SUDAN, LAMB COUNTY, TEXAS, FEBRUARY 24, 1928

NO. 35

## Lindy Arrives in St. Louis Monday

Ending his 8,000-mile good will flight through Central America and the West Indies, Col. Charles A. Lindbergh landed at St. Louis at 5 o'clock Monday afternoon from Havana, Cuba.

The flier left Washington for the City of Mexico two months ago Monday, pushing on to the Mexican capital in a day and night of steady air travel. Since then he has covered 8,000 miles, and visited thirteen countries and two United States possessions.

In two months the Lone Eagle has dropped in on Mexico, Guatemala, British Honduras, Salvador, Honduras, Nicaragua, Costa Rica, Panama, Colombia, Venezuela, the Virgin Islands, Porto Rico, the Dominican Republic, Haiti and Cuba.

In nine months the flier, who has converted from an air mail carrier to an ambassador of good will from the United States to the whole world, has flown 40,000 miles in America and Europe.

He started his flight to fame at San Diego, Cal., May 10, flying to St. Louis. His first flight in the Spirit of St. Louis, 1,550 miles, made a new distance record for an airman flying alone without a stop.

He made aviation history with his flight from New York to Paris May 20-21, and returning to the United States saw America first when he visited every state in a 3-month tour, covering 22,550 miles and including visits to more than sixty cities.

He also made several side flights, going from New York to St. Louis, to Washington and Ottawa, Canada. The Spirit of St. Louis has made 468 flights.

Monday's flight is the fourth longest hop the plane has been called on to make. The flight to Paris, 3,600 miles, was the hardest; next, to the City of Mexico, 2,200 miles, and third, the opening test, from San Diego to St. Louis. In his tour of Central and South America only one flight was more than 1,000 miles, the trip from Maracay, Venezuela, to St. Thomas, Virgin Island, being 1,050 miles.

When he left Havana for St. Louis Lindbergh started his 2,370th hour in the air in his six years of flying, which has taken him over an estimated distance of more than 200,000 miles.

The jurors in the Hickman trial in Los Angeles had something more to do than decide whether or not Hickman is sane, they had to decide which of the noted alienists were lying and which were telling the truth.

## How To Save

If you don't save, but would like to, think of your salary as being \$5, \$10 or \$50 less each week, and put the balance to work in the bank. Try a small fixed amount first, and you'll like it so well you'll try to beat your previous records.

Waiting until they have a big initial deposit is the reason why so many have not yet started to save, and fixing the weekly deposits too high is why many who do start don't continue.

The more a man becomes financially independent, the more he is able to further his complete independence.—Ex.

## Rome Not Built In a Day

Many farmers hesitate to change their program because they feel that they cannot afford to take chances. Farm and Ranch receives many letters in which statements are made to the effect that the writers are in accord with the doctrine of rebuilding of the soil, but are financially unable to undertake it.

It is natural for one to feel the urge of completing a job when it is once started, but we must remember that Rome was not built in a day. Farm and Ranch suggests that the program always be limited to the means at hand or obtainable. Why not select one field, or a part of one field, for crop rotation with legumes, and put that field in physical condition to produce a profit? It will prove an interesting experiment, and one that will be worth while from an educational standpoint. If it pays, as it surely will, then you will be in a position to give similar treatment to other fields. After awhile, you will have all the citches filled, your terraces built, and your soil mellow and productive. Try this suggestion for 1928.—Farm and Ranch.

## Tax Notice

For the convenience of those who are required by the law to file Federal income tax returns, a Deputy Collector of Internal Revenue, will be at Lubbock, Texas, on March 10th, 13th, 14th and 15th, to assist taxpayers in preparing their returns.

## Card of Thanks

We desire to tender our heartfelt thanks to our many good friends who so generously came to our aid when our residence and most of our household goods were consumed by fire Wednesday last. A grievous misfortune as it was, our burden is not only lightened but our hearts are filled with joy and gladness to know that we are living among such kind-hearted and generous people. With grateful hearts we shall remember you all.

Mrs. J. J. Franks,  
Fisher Franks,  
Mr. and Mrs. J. O. Jones, Jr.,

## P. T. A. Picture Show Monday

Everybody's Cash Store and The "M" System Grocery Store are footing the expense of a Picture Show at the Garden Theatre for the benefit of the P. T. A. Proceeds from this show will be turned over to the Parent Teachers Association to help further the good cause carried on by this organization.

Mr. and Mrs. John Dryden and Mrs. Bert Dryden and daughter, Mary Jo, returned from Fort Worth Friday. Mrs. Bert Dryden also visited friends in Dallas.

Mrs. L. E. Slate and Mrs. Ves Terry were in Lubbock Wednesday.

Mr. and Mrs. J. P. Posey, of Lubbock, spent the week end with Mr. and Mrs. J. P. Robertson.

Mrs. S. H. Yoakum and son, Elmer, accompanied by Mrs. Bert Dryden and daughter, Mary Jo, were Lubbock visitors Tuesday.

## What's Doing in West Texas

Stamford—Recommendations of the Special Water Rights Committee of the West Texas Chamber of Commerce, appointed at the Executive Board meeting of January 19, and which convened at Fort Worth February 13, were mailed to every member of the directorate February 16 for referendum vote.

Aspermont—A terracing school has just been completed here by the Stonewall County Agent, assisted by Agent W. P. Trice of Haskell.

Denton—A new dormitory containing 100 bedrooms and costing \$150,000, will be constructed at the College of Industrial Arts here.

Stamford—Membership placards, showing 1928 affiliation, will be distributed to all members of the West Texas Chamber of Commerce this year.

Ranger—The Commercial Bank, Ranger's new financial institution, has opened for business here.

Mineral Wells—Sixty-six Bobcats and thirty-one wolves were caught in Palo Pinto county during the month of January.

Amarillo—Formal opening of the Capitol Hotel, Amarillo's latest addition to its metropolitan hostilities, was held Feb. 15.

Anson—The Anson Fire Band has been named official band for the Dal Paso Cavern Highway Association.

Quitaque—A 250 horsepower electric power plant is being installed here to serve Turkey and Quitaque.

Odessa—Odessa and Midland's chamber of commerce secretaries will discuss needs of each other's cities at the Colorado district convention of the WTCC February 29.

Haskell—Sewer and water rates for the city of Haskell have been reduced by the city council.

Sweetwater—With apologies to Cartoonist Knott of the Dallas News, Sweetwater is sending out an illustrated sheet calling attention to the concerted Texas move to stamp out the pink boll worm in a conference here Feb. 25.

Eden—Visitors from more than half dozen neighboring towns spoke at a regular meeting of the Eden chamber of commerce here this week.

San Angelo—Bids on San Angelo's new city hall and auditorium to cost when equipped near \$285,000, will be received in March.

Happy—Water in the city well has been found at a depth of 496 feet and the city water works system will now be completed very shortly.

Levelland—The cornerstone of Hockley county's new \$150,000 courthouse will be laid Feb. 21.

Crowell—The Farmer's Cooperative Gin is taking initial steps toward building another gin plant before next season.

Pecos—More than \$10,000 will be spent by Radford Grocery Co. in their addition to their wholesale house purchased here recently.

White Deer—A minimum water rate has been set for White Deer in order to encourage prettier lawns and more trees and shrubbery here.

Arlington—A \$250,000 orna-

## The Power of Suggestion

The fiend, Hotelling, who slaughtered the little 5-year old Michigan girl, after attacking two others, said he had been reading about the fiend, Hickman, who butchered the little California girl and it preyed on his mind until he just had to go and commit a similar crime. Possibly young Hickman had tried to emulate the "perfect crime" of the two Chicago fiends, Leob and Leopold, who, he might have noticed, escaped the law's ultimate penalty for murder, which in this case was so unspeakably atrocious, revolting, unprovoked and confessed.

The "clever" lawyers who succeed in persuading soft-hearted or headed judges or juries to mitigate sentences in such cases, have a lot to think about later. Fame which rests on saving guilty men from their just deserts is of questionable value, although each resultant dollar contains 100 cents. There is one lawyer whose fame rests largely on the fact that he has saved a hundred guilty necks from the gallows. Even the Michigan judge who sentenced Hotelling to life, regretted the law didn't permit his execution.

If there is anything in the power of suggestion in one case there is in another. The increasing stream of crime, of murder, has undoubtedly found some of its impulse in the fact that so many criminals either escape conviction entirely or get off on easy terms, with excellent chances—in some states—of early parole or pardon.

It would be better for society and government if the power of suggestion were turned in the opposite direction more than it is. If juries and judges would go to inflicting more maximum sentences criminals would very soon take the hint.

Our organic law gives the accused the benefit of the doubt. It ought to end there but it doesn't. There is the type of criminal lawyer skilled in overstraining the technicalities of the law and playing on the credulity of the maddened jurors and his ever-dependable aid, the so-called alienist, whose judgment usually coincides with the interest of the party paying for his services. Altogether they make a mighty barrier for justice to overcome. The dead man or child surely had as much right to live as the murderer who took his life, but the victim's rights and interests, to say nothing of society's, are too often forgotten in the mocked sympathy aroused for the killer.

Then we wonder why we have 11,000 murders every year in the United States.—Public Service Magazine.

## Important Notice

We are taking orders for seed oats and if enough orders are received to justify us in ordering, we will place an order for same next Monday. Please call at the Sudan Grain and Elevator and place your order on or before that date.

Sudan Grain & Elevator Co.

mental iron works plant, employing 150 men, is under construction here as result of consolidation of factories formerly at Fort Worth and Dallas.

## The Best Of Service For Chevrolet Owners

Detroit, Mich., Feb.: Of unusual interest to the millions of Chevrolet owners in the United States was the announcement made here today by the Chevrolet Motor Company that nearly 4,000 men,—heads of dealers' service departments—are being called in to attend specially conducted service schools.

These schools, designed to place the service facilities of the company on a higher plane than ever before, are being held during February and March for the service personnel of the Chevrolet dealer establishments throughout the country.

The Service managers are being summoned to the 45 zone headquarters, located at key centers, where the schools are being conducted. Here, under resident instructors, they are given a course in every phase of shop management.

Among the principal subjects covered are shop management; equipment and special tools; appearance and maintenance; shop personnel; training of service personnel; operating costs; specializing the work of mechanics; compensation of mechanics, and the keeping of detailed and exact shop records.

Upon completion of the course, the service managers are expected to go back to their own establishments prepared to conduct their end of the dealer's business upon the high standards evolved by factory officials from the most approved methods known.

This means that Chevrolet owners everywhere may expect uniformly efficient service and courteous attention from the service departments of the wide spread Chevrolet dealer organization.

## To The Tax Payers

The School Board of Sudan Independent School District, in session February 13th, ordered, and notice is hereby given, that no penalty will be charged anyone who pays their 1927 school tax before March 1st, 1928. But, thereafter no taxes will be received without the statutory penalty.—W. W. Carpenter, Sec. School Board.

Guy M. Russell, of Sarah, Oklahoma, and Frank M. Farris, of Levelland, have purchased the Sudan Drug Store and took charge of same last week. These gentlemen come well recommended as clever business men, and we welcome them to our town.

Mr. and Mrs. Jim Pierce, of Carlton, have been visiting Mr. and Mrs. C. H. Simmons and Mr. and Mrs. A. Stuart. They left the first of the week where they will visit relatives at Farwell, Texas, and Roswell, N. M., before returning home.

## Franks Home Destroyed By Fire

The home of Mrs. J. J. Franks was destroyed by fire Wednesday at about noon while Mrs. Franks was preparing dinner. The gasoline stove exploded and set fire to the building. No one was injured, but the house and most of its contents were consumed.

Little Margaret Ruth Shafer is recovering from a light case of chicken pox.

## Brooding Baby Chicks

The artificial brooding of baby chicks involves the same problems as housing with the addition of temperature. The important housing problems are ventilation, freedom from drafts and supplying plenty of sunlight. Artificial brooding follows the introduction of the incubator. The type of brooding to follow depends on the size of the business, if only a small number of poultry is to be raised natural brooding will require less trouble. In case a few hundred or more is to be produced artificial brooding will be necessary.

In preparing the brooder for the chicks it should be thoroughly disinfected, and run at a uniform temperature of 98 to 100 degrees for 24 hours. A quarter of an inch of pure sand should be placed on the floor covered with fine chopped alfalfa or clover. The hover should be darkened by having a piece of canvass around the brooder. This is an instance when it pays to hover baby chicks. Baby chicks should not be chilled when being transferred from the incubator to the brooder.

Extreme variations in temperature, either up or down, will result in high mortality. There isn't a great deal of experimental data as to what is the proper temperature to have in the hover, however. Lewis, of the New Jersey Experiment Station, recommends 98 to 100 degrees the first week, 94 to 96 degrees the second, 90 to 92 degrees the third, and about 86 to 88 the fourth week. The brooder should be kept in readiness for any sudden change in temperature.

Brooder vices, as toe picking and depraved appetite, are important problems where many chicks are kept together.

H. S. Dep't of Agriculture.

## Radio Shop For Sudan

F. E. Miller and J. C. Barron have opened a Radio Shop in the Miller Land Office and are arranging a display of Atwater Kent Radios and supplies. One of the large Radios is now in operation at the Land Office. Mr. Miller is a radio mechanic and is prepared to do all kinds of repairing.

## Bula Organizes Agricultural Class

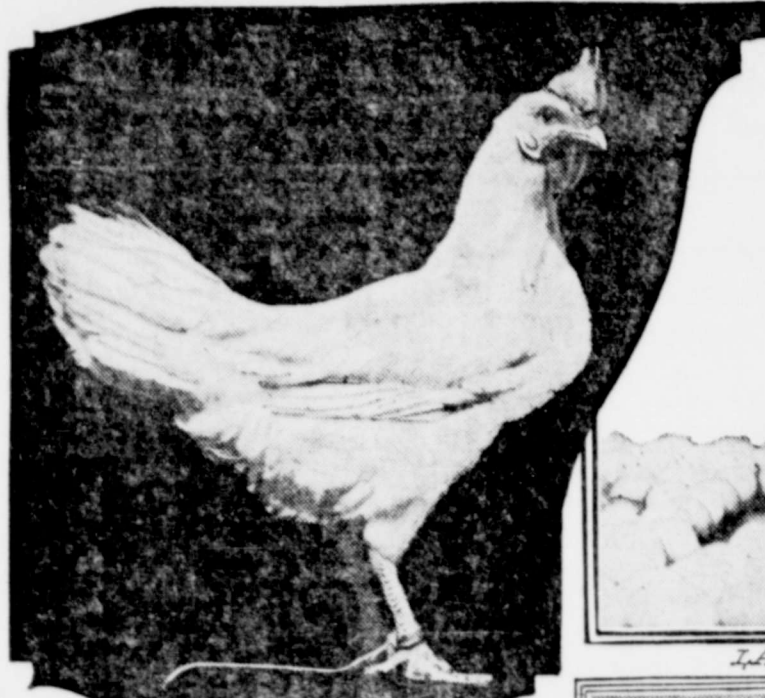

J. G. Bishop, teacher of Vocational Agriculture in the Sudan Schools, and J. A. Hutto, President of Sudan's Business Men's Association, visited the Bula school and organized an agricultural class at that place. Mr. Hutto made a talk in the interest of The Business Mens Association which was well received by the Bula people.

Taken Up—10 head of horses and mules, 8 head of black mules 1 red mule and 1 black mare, on Sunday night, Feb. 13th. Owner may have same by paying feed bill, and for this ad.—Ivy Phipps, 2 miles west of Circleback.

Mr. and Mrs. T. R. Long announce the birth of a boy, on February 10th. The young fellow weighed nine and one half pounds, and named, Wiley Clayton.

# "I SING THE HEN"

LADY LINDY OF INGLENOOK

By ELMO SCOTT WATSON

Of all set critters, beast or men, commend me to the settin' hen. Without a whim, without a sob, she patiently sticks to her job; nor ma nor pa nor all the rest can coax her from her chosen nest. The world needs humans of such kind, whose work is ever on their mind; who will not shrink and will not run until their duty's fully done. We wish the Lord would give us men with backbones like the settin' hen.—Anon.

**T**HUS has some unknown poet immortalized the settin' hen, and now if some other bard will come forward to state "I sing the hen, the layin' hen, who makes a layin' record, then, if another comes along to rob her of the prize, gets on the job, hies to her nest on speeding legs and lays another hundred eggs" the really important role in a hen's life will be fittingly immortalized. For ingenious man with the incubator has provided an adequate substitute for the settin' hen, but so far the only rival to the hen as a "just as good" egg producer is another hen!

More than that, her egg-laying ability has within the last two years become news—big news! In the summer of 1926 one of the leading metropolitan newspapers in the East carried the following story under the top headline of "CHAMPION HEN STIRS MISSISSIPPI AREA"—Arkansas Leghorn's Laying Is Hailed as Marking a New Era in Poultry Industry.

St. Louis—A hen that laid an egg a day for 149 days, political campaigns in which gubernatorial candidates are to be nominated, flood rehabilitation, a unique highway problem which required federal intervention to determine what should be done with an ancient wood approach to a bridge, the crash of the dream school of a World War hero and the legality of a city zoning law, are a few of the varied affairs that are engaging public interest these days in that stretch of territory that lies between St. Louis and New Orleans along the Mississippi river.

At first thought one probably would not believe that the achievement of one hen along egg-producing lines would be of moment, but when Lady Lindy, a single comb white Leghorn, the property of a Gentry (Ark.) fancier established a world record the other day by laying 149 eggs in 149 days, her praises were sung in the press and editorial pages were almost poetic in their enthusiasm.

In making her record, Lady Lindy took the honors from a Missouri hen owned by Homer Collins of Ozark, Mo., which in competing in an egg-laying marathon in 1925, at Mountain Grove, Mo., set the mark at 141 in as many consecutive days. The result has been considerable good-natured editorial banter, which, however, had a serious element, it being pointed out that Lady Lindy's exploit is significant of the vast strides that have been made in the poultry industry in these parts during the past few years.

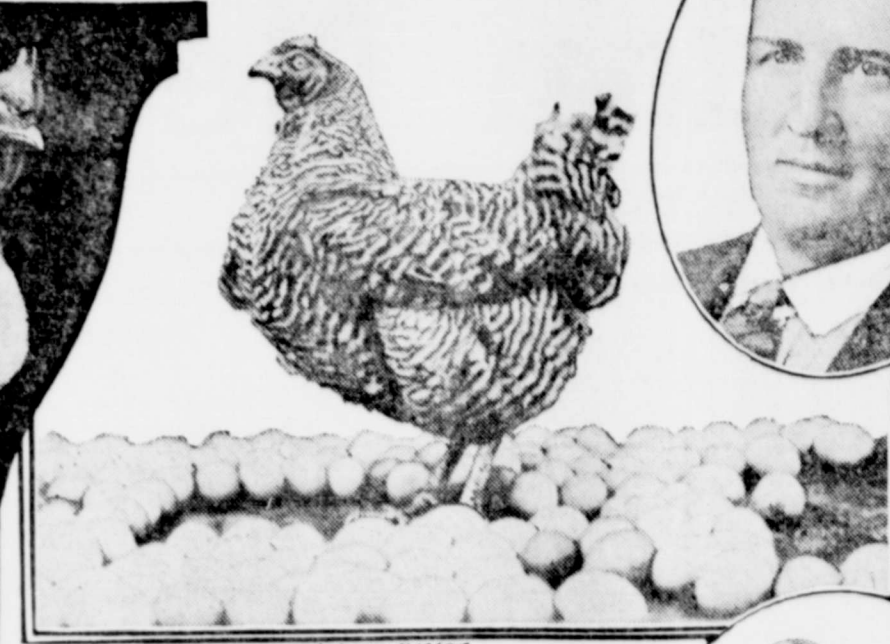

Especially interesting is the fact that both the old and the new records were made by fowls in the so-called Ozark mountain region, which only recently realized that its economic future lies in the development of its resources along poultry and dairy lines.

But Lady Lindy, bred and owned by William R. Curry of Gentry, Ark., was not allowed for long to enjoy her honors undisputed. She had established her record of 149 eggs in 149 consecutive days from February 15 to July 13 (inclusive), 1926. On November 1, 1926, the National Egg Layers' association started its annual contest at Omaha with 255 pullets, representing 32 states entered. The contests run a year, but that one ended October 18, 1927, when Lady Amco of Norfolk, a White Leghorn pullet, bred and owned by A. R. Landers of Norfolk, Neb., laid her one hundred seventy-third egg in as many consecutive days. Then she missed a day, but her owner and officials conducting the contest were just as well satisfied because the strain was commencing to tell on her physical appearance.

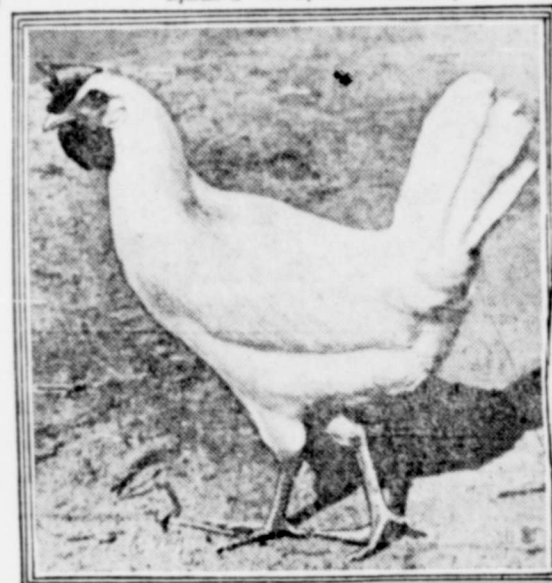

She had done enough—not only broken Lady Lindy's American record of 149 eggs, but also the official world's record of 165 eggs held for some years by an Australian hen—but she had also elevated herself from the standing of being just an ordinary White Leghorn hen, worth \$2 at the most, to the proud position of a champion for whom her owner refused offers ranging from \$500 to \$3,000. Although the contest started November 1, 1926, it was not until April 29 that Lady Amco of Norfolk began her record-breaking feat. Before that time she would lay for a period of from 5 to 20 days consecutively, then would skip. But on April 29 she settled down to business and kept at it throughout the spring and summer.

In the meantime she became something of a national figure. When she laid her 151st egg, thus breaking Lady Lindy's record, press associations carried a dispatch hailing the new champion and later one of the eggs of the champion was sent to President Coolidge by air mail. A short time before Lady Amco of Norfolk established the new record of 173 eggs Babe Ruth and Lou Gehrig of the world's champion New York Yankees visited Omaha with their barnstorming teams. Babe Ruth was introduced to Lady Amco and the two champions were photographed together. This incident led to an amusing mistake, for in subsequent news stories Lady Amco was called "Babe Ruth," so that she is now variously known as Babe Ruth, Lady Amco and Lady Norfolk.

The champion hen was stimulated to egg producing by a special food. It was heavily laden

WILLIAM R. CURRY

LADY AMCO OF NORFOLK AND A. R. LANDERS, OWNER AND BREEDER

with proteins, and when her owner deemed it time to discourage her he gradually changed her diet to feed containing carbohydrates.

Her feed, like that of all the hens in the contest, was made up of meat scraps, wheat four middlings, finely ground oats, corn meal, wheat standard middlings, wheat standard brand and salt. When Lady Norfolk entered the contest she weighed four and three-quarter pounds; after laying her last egg she weighed a little less than four pounds.

Mr. Landers is a graduate from the University of Nebraska, but did not specialize in poultry husbandry while at that institution. He attended the university three years and took a course in business administration. After he left school he had no capital, but he had plenty of intelligence, initiative and energy and these things he capitalized. Backed by his father-in-law, a successful surgeon of Norfolk, he started chicken farming three years ago with eighteen pullets and \$80. Now he has 2,500 chickens and one of the most up-to-date chicken farms in the Middle West.

During the year his champion hen consumed less than \$2 worth of feed but produced close to \$10 worth of eggs. She was an incubator chicken, and came from a 307 hen, which means that her mother laid 307 eggs in a year. That mother in turn came from a 275 hen.

On the basis of present offers and estimates, the Leghorn and her progeny will be worth in a year \$8,250.

As was to be expected publication of Lady Norfolk's record brought forth new claimants to her title. From Vancouver, British Columbia, came the statement that at the Agassiz contest in that province in 1925-26 White Leghorn hen No. 6, bred and owned by the University of British Columbia, laid for 213 consecutive days and made a new official world's record for total egg production by laying 352 eggs in 52 weeks. From Canon City, Colo., came the news that Lady Skyline, a White Leghorn hen, owned by the Goris Brothers Poultry farm, had hung up a record of 235 eggs in 235 consecutive days, and from Scotland came the news that in a national contest in that country a light Sussex hen had made an official record of 279 eggs in as many days.

Then in October, 1927, Oregon came forward with the statement that such egg-laying records might be good enough for the so-called "lighter breeds," but if you wanted real long-distance layers, look to the heavier breeds, notably the Barred Rocks. For Lady Oregon State, bred and owned by the Oregon Agricultural college at Corvallis, had set a new mark of 335 eggs in as many days. The news story from Corvallis telling of this feat follows:

Democracy in education—where the most obscure have equal opportunity of achieving success—is a matter of considerable pride as existing in many of the higher institutions of learning, including this one. Anyone bent on carrying the theory to its ultimate conclusion might find a parallel, not too far fetched, in the recent accomplishment at the Oregon Agricultural college of the now famous hen that won the national championship for the Barred Rock breed.

This hen "rose from the ranks," as it were, and won a place in the poultry hall of fame October 26, by laying her 335th egg in 365 days, thus bettering the former record made a few months earlier by two, and regaining for this college the individual national championship in the heavy breeds. So much from the "ranks" was she that she was not named, being merely known as Q-1596. Since then she has been fittingly christened Lady Oregon State.

In spite of her former individual obscurity, Lady Oregon State was by no means an accidental arrival among feathered greatness, as she is the result of a long period of selective flock breeding begun by the Oregon station some twenty years ago. Of late years this work has emphasized the development of high-producing and longer laying strains rather than phenomenal individual records.

Thus Q-1596 was obscure only in that she was but one of a flock of 250 hens from the vigorous, high-producing strain developed by the college. What interests the breeders more than the indi-

vidual showing of the new champion is that the entire flock averaged 61 per cent production for the year and from the flock there were five hens exceeding the 300 mark. When it is remembered that 60 per cent production is considered unusually good for commercial flocks and that the average is far below that figure, the accomplishment of the hens is better appreciated.

Leading breeders in this country and even in Hawaii have been quick to recognize the value of these strains and already the majority of the flock of 209 have been sold. However, the 12 best birds have been kept to continue the work next year.

The Oregon station took the lead in poultry breeding soon after the arrival of President Kerr in 1907, when he brought James Dryden from Utah to organize the poultry department here. At that time there was not a commercial poultry farm in the state, nor was there a trapnest, so far as known, as it had never been proved that high-laying characteristics are inherited. Oregon was then an importing state as to eggs and poultry.

In 1922 Professor Dryden gave up his work at the college to go into the poultry business commercially and to devote more time to writing. His place here was taken by A. G. Luhn, who had received his training under him. About this time the station flocks produced another record breaker in a hen known as K-34, later christened Lady Dryden. This hen laid 324 eggs in her first year, which was at that time a national record for all breeds and missed being a world's record only by one egg, as a Canadian hen of the same strain had completed a record of 325 about the same time.

The selective breeding has continued ever since, largely under the immediate supervision of F. L. Knowlton of the experiment station staff. A year ago a flock similar to the one which has just completed its record produced above 60 per cent and had one individual making a new national breed record at 325.

The record flock of a year ago and the one this year (as well as similar ones not so famous) were all from eggs produced on the experiment station, farm and made their laying records under strictly commercial conditions as to feed and care, excepting for strict trapnesting. The laying houses are what are known as the "O. A. C. type" and are situated adjacent to the campus.

The latest national champion of the heavy breeds is considered exceptionally noteworthy because of her own good size, form and vigor and for the large size of her eggs. Her performance exceeded by two eggs that of a hen in a Kansas City contest owned by French Brothers of Ontario, Canada.

From all of the foregoing it is apparent that "championships" in egg-laying can be awarded only with certain reservations in regard to breeds, conditions of the contests, etc. Arkansas, while admitting that Lady Lindy's consecutive record has been beaten by a Nebraska hen of the same breed and an Oregon hen of a different breed, maintains that Lady Lindy still is champion in one respect. From her home town comes this statement in regard to that:

We are particularly proud of the size of eggs "Lady Lindy" laid during the year and during her long distance cycle. You will note that the record claimed for her was made in a state contest at the university, thus making the record an OFFICIAL RECORD. When size of egg, long distance cycle, and total record for the year, is considered, we believe "Lady Lindy of Inglenook" is the official champion long distance layer of two ounce eggs. (Please note these eggs were not merely standard sized eggs but were two ounce eggs. "In egg contests in U. S. 22 oz. is the highest standard."—American Poultry Journal, December, 1926, page 323.)

Her official record, made in the thirteenth Arkansas state egg laying contest, conducted by the college of agriculture of the University of Arkansas at Fayetteville, is as follows: 149 two ounce eggs in 149 days (February 15 to July 15, inclusive); 213 eggs in 19 months (January 1, 1927 to November 1, 1927); 291 eggs in 365 days (November 1, 1926 to November 1, 1927); 303 eggs before molting (291 official eggs plus 12 eggs laid at Inglenook farm). Weight of hen October 31, 1927, 4.3 lbs.

## Build Up Any Boy in Two Weeks!

It isn't dispositions that make some youngsters naturally active and athletic, and others so listless. It's what they eat, and what becomes of it! Nine times in ten, a boy or girl who eats lots of fruit is always on the go—up and gaining. Your children may not crave fruit every day, and every meal. No matter; let them have California fig syrup. They'll love it, never fear! Nor ever fear to let them have this rich, fruity syrup as plentifully as Nature signals for it. They give it to tiny babies who are fretful or feverish. And to older children as often as sour stomach, bile, or any sluggishness is seen. One spoonful of the fig syrup, and within twenty-four hours the whole system is cleansed and in the pink of condition. With any further re-cleaning spells of constipation further apart; fig syrup will remove all the need of harsher measures to keep the bowels regular and thorough. You may all give this remarkable product with the confidence you could have in any tonic—and with far more happy results! Make the two-week test so many parents have made, and see if your children, too, don't respond in almost magical manner to the invigorating influence of the fruit goodness they can have in such agreeable and innocent form as genuine California fig syrup. The only care you need exercise is in purchasing this product. The genuine is California fig syrup, and it is "California" syrup that you should ask for (always found in any drugstore) in the generous sixty-cent bottle.

Is flattery more acceptable than cold, disagreeable truth, even when you know it's flattery? The average married man attributes his successes to himself and his failures to his wife.

Peace has its victories, though they seem chiefly to concern money. If a husband isn't sharp he is apt to be shrewd.

**BAYER** Genuine  
**ASPIRIN**  
SAY "BAYER ASPIRIN" and INSIST!

Proved safe by millions and prescribed by physicians for  
Colds Headache Neuritis Lumbago  
Pain Neuralgia Toothache Rheumatism

DOES NOT AFFECT THE HEART

Safe Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

HOW often does that friendly question find you full of pains and aches caused by kidney, liver and bladder troubles? Keep your health while you can. Begin taking Gold Medal Haarlem Oil Capsules at once. Hardy Hollanders have used this remedy for over 200 years. In sealed boxes, at all druggists. 3 sizes. Look for the name on every box.

ARE YOU TODAY?

Highest of Great Lakes Disobedience No Lure  
Lake Superior, because of its altitude of 602 feet, is highest above sea level of all the Great lakes, according to an answered question in Liberty. "So your wife has completely lost her appetite?" "Yes, she doesn't even want to eat the things the doctor forbids her."

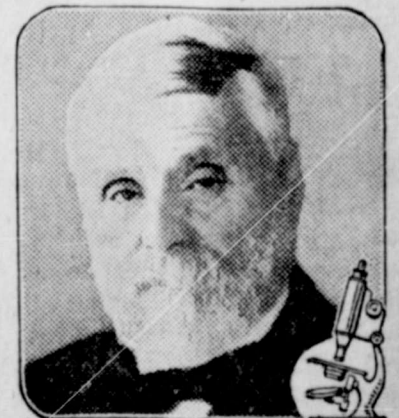

## Old Folks Say Doctor Caldwell was Right

The basis of treating sickness has not changed since Dr. Caldwell left Medical College in 1875, nor since he placed on the market the laxative prescription he had used in his practice, known to druggists and the public since 1892, as Dr. Caldwell's Syrup Pepsin.

Then, the treatment of constipation, biliousness, headaches, mental depression, indigestion, sour stomach and other indispositions that result from constipation was entirely by means of simple vegetable laxatives, herbs and roots. These are still the basis of Dr. Caldwell's Syrup Pepsin, which is an combination of senna and other mild laxative herbs, with pepsin.

The simpler the remedy for constipation, the safer for the child and for the old, and the better for the general health of all. And as you can get results in a mild and safe way by using Dr. Caldwell's Syrup Pepsin, why take chances with strong drugs?

A bottle of Dr. Caldwell's Syrup Pepsin will last a family several months, and all can use it. It is good for the baby because pleasant to the taste, gentle in action, and free from narcotics. In the proper dose, given in the directions, it is equally effective at

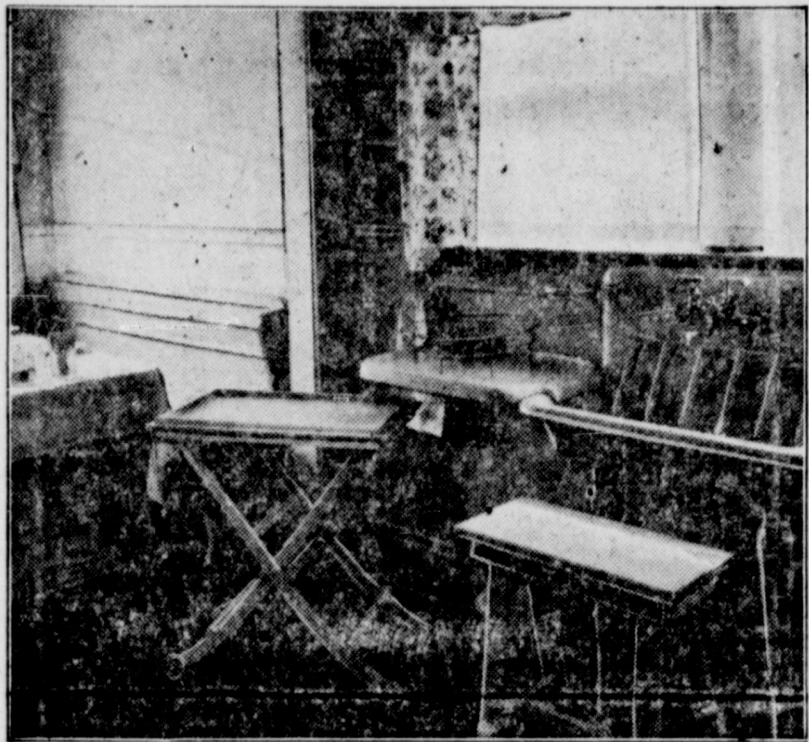

J. B. Caldwell M.D. AT AGE 83

all ages. Elderly people will find it especially ideal. All drug stores have the generous bottles. We would be glad to have you prove at our expense how much Dr. Caldwell's Syrup Pepsin can mean to you and yours. Just write "Syrup Pepsin," Monticello, Illinois, and we will send you prepaid a FREE SAMPLE BOTTLE.

NEW JERSEY FARM KITCHEN WELL ARRANGED

Tea Wagon Made by New Jersey Housewife From the Backs of Two Folding Chairs That Were No Longer Fit for Service.

(Prepared by the Bureau of Home Economics, United States Department of Agriculture.)  
Unusually well arranged is this farm kitchen in Essex county, New Jersey. The modern sink with its double drain boards is placed sufficiently high for a medium tall woman. It has splendid light from the double window above and also from the dining alcove, which is near enough to make meal getting a very simple problem, yet just enough removed from the activities of the kitchen to be pleasant. The useful tea wagon was made by the homemaker and her husband out of the backs of two folding chairs that were no longer fit for service. The stool on which one can sit while washing dishes is also homemade. The wooden rack saves the bottom of the sink from marks made by the dishpan. Other features that make this kitchen attractive to work in are the cretonne curtains over the sink, and the applied drapes in the alcove. The improvements in this kitchen were the result of advice given by the county home demonstration agent. The photograph was taken by the United States Department of Agriculture.

WHAT CHILDREN NEED FOR HEALTH

Many Essentials for Good Nutrition Must Be Present.

(Prepared by the Bureau of Home Economics, United States Department of Agriculture.)  
Some of the nutritional and environmental needs of children were discussed in a talk recently given by Miriam Birds-eye, extension specialist in nutrition, before the West Virginia State Nurses' association. Miss Birds-eye said, in effect:

"Adequate food must be provided for children. This means that essential foods must be raised on the farm or available at all seasons of the year in nearby markets. Chief of these are milk and other good-quality proteins, butterfat, whole-grain products, vegetables and fruits, and pure water. Foods must be selected to meet the needs of the body at different ages and to come within the reach of the family purse. They must be prepared and seasoned to meet the needs of different age groups, combined into appetizing meals and served at regular hours. Food habits must be wisely trained.

"Other essentials for good nutrition must be present. These are sunshine, sleep, rest, fresh air, happy work and play, freedom from overwork, normal emotional life, wise parental guidance, protection from illness. A glance at this list shows that agriculture, medicine, sanitation, nutrition, home economics, and psychology all have their contribution to make. Specialized service is needed from a number of agencies, and on certain points several organizations can unite their efforts."

Use Meat Thermometer for Rib Roasts of Beef

If the homemaker would use a meat thermometer when roasting beef she would get the same results each time she cooks, according to the bureau of home economics, United States Department of Agriculture. The thermometer is placed in the center of the thickest part of the roast, and when it records certain temperatures, the meat has cooked to the stage of rare, medium, or well done. When the family preference is for rare roast beef, the meat should be taken out of the oven when the thermometer reads between 130 and 150 degrees Fahrenheit. A medium roast is cooked to between 150 and 170 degrees Fahrenheit, and the meat is well done at about 180 degrees Fahrenheit. The element of guesswork is thus removed when a thermometer is used. Meat thermometers are made by several different manufacturers. They are not expensive. Specialists in meat cookery in the bureau of home economics have found that by their use in the laboratory they can cook hundreds of roasts and always have the results comparable. They recommend, therefore, that homemakers who wish to cook by exact methods should use the meat thermometer.

Care of Paint Brushes

Paint should never be allowed to dry on a brush, says the United States Department of Agriculture in Farmers' Bulletin 1452 on "Painting on the Farm." Nor is it advisable to keep paint brushes in water. When painting stops for more than an hour, the brushes should be kept in raw unseeded oil. When painting is again resumed, as much oil as possible should be scraped or wiped from the brushes, after which the remainder should be thoroughly mixed with the paint by repeatedly filling the brush and scraping it against the inner edge of the paint pot.

Chicken Stuffed With Potatoes and Raisins

A large fowl of too uncertain an age to be safely baked may be appetizingly prepared in the following way, says the bureau of home economics:

- Plump fowl, weigh- 2 tablespoons
- ing 4 to 6 pounds chopped onion
- 4 or 5 medium-sized 2 tablespoons
- potatoes parsley
- 1 cup raisins, with- Flour
- out seeds Butter
- 3 cups canned toma- Salt and pepper
- atoes

Simmer a plump fowl weighing four to six pounds in a small quantity of salted water until tender. Remove it from the broth and set the fowl aside for stuffing. To the chicken broth add three cupfuls of canned tomato and two tablespoonfuls of finely chopped mild onion and let this sauce cook down. In the meantime prepare a stuffing for the chicken by cooking and mashing the potatoes and adding to them the raisins and enough milk to make the mixture like ordinary mashed potatoes. Stuff this while still hot into the body cavity and neck of the fowl. Crowd in all the stuffing possible and do not mind if it protrudes somewhat. Pour a little melted butter over the chicken and put it in the oven to brown. Thicken the tomato sauce to the consistency of a gravy and add two or three tablespoonfuls of finely chopped parsley and green pepper if desired. When the chicken and the surface of the potato stuffing have become delicately brown put the chicken on a huge hot platter. Pour part of the sauce around it and serve at once.

Cherry Pie Can be Made During Winter Season

Cherry pie can be made in winter time if canned cherries are used. The bureau of home economics gives the following suggestions for making it:

Bake an undercrust until it is delicately browned. Be careful not to let this crust become too brown, however, or it will be overcooked when the pie is baked. Strain the juice off of the canned cherries. If they are unsweetened mix the needed quantity of sugar with about one-half tablespoonful of cornstarch for each pie, and cook this with the cherry juice until it is thickened. Add one tablespoonful of butter and a few grains of salt, stir in the fruit, and put this filling into the prebaked pie crust. Moisten the rim, lay the top crust in place, and press the edges carefully together so that the juice will not leak out. Prick the top crust to allow the steam to escape. Bake the pie for about 20 minutes in a hot oven (450 degrees Fahrenheit), or until the upper crust is brown.

For cherry tarts bake pastry shells on the outside of muffin pans, and fill with the fruit mixture. Serve at once, or to give an extra touch add a spoonful of whipped cream or cover with meringue made of a stiffly beaten white of egg, one tablespoonful of sugar, a few grains of salt, and a drop or two of vanilla. To brown the meringue, return the tart to a very slow oven for 15 to 20 minutes.

Cooking Artichokes

Jerusalem artichokes may be boiled in their skins and peeled afterwards or peeled beforehand. Only a small quantity of water should be used. Small tubers will cook in 15 to 20 minutes. They may then be served with melted butter with a few drops of onion juice, in cream, in white sauce, or in a savory tomato sauce; or they may be scalloped in a white-sauce with grated cheese and crumbs on top. Pared and sliced Jerusalem artichokes may also be cooked in milk in a casserole or a double boiler, or they may be simmered in meat broth.

Community Building

Secluded Garden Spot Bound Up With Home

Fashion has decreed that fences, walls and every other barrier or boundary be abolished in landscaping a home. An appearance of spaciousness is created which is desirable in any and every city to take away that being-crowded feeling. However, the majority of the people are loath to give up their gardens, their favorite spot shielded from the eyes of the public, where they may retire to commune with their own thoughts; something which every one of us at one time or another have wanted to do and probably have done.

All who can possibly provide such a spot, should have one. One must not necessarily be a recluse to desire peace and solitude occasionally, and at such a time a shady, flower-laden spot, shielded from the public eye, the air filled with the fragrance of the blossoms, where one might sit and dream to heart's content or read one's favorite book at leisure and without disturbance, is oh, so heavenly.

It need not be necessary to enclose the entire property, just a small corner is sufficient. As an enclosure for a spot such as this no matter how small or how large, there is nothing that is more pleasing and attractive than a living hedge, or for any situation that requires enclosing, lawns, terraces, gardens, yards, etc. A lawn hedge is permanent, once it is established, and only a little shearing and pruning is required thereafter to make it very neat and trim. There is scarcely any other improvement which may be put upon a piece of property to increase its value and beauty more.—Detroit News.

Outside Shutters Add to Home's Appearance

It is frequently the case that when the home is first built necessarily stringent financial limitations prevent the incorporation of many features or embellishments which later can add much to the livability and attractiveness of the house.

An embellishment of this sort which may seem, offhand, nonimportant, is that of outside blinds or shutters, nowadays more useful for their addition to architectural balance and interest than for their original purpose of protection from storms.

The architectural type which best lends itself to the addition of the shutter is the colonial, but if proportion permits, shutters are quite as appropriate on any modern adaptation of design. The colonial shutters may be of either the louvre type or the solid blind or batten construction, usually pierced with some sort of characteristic design. Diamond, crescent, pine tree, candlestick and many other designs symbolic of the colonial era are popular and appropriate, but an individual design is probably best. Thus, one householder has pierced his shutters with the outline of a sloop, as he is a yachting enthusiast.

Proper City Planning

Individual students, familiar with the subject in all its phases, assert that city planning is hampered and seriously menaced by politics of a certain sort. Too many inferior aldermen, after voting zoning ordinances, or professing to favor them, pass orders in violation of the plan. Where favoritism and discrimination thrive, such orders threaten to nullify the zoning system. They create distrust and dislike of it. Chicago, for example, has known of instances where aldermen, by obtaining special orders out of harmony with the zoning ordinance, provided themselves with a source of private revenue.

Equitable city planning presupposes clean, capable, honest municipal administration.—Cleveland Plain Dealer.

Tourist Camps

The economic value of the tourist and the effect of the itinerant population upon communities are being studied by the United States Chamber of Commerce through a survey now under way. Many communities have spent large amounts for such "tourist bait" as automobile camps, parks and roads, but while it is believed they make a profit, it never has been determined.

Stop Leaks at Once

A leak once started often will baffle the best of repair men. It keeps getting worse. By and by a large area has to be stripped and reshingled to prevent the leakage that in itself may not cover one square foot. Stopping one leak counts for little, as new ones start operations without warning. Cheap shingles are expensive.

Clay Coping a Protection

Vitrified salt-glazed clay wall coping will enduringly protect any type of masonry or concrete wall from the effects of erosion at the top. It is inexpensive and easily available in various widths.

Money Well Spent

To make a town, big or little, beautiful, it is necessary to spend money. But why not spend money on that, if it's interesting?

Two Lives Saved by Marvel of Surgery

Two patients, whose respiration had already ceased and who were virtually dead, have been recalled to life in the Hospital of Moerby, near Stockholm, through operations performed on the heart by two young Swedish surgeons, according to a statement by the head physician of the hospital published there. The patients suffered from thrombosis, a condition whereby blood clots are formed in the blood vessels. The thrombi, or clots, had entered the heart, stopping up the artery of the lungs so that the blood could not be emptied from the left half of the heart. A young physician, Dr. Clarence Crafoord, assisted by Dr. J. P. Stroembach, at once decided to attempt operations, quickly made incisions in the heart and removed the thrombi. Both patients now seem to be out of danger. This operation was first made by a German surgeon, Doctor Trendelenburg and only two or three successful cases are so far recorded in the history of medicine.

Legal Wrangle in Sight

After Valentine Christ was jilted by his sweetheart more than half a century ago he secluded himself in a dilapidated old house in Cleveland, Ohio, and was rarely seen except when making a real estate deal. At his death in 1910 a purported will left his fortune of \$2,000,000 to John Christ and Mrs. Martha Dambach, his brother and sister, but did not mention a second brother, Adam Christ, who broke the will and received a third share. Recently a second will, yellowed with age, was found in the attic of Valentine Christ's old home, leaving his entire fortune to his brother John. If this will is upheld by the courts it will mean a redistribution of approximately \$25,000,000 worth of property to the heirs of John Christ—and the lawyers.—Capper's Weekly.

# Cuticura

Soap and Ointment

Announce their Golden Anniversary

FOR 50 years the name Cuticura has stood for all that is best in Toilet Preparations for cleansing, purifying and beautifying the Skin, Scalp and Hair.

First manufactured and distributed in the United States, they are now known and used throughout the world, ever-growing demand necessitating the establishment of additional laboratories for their manufacture in Canada, England and Australia.

Originated in 1878, the Cuticura Preparations have been able, through their wonderfully effective super-creamy emollient qualities, to meet the constantly changing demands of successive generations, and are today held in highest esteem for all the needs of the daintiest of modern toilets.

The Cuticura Preparations consist of:

- Cuticura Soap
- Cuticura Talcum
- Cuticura Ointment
- Cuticura Shaving Stick

Each is a highly developed product, with the Medicinal, soothing and healing properties of Cuticura so delicately and delightfully blended that they are unique in Toilet Requisites.

POTTER DRUG AND CHEMICAL CORPORATION

Sole Proprietors of the Cuticura Preparations

Main Offices and Laboratories MALDEN, MASS., U. S. A.

STUART'S CASH GROCERY

The betting odds on Wall Street are 3 to 1 that Al Smith will be nominated and 1 to 3-1-2 that he will be elected. It is fairly good policy to stop, look, and listen when Wall Street says anything and lays its money on the table to back it up. For money is the business of Wall Street and it usually knows whereof it speaks. On the other hand, young Theodore Roosevelt is a product of New York and Wall Street is within the environs of New York. Young Teddy recently went out to Kansas--out to the wild and woolly west--and he went without his formal dress attire, thinking the people of Kansas would know nothing about formal dress. He found out differently. Since both national conventions are to be held in the West this year and since it is conceded that the West will play a prominent part in the selection and election of presidential candidates, it may be that this situation has shaken Wall Street out of its usual cocksureness and as a consequence has made its predictions less valuable as a guide. Young Teddy didn't know his west and it may be that Wall Streeters who place campaign bets are equally ignorant of the part the West is going to play in the selection of presidents this year.

If all the money that has been invested in fake oil wells and bogus gold mines had been put instead, into community enterprises and Chamber of Commerce work, every city and village in the country would be a better place in which to live and the investor would be reaping tangible results from his investment. There are thousands of men who will give a crooked stranger one hundred or several thousand dollars who could not be induced to join with their neighbors and business associates in putting over something for the general good because it would cost them a few dollars. --Southwest Plainsman.

SUDAN, TEXAS

SUCH IS LIFE—Junior's Little Surprise

Artificial Heat Saves Orchards

Washington.—The weather bureau's frost forecasting service in the Pacific coast fruit belt, which enables orchardists to light their oil heaters and save their crops, is being extended to "smoke" forecasting for the benefit of near by cities.

With the demonstration in recent years of the amazing accuracy of the frost forecasting service, which is maintained jointly by the weather bureau and the orchardists, confidence in the artificial heating of orchards has grown until now it is utilized on a tremendous scale.

In the citrus industries alone, which brings California \$100,000,000 a year, 2,500,000 oil heaters are used to protect about 50,000 acres of orange and lemon trees. Although these heaters have been greatly improved in the last few years, they give off clouds of soot which, drifting into cities, cause a gush to housewives and financial loss to merchants.

Although thousands of suggestions have been made and numerous patents obtained, the records in the office of J. B. Kincer, chief of the division of agricultural meteorology of the weather bureau, show no satisfactory substitute for the oil heaters. So the new smoke forecasting service has been undertaken to make the best of what appears to be a necessary evil.

The frost and smoke forecasts are issued late in the day whenever dangerous temperatures are indicated and are distributed by telephone and radio in ample time to permit the orchardists to light their heaters.

Eight experts are employed in this forecasting, under the direction of F. D. Young, the meteorologist who began it single handed. They base their calculations on study of the regular daily weather map in conjunction with a hygrometric formula which takes into consideration local humidity and temperature conditions.

In one season, during which he issued 96 forecasts, Young has been within two degrees of accuracy 94 per cent of the time. Many of his warnings predicted low temperatures in terms of fractions—27½ degrees, for

instance—and 68 of the 96 were precisely accurate, while 15 others were less than one degree away from the actual point at which the mercury stopped descending in the thermometer. His largest error in that year was five degrees, and that is one incident in his life which he finds it hard to forget.

Most of the cold snaps which threaten the California fruit crop develop when an area of low pressure moves out of Arizona or southern California and an era of high pressure from Nevada swings in. The frost forecasters remain in this region until the danger passes in February, and then they move north into the deciduous fruit section of Washington and Oregon.

TAKES JAP HUSBAND

Lucy Banning Ross, widely known daughter of the late Gen. Phineas Banning and sister of the late Hancock Banning, whose three marriages to prominent California men have all ended in the divorce courts, is on her fourth honeymoon with Setzezo Oto, a Japanese student, whom she married in Seattle. This is a recent photograph taken in Hollywood.

SNAP JUDGMENT

By THOMAS ARKLE CLARK  
Dean of Men, University of Illinois.

HIGDON was taking issue with me as to certain statements which he alleged I had made in one of my books. He took the other side and argued fluently for his point.

"I don't believe what you say; I think you are wrong in your conclusions."

"Well, what are my conclusions?" I inquired, for it began to dawn upon me that Higdon was more than a little vague as to what I had been trying to elucidate. He hesitated, and stumbled in his attempt and got rather red in the face.

"When did you read my book?" I asked finally, "and how carefully did you do it?"

"I've never read it at all," he finally confessed. "I heard some of the fellows talking about it, and I formed my opinions from what they said."

I laughed, and Higdon's method of forming a snap judgment from few data is not uncommon.

Brown makes no secret of the fact that he doesn't put any faith in the Bible either as history, literature, or as the basis of a religious faith. He laughs when anyone cites the scriptures as authority for anything. He talks flippantly about it but with an assumption of thorough conversance with its contents. Now the truth is that Brown has never read the Bible. Excepting for a desultory acquaintance with its general external appearance and the recollection of some scattered verses which he learned as golden texts during his brief acquaintance with Sunday school he knows nothing about the Bible. He couldn't find the ten command-

Listen! That's Your Goldfish Raising Din

East Lansing, Mich.—If any care to know, they may find out how much noise a goldfish makes when it swims about in its glass bowl. The answer to the puzzle, which may or may not have worried folks for years, was given at the electrical show at Michigan State college during Farmers' week here.

Visitors were able to detect the slightest noise made by a goldfish as it swam around in its medium, which is noted for its lack of privacy. Detection was made possible by the principle of radio control.

Another new feature of the show this year was a radio-controlled car. The principle also will be worked out in relation to door bells. A receiving set recorded the rings from a sending set in another room through a special relay system

ments in half an hour. He doesn't know whether it was Moses or William Jennings Bryan who led the children of Israel out of Egypt, and if you would ask him to turn to the book of Micah he would not know whether it is in the front or the back of the book. The wisdom and the poetry of the Old Testament he has no acquaintance with, and the life and doctrines of the greatest Teacher who has ever lived as recorded in the New Testament he has readly never given any serious attention to, and yet he throws over the whole thing and will have none of it.

Snap judgment, and unwarranted! Jordan tells me that he does not

care for either Dickens or Robert Louis Stevenson as writers. There are others who would reach the same conclusion, so that I am not shocked at Jordan's statement, but only curious. "What have you read of Dickens?" I inquired. "Oh, I started 'Dombey and Son,' but I couldn't get very far into it. It didn't interest me." He knew nothing of the "Pickwick Papers," or "David Copperfield," or

FAST GIRL SWIMMER

This is Corinne Condon, Omaha's best bet among the fair swimmers for the next Olympic games. She's just seventeen; she created several sensations in Buffalo at the National A. A. U. meet last year. Besides holding four national records, the young lady also holds eight midwestern records.

Fast Flight Soon

Paris.—"Around the world in 20 days" will be practical in a few years, according to calculations of French aeronautic experts based on the numerous flights from Paris to the Far East accomplished in the last two years.

From a detailed examination of these flights it is apparent that the actual flying time over long distances was only a small part of the time taken, due to delays on the ground. Thus, Pelletier D'Oisy, who flew from Paris to Saigon, a distance of about 7,000 miles, in 18 days, lost three days at Karachi, India; another day at Agra and three more at Calcutta. The Americans, Brock and Schlee, flew from Paris to Rangoon, 6,300 miles, in ten days, having lost one day at Constantinople, owing to passport formalities.

Of course, none of these men flew at night. It is therefore deduced that, even at present, the Paris-Java flight, of a little more than 8,000 miles, can be made in seven days. As the circumference of the earth is 24,000 miles, the entire circuit could be made in three weeks. But for this it will be necessary to arrange the various "jumps," each of which would be

made by a different machine with a fresh pilot.

The airplanes of 1927 are vastly superior to those of three years ago as far as the motors and radius of action are concerned, but the limit of human endurance has not varied. This is especially the case when it is a question of a constant effort over ten or more days.

As far as commercial flying has progressed it may be taken that 1,200 miles a day is the average distance possible. When special measures have been taken to make night flights safe the time for the world gridding flight will be appreciably diminished.

The man who has millions today doesn't control a single minute of tomorrow.

Getting Too Close to a Tender Spot

MAW INADVERTENTLY REMINDED PAW THAT TAXES ARE ABOUT DUE

Oil Routs "Wolf"

San Angelo, Texas.—The wolf of want that had pursued Ira G. Yates, aged ranchman, since he was a lad of twelve seemed very close last fall when Yates tried to sell his ranch at \$3 an acre—and failed.

A mortgage of \$90,000 hung over the property of the seventy-six-year-old ranch owner and he had hoped to meet this by selling his 26,000 acres and his cattle.

And now the land that Ira Yates could not sell has made him a millionaire. Engineers say that there are 275,000,000 barrels of oil under his land.

Yates liquidated the debt that had loomed so large merely by leasing a small part of his real estate to an oil company. Then he sat back and let the oil companies bid against each other for the drilling rights on the rest of the land—no longer the Yates ranch but now the Yates oil field.

Cattle and sheep no longer roam over the mesa and through the

vines, for the old ranchman fears that an oil derrick might fall and kill some of the animals.

But he is a ranchman still. He has bought a ranch of 23,000 acres in central Texas and moved his herds there. There is no mortgage over the new ranch and he hopes that he never may be compelled to offer his property at \$3 an acre.

"Creditors used to be after me for money," said Yates as he mused on the changes that have occurred. "Now a lot of people try to get money from me, but it's a different sort of demand."

This is the first time, he added, that he has been "ahead of the wolf" since he was left an orphan at the age of twelve.

Sound Waves Slay

Sound waves inaudible to the human ear will kill certain small animals and fish, says a scientist.

Seek to Find Trace of "Lost" Indian Tribe

Washington.—Hope of uncovering traces of a "lost" tribe of Indians, the Calusa, which disappeared about 100 years ago after having played a dominant part in the history of southern Florida, is taking a Smithsonian Institution expedition under Henry B. Collins, Jr., to that state to excavate newly-discovered mounds.

An account of a battle in 1513, in which 80 canoes filled with Calusa braves prevented Ponce de Leon from landing his forces along their coast, is history's earliest mention of the tribe. Records disclose that later the tribe acquired great wealth in gold from Spanish galleons wrecked off the coast.

The Calusas were known to have made human sacrifice of their captives, scalped and dismembered the bodies of their slain enemies, and have often been accused of cannibalism.

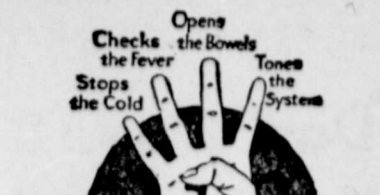

The Only Way

The only way in which one human being can properly attempt to influence another is by encouraging him to think for himself instead of endeavoring to instill ready-made opinions into his head.—Sir Leslie Stephen.

Called Ideal Youthful Americans

Raymond Woog, famous French portrait painter of children, has made his final selection in his search for the "ideal American boy and girl." The boy, of Plymouth stock, and the girl, of German ancestry, are, the painter declared, "ideal symbols" of American action. The children are shown above, left to right: G. Weston Watson, twelve, son of Mr. and Mrs. Watson of Forest Hills, and Florence Duell, ten, daughter of Mr. and Mrs. William Duell of New York city.

# IDLE ISLAND

By ETHEL HUESTON

Copyright 1927 by The Bobbs-Merrill Co. WNU Service

## STORY FROM THE START

On the verge of nervous collapse, due to overwork, Gay DeLane, successful New York artist, seeks rest at Idle Island. She rents a cottage, the "Lone Pine," on an island character, the "Captain," and his sister, Alice Andover, "administrator." Gay finds the cottage is tenanted by an elderly lady, "Auntalmiry," who consents to move to another abode, the "Apple Tree." Awaking from sleep, Gay imagines she sees the face of a Chinaman peering in the window. On an exploration of the island Gay, standing on the seashore, is horrified by the appearance of the drifting body of a drowned man which she nerves herself to bring to the shore. A bullet wound in the temple shows the man to have been murdered. Gay makes her way to the "Captain" with the story. Returning with him to the shore, they find no body there, and Gay's story of the incident is set down to an attack of "nerves." Gay, unable to convince her neighbors of the truth, draws a picture of the face of the dead man, intending to send it to the authorities. She meets a stranger, apparently another visitor, to whom she tells the story and shows the picture. He asks her to let him take it, but Gay refuses. Next day, after a night spent with "Auntalmiry," Gay finds the picture has been taken from the cottage. "Rand" Wallace, wanderer, and considered something of a "black sheep" by the islanders, expecting to find "Auntalmiry," surprises Gay at household tasks. She likes him at once.

on rare occasion one came on errand from Portland, for the delivery of packages, perhaps, or a day's work. It was only as in a dream that she had remembered the face.

But now, with sudden fear, Gay knew it was no dream. She waited for Rand to come up to her.

"Did you—see—him?" she whispered.

"The Chin? Yes. The men must be down at the club house. They always bring some one along to cook, usually a darkey, but once it was a Jap. Perhaps they're giving all nations a try by turn." Then he felt Gay's intensity in her silence, the closeness of her hand on his. "Why, Gay, what is the matter? You're not afraid of him! Don't be afraid of a Chinkey, they never harm anybody.—You afraid! A woman who lives alone, and not according to nature and brags about it!"

Although Gay realized that the Females Wallace, as he affectionately called them, must no doubt long since have told Rand the story of the affair in the cove as they knew it, he had

Walked Up and Down Beneath the Trees.

## CHAPTER V—Continued

The days flew away like enchanted things. Gay had never been so happy, although she neglected her sacred canvases and brush. How could she work with Rand sprawling in the window-seat at her side, brown hand touching her hand, gray eyes holding her eyes? Every day he worked faithfully on the Bo's'n, Bemis' yacht, worked very hard for a few hours to spare himself more time to be with her, appearing at the Lone Pine every morning promptly at eleven o'clock, the hour of her late breakfast, which was breakfast and luncheon in one.

"So this is how one lives on nothing a year," she said to him one day, laughing. "Well, I am relieved. I know at least that you will never starve."

The next morning he handed her a pound of the best coffee obtainable at the Pier grocery store. He was very haughty. "I may be low, but I have my pride," he said. "My coffee! And when it is gone, kindly notify me. More will be forthcoming."

"Don't forget the electricity," she reminded him gayly. "It must be a nickel a week."

And laughingly she accepted the dingy coin he selected carefully from a handful to give her.

Every day he went up the slope to the Lone Pine at sunset, that sweetest hour of the day, and sat with her in the window-seat on the west, looking down to the bay where the sky burned with fresh-blown gold and flame and amethyst, burned fiercely for a while before it paled to smoking embers, pastel shades of rose and violet and cream. And when the embers had faded to gray ash they went into the woods, and walked up and down beneath the trees that gossiped to one another above them, and breathed deeply of the intoxicating spices of the forest—pine, and spruce, and fir.

At that hour they never talked, but wandered slowly here and there, stumbling sometimes over the twisted old roots of trees or fallen logs, sitting over treacherous rocks, holding hands like children, smiling at each other.

One night they lingered long in the forest, so that dusk was blackening the shadows when they turned up behind the Little club, in that pathless bit of the wood. As they went on, laughing softly, and stumbling, suddenly, without a sound, they came up to one who was walking toward them, swiftly, surely, toward the shore.

All feet fall softly on the thick pillowing of pine needles and dry mosses, but those feet that came to meet them made no sound at all. As they came together, Gay looked up, with keen but friendly interest to see who walked in her enchanted wood at nightfall, and then she caught her breath with a sudden startled intake.

The face that she saw in the dusk was sharply familiar, unmistakable, a thin little face that showed yellow in the gleaming, like yellow parchment, with narrow, sloping eye and eyes, and beneath one of them a faint shining mark, like a seam in the parchment, where a scar scored the flesh, the face of a yellow little old Chinaman.

In the dusk as she had seen it before, she saw it again, and in the fraction of a moment, the dusk received him again noiselessly, as it had received him before.

Gay had not by any means forgotten her first night on the island; when she lay alone in the cottage on the fringe of the woods in her great exhaustion of mind and physical weariness; when, sleeping, she had seemed to feel a gaze upon her and stirred to see, or think she saw the thin yellow face in the gloaming; and had turned again to her sleep, saying dreamily it was but a dream. She had however made inquiry casually and had been told there were no resident Chinese on the island, but that,

She could not eat, although the breakfast tray for two was most enticingly arrayed. Over her cup of coffee her eyes clung to Rand's eyes, very large, very deep, darkly troubled.

"Rand, please eat," she begged. "You will be very hungry before night! Eat, please eat!"

"Gay, I can't. For the first time in my life, my appetite was all filled up before I began. I hate to go and leave you. Gay, you aren't thinking of going away the first of September, are you? I will make the trip as fast as I can, but I cannot be back by the first. You couldn't go before I return, would you?"

"There's really nothing to hurry me away," she said reasonably. "I like it here, and I do need more rest, and they say—the weather is very nice in September."

"The weather! Are you staying for the weather?"

Gay shook her head. No—for you.

Rand stood up suddenly, and Gay, too, rose slowly. Hard in hand they crossed the pleasant room to the door that opened down upon the bay where the Bo's'n waited for Rand, to take him away.

"I kissed you when I came the first time," he said softly, "wouldn't it rather hurt your feelings if I went away—less affectionately?"

Gay nodded. "Terribly. I should think you didn't like it."

Rand took her in his arms and kissed her not once, but many times. "Where you ever in love before, Rand?" Gay asked softly.

"Well—yes," she admitted hesitatingly. "Er—weren't you?"

"Well—yes," she acknowledged, smiling faintly. "But never like this, Rand, never like this."

Her cool, firm, slender fingers caressed his hair, touched his lips, cradled the curve of his chin.

"Rand," she whispered. "Rand." At three o'clock, with smiling tremulous lips, and tears streaming down her face, but laughing, Gay stood in the highest window of the Lone Pine, and blew a kiss to the wind as Rand turned the Bo's'n east, to sea.

## CHAPTER VI

With the first of September came the breaking up of the summer colony. Gay was grateful for the silence after the clamor of young voices, twanging ukuleles, whining saxophones. Adorable, waiting alone at the top of the hill, for Rand to come!

If sometimes she was troubled by a vague presentiment, a prophetic suggestion that all her future life would be something like that, waiting for Rand, she stifled it resolutely. She felt that it was doubly sweet to be alone in awaiting his return, that of all the summer colony, she alone remained, waiting.

There was a point high on the rocks to the east of the Little club where she often sat by the hour, chin in hand, gazing dreamily off to sea. Rand would not return that way. He would come by fastest State-of-Maine express, but it was the way he had gone, and so intrigued her fancy.

Chin in hand, eyes misty with dreams, thoughts far away to sea in the south, she sat one day when a voice called up to her from a lower place among the rocks.

"Miss Delane! May I come up?"

Gay turned quickly, and her eyes contracted wonderingly. She smiled. It was the man she had directed to the landing on the fateful day of her discovery in the cove.

"Come up, by all means," she said cordially.

And as he came up, climbing carefully and with a caution that spoke of little custom, she gave him her hand in greeting.

"How in the world did you know my name?" she asked interestedly.

"Oh, Gay Delane! It was on your sketch book that day. Do many times I have wondered about it so many times—whatever came of it all? Did the

police trace him? Did you ever get back the little sketch, and—"

Very briefly she told him of the disappearance of the sketch.

"Are—are you sure?" he asked doubtfully; almost, it seemed to her, quizzically. "It seems—very—well, unnatural, you know. Why, nobody knew about it—Didn't you drop the book? Couldn't it have fallen off? It seems—"

"Now, don't you think I am crazy," she said with some heat. "Everybody else does. But I am trusting you to trust me."

"I will trust you," he said quickly. "I do. It was bad luck all the way round, and I'm sorry. I wish I had taken the sketch from you by main force. I hate that worst of all, losing the sketch. Do you remember the hand—very fine—"

"Don't," she said. "Don't talk of it. I should have done something for that poor boy—but what could I do?"

"Don't think of it. Let's talk of something else—Are you remaining long on the island? It seems very quiet here now. The summer people have gone, have they not?"

In spite of her best efforts, feeling the curious interest of his eyes and his words, Gay felt her face flush for her lingering.

"I was worn out," she explained quickly. "I had to have a long rest. I shall stay a little longer—a week or two perhaps. While the weather is nice. I like it better now the summer crowd is gone. Just the nice, good, religious natives are left. And me, I like it. But I did not expect to see you here again."

"I wish I could say I had come only to see you," he said, "but I am afraid I dare not go so far. As a matter of fact, I have learned that they are anticipating rather a land boom around here in the next two or three years, and my partner and I are hoping to pick up something for a song, and sell it after a bit for a—well, a grand opera. I am scouting out the land."

"How interesting. How very interesting!" Gay stood up suddenly. "You offered me tea before, and I refused. I am holder now. Will you tea with me? And tell me about it."

They passed back over the rocks and into the woods, skirting the Little club, in silence.

"I shall have to take a peep at some of your private papers, I think," Gay said smilingly, as she led the way into the Lone Pine. "Or shall I call you 'Say'?"

"Ingram, Ronald Ingram—I beg your pardon, I seem to feel that I know you so well I quite forgot you did not know my name."

"Well, Mr. Ingram, welcome to the Lone Pine. There is something about you—something New Yorky—that makes me tingle for Times square."

They were chatting companionably over their tea, chatting of work, of aims and interests, the big things of life, when Auntalmiry came to the door. She came intentionally knowing there was a guest; Gay knew that at once, realized it with a vague resentment, although knowing it was not like the little old woman to intrude. She was dressed for the occasion. In her best black Sunday silk, with her coral cameo at her throat. There was a flush of excitement in her cheeks, and as she stepped into the room, not glancing at Gay, she swept Ronald Ingram with an eager breathless gaze.

"Oh, Mrs. Bridges, this is Mr. Ingram," Gay said lightly. "Mrs. Bridges, for company," she explained laughingly. "Auntalmiry to all us home-folks. Sit down, Auntalmiry; tea's nice and hot."

"Yes—yes, I will." Auntalmiry sat down stiffly, her eyes still intent on the young man who had crossed the room to stand by her chair as she sank into it. And intent upon his face, the light faded suddenly from her eyes, the flush died in her cheeks. All in a moment she was smaller, older, very tired.

A little later Mr. Ingram went away with many warm and pleasant words, and with a last light lingering touch on Gay's hand. Their eyes met, understandingly, as they smiled farewell. When Gay returned to Auntalmiry she was sitting wilted slightly in the chair, and her face was sad.

"Gay, you will excuse me, won't you? For coming like that, when you had company. I saw him on the piazza—a stranger—and I thought maybe Buddy had come."

"Buddy? Do you mean Rand?"

"No, Buddy—my son Buddy."

"Auntalmiry, your son! Have you a son? Oh, I didn't know you had a son. Why didn't you tell me?"

"Yes, Buddy, my son. I didn't tell you, dearie, because—we aren't like that. We just hold things in our hearts, sad things, and say nothing. The glad things, too, perhaps, too much. We don't scatter our feelings, good or bad; we shut them, I thought perhaps some one else had told you."

"No. No one on this island has ever mentioned your son—Buddy. I never heard of him before."

"We are like that," she said faintly. "We hold one another's secrets to ourselves. They would talk to each other—but no one would tell me—sadness—to an outsider, one who didn't belong."

"Was it a sadness, Auntalmiry, having the son?"

Auntalmiry's eyes glowed suddenly, but her voice remained mild and even. "It was heaven," she said gently. "But he went away—and never came back."

"Oh! I am sorry."

"He was a gypsy boy, Buddy, like his father. His father was a singer who came here one summer—a fine singer. But he was a gypsy. He went away, too. I didn't mind that so much."

## The BABY

Why do so many, many babies of today escape all the little fretful spells and infantile ailments that used to worry mothers through the day, and keep them up half the night?

If you don't know the answer, you haven't discovered pure, harmless Castoria. It is sweet to the taste, and sweet in the little stomach. And its gentle influence seems felt all through the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely, at first sign of colic; or constipation; or diarrhea. Or those many times when you just don't know what is the matter. For real sickness, call the doctor, always. At other times a few drops of Fletcher's Castoria.

The doctor often tells you to do just that; and always says Fletcher's. Other preparations may be just as pure, just as free from dangerous drugs, but why experiment? Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold!

## Children Cry for Fletcher's CASTORIA

PILE SUFFERERS Get this handy tube Instant, soothing relief and guaranteed cure itching, Itching Protruding Piles. The Druggist will refund the money if it fails. In tubes with glass pipe, 50c or in tin boxes, 50c. Ask for PAZO OINTMENT

Quick Relief! A pleasant, effective syrup—15c and 60c sizes. And externally, use PISO'S Throat and Chest Salve, 35c.

## Evidence That Tigers Select Human Victims

Man-eating tigers of the Indian jungles sometimes appear to single out a certain person and go after him, ignoring all others until they get him, points out Gen. William Mitchell, the noted flying officer, in an article in Liberty. The general tells a story to illustrate his point.

"A native being separated from his companions in the jungle and was chased by a tiger," he writes "He succeeded in climbing into a tree, while the tiger remained on watch below."

"After a while," General Mitchell continues, "his companions, noting his absence and suspecting, that a tiger

might have killed him, returned, making a great racket by beating drums so as to keep the tiger away.

"The man descended and joined his companions. They were walking quietly, single file, through the jungle, when suddenly there was a flash of orange and black and the doomed man was carried off by the tiger. It is related, also, that a man was the fattest of the group."

## Reason and Instinct

The amount of conscious reason that an ordinary man uses in his life compared with the great unreason or blind impulse and inborn tendency that impel him, is like his artificial light compared with the light of day—Indispensable on special occasions, but a feeble matter, after all. Reason is an artificial light in the sense that it is not one with the light of nature and in the sense that men possess it in varying degrees. The lower animals have only a gleam of it now and then. They are wise as the plants and trees are wise, and are guided by their inborn tendencies.—John Burroughs.

All that stands between the college graduate and the top of the ladder—is the ladder.—Exchange.

## Inexcusable Mistake

There is a delightful old Irish woman who keeps a corner fruit stand in a Western town. One day a gentleman disposed to be facetious took up a fine melon from her stall, and said gravely: "You have pretty good apples in this state; but where I come from we have them twice that size."

**Sleepiness Elusive.**  
Sleepiness is such an elusive function that it visits you in your evening chair, but flees as soon as bedtime arrives.

**Smoking a Real "Deadly Sin."**  
Smoking is a real deadly sin in some countries today. It is probable that more men have died of tobacco smoking at the hands of Sikhs, Senussis and Wahibis, whose religions forbid this practice, than died under the Roman empire for professing Christianity.

**Daily Thought.**  
There is no substitute for thoroughgoing, ardent, sincere earnestness.—Charles Dickens.

**Little Women in Lapland.**  
The women of Lapland are among the tallest in the world, averaging 5 feet 10 inches in height.

**New Alloy for Grate Bars.**  
A new alloy for grate bars with only a 50 per cent higher cost than cast iron is claimed to possess from three to ten times longer life.

**Egyptians Used Cedar.**  
Cedar, which was hauled long distances, was used extensively by the ancient Egyptians for such general purposes as we employ white pine.

**A Hot One.**  
Dauber—"Yes, my parents tried hard to keep me from being an artist." Critic—"I congratulate them on their success."—Boston Evening Transcript.

**Much From Little.**  
It is claimed for the hundreds of millions of bushels of Marquis wheat produced annually in the United States and Canada, that all originated from a single grain planted by a scientist in Ottawa in 1903.

**Love Produces Maladies.**  
Medical scientists say that love produces in some people definite physical maladies ranging from catalepsy, in which the victim becomes rigid and unconscious, to deafness and complete loss of speech.

**Cook Without Fire.**  
The people of India, when fuel is scarce, cook an egg without fire. The egg is placed in a sling and whirled around for about five minutes, until the heat generated by the motion has cooked it.

**Fastest Train.**  
Fastest train in the world traveling on regular schedule covers 77½ miles in 75 minutes, running at a speed of 61.8 miles an hour.

**Farm Improvements**

Many new farm improvements have been made in the Sudan trade territory during the past month and many more are contemplated in the near future. Those having made substantial improvements on their farms are: Mr. Chisholm, 6 miles south of town, just completed a new residence; R. E. Lee, 10 miles south of town, a new residence; Earl Miller, 6½ miles south of Sudan, a new 26x32 residence; M. E. Thresher, of Circleback community, general improvements; E. Pope, 3½ miles north of Sudan, a new residence.

G. H. Russell, who arrived in Sudan two weeks ago and purchased the Sudan Drug Store, has been confined to his room for several days with illness, but at this writing he is able to be out again.

**Social At Church**

The Ladies Missionary Society of the Methodist church will hold a social at the church (tonight) Friday. Admittance of 10 cents to attend the program will be charged. There will also be on sale candy, pop corn and plenty of cherry pie.

Now is the time to get that land in shape for a good crop for 1928. Remember that those who last year had their land ready when the rains came was the man who made the crop on a shy rainfall. Those who waited and then had to put up their land had a "shy" crop on a "shy" rainfall.—Terry County Herald.

Mrs. B. R. Haney, who has been confined to her room for the past week on account of illness, is able to be up again.

**Diamond Jubilees.**  
There are two diamond jubilees—one when you are married 75 years, and the other, later, when you get the last installment paid on the ring.

**Officers and Service**

More important than the mere occupancy of an office, Federal, State or County, is the matter of efficient and prompt Service. Office-holding with careless, negligent and indifferent service, or with that haughty and imperious spirit that says in effect, "I will," or "I won't" as it happens to please the occupant at the time, merits no praise from the public and in the end will bring no plaudits of well done nor honorable mention for courteous, willing and faithful public service.

The idea that public office is a

private snap, to be administered with no regard to public needs and convenience, has no weight or force against the rights of the people for the fullest measure of service demanded by law and one's official oath and bond. If you have reached that state of mind where service is burdensome and duty is unwillingly and reluctantly, maybe hesitatingly and snappishly performed, it is time to step down and out. Please remember that the office, whether high or low, is not your's, but belongs to the people and you are their hired servant.

**Seasonable and Dainty Frocks of Durable Materials**

The Virginia Hart Line, their keynote is simplicity—yet the smartness of their styles and the care which has been taken in their making, fit them for any summer occasion. Look for this space in the Sudan News each week and take advantage of the wonderful bargains offered.
