

TEX RICKARD HEADS \$1,250,000 OIL COMPANY--THE NORTHERN TEXAS

GULF MAKES BIG GUSHER OF PERKINS

Gulf Production Company's Calvin Perkins No. 2, which has been a lime well, making 300 barrels, and which increased to 350 barrels a foot in the pay, is a 3,000-barrel well, eight feet in the pay, which runs from 3,535 to 3,543 feet. It is the first big well on the tract, though No. 5, which caught fire, showed for a 1,500-barrel well until it started caving while burning. It is not producing now, but rigging up to clean out. The Perkins tract is seven miles west, just north of the Eli Perkins tract that Root, Hupp & Duff and the Porter Wertz syndicate are developing.

Good Oil Company's J. O. Sue, a mile northwest of Olden, just west of the Magnolia Company's W. A. Harris lease, is a 1,000-barrel well, with pay from 3,505 to 3,520 feet.

Sun Company's Lauderdale No. 8 is a lime well, making 250 barrels, with pay from 3,394 to 3,400 feet. The Humble Oil & Refining Company's McCord No. 1 is worth 800 barrels, after a shot from 3,500 to 3,530 feet. The Sun's Maynard No. 3, also in the lime, is making fifty barrels, from 3,315 to 3,400 feet.

Texas Pacific Coal & Oil Company's W. E. McCleskey has a sand from 3,330 to 3,360 feet and is standing 700 feet in fluid. The P. O. Ranch, shot with forty quarts, from 3,175 to 3,185 feet, bridged and is cleaning out.

Fuel for several operations in the north Caddo field will be supplied by Coody No. 8 of the Sinclair Gulf, which struck an 8,000,000-foot flow of gas at 2,995 feet and will be braden-headed and drilled ahead.

Right here in Ranger, the Imperial Oil & Development Company took another shot at the Parrish Saturday, at 3,175 feet, four feet lower than the last shot. The jolt was gentle, ten quarts of gelatine, to jar loose the tools, which have been in the hole several months.

ENGLAND WILL FORM GUARDS OF CITIZENS

LONDON, Oct. 4.—Premier Lloyd George's appeal for the formation of citizen guards throughout the country in the emergency caused by the railroad strike and its possible spread met with a prompt response on all sides today. The Lord Mayor of London lost no time in complying with the request and his example was followed by other lords mayors, lord lieutenants, chairmen of county officials, watch committees, chief constables, and town clerks the country over. Representative committees were formed everywhere to recruit the guard whose duties will be to assist the police in the protection of citizens engaged in the maintenance of the supply of food and otherwise to preserve order. Both of the leaders expressed the hope that mediation would still be found possible. Even the executive officers of the railroad men preferably have decided to abandon the campaign of search making throughout the country districts they had planned.

BODIES OF TWO LOST AVIATORS ARE LOCATED

NOGALES, Ariz., Oct. 4.—The War Department has requested the Navy Department to send a boat to Los Animas Bay, Mexico, to bring back the bodies of Lieutenants Connolly and Waterhouse, American aviators, who were lost while patrolling the Mexican border. It was announced unofficially by military officials here today. Joseph Allen Richards, an American railroad man, arrived here recently from the interior, and stated he had located the bodies of the two aviators near Los Animas Bay. He is remaining here to assist in relocating the graves of the American aviators at the request of military authorities.

TROOPS TO BE WITHDRAWN FROM ARKANSAS

HELENA, Ark., Oct. 4.—Normal conditions having been virtually restored following the negro uprising, eighteen miles south of Helena last Tuesday, it was announced tonight by authorities at Helena, hotbed of the disorder, that the 500 troops on duty in the county probably will be returned to Camp Pike Monday.

The announcement added that quiet prevailed in southern Philip county, in which Elaine is situated. Approximately 225 negroes, several of whom are women, were being held at Elaine today, according to army officers in charge. It was explained that a large number of these probably would be released before Sunday night, since the majority were in custody merely for purposes of questioning and investigation of character.

As rapidly as leaders, agitators and possible informants are discovered they are forwarded to the county jail here. Including men taken locally for investigation it was estimated that about sixty were held. It is declared there has been a noticeable diminution in disturbances since the apprehension the last few days of three ringleaders.

White casualties as a result of the disorder total five dead, including one soldier, and five wounded, one of these a leader. All of the latter were reported to have recovered. Two soldiers had suffered injuries, one from an accidental pistol shot and the other through a ball from a gun.

Of the negroes, the known dead was fourteen and wounded eight, although prisoners declare more than twenty-five have been killed and many wounded.

Business was suspended in Helena one hour today by both negroes and whites during the funeral services for the last of the local white dead to be buried.

Patrols continued to scour the canebrakes and underbrush today. Many negroes, it was said, were voluntarily presenting themselves at military headquarters.

3 MEN SHOT; TRY TO STOP STREET CARS

OAKLAND, Cal., Oct. 4.—Three men were shot, none fatally, and two more injured today, as the result of an attempt to prevent the operation of street cars on the lines of the San Francisco-Oakland terminal railway. The platform men of the company struck Wednesday.

Big Promoter on Third Venture in This Field

Tex Rickard heads a new oil company—a million and a quarter corporation. In his private car, on a siding at Tiffin, he made the first public announcement of it to a Times reporter Saturday night.

It is the Northern Texas Oil company, incorporated under the laws of the state of Delaware, with permission to do business in Texas. It has purchased 500 acres from the Heenan & Coe interests, in the Ranger field and adjoining territory. It will start seven to eight wells at once. The officers are: Tex Rickard, president; Charles R. Frambach of 25 Broad street, New York City, vice president; H. C. Erickson, secretary, and W. J. Palmer of the firm of Trippe & Co., 15 Broad street, New York City, treasurer. Walters Giles of Trippe & Co. is a director and heavy stockholder. All stock of the company has been subscribed.

The Rickard-Texas company was Tex's first venture in the oil business and in the West Texas field. It was a \$600,000 concern and the stock for it was subscribed in one day after Tex opened the sale in New York. The second, the Vulcan Oil company, of which Frank C. Armstrong, Mr. Rickard's associate, is president, is a \$2,500,000 concern, taking over for development 1,200 acres of the Texas-Pacific Coal & Oil company's holdings. It was launched in July. This third venture makes the total that Mr. Rickard and his associates have brought to the development of this section \$4,500,000.

Payment for the Heenan & Coe interests was made partly in cash and partly in stock in the new company. The substantial payment was not disclosed. Part of the holdings of the new company are the 80-acre Woods tract, east of Ranger; a half interest in the 138-acre Williams tract, north of the Prairie's Barnes lease, four miles northwest of Ranger; eighty acres of inside territory in the Sipe Springs district; seventy-five acres of the Hamilton tract, at Desdemona; the Pope tract, south of Eastland, in territory now starting to produce; twelve acres in the Dennison tract, north of Ranger.

Mr. Rickard will be in Ranger ten days, completing the transfer of the oil lands of the Northern Texas Oil company and preparing for the new operations. With him on the trip are his associate, Frank C. Armstrong, and J. G. Hopkins, director of the Rickard-Texas and Vulcan Oil companies and president of the Arizona Copper company.

SENATE WILL HASTEN VOTE ON TREATY

WASHINGTON, Oct. 4.—The trend of developments today in the peace treaty situation still was toward rapid progress on amendments and reservations. The Senate was not in session but leaders held numerous conferences. The Shantung amendment is to be taken up formally Monday and Republican leaders thought it possible that all amendments could be disposed of on consideration and reservations begun in a week or ten days. A movement to have a definite date fixed for the vote on the Shantung amendment was made today by Senator Kenyon, (Republican) Iowa, chairman of the Senate labor committee which is investigating the steel strike. The committee wishes to visit the strike district next Monday and Senator Kenyon said he would try to arrange for a formal vote on the amendment Wednesday or Thursday.

FOREIGNERS PLANNED THE STEEL STRIKE

WASHINGTON, Oct. 4.—Activities of union organizers in the field districts before the present strike was called had "all the elements of a conspiracy," J. T. Davies of Newcastle, Pa., today told the senate committee investigating the strike. Foreign workers in some places, he said, expected it to result in a soviet operation of the mills. "These men grew mysteriously about the plant," declared Davies, who said he represented 5,000 workers. "We see clearly that they intended to cripple the plant and paralyze operations." "These foreigners explained that they were going to get a 'closed shop.'" "President Wilson and President Gompers," they all say, "are with us." "You Americans can't work here afterwards; nothing but union men."

George L. "Tex" Rickard Talks of Oil Operations, Bouts, 'N Sporting Clubs

Tex Rickard perched on the rail of the back platform of his private car on the siding at Tiffin, with his heels hooked in the iron lattice, and talked of millions with the same ease and grace with which a reporter talks of the high price of low grade oil. "Tex, or George L., as it would be in the family Bible at Hamlet, if there is a family Bible at Hamlet, talked with the enthusiasm of the player in a big game—for as such he regards the oil business."

Sharply defined in the slashing moonlight, off in the distance the black height of a derrick pointed toward the little point of light above its crownblock symbolic of the "game" whereof he spoke.

"Great section this—best in the world—not only this immediate field but the field adjoining here. Good game! We'll drill seven 'cicks' well right away, this new country." He savored and his listener tried to multiply \$50,000 by seven 't' eight and not slightly dizzy. "Stock of a million 'n' quarter subscribed in full, makes four 'n' half million our companies ought to be here," George L. continued, while the other man on the platform held onto the rail.

"How long you had a newspaper here?—it's a real paper, it is. Got it in New York," and his listener breathed again, a deep breath of pride.

"The whole world is looking at Ranger. It's like the old mining boom, and not like them." "Like Goldfield?" "I asked. "Without the drinking and gambling," was George L.'s reply. "It's the same without the hon-ton. The men are making better money than they were in Goldfield. As his money as they were in the Klondike in the early days of Alaska."

He talked awhile of his newest venture, the Northern Texas Oil Company, and of the Rickard-Texas Oil Company and the Vulcan Oil Company, headed by his associate, Frank Armstrong. Not, however, at length, but in brief sentences, mostly in answer to questions. Then the talk turned to fight and motion and the recent, and for Mr. Willard, disastrous, clash at Toledo. "More action in those three rounds than in any fifteen-round match of heavyweights I ever saw," offered George L., who engineered the match.

PRES. BETTER BUT CRISIS IS NOT YET OVER

WASHINGTON, Oct. 4.—Continued improvement was reported in Rear Admiral Grayson's night bulletin which declared President Wilson had passed a more encouraging day although the improvement was not decisive. The bulletin issued at 10:20 p. m. was as follows: "The President has passed a more encouraging day. The improvement is slight, but not decisive." Dr. Grayson indicated that he felt much encouraged by the day's progress. The day was oppressively hot and the fact that the president had more than held his own despite his respiratory affliction resulting from influenza was taken as a hopeful sign.

A good night's rest, one of the few Mr. Wilson has been able to enjoy since his illness began, was credited with aiding materially in restoring strength and cheerfulness. During the day the president was able to take additional rest but he was kept in bed and under almost constant observation by his physicians. The specialists called in by Dr. Grayson again made a thorough examination and consulted for an hour over the President's condition. They made no announcement but indicated general satisfaction with the progress being made. With all of Mr. Wilson's immediate family at the White House, scores of other persons, including many officials and diplomats called at the executive offices to express their sympathy and their hope for a speedy recovery. Many messages of similar nature were received by wire, some of them coming from foreign countries. No one except members of the family were permitted to see the president, however, and it was said that for a few days at least the rule of absolute quiet would be enforced rigidly. Hope never was abandoned that he would be able to take an active part in the industrial and labor conference called by him to meet here during the coming week, but some White House officials thought he might be permitted, should his condition continue to improve, to give a few minutes a day to important legislative matters, likely to be ready for his signature soon. Among the bills which may be sent to the White House by Congress during the coming week, are those providing for prohibition enforcement, for restoration of the rate-making powers of the Interstate Commerce Commission; for revision of the new control act; and for continuation of work on the Alaskan railroad. Although the measures automatically would become law ten days after final passage, should the president fail to act which is possible, he may be permitted by Dr. Grayson to affix his signature to them. Again today the President's heart action was declared to be good and his mind keen, symptoms in which his physicians placed much reliance. His pulse was said to be normal and there was no fever.

BOSTON, Oct. 4.—John Purcell, mail dispatcher at South Station, risked possible injury when he stopped the Federal Express to Washington to expedite the delivery of a package of medicine for President Wilson last night. A messenger shouted, "Medicine for the President," as he dashed into the mail room. The express was then pulling out of the trainshed and Purcell ran across the network of dark tracks and posted himself in the glare of the oncoming engine headlight. The train was delayed two minutes. The parcel was addressed to Dr. Grayson and marked, "Urgent, Special Delivery."

Tex Rickard glanced off toward the derrick in the moonlight. "Great game," he murmured, speaking of fights, of sporting clubs, or of the oil business.

MAJOR KILLED, LIEUT. INJURED, IN PLANE FALL

MIDDLETOWN, N. Y., Oct. 4.—Major Cadrick Friswell was killed and Second Lieutenant Gerald E. Ballard seriously injured when an airplane in which they were flying crashed to the ground on Prospect Mountain, a few miles from here today. Both officers were stationed at the army aviation field in Indianapolis and they were flying to Binghamton to take part in the transcontinental air race next Wednesday. They were flying a de Havilland "blue-bird" machine.

"INSTIGATOR" CAUGHT. HELENA, Ark., Oct. 4.—E. E. Powell, designated in literature of the Progressive Farmers and Household Union of America as "employed in the United States service," has been apprehended at Arkansas City according to word received at the sheriff's office here today.

REDS NEED ONLY 2 MORE GAMES NOW

CHICAGO, Oct. 4.—Cincinnati now needs but two more games to bring the world championship flag to the banks of the Ohio. Chief Moran's National leaguers today defeated the Chicago White Sox in the fourth game of the series, 2 to 0.

The path ahead of the American leaguers is strewn with rocks for they must win four of the remaining games to win the title and dare lose only one if the series is not to end in favor of the Reds.

Today's defeat was a sore blow to the locals, for they had hopes that as the Reds had won two straight games on their home grounds, the Sox would do likewise. The 3 to 0 win of the locals yesterday roused enthusiasm to a high pitch and the attendance today—34,363—heaviest of the series, attested the aspirations of Chicagoans.

Eddie Cicotte, who was driven out of the box in the opening game at Cincinnati, where he suffered the most humiliating defeat of his career, elected to retrieve his renown today, but while he held the reds to five hits and issued no passes, two of those hits came in the fifth inning and he helped himself in that inning made two errors, which proved disastrous.

How It Happened. The day had been hot up to the moment the announcer, having parked himself on second base, announced with marked formality that "Mister" Naillia, "Mister" Guigley, "Mister" Evans and "Mister" Righter would do the umpiring, and a vendor was shouting facetiously that "You can't tell the umpires without a program," but at that moment, as if someone had opened an ice box, there was a cold blast which remained throughout the rest of the day as spectators quickly hustled back for their coats and rechecked their slats. The bleacherites tore paper and tossed it into the breeze until looked like a snowstorm.

Cicotte was cheered as he walked to the mound, more in hope than in expectation, arising there was a noticeable silence as Rath, the first man up, singled to short left. Dabbert, however, hit into a double play and Risberg went out and played left field long enough to gather in Groh's exaggerated pop.

NORTH DAKOTA PAPER IS SUED FOR \$50,000

FARGO, N. D., Oct. 4.—Attorney General William Langer, of North Dakota, today filed suit for \$50,000 damages against the Fargo Courier-News. Mr. Langer charges he was libeled by the publication recently in an article stating that he had gone to Minneapolis and had demanded from "Minneapolis big business interests" control of a "rush" fund which such interests are alleged to have raised for opposing the national non-partisan league. The league's action, printed by the paper, is declared unsatisfactory in Mr. Langer's view.

FORMER RAILROAD OFFICIALS CHARGED WITH BURGLARY. ST. LOUIS, Oct. 4.—Richard McCulloch and Bruce Cameron, former president and superintendent of transportation, respectively, of the United Railway company here, were jointly charged with second degree burglary in an indictment returned today.

"OUTCASTS OF POKER FLAT" LATEST UNIVERSAL DRAMA

Francis Bret Harte, the great American narrator of western stories, never for a moment surmised that any of his writings would be pictured in the years to come and the most noted of his characters in his books would appear in flesh and blood.

Into the immortal story, "The Outcasts of Poker Flat," adapted for the screen by the Universal, under the direction of Jack Ford, has been breathed the breath of life and of happiness. Fortunately its leading masculine part is in the hands of one of America's greatest screen stars, Harry Carey, whose delineation of western roles has made his name a household word. In the story proper, Carey depicts the role of John Oakhurst, the famous character in Harte's book—the gentleman gambler who sacrificed first his heart and then his very existence that others might be happy and live. In the prologue and epilogue Carey is seen as "Square Shooter" Lanyon, an Arizona cowboy whose life seems to parallel that of John Oakhurst of Harte's story; but Lanyon's happiness comes, where John Oakhurst's was denied.

REDS NEED ONLY 2 MORE GAMES NOW

CONTINUED FROM PAGE ONE

half also, with Ring showing a world of speed which kept the locals popping them up so fast it looked dangerous for the aviator, who rarely went far from the field. Liebold, first up for the Sox, sent up a high one, which drifted in the breeze so that Daubert was kept hopping backward some time before he grabbed it. Collins popped up to Rath, while Duncan raced back and gathered in Weaver's long fly in brilliant fashion.

In the second Cicotte's twisters couldn't be kept on the ground, Roush, Duncan and Kopf flying out in order. In their half the Sox appeared more threatening than at any other period. Joe Jackson, who regards hairpins as the ultimate in bringing good luck, carried four new ones as he came to bat, and the hairpins delivered a clean double to center. Felsch sent him to third by the sacrificial route and the stands went wild with delight. Gandil, however, retired on a fly to Groh. Then Ring did one of two things: Either became wild or played a bit of the most daring strategy, for he walked both Risberg and Schalk, filling the bases. This brought Cicotte to the plate. The crowd generally commented that it was his opportunity to win his own game, but his desperate swing caught the ball far up the handle and he was out at first, thus dissolving one of the locals two chances to score.

The next opportunity came in the succeeding round. Liebold lined to right along the foul line, but Neale, by a magnificent run, captured it with a catch that was sheer banditry. Collins was hit by the pitcher and tore down to second when Weaver grounded out to Daubert, unassisted. Jackson hit to Rath, who camped on first while Rath was juggling the ball and making a hurried throw. Collins meanwhile reaching third. Felsch, however, was unable to produce a hit and another local hope was interred.

The Sox never threatened again, save remotely in the fifth when Groh, erring a wild heave to first placed Liebold on second with one down. Groh made a wonderful stop of Collins' hard hit ball and Liebold was run down between second and third. Weaver's out ended the rally.

Ring thereafter held the game in the palm of his hand, with his finger crossed. He allowed one more hit in the sixth, a base on balls in the seventh, another hit in the eighth and his last pass in the ninth, but these outcroppings never gave the reds a moment's real worry.

The story of the Red victory belongs to the fifth inning. In no other round did they get a runner past the initial sack. Sharp fielding, Cicotte's sterling pitching, and two sharp double plays tell the story in the innings other than the fifth.

Roush started this momentous round by dumping the ball in front of the plate, and was out at first on a hair-line decision. Durban bounced an awkward one toward Weaver, and Cicotte grabbed it, but in his haste threw a fathom over Gandil's head. That started the debacle. Schalk, who gets into nearly every play, retrieved the ball, but Duncan was safe on second. The timeliness of the Red's hitting, evident in all of the games which they have won, was again in evidence. Kopf singled to short left, Jackson taking the ball on the bound as he ran forward. Duncan was tearing for the plate. Jackson threw perfectly for the plate and it looked a certain out, when Cicotte, whose nerves, by reason of his previous error, seemed to be out for an altitude record, imposed his mitt, evidently to make a save on Kopf, and deflected the ball. Duncan counted, and Kopf established himself on third. Neale then doubled just out of reach of Jackson, scoring Kopf. Wings and Ring grounded out, ending the inning and the scoring.

The fifth game of the series will be played here tomorrow and the sixth in Cincinnati Monday, unless the weather man interferes.

AN EMBARRASSING SITUATION.

Critics have seen Larry Simon's latest comedy, which has not been seen in this country, it is one of the funniest films that has ever been exhibited. It tells a story. There is a "loose" husband, manager of a vaudeville show. His wife is a flirt, and trouble begins.

The show is playing a one-night stand in a small town and stage equipment is rather antiquated. The property boy is strong for young girls and trouble begins when he flirts with the manager's wife. There are many breaks in the show and features are staged that were not on the program.

Upon one occasion Larry as the property boy bursts into the chorus girls' dressing room when they are making a quick change. There is a big rush and scramble for dresses and wearing apparel. At another time a maiden of uncertain years is caught on the curtain and carried to the flies. Later she is pushed upon the stage in scanty attire, when the manager is running wild. The audience is shocked and the maid certainly is embarrassed.

A trick mouse gets loose and creates a disturbance in the audience by running down a woman's back. A trick chimpanzee makes matters interesting. This feature is instructive as well as humorous. It shows the marvelous intelligence possessed by a monkey. The chimpanzee does everything a human being could do, and as an actor he is a star. There is also a trick cat.

PREDICT MILD WINTER.

International News Service. NEW BEDFORD, Mass., Oct. 4.—Down on the island of Cattybunk, where the natives haven't much else to do than indulge in forecasts, the oldest inhabitants are predicting a mild winter for this section. Their prognostications are based upon the presence in Buzzards Bay in large numbers of herring gulls, which apparently are making no move to wing westward.

WASHINGTON, Oct. 4.—Brigadier General Edwin Jadwin of the American Mission in Southern Russia who was reported to have been executed by the Bolsheviks, is well and on his way home, according to a dispatch to the War Department today from United States Minister Gibson at Warsaw, Poland.

ODD FELLOWS MEET SUNDAY, OCT. 12, HERE

The Times has done at least one good thing.

To this paper is given the credit for the large attendance at a meeting of local Odd Fellows Thursday night, J. W. Jennings, chairman, a meeting Thursday night last, brought the desired results, and there were fifty men present showing a membership from almost every state in the Union. The Times modestly accepts the compliment.

Mr. Jennings was elected chairman of the meeting and S. M. Shell, temporary secretary-treasurer. The roll was called showing twenty-three Past Grand Odd Fellows in good standing and fourteen who signified that they would like to become members of an Odd Fellow lodge in Ranger.

An executive committee, composed of J. W. Jennings, as chairman, W. S. Castle and S. M. Shell was appointed with instructions to investigate what had become of the old lodge in Ranger and to take the necessary steps for the organization of a new lodge. A membership committee, composed of Dick Howell, K. C. Shogren, P. P. Palmer, C. E. George, Winson and Ben Ford were named to report at the next meeting.

A brother Odd Fellow was reported sick and a substantial collection was taken for his immediate relief. Also a collection of \$10 was taken for a man, sick and in delicate circumstances, having a wife and family here in Ranger.

The next meeting will be held at the Carpenters Hall through an invitation extended by a representative of the Carpenters Union, on Sunday evening at 8:30 o'clock, October 12 when all Odd Fellows are given a cordial invitation to attend.

The committee will serve refreshments.

Those present at the last meeting were E. G. Mayhew, W. S. Castle, Robert L. Freeland, F. M. Lambert, James Stokes, J. F. Lambert, W. E. Ellis, J. B. Burnett, F. H. Crane, J. W. Baker, H. B. Howell, Ben Ford, J. M. Ford, K. K. Lagomars, R. S. Shafer, George J. Baumeister, J. H. Winggo, A. J. Wagner, J. F. Wilson, A. B. Montgomery, P. C. Murphy, C. E. Banger, R. E. Jones, A. C. R. S. Castle, P. E. Baker, W. Jennings and H. J. Lillard.

It was later announced that there is an Odd Fellow Lodge here with charter but with no place to meet. This will expedite matters in getting a lodge in march in order in a very short time.

The committee decided to hold the next Sunday afternoon an announcement of the fact that there were a member who worked in the field who would be unable to attend another day but Sunday, March 12, asked to remember the hour and be on hand promptly that a meeting may be effected.

Episcopal Legion to Choose Delegates

A business meeting of the Ranger chapter of the American Legion will be held at 3 o'clock Sunday afternoon for the purpose of electing delegates to the state conference of the legion, which meets in Dallas Friday and Saturday.

The Fort Worth chapter of the legion is making a strong bid for Ranger's support in an effort to land the next state meeting for Fort Worth. A telegram urging a strong delegation to be present from Ranger was received by the local chapter last week.

EPISCOPAL VESPERS TO BE HELD AT LIBRARY TODAY

The Protestant Episcopal church will hold vesper services at 5 o'clock this afternoon at the public library on Aberton street. It is hoped a large attendance will be present and

LOCAL HEBREWS TO AID FUND FOR WAR VICTIMS

Following meetings which have been held for the last ten days, a final meeting, at which definite plans are to be made for the raising of a fund to aid the Jewish people in Europe, will be held this morning at 11 o'clock at the public library by the B'nai B'rith lodge. Among the important matters to be discussed is that of a fund to be collected in Ranger for the benefit of the Jewish war victims.

A call for funds recently published by the New York headquarters of the organization lays bare the horrible conditions which are declared to be increasing among the Jewish people of Europe. The response from the Ranger Jews has been liberal, according to an announcement made by the local lodge yesterday.

The sufferings of the Jewish people as a result of the war are known to all the world. The movement is a praiseworthy one and the people of Ranger are urged to aid in raising the fund.

Arrests Follow Shooting Affray

Bessie Nichols, who runs a restaurant in the Smith building near the T. & P. station, was arrested by Constable R. L. Faircloth, following an investigation into a shooting affair two or three nights ago. According to Constable Faircloth a charge of assault with intent to murder was filed against her and her bond set at \$1,000, which she furnished.

Bernard Smith was arrested in connection with the affair by a member of the Ranger police force, shortly after the occurrence. A charge of aggravated assault was filed against him and he made bond in the sum of \$500. The woman was held for investigation and later was released.

Two stories are told in connection with the shooting. The woman claims Smith attacked her without provocation and she shot at him in self-defense, while Smith alleges she began shooting at him while he was some distance away and he grabbed her to save himself.

It is said ill feeling had developed between Mr. Smith and the Greek tenants who run the restaurant, over the question of sanitation and other matters.

Fines Teach Those Who Will Not Heed

Two new fire plugs have been added to the waterworks system. One is located at the corner of Oak and Hunt streets and the other at the corner of Cypress and Melvin streets, where a disastrous fire occurred about two months ago.

Almost every day some one is arrested for parking a car or other vehicle within ten feet of a fire plug. Repeated warnings have failed to keep the plugs clear, such as posting notices, etc. In the meantime a number of people have found that it is a costly habit to park near a fire plug.

Gossip
By Paul C. Yates

The sages say that gossiping Leads straight to dire and deadly ends, But still I love to hear of things And run and tell my friends.

A whisper or the merest hint Will put me on a neighbor's trail, And by imaginative dint I soon evolve a lengthy tale.

I love to hear of secret things, And scatter them along the way; Of morsels rare and mutterings And mean things that the neighbors say.

Tiny Daughter, as Sleuth, Recovers Plundered 'Pills'

Six thousand eight hundred cigarettes were brought into the police station Saturday by Officer J. M. Hunt. It is believed the cigarettes are part of a large quantity of goods stolen from express shipments in connection with which five arrests were made by Abbott Hutchins of the detective department.

According to information ferreted out by Mr. Hunt, the cigarettes originally were hidden in a building on Rusk street, popularly known as the "Sammy building," from the fact that it was constructed as an advertisement of a fireproof board. Three small boys found the hidden shipment and removed it to a fresh hiding place in a cocklebur patch growing in an old pond.

It was their intention, doubtless, to smoke the cigarettes and they did not seem to be in the least daunted by the size of the undertaking.

Saturday they went to the pond to get a few smokes. It happened that Mr. Hunt's five-year-old daughter and another little girl were in a mulberry tree nearby and these diminutive sleuths, armed detective and made an investigation, thereby discovering the nest.

The cigarettes and the boys were taken to headquarters by Mr. Hunt and after their story had been corroborated the boys were released. A search of the "Sammy building" disclosed a suit of clothes and some papers relating to an oil lease.

Mr. Hunt recently found a number of jars of home-made preserves, honey, jelly and some meat and a half-bushel of peanuts cached in another cocklebur patch on Page street. He is getting to be known about town as the "official finder."

The New Appealing Silk Underwear

THE woman who desires the finest Silk Underwear will find our stock most advantageous to choose from—a wide variety of attractive new models, exclusive in line and attractive in material.

The "feel" of Silken Underthings cannot be described—you women who have worn them are unwilling to do without them—for they are indeed a pleasure and a satisfaction, costing but little more.

Time was when these lovely undergarments seemed too beautiful to withstand hard wear and frequent trips to the laundry; but experience has proved that these Silks are, in reality, long-wearing and there is a touch to them that makes wearers true devotees to them.

—Gowns, Chemise, Bloomers, Camisoles

Quantities of beautiful Crepe de Chines, Satins and Georgettes, made into the loveliest of Gowns, Bloomers, Envelopes and Camisoles have now made their appearance here—all fresh, new merchandise that grace our stocks.

The charm of these dainty things lies in the way they are treated—fine laces and pretty ribbons are applied so very attractively, combining rare beauty and practicability in one.

The prices of these are reasonable; of course, some are more expensive than others, depending on the quality you choose.

Gowns may be had from \$5.85 upwards as high as \$25.

Envelopes are here as low as \$3.50; others up to \$12.50.

Bloomers of good quality range from \$4.50 upwards to \$10.

Camisoles, some for \$1.25; better ones as high as \$10.

BILL BURKE PAJAMAS—A delightful garment of Crepe de Chine satin in flesh color—from \$10 up to \$25 a pair.

BOY GIRL CAPS to match Negligees and Pajamas; dainty styles in laces and chiffons—priced from \$2.50 upwards to \$12.50.

—Wonderful New Silk Negligees Here

Crepe de Chine, Georgette, Satins and Velvets fashion the prettiest Negligees that we have shown in many months.

Almost every conceivable evening dress is represented in this, the biggest stock we have ever had—each made a thing of beauty, and winal, at moderate pricings—from \$15 upwards as high as \$125.

When You Come to the "Fair"—Come In

T. W. Gettinger & Co.

KID PREACHER SAYS END OF EARTH IS NEAR

Mack Wyatt, the 17-year-old "kid" preacher, enlivened a multitude of pedestrians at Main and Austin streets last night with a rambling—though interesting—sermon. The crowd frequently applauded statements, made in a cap-sious way, of conditions which he said he had encountered since coming here.

The boy wonder handles the scripture in a more naive way than many preachers with years of experience in the ministry. With every scriptural quotation the prodigy had an incident to apply. He declared most of the preachers of today are far behind the times and that a fourth of them would retire from the work if their salaries were stopped. He said many of them were declaring the end of the world was a million years in the future, when as a fact, he said, it could not be more than eighty-five years away. He declared

TEXAS REAL ESTATE COMPANY

clared everything is getting ripe for a change on earth and that the scriptural prophecy must be fulfilled despite what the world might see or do, and regardless of whether he was called a Bolshevik.

Young Wyatt is a native of Okla. He wears knee pants, jaunty tie and cap. He uses gestures to emphasize what he says. He has traveled considerably. Among the wickedest cities which he says he has visited, Galveston is the leader. While here, he says, he visited the city prison, sharing food with the prisoners and leaving them good literature to read.

At the conclusion of his sermon he asked to shake hands with everyone present. Scores complied. Almost everyone who heard him gave him a coin.

Miss B. C. Atchison is the new public stenographer at the McCleskey hotel, coming here from Bartlesville, Okla., the past week.—Advertisement.

ORIGIN OF RACE RIOTS.

Race riots occur anywhere. They take place in the North and they take place in the South. Territory has nothing to do with them. Whenever the ignorant negro is led to see utopian dreams and wherever the white man oppresses him, there will be trouble. In most riots of the year the origin is almost invariably found in unscrupulous whites implanting in the minds of the untutored and unlettered race certain visions of things which his ignorant mind eagerly grasps. He is told that he is equal with the white man, that he is entitled to mingle and associate with them and with their women. He is oftentimes prompted to conquest over the white man. Such distractions cause the negro to take a step which is later regretted. But at the bottom of almost all race riots is the hidden white hand which has poisoned his mind.

The Shillady case is noticeable; a Northern man in Austin tampered with the rights of the white and black was shown the road "home" after a severe beating imposed by some of its most cultured citizens. Shillady was a tool of an organization which might have meant well for the negro and the white, but he was undertaking a work which was looked upon as anance by white citizens of the capital city, who felt that the negro and the white race were getting along well without outside interference. The trouble in this case doubtless was that the northern agitators little appreciate the habits and the mind of the colored man. Maybe they intend good, but they influence the negro from a wrong direction and instead of impressing him with the idea of getting things in a diplomatic way they spur him to violence.

When the white man mingles with the negro on an equality basis, he might as well prepare for trouble. He might as well expect a stiletto in his back. He might as well look for rumblings from negro quarters. The negro should be shown the respect to which he is entitled. His life should not be one of bondage. He should be given the necessities of life, a home to live in and a position fitting his nature. Everything should be done for his contentment. After all, it is only through contentment that anything worthy the name may be accomplished. Content the negro. He will pacify himself. But do not content him along wrong lines. He must stay in his place. The white man must remain in his. Disquiet him, and the result is a race riot. By nature he is animal-like. By nature the white is intellectual and cultured. Therefore, to be dissociated.

CHURCH BUILDING.

Ranger is building a \$35,000 Catholic cathedral. Ranger is building an \$85,000 Baptist church.

Ranger will build a \$125,000 Methodist church.

Other church edifices are contemplated. The spiritual nature of Ranger people is alive to the importance of attractive places of worship.

Minor religious organizations are entering the field. The established work of these denominations bespeaks the support which they seek. Ranger can become the greatest church and school town in West Texas.

Build more churches! White Sox are unpopular now. Reds predominate.

The staid old city of Atlanta will cater this week to the "rebs."

Stamford wants a new depot. Petition to the railroad commission has been sent up. Stamford needs the new facilities.

Tents next year will be the popular and compelling habitations of many. Have you bought your little tent yet?

Mr. Physician, have you joined the state health department's volunteer staff to all in putting down the oncoming flu?

Some local switchmen say they are innocent of "being tipped off for spotting cars," but very nearly tipped off the cars while spotting them.

Even the deserts of Spain sometimes get a good rain. A hundred persons and ten million pesos in property were recently swept away.

Sweetwater is to erect a \$200,000 sanitarium. It has secured a large branch of Sears Roebuck. It is ready to bring in a number of oil gushers. Great is Sweetwater!

All patriotic Americans sympathize with Wilson and the family in his illness. They pray for his speedy recovery. Wilson has sacrificed strength for every man in order to bring about the achievement of world peace. Success will attend his efforts.

"Unions are losing in the steel strike"—newspapers headline. Millions upon millions of dollars always wins. If the defeat turns into a rout working conditions will be infinitely worse than they were previous to the strike.

If we can judge from the rumblings from Eastland and Cisco, and the rumors of railroads whispered over the oil belt, Breckenridge is to become the railroad center of West Texas. Must be some attraction up there.

"The bakery that bakes the kind of bread that makes mother stop baking" is true to its name. All the mamas in Ranger and the oil field were there yesterday buying the hot rolls and the crisp, appetizing loaves.

Desdemona before its oil boom days was the stronghold of Socialists, pipes a contemporary newspaper, to which the Dallas News adds that none of the Socialists who grew rich on the oil are now so fervent in the cause of Socialism.

FREIGHT FROM WRECKED CARS IS TRANSFERRED

Transfer of freight from wrecked cars into serviceable cars at the scene of the derailment of Extra 801 Westbound on the Texas & Pacific last week, has been accomplished. Considerable Crisco and other wares were changed from one car to another. The work was under the supervision of Freight Agent Jones, who shifted some of his warehousemen to do the work.

The mogul locomotive which burrowed into the ground has been lifted and re-railed. It will be repaired and no doubt be again on its regular freight run in the next few weeks.

Some of the contributions have been sent direct through the office of M. A. Turner. The funds that have been turned in at the Times office also will be sent to the mayor of Corpus Christi.

When needing the services of an expert stenographer and typist, call on Miss Atchison, McCleskey hotel. —Advertisement.

Flood Fund Gets \$1,849 From Ranger

Funds for the flood sufferers of Corpus Christi have reached the sum of \$1,859.22, with a ten-dollar contribution by the Times Saturday from Utah Taylor of the Ranger cafe.

EASTLAND COUNTY FAIR OPENS TUESDAY AT CONNOLLEE PARK; FRIDAY WILL BE RANGER DAY

Friday, October 10, has been officially designated as Ranger Day at the Eastland County fair, which opens at the Connollee Park at Eastland October 7 and continues through the tenth. W. T. Hinton, one of the promoters of the fair association, was in Ranger Saturday for the purpose of getting everything in readiness for the auspicious opening next Tuesday.

Jake Hamon Purse.
One of the special features of Ranger Day will be the race for the Jake Hamon purse. This attraction has been widely heralded throughout the oil belt and it is known that a number of contestants will be on hand to participate. Mr. Hinton declared that the race track—one half mile in length—is the fastest to be found in Central West Texas. Every afternoon during the fair there will be two running and two harness races, insuring all the excitement and pleasure of the turf for fans of Eastland, Cisco, Dandemona, Ranger, Cadillac and the oil fields. The races are expected to be the most interesting and exciting that have ever been staged in this part of the country, as the purses put up are the highest in years in the oil fields. A large number of strings of racers have been despatched to the field to take part in the turf events.

Allen Shows Coming.
The Palm W. Allen shows, traveling in twenty-four special cars, will furnish the amusement, merry-go-round, "whip" and other recreation. This carnival company, expected to arrive Sunday, will probably be unloaded in time for pre-fair engagement Monday evening at the park. Among the novel attractions presented by the Allen shows are a sea-cow and a sea-calf. Because of their scarcity they are sights worthy of a visit of all interested in animals. The company is said to carry a number of high class entertainments which have furnished much merriment and pleasure to the old and grown-up. Mr. Hinton declared that the Allen shows were chosen because they have everywhere given satisfaction and brought no censure upon fair companies employing them.

In speaking of the park—the Connollee—where the fair will be held, Mr. Hinton said:
Adequate Equipment.
"The park is about a half mile from the city. It contains a splendid race track, grand stand and other adjuncts. It is in an inviting place, so that people may come early and stay late. We are expecting thousands of people on this occasion. The admission to the grounds has been cut down to the minimum, there having been no increase in admission because of the h. c. e. charge is fifty-four cents, plus the war tax of six cents, bringing the total admission to the small sum of sixty cents.

Will Be Annual Event.
"The Eastland County Fair is to be an annual event," declared Mr. Hinton. "We are starting out in a big way, having expended many thousands of dollars in order that the initial season may be adequate for the wishes and pleasures of the people. It is our purpose to expand the fair with each succeeding year, dependent upon the liberal patronage of the people. In time it has a chance to become one of the leading fairs in the Southwest. The people of Eastland county in particular, and of the oil belt in general, will find that they can have a fair worth the name and attendance if they will support the first session.

Child Welfare Association Meets at 4 p. m. Tuesday
The regular monthly meeting of the Child Welfare association will be held Tuesday afternoon at Central school building on Marston street, at 4 o'clock.
All patrons are cordially invited. Several matters of importance are to be taken up.

CARPENTER IS OVER HIS TROUBLES

C. H. Cornell, who is one of the best known carpenters and mechanics in Wichita Falls, Texas, and is a man of high standing and has many friends, while in Young's Drug Store a few days ago said:
"I have never had anything to do me the good Orgatone has. Since taking it I feel strong and full of energy, and in fact, I never felt better in the last five years than I do now."
"I have been suffering for several months from biliousness and general run-down condition. My stomach was full of gas that would beat me up and keep me miserable for two or three hours after my meals. I had no appetite at all, and got so I dreaded to eat, because the little I managed to force down would sour and cause me so much trouble. I was so nervous and restless I could hardly sleep at all, and always felt tired and good for nothing in the morning. I had a sluggish, depressed feeling, my strength and energy were getting less all the time, and I just had to force myself to duty."
"I'm glad I tried Orgatone, for I'm sure it has saved me many a sick day. I was getting worse all the time until I began using it, and I've been getting better every day since I started taking it. I first found after taking it two or three days that no uncomfortable feelings after eating. I have a great, big appetite now and can eat nearly anything without it hurting me in the least. I sleep as sound as any one, and am just bubbling over with new life and energy. It has saved me many a dollar, and best of all it has saved me my health and built me up so that my work is a pleasure again. Everybody ought to know about a treatment like this, and I'm glad to endorse it."

Orgatone is not a so-called patent secret remedy but a new scientific treatment absolutely free from alcohol in any form and is sold in Ranger exclusively by the Ranger Drug Company, under the personal direction of its representative.

NEW BUILDINGS UNDER ERECTION SHOW PROGRESS

The forms for the pouring of the concrete columns in the new Hodges-Terrell building on the north side of Main, between Austin and Rusk streets, are being erected rapidly. The new structure, to be three stories, will be one of the most commodious office and store building in the city. David S. Castle is architect and engineer and Walsh and Burney, contractors. The building will have a frontage on Main street of about ninety feet and will extend to the alley in the rear.

With considerable material on hand and workers employed the work will be carried through to a rapid completion consistent with good construction. Work on the six-story Guaranty State Bank is also progressing rapidly the brick work on the first floor having been practically finished. The concrete and stone columns have been set and brick laying on the second story is progressing. The vault is also being laid. This will be the tallest building in the city and will be a paragon of beauty and service, it was stated. In the rear, a new building is being rapidly completed. Between Marston and Austin, on the west side of Main, rapid progress has characterized the work on the large new brick building adjoining the nearly completed Marston office building.

Numerous other brick buildings are in course of erection in the city at the present time. The companies building them are not being seriously hampered by delays in material and failure to get men. Great building progress is expected to continue through the winter months, it is believed. There is to be no cessation in the matter of improving the business section. There has been no overlooking of the business opportunities of the city. It was stated, and still other pre-active merchants and dealers are seeking locations.

CONTRACT FOR NEW CHURCH TO BE LET MONDAY

The contract for the new \$125,000 Methodist Episcopal church, South, will be let tomorrow by the board of trustees of the church. Bids have been received during the last few days. They will be opened and the lowest bidder will receive the award if it meets the approval of the board. The structure will be constructed on Elm street, near the Ranger high school. Institutional in type, it will be a paragon of church edifice for the oil field, being the chief temple of worship in the entire western part of the state. Two years ago when the town's population was less than 800 Ranger Methodists found the present wooden structure at the southwest corner of Pine and Marston streets amply commodious to accommodate the small congregations and membership of the denomination. The growth of the church under the efficient work of its pastor, Rev. Edgar M. Wisdom, coupled with the phenomenal increase of population, largely made up of members of churches, has been the admiration of the conference of which it is a part.

Beside the early beginning of work on this structure, two other churches already are being built. The Baptists are building an imposing edifice at the intersection of Marston and Walnut streets. The structure will have cost when completed not less than \$25,000. Excavation for the basement and foundation has been almost finished and work of setting the foundations and building the superstructure will proceed as rapidly as reached. This church will be within a half block of the post office. It will occupy a pleasant retreat away from the dust and noise of the business streets.

The Catholics are erecting a most beautiful cathedral in southeast Ranger. This organization is making an initial expenditure of \$35,000. The building is complete as it is, but can be greatly enlarged without depriving it of its first appearance of attractiveness. This denomination likewise is preparing to erect a school building here within the near future, it was announced sometime ago. The church being built here represents a greater expenditure than any other Catholic church in West Texas, with the possible exception of that at San Angelo.

The Presbyterians, the Episcopalians and the Christian and Missionary Alliance also are contemplating building temples of worship in Ranger sometime in the near future. With all these structures being reared church life of the city is expected to take on a brighter outlook.

T-P RAILROAD INSTALLS NEW FAIR SPECIAL

Effective Tuesday the Texas & Pacific will install a special passenger train each way between Sweetwater and Dallas to care for the immense attendance at the Dallas state fair, according to announcement made yesterday. The service will continue daily until October 18, inclusive, but the last returning special train will leave Dallas the evening of October 19.

The special, which will run on a regular schedule, will leave Sweetwater each evening at 8:15 o'clock, Cisco at 12:22 a. m., Eastland at 12:47 a. m., Olden at 12:57 a. m., Brecker at 1:26 a. m. and Tiffin at 4:44 a. m., arriving at the East Dallas passenger station at 7:30 a. m. This train will not stop at the Dallas union station.

Returning, the special will leave Dallas each evening, including the evening of October 19, at 6 o'clock, Ranger 11:51 a. m., Olden 12:10 a. m., Eastland 12:25 a. m., Cisco at 12:50 a. m.

This train will carry no baggage, persons saving personal effects must carry them in their hands. Neither at the eastbound or westbound Specials on this road may excursionists to or from the Dallas state fair. They will endeavor to handle the regular through traffic. Other trains on the line may be taken to Dallas and return, though excursionists will be encouraged to ride the Dallas fair special. Arrangements are being made by B. Jones, agent at Ranger, for the handling of a large number of persons daily from the oil fields. Since

the fair was not held last year because of the request of the war department, two years have intervened between expositions. Thousands of persons, therefore, are expected to go this year. The agricultural exhibits are the best ever assembled, because of the luxuriant crops raised in Texas this year. The attractions are up to the usual high standard, but there probably is more variety. Everything has been done to make the Dallas state fair a place of superior diversion, recreation, pleasure and instruction. It has been heralded far and wide and peoples from all nations are expected to be in attendance.

The problem of handling the crowd is expected to be a difficult one. It will involve not only the hotel facilities of Dallas to care for them, but the railroads, already short of passenger equipment, are casting about to find a way out of the dilemma. The institution of a number of special fair trains on several of the larger roads is one of the means which will be employed to solve it.

The Dallas fair has come to be regarded as a place of reunion. People who have taken up their abode in West Texas upon going to Dallas will meet hundreds of their friends who remained in the eastern part of the state.

Q. Sadler, real estate man of this city, spent Saturday in Eastland.

NEW TRANSFER CO. A \$30,000 CORPORATION

The Ranger Transfer & Storage Co. a \$30,000 corporation, with a bonded warehouse to be conveniently located between the Texas and Pacific and the Wichita Falls, Ranger and Fort Worth stations, has taken out a charter under the state laws, with all stock subscribed.

The company will run all drayage and transfer facilities from the stations to the warehouse and to all parts of the city and adjacent territory. The men interested in the new company are M. A. Turner, P. R. Hopkins, and George Hemmingson.

Rats Eat Dynamite. SAN FRANCISCO.—This town is wondering whether it is in for a long series of bomb outrages. Workmen found 40 sticks of dynamite in an old sewer but over half of each stick had been eaten by rats.

MRS. JOHN DUNKLE JOINS HUSBAND AT TUCUMCARI.

Mrs. John W. Dunkle of South Austin St. left Friday for Tucumcari, N. M. for a visit, where her husband is the contracting driller for the test well of the Tucumcari Oil & Gas Co.

Many of our old town folk will remember Mr. Dunkle who was the driller of the first wildcat well in the Ranger field. His many friends here wish him the best of luck in this new promising field.

Officers of the company are: M. H. Hagsman, president; J. O. Whittington, treasurer; vice president; P. H. Landerger, vice president; H. L. McGee, secretary.

"You Betcha!"

Growing youngsters do Crave these "Health Rolls"

With all the meat-of-the-wheat to make them tasty, and bran added to make them extra-wholesome—no wonder children eat them eagerly! There's a savory nutlike flavor baked into Federal Health Rolls that simply does delight.

Not only the youngsters, but you and the family, will get definite GOOD from eating Federal Health Rolls and Health Bread regularly.

The graham flour in them, with the bran, supplies a bodily need which even the best white bread does not—the need for "roughage." So digestive sluggishness ceases when Health Bread and Health Rolls are eaten frequently.

Let the young people have plenty. Good enough for the oldsters, too—these Rolls do taste so GOOD!

Made the Federal Way from selected white flour, Graham flour and processed bran. Ten big feather-light, substantial rolls for Ten Cents. Fresh-baked every little while every day.

Hagaman Refining Co. Turns Out Finished Products

Few people in Ranger realize that what splendid proportions the Hagaman Refining company, situated about two miles north from town on the Hagaman property, has grown during its comparatively short life.

The company is headed by Mayor M. H. Hagaman as president. It is not necessary in this short article to go into the success achieved by Mr. Hagaman. He has won for himself a warm place in the affections of every citizen of Ranger who has witnessed his unselfish and untiring efforts in behalf of the city in putting through against almost impossible odds the improvements which Ranger now enjoys.

Associated with Mr. Hagaman and in active charge of the conduct of the plant are G. A. Clements and R. D. Lavery. These gentlemen have had the advantage of years of experience in the Kansas oil fields and know the refining game thoroughly.

The plant has a capacity of 3,000 barrels a day of crude oil and among the finished products turned out are gasoline, kerosene, naphtha, cylinder stocks, gear compounds and fuel oils. These products are said to be of superior quality and have won for themselves a splendid reputation.

The gasoline is distributed by tank cars and tank trucks in Ranger, Caddo, Eastland and Breckenridge, while the greater part of the other products is shipped in tank cars to Baton Rouge, La., for export to Europe.

Building Permits For Past Week

Twenty-five building permits, practically all for residences, totalling \$31,460, were issued the last seven days in Ranger by City Secretary George Armstrong after being passed upon by F. S. Owen, city building inspector.

Permit will probably be taken out in the next ten days for the new \$10,000 Methodist Episcopal church, S. 14th, which the denomination will construct here. Contract for the new institutional church will be awarded Monday, it was announced last week.

Permits for business houses during the week were practically a nonentity, indicating that Ranger is becoming a city of residences.

Some buildings are being erected without permits being first taken out. Such persons must, under the city building ordinances, comply with receiving authority from the city inspector and the city secretary.

Permits issued the last seven days include:

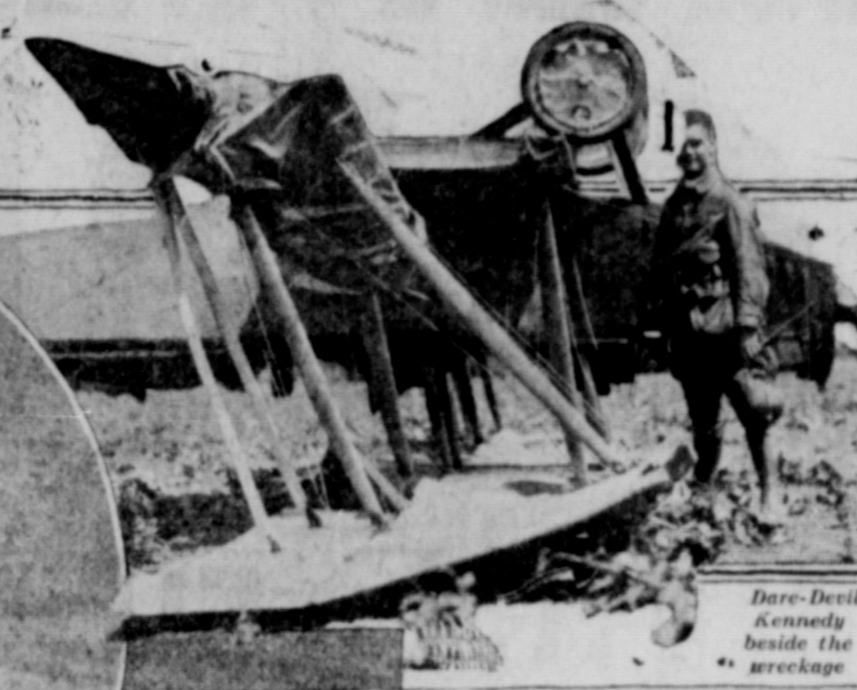

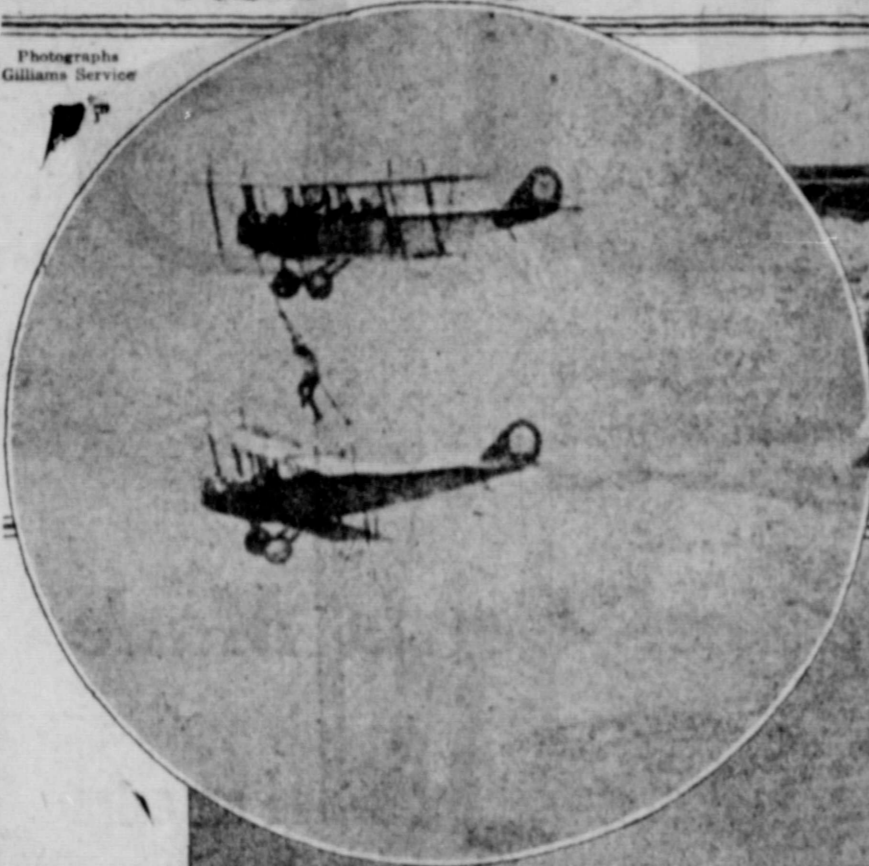

- S. T. Crawford, five two-room box houses, Marston street, \$1,000. B. B. Weir, 28x50 residence, frame; Second Burger addition, \$3,000. J. Robertson, addition to garage on Strawn road, \$300. R. B. Parrish, addition to residence, Mequite street, \$300. E. L. Todd, one-story two-room frame, Marston street, \$1,200. Maxwell-McKinnon, two-story twenty-room frame, Rusk street, \$3,000. Mr. Leveson, frame building, McDowell addition, \$600. O. B. Darberry, four-room 24x28 frame, Young addition, \$1,200. Oklahoma Cafe, one-story concrete stock room, Main street, \$500. E. E. Douglas, three-room frame, Lackland addition, \$2,000. C. R. Vaillant, frame residence, Highland, \$1,000. C. S. Wood, box house, south Rusk, \$750. G. T. Nichols, four-room frame, Young addition, \$2,200. W. R. Coates, frame garage, Oak street, \$50. M. E. Francomb, box house, Mequite street, \$350. Jones, Cox & Co., warehouse, \$2,000. R. H. Jones, box house and garage, Pace, \$1,200. G. M. Broach, one-story frame, North Marston, \$500. R. E. Miller, one-story building, South Rusk, \$500. James Jenkins Jr., two-story eight-room house, Mequite and Marston, \$2,500.

Camera Man Catches Unique Record of Bob Kennedy's Daring and Luck

An Air's Breadth Escape

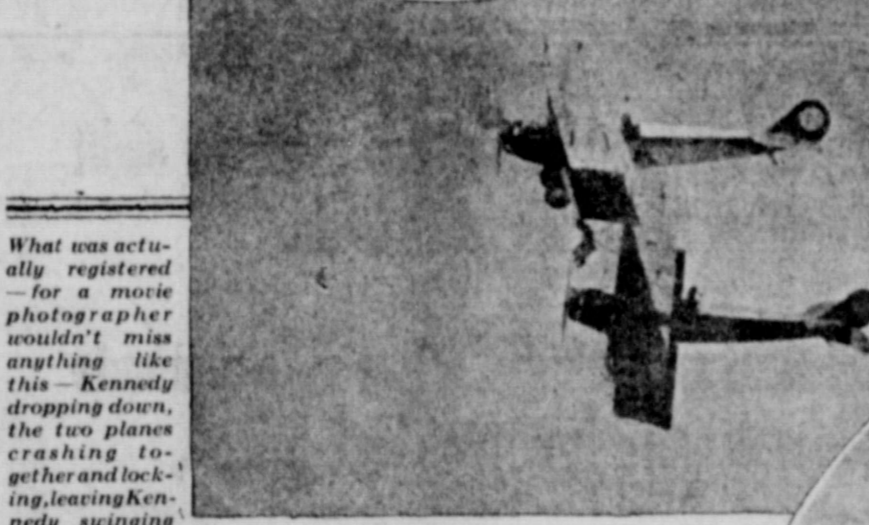

What aviation means to the movies—the chance to produce unlimited thrills

Photographs by Williams Service

Dare-Devil Kennedy beside the wreckage

What was actually registered—far a movie photographer wouldn't miss anything like this—Kennedy dropping down, the two planes crashing together and locking, leaving Kennedy swinging between, and finally the nose dive straight into the ground with Kennedy still hanging on by his rope

Not a man in the air service, in war time, but was familiar with the old adage, supposed to have been written by a cautious mother to her son, "Fly low and fly slow," which was her idea of safety in the air.

And though neither of them are advocates of that theory of flying, Bob Kennedy and Bill Hahnel of the Ranger Desdemona air service, in their passenger carrying flights from the Comet flying field, at the end of Hunt street, do exemplary work along the line of conservative air work. That's the sort that the average first-time craves.

W. R. Robinson Buys Partner's Interest

A change in the firm of Morgan

But both are capable of the flashy work that the layman loves to watch. Proof that Bob Kennedy has been through it is afforded in the set of pictures that the camera man of a California film company got when Bob was giving, for the pictures, his spectacular stunt of changing from one ship to another in mid air.

The film was the "Grim Game" (adv.) and Bob was taking the part of the daring newspaper man to whom a little thing like hopping from one airplane to another, and back again, was only an incident in the day's work. All newspaper men are like that.

& Robinson has taken place in the last few days which has resulted in W. R. Robinson becoming sole owner and manager of the concern. The business will be conducted under the same name as formerly, for the time being. In commenting upon this change, Mr. Robinson had the following to say:

Well, he dangled at the end of a rope from one dizzy craft for a half hour while the other maneuvered to proper position. The first picture shows him hanging ready for the second ship to get in place. In the second, the plane below had come too close for comfort and Bob is seen tucking his legs up under him to avoid the propeller.

It's a cheerful subject, because of the way it turned out, but it might have been oh-so different. The two planes locked horns and came spinning down. Bob was still dangling. A few feet from the ground, they came apart, but to late to straighten out and both planes crashed. Bob, miraculously enough

escaped with scratches and the pilots of both ships were unharmed.

In the picture at the bottom, Bob is the man in the white sweater, with his back to the camera. The cuckoo in the top photograph, standing beside one of the wrecked planes, was understudying for Kennedy. This picture rightly would be entitled, "Man standing beside airplane."

The third ship, which appears in none of the pictures, carried the camera man, who cranked calmly on, getting a set of pictures that it would be difficult to duplicate. Few airmen will attempt the stunt that Kennedy did. And none will willingly risk a tumble of a couple thousand feet for the benefit of the pictures.

Robert Kennedy, formerly an army pilot, may get become the "Bill Hart of the Air." As originally planned, he was to change planes in mid-air, dropping from a rope attached to the undercarriage of the upper machine to the top wing of the lower plane. A third plane carried the motion-picture photographer. But just as Kennedy began his drop an upcurrent of air drove the upper wing of the lower plane full into the landing gear of the one above, the planes locked and spun down nose on, at 1,200 feet they separated and "pancaked" into the ground. Both pilots and Kennedy, whose ropes had held him dangling, miraculously escaped without serious injuries

Look Out Bachelors. NEW YORK.—Mrs. S. O. Seymour, back from aiding foreign brides of American service men to embark for this country, declared 5,000 husband-hunting British girls are coming to the United States.

The Secret of a Superlative Tire

Any concern can build a good tire. For there are no secrets about tire building. The test is to build a super-tire. And that is entirely a matter of policy.

How far the maker cares to go in giving as little or as much for the money as possible depends upon his ideals.

In our search we found one concern with the ideals we all admire. That was the Brunswick-Balke-Collender Company, makers of The Brunswick. No tire, we should say, is sold on so close a margin to the maker. For The Brunswick is made better first—then considered afterward.

BRUNSWICK TIRES

We know Brunswick ideals as interpreted in Brunswick Tires, will appeal to you if, like most men, you are interested in getting 100 per cent value. The man who is satisfied with the average cannot appreciate Brunswick betterments.

Yet the price to you is no more. Come in today and know for yourself the price of The Brunswick.

GOODYEAR PRESIDENT IS DEAD AT HIS HOME

Frederick M. Shepherd Jr., president of the Goodyear Rubber company, died last Wednesday at his home in East Orange, N. J. Mr. Shepherd was sixty-one years old and also was president of several subsidiary companies of the Goodyear concern. The parent company was organized by his father in 1858.

BARNEY OLDFIELD CORDS ARE HERE

These Tires Are the Heaviest Cords Made

WHY

Because they are composed of eight ply of strong cords and an extra heavy tread of the finest pure white rubber.

The output of the Oldfield factory has passed the million mark in eight months, something which has taken the other factories years to do.

WHY

Because this tire which stands the heat and grind of a two-mile-a-minute gait on the speedway serves the people well and it is not too high-priced.

Oldfield Tires are made of the very best of material, thus enabling the Oldfield factory to place a guarantee of 10,000 miles on their tires.

FRENCH FEAR WINTER FOOD SHORTAGE NOW

By H. J. Greenwall.

PARIS, Sept. 30.—French food experts are unanimous in forecasting a grave crisis for next winter. It is not a question of actual famine but of a grave shortage of food throughout France.

There is no doubt that the general world unrest and decrease in production are having an effect on the French peasants, who unless they can sell their products at exceedingly high prices, refuse to part with them, preferring to lay up a stock for the winter.

There seems to be an absolute craze in Paris to increase prices for no reason at all. A month ago a friend of mine purchased a hat for twenty-five shillings. Yesterday he visited in duplicate the hat, and for identically the same article was asked to pay thirty-five shillings. The latter he regarded that he had not purchased new stock since my friend last visited the shop and could give no reason why the price should be so advanced. He merely said: "Everything is rising up, so why not hats?"

It is a vicious circle, but the time is coming and coming soon, when the people will take matters into their own hands. This is not Bolshevism, but merely organization by the middle classes to protect themselves.

The Russian famine in Moscow, which has been reported to be the worst since the famine of 1917, is a warning to the world. It is a warning to the world that the middle classes must organize to protect themselves. It is a warning to the world that the middle classes must organize to protect themselves.

RUSS PRINCES NOW BEGGARS; RICH NOW POOR

By H. S. MUIR

Special Correspondent International News Service and London Express.

HELSINGFORS, Sept. 30.—There is a Russian boy-prince in Helsingfors who goes practically barefoot. His boots, given to him by a compassionate neighbor, would be spurned by a tramp. They are without soles and he limps painfully as he picks his way over the hard, cobble streets.

The barefoot prince typifies the plight of many of the best Muscovite families. The silent suffering and unshed tears of those people—the flotsam of the old regime—would make a story full of pathos. It is the story of many a homeless class fanatic. There are thousands of Russian families enduring the direct hardships of poverty and the agonies of long months of mental and physical torture just because their gentle birth constitutes them the hated enemy of the Russian proletariat. Some of them are living in misery under the Red Terror, daily awaiting the executioner; others are enduring a bitter exile in Scandinavian countries, anxiously looking forward to the day of their deliverance. Many of them would help themselves if they could, but they never were taught to earn their living; so nobody will employ them.

The barefoot prince is but a rung lower on the ladder of misfortune than many of his kind. In the busiest restaurant in Helsingfors a gray-haired man of aristocratic bearing plays second violin. He is an ex-colonel of the Russian army and was

a rich man before the revolution. He is a pathetic figure.

Living in a cheap flat overlooking a squalid courtyard in Helsingfors there is a Russian nobleman who has put all the splendor of the past behind him and now keeps the wolf from the door by baking pastries. He works at night and his wife retails the cakes during a daily round of the restaurants.

Upon a recent visit to the frontier region a Russian ex-colonel of the Imperial guard, who was wounded in Galicia, drove me from the station to a hotel. In a threadbare suit and dingy straw hat he drives an even dirtier drosky and is quite used to carrying luggage and taking "tips." Society leaders who once helped to swell the Czar's court can be seen here any day in faded finery which would be discarded by a London work girl. Princes and counts who once owned half a dozen stately homes and vast lands now live in obscure lodgings and make a frugal meal in cheap restaurants at the same table as the humble clerk or typist.

HOW BUSY IS A BEAVER?

The beaver is said to be the busiest animal in all the world, but no matter how busy he may be he has nothing on us, for we are busy twenty-four hours each day caring for the needs of the automobile and truck owners in Ranger.

We know the game. Every man is an expert in his particular line. Gathered under this one roof are experts in every kind of repair work. We can do the whole job and do it well.

We have the equipment to work with. Whether it be lathe work or blacksmith work that you need to put the old bus in condition, we are the boys who can do it. Our big lathe turns twenty-four hours a day in the service of the people of this community.

We have the parts and the accessories. Have just stocked a complete line of rims, lugs and bolts—all standard makes,—including Baker, Detroit, Stamwell and S. W. We have Dodge and Ford parts and accessories; spring steel in all sizes up to 31-2-inch, in hex. and round cold-rolled steel up to 2 15-16 inches. This class of material will enable us to make anything for you which you cannot find in Ranger.

We have the most complete machine shop in Ranger, with lathe, drill, press and boring machine. Four expert blacksmiths and an acetylene welder employed in our blacksmith shop.

All we ask is a trial. We guarantee satisfaction. Once you come to us for repair work, we will do it all. We have never yet failed to satisfy our customers.

Our motto is: "You Must Be Pleased."

TRUCKMEN—We install Winches, Bolsters and Straighten Trailer Tongues. We will do anything the other fellow can't do.

NEW TYRANT IS NOW RULING IN BUDAPEST CITY

By LUCIEN JONES

Special Correspondent International News Service and London Express. BUDAPEST, Sept. 30.—Stephan Friedrich, reactionary prime minister, who refuses to go out of office and snags his fingers at the entente, is becoming as picturesque a figure as Bela Kun. His will is imposed by force of arms and all who oppose him are being turned out of office. All classes denounce him, but the press is silenced and the people are powerless to act. The Rumanians, despite their promise not to interfere in the internal politics of Hungary, evidently are behind him.

The situation is intolerable and conditions are becoming chaotic, propaganda for Friedrich, and went on strike. Rumanian troops then took possession of the newspaper offices and produced the newspapers in the prime minister's interests. A "white" terror directed against the Jews and all those suspected of being against Friedrich, has taken the place of the "red" terror in Budapest. Jews are openly thrashed in the streets, and in the provinces many have been murdered.

The situation is intolerable and conditions are becoming chaotic, Friedrich maintains his position by violent propaganda and constant assertions that the entente support him. Politicians of all parties are wrangling and squabbling and fighting for power, so there is no early prospect of the establishment of a stable government or one likely to be acceptable to the entente.

Incontrovertible evidence is forthcoming that the Rumanians are wantonly ruing Hungary. Among recent acts are the taking of valuable drugs and making them up in one powder useless to anybody. Vital parts of highly technical machinery have been carried off or so damaged as to be beyond repair. When a protest was made, useless Bolshevik money was sent in payment.

These acts have been followed by a murderous attack by night upon the British naval force on the Danube, which brought General Bardeua, commander-in-chief, to mark. The only gleam of hope is a reduction of food prices.

Gay New York Awaits the Prince

By GEORGE R. HOLMES
National News Service Staff Correspondent

NEW YORK, Sept. 30.—The Prince of Wales, who is expected to arrive in New York in November, is being awaited with great interest. The prince didn't make the statement to be polite, either. He is looking forward to his visit with eagerness if for no other reason than that it will not be so "official" as his Canadian visit; at least, not cluttered up with an awesome aggregation of functions, ceremonies, monuments and coronations as has filled his tour of the dominion over which he will come day after day. There are, of course, certain formal things that must attend a royal visit. The prince recognizes this. He is resigned to it. It's one of the tough things connected with being a prince; but it's his duty to say that if the program makers in Washington and New York want to really please the future king of England, they will step softly on the ceremonial end of it. At the risk of committing harakiri with royal dignity it can be truthfully said that Great Britain's future sovereign will get a lot more enjoyment out of Mr. Ziegfeld's Follies than he will looking over the

Scene in Suburb of Corpus Christi; Homes Wrecked by Tidal Wave

Wrecked homes in Corpus Christi. Homes in a suburb of Corpus Christi, wrecked by the gigantic tidal wave which laid the entire city waste. Automobiles, boats and miscellaneous wreckage was piled about by the force of the storm.

art collection of the Metropolitan museum. Painted things usually are more interesting to young men when they are animated; and, frankly, he will be more interested in getting his royal toes stepped upon in a Broadway theater crush than he will be in a visit to the city hall or the congressional library.

Then, there is Coney Island. It is a trifle late and possibly there are some features of the famous carnival place that wouldn't appeal to Edward Albert Christian George Andrew Patrick David. Eating a car of green corn soaked in butter and somewhat smelly might not appeal to a fastidious English gentleman for all his democracy, but he would enjoy the whole show, for he likes people and crowds (when they're not staring at him), and faunts and girls and color—and that's what Coney is. Edward Albert does like girls. A rather long-haired movie man with little deference for royalty, effusive in the prince's train and minute with the guests at a reception, said finally that "the kid has a Ziegfeld way. He had danced in stony silence with a rather acid and conventional hostess, but was lively as his host's dinner conversation with a beautiful young thing, all smiles and conversation.

There should be formed a "Society for the Prevention of Cruelty to Princess" during official visits. As a possible platform for this activity, visit the prince's. American visit the following might please Edward Albert Christian George, etc. Duke of Cornwall, Baron Renfrew, etc. K. G., etc.

Show him a girl show instead of Gent's tomb. Take him to Coney instead of to the city hall. No old gentleman speeches of more than 100 words. Show him Fifth avenue instead of Wall street. He will never have to worry about money, anyway. Let him go to the polo grounds instead of to the public library. Give him a roadster and let him knock about town, getting "bawled out" by a perplexing Irish traffic cop. There are lots of really interesting sights in New York. Solemn-faced, frock-coated officials may have him at formal functions, but given half a chance the Prince of

Wales, good looking, healthy and normal, will find and enjoy the very same things ordinary American youths would.

Oldfield Cords Now Sold Here

This issue of The Times contains an announcement which should be of interest to every motorist in Ranger, to the effect that the already famous Oldfield cord tires have been stocked by the Tire Service company and will be distributed by this enterprising concern for this territory. Although these tires have been manufactured only eight months they have gained a remarkable popularity within this short space of time and the factory already has published the million mark.

Barney Oldfield, who heads the company which is putting out these tires under his name, is known the world over as one of the greatest drivers the speedways of America have ever known. For years he held undisputed sway of the track and won for himself the adoration of all lovers of good, clean sport. He had much to do with the plans for the tires which bear his name and it is said all of the valuable experience he gained on the track has been used in their manufacture. These cords will be sold under a 10,000-mile adjustment basis and local dealers have full authority to make all adjustments. This new line gives the Tire Ser-

is Americanoman Lands K. O. on Russian Bully

By Associated Press
OMSK, Oct. 4.—A certain Russian bully learned something about American women that will lurk in his memory for some time, through an encounter a few days ago with Miss Annie Laurie Williams, in the freight yards at Omsk. Miss Williams' name will be familiar to many New Yorkers as a welfare worker. She is now with the American Red Cross and was one of those twelve women chosen to remain behind when the others were hustled out of Omsk by the American ambassador to Japan, Roland S. Morris, to escape a possible Bolshevik invasion.

The Russian was attempting to climb aboard a car in a refugee train in which were several girls. The girls were trying to shut the car door against him when Miss Williams appeared and grappled with the intruder. She managed to land two blows upon his jaw and then they rolled together down the embank-

ment. As they arose she gave him another. Two Czech soldiers then came to her aid and, but for Miss Williams' intervention, would have finished the bully, who was eventually permitted to retreat and ponder upon the strange ways of American women.

STARTS SCHOOL FOR CADDIES.

International News Service.
MANCHESTER - BY THE SEA, Mass., Oct. 4.—A school for caddies at the exclusive Essex country club has been inaugurated. Under the direction of James F. Manning, caddie master, the caddies gather daily, weather permitting, in a circle at the eighteenth green and are instructed in the art of caddying. Manning began by typewriting one or two general rules for the boys, to which he kept adding a rule here and there as the season progressed, from which finally was evolved a complete set, which are contained in a net booklet.

INDIANA PRODUCES GREAT MINT CROP

By Associated Press.
SOUTH BEND, Oct. 4.—That Indiana produces two-thirds of the mint crop of the United States is

shown in reports of J. W. Beers, government crop estimator. The reports also state that St. Joseph county is the largest mint producing county in the United States. During the summer season 3,425 acres of mint were under cultivation and produced a record-breaking crop. This year the yield near Nappanee, Ind., has been unusually large and the farmers have received as high as \$6.25 a pound for their mint.

See The Big Glass Ovens At The New FEDERAL BAKERY

These ovens are typical of the whole FEDERAL SYSTEM OF BAKERIES. Probably you never have seen anything like them before, neither have you seen a bakery like the one at... You can look through the Pyrex glass plates and see the bread and rolls baking. In this, too, the ovens simply reflect the policy of the whole organization, because every step of the process from the flour sack to the counter is open to full view.

And a cleaner food shop you never saw. The utmost efforts are used at all times to keep the machinery and utensils and floors and counters spotless. Add to that the courtesy which is at all times a fundamental part of the daily work, and you have quite an unusual combination of bakery virtues.

In addition there is a QUALITY to the products that, once tasted, invites you to come again and again. We make no deliveries. Bring your market basket. You can get the things we make nowhere else in the city.

Dainty Lass Made Hit as Cop; Dimples and Roguish Eyes Keep Boston Traffic Moving

By Herbert Caryl, International News Service Staff Correspondent. BOSTON, Sept. 30.—Glance over the list of the professions, high salaried and low salaried, and you will find hardly one that was not represented on the roster of the volunteer squad that directed Boston's traffic during the policemen's strike.

cut in society and later of his marital troubles. The curb of Copley Square was fringed by several scores of equally curious girls and "Handsome Jack" stood in the middle of the street in all the glories of a close-fitting brown Fall suit, a white band around his hat and another one around his sleeve, a white flower in the buttonhole of his lapel and with both hand waving cursing drivers hitler and thither. A radiant sun served as a spotlight. Gallantly he escorted giggling girls across the street between rounds with the teamsters.

D. Henderson, president of three banks, and director in half a dozen others, stood for hours. "It gets you in the joints," said Mr. Henderson. "I put in four hours a day. Interesting work and hard. Mortormen seem the most unfriendly. One ran me down. But the majority of vehicle drivers are eager to help. Work has given me a new glimpse at human nature."

PLANES ON RIO GRANDE BORDER CHECK RAIDS AUSTIN, Oct. 4.—American army airplanes patrolling the Texas-Mexican border have done more than any other one thing to check raids into the United States by Mexican bandits from across the Rio Grande, according to Capt. Jerry Grey of the Texas Rangers, who has been stationed in the Big Bend district.

Aero Water Pure aerated water will be manufactured and sold by THE RANGER ICE ASSOCIATION This water is distilled and then aerated to give it life and sparkle.

TACKS POLICY OF BRITISH IN EGYPT

BY F. S. ROOSA,
International News Service Staff Correspondent.

WASHINGTON, Oct. 4.—Ex-Governor Joseph W. Folk, of Missouri, who was appointed by the legislative assembly of Egypt to act as counsel in its delegation to the peace conference, today severely criticized Great Britain's explanation of her Egyptian policy.

"When Great Britain's pledges of altruism, he said, are set down side by side with her treatment of Egypt the result is awesome to the democratic mind.

"The continued forcible holding of Egypt," he asserted, "is not only in violation of the assurances made by Great Britain to the Egyptians, but is in violation of the nation's pledges to the world in the beginning of the war not to ask for territory out of it.

On November 10, 1914, Mr. Lloyd George called on the world to witness a utter unselfishness of Great Britain. Yet Britain now claims Egypt's spoils of war, as a subject and honored nation. The value of the natural resources so seized, is beyond computation.

"The principles for which Great Britain claimed to be fighting are now discarded; the right of national self-determination is mocked. Her shot toward Egypt is evidence at Britain endorses the principles of the League of Nations with her own hands."

"At the beginning of the great war Britain removed the Khedive and appointed a sultan of her own choice to the throne of Egypt. This was announced at the time as a necessary measure and was greeted by the Egyptian people with a storm of indignation. Great Britain implied that the protectorate was only for the period of the war and to be terminated at the close of hostilities.

"The Egyptians took sides with the allies, believing they were struggling for the right of national self-determination throughout the world, and the armistice was signed they rejoiced, because they believed their hour of deliverance was near.

"The Egyptian general assembly, a majority of which is elected by the people, appointed a commission to go to Paris to attend the conference, believing there would be a sue of Nations and that Egypt would be a part of it. This commission was headed by Pasha Zagloul, minister of justice.

When the commission arrived in Paris they found that recognition of the so-called 'protectorate' of Great Britain had been written in his 'protectorate,' in a 'masked' character. The commission was told that it was a stenographic record of the Egyptian people's view of another power which had been written in Paris.

"The apparently authorized intervention of the International News Service, the British government now has a 'M-like and easily swayed' view always held of the people, an oppressed nation by the oppressor.

"The interview says the case of Egypt is analogous to that of the Philippines. The status of the Philippines did not arise out of this war; the present status of Egypt did. Moreover, the President has announced that the Philippines should be independent as soon as, through a league of nations, they may be afforded adequate protection in that independence. Will Great Britain announce as much for Egypt?"

"Ordinarily the United States might not be concerned with a wrong inflicted by Great Britain upon another country; but when the United States is asked to be a party to the wrong and ratify and glory the wrong the matter must assume an entirely different aspect. If there shall be a league of nations the first case for trial will be Egypt against Great Britain for the right of national self-determination."

STREAMS DRY IN WYOMING; MILLIONS OF TROUT DIE

CHEYENNE, Wyo., Oct. 3.—From all over Wyoming come reports of an extraordinary dryness and as a result millions of trout have died. In some sections streams which heretofore have abounded with trout and delighted the angler are nothing more than dry sand and rocks.

It may take years of effort on the part of the state fish hatcheries to overcome the loss in trout during 1919.

74 YEARS OLD; RIDES IN TRAIN FOR FIRST TIME

International News Service. HANON, Pa., Oct. 3.—Mrs. Re Hoffman of Mount Zion was for the first time in her life the thrill of riding in her own passenger train. At seventy-four years of age never before ridden on an railroad. She enjoyed the excursion and expressed a desire to another ride.

Relieves CATARRH of the BLADDER and all Discharges in 24 HOURS
SANTAL MIDY

BY FLOYD MACGRIFF,
International News Service Staff Correspondent.

LONDON, Oct. 4.—Following the allegation of the Egyptian Nationalist delegation in Paris, headed by Zagloul Pasha, that the peace conference refused to hear them and the appearance of counsel for the Egyptian Nationalists before the American senate Foreign Relations Committee in Washington, I have made an effort to get the formal views of officials of the British government, notably the foreign office, upon the matter.

While British officials declined to discuss the Egyptian claims because of the delicate situation now prevailing, Great Britain's position regarding Egypt may be summed up as follows:

"England wants to give the Egyptians as much self government as they show themselves capable of carrying out. Great Britain truly intends that Egypt should have autonomy, but it is for us to decide how much self rule the Egyptians are capable of. It is for this reason that the government will dispatch a British mission headed by Lord Milner into Egypt in October to canvass the whole situation and make recommendations. It must be remembered that 90 per cent of the Egyptians are illiterate, and the problems are somewhat similar to those encountered by the United States in the Philippines.

"The Nationalists have not yet proposed a workable program. Zagloul Pasha's Nationalist delegation in Paris has been ignored by all circles and Zagloul is losing influence at home owing to the expenditure of Nationalist funds without accomplishing anything.

"Britain is also awaiting ratification of the peace treaty, which will automatically back up the protectorate proclaimed at the outbreak of the war. It must be remembered that Egypt was unsettled for a century, and yet in the past forty years Great Britain has succeeded in saving the country and establishing a stable administration there.

"Theoretically Egypt was part of the Turkish empire until we proclaimed a protectorate and Turkey, as the suzerain power, nominally appointed the Khedive. When the war came on Great Britain, due to prior international arrangements, had to occupy Egypt to guarantee order. Great Britain offered to defend the

she gave him shown in report
then came to
from a Turkish attack
finished the
permitted themselves. The Na-
upon its now contend that they only
wounded the protectorate as a war
decision and never understood that
the decision was final.

"The Egyptian government voluntarily agreed to accept liability for 3,000,000 pounds it had spent on behalf of Great Britain for war purposes. This sum, however, represents only a small part of the cost of British war operations in that theatre.

"Four hundred thousand Egyptians volunteered for work in the labor corps of the British army. They were well paid. Petty Egyptian officials, however, thought to further their own ends by forcing peasants to join up.

"True, there were some inconveniences owing to war legislation and some grumbling on the part of the peasants because much of their produce had been requisitioned for the army. But they were paid for it at carefully fixed prices.

"Egypt gains importance through the geographical location of the Suez canal. Great Britain must see to it that Egypt does not fall under the sway of any other nation. The Egyptians' sole sympathy toward the Turks is based on religious affinity. The mass of people are child-like and easily swayed.

"Investigations proved that alleged atrocities by British troops were groundless. In two villages where General Allenby investigated it was found that charges against British troops were groundless. Despite all provocation when our troops were seized and spat upon in the streets and seven officers were murdered on a train out of Luxor the British behaved magnificently, exciting the admiration of all moderate Egyptians."

COST FAIR SPEEDER \$1 FOR SLAPPING POLICEMAN

(By International News Service.)
DALLAS, Oct. 3.—It costs just \$1 to slap a cop in this town. At least that is the rate for slapping charged to pretty young women. This week when a cop tried to arrest Miss Eva Garling because she was jogging along in her new roadster at a "fifty-mile clip," she left the print of five fainty fingers on his ruddy complexion. She slapped him so hard that he joggled over and lost his cap in the rear of the car. But he recovered, got his motorcycle and chased her to her home. Then he filed charges against her. She was fined \$1 on charges of speeding.

STORM RUINS TEXAS FISHING INDUSTRY

AUSTIN, Oct. 3.—The fishing industry of Texas was almost completely wiped out by the tropical storm of September 14, according to reports to Governor W. P. Hobby from Brigadier General J. F. Wolters of the Texas National Guard.

"It is safe to estimate that 60 per cent of the fish and oysters consumed by the people of Texas came from between Fort O'Connor and Fowler Bluff," said the report. "In this entire section there is not a boat, seine, wharf or fish house left.

"Without these, men cannot fish. The fish season now is on. If that industry is to be rehabilitated in time to serve the markets with fish this winter, there must be immediate relief for that particular industry. I mean that relief must come to the simpler folk immediately."

LOW NECKS TABOO DURING SAND-FLY INVASION

(By International News Service.)
INDIANAPOLIS, Oct. 3.—Slighting no one, the vicious little sand fly, in numbers myriad, finally alighted upon the aristocratic North Side of Indianapolis as a likely place to operate. As a result evening garb was abandoned by the smart set. Low neck evening gowns were considered particularly inviting by the playful creatures and women abandoned them—the gowns—in favor of less formal but more complete attire. Men likewise found evening clothes "inconvenient. De-fishing before retiring was the only remedy on tap.

OPPORTUNITY DAY

Is Here

For every day is Opportunity Day as long as there are still lots to be sold in

THE BEAUTIFUL BURGER ADDITION

Many have already seen this opportunity and have doubled and tripled their money on lots bought from us a few months ago. Property in our addition is constantly increasing in value.

At the prices which we are asking for this property it is the best and safest investment to be had. Every train brings investors looking for building lots in the Wonder City. The demand is active for desirable property--the day of the shack is past. As Ranger grows this demand for choice building locations increases. This property will never be offered at the low price at which we are selling it today. Those who buy now will reap thereward. Don't delay. The opportunity is yours--grasp it.

Rent Money Is Wasted Money

SAVE YOUR MONEY BY INVESTING IN A HOME

Of course, you will want the best location, and for that reason you will eventually select the

BURGER ADDITION

"The Ideal Place to Live"

Here are a number of reasons why the facts stated above are true:

The Burger Addition is near a good school; will have all city improvements in the near future, which means increased values; has good streets; has plenty of good water; is conveniently located; has splendid elevation; commands a beautiful view of the city; has good drainage; has sufficient height to insure pure air; is a neighborhood of artistic homes; has the kind of soil which insures beautiful lawns; does not permit any shacks, tents or barns; is the most healthful location; it lies between the Strawn Road (which is to be a lap in the Bankhead Highway) and the Spring Road, and yet there is no heavy traffic passing through the Addition.

The owner of this addition has her own home on the Addition and takes great pride in the improvements. The money derived from the sale of property has been reinvested in the Addition either in improvements or homes. Some of these artistic homes built by us are now completed and ready for occupancy.

The most reasonable prices. The best of terms. Deed and copy of abstract with first payment. Taxes fully paid through 1919.

**AFTER YOU HAVE SEEN THE REST, THEN BUY THE BEST
A HOME OR A LOT IN THE BEAUTIFUL BURGER ADDITION**

GRAY-HEADED KIDS.
Youth must be served; but there is one commendable thing about Age, and that is it can serve itself.

Where Youth lets off and Age comes on may be a mooted question. Where Age lets up depends entirely upon the aging Youth.

The time the Fellow with the white hair flips this on your nose for Leadership Youth will be a gray-headed Youth will be the object of this scheme primarily to prove who is the Big Cut in the gate.

More important, it will give that Silver Threads Among the Green often are Camouflage.

1887 William Gleason got his first Job, with the Philadelphia baseball club. That, by the way, was during Grover Cleveland's first administration, and yet, thirty-two years later he is still calling Gleason "The Kid."

And Moran. For a quarter of a Century his resolute spirit has dominated one ball club after another. Before the Spanish war was even prophesied he was whipping them across a baseball diamond. And, like the Kid, nearly three decades of tireless effort flitted past before Patrick Moran slid across the Homeplate of Success.

Neither Gray Hair nor Eleventh-hour attainment is confined to the corners of a Baseball lot. Your Lot may be that of an office or a foundry. Regardless of your Station, remember an Infield is just as strong as its weakest Bag. If yours is the Difficult Corner, brighten it and help the Game along.

Youth has the advantage of Impulsive Enthusiasm. Age has the fortitude of Experience. Hard Work is their Common Denominator.

Score Carranza's Confiscation of All Petroleum

By Associated Press.

WASHINGTON, Oct. 4.—In formal representations filed with the state department the Association of Producers of Petroleum takes issue with recent declarations made in Mexico City by Leon Salinas, acting head of the Mexican department of industry and commerce and chief of the oil bureau of that department, justifying the Carranza government's attitude on the confiscation question. Besides refuting statements by Salinas, the petroleum producers again charge that the acts of the Carranza government against which they complain are in violation of the laws of Mexico and in contravention of the accepted laws of nations.

"It is admitted," says the statement, "that the question of proprietorship of coal lands in Mexico and the Spanish colonies was subject of contention; but nowhere in the Spanish grants or subsequent ordinances of the Spanish crown was petroleum treated as the king's patrimony or as the property of the nation. If any contention did exist it was set at rest in Mexico by the mining law of 1884. Before this date neither coal nor petroleum had been developed in Mexico at all; the law of 1884 simply cleared up a matter in question. From that time, therefore, rights to coal and oil were acquired by Americans under this law and the laws to the same effect of 1892 and 1910. By the expenditure of vast sums of money American individuals and companies have given a value to these lands, relying upon the laws of Mexico. Their tenure was never questioned; in fact, it was repeatedly ratified by acts of Mexican courts and the Mexican government has since 1912 continuously recognized rights so acquired under Mexican law by collecting taxes upon the lands upon the product.

"The Mexican government's contention that a mere change in constitutional precedent (appearing in a constitution which itself prohibits retroactive legislation, which prohibits retroactive effect was to the attention of the ambassador of the United States, with an assurance that no law or constitutional provision would take effect retroactively in advance of the presentation of his credentials in February, 1917) may operate to divest Americans of rights legally acquired, has been answered by protests in the department. In harmony with such protests the members of this association have taken a united stand and refused to be trapped by any of the exigencies of Mexican government decrees demanding the performance of acts the effect of which would be to acquiesce in the confiscation and render the American protests nugatory.

"Because we have refused to admit the loss of our properties, the Mexican government has seen fit to refuse us permission to drill upon our lands until we perform such acts of acquiescence. The government has gone to the extent of sending armed forces to stop the drilling of a well on a property of a member of this association which member had, in harmony with your protests, refused to acquiesce in the confiscation of his property. In other cases the Mexican government has granted rights to American parties under mining claims and decrees against which the American government has protested, and wells have been and are drilled on such lands, by such parties.

"In reply to Secretary Salinas' statement we beg leave to call your attention to the fact that these acts, well known to you, are in open violation of the laws of Mexico and which our investment of time, money and energy was made, and which are in violation of the accepted laws of nations."

NOW IS TIME TO ATTEND TO AUTO REPAIRING

The early fall months are regarded in tire circles as the important period for tire repair materials. With the big summer driving season past and the warm days rapidly decreasing in number, many motorists are trying to get the last mile out of their tires to make them last through the season. Frequent inspection of tires and attention to little troubles will do much to get a few extra thousand miles from tires that are nearing the end of their usefulness.

In the list of tire repair materials and accessories there are articles to meet every temporary need of this sort, is the statement of the United States Tire company. There are heat-resistant for closing surface cuts in casings and tubes; self-cementing patches for punctures; tire sleeves and inside patches for weak spots in casings, and outside-laced "tire sleeves for holding temporary blowout repairs in casings.

GAS SELLS FOR \$1.50 A GALLON AT VLADIVOSTOK

Gasoline at \$1.50 a gallon. ("Weas servants" who speak only a "super set" of Russian," and streets utterly without traffic regulations are among the things which Miss Mildred Corbett of Adams, Mich., has discovered in her first four days with the American Y. W. C. A. in Vladivostok.

The Y. W. C. A. workers have succeeded in requisitioning a Russian barracks at the American base camp. Miss Corbett writes, which they have made over into a Y. W. C. A. hostess house.

With this as a center, they are proceeding to arrange all sorts of activities to add interest to the hours when soldiers, sailors and Red Cross workers, quartered in the city, are off duty.

How to Kill It Seems Dit Foolish Hum Heart. Wise Japanese.

BY ARTHUR BRISBANE

Mr. Morgenthau says "Germany through this war a perfect dyo of strength." Her power, he ys, is as great as ever, and her sixly-five million people have been hard-ened by the war. Perhaps the wars are not exactly over, in spite of peace terms that take German colonies, Ger- man land, German ships, German money, and forbid German military effort. It is difficult, however, to say what can be done to reassure those like Mr. Morgenthau, still wor- ried about Germany. Some comfort in the fact that no more Hohenlo- zerns run Germany. In their place serious harness makers who have per- haps had enough of "odshed.

It is difficult to see what more the allies could have done. Old fashioned methods of selling the able-bodied men into slavery, carrying off the younger women, knocking young chil- dren on the head, are no longer toler- ated. It is too late in history for Marshal Foch to send to Paris the message that Cromwell sent from Ire- land: "I shot every tenth man, the rest I sent to the galleys. The monks I knocked on the head."

War is as horrible as ever, but has lost its efficiency in killing off na- tions. Even Cromwell, as you may learn by reading the newspapers, did not succeed in killing off Ireland, or her willingness to fight.

When gasoline was an almost worthless by-product of the petroleum business, newspapers bought it for five or six cents a gallon to wash ink from type. The gasoline engine was invented, and the price climbed. Gasoline being dear, somebody in- vented farm machinery to be run with kerosene, costing only eight cents a gallon. Now kerosene costs eighteen to twenty cents a gallon, and going up.

No problem is solved by shifting your fuel. You must shift the power of taxation from private individuals to the government.

When the Belgian King comes here the bankers will announce in his honor a loan of fifty millions or more to Belgium. How much could the Eng- lish king get if he came? He got sev- eral thousand millions by sending in- telligent representatives, Balfour and Reading.

Would it not make Washington and some others dizzy if they could know how their Uncle Sam has been heap- ing goals of fire on the British head. Many things happened between 1776 and 1918.

John D. Rockefeller gives two mil- lion dollars, unconditionally, to needy anti-ist ministers of the Northern states. This should console you for the high price of gasoline. Prosperous men often assert, and sincerely be- lieve, that the Lord enables them to accumulate large amounts of money because they know how to spend it more wisely than other men would spend it. Mr. Rockefeller's gift is an interesting demonstration.

Two millions of the money being given directly to servants of the Lord. Japanese gentlemen arrive, thought- ful and able. The percentage of ef- ficiency in Japan is high. One gentle- man, Prince Kanohe, says the peace issue is all right; Shantung will be adjusted by-and-by. Japan would give Shantung back to China right away, only the Japanese are afraid that Germans might get another foot- hold in Shantung. That is touching and convincing.

Mr. Kwikawa, manager of the Nippon Steamship company, says Jan- an holds third place among nations in maritime power, and is going after first place. His company is building at the rate of 600,000 tons a year. The

Japanese usually do what they under- take. Mr. Kwikawa, manager of the in America, where a generous govern- ment having taxed its citizens to build ships is now selling them below cost with permission to put them un- der foreign flags.

The more disgrace to that govern- ment.

Mr. Kwikawa, whose ships are di- rectly under control of his govern- ment, is planning great lines of steamers from Japan to Liverpool, to Hamburg, to South American ports; thirty ships will go to India, thirty to New York through our Panama canal, and twelve to London.

With this country scattering its ships among home grafters and foreign nations, and Japan concentrat- ing at home, American shipping will soon be a joke compared to the Japanese. That ought to interest the government of the United States more than the problems of Armenia, Siberia, England or Czechoslovakia.

GIRLS OF WELLESLEY TRAIN FOR MEET

International News Service. WELLESLEY, Mass., Oct. 4.—Girl athletes at Wellesley college are to have training tables. Tea, coffee and—worst of all—candy are forbid- den. Nothing but fruit may be eaten between meals. The girls must have a cold shower every day and have complete rest fifteen minutes. The training will be in effect for three weeks prior to the field day on No- vember 1. All teams participating in sports on field day must undergo the training course.

LONDON, Oct. 4.—Colonel John Ward, who has just returned from Siberia where he commanded a battalion of British troops which helped to over- throw the Bolshevik power, there- says: "In my opinion the only chance for democracy in Russia lies in the success of Kolchak. His atti- tude on the land question shows that he is not the reactionary he has been represented. He sees clearly that the distribution of big estates among the peasantry cannot be interfered with. "It is proposed that those land own- ers who have survived Bolshevism shall be given compensation for the land they have lost but there is no idea of restoring the land to them. Kolchak stands up for the poor peasants against what Lenin has been called the 'village of bourgeois.' "It is found that well-to-do peasants had murdered many of the land- owners, given a meagre portion of the poorest land to the poor peasants and joined the bulk of the estate to their own holdings. Kolchak, with the ad- vice of representatives of the allies, decided to secure for the poor peas- ants a fair distribution of the land. When this was known the comparat- ively wealthy peasants, who had se- cured the biggest share of the land raised the cry that the old state of af- fairs was to be restored. In many cases they stirred up the peasants to riot and caused disturbances which had to be put down by force. "To know what Bolshevism is you should have been with me at Perm when the ice on the river was melt- ing and the bodies of many who had been murdered by the Bolsheviks were revealed. I myself saw fifty of them and among them were the bodies of a number of women and children. At one place there was a wash house built over the river. The Bolsheviks cut a hole in the floor through which they dropped their victims into the deep waters beneath. Bolshevism means the end of democracy. I am certain that if Russia is left to the Bolsheviks it will ultimately return to autocracy."

When the Belgian King comes here the bankers will announce in his honor a loan of fifty millions or more to Belgium. How much could the Eng- lish king get if he came? He got sev- eral thousand millions by sending in- telligent representatives, Balfour and Reading.

Would it not make Washington and some others dizzy if they could know how their Uncle Sam has been heap- ing goals of fire on the British head. Many things happened between 1776 and 1918.

John D. Rockefeller gives two mil- lion dollars, unconditionally, to needy anti-ist ministers of the Northern states. This should console you for the high price of gasoline. San Saba County Attracting Attention As Interest Center of Developing Fields

SAN SABA, Sept. 26.—After a period of comparative inactivity for a few months, drilling operations in San Saba County are being resumed with renewed interest. The great oil structures in that district of the State are attracting the interest of the big as well as the small independent op- erators.

The Royal Duke Oil Company which holds several thousand acres in the Lick Hollow section, is drilling at 800 feet in hard gray limestone. At 770 feet a small showing of oil and gas was found. Water is flowing over the top of the 15-inch casing and also over the 12-inch that was set at about 600 feet on top of the lime- stone. Water in the hole and other incon- veniences suffered because of the big rains that have recently fallen in that county make drilling extremely slow.

Charles H. Bridges, geologist, re- ports that a location has been made for another well near the Royal Duke, and that the New Texas Oil Company, having taken over the leases of the Martin Oil Company, will resume drilling on that well just north San Saba.

Regency Well is Deep. The Regency well of the Fidelity Oil Company is down about 2,100 feet. The location is about 15 miles north- east of Richland Springs.

Mr. Bridges, who is probably more familiar with the anticlinal structures of San Saba County than any other geologist in the State, expresses con- siderable confidence in securing pay- ing oil wells in certain parts of the county if the structures are thorough- ly tested. He states that San Saba has more visible oil structures than any county in the State, containing the same formations that have given forth big production in Eastland, Stephens and Comanche Counties.

Indications of Oil. Test wells already drilled in San Saba County indicate a very hard limestone found at depths ranging from 300 to 1,000 feet. Before pass-

ing through this formation the drill must penetrate about 500 feet, while what is known as the Hickory sand- stone is found. Outcroppings farther south show this sandstone to be about 300 feet in thickness. The Foster well in Mills County encountered this sand- stone at 3,000 feet, and the company has a 20-barrel well at that depth. The Royal Duke Oil Company should find the same formation at from 1,400 to 1,500 feet.

Geological research has also dis- covered that under the Hickory sand- stone is about 1,000 feet of meta- morphosed limestone, and under that granite. If an impervious bed and dome have anything to do with petroleum being collected and held in pools, or reservoirs, this 500 feet of solid gray limestone above and an unknown depth of granite below indicates ideal condi- tions for one of the greatest oil dis- tricts in the world.

Entire County Leased. There is some speculation, how- ever as to whether the so-called dome of this great reservoir was laid down at a period when animal and plant life was abundant. If not, advocates of the organic origin of petroleum condemn the San Saba district as unproductive of oil, unless there has been a seep- age from other great pools.

Practically the entire county has been leased, most of the acreage being held by the big companies. County records show that the Prairie Oil & Gas company, the Magnolia Petro- leum company, the Sinclair Oil com- pany, the Ohio Cities Oil & Gas com- pany, the Texas company, the Texas Eastern Oil company and the Texas Oil company have immense holdings in San Saba county. It is understood, however, by the oil fraternity that these companies are having all they can do to keep up with drilling opera- tions in the proven fields. These are, therefore, contented to let what is con- sidered wildcat territory be proved up by other interests.

PROF. BRUHL GIVES FIRST OF LECTURES AT HARVARD

International News Service. CAMBRIDGE, Mass., Oct. 4.—Prof. Lucien Levy-Bruhl of the Uni- versity of Paris, who has just arrived in this country as an exchange pro- fessor from the Sorbonne to Har- vard, made his first public appear- ance when he gave the first of a series of weekly lectures in French at Emerson hall, in the Harvard yard. Professor Levy-Bruhl's subject was "French Philosophy in the Nineteenth Century." The whole series of lec- tures will roughly parallel the col- lege course which he is to give during the first half year under the title of "Philosophy Sixteen."

LOS ANGELES POPULATION HAS INCREASE OF 690,000

International News Service. LOS ANGELES, Oct. 4.—Since 1889 Los Angeles has grown from a population of 50,828 persons to an estimated population of 650,000, ac- cording to the report of City Auditor John S. Myers. The assessed value of taxable property has increased from \$39,479,172 to \$695,642,547 during the same period.

Too Big for Jail. NEW YORK.—Emery Titman was ordered to jail for passing a worth- less check but he can't get in. He weighs 600 pounds and the doors are too small. He's in the hospital.

MY PRICES AND TERMS TALK

COL. RUFUS J. LACKLAND'S MESSAGE TO REAL HOME BUILDERS

He is the man I have been after for the past fifteen years. In all of my townsite and addition propositions I have gone after the working man, the real home-builder, the man that is worth something to a town and community--and I am still after him. Look at my Byrens-Riddle addition to Ranger--built up with deserving home-owners. Look at my Lackland addition--more real homes built in the last ninety days and more under construction and contracted for than any other two additions in town; and they are homes for real home-owners--not rent houses. Your neighbor in Lackland addition will own his own home. Mr. E. E. Douglan has built 9 nice homes in Lackland addition and sold them all to home-buyers before he got them finished. W. W. Bolen & Son have built two and have the lots bought for four more. The West Texas Home Builders have their first one of fifty under construction. Besides, individuals have constructed fifty-five homes and two stores within the last ninety days.

YES, THERE IS A REASON WHY

Lackland addition lot prices and terms are right. All corner lots, \$350; all inside lots, \$300 each. The regular terms are \$50 down on each lot and \$25 monthly. **MY SPECIAL TERMS NOW TO HOME BUILDERS ARE \$50 DOWN ON ANY TWO LOTS, AND \$30 MONTHLY WILL CARRY BOTH LOTS.**

Lackland Addition is well located, being only about ten blocks Northeast of the T. & P. depot, out the Main road to Tiffin, the industrial heart of Greater Ranger. Lackland Addition has three lines of city sewer, two main lines serving more lots than any lines in the city. Lackland Addition is the best drained level body of land in the city limits. I paid out \$1,800.00 to competent engineers and graders to lay out and grade all my streets so that drainage would be perfect. No water stands on any lots or place in Lackland Addition.

TALK ABOUT WATER

Some additions blow about one or two good water wells. Do you know on my Byren's-Riddle and Lackland Addition we have eighteen fine wells of good pure sheet water, the best you ever saw, and not a dry hole has been struck. Now if you want to find the most comfortable part of Ranger's population just drop into any home on Lackland Addition. You will not find a person that will say they want to move because they don't like our Addition or the Lackland treatment they get.

A WORD ABOUT MY KIND OF RESTRICTIONS

I say to you, build just as good a home for yourself, wife and children as you possibly can, for the best is none too good for you. But if you can't build the kind of home you want, stop paying the high Ranger rent. My doctrine is, the man who can only build a small home deserves it just as much as the man who can build a fine house, and the small house man should not be denied a place to build his home or be restricted of a home. My instructions are: You have to observe a 20-foot building line. You cannot sell or lease your lot to negroes, Mexicans, or team camps. Build what you can afford.

If you want a home site, come to me and I will sell you one that will please you and at the right price and on terms you can afford to meet.

COL. RUFUS J. LACKLAND, THE OWNER OF LACKLAND ADDITION

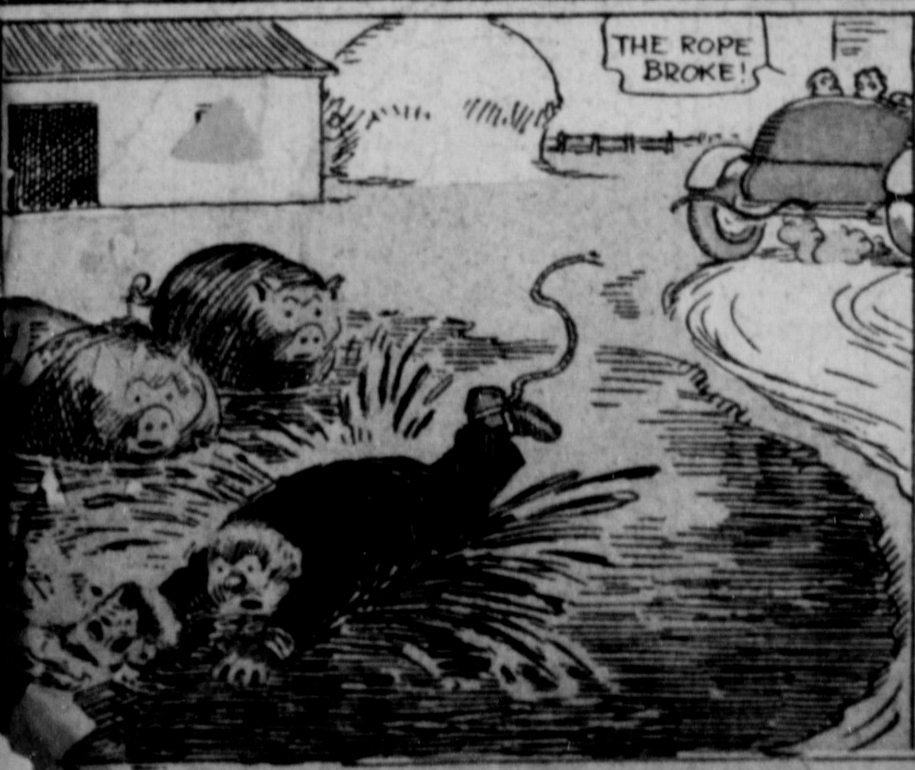

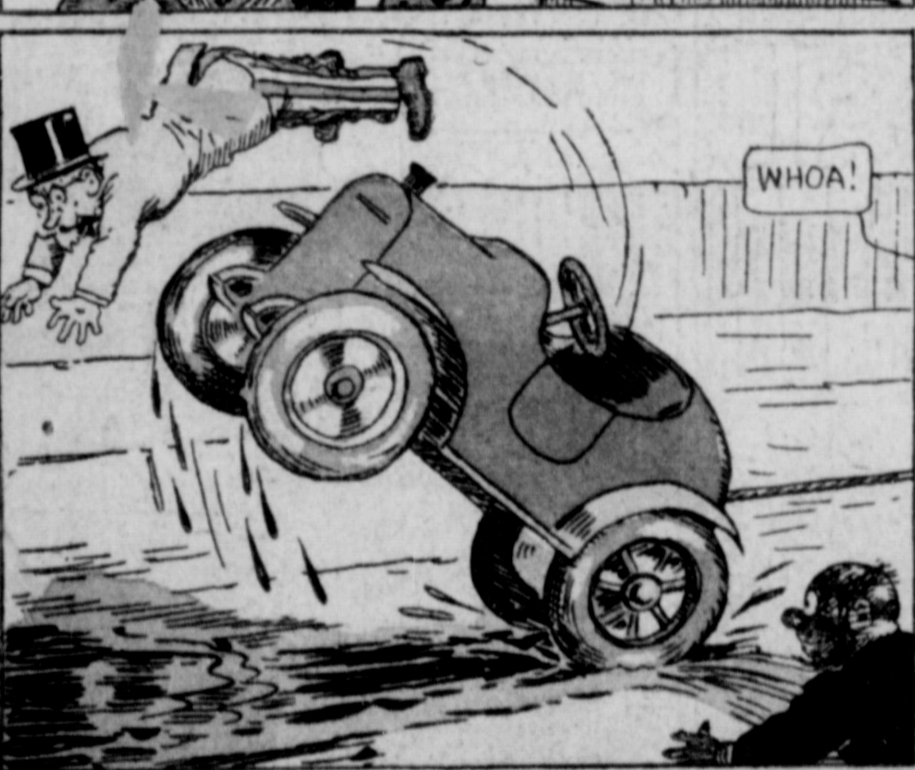

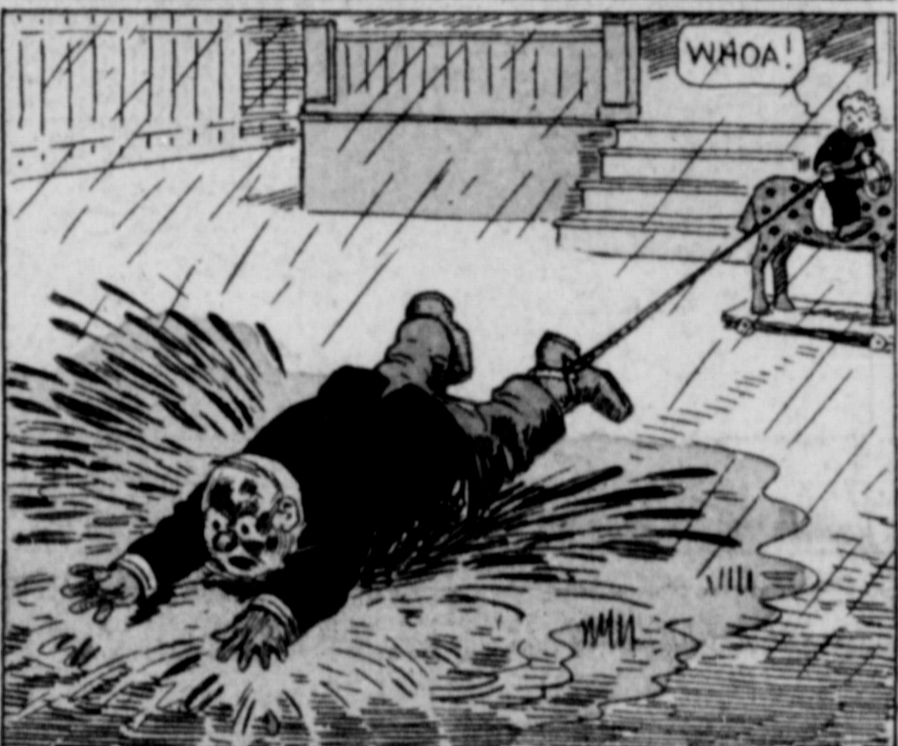

And the man who has put more deserving people in homes than any two Addition Dealers in Ranger.
