PITCHING SWINGS THE GAME FOR WHITE SOX

CONSKEY PARK, CHICAGO, Oct. 3.-Kerr's phenor at pitching gave the White Sox the victory in the third world's series game today, 3 to 0.

Kerr allowed the Cincinnati Reds three hits, scat tered through as many innings, and one base on balls At no time during the entire game were the Reds even in a dangerous position to score. Fisher pitched fair ball for Cincinnati, but his fielding was not so good, an error by him being a contributing Cactor in the White Sox scoring. The White Sox, however, obtained seven hits and several of them at fairly opportune times.

The game in detail: FIRST INNIING.

GOOD BECAUSE PURE

FEDERAL WHITE BREAD—15c a pound and a half loaf—contains no substitutes. And every material is just what the careful housewife would select for her own baking. The flour is laboratory tested to make doubly sure that only a very high grade is used. Quality cane sugar, fine table salt and rich whole milk add to the food value.

Then all these things are so handled in the mixing and baking that their full worth is retained. For both children and older folks. FED-ERAL BREAD holds a wealth of nourishment and a welcome appeal for the appetite.

Am The Cause Of

The High Cost Of Shoes

Cattle Are Not Slaughtered for Hides---Th Are Killed Only for the Sale of Beef

The Entire Leather Industry is Based on a "By-Prod

Hides are distinctively a "by-product," and do not follow the ordinary operation of the law of supply and demand.

It happens to be a fact beyond the control of the tanners and shoe manufacturers that during many years past the per capita consumption of beef has DECREASED, while the per capita consumption of leather has INCREASED. As the condition prevailed to a greater and greater extent continuously, it naturally threw the price of hides away up.

The Slaughter of Cattle Has Decreased

The accompanying table, compiled by the U. S. Government, very clearly shows how the slaughter of cattle has decreased while the population of the country has increased.

As hides become more and more scarce and the demand for leather products becomes more insistent, it is only natural that the price of hides should mount higher and higher. This, in turn, raises the price all along the line. It is an inevitable chain of unavoidable conditions for which no human agency is to blame.
