SUNPOST—Arrows in this symbolic three-dimensional representation of our solar system proceed outward from the sun, initial source of all energy. Symbol of the Association for Applied Solar Energy, it's a "sunpost" to a tomorrow when man hopes to harness the sun's energy directly for performance of the world's work. Several hundred scientists recently met in Arizona to discuss technical and practical aspects of harnessing solar energy.

Another thing, Weepin', we feel quite sure that no one in Ranger is expecting a "great victory," as you call it. True, we are desperately hoping that the Bulldogs pulverize your Mavericks, because to us, a game that will settle a district race means something.

Also, possibly Ranger can't stand a loss as well as Eastland and we'd be mighty proud if they can't. But, in the same token if the Mavericks are defeated Friday night by any margin no matter how great or how small, you'll have to cut your way through the gloom on the streets of Eastland Friday morning.

Hey, Weepin' we're talking to you.

A NEW NAME...for a Sound, Time-Tested Feeding Service!

We're changing our name, effective immediately. From now on, our grinding and mixing service will be known as "CHECK-R-MIX."

Take a closer look at the emblem above. You'll find it features rural America's most familiar trademark—the Checkered. That means that Purina Mills, a leader in the Feed industry for more than 60 years, is back of this new service we're offering.

Yes, Purina plays a big part in our Check-R-Mix service. Here's how it works: We are equipped to take your grain, grind and accurately mix it with Purina Concentrates. Purina Research sees to it that these concentrates "balance" your grain—make it do the job better than it could before. Still your only out-of-the-pocket cost for a Check-R-Mix ration is for grinding and the concentrate.

We think you'll agree that our new Check-R-Mix service makes a fine opportunity for poultry and livestock feeders in this community to make their grain worth more. Bring in a load of your grain. See for yourself why so many of your neighbors use our Check-R-Mix Service.

Thanksgiving Delights - Peach Melba And Coffee

HAVE you planned your dessert for Thanksgiving dinner, that "something special" to serve with cups of fragrant coffee after the turkey is cleared away? Hot Peach Melba is a perfect choice. It's an elegant dessert, it looks pretty as it comes to the table in a chafing dish, and it doesn't mean much work for a hurried holiday cook.

Peach Melba has a glamorous history, too. Originally, it was created by the famous chef, Escoffier, in honor of the equally famous opera singer, Dame Nellie Melba. This "vision" is much like Escoffier's: golden peaches nestling under snowy ice cream topped with a colorful raspberry sauce. But the peaches are canned ones and the raspberries are frozen for quick and easy preparation.

So fill the cups with your best coffee. Make the brew flavorful, steaming hot, and bring on Peach Melba. Together, they will make

this Thanksgiving dinner one to remember!

- Hot Peach Melba
 - 1 1/2 cups frozen raspberries
 - 1/2 cup cold water
 - 1/2 cup peach syrup
 - 2 cups canned peach halves
 - 1 quart vanilla ice cream
 - 1 tablespoon cold water
 - 1/2 cup peach syrup
 - 2 cups canned peach halves
 - 1 quart vanilla ice cream

In a saucepan mash the raspberries. Add jelly and bring to boil. Blend cornstarch and water and add raspberry mixture. Cook, stirring, until mixture is clear. Put through sieve or food mill. Add peach syrup from canned peach halves. (This can be done well ahead of serving time.) When ready to serve, place peach halves and syrup in chafing dish and heat. Place hot peach half, hollow side up, in each serving dish. Top with vanilla ice cream and spoon sauce over each helping. Makes 4 delicious servings.

with a white linen cut-work cloth. White tapers burned at each side of the centerpiece of Chrysanthemums and pom poms of bronze and gold. The small tables were laid with white linen cloths and centered with a smaller arrangement of the same flowers as the centerpiece on the main table.

It Was Just An Accident—

...hat Columbus discovered America, or was it luck? He himself said that his journey would be hazardous and he didn't know where he was going. But he had faith that he would discover a great land and he did. Likewise, the person who buys land without an abstract is embarking on a dangerous course. Like Columbus he must have faith that he won't lose his all and plenty of luck to avoid financial disaster.

Gulfpride Select Oil works clean. Most conventional oils are in the stage shown in A. But New Super-Refined Select Oil is further refined by the moving up to 15% more in B... C... D... E... F... G... LEGAL VERBIAGE SOMETIMES JUSTIFIED

Many persons feel that the "whereases," "aforesaid," and other legal verbiage is used by the lawyer for the purpose of confounding the layman.

Nothing could be further from the truth. In drafting legal documents, the lawyer attempts to draft them in such a way as to exclude all ambiguities. In the last analysis, a legal document means what some court at some future time shall declare that it means. As a consequence, it is the lawyer's duty to his client to attempt to draft the instrument in such a way that it can mean only one thing.

Most any paragraph of non-legal language contains numerous ambiguities. When a lawyer refers to the "deed aforesaid," he is attempting to make it clear beyond question that the deed he is referring to is the deed mentioned in a prior portion of the instrument. Likewise, when he prefaces a legal document with a long list of "whereases," he is simply reciting pertinent facts for the benefit of the court to show the facts of the situation

TO EACH HIS OWN—Students approach unique on-campus religious facilities of Brandeis University, Waltham, Mass. The three modernistic structures house chapels for each of the major faiths represented among student enrollment. Believed to be the only such installation in the United States, it includes, from left: Berlin Chapel; (Jewish); John Marshall Harlan Chapel (Protestant); Bethlehem Chapel (Roman Catholic).

that lead to the execution of the instrument.

The difficulty with drafting a document in layman's language is that to the trained analyst such language is susceptible of several meanings, and consequently is likely to lead to litigation. It is the draftman's purpose to avoid litigation which is usually expensive for the client.

Another reason why lawyers use legal language is historical in nature. Thus most deeds declare that the grantor "by these presents does grant, sell, and convey" the land in question to the grantee. Each of the words recited have a technical meaning. The

words together have frequently been construed by the courts and consequently the lawyer knows in using them that their meaning is settled, and that they will operate to properly transfer the title. He would be inviting litigation for his client, if instead of using those words, he devised new language to express the same purpose. He could only say, "While I think the language that I have used will accomplish the purpose, I cannot be sure of it."

As a consequence, the lawyer, in the interest of his client, naturally uses the time-tested language.

(This column, based on Texas law, is written to inform — not to advise. No person should ever apply or interpret any law without the aid of an attorney who knows the facts, because the facts may change the application of the law.)

A "laboratory of the sun" has been proposed by scientists meeting in the First International Symposium on Applied Solar Energy, at Phoenix, Ariz. Its task would be to devise means to harness the sun's power with aid of solar engines now being developed.
