heart-in fact, my whole system being actually poisoned

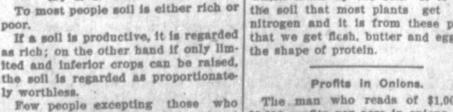

"Last year I was confined to my bed for six months. Finally it dawned on me that coffee caused the trouble. Then I began using Postum instead of coffee, but with little faith, as my mind was in such a condition that I hardly knew what to do next.

"Extreme nervousnes and failing eyesight caused me to lose all courage. In about two weeks after I quit coffee and began to use Postum I was able to read and my head felt clear. I am improving all the time and I will be a strong, well woman yet.

"I have fooled more than one person with a delicious cup of Postum. Mrs. S. wanted to know where I bought my fine coffee. I told her my grocer had it and when she found out it was Postum she has used it ever since, and her nerves are building up fine.

"My brain is strong, my nerves steady, my appetite good, and best of all, I enjoy such sound, pleasant sleep." Name given by Postum Co., Battle Creek, Mich. Get the little book in pkgs., "The Road to Wellville." "There's a reason."

Ever read the above letter? A new one sppears from time to time. They are genuine, true, and full of human

Cavendish family on raft rescue Tancy, who is apparently dead. Price breaks jail. Betty and Carrington arrive at Belle Plain. Hannibal's rifle discloses some startling things to the judge. Han-nibal and Betty meet again. Murrell ar-rive in Belle Plain. Is playing for big stakes. Yancy awakes from long dream-less sleep on board the raft. Judge Price makes startling discoveries in looking up land titles. Charley Norton, a young planter, who assists the judge, is mys-teriously assaulted. Norton informs Car-rington that Betty has promised to marry him. Norton is mysteriously shot.

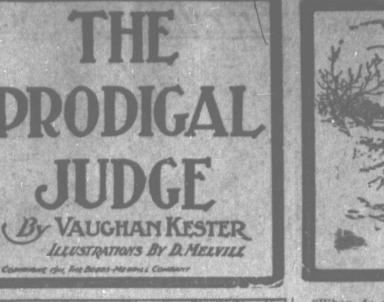

(CHAPTER XVI-(Continued).

"There you go, Price-" began Mahaffy.

"Solomon, this is no time for me to hang back. 1 shall offer a reward of five thousand dollars for this information." The judge's tone was resolute. "Yes, sir, I shall make the figure commensurate with the poignant grief 1 feel. He was my friend and client-

The next morning it was discovered that some time during the night the judge had tacked his anonymous communication on the court house door; just below it was another sheet of paper covered with bold script: "To Whom It May Concern:

"Judge Slocum Price assumes that the above was intended for him since

"When do you start south?" asked Hues quickly.

"Inside of two days. I've got some private business to settle before I leave. I'll hang round here until that's attended to."

CHAPTER XVII.

The Judge Extends His Credit. That afternoon Judge Price walked out to Belle Plain. Solomon Mahaffy had known that this was a civility Betty Malroy could by no means escape. He had been conscious of the judge's purpose from the moment it existed in the germ state, and he had striven to divert him, but his striving had been in vain, for though the judge valued Mr. Mahaffy because of certain sterling qualities which he professed to discern beneath the hard crust that made up the external man, he was not disposed to accept him as his mentor in nice matters of taste and gentlemanly feeling. He owed it to himself personally to tender his sympathy. Miss Malroy must have heard something of the honorable part he had played; surely she could not be in ignorance of the fact that the lawless element, dreading his further activities, had threatened him. She must know, too, about that reward of five thousand dollars. Certainly her grief could not blind her to the fact that he had met the situ- strainer the water bearing gravel will ation with a largeness of public spirit | permit. that was an impressive lesson to the entire community.

These were all points over which he and Mahaffy had wrangled, and he felt that his friend, in seeking to Norton had cousins somewhere in special wire strainers.

Miss Malroy needed a strong, clear brain to guide her past those difficulties his agile fancy assembled | tionable water can be cased off. in her path. He beamed on his friend determined by the depth to water and with a wide sunny smile, quantity that can be developed. "You mean she needs a lawyer, Price?" insinuated Mahaffy. DISTRIBUTION OF THE WATER

SUCCESS ON DRY LAND FARM

Most Important Factor Is Supplementary Irrigation-Practice Limited to Water Supply.

(By W. H. LAUCK, Irrigation Investiga tion, United States Department of Agriculture.)

There are many things that make for success on a dry land farm and home. The most important of these is supplementary irrigation. This does not conflict in any way with the dry land work, but rather assists by utilizing one of the resources which nature has provided. However, the extent to which the practice may be applied is limited to the water supply available.

things for the dry land farmer to ascertain is whether a water supply can be developed from the underground water, or stored during the torrential rain storms.

Where a water supply cannot be developed, the homesteader soon becomes discouraged and he abandons his claim.

The proper location for the well can often be decided upon by studying the wells in the immediate neighborhood. Where the distance is too great for this method, test holes may be put down with a two or three-inch auger and light derrick, made of 2x4-inch timbers.

The points desirable to know are: (1) Depth to water level; (2) material encountered in sinking test well; (3) amount the water lowers in the well during pumping; and (4) kind of well most desirable, whether drilled, bored or dug.

the amount of water which can be expected in the locality can be formed, tion can be practiced.

method for making the well must be decided. Where competent well drillers can be obtained, the drilled well is the most satisfactory, especially if it is necessary to go to any great depth.

The most important thing to ascerods, is the size of perforations in the

This can be determined in the test hole or the neighboring wells.

The openings of the strainer should be equal to 10 or 12 times the cross sectional area of the casing or suffikeep him away from Belle Plain, was clent, if possible, to allow the water to standing squarely in his light. He pass through into the well as readily really could not understand Solomon as through the water-bearing gravel or his objections. He pointed out or stratum. objection to it.

The Landlady-Now, as to my table, you get nothing but real, genuine home cooking.

Mr. Newlywed-Won't do. We're breaking up housekeeping just to avoid home cooking.

Cold Blooded and Death Dealing CHILLS. Cheatham's Chill Tonic is the only medicine which has entirely cured me of chills. After spending a great deal of money for several years to get cured, I bought and used your Cheatham's Chill Tonic which cured me and also two of my children. I recommend it to all as the best Chill Tonic I ever saw, says Mr. T. J. House of Bulcher, Texas. Guaranteed to cure malaria or price promptly refunded. All dealers sell it in 50c bottles. Mfd. by A. B. Richards Medicine Company, Sherman, Texas.

Keeping Water Cold.

If you are in the habit of taking a pitcher of iced water to your room on retiring, try this: Procure a square pasteboard box (with lid) sufficiently large to hold your pitcher, and give it two or three coats of varnish on the outside, allowing each coat to dry thoroughly. Place your pitcher of water in this box on retiring, putting the lid on tightly, and you are sure of having cold drinking water any hour of the night.

TO DEIVE OUT MALARIA AND BUILD UF THE STRTEM Take the Old Standard GROVE'S TASTELISS CHILL TONIC. For know what you are taking. The formula is plainly printed on every bottla, showing it is simply Quinne and Iron in a tastelens form, and the most effectual form. For grown manufe and children fit cents.

Lucky Woman.

Wife-There are so very few really good men in the world.

Hub-Yes; you were mighty lucky to get one.

mechanical operations become resolved into one unit of effort.

All the energy of this machine is concentrated on the type face the moment it touches the paper.

Smoothness and harmony of working parts are achieved through a wonderful system of ball-bearings.

Vibration and jamming of the typebars are made impossible by the Typebar Guide. - Other new features are the Geared Carriage-Ball Controller and the Ribbon Color-Switch.

Model Five has a certain crispness and vitality of key-operation that is a delight and a help to the operator.

Write for the FREE Book of Model Five.

L. C. Smith & Bros. Typewriter Company Head Office for Domestic and Foreign Business-Syracuse, N.Y., U.S.A. Branches in All Principal Cities. DENVER BRANCH----1647 Champa Street, Denver, Colorado

In this little bottle are 30,000 steel balls, every one of which has been tested and found to vary not one ten-thousandth of an inch. Fifteen balls are used in the bearings of every typebar. This attention to minute detail means efficiency for the finished product.

Your Breakfast Room Made Comfortable With Fuel Supplied the Night Before

Cole's Hot Blast Heater maintains a continuous fire - also a steady even heat. It will hold fire from Saturday night until Monday morning (48 hours) without attention. It will hold fire over night with less coal than any other stove.

Open the drafts in the morning and the rooms are quickly heated with the fuel put in the night before. No other stove does this.

Burns Soft Coal, Slack, Siftings, Hard Coal or Lignite. One ton of either kind of fuel goes further and gives you more comfort than two tons, using any other kind or make of stove.

Your attention is called to the unparalleled statement made by the manufacturer of

Cole's Hot Blast Heating Stove

"For several years we have authorized our Agents to sell Cole's Original Hot Blast Heater on the guarantee as follows:

"1-A saving of one-third in fuel over any lower draft stove of the same size, with soft coal, slack or lignite.

"2-That Cole's Hot Blast will use less hard coal for heating a given space than any base burner made with the same size fire pot.

"3-That the rooms can be heated from one to two hours each morning with the soft coal or hard coal put in the stove the evening before.

"4-That the stove will hold fire with soft coal from Saturday night until Monday morning.

"5-A uniform heat day and night, with soft coal, hard coal or lignite. '6-That every stove will remain absolutely air-tight as long as used. "7-That the feed-door is and will remain smoke and dust-proof. "8-That the Anti-Puffing Draft will prevent puffing.

"All we ask is that the stove shall be operated according to directions and connected with a good flue.

"(Signed) COLE MANUFACTURING CO., Not Inc." (Makers of the Original Patented Hot Blast Stove.)

Practice of Marrowing and Loosening Surface Can Be Employed to Advantage by Farmer.

(By E. B. HOUSE, Colorado Experiment Station.) It is a well-known fact that ground which is kept loose on top will evap-

orate much less water than a soil which is packed on top. The moisture which escaped into the air is absolutely lost, so far as the plants growing in that particular field are concerned, and if anything can be done to hold this moisture in the ground so that it may reach the roots of the growing crop, it is of course the thing to strive for, and will prove a benefit to the plant growing in the field.

Some years ago one of the representatives from the Agricultural college was visiting an up-to-date farmer in the country, and the farmer showed him a field of wheat which illustrated this harrowing in a remarkable manner.

A storm had passed over that section of the country and about one and a half inches of rain had failen. It had been a dashing shower and had packed the surface of the ground considerably The grain was from four to six inches high, and the farmer had. been advised to harrow the ground to prevent evaporation. He sent his hired man to do the work, who hitch, ed on to the harrow and dragged it diagonally across the field of wheat, and then around the outside of the field some five or six times. He then became disgusted with the work because it appeared that he was dragging out so much of the grain and reported the fact to the farmer, who or-

dered the work discontinued. By the time the grain had headed the marks of the harrowed sections could be plainly seen. The place where it had been dragged diagonally across the field produced grain at least eight or ten inches higher than that on either side which had not been harrowed, and along the edges of the field the grain was in a like condition. The grain of the field that had not been touched by the harrow was not to be compared with the harrowed grain, either in appearance, size of plants or heads of grain. The yield from the harrowed portion was practically double that from the unharrowed portion.

It simply shows that the harrowing and loosening of the surface soil, even though it did destroy some of the plants, conserved the moisture and benefited those plants that were left in such a marked degree that it matefield, and shows that this practice could be employed to advantage by all farmers.

"Y" Shaped Wire Frame Holds Spike of Toy Until Sufficient Momentum Is Acquired.

An ingenius little device for spinning a top has been designed by a Colorado man. It remains to be seen, however, if the top can be spun any better than the average small boy can do by carefully winding his cord up and spinning his top by hand. A Y shaped wire frame has recesses at the snds of the arms to receive the spike A bit of chears would be a t of the top and a spindle projecting from the head. Below this spindle is a circular groove around which the whereon she might feed herself, When suddenly she said, "What's that?" cord fits, but it is not necessary to It sounds like a great big Tom cat." wind the cord up. Just loop the cord around this groove once, leaving one And sure enough, 'tis sad to say, An old Tom cat had come that way,

ALL ABOUT THE PHILOSOPHER

Short Essay Evidently Written by One Familiar With This Species of Animal,

A philosopher is a man, and rarely a woman, who, having nothing to do and being glad of it, puts in his time explaining the reason that other peo-

ple should have for doing things. Philosophers are not popular be cause, in the first place, most men are too busy to listen to them, and, in the second place, they are satisfied with their own reason for doing things. Nevertheless, philosophers are wont to gravitate toward comfortable stoves in corner groceries, where men of varying leisures straggle in and towards comfortable chairs in universities where helpless youth are com-

PICKED OUT THE WRONG EYE

Physician Meant Well Enough but He Had Left the Motorman Seriously Handicapped.

Frank E. Payne, a member of the state railroad commission, said when investigating a trolley accident recently, he was told of a motorman on a work car who was running at high speed when the trucks left the rails because of snow and sleet, and the car was thrown on the side of the right of way, bringing up against a telephone pole.

"The motorman was -not seriously hurt, but was cut and bruised about the head and face by flying glass. He was carried to a physician's office where his wounds were dressed and bandaged. When the physician had placed the last pin, he asked the wounded man if he felt like he could walk

"'Sure, I can walk all right,' re-I began to take Lyturned the patient, 'but I wish you dia E. Pinkham's would fix those bandages so I can remedies, and I don't see.

> "'Why, man,' returned the physician, I left one of your eyes uncovered for the purpose."

'But, doc, that eye you left uncovered is a glass one." .-- Indianapolis News.

ity on appendicitis, isn't he? Digson-High! Well, I should say so. Why, he charges \$700 for each operation he performs.

HAIR CAME OUT BY HANDFUL

58 Lewis St., Nashville, Tenn.-About three years ago I had the malaria fever, and when I recovered my hair was falling out so that the doctor told me to cut it off. My hair came out by the handful, and I had dandruff so that I had to scratch it out every week, and my scalp itched so that I pulled my hair all down trying to

 Δ

. DOUCLAS

you repeat it to your friends, becaus if they know it is not true they may laugh at your credulity and you will get a reputation for being either unreliable or gullible.

Some years ago there was a paragraph going the rounds of the papers and magazines saying that any boy who wanted to cut glass and did not own a glazier's diamond could cut it with a pair of stout scissors if he was careful to hold the glass and the scissors completely under water. The same thing is still to be found in some of the books on scientific experiments. The reason alleged was that it is the vibration of the glass that shatters it, but that when both the glass and the scissors were held completely under water the water stopped this vibration. That this is not true any boy could have found out in five minutes by trying the experiment with an old negative. Glass and marble have to be cut in the same way, by making a slight crack on one surface and then breaking it.

ODD STUDY IN PERSPECTIVE

Many Things Young Artist Finds Difficult to Solve-Peculiar Illusion is Shown.

There are many things about perspective which are very puzzling. Young artists find much trouble in away. getting the perspective in their drawings to come out right, and sometimes we even find errors of this sort you lick with a stick and the other you in the work of trained artists.

The optical illusion in the picture is due to the defective drawing of the peaceful letter in the alphabet? Betwo men on the platform. In actual size upon the paper the further man looks much taller than the other. -man going upstairs and a man look-Measurement, however, shows the figures to be exactly of a height. The the other stares up steps.

An Illusion in Perspective.

1

illusion is due to the fact that the head of the further man is out of perspective. If he is about as tall as the other, and on level ground, both heads should be on the same line As drawn, he is, in fact, a monster more than eight feet high.

Making a Horse.

toss in a shell, press the button and-"PULL." The side bolt makes it easy. You don't have to tug at the barrel or watch an on-and-off device. The action stays open after each single shot is fired .- It always stays open when the magazine is empty. Five shots-three to get the cripples-each under absolute control of the trigger finger. The recoil reloads for you-kicks another shell in; takes the strain off the gun-the discomfort out of the kick-all without diminishing the drive behind the shot.

EMINGTO

Simple take-down-a few turns of the readily handled magazine screw-cap makes cleaning, carrying and interchange of barrels quick and easy.

Send for a motion picture booklet telling how the kick is used-how a friction device found only on the Remington-UMC Autoloading Shotgun takes the punishment out of heavy loads.

President's Annual Address to the Portales Woman's Club.

[Continued]

many more progressive dinners, it is my desire to do right, recuits and coffee in abundance, right because it is right to do and where the money comes right. Let us combine our efrolling in. We hope, also, to forts and make this year pleasenjoy the splendid coming lecture ant, enjoyable, and productive course which this committee has of good results. We cannot tell so bravely undertaken.

Mrs. Hardy, We hope to have the pleasure of attending many social functions in the club, which we consider necessary in the general order of things, and where beautiful gowns and and varied experience, its pleashandsome dress suits will attract and please our artistic tastes, and where wit and humor is not wanting.

With our energetic Mrs. Coe Howard, we want to be ever ready to extend the oourtesies of this club to all strangers and new people who may come among us, and to see that this committee performs well its duties, which is to be extremely nice to all club women and their friends.

With our practical and untiring Mrs. Hightower at the head of our finances, we hope to ever see our treasury in a flourishing sacred professions of friendship. condition, and to learn the art My friends, again I thank you. of making one dollar do the work of two. We are impressed more and more with the fact that money is the most necessary article of modern times.

sincerely hope, first, to go with during the past few months. I what the future may bring to

> time, when the evening of life has come to us, and the long shadows of remembrance fall across our pathway, we hope the club of 1912, with its strange ures and its joy, with its sorrows and its pain, with its understandings and its misunderstandings.

ity; the year in which seemed the alter of prayer and resignafaith triumphant, with more wisdom and a better understanding and a predominent desire to still stand loyal to truth and the
