

The Sudan News

VOL. 3

SUDAN, LAMB COUNTY, TEXAS, FEBRUARY 17, 1928

NO. 34

What's Doing in West Texas

Matador—Two hundred guests attended the annual banquet of the Motley County Chamber of Commerce held here February 6. A. J. Spangler is secretary.

Valley Mills—Valley Mills of Bosque County is one of the newest member towns of the West Texas Chamber of Commerce, having taken out five memberships.

El Dorado—Improvements in the El Dorado water system will be made after March 1 when O. W. Evans, new manager, takes charge.

Brady—Ballenger, Brady and San Angelo have deferred action on the proposal submitted to them by Brownwood citizens until after reception of the recommendations made by the West Texas Chamber of Commerce Special Water Rights Committee Feb. 13.

Gorman—Test of a soft water well recently put down here is being made by the city.

Sweetwater—A general mass meeting of all interested in combating the pink boll worm is to be held here Feb. 25 under auspices of the West Texas Chamber of Commerce.

Mertzou—W. W. Adams, local grocer and marketer, is erecting a building here to be furnished with new equipment for his growing business.

Pyote—Pyote has affiliated with the West Texas Chamber of Commerce with ten members.

Fort Stockton—Additions and improvements to telephone lines of Rankin, McCamey, Marfa, Fort Davis, Presidio, and other towns on the Fort Stockton lines are contemplated.

O'Donnell—B. M. Whitaker, agricultural manager of the West Texas Chamber of Commerce, recently completed an agricultural school in Dawson County, sponsored by the Dawson and Lamesa Chamber of Commerce.

Junction—The Junction State Bank is building a million-pound capacity wool and mohair warehouse of fireproof construction.

Clifton—The city of Clifton is now a member of the West Texas Chamber of Commerce. Mayor Ed Handley of that place has just paid the membership fee for the town. Five individual memberships were taken, also.

Bronte—Bronte is considering revival of the old Coke County Water Project and will be joined with Winters in the movement.

Comanche—A creamery and sweet milk market is operating here, with units to be added as needed.

Llano—Building activities in Llano for 1928 will surpass those of previous years, the most important project being a community hotel.

Fluvana—Work is under way on a new road leading north of here.

Memphis—A brick building costing \$24,000 is under construction in this place.

Childress—Erection of a water tank of 75,000 gallon capacity is under way here for the Denver road shops.

Frances Miller returned from Amarillo Tuesday. Mrs. Miller and the children remained for a longer visit.

Immigration Remains An Important Question

Washington, D. C.—"Those who assume that the nation's immigration problem has been permanently settled by the Acts of 1917 and 1924, and that the public may safely withdraw its attention from the question, will be jolted by a sudden realization that the danger which formerly alarmed it has returned or developed into calamity," said Representative John C. Box, of Texas.

"The difficulty of enforcement," he continued, "is nearly or quite as great as that of enacting necessary laws. Men here wanting cheap and subservient labor powerfully oppose necessary laws and use the same powers to prevent their enforcement. They will continue to strive to nullify the laws enacted."

"Citizens must remember that this problem will require their watchful attention so long as the world conditions which cause men to migrate continue and that these conditions are as old as the race. The problem will continue as long as America has a present and a future heritage to protect."

Choir Practice Friday Eve.

There will be choir practice each Friday evening at the Methodist church. If you enjoy singing come out and be with us. It will help you and also add to the church and Sunday school services. Be present Sunday night.

Watering Places

Baby chicks require an immense amount of water in proportion to their size. Beginners seldom have water containers enough or fill them often enough. Because of the heat in the brooder house, water for chicks is very essential. Take the water away for a few hours and mortality will be very heavy. The weaker chicks do not get water when they have to fight for it. Over half of the chicks should be able to drink at one time. The number of containers will depend upon the size and drinking space allowed by each. — Progressive Farmer.

Rev. Hembree, a Baptist minister of Plainview, preached at the school auditorium Sunday.

Mr. and Mrs. Shive, of Amherst, were here Sunday.

Mrs. B. F. Carpenter and little daughter have returned to Slaton, their home, after visiting several days with W. W. Carpenter and family.

Miss Allie Allen, of Amarillo, is visiting her parents, Mr. and Mrs. O. L. Allen, this week.

The Lamb County Teachers Association was well attended. Several instructive talks were made by the following speakers: President Hill, of West Texas State Teachers College, and Dr. Horn, representative from "Tech."

Born to Mr. and Mrs. Charles Wiseman, 10 miles west of town, a baby boy on Friday. The baby only lived a few hours. Interment was made in the Sudan cemetery. This was Mr. and Mrs. Wiseman's first child.

Chevrolet Still In the Lead and Going Strong

Detroit, Mich., Feb.—All previous January production records were shattered here last month by the Chevrolet Motor Company when the total output for the thirty-day period reached 91,584 units, W. S. Knudsen, president and general manager, announced today.

This figure topped by nearly 20,000 units the 73,676 cars and trucks produced in January, 1927, and more than doubled the outlet for the corresponding month in 1926 when only 46,437 units were manufactured.

As a result of this tremendous volume, production in January was exceeded by that of only four other months in the entire history of the company. Every indication points to new Chevrolet records in the coming months of 1928, Mr. Knudsen said.

The tentative production schedule for February is 112,475 units, as against 85,000 units last February, while actual production for the month this year is certain to exceed the tentative schedule by a comfortable margin, Mr. Knudsen said. Tentative plans for March call for the building of more than 127,000 units, which will establish a new all-time monthly record for the manufacture of gear shift cars, according to Mr. Knudsen.

This huge volume has been made possible by the enormous sales gains registered since the introduction of the "Bigger and Better" Chevrolet on January 1. R. H. Grant, vice-president of the company in charge of sales, stated that more than 125,000 units were sold for immediate delivery at retail in the United States to date.

Another high record was set during the Chicago Automobile Show, ended February 4, when more Chevrolets were sold during show week than any other make of car at this or any other automobile show.

Chevrolet officials were unanimous in the opinion that the company's performance last year when it built and sold a million units to become the world's largest automobile manufacturer, would be substantially expanded this year.

"I am just as confident of selling a million cars this year as if I had them sold right now," Mr. Grant said at a recent dealer meeting.

To achieve this record volume the seven great assembly plants strung across the Continent are on peak production schedules in answer to calls from the 45 Chevrolet zone headquarters for ample cars to assure prompt delivery to the public. Another assembly plant, with a production capacity of 650 cars a day, will get into full swing within a few weeks at Atlanta, Ga., to augment the facilities of the other factories now running to capacity.

A measure of how enthusiastically the new car was received by the public was shown by the fact that the January production schedule had to be stepped up on six different occasions to keep the manufacturing volume on an even basis with rapidly piling up orders. The first tentative figure for the month was set on Nov. 17 and called for the building of 72,058 units.

Five hundred more units were added to this figure on December 1, and on January 5, after fact-

A Big Day In Sudan

Saturday was a gala day in Sudan. People came from far and near to attend to business and to enjoy the occasion. Music and moving pictures were the chief attractions at the Garden Theatre, and so great was the crowd in town that three big shows were necessary to accommodate them. This event was planned and carried out by the business men of the town, and for the purpose of creating and maintaining an amicable relationship between town and country, between merchant and farmer, country man and business man, and to feel that we are in reality brothers, as man and man should be. And, we believe this was demonstrated so far as Sudan and her trading public are concerned, and we trust that the mutual good will and appreciation manifested on all sides here Saturday may be increased and strengthened as time goes by.

The Plateau Singing Convention will meet at Amherst next Sunday, the 19th, inst., for an all-day singing. Lovers of good music can enjoy a royal treat by attending this convention. One of the principal features of the occasion will be the famous Stamps Quartette, which will add its "pleasing tones" to the joys of the day.

Social Postponed

The social announced for the 22nd at the Methodist church has been postponed until the 24th. Keep in mind the date and come out and enjoy an evening of fun. Good music and cherry pie galore.

The small son of Mr. and Mrs. C. L. Gilreath, who has been an invalid since having infantile paralysis several years ago, died Saturday night and was buried here Sunday.

Donna Geane, the small daughter of Mr. and Mrs. Ulys King, 10 miles northwest of town, was taken to Lubbock sanitarium, where she was operated upon for appendicitis.

FOR SALE—S. C. Rhode Island Reds, richly-bred, Owen Farm Strain. Carefully selected for years, none but the best for breeding-stock. Eggs, \$1.50 per setting; \$6.00 per 100. Walnut-view Farm, R. L. Mays, Prop'r, 2 miles east of Amherst School Building.

J. H. Furneaux, of Dallas, is here this week.

ry officials saw the measure of enthusiasm the new car was commanding, 10,000 additional units were ordered built. On January 9 this figure was stepped up another 1,000 units, and since that date two general orders went out to assembly plants to over-run for a total of 8,000 more cars and trucks.

Finished cars are leaving the factories with all possible dispatch that dealers in all quarters of the country may have an ample supply to make prompt delivery on all models. In addition, the seventeen overseas plants operated by General Motors Export are humming along at a record clip to supply the foreign market with the "Bigger and Better" line.

Resolutions Passed By the Texas Farm Bureau Cotton Association

The following is a copy of the resolutions passed at the Group Leader Meeting held in Lubbock, February 8, 1928. The original has been sent to Dallas and copies to the Field Men of Districts 18 and 19:

We, the officers and representatives, and members of Dawson, Lynn, Garza, Terry, Hockley, Lamb, Lubbock, Crosby, Floyd, Hale, and Motley counties, at the request of our Directors, R. E. Overstreet and M. S. Hudson, have this the 8th day of February, 1928, assembled at the courthouse in Lubbock to discuss the present crisis of the cotton farmer in general and the Texas Farm Bureau Cotton Association in particular, and

"Whereas: After a free and frank discussion of this question by our directors and all parties present, it was brought out that the world production of cotton for 1926 was 27,813,000 bales and the world consumption was 25,869,000 bales; leaving a surplus of only 1,944,000 bales. The estimated production of the world for 1927 is 22,789,000 bales of cotton, and at the present rate of consumption is equal if not greater than that of last year, which would indicate no carry-over, if not a shortage, before another crop can be produced. And,

"Whereas: When the above facts were made evident by the government estimate in November, the price of cotton jumped to 24.90, which we believe was not out of line from the standpoint of supply and demand but at which time our Secretary of Agriculture made his now famous statement of "I do not choose for the farmers to get much for their cotton" this year, which brought about this outrageous condition that we find in the South at this time. And,

"Whereas: We realize the literal advance our association has extended to our members, (and we believe it was justified if the market had not been tampered with) but this fact has put our association in a precarious position at this time and made doubly so due to the libelous reports put out by the cotton exchanges throughout the country against the association. And,

"Whereas: We believe that the present condition was brought about not only to defeat organized farmers, who are fighting to improve the living condition of the American farmer, but was directed also at the unorganized farmer who dared to believe he was entitled to a better price for his cotton from the standpoint of supply and demand, and held his cotton to that end.

Therefore, Be it Resolved: That we, regardless of the financial outcome of our association this year, we do hereby reaffirm our faith in our organization, and do hereby pledge ourselves to go out from this meeting with a determination to defy any man or men that dares to attempt to defeat our effort to thwart peasantry in free America.

And Be It Further Resolved, That: Whereas cotton is the basis of our prosperity, not only to the cotton farmer, but our state as a whole, we therefore appeal not only to every red blooded cotton farmer to join with us in this fight that our prosperity may

Judge E. N. Burrus Announces for Re-Election

Judge E. N. Burrus authorizes the News to announce his name as a candidate for judge of Lamb county, subject to the will of the Democratic primary election.

Judge Burrus is now serving his second term in this office, and therefore is well known to our people. We understand that the Judge intended to retire at the expiration of his present term, but being strongly solicited by many friends throughout the county, consented to stand for re-election. This is a high recommendation, and attests his efficiency in office as well as his popularity and moral worth as a man and citizen. One of the outstanding features of his efficient work during his present term of office, is the fact that Lamb county enjoys an excellent good roads system, and built, too, without additional taxation. If we are to judge a man by his past works, which is the only infallible rule, then his claims merit your careful consideration before making your final choice.

Recital Tuesday Evening

Mrs. L. L. Price presented her music class in a recital Tuesday evening. A goodly number were present to enjoy the occasion. The pupils all did exceedingly well.

The P. T. A. realized \$13.50 from their food sale Saturday, held at the Sudan Mercantile. This will be applied on the piano.

Don't fail to attend the style show at the Sudan Mercantile Co.'s Saturday. Notice the ad elsewhere in the paper this week.

Mr. V. H. Morrison, of Lubbock, has purchased the Hokus Pokus family grocery of Sudan, and will continue the business at the same place as formerly. The Hokus Pokus always carries a full line of first-class goods, and we wish for the new management a fair share of Sudan's prosperity.

We regret to chronicle the death of Mrs. J. W. Withro, which occurred at her home northwest of here on the 8th, inst. Mrs. Withro was 55 years of age, and leaves a husband, 4 boys and 5 girls to mourn her loss. She was buried in the Sudan graveyard, Rev. W. A. Kercheville, of Olton, conducting the ceremonies.

Snow began falling here Wednesday night at about 1 o'clock and continued incessantly for more than 18 hours. It is estimated to be 7 inch in depth on the level. This will make a fine season, and we learn that all the Panhandle and South Plains got about the same.

S. D. Hay and J. R. Dean were business visitors in Ralls Friday.

Mesdames L. E. Slate, J. P. Robertson, W. L. Lyle and W. N. McNeely were in Lubbock Tuesday.

not become vassals in the hands of a few, but we also appeal to our friends in the business world to give us their moral support and their cooperation for the betterment of all.

Caught Cold at Noon; Sang that Night!

Trust a professional singer to know what to do for a cold! Give him five hours, and he can knock out a cold that would have prevented his singing one note. The secret of going a whole season without a serious cold is something everybody ought to know. A simple compound does it, and it is obtainable in tablets. First one will stop a cold with the first sniffle; several will break up a cold that's even reached the stage of grippe! Pape's Cold Compound costs but 35c at any drug store.

Help Kidneys By Drinking More Water

Take Salts to Flush Kidneys and Help Neutralize Irritating Acids

Kidney and bladder irritations often result from acidity, says a noted authority. The kidneys help filter this acid from the blood and pass it on to the bladder, where it may remain to irritate and inflame, causing a burning, scalding sensation, or setting up an irritation at the neck of the bladder, obliging you to seek relief two or three times during the night. The sufferer is in constant dread; the water passes sometimes with a scalding sensation and is very profuse; again, there is difficulty in voiding it. Bladder weakness, most folks call it because they can't control urination. While it is extremely annoying and sometimes very painful, this is often one of the most simple ailments to overcome. Begin drinking lots of soft water, also get about four ounces of Jad Salts from your pharmacist and take a tablespoonful in a glass of water before breakfast. Continue this for two or three days. This will help neutralize the acids in the system so they no longer are a source of irritation to the bladder and urinary organs, which then act normal again. Jad Salts is inexpensive, and is made from the acid of grapes and lemon juice, combined with lithia, and is used by thousands of folks who are subject to urinary disorders caused by acid irritation. Jad Salts causes no bad effects whatever. Here you have a pleasant, effervescent lithia-water drink which may quickly relieve your bladder irritation.

GOOD SHOULDER FIT IMPORTANT

Seam Acts as Anchor for Rest of Garment.

(Prepared by the Bureau of Home Economics, United States Department of Agriculture.)
Fit the shoulders first of all when you are making a dress. When the shoulder seam is properly placed it acts as an anchor to the rest of the garment. As a result the material should hang smoothly over the chest and shoulder blades with no wrinkles or bulges, either in the front or the back, and there should be no appearance of tightness.

The normal shoulder seam starts at the highest point of the neck line and extends in a straight line to one-half inch back of the highest point on the tip of the shoulder. Try laying a pencil from the neck following the correct line to the tip of the shoulder. This seam line should not be visible from either the front or back when the garment is worn.

When fitting the shoulders, begin at the neck and work toward the armholes, keeping in mind that the lengthwise threads of the cloth must be parallel to the center front and back of the figure and crosswise threads parallel to the floor. The large figure necessitates a slight exception to this general rule, as the crosswise threads over the bust slant slightly downward. Other locations of the shoulder seam are used to give different shoulder effects. For example, to produce a square-shouldered or yoke effect the seam may be placed two or three inches lower in front than the normal shoulder line. That is, the back section of the dress is made to extend further over the front, and the front section of the pattern is correspondingly shortened. The epaulet shoulder is a yoke cut as part of a set-in sleeve. It has two seams parallel to the normal shoulder line.

A set-in sleeve meets the shoulder line at the tip of the shoulder, as shown in the illustration. In the kimono type of sleeve having a shoulder seam the line of the shoulder is followed down the arm as it hangs naturally at the side. This type of kimono sleeve usually fits better under the arm than the type made by folding the goods for the shoulder. In discussing the fitting of dresses and

Correct Shoulder Line for Dress With Set-in Sleeves.

blouses a specialist of the bureau of home economics of the United States Department of Agriculture suggests that if the pattern has not allowed for such a seam you can make a fold in the pattern or in the material directly on top of the shoulder, following its

slope, and sew on this line. This seam will help to adjust the costume to the figure. When this alteration is made the underarm seam is let out the same width as was taken off the shoulder, or a gusset is set in to make the armhole the correct size.

For a round-shouldered person the shoulder seam line should be placed slightly back of its normal position. In both the set-in and kimono-type of sleeve. This will give a more erect appearance to the figure. Placing it on top or to the front will emphasize round shoulders. On the very erect type, this seam is more becoming directly on top of the shoulder. The shoulder of a garment should be wide enough that the set-in sleeve will not be brought up on the shoulder, which gives a pinched effect, yet the shoulder of the garment should be narrow enough to prevent the sleeve from falling below the shoulder tip and so give a drooped appearance. The choice of set-in or kimono type

Correct Shoulder Seam for Dress of Kimono Type.

of sleeve depends, in part, on what points ought to be emphasized in the wearer's build. Extending the shoulder line, as in the kimono type of sleeve, broadens the apparent width of the shoulder, so if a more slender appearance is desired, the set-in sleeve, correctly placed, is better. Hold the back of the waist toward you when basting the shoulder seam. The back shoulder edge should be about one-half inch longer than the front edge. By easing in this extra fullness the entire length of the seam, the shoulder blades are fitted more perfectly. In woolen materials it is well to shrink out this fullness after the shoulders have been fitted and before the seam is stitched.

Fresh Beef Tongue Makes Delicious Dinner Dish

It is not necessary to have all tongue cured before cooking it. Fresh beef tongue makes a delicious dish and is so unusual that one might imagine a new meat had been discovered. Here are directions for preparing it, furnished by the bureau of home economics:

- 1 beef tongue
- 1 onion, large
- 4 quarts water
- 1 teaspoon pepper
- 3 sprigs parsley
- corns
- 1/2 teaspoon salt
- 2 bay leaves

Wash the tongue well and do not trim it. Place it in water to cover, add the seasonings and simmer for two and one-half to three hours or until the meat is tender. Skin the tongue. Slice it and serve hot, or allow it to cool in the liquor after skinning, and serve it cold. Make a stew from the meat at the base of the tongue, the liquor and added vegetables. Or cook spinach or kale in the liquor and serve with the meat which is not in shape for slicing.

AVOID WEARING SHOES THAT CRAMP TOES

Shoes Too Pointed Out and Heel Too High and Badly Placed.

(Prepared by the Bureau of Home Economics, United States Department of Agriculture.)

No one can get around the fact that five toes need a certain space of a certain general shape if they are to spread out naturally and comfortably. When jammed into shoes with pointed, needlelike toes, the feet are sure to be cramped, twisted, and finally deformed. Toes are buckled and piled on one another and bones are bent. Other foot troubles develop. Take this picture of a woman's shoes with a pointed toe. The shoe violates one of the points especially stressed by those who have studied the fitting of shoes, and that is that the inner line of the shoe should be straight.

To be comfortable, safe, durable and attractive, shoes for everyday wear must conform to the natural shape of the feet and protect them.

They must also provide a firm foundation for the body. Shoes of correct shape are broad and round at the toe and straight along the inner edge. A pair of normal feet placed together touch at the heel and also from just in back of the big joints of the big toes to the ends of these toes. The inner edges of a pair of properly made shoes do likewise. The more these edges diverge or curve toward the outside of the shoe the more unnatural the shoe's shape and the greater the wearer's discomfort. If such shoes are persistently worn enlarged joints and bunions are bound to result.

Compare the X-ray of the foot in badly shaped shoes with the position of the bones in the correctly shaped man's shoes designed for army use. There is no room for choice as to which shoe is more desirable.

Improved Uniform International Sunday School Lesson

(By REV. P. B. FITZWATER, D.D., Dean Moody Bible Institute of Chicago.)
(© 1923, Western Newspaper Union.)

Lesson for February 19

TWO MIRACLES OF POWER

LESSON TEXT—Mark 4:35-5:20.
GOLDEN TEXT—What manner of man is this that even the wind and the sea obey him?
PRIMARY TOPIC—Jesus Still the Storm.
JUNIOR TOPIC—Jesus Rules the Storm.
INTERMEDIATE AND SENIOR TOPIC—The Universal Power of Jesus.
YOUNG PEOPLE AND ADULT TOPIC—Jesus' Power over Nature and Human Life.

1. Jesus Calms the Sea (vv. 35-41).
1. Crossing the sea (vv. 35, 36).
Wearied by teaching the multitudes, He proposed that they take ship at evening time to the other side of the sea, doubtless to escape from the throngs of people.

2. Overtaken by a storm (v. 37).
Even though Jesus was in the boat with the disciples they were overtaken by a storm. It is not God's will that we should escape the storms, but those who have Christ on their boat are safe because that boat cannot go down.

3. Jesus asleep in the storm-tossed boat (v. 38).
In the midst of the turbulent elements He was resting in sleep. The day had been a very strenuous one and He was weary. He who made the sea could well lie down and sleep, though the storm violently raged.

4. The terrified disciples (v. 38).
In their minds nothing but disaster and death awaited them. They were not only terrified, but they chided Jesus for sleeping while they were in such great danger.

5. Christ's rebuke (vv. 39, 40).
(1) The wind (v. 39).
This showed the Lord's mighty power to control the forces of nature.

(2) The disciples (v. 40).
He rebuked them for their lack of faith. He showed that they were looking upon their circumstances instead of upon their Lord.

6. The effect upon the disciples (v. 41).
They were filled with great fear. A little while ago they were afraid in the face of the storm; now they are afraid in the presence of the Lord.

11. Jesus Heals the Gadarene Demoniac (5:1-20).
After the stilling of the tempest, Jesus crossed to the other side of the sea into heathen territory.

1. Met by a demon possessed man (vv. 1-6).

This man was in a desperate condition. He was so fierce that no one could safely pass that way. He wore no clothes (Luke 8:27). No chains were strong enough to hold him and no one was able to tame him. In the night time his hideous cries could be heard while he vented his rage by cutting himself with stones. Many today are demon possessed. Much of the insanity of the age is traceable to this cause. As the coming of the Lord draweth nigh these things will increase (I Tim. 4:1).

2. What the demons knew about Christ (vv. 7-9).

They knew that He had come to destroy the devil and his works. Among the demons there is no doubt as to the deity of Christ and the judgment to come, though we have many theologians and preachers who say they do not believe it. The devil blinds their eyes so they cannot understand (II Cor. 4:4).

3. Christ's power to deliver from the devil (vv. 10-13).

He cast out the demons from the man (v. 8). The demons quail before Christ, not daring to dispute His power, so they begged to be permitted to enter the swine. As soon as the Lord issued the permit, they hastened away to hurl the swine to destruction.

4. The effect upon the people of the city (vv. 14-17).

The keepers of the swine fled to the city and made report of what had occurred. This miracle brought the people out, but when they realized the loss of their hogs they besought Him to leave their coasts. They cared more for their hogs than for Christ and the cure of this man. These Gadarenes have many successors today.

The man who was healed sent home to testify (vv. 18-20).

No doubt it would have been safe and pleasant to abide with Jesus, but his friends needed his testimony. The best witness for Christ is one who has been saved by Him. The best place to begin that testimony is at home where one is known best.

MOTHER
A Cross, Sick Child is Constipated! Look at Tongue

No matter what ails your child, a gentle, thorough laxative should always be the first treatment given. If your little one is out-of-sorts, half-sick, isn't resting, eating and acting naturally—look, Mother! see if tongue is coated. This is a sure sign that the little stomach, liver and bowels are clogged with waste. When cross, irritable, feverish, stomach sour, breath bad or has stomach-ache, diarrhoea, sore throat, full of cold, give a teaspoonful of "California Fig Syrup," and in a few hours all the constipated poison, undigested food and sour bile gently moves out of the little bowels without griping, and you have a well, playful child again.

Mothers can rest easy after giving this harmless, "fruity laxative" because it never fails to cleanse the little one's liver and bowels and sweeten the stomach and they dearly love its pleasant taste. Full directions for babies, children of all ages and for grown-ups printed on each bottle. Beware of counterfeit fig syrups. Ask your druggist for a bottle of "California Fig Syrup," then see that it is made by the "California Fig Syrup Company."

Your Loveliness!

can only last as long as your health lasts. Pimples, yellowness and eye wrinkles, (regardless of age) are the sure results of constipation, indigestion and biliousness. Good old Dr. Thacher made it possible for you to preserve your beauty when he gave to the world his famous prescription, known as **Dr. Thacher's VEGETABLE SYRUP**. Relieving the obstruction of constipation at once, the effect is reflected in a clear, healthy skin and a lovely complexion. 60c and \$1.25 bottles are for sale and guaranteed by YOUR LOCAL DEALER

GAY GINGHAM PAJAMAS NEW FAD; EVENING FROCKS ALL AGLITTER

HAVE you heard the latest? They are making pajama ensembles out of gingham. Here's a picture of the very newest. Aren't they just the cleverest ever?

No doubt, every woman who does her own sewing will be wanting to make one or more sets "just like" the pajamas in this picture. Garments as attractive and as practical, not to mention their cunning novelty, as these, really should be included in every

registering a tremendous vogue. The newest effect is that of large white flat crystals mounted in white metal one after another. Also elaborate designs feature pendants of intricate design to which the earrings are matched.

Shoulder pins especially show extreme originality. Among the novelties are large flat flowers with foliage, worked out in flat crystals. Rhinestone pins and necklaces are even of

A Gay Pajama Suit.

home-sewing program this spring. To copy this pajama suit, which, by the way, is called "poinsettia," you will need about three yards of the plain and five yards of the check gingham. At say, thirty cents a yard (lovely ginghams are to be had at that price this year) the entire expense would not be more than two dollars and fifty cents, thread included. Here's one time when it is a pleasure to "stop and think of the cost."

Of course other wash fabrics could be used, but gingham is so absolutely reliable, does not fade, has such dependable wearing qualities, and always comes from the tub looking "just like new."

The gingham which fashions the pajamas shown here is a novelty black and white check in something of a tweed design trimmed with red gingham in a one-tone effect. The sleeveless pajama shirt is also of the red gingham. If you cannot draft and cut your own pattern, secure a regulation pajama and coolie coat pattern, and plan the cutting of your material accordingly. You can easily draw a pattern for the poinsettias which are applied on the checked gingham, or you can substitute another preferred flower.

Here's more good news, which should prove inspirational to the woman who does her own sewing—comes from Paris the announcement that certain of the leading couturiers there are sponsoring frocks of gingham. When it is taken into consideration that ginghams of intrinsic value and wonderful up-to-the-minute colorings can be purchased for twenty-two cents more or less, and that the highest price for the most exquisite is around fifty cents a yard, women who make their own clothes have cause for rejoicing that the style element has entered so completely into the realm of washable weaves.

Scintillating effects continue to glorify the evening picture. In the fashioning of these glittering robes which society's wearing exquisite rhinestone embroideries play the stellar role.

Never has the rhinestone-worked gown been in a more enchanting mood. Pale satins, delicate chiffons, which bespeak the magic touch of rhinestone and crystal seem no two alike, because of an intriguing individualism expressed in their patterning.

Sometimes the artist designer chooses to apply the glittering note with a delicate stroke—just a fairy-like spray of rhinestones positioned here and there. Then again, with great daring, genius adopts an all over treatment which accents the unusual throughout.

Apricot colored chiffon is a favorite this season for party wear, and when beautified with sparkling rhinestones—well, perhaps this picture can tell the story better than words. Win some Barbara Kent, film star, wears this adorable frock when she "goes to parties"—which goes to show how fashion-wise these Hollywood folks are.

Speaking of the glittering note accented by the mode, the supreme flair of the moment is for crystal costume jewelry. Necklaces, bracelets, earrings and especially shoulder pins are

more ornate styling than those of the crystal. Endless ideas are interpreted, such as amusing birds, animals and quaint figures. Not only are these used for shoulder pins but they feature conspicuously as hat ornaments.

Sometimes large cut crystals are used with the smaller rhinestones. Choker collars of these glittering stones are among the very new. Which all goes to show the popularity of glittering embellishment, whether as an actual trimming feature or in the way of accessories.

Among the prettiest glittering frocks are those of beaded lace. Tiny

Striking Evening Gown.

crystal beads used in conjunction with rhinestone tailheads are applied in such a way as to accent the patterning in the lace. Delicate flesh-colored lace gowns thus treated present a phase of the sparkling mode which is most beguiling.

Sometimes the lace gown is embroidered in beads of selfsame coloring. A pale green lace, or a sand-colored lace worked in self-tone beads cannot but prove exquisite.

French "Zoo" Adapted for Study of Insects

What might be called an insect zoo has just opened in Paris. In the new vivarium in the Jardin des Plantes, the public has the extraordinary experience of watching insects in their natural environments, each group shown in an indoor glass cage fitted up to seem like home to the inhabitants. This has not been so easy of accomplishment as it might seem. The insects come from various climates. Thus a complicated heating system is necessary to simulate the African desert in one cage and a coolish temperature in the next. In some cases it has been necessary to fool the insects for the benefit of the public. The scorpions, if left to their own devices, would completely disappear from sight. However, they seem well satisfied to hide beneath plates of transparent glass through which they can easily be seen. Several cages are devoted to exhibits of insect mimicry. The giant phasmas look like the green leaves they feed upon, and others exactly resemble the straw-colored branches to which they are clinging. The observer must watch closely for some movement to tell which is which.

Why He Succeeded

Honored politically and professionally, during his lifetime, Dr. R. V. Pierce, whose picture appears here, made a success few have equalled. His pure herbal remedies which have stood the test for many years are still among the "best sellers." Dr. Pierce's Golden Medical Discovery is a stomach alterative which makes the blood richer. It clears the skin, beautifies it, pimples and eruptions vanish quickly. This Discovery of Dr. Pierce's puts you in fine condition. All dealers have it in liquid or tablets.

Send 10 cents for trial pkg. of tablets to Dr. Pierce, Buffalo, N. Y., and write for free advice.

John Barrymore, whose favorite part is Hamlet, was telling Hamlet stories at a Hollywood reception.

"Then there was Garrick Betterton's performance in Milwaukee," Mr. Barrymore said. "His Hamlet wasn't anything to write home about. It went from bad to worse, in fact. "When Betterton hissed out the line, "There's something rotten in the state of Denmark," a gallery god hissed down at him: "And you're it, Ham, old boy!"—Kansas City Times.

There is nothing more satisfactory after a day of hard work than a line full of snowy-white clothes. For such results use Red Cross Ball Blue.—Adv.

Too many men who have good ideas are unable to make good.

Hamlet's Home Restored

Only the canopy taken to Stockholm by the conquering King Charles X in 1658 will be absent when the Kronberg castle at Oeresund is opened as a museum.

Denmark's wonderful castle of the Renaissance—home of Hamlet—has been completely restored. Authorities are now ready with plans to red it as a museum, with its old paintings, furniture and gobelins, these relics to be retrieved from the Danish museums.

Azila, Tripoli, is the world's hottest place, recent tests showing that its average summer temperature is 136.4 degrees Fahrenheit.

The individual who uses his tongue for a weapon is apt to use his feet for defense.

So rapidly has demand mounted for the perfected Whippet, that four great plants—at Toledo, Elmira, Pontiac and Toronto—are taxed to capacity, and enlargement and expansion, to permit even greater production, are already under way. People continue to express amazement that cars of such remarkable quality and mechanical perfection can be offered at such low prices.

Here is true beauty—in color, lines, proportions and interiors. And here, too, are features which distinguish the finest American cars—low-swung full vision bodies, BIG 4-wheel brakes, gasoline tank at rear, full force-feed lubrication, silent timing chain, over-size balloon tires and snubbers and long semi-elliptic springs.

See this car—ride in it, and compare it with any other light car—for looks, for performance, for quality, for all-around desirability—in short, for value.

More About the Resurrection

BY W. F. LYNCH

[On account of a lack of space the following article was omitted from our paper last week.]

Editor News:—I wish to say a few words to the public through your paper in response to a lecture reported to have been given in the Bula school building.

I am going to presume that all who read this, either heard or read his address published in your paper.

The speaker at the Bula school building was simply singing the old song of Pastor Russell, and the doctrine he was advocating was pure Russelism. The first stanza of this song is to deny the resurrection of all classes of people. The resurrection of the dead of all classes is a Bible doctrine. Yet the Bible does not teach that all classes will be resurrected at the same time.

It is plainly stated in the Bible "Blessed and holy is he that hath part in the first resurrection." Then it is plainly stated after that others will be resurrected, all of the human race. The resurrection of the righteous is for the purpose of bringing to life the bodies of the righteous in a holy state that they might be reunited with their immortal souls that never did die, and then share in the Divine blessings of a future life.

The resurrection of the wicked is for the purpose of bringing them into a Divine court to receive their sentence and hear their doom just as the prisoner is sentenced with us in our courts. In this article space would not permit me to give Bible quotations to prove all my statements, but if necessary I can produce them.

The next stanza of this Russelite doctrine is to deny the immortality of the soul. God breathed into man the "breath of life and man became a living soul." This is why I deny any relationship to the monkey or baboon. God never got so close to a monkey as to give him a living principle. The body of a man is a dying body but the soul partakes of the nature of God and cannot die. This body of ours came from the earth, but the soul from God. When man dies the soul goes to God who gave it, and the body back to mother earth. This is the Bible doctrine that distinguishes man from the monkey race. If no part of man was in existence after death, where did Moses and Elias come from at the transfiguration of Christ. What about the Saints spoken of in Revelations? all before any resurrection.

Next I wish to notice that the speaker implies from the words that he uses that the wicked will not be forever and eternally punished, as the Bible says they will, but will be destroyed. Reader, did you get that in that address? That is an old time soothing doctrine of Pastor Russell. The world likes that. No hell. Yet the Bible says there is one and that it is everlasting.

Now, reader, you will notice these three things have been denied and taken out of God's word: General resurrection for all classes; immortality of the soul and everlasting Hell. Next we will notice what he has added to the holy scriptures. He claims that the will of a certain class of the wicked that will be brought to some kind of a conscious existence and taught righteousness more fully than before and will finally be reentered to "full resurrection and be placed with the righteous." Now the term "Full resurrection" is not a Bible term and was coined by Russell. This is another stanza of Russelism. No such doctrine is taught in the Bible and the world has made progress without such a theory. This is nothing more nor less than a second chance for Heaven.

The speaker's next addition to God's word is that there will be two classes of saved people. One class will go to a real Heaven, while the other class will live on the earth. I am not guessing at what this speaker meant to say. I have heard all these things that I have referred to from the followers of Ruesell and read it in his books more than 30 years.

Now, my dear reader, the world has made its greatest progress under the teaching and preaching of the doctrine of the immortality of the soul of man, of a resurrection of all classes of people, and an everlasting Hell just the same as an everlasting Heaven. The world has made progress without such theories as another chance for the wicked after this life, and two classes of the righteous, an earthly and heavenly class. In view of the facts referred to I am fully convinced that the progress of the entire civilized world is due to the fact that we have been teaching and preaching right in days past and gone. I am a believer in the hand of Providence in earthly affairs. I do not believe he has allowed this world to become populated as it is and not interfered to bless the right and curse the wrong.

Yes, the doctrine of the resurrection is the climax of Christianity. It helps to do away with the horrors of the grave. But if I put myself upon the same level with the monkey class without any immortal soul, I would not expect anything beyond the grave, for I do not believe there will be any monkey in heaven or on earth.

Reader, if what I have said helps to encourage you in the faith of our ancestors I feel well paid for my service. Keep in mind what is stated near the end of the Bible about adding to or taking from His Book.

As a Baptist minister I am strictly a fundamentalist. The Bible just as it is without any modification suits me. The Bible as taught by our forefathers who are responsible for the progress of the world is the only way to hold what we are in possession of.

The term righteous as used in this article refers to all true believers in Christ and not to their moral standing in the world. The term wicked refers to all unbelievers in Christ and not to their moral character in this life.

Mussolini Schemes To Strengthen Hold

Rome, Italy.—A constitution for the formation of groups of Fascisti living abroad, setting forth hard and fast rules and insuring their allegiance to the Italian Government and above all the Fascist Party, was recently drawn up by Mussolini.

Notwithstanding the fact that they may be citizens who have become naturalized and sworn allegiance to the laws of their adopted country, this constitution sets forth that they must obey without question the orders of the Italian consuls and chiefs of the Fascist regime in the countries where they are stationed and must be under discipline the same as members of the Fascist party in the homeland. All Fascists abroad will come under the charge of secretary-general of the party in Rome and in cases of breach of discipline, they may be expelled from the party. The organization abroad includes the Fascist Boy Scouts as well as women's organizations.

The Duce does not recognize the right of Italians to become citizens of another country and evidently regards their sojourn from Italy as temporary, as he sets forth as one of the provisions, "To be respectful to the laws of the new country of which they are the guests."

Order of Sale

State of Texas,
County of Lamb.

In the District Court of Lamb County, Texas.

John A. Dryden, et al, Plaintiffs, vs. S. W. Treat, Defendant.

Whereas, by virtue of an execution issued out of the District Court of Lamb County, Texas, on a judgment rendered in said court on the 3rd day of May, 1927, in favor of the said John A. Dryden and J. E. Dryden and against the said S. W. Treat, No. 229 on the docket of said court, I did on the 8th day of February, 1928, at 3 o'clock p. m., levy upon the following described tract and parcel of land situated in Lamb County, Texas, and belonging to the said S. W. Treat, to wit: Being lot No. Twelve (12) in Block No. Two

(2) of the townsite of Sudan, Texas, according to the map or plat of said town recorded in Vol. No. 11 pages 12 and 13 of the Deed Records of said Lamb County, Texas, and being out of Labor No. Twenty-three, League Two Twenty-three, Collingsworth County School Land in said Lamb County; and on the 6th day of March, A. D. 1928, being the first Tuesday of said month, between the hours of 10:00 o'clock a. m., and 4:00 o'clock p. m., on said day, at the court house door of said county, I will offer for sale and sell at public auction, for cash, all the right, title and interest of the said S. W. Treat in and to said property.

Dated at Sudan, Texas, this the 9th day of February, A. D. 1928.

WOMEN OF MIDDLE AGE

Praise Lydia E. Pinkham's Vegetable Compound

Mrs. Annie Kwiniski of 526 1st Avenue, Milwaukee, Wis., writes that she became so weak and run-down that she was not able to do her housework. She saw the name Lydia E. Pinkham's Vegetable Compound in the paper and said to her husband, "I will try that medicine and see if it will help me." She says she took six bottles and is feeling much better.

Mrs. Mattie Adams, who lives in Downing Street, Brewton, Ala., writes as follows: "A friend recommended Lydia E. Pinkham's Vegetable Compound and since taking it I feel like a different woman."

With her children grown up, the middle-aged woman finds time to do the things she never had time to do before—read the new books, see the new plays, enjoy her grand-children, take an active part in church and civic affairs. Far from being pushed aside by the younger set, she finds a full, rich life of her own. That is, if her health is good.

Thousands of women past fifty, say they owe their vigor and health to Lydia E. Pinkham's Vegetable Compound, and are recommending it to their friends and neighbors.

Don't Fuss With Mustard Plasters!

Don't mix a mess of mustard, flour and water when you can relieve pain, soreness or stiffness with a little clean, white Musterole. Musterole is made of pure oil of mustard and other helpful ingredients, and takes the place of mustard plasters. Musterole usually gives prompt relief from sore throat, bronchitis, tonsillitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, lumbago, pains and aches of the back or joints, sprains, sore muscles, bruises, chilblains, frosted feet, colds of the chest (it may prevent pneumonia).

RELIEF FROM PILES
It is so quick when PIAZO OINTMENT is applied, it will surprise you. Druggists are keenly interested in the remedy and are recommending it to their customers. Ask your Druggist about PIAZO OINTMENT. In tubes with pile pipe, 75c; or in tin box, 60c.

Hayes Cough Remedy
AND

His Suggestion

Wife (showing new short skirt)—Look, dear, and I got it in the installment plan.

Husband—Huh! Hadn't you better wait for the second installment?

The best way to keep that umbrella is never to lend it.

Are You Really Well?

To Be Fit There Must Be Proper Kidney Action.

Do you find yourself running down—always tired, nervous and depressed? Are you stiff and aching, subject to nagging backache, drowsy headaches and dizzy spells? Are kidney secretions scanty and burning in passage? Too often this indicates sluggish kidneys and shouldn't be neglected.

Doan's Pills, a stimulant diuretic, increase the secretion of the kidneys and thus aid in the elimination of waste impurities. Doan's are endorsed everywhere. Ask your neighbor!

From Washington Family Bible

Augustine Washington and Mary Ballou Married the 11th of March, 1758.
George Washington, son of Augustine & Mary's first born, was born the 11th day of February, 1732, about 10 in the morning, in a log cabin, following the building of his log cabin, christened to the people and to the world Gregory Washington.
Betty Washington, was born the 21st of June, 1732, about 5 in the morning, christened to the people and to the world, the 21st of March, 1797, at 4 o'clock.
Samuel Washington, was born the 11th of April, 1734, about 5 in the morning.
Jane Washington, daughter of Augustine and Mary Washington, departed this life the 11th of 1795.
John Augustine Washington, was born the 11th of July, about 11 in the morning, 1737.
Charles Washington, was born the 11th of May, about 11 in the morning, 1738.
Melrose Washington, was born the 11th of June, 1739, about 11 in the morning.
Mildred Washington, was born the 11th of 1740, being Sunday, about 11 in the morning, 1740.
Augustine Washington, was born the 11th of 1741, about 11 in the morning.

George Washington was born on February 11, and not on February 22, despite the fact that most histories agree on that date, according to Mrs. Harry Lee Rust of Washington, descendant of Washington, and president of the Wakefield Association for the Preservation of the Birthplace of Washington. In proof of her statement Mrs. Rust has produced a page from the Washington family Bible in which it is stated that Washington was born "on the 11th day of February about 10 in the morning . . ."

Washington Given Unlimited Powers

Was Virtually Dictator of Nation as Commander of Armed Forces.

One hundred and fifty years ago this nation had its first and only Dictator. In the fateful winter of 1777 the outlook for the American colonists was dark and forbidding. Despondency was general throughout the young nation. It was then that congress, sitting at Philadelphia and realizing that something drastic must be done, turned to a virtual dictatorship.

It established a Dictator, who was the first and last in the annals of the country. George Washington, the one hundredth ninety-sixth anniversary of whose birth is celebrated this year, was then in the forty-fifth year of his life. To his hands, as commander in chief of the American forces, was intrusted this vast authority.

For six months the man who came to be the Father of His Country was given unlimited powers. He was authorized to get whatever he needed for the use of his army. On this he might fix his own price. He was invested with powers of life and death in carrying out his orders.

Never Abused Power. Until that time the American army had met with many difficulties in dealing with the Tories. Even from those supporting the Revolution it had been given little help. The dictatorship was expected to end these difficulties. To a very great degree it did.

Washington, Dictator in fact as well as in name, did not abuse his great powers. His conservatism, patience and wisdom carried the young nation through this darkest period of American history.

The unlimited confidence placed in him by the Continental congress was more than justified. Not long after he assumed this authority he made his famous crossing of the Delaware and fought and won the battle of Trenton and smote the British again at Princeton.

He was not, for all that he was America's Dictator, thinking in terms of a dictatorship. Whether in defeat or in victory, he went along dealing

firmly but considerately with his countrymen. He was slowly, whether he fully realized it or not, paving the sure way for the establishment of a republic in which no Dictator can have a place.

Put Aside Crown.

Five years later General Washington proved his real greatness when he put aside the suggestion that he be crowned as the first ruler of the new nation. The virus of military and dictatorial power was not in his blood. Nor should it be forgotten that he refused to accept compensation for his services and went his way back to private life and his Virginia estates.

Modern biographers have tried to show that he was a "man of flesh and blood." Their methods, however, have done little more than emphasize the essential greatness of a great American. Nothing that has been written about Washington will change the characterizations of him by such men as John Richard Green and Sir Archibald Alison.

Green declared: "No nobler figure ever stood in the forefront of a nation's life." Alison wrote: "Modern history has not a more spotless character to commemorate."

There was nothing of the Mussolini in Washington. Aristocrat that he was in many ways, he kept his faith in democracy. He was a general of the first rank and a statesman with commanding qualities. Whatever his faults, he had the wisdom to surrender the powers of a dictatorship at the first opportunity and to renounce a kingship in favor of what has become the greatest democracy in the long annals of the world.

Washington's Stepchildren

As Mrs. Daniel Parke Custis, Martha Washington was the mother of four children, two of whom died in infancy. The other two, John and Martha, accompanied their mother to Mount Vernon when she married George Washington. Martha died at the age of seventeen and John died at the close of the Revolution. His two youngest children, Eleanor and George Washington Parke Custis, were adopted by General and Mrs. Washington.

Perseverance and spirit have done wonders in all ages.—
George Washington.

Decried Bad Language in Army

GENERAL ORDER

Issued by General George Washington in New York, July 1776

The General is sorry to be informed that the foolish and wicked practice of profane cursing and swearing, a vice heretofore little known in an American army, is growing into fashion. He hopes the officers will, by example as well as influence, endeavor to check it, and that both they and the men will reflect, that we can have little hope of the blessing of Heaven on our arms, if we insult it by our impiety and folly. Added to this, it is a vice so mean and low, without any temptation, that every man of sense and character detests and despises it.

G. Washington

Copy of general order on file in the War department shows that the leader of the Continental army was deeply opposed to promiscuous use of bad language by members of his command.

Community Building

Laying Out of Lawn to Best Advantage

The painting scheme should avoid the hit-or-miss scattering, which gives poor effect for the various plants and cuts into the sense of distance, which is desirable for the lawn. A few clumps of bushes at the sides and corners of the lot, a border, perhaps, along the walk, a tall evergreen or two near the entrance door and a line of flowers near the foundation are always safe and tasteful arrangements which can rarely be bettered by any radical plan.

Useful and ornamental lawn furniture and bric-a-brac can frequently be used to good advantage. Care should be taken in placement of the garage and the garden to make a correct ensemble in which each feature of the grounds finds its own proper place.

Nor does this careful assembling of the components of a skillful grounds plan, in which every feature harmoniously contributes to the whole, cost necessarily any more than a less artistic layout. The added cost of the shrubs, as well as the fee of the landscape architect, if it is decided to employ one, will be easily offset in the added values resulting.

The resale value of the home made attractive by a well thought out grounds plan will be materially increased.

Village Ideal Place for Large Factories

"Balancing" of agriculture and industry by establishing future industrial centers in rural communities instead of in densely populated areas would go a long way toward solving the farmers' problem, according to T. R. Preston, president of the American Bankers' association.

Mr. Preston declared bringing industry to small villages increases the market for agricultural products, gives employment to surplus labor, elevates the standards of living, increases public revenue, reduces taxes and vastly increases educational facilities.

He declared industry and agriculture are better balanced in Ohio, North Carolina and Pennsylvania than in any other states of the Union and asserted, "In these states there is no serious agricultural problem and we hear little complaint from the farmers."

"I would not suggest that manufacturing institutions move from the cities to the small villages," Mr. Preston continued, "but I do think it would be better for this country for future industries to be placed in these small villages rather than to be further congested in the great centers."

Consider Resale

Have you ever thought of fashion in connection with home building? The fashions do change in buildings just as in clothes, although not so rapidly perhaps.

Fashions change in furniture. In plumbing and lighting fixtures of the home; fashions change in automobiles; and in fact in almost everything that we buy.

With rare exception, every man who builds a home should consider the resale value of the property. There are many factors which may make it necessary for him to sell. With resale in mind, or with protection of investment in mind, it would be unwise to build a home that was not in fashion.

The fashion in homes today is swiftly turning toward the permanent type.

Fire Hazards

Fire prevention is not a matter of one week out of fifty-two. It is a constant problem that is with us, asleep and awake, all hours of every day. We can afford to sacrifice half a billion a year on money, because of America's wealth; even though the existence of such wealth does warrant the people in throwing it away. We cannot afford to sacrifice human life or to permit, every year, a veritable army of our citizens to be injured and many handicapped for life.

There are many questions, economic, political, moral and what not, before the American people. There is probably none that comes nearer to every one of more than 100,000,000 citizens than the fire hazard.

Tree Grows Rapidly

The red pine, also called Norway pine, is one of the most important pine trees native to North America. It is found from Nova Scotia south to central Pennsylvania and west to Michigan and Minnesota, says the American Tree association. The red pine has few enemies, grows rapidly, and if given care and protection will produce large quantities of high-quality wood. It is one of our most attractive and useful evergreen trees.

Consider Color Scheme

Next in importance to painting is the use of the right kind of paint and paint of the right color. Color intrigues our interest. It draws us toward or repels us from a home. It is never inactive. It is always working for or against your interests. So the color scheme should be decided upon most carefully. And let us not think we can avoid all pitfalls by painting in all-white, regardless of the type of house.

FARM POULTRY

EGG A DAY MORE THAN HENS LAY

That a hen crosses the road for reasons of her own, and lays an egg a day, is all the information about her possessed by some members of the public. As a matter of fact, there is no record of a hen laying an egg a day for a full year. The standard as laid down by the poultry department of Ohio State university is 100 eggs in 365 days. The state average is about 70 eggs. Of course some high-grade hens do better. More than one hen on the records of the Ohio Poultry Improvement association has beaten the 300-egg mark in 365 days. But they are not common hens.

Egg production for the average hen is at the lowest point in November, when five eggs for the month is the standard requirement. This standard rises month by month to 21 eggs in April, then falls again.

This information is included on the Ohio State Poultry Calendar, distributed through the agricultural agents by the Ohio State university, to more than 3,000 Ohio poultry growers, who have registered with their agricultural agents and agreed to keep an accurate record of the performance of their flocks for 365 days. The calendar contains seasonal information on housing, feeding, breeding and diseases, prepared by the university poultry department.

Floor Space Necessary for Different Breeds

The light breeds such as Leghorns, Anconas, Minorcas and others, should have three and one-half square feet of floor space per bird, while heavy breeds such as Plymouth Rocks, Rhode Island Reds, Wyandottes, Orpingtons and similar breeds should have at least four square feet per bird. If the present house is not large enough to provide this amount of space for the flock to be housed it is advisable to build more room because a lack of space will make it increasingly difficult to keep the house sanitary and will lower the vitality of the birds, thus reducing the number and hatchability of the eggs produced.

Wire Mesh Bottoms for Nests Discourage Mites

Many poultrymen are now building nests in their laying houses with a fine wire mesh for the bottom instead of the usual board nests. There are two principal advantages which are set forth for this practice. The first is that such nests will be free of mites on account of the fine dust from the straw or other litter dropping through, and the second is that there will be fewer broken eggs.

Nests which are constructed on this plan may be easily sprayed for mites, which is an advantage in their favor. When the straw gets low in the nests eggs will not be so easily broken as they would in board nests.

Hereditary Traits

Roosters furnish at least half of hereditary influences that determine the quality of chicks produced, and as relatively few males are required, the poultryman can afford to use considerable care in selecting the breeding males used in his different flocks. The ideal situation would be to have all flocks headed by males that combined good size, color and vitality with a pedigree of at least 200 eggs on the dam's side.

Poultry Notes

Poultry keepers who use cod liver oil for their flocks should feed it from the time the birds are put into winter quarters.

The poultry men are awakening to a short-sighted policy similar to that which has prevailed in the dairy industry. They have been breeding for production and forgetting form.

Hens that molt late can never be coaxed to lay winter eggs and it is better to put them in separate coops and feed for vitality and future profit. Corn, buckwheat, and mash are all excellent.

Because proper sanitation about the poultry yards will keep down coccidiosis and prevent the problem of controlling it from becoming acute, the disease is regarded with less alarm than a few years ago.

One of the most important essentials of a poultry house is that it be dry, free from drafts and well supplied with fresh air.

Poorly colored birds and those with disqualifications, such as side spurs on the comb and stubs on the legs, are undesirable as breeders.

Keep the pullets and early molters by themselves and give them the tonics, the green food and shells, starch charcoal, etc., to stimulate egg production.

Mellon Family Richest

The Mellon family is probably the richest in America, with the Ford, Rockefeller and Baker families following in the order given. This is the conclusion of a writer in the Boston News Bureau, a financial newspaper, who says that, based on actual value of securities and asset values of other property owned, the Mellon family heads the list. The 4,300,716 shares of Gulf Oil company stock held by the Mellons is cited as one reason. And this is only one of the big industries in which the Mellon family is interested.

RICE WAFFLES
1 1/2 cups flour, 2 level teaspoons Calumet Baking Powder, 1/4 level teaspoon salt, 3/4 cup cooked rice, 1 1/2 cups milk, 2 tablespoons sugar, 1 tablespoon melted butter, 1 egg.
Sift flour. Measure add baking powder, salt and sugar and sift 3 times. Add rice, yolk of egg, milk and butter. Fold in stiffly beaten egg white. Fry the same as other waffles.

Lost Her Nerve

Visitor (to villager)—I'm surprised you never remarried, Mrs. Field.

Mrs. Field—No, sir. Some'ow I 'aven't got the pluck I 'ad when I was younger. I don't think I could ever bring myself to ask another man.—London Tit-Bits.

Baby's little dresses will just simply dazzle if Red Cross Ball Blue is used in the laundry. Try it and see for yourself. At all good grocers.—Adv.

Those who follow the Straight and Narrow Path like it, else they wouldn't follow it.

The BABY

No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and end almost any little ill. Fretfulness and fever, too; it seems no time until everything is serene.

That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable, you can give it as often as there's a sign of colic; constipation; diarrhea; or need to aid sound, natural sleep.

Just one warning: it is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.

Children Cry for

IDLE ISLAND

By ETHEL HUESTON

WNU Service

Copyright 1927 by The Bobbs-Merrill Co.

STORY FROM THE START

On the verge of nervous collapse, due to overwork, Gay Delane, successful New York artist, seeks rest at Idle Island. She rents a cottage, the "Lone Pine," from an island character, the "Captain," and his sister, Alice Andover, "administrator." Gay finds the cottage is tenanted by an elderly lady, "Auntalmiry," who consents to move to another abode, the "Apple Tree." Awakening from sleep, Gay imagines she sees the face of a Chinaman peering in the window. On an exploration of the island Gay, standing on the seashore, is horrified by the appearance of the drifting body of a drowned man, which she nurses herself to bring to the shore. A bullet wound in the temple shows the man to have been murdered. Gay makes her way to the "Captain" with the story. Returning with him to the shore, they find no body there, and Gay's story of the incident is set down to an attack of "nerves." Gay, unable to convince her neighbors of the truth, draws a picture of the face of the dead man, intending to send it to the authorities. She meets a stranger, apparently another visitor, to whom she tells the story and shows the picture. He asks her to let him take it, but Gay refuses. Next day, after a night spent with "Auntalmiry," Gay finds the picture has been taken from the cottage.

CHAPTER IV—Continued

"There you have me in a nutshell. The island dynamiter, burner and bomber. Got anybody you want blown up? Rand's home."

"Rand who?" she asked. Gay was amazed, that having heard the words a hundred times, "What, Rand comes home," she had never felt sufficient interest to inquire, "And who is Rand?" Many times again would Gay Delane hear those words, but never again without a thrill of personal interest, hope and joy.

"Rand Wallace."

"Oh, you're another Wallace."

"I am not only another Wallace, I am a whole section of them. The Wallaces run in branches. I'm the third branch. All the other branches dwindle off into uncles and aunts, and nephews, sons and cousins. But I'm a whole series all by myself. It's quite a distinction."

Gay laughed as she pressed the electric button that turned the heat into her tea kettle.

"We'll have a party," she said. "We're so glad Rand's home. And while we are waiting for the water to boil—tell me, where does your series fit into the tout ensemble of House Wallace?"

Randolph Wallace's version of the family history, a very facetious, flip-pant and slangy version, began with the first Captain Wallace who was his great-grandfather. The present Captain, he explained carefully, was really his great-uncle, although he called him Gramp, because, as he explained, "all the other Wallaces call him Gramp, and it avoids confusion." The administrator, Mrs. Alice Andover, was his great-aunt.

"Your voice, except that it has some expressiveness, is rather state of Maine," Gay said thoughtfully. "But you do not seem like the others. You are different."

"My father committed a faux pas," he confessed. "He married an actress from New York who was up here with the actors' summer colony one year. I," he said slowly, "I am the combustion that results from the union of Manhattan and the state of Maine.—It has been a warning to the whole state," he added modestly.

"Your parents—" Gay prompted, enthralled with his flippancy.

"We were all out in a boat together. I can sort of remember it, though I was a baby. Sudden squall—bent went over—Strange, isn't it? They were both strong, able-bodied, good swimmers, used to the sea. I was a baby. But I floated ashore in my mother's arms. She was dead, my father was dead. But Rand came home."

"Oh, that is very sad." Gay's eyes had darkened with her ready sympathy, her slim hands twisted together.

He smiled at her. To hide her sudden emotion, Gay turned quickly to the serving of tea.

But her desire for information about this surprising person was limitless. She wanted to know about his education, where he had gone to school.

The grammar grades in the island schoolhouse, it seemed, he had persisted doggedly through, and took a great deal of quiet satisfaction in explaining that the three missing bricks beneath the window on the southeast corner had been removed by his own hands at the age of nine years, to facilitate his departure from the seat of learning when the teacher reached for the well-known educational birch branch. He entire high school course he had encompassed. If not with honor, at least without serious mishap, in the city of Portland.

"And then, darned if I didn't go to college," he told her. "But don't

blame me. I had to go. My late lamented Grandfather Wallace put it into his will that I couldn't inherit until I went to college. Left me an infant in arms, as you might say, the arms of a guardian. Guess who? The administrator, darn her. That's what got her so stuck on administrating, she did such a good job with me."

"It wouldn't hurt you to go to college."

"Going to college would be simple enough. I had to go through—I did.—Bowdoin. I hated to go there, I was afraid I'd turn out a poet, I thought it was required for graduation. But Gramp was dead set on Bowdoin. Well, I went. It did me no harm. I've never even written vers libre. Though sometimes I feel it come over me all of a sudden—I feel it now when I look at you."

Gay frowned at him, but he smiled disarmingly. His was a pleasant smile. His lips were thin, their curve half-cynical, half-humorous, very sensitive. The vaulted mustache was but a shadowy outlining fringe. His skin had been fair no doubt, save for the rich coat of tan that covered him. His hands were hard and brown, small for their strength, smaller than her own, she noticed quickly.

When he said at last, reluctantly, that he must go and see Auntalmiry she went with him to the door.

"Come again," she told him pleasantly; "come often."

"I feel myself slipping," he said sadly, "slipping. However, I am no coward. I'll come."

Later in the evening, Gay went down to the Pier grocery store. On every lip was the laughing word, "Rand's home." But whereas before she had taken no notice, now she experienced acute interest, paused breathless at the name, and drank in every word that fell from native lips on the subject of Randolph Wallace. The combustion of the union between Manhattan and the state of Maine was not entirely approved on the island, she gathered, but altogether loved, although the island never openly acknowledges its loves.

As the dusk fell she went out, alone, unafraid into the little whispering forest, and walked up and down, slowly, deep in thought. The island seemed changed to her, warmer, softer. She felt vaguely troubled, vaguely pleased, strangely stirred. When her thoughts turned to the amazing young man and her surprising encounter with him her lips curved into tremulous smiles and her eyes brightened with pleased expectancy. She shook her head at herself warningly. She was not deceived. She knew these symptoms. She liked but feared them also.

For the first time, the practical boyishness of her costume was distasteful to her, and when she got up on the morning after Rand's return, for the first time since she came to the island she discarded her knickers and silken shirt. Half ashamed of the instinct that prompted her, but none the less obedient to its guiding, she took from her trunk a costume that was one of her chief treasures, a studio pajama suit, patterned after an improved Japanese style, all in black and fair blue, the trousers long and wide, the coat which was really an over-house reaching to the knees, richly embroidered, all soft lines and delicate curves. With dainty blue and gold slippers and sheer silken hose, it was a delectable studio concoction, designed for theatrical effect, inspired for the enravishment of an audience.

Gay changed her easel, considering now not so much the allowance of good light for her work as unobstructed view for herself, and sat where by the slightest turn of her eyes she could command the entire slope to the orchard below, and the lane that led from the pier to the Captain's house. Whoever ventured forth, must pass that way.

At ten minutes to eleven he came down jauntily and crossed into the orchard. Gay leaned forward. Did he turn left to the Apple Tree? No, straight toward the Lone Pine he made his way. Once he stopped to pick and taste and toss away a little green apple. Again he paused, to answer the eager calls of the boys at the pier. But he came on.

He came to a sudden halt outside the window, and stood a moment, spellbound. She looked up, then, and smiled.

"You are blotting out my sunshine," she said.

"I fondly hoped that I was bringing it," he returned impudently. "Don't get up. I always come right in."

He suited action to his words, and came and sat in the window-seat close to her elbow. Gay turned about in her chair and regarded him pleasantly.

"Is Auntalmiry here?" he asked apologetically.

"No, she isn't. Isn't she at the Apple Tree?"

"Well, I didn't really stop to see. I thought I'd better inquire first. So she isn't here. Dear, dear, all that long walk for nothing."

"Not for nothing. I am just going

to have my breakfast, and you shall have coffee with me."

Without moving from her chair, Gay swung up a wide tray that hung to the wall, and connected the electric toaster.

As she gave him a cup of coffee their fingers touched, and their eyes met lingeringly. Rand's speculatively smiling, Gay's a little cloudy.

As they drank their coffee slowly, she studied him furtively, noted his easy slouch in the comfortable window-seat, marked the brown arm on the window-seat. But she avoided meeting the merry gray eyes beneath the dark up-curling lashes.

"Do you flirt, Mr. Wallace?" she asked suddenly.

"Hope to tell you I do," he answered warmly.

"Oh! Then you need no warning. We have quite a wicked little flirt in the neighborhood, and I was going to warn you. But since you do, you can take care of yourself."

"Oh, I thought you meant yourself. I thought it was a sort of 'Help Wanted,' like the newspaper ads. I was willing to apply."

Again the friendly, smiling silence. To one like Gay, whose religion was work, whose god accomplishment, it came as a distinct shock to know that this one, with the strong hands, the ready wit and the smiling eyes,

crew, take it to Miami in readiness for Bemis when he went down for the winter season later on. He had expected to finish the job on the island, he said, in three days, but now he was beginning to feel it would take him a week.

He said he had gone with MacMillan on one of his trips to the Arctic, had been to the Arctic circle twice. In fact, he didn't like it. Said it was too cold. Wished somebody would plant the next pole in Florida or Mexico, nice warm place to look for things. He had been in the World War, and served overseas seven months. He said he did not like that either.

"Why not?" Gay was a little bitter. "Were you afraid? Or are you a pacifist? Or perhaps you had to get up too early in the morning?"

"No. I didn't mind those things. It was the uniform. I couldn't stand the uniform. The collar made my neck itch. My neck itched for fifteen months without stopping. One gets tired of it, that's all."

Gay's eyes were dark. She felt saddened. This aimless, planless, hopeless, dear young man violated her highest ideals, outraged her finest feelings. He was utterly impossible, she told herself furiously. But when her eyes met his, involuntarily she smiled. Impossible, but how pleasant to have him there in the window-seat at her side, drinking her coffee, smiling at her with the dark gray eyes beneath those softly curling lashes.

Ridiculous, she said to herself, that a man should have gray eyes and curly lashes.

Ridiculous, but something very disturbing, rather sweet, about it when one caught the full bright friendly glance of them.

CHAPTER V

Randolph Wallace indeed stood for everything in the world of which Gay Delane professedly disapproved. It was not merely that he did not work, but he disapproved of it on principle. He objected vigorously to the enthronement of Doing, which was Gay's god. He declared stoutly that labor in itself was a childish, ineffective thing, that the need for it was a confession of inferiority, that joy in accomplishment was not merely the last word in selfishness, but was also the sure mark of a narrow nature, lacking vision.

He asked Gay why she had never married.

"Because there is so much to do," she cried intensely. "Because I want to accomplish something in the world, get something done. Because I want to work, work hard, and work well.—Why don't you?" she ended mildly.

"Because life is too rare and fine a thing to be devoted to the mere grimy physical effort of doing this or doing that. Soul is too frail and too delicate to be enslaved in the chains of dally toil for board and keep."

Half the time, she realized that he was only laughing at her, making fun. But always she felt an undertone of serious conviction in what he said, always she felt in him the inherent yearning of pure spirit for freedom, more freedom, always more. Work, he declared, was confining, success was pinning, ambition the sternest slave-driver in the universe. Only in thought, desire, the soul was free.

Gay chafed restlessly at his easy indolence, his serene and apparently imperturbable calm. She knew that he could work, that, on occasion, he did work, desperately, both hard and well, with mind, with soul, with body. And more than that, he liked it. It was only the compulsion to work that he decried.

(TO BE CONTINUED.)

was an idler, a dawdler on the face of the earth, that he had no profession and wanted none, no business and was glad of it, no ambition and delighted in its absence. He called himself a retired gentleman, and said it was a poor island that couldn't support at least one; in fact, he said, the entire state of Maine united to support him.

"But don't you do anything? You don't just loaf, do you?"

"Loaf! Certainly not. Bums loaf. Landed gentlemen—retire."

Gay scrutinized him gravely, remarked the muscular arms, the straight shoulders, the vigorous tan, the deep and understanding eyes. And he was an idler in this rugged land!

She shook her head regretfully. "A world full of things to be done," she said slowly. "And you do nothing."

He explained that for ten weeks he had been doing the coast of Canada with a photographer in a fishing schooner, getting pictures. He had returned to the island to finish up a little work he was doing, on a motor launch, for Bemis, a lumber man at Bangor. He was to get the boat ready, and with a couple of men as

the owner can readily unfold them and extract what he wants at any time, re-folding the balance securely and returning them to his pocket.

To End Church Debt

Amos Skinner had never done any real work; instead, he had tried to invent something that would bring him a fortune.

Meeting an old friend, he rushed up to him, greatly excited.

"I've got it at last!" he shrieked. "Made my fortune, sure as eggs!"

"What is it this time?" asked his friend.

"Just a little device," said Skinner, "but it will bring me millions. Every church in the country'll buy one. You see, it's a collecting box with different slots for different coins. All silver money falls on velvet, while coppers drop on a big bell!"

Play or Get Off Stage

Shakespeare says, "All the world's a stage and men and women are but actors on it." But he failed to say there's an understudy ready and waiting to take the conceit out of most of us. Let us play our parts well.—Grit.

The Present Captain, He Explained Carefully, Was Really His Great-Uncle.

The Cream of the Tobacco Crop

Werrenrath, Concert Star, Finds Lucky Strikes Kindly To His Precious Voice

"In my concert work, I must, of course, give first consideration to my voice. Naturally, I am very careful about my choice of cigarettes as I must have the blend which is kindly to my throat. I smoke Lucky Strikes, finding that they meet my most critical requirements." *Richard Werrenrath*

"It's toasted" No Throat Irritation—No Cough.

ATWATER KENT RADIO

Sam Pickard says: "Radio is probably the greatest boon to education since the printing press was invented." Mr. Pickard, formerly chief of the radio service of the U. S. Department of Agriculture, is now a Federal Radio Commissioner.

The Department of Agriculture is the largest user of radio for informative purposes in the world. Countless families are profiting by its market and weather reports and educational programs for men, women and children. Entertainment—travel—adventure, too—all at your finger tips as you turn the Atwater Kent Owa Dial.

Knows what? Knows that Atwater Kent Radio will never go back on you. This is its reputation. This is the reason for its leadership. This is why most farm families—buying prudently, selecting carefully—have chosen Atwater Kent as their Radio.

Because so many do buy, the price is low. You, too, can benefit by the economies of careful mass production. Note the new low 1928 prices. Compare our radio with others—for tone, range, selectivity, workmanship—see for yourself that you can pay much more for radio and not get Atwater Kent performance.

ATWATER KENT MFG. COMPANY
A. Atwater Kent, President
714 Wisconsin Ave. Philadelphia, Pa.

Model 33, a very powerful Owa Dial, six-tube Receiver with solid mahogany cabinet. Unusually effective where distance-getting essential or inside antenna is necessary. Simple antenna adjustment device assures remarkable selectivity. Without accessories. \$75

Owa Dial Receivers licensed under U. S. Patent 1,014,002
Prices slightly higher from the Rockies West

Model 35, a powerful Owa Dial, six-tube Receiver with shielded cabinet, finished in two tones of brown crystalline. Ideal for a small table, window sill or bookshelf. Without accessories. \$49

If you have electricity

The receivers illustrated here are battery-operated. If you have electricity from a central station your dealer can equip any of them for all-electric operation. Or he can supply you with the Atwater Kent House-Current Set, which takes all its power from the lighting circuit and uses the new A. C. tubes.

The News Gets Results.

Among the many encomiums received by the Sudan News on the efficacy of its advertising, there is none more appreciative than the following from our good friend, Mr. J. A. Boone, of Earth, Texas:

Earth, Texas, Jan. 29th. '28.

Editor News, Dear Sir:--Enclosed please find check for bills and advertising in your paper. I sure got results and am well pleased. My sale was a great success.

Be sure and let us know about the turkey car. Our birds are molting now.

We are certainly glad to know that we have been of such excellent service to you, Mr. Boone and highly appreciate such generous expressions of same.
