VOL. 3

SUDAN, LAMB COUNTY, TEXAS, MAY 11, 1928

NO. 46

## Marketing Problems

There are two major problems of interest to all involving the agricultural industry, economical production of farm commodities and orderly marketing of same. Both these situations must be given thought by farmers before a successful solution can be had. These will continue to be major problems until the farmers recognize their part in helping improve the situation.

The importance of these problems is being recognized by men of finance and those in authority everywhere. Commercial organizations are devoting much time and expense helping the agricultural conditions. Much thought and assistance are being given by the Federal and State governments by large appropriations annually to assist in economical production and orderly marketing. As long as there is prosperous, contented agricultural population the nation will continue to hold its place among other countries of the world.

During the past 5 years great strides have been made by farmers in different sections of the country in the cooperative distribution of their commodities. Recently much interest has been shown in cooperative marketing of poultry products, bringing in many thousands of dollars that would be lost to the grower. In West Texas there are being many organizations of this kind started and operated successfully. The Brown Poultry Association has been operating very successfully for the past five years. The Stamford Association, consisting of a number of counties, has been under way a couple of years. The El Paso organization made its members a profit of thirteen cents above local price per dozen of new eggs during the past year.

An interview with the manager of the Lubbock Chamber of Commerce, A. B. Davis, shows what this organization thinks of the cooperative distribution of agricultural products. "We are for cooperative marketing regardless of section or whether it affects this trade territory or not." The Lubbock Chamber of Commerce is cooperating with the extension people and the college in forming a poultry association and surrounding counties. Mr. Davis said: "We are going to see this association through

## A Simple Cure For Colds

Miss Lola Blair, food specialist and Miss Minnie Mae Grubbs, district agent, spent April 17th and 18th in Wheeler county. On the 17th they met with the Lela Home Demonstration Club and Miss Blair spoke on "Positive Signs of Health." As so many of the Lela women were just recovering from the "flu" she gave them this remedy for colds: Drink one glass of water each hour. Into this water put one-half teaspoonful of soda, or one teaspoonful of salt or the juice of one-half lemon, or the juice of a whole orange. You can add either of these you prefer. Change them if you desire and drink the water either hot or cold. Give this a fair trial and cease wasting so much physical energy on colds.---M o b e e t i e News.

J. R. Dean was a business visitor in Lubbock Wednesday.

financially and on a working foundation. We are interested in the South Plains, and will assist neighboring counties to work out similar enterprises by invitations through the chambers of commerce in the respective sections.

It is very gratifying at the present time to note the interest and support given by civic and commercial organizations all over the country to improve conditions of rural life. With encouragements of this kind, and the gradual expansion of the educational process to the boys and girls on the farm with a type of instruction that will help them raise their standards of living economically, socially and spiritually will be the greatest means of improving the agricultural conditions. It should be the desire of local organizations to assist and work for the improvement of the economic conditions of the rural class in their respective sections. The agricultural industry is the foundation of our national wealth. There must be a prosperous and contented agricultural class if we are to continue to hold our place among other nations. History of the past clearly demonstrates the part that agriculture played in the rising and falling of civilizations that have made important contributions to the world." H. S. Dep't of Agriculture

## Farm Bureau Meeting

The Lamb County Farm Bureau held an interesting meeting in Littlefield last Saturday, May 5th. More than fifty members of the Cotton Association in Lamb county were present to elect delegates to the district convention which is to be held in Plainview next Saturday, May 12. Messrs J. T. Elms, J. G. Harrel, N. C. Chisholm and F. H. Glazener and C. C. Preston, of Sudan, were elected to officially represent Lamb county in the nomination of a state director to represent District No. 19 for the coming year, beginning in July.

Those present were entertained by one short reading by Miss Jewell Hammock, of Sudan, and one by Miss Ora Preston, also of Sudan. The body voted unanimously to do what was necessary to secure all the county funds available from headquarters so as to build up and strengthen the county organization.

Lamb county has the honor of shipping in 1927-28 season the largest per cent of their cotton to the Texas Farm Bureau Cotton Association of any county in Texas. However, we know we cannot hope to hold this record without working even harder next year than ever before and using all the team work possible.

Some prominent members were present from Sudan and asked that we hold the next monthly meeting in Sudan June 9. It was voted by the body to hold a county meeting the second Saturday in each month, the first one being in Sudan June 9th.

## Busy Bee Club

The Busy Bee's met at Miss Eleanor Ray's home Friday evening, May 4th., and finished making the flowers for Friendship Church.

We met at Aliene Scoggin's home Tuesday evening, May 8th. at five o'clock. Only a few were present, but we had a number of visitors. The visitors present were: Mesdames Morrow, Serrett Glasscox and daughter Alice Marie. All enjoyed the refreshments.

We will meet at Nina Wilson's home Friday evening at five o'clock, May 11. We would like to see all members present for one more time. Now don't forget the day and come. Visitors are welcome any time they can come to our meetings.

Reporter.

## Zone Meeting at Muleshoe

Zone meeting of the Women's Missionary Society of the Methodist church was held in Muleshoe on Tuesday, May 8th. Sudan was well represented. Those attending are as follows: Rev. and Mrs. C. H. Ledger, Mesdames C. C. Willingham, John A. Dryden, J. P. Robertson, F. C. Broyles, C. M. Furneaux, J. J. Franks and J. R. Dean and daughter, Katherine.

A very interesting program was carried out. The music was furnished by the Sunday School orchestra, also violin solo. One interesting feature of the program was the pageant given by the Muleshoe women.

H. G. Ramby, who accompanied Mrs. Ramby and her parents, Mr. and Mrs. J. R. Bull, to Ruidoso, returned the first of the week.

## How a Farm Bureau Helps This County

Our next prize letter tells about a real business organization of farmers. It is one that makes better business men of farmers, gives them a new pride in their profession and develops a sense of dignity which it is impossible to achieve when farmers do not work together in buying what they need and in selling what they produce. This letter by T. S. Nored, Henry County, Tennessee, describes his county Farm Bureau and is well worth study:

"Under the leadership of J. A. Patrick, former county agent, it has grown from a mere office to a small store building and from that to a larger building, previously occupied by a wholesale firm, where the farmers can get their poultry, dairy, hog, and mule feed, of the best quality, at a saving in price. We are being taught to buy by analysis instead of the bag, and learning that buying by low grade, cheap price is the most costly method.

"The Farm Bureau has constantly stressed purebred cows, hogs, poultry, etc., the growing of legumes and soil-improving crops, inoculating, liming, etc.; the handling of seeds and literature to help its members; the spraying and care of orchards, and many other things of advantage to the membership.

The handling of the members' poultry, hogs, etc. (shipping in earlots with the net receipts related to the membership in proportion to amount of stock or poultry furnished), and the increased volume of business in sales of fertilizers, feeds, seeds, etc., prove its worth.

"It has a bulletin board on which the farmer can read the latest market quotations on hogs, cattle, potatoes, etc., and the number of cars received at different points, and an exchange board where the farmer can list his wants or what he has for sale. Here a member often finds what he wants listed by a neighbor, making a medium of exchange that saves dollars in time, trouble, and inconvenience. The large office is supplied with comfortable chairs and good fires. It is headquarters for the farmers to drop in, business or no business, to exchange ideas, have a friendly talk, make new acquaintances, etc.

"Our Farm Bureau is a great educational institution for the farmer and we never get too old to learn. High schools and colleges are necessary but they are only the foundation. Our education cannot stop there."

How much such an organization as this would help farmers in every county! It helps not only (1) in getting more profits on what farmers sell and (2) saving costs on what farmers buy, but (3) it increases the self-respect of farmers by giving them a place of business of their own where they can meet and discuss problems in a way it is impossible to do in some city store or on the town sidewalks. Notice Mr. Nored's remark: "It is headquarters for farmers to drop in, business or no business, to exchange ideas, have a friendly talk, make new acquaintances, etc." Isn't that something worth having in every market town?---Progressive Farmer.

**Water Breaks Concrete.**  
Concrete can be broken up by use of water in a special tool under three to five tons per square inch pressure.

## Six Eggs Weigh 29 Ounces

Talk about your egg producers, but here's one that has them all lashed to the mast. Mr. W. Z. Burrow, living ten miles south of here, has a Rhode Island Red hen that lays every day, but lays a normal egg one day and the next day one with two yolks, a half dozen of which will weigh five ounces over a dozen of the former. We have seen similar egg freaks before, but not with such alternate regularity. Mr. Burrow says he has fifty-five hens from which he gets from 35 to 40 eggs daily. One of the large size eggs may be seen at J. R. Grissom's and one at the News office.

## Joy of Being the Editor

Getting out this paper is no picnic. If we print jokes people will say we are silly; if we don't, they will say we are too serious. If we clip things from other papers we are too lazy to write them ourselves; if we don't we are stuck on our own stuff. If we stick close to the job we ought to be out hunting news; if we stay in the office we are neglecting our work and need the proverbial tin can.

If we don't print contributions we don't appreciate genius; if we do print them the paper is filled with junk. If we change the other fellow's write up we are too critical; if we don't we are asleep.

And if we print something real bright, like this, we swiped it from somebody else. And that's correct!--Muleshoe Journal.

Mrs. Charles Ball and little son Bruce, and Elmer Simpson, of Hobert, Okla., have been the guests of their parents, Mr. and Mrs. S. H. Yoakum and family. Mr. Ball came Saturday and remained over Sunday, returning home with his family Monday.

Miss Mitzie Humble and Miss Eva Mae Simpson, of Amarillo, were guests in the S. H. Yoakum home last week.

Mr. and Mrs. J. R. Dean and children were in Muleshoe Tuesday evening.

Mrs. A. D. Linton, who has been visiting her nephew and family at Tucumcari, returned home Sunday. She reports plenty of rainfall in that part of the country.

## Announcement of Closing Exercises

Friday evening, May 11th., beginning at 8:30 o'clock a musical program, assisted by readings will be given.

Sunday morning, eleven o'clock, May 13th., the Commencement Sermon will be delivered by Dr. E. W. Provence of Technological College. Special music is being prepared for the occasion.

Wednesday evening, 8:30 o'clock, May 16th., the general exercises of the grades will occur. At this time the graduates of the grammar school will be given grammar school diplomas.

Friday evening May 18, will be graduates' night. The graduates will render a program, after which the Commencement address will be delivered by Dr. R. E. Garlin. The program will be concluded by a presentation of diplomas. There are twenty two candidates for graduation.

We are fortunate in securing the two able men mentioned above, for the two addresses. You and your friends are cordially invited to attend all the closing exercises of the school.

Respectfully,  
L. L. Price, Supt.

## "Economical Production"

Not merely more cows and not more poultry are wanted or needed today, but better cows and better poultry will always be welcomed was the message the dairy special experts brought Tuesday. And they were right. Why have a scrub cow, a "boarder," or a non-laying hen, when a good one will return more than the original investment. There is no need to own poor cows or poor chicks. Get paying producers. No one would keep another working for him when that person cannot produce either through mental or physical labor. Apply the same principle to dairying and poultry raising and the costs will be lessened, more will be produced, and the new method will make the farmer a more prosperous business man.---Booneville Advertiser.

LOST--Last Tuesday purse containing \$1.00 in currency and silver, on street of Sudan or on road between Sudan and Circleback. Finder will please return to this office and receive reward.  
B. E. Garner.

FOR SALE--Tomato plants at Sudan Produce.

B. L. Morrow and Doyle Morrow, who have been visiting their parents, Mr. and Mrs. I. G. Morrow, left for their homes the first of the week. Doyle has a position in Colorado and B. L. has work in San Angelo.

I. M. Williams, of the Longview community, was a business visitor in Sudan Wednesday. He reports a good meeting going on in that vicinity of the Holiness denomination.

Dr. Foote reports the birth of a baby girl to Mr. and Mrs. J. C. Roddin, 4 miles west of town. Both mother and little daughter doing nicely.

The small son of Mr. and Mrs. F. W. McSpadden is convalescing from an attack of bronchial pneumonia.

N. Moore, the famous ball pitcher, is visiting home folks in the Longview community.

First Linen Clothes Dark.  
First linen clothes, so costly that only kings and nobles could afford them, were dark and discolored, because the art of bleaching had not been learned in older times.

## The Ethics of Saving

The wisdom of ages we have for our guide.  
Showing how men have lived and how they have died,  
From Solomon's Proverbs to the wisdom of now,  
We are taught the ethics of saving and how;  
But it makes little difference by whom they're taught.  
These lessons by many are all put to naught.  
Saving is simple, it has no complex plan;  
Just store for the future whenever you can.  
The First National Bank is a good place to store  
Your money while you are making some more.

**First National Bank**  
of Sudan, Texas

(Chor. 1925 Adam Brown Hunter)

SUCH IS LIFE — "Yes, Sir" Versus "Sure" — By Charles Sughroe

Dupes Slain for Bounty?

Austin, Texas.—Gov. Dan Moody has advised Capt. Frank Hamer of the state ranger force to go before the grand jury of the counties in which he alleges men have been killed by peace officers on frameups to secure the head bounty of \$5,000 each offered by the Texas Bankers' association.

Captain Hamer's signed statement, in which he charged that there was a murder machine in operation in Texas, stinging fake bank holdups to collect these rewards, has created a stir in banking circles and he says he is willing to go before the grand jury and submit the information which he has collected to support his charges.

He even went so far as to say that he has in his possession the name of the man who is at the head of the ring that is framing innocent men and bringing about their murder in order that unprincipled peace officers may profit by the blood money given by the Texas Bankers' association.

"The present situation in Texas," he said, "parallels that of the scalp bounty which was offered by the Mexican government when the Apaches and Comanches spread terror in northern Mexico. American adventurers went to Mexico and engaged in the business of killing the preying Indians, collecting the \$100 bounty for each scalp. When the Apaches and Comanches became scarce, the hunters took the scalps of the natives they were supposed to protect, there being a strong resemblance between the scalps of a Mexican and a Texas Apache. It was much safer to kill a Mexican sheep herder than to engage in battle with an Apache warrior.

"It is worth noting that most of the successful bandit killings have been at night. It so happens that it is not a capital offense to rob a bank at night, that is, without firearms and without endangering human life. The bankers have paid \$20,000 for the killing of night robbers who have not committed capital offenses, and have

paid \$5,000 for daylight work, where many lives were endangered.

"In one instance two men were killed who had nothing with them that would enable them to get into the vault of the bank once they were inside the building.

"Repeatedly men who have been killed were not professional bank robbers. They were identified by finger prints and there was nothing against them.

"In one instance the men killed did have in their possession an acetylene torch of the kind used by experienced bank robbers, but it was impossible to find, either on the person of the dead or anywhere about, tips for this torch. Without these tips the torch was as useless as a flashlight without a battery or bulb, or as a gun without ammunition.

"It is unreasonable to suppose that men who know the bank robbing game would undertake it without the proper tools and equipment.

"The public, because of ignorance of the true situation, gives its support to the killing of these men not knowing

the circumstances under which they were killed. The public applauds the banker for his liberality, the slayer for his courage, and all are happy, including the genuine bank robber.

"The reward of \$5,000 has aroused the greed and desire of men who have more love for money than for human life, and who are, besides, unscrupulous enough to do anything that will bring them money without too much risk of personal danger.

"Young men, drifters and loafers, whose principal traits are weakness of character, combined with certain reckless spirit, are lured by the unscrupulous one into bank robbery only to be shot to death by officers who have been 'tipped off' to the robbery. Those killed are not the professional bank robbers at all, and in most cases have not a single qualification for that work."

Captain Hamer said that his purpose in investigating the deaths at the hands of officers of men who were in his opinion innocent of any attempt at committing a crime is to prevent the death of others.

To Reclaim Philippi

Washington.—The plain of Philippi, which knew St. Paul and where, after the assassination of Julius Caesar, the Roman republican forces lost their battle with the imperialists, is the latest bit of Greece in which it is planned to rout marshes and malaria and to substitute agriculture and health.

Philippi is one of the numerous plains near the mouths of rivers on the northern shores of the Aegean sea, where careless Turkish agriculture permitted rich soil to become water-logged and marshy.

Since Greece received several million extra inhabitants as a result of the forced trek of Greeks from Turkish territory, the National Geographic society says, plans have been formulated to salvage these marshy areas of Macedonia by drainage. The valley of the Varda, near Salonika, was the area first attacked by the engineers. The plain of Philippi lies 50 miles to the east of Salonika in the valley of the little river, Angista. Ten miles south is the seashore with its port of Kavala.

Over the plain, on a rocky hill, are

the ruins of the city of Philippi, named for Phillip II, of Macedonia. It was to converts in Philippi, after his visit and imprisonment there, that St. Paul wrote his epistle to the Philippians.

In connection with the project for draining the plain of Philippi, the Greek government also will drain the territory slightly to the west in the Struma River valley. Close to the sea this valley is occupied by Lake Athinos, the small remnant of a once great lake. About it are marshy regions. Farther up the valley the entire basin is intensively cultivated, constituting some of the best agricultural land in Greece. When the Philippi and Struma projects are completed, Lake Athinos and its marshes will have disappeared.

Kill 1,000 Wild Horses as Food for Tame Foxes

Toppenish, Wash.—One thousand wild horses rounded up in central and north Washington reached here recently for the Products company, manufacturing fox food, leather goods and bone meal. Once Reynard, from his seclusion, looked out on a herd of wild steeds and wished he was stout enough to kill one for breakfast. Nowadays fox farmers on the islands off the Alaskan coast buy fresh horse meat trimmings for their fox, mink and ermine proteges.

The product is made from healthy wild horses killed under government supervision. The material is shipped North regularly from Seattle and costs the fur farmers about \$7.50 a hundred pounds plus freight. Cut fresh bone and horse fat goes to west coast poultry farms.

Toad to Fight Mosquito

Colorado Springs, Colo.—A cat-eyed, pug-nosed toad is man's new ally in the war against mosquitoes.

It is the spadefoot toad of the western plains and his legions are being mobilized for movement to mosquito-infested areas in the East.

Studies made by Ralph J. Gilmore, professor of biology at Colorado college, revealed that the spadefoot toad, unlike other frogs, is carnivorous in the tadpole stage. The poliwogs prey on mosquito larvae in shallow pools and for this reason they are expected to destroy the insects before they take wing and molest mankind.

Fighting mosquitoes by getting a higher animal to attack their larvae

is not a new method, Professor Gilmore says. Fish have been used for that purpose, but, he points out, they cannot enter the shallow, stagnant marshes in which the spadefoot toads, with a life cycle of only forty days, multiply rapidly.

Environment has forced the tadpole to change from the herbivorous habit of its ancestors to its peculiar carnivorous characteristic, Professor Gilmore believes, because of the scarcity of vegetable life in the waters of its habitat, which includes Arizona, Colorado, Montana, North Dakota and Idaho. The professor has found these frogs sparsely distributed, but abundant in limited areas.

The adult toad is small, being only two inches long. Its finely-textured skin is yellowish olive to dark gray. The frog gets its name from the horny spades, about one-eighth of an inch long, on the inner sides of its feet. With these spades it burrows into the ground to a depth of a few inches to several feet. It remains hidden during the dry seasons, and reappears after rains.

The pools of water that dot the prairies are kept virtually free of mosquitoes by the tadpoles, so much so that Professor Gilmore says he has experienced difficulty in obtaining larvae of the insect for his experiments.

FAMOUS DOG TRAINER

The picturesque and famous dog musher, Arthur T. Walden, who gained renown in the Klondike and in many dog-sled derbies, has been chosen by Commander Byrd to take charge of the dogs and sleds for the coming expedition into the Antarctic. At present he is training the dogs for the South polar trip.

THE PRINTING OFFICE

By THOMAS ARKLE CLARK  
Dean of Men, University of Illinois.

THE other boys, when we all went to town on Saturday afternoon as was the general custom, had their various loading places—the barber shop, the office of the grain elevator, the blacksmith shop or the corner of the drug store, where the girls were likely to gather or to pass by to the milliner store next door. I always brought up at the printing office. I first got acquainted with the editor of the local paper when he held father up on the street and persuaded him to subscribe for the journal. I think it was then that he invited me to come upstairs and see how a newspaper was made.

It was all very new and very interesting to me. There were the cases of type before which the men with composing sticks in their hands were setting up type for the next issue of the paper, for everything was done by hand in those days. Even the heavy old press on which the paper was printed was run by hand. I tried to pull the lever which made the impres-

sion, but it was far too stiff to be moved by my slender arms. There were the imposing stones—I never could understand why they used that word—upon which the type was carefully placed when set up, and great piles of paper, and all sorts of curious things.

I got a thrill when one of the "typos" let me hold a stick in my

WILL COACH BOXERS

The photograph shows the veteran Spike Webb, coach of the naval academy boxing team, who has once more been given the assignment as coach for the American Olympic boxing team. Webb coached the boxers who went to Antwerp in 1920 and at Paris in 1924. Both teams ran off with major honors.

hand and showed me where all the various letters and punctuation marks were. I could not see at first why they were not arranged in regular order like a normal alphabet. It was a little confusing at first to read everything upside down, but I soon got used to it. I have had no greater pride in any personal accomplishment than the moment when I stood by the printer and saw him setting up the paragraphs which I myself had written.

I hadn't been in college a week before I wandered around to the old office where the college bi-monthly was set up and printed. I was office devil for a year. Most of my college friends were made in the old office. My knowledge of typesetting helped me to earn a living for four years. It taught me accuracy in punctuation,

discrimination in the use of words; it emphasized the importance of correct spelling. It gave me an ambition. I determined to be a great editor and to spend my life in and about a printing office. It was, of course, a frustrated ambition, but I still love to loaf about a printing office. No one has a more definite philosophy of life than the printer. He could settle any social, political, or religious difficulty if given half a chance. I love the smell of ink and the sound of the typesetting machines as they click off the lines, and the noise of the great presses as they turn out the freshly printed and folded newspapers. There is a great education for the loafer in a printing office. I learned a tremendous amount there.

### Know Your Cow Association

Cow-testing associations might be well called "Know your cow" associations, for the object in view is to discover through testing and weighing just which cows in the herd are making a profit for the owner and which ones are star boarders.

Many farmers not familiar with the work of these associations, and the results obtained, rather discount the usefulness of such work. They are of the opinion that they can tell from the appearance of the milk whether or not it is rich in butter fat, and from the milk level in the pan how many gallons or pounds it is giving. It is true that one may gain much information by careful observation, particularly as to quantity production, but it is almost impossible to get even an approximate knowledge of butter content without an actual test.

The experience of well-known dairymen proves the value of cow-testing associations. Reports were recently received from 150 of the 170 such associations in Wisconsin operating 74,279 dairy cows. The average of these cows was 290 pounds of butter fat per annum, whereas the average for the State was only 190 pounds, or 100 pounds less. Having cows listed in a testing association has a natural tendency to encourage a farmer to have better cows, and the only way to know exactly whether or not a certain animal is paying for its feed and care is to have a record of its production and the amount of feed consumed. By testing the feeding ration can be adjusted to meet the needs of each animal. All cows do not eat alike any more than do all human beings. There is always a point where a cow is receiving all the feed it can economically use. To feed her more would be

a waste. To feed her less would reduce production. Here is where testing associations come in as a factor in increasing production. It is a business proposition to know your cow.--Farm and Ranch.

(Prepared by the United States Department of Agriculture.)

On many places fresh tomatoes are not obtainable during the spring. The flavor of tomato, however, is so acceptable in salad, and the vitamins contained even in canned tomatoes are so important in the diet, that an attractive way of serving tomato in a salad has been developed. A jelly is made from the canned tomato juice. While no other flavor need be used, a particularly good aspic is made by molding other vegetables, cut up in small pieces, in the tomato juice. Here is the recipe, from the bureau of home economics:

- 1 1/2 envelopes, or 3 tsp. gelatin
- 1 quart canned tomatoes
- 1 tba. finely chopped green pepper
- 2 tba. finely chopped celery
- 1 tba. finely chopped parsley
- 1 cup very finely shredded cabbage
- 1 1/2 tsp. salt
- 1/2 tsp. onion juice
- 1/4 tsp. sugar

Soak the gelatin in a small amount of water. Boil the tomatoes for five minutes, and strain through a fine sieve to remove the seeds. Pour the hot tomato juice over the gelatin and stir until it is dissolved. Add the salt and the sugar and chill. When the gelatin mixture is partly set, add the finely shredded vegetables and mix well. Add more salt, if needed. Also if the mixture is not tart enough, add a little lemon juice or vinegar. Pour into wet custard cups and place in the cold until set. Turn these molds out on crisp lettuce leaves and serve with mayonnaise.

**Making Delicate Dessert Flavored With Chocolate**

A delicate dessert flavored with chocolate can be made in the following way, according to the bureau of home economics:

- 1/2 cup sugar
- 1/2 cup milk
- 1/2 cup fine stale bread crumbs
- 4 eggs
- 1 tba. flour
- 1/2 tsp. vanilla
- 1 tba. butter
- 1 1/2 squares chocolate, unsweetened.
- 1/4 tsp. salt

Mix the flour and butter, add the milk, and stir over heat until thickened. Melt the chocolate over steam, and add to the cream sauce, with the salt, bread crumbs, sugar, and well beaten egg yolks. Beat well. Fold in the well beaten whites of the eggs. Pour into a greased pudding dish and bake in a moderate oven (325 degrees Fahrenheit) for one hour or until well set in the middle. Serve hot with hard sauce or whipped cream.

**Bouillon Desirable at Beginning of a Dinner**

A bouillon, or clear soup, is very often desirable at the beginning of a formal or rather hearty dinner. It must be carefully seasoned to be at its best. These directions from the bureau of home economics will give good results:

- Tomato Bouillon.**
- 2 quarts canned tomatoes
  - 2 cups meat broth
  - 4 carrots
  - 6 stalks celery
  - 1 onion
  - 1 small green pepper
  - 3 cloves
  - 1/2 tsp. pepper-corns
  - 1/4 cup tarragon vinegar
  - 1 tsp. salt
  - 1/2 tsp. pepper

Put tomatoes, salt, and stock in a saucepan and add the vegetables, cut in small pieces, removing the seeds from the pepper. Bring to the boiling point, then simmer for fifteen minutes. Strain through a thick layer of cheesecloth, add the tarragon vinegar and the butter. Reheat and serve. Place thin slices of lemon with chopped parsley on top in each cup of bouillon.

**STUFFED FLANK STEAK MADE DELICIOUS**

Flank Steak Can Be Made Into Savory Dish.

(Prepared by the United States Department of Agriculture.)  
A flank steak is one of the less tender cuts of meat, since it has long muscle fibers which become somewhat stringy unless cooked and carved in the right way. Flank steak, however, is economical, for there is no bone and other waste material. Like others among the less tender cuts, it can be made into an attractive and delicious dish when one knows how.

The general method of cooking any of the less tender cuts differs from the method for tender cuts. Heat, moisture, and slow cooking, help to make these cuts tender. The flank steak stuffed with well-seasoned mixture is first seared and then cooked slowly in a lightly covered vessel until the meat is tender.

The ingredients for stuffed flank are given by the bureau of home economics:

- Flank steak
- 1 1/2 cups stale bread crumbs
- 1 tsp. salt
- 1/2 tsp. pepper
- 1 onion, minced
- 1/2 cup chopped celery
- 2 tba. butter

**WAYS TO COOK AND SERVE ASPARAGUS**

*If Allowed to Stand It Toughens and Loses Flavor.*

(Prepared by the United States Department of Agriculture.)

Asparagus should always be cooked as soon as possible after it is cut. It toughens and loses flavor very rapidly if allowed to stand. To prepare it for cooking trim off any tough ends, brush carefully, and scrape off the larger scales. Wash so as to remove all sand and particles of earth which may have lodged under the scales. Fresh, tender, home-grown asparagus does not need scraping.

Asparagus is cooked in slightly salted water whole, or cut up in inch lengths. The pieces may be left whole. The cooking time of fresh tender young stalks cut up in this way may be only five to ten minutes, according to the United States Department of Agriculture; twenty to twenty-five minutes' cooking at most should be enough.

Season the cooked asparagus with salt, pepper, butter and a little cream if you have it. Let it stand in a warm place for a few minutes and then serve, either alone or on toast. Hollandaise or white sauce may accom-

Preparing Asparagus on Toast.

pany the asparagus or mayonnaise or vinaigrette, which is similar to French dressing.

The water in which asparagus has been cooked can be used in many ways and should be saved. It makes a delicious soup when seasoned, with a little cream or milk added. This may be thickened or not, as preferred. Asparagus stock is an improvement to soups made from other vegetable juices, such as tomato, onion, or celery. It combines well with cream of chicken soup, and can be made into a good sauce to use with left-over asparagus in making other dishes.

Cooked asparagus may be used in making scalloped dishes, croquettes, fritters, vegetable loaf, timbales, or added to almost any soup, stew, or vegetable salad. Vegetable combinations are increasing popular, and such dishes as cut-up cooked asparagus with new diced creamed potatoes, or with peas, give variety to the menu, and make profitable use of small amounts of each vegetable.

**Care of Canaries**

When canaries do not thrive well, or during molting time or the breeding season, special food may be necessary. If they cease to sing, prepared "song restorers" are sometimes given. The United States Department of Agriculture furnishes information as to how to handle the birds under various abnormal conditions, in Farmers' Bulletin 1327, "Canaries: Their Care and Management," which is free.

**Community Building**

**Artistic Walks Make for Home Beautiful**

Perhaps there is nothing that lends more to the appearance of the surroundings of a home than neat, artistically placed walks and driveways. Careful thought given to their placing and arrangement at the time they are built will more than repay the owner in the attractiveness they will add to the exterior of the home. Every lawn offers a variety of possibilities in location and arrangement. Like streets and highways, walks and driveways must be designed to meet the needs of those who use them. While it is generally desirable to have them take the most direct route, pleasing effects can often be obtained by the use of graceful curves. It is folly to destroy a fine tree because it happens to be in the way with the route of the walk or driveway; a graceful curve around the tree does not inconvenience any one and it will add to the beauty of the home surroundings. Often such curves can be arranged so that the garage is partially hidden behind a clump of trees or bushes. In building such curves provision must be made for the growth of the tree to prevent it from raising or cracking the concrete. Often it is possible by the use of colors mixed in the concrete to give a pleasing tone to the surface, and if desired the walk and driveway can be made somewhat decorative by marking off the surface into geometrical patterns which will harmonize with the architecture of the house.

**Shrubs Give Beauty to Garden or Park**

Relatively large numbers of shrubs should be used in nearly all landscape plantings, whether these are upon home or public grounds.

Very often there will be ten times as many shrubs as trees. The importance of these shrubs is especially marked upon small home lots, whether about the farmhouse or in the crowded city. It is essential, therefore, that every one who undertakes to develop his own grounds, or who has any responsibility for public grounds, should understand the care of shrubbery.

And since the most serious annual attention probably lies in the pruning, special consideration may fairly be given to this topic.

Shrubs of most species may be pruned with excellent results either in midsummer or early spring. If the summer season is chosen the work should be done soon after the year's growth is completed, and this point is reached earlier than most persons suppose. Generally speaking July 15 to 31 may be taken as the most favorable time for summer pruning.

**Business on Golf Course**

McComb has in the Golf Club a business asset as well as a source of recreation. More and more commercial deals are being transacted between friends, for the great value of warm personal contacts in business affairs is having increasingly wider recognition. A large number of these connections are made on just such places as the golf course: Connections that will add to the pleasure and competence of commercial transactions because of the friendly understanding enjoyed by buyer and seller. The well-known and much-talked-of Tired Business Man can renew, in these surroundings, the good disposition that counts so enormously in the success of his business. In our opinion the professional man of McComb would find that an afternoon or two of golf every week would be of surprising benefit to his every interest.—McComb (Miss.) Journal.

**Rents to Be Compared**

A comparison of existing rents and existing ground values in various cities of the United States is being made by the National Association of Real Estate Boards through a questionnaire which will be sent to all member boards.

The association is asking its member boards to state the actual rents being received for property in the best business districts, in secondary business districts and the like. It is asking at the same time the ground values current in these same sections of the city.

As a result of this study it expects to make possible a valuable comparison on relationship between rents and ground values over the country.

**Take Interest in Schools**

The citizens of Troy and Pike should take it upon themselves to show their interest in the local schools by visiting them. We feel sure that teachers and school officials will be glad to see the parents of the pupils and there will be a better understanding all around. Few grown people take enough interest in the work of the schools. There is no more important activity in this community. The teachers who train our children are wielding great influence upon the future of Troy. Luckily, most of them are extremely conscientious in their work, but that does not mean they would not be glad to see that the nature of their task is appreciated.—Troy (Ga.) Messenger.

**"Busy" Men Can Learn Lesson From Genesis**

"Big Business is Too Busy," says Bruce Barton in McClure's Magazine. He begins his article with this suggestion:

"Once a year the president of every company should assemble his entire staff and read the first chapter of Genesis aloud. It is the supreme record of the way in which work used to be done.

"A clear-cut program.  
"An early morning start.  
"No conversation or consultation.  
"Each day's work finished at the end of the day.  
"Real rest at the end.  
"Let us refresh our memories with a glance at the seven-day program:  
"First day—The Almighty said: 'Let there be light; and there was light.'  
"Second day—The Almighty said: 'Let there be a firmament . . . and it was so.'  
"Third day—The Almighty said: 'Let dry land appear. Let the earth bring forth grass and herbs and fruit trees . . . and it was so.'  
"Fourth day—He made the sun and moon and stars.  
"Fifth day—He created all fish and fowl.  
"Sixth day—He created animals; also Adam and Eve.  
"Seventh day—He rested."

**At the Movies**

"I'm getting kinda tired of taking my children to the picture show in town," said Gap Johnson of Rumpus Ridge. "They always get into a row with the Betts kids, and the Bettses usually lick 'em, and I have to fight Buck Betts, their dad. My kids generally tote rocks in their pockets and pour 'em to the young Bettses."  
"Well, tuther night they took their rocks and broke up the show and durn' nigh broke up the Betts kids. Then Buck Betts came running with his gun in his hand and driv' me and my kids out of town. I'm getting sorter weary of the picture show, somehow."—Kansas City Star.

**Some of Them Are Awful**

Teacher—What's the chief raw material that comes from France?  
Billy—Novels.

**Leap-Year Hint**

Mr. Bach (moralizing)—After all, man is weak.  
Miss Wiling—In union there is strength.

To insure glistening-white table linens, use Red Cross Ball Blue in your laundry. It never disappoints. At all good grocers.—Adv.

Don't defy public opinion. Best one can do is to discreetly ignore it.

**Less Kitchen Work Now**

**SHREDDED WHEAT**

12 ounces full-size biscuits

Ready to serve for breakfast lunch or supper. Serve with strawberries and milk or cream

TRISCUIT • Eat it toasted and buttered Made by The Shredded Wheat Company

**Doesn't Go Out**

Mistress—Has the electric toaster I purchased last week proved satisfactory, Norah?  
New Maid—Indeed, ma'am, it has. The thing hasn't gone out yet.

**Would Feel Safer**

Judge—Do you want a lawyer to defend you?  
Bigamist—Well, to tell the truth, I'd rather have a couple of husky policemen.

Every girl knows at least a score of men, any of whom she could have married—had she asked them.

The lazy ox wishes for horse-trappings, and the stee wishes to plow.—Horace.

**Nothing takes the place of Karo for BREAKFAST**

**Her Off Day**

Caller—"You've been a bad girl today."  
Betty—"You shouldn't call on Tuesday; that's my bad day."

**Spare Tire, as It Were**

"What's the idea of three skis?"  
"I have to strap one to the seat of my trousers."

**STUDEBAKER THE GREAT INDEPENDENT**

**\$795**  
E. O. B. factory

**ERSKINE SIX**

Only cars costing into the thousands equal the high standards of materials, workmanship and inspection maintained by Studebaker in producing this roomy, comfortable Erskine Six Club Sedan at \$795.

Engineering genius and quality clear through—that's why you can drive this new Erskine Six 40 miles an hour the day you buy it—62 miles an hour later—why you need change the oil only every 2500 miles—why this car set a new record unequalled by any car under \$1000 when it ran 24 consecutive hours at better than 54 miles per hour.

Low in first cost—so sturdily built that repairs are few and far between—Stude-

baker's Erskine Six is an all-around thrifty car, for it is remarkably economical, too, in gas and oil consumption.

**Dealers' Opportunities**

Studebaker assists dealers to conduct their business on a profitable basis—sales training—financing—used car merchandising—advertising helps—accounting—service—etc. No wonder Studebaker-Erskine dealers make money with these 4 great lines: The new President Eight, \$1985 to \$2450. The World's Champion Commander, \$1435 to \$1625. The new Dictator, \$1195 to \$1395. The new Erskine Six, \$795 to \$965. Write or wire NOW for complete, confidential information if there is no dealer in your town or if you wish to move to a town where the Studebaker-Erskine franchise is available.

**FREE "Trip Through Studebaker Factories"**

Town \_\_\_\_\_ State \_\_\_\_\_

Every car owner, every family with children in grade or high schools, will want this interesting free booklet, "A Trip Through Studebaker Factories." It pictures how your car is made—complete from molten metal to dynamometer tests of completed cars. If you cannot visit the huge Studebaker plants in South Bend this summer, send for this free book now—use coupon at right. See pictures of great Studebaker foundries where castings are made from molten iron ten times hotter than boiling water. See six-ton steam hammers forge Studebaker crankshafts. Learn how Studebaker springs are forged and tempered. Why Studebaker steel forgings are baked in huge ovens to insure great strength. Understand how a Studebaker steel body can be fused by electric arcs into one strong silent unit. See airplane views of Studebaker's 800-acre Proving Ground. Learn more about the 76-year-old company and the 21,000 men who build your Studebaker or Erskine. Send for this entertaining free booklet NOW! Use coupon.

## SNAPS FISH AT HOME IN OCEAN

### Bartsch Tells Experience Off Florida Coast.

Washington.—The ocean floor, the world's last great unexplored region, will soon have its secrets revealed by motion pictures, according to Dr. Paul Bartsch of the United States national museum, who has made an underwater cinema hunt for fishes among the coral grottos off the coast of Florida.

With his specially constructed waterproof camera he secured hundreds of feet of record of submarine life and spent as much as five and a half hours at a time walking about the sea bottom, 20 feet below the surface.

It is at this comparatively shallow depth, he says, that life is most varied and abundant, since the corals and other sea animals build in the teeth of the breakers, where the backward and forward flow of the water brings fresh supplies of the microscopic plants and animals which form their food. However, next season he plans to descend to greater depths with another camera better adapted to catch the slowly moving fish as they silently glide out of the blue haze which fills the coral-columned aisles of his submarine retreats.

The camera man, in his diving helmet, has little to fear, Doctor Bartsch records, in invading these underwater regions. Sharks are sometimes seen, he admits, but adds that "sharks are always gentlemen." In taking his recent film, however, when he first saw that terror of the coast, the barracuda, instead of leveling his camera, he instinctively snatched up his tripod and prepared to battle for his life as the big fish swam around him, mullily curious at the silvery bubbles rising from his diving helmet. The next day Doctor Bartsch so far conquered his instinctive fear of this fish as to secure a good picture of two barracudas as they circled around him.

### Why One Good Fellow

#### Has Turned Pessimist

"The incident which finally brought me a firm conviction that the good-fellow theory is the bunk," writes a correspondent of the Philadelphia Record, "occurred while driving from Lansdale to Philadelphia one snowy night last winter.

"I was making fair progress through the drifting snow when I came upon a large automobile on its side in the ditch. In the street stood a well-dressed and evidently prosperous man. He was visibly excited and asked if I could help him.

"I told him that I had passed some telephone linemen a short way back and would return and ask their help. They gladly consented to drive down the road to the assistance of the motorist.

"With their aid we soon had the car on the road again and, thinking that the man would be more than grateful for their aid, I took from my pocket \$3 which I handed to them with, 'Here, boys, take this for your trouble.' He saw me hand them the money, but did not say anything.

"The men left and I got into his car to start the engine. Finally everything was ready and we moved the car off. I stopped the car to allow him to take his place at the wheel, and he said to me: 'Please get out and see if that tumble strained my back wheels.'

"I got from the car and walked to the rear of the machine. As I was looking at his wheels he stepped on the gas and disappeared in a whirl of snow. I have never seen him since."

### London's Unhealthy Areas.

In some of the more crowded parts of London, the "unhealthy areas," there is an average of 53 houses and 415 persons to the acre, according to statistics gathered by a committee of the Ministry of Health. The "standard of density" recommended by this committee is 12 houses and 60 persons to the acre.

## TURTLES RAISED ON FARM BY DOUGHBOY

### Got Idea to Breed Snappers in Monte Carlo

Fertile, Iowa.—Some 20,000 snapping turtles now lie buried beneath the boggy acreage of the hill country of north Iowa, enjoying their long winter sleep, because the World war broke out in Europe in 1914.

Europe is a long way from Fertile, but it is where Hans Johnson, youthful soldier, got his idea for the establishment of a turtle farm that supplies a large per cent of the turtle flesh that eventually finds its way to the dining rooms of America's foremost hotels.

Johnson was a doughboy in the Eighty-eighth division of the A. E. F. In September of 1917 he obtained a leave of absence and wandered down to Monte Carlo, of gambling fame. One night a wealthy American, a steel manufacturer, invited Johnson and a number of companions to dine with him at the Grande cafe near the Casino. Chelonia mydas broth, a soup made from the flesh of a species of West Indian turtle, was served. The check for it was large.

**Sees Business Chance.** Johnson reasoned that if wealthy men paid without protest such high prices for mydas broth, it would pay to go into the business of supplying the market. Thus was born the idea of Fertile's turtle farm, the plans for which Johnson put into effect after he came home. Five years ago Johnson began his work by leasing ten acres of river bottom land, making a success of the venture from the start.

Mr. Johnson derives his chief revenue from the sale of eggs and choice breeding stock. He also has a good income from the sale of turtle oil, supplying many large hospitals. During the winter months he supplies a great many eastern hotels with choice table stock, fed and fattened throughout August and September on sweet potatoes and buttermilk.

**Bettered by Cross Breeding.** The first 500 turtles were placed on the farm in 1920. They were a species known as the "snapping turtle," a reptile despised by fishermen. They were taken from the streams and lakes of north Iowa. Placed on the farm, they have been greatly improved by crossing with a species of chicken tortoise somewhat resembling the

### The Busy Bee.

In order to store up a kilogram (two and one-fifth pounds) of honey, bees have to visit at least 6,000,000 heads of red clover, according to computations based on observations of their work by Dr. L. Armbruster of Berlin. Clover honey requires the most work. Fewer visits to other honey-producing plants are required, as low as 80,000 in the case of peas.

### Announces Birth of Son.

To announce to his musical friends the birth of a son a Welsh musician sent a card simply bearing four bars of music. They were recognized as "son 'The Messiah,' 'Unto us a child is born, unto us a son is given.'"

### Censure and Criticism.

Censure and criticism never hurt anybody. If false, they cannot harm you, unless you are wanting in character. And if true, they show a man his weak points, and forewarn him against failure and trouble.

### Not Consistent.

Bashful Boy—"Sir, Jane and I have decided that our happiness is the biggest thing in the world." Father—"You change your mind so often—just yesterday you wanted to marry her!"—Malteser.

### Where Folks Don't Know Him.

"No man likes to stay home all the time," said Uncle Eben. "He wants to get some place where he has a chance of being took serious when he brags a little 'bout himself."—Washington Star.

## Debt Mankind Owes to Benefactors of Race

Of all the faults of human character, surely none is so base as heartless indifference to benefactors. And have we today any benefactors like Caesar, Alfred, Cromwell and their compeers? Our closest friends, our earliest teachers, our parents themselves are not more truly our benefactors than they. To them we owe what we prize most—country, freedom, peace, knowledge, art, thought, the cultivated sense of right and wrong. What a long tale of patience, sacrifice and martyrdom is the history of human progress! Should it not affect us as if we were reading in the diary of a parent the record of his struggles for his children? For us they toiled, endured, bled and died; that we by their labor might have rest; that their thought might know, by their death might live happily, writes Frederic Harrison in "The Meaning of History."

We know the devotion which the believers in every creed have felt for the authors of their faith. Intolerant and narrow as this has often been, it yet bears witness to a sense of one of the deepest and best of our emotions. The feeling may become too often partial and bigoted; yet let us beware of neglecting it. Let us dread above bigotry itself, a temper of irreverence and ingratitude. For whom did these men work, if not for us? Not for themselves, when they gave up peace, honor, life, reputation itself—as when the great French republican exclaimed, "May my name be accursed, so that France be free!" Not for themselves they worked, but for their cause, for their fellow men, for us, their children. Not that they might have fame, but that they might leave the world better than they found it; that the good time, long hoped for, might come at last.

### Girl's Strange Mentality

Scientists are trying to find out what actuates a girl named Thea Alba. Until lately she had shown nothing specially strange about her actions, except the habit of writing with her left hand as well as her right. One day, however, she told her folks that she was continually thinking of two or three things at the same time, and very soon she began to do things that seemed to prove it. She wrote at first, two different words at the same time, one with each hand. Being a good drawer and a pianist, she trained herself so that she can paint and draw with both hands at once. She can play the piano with one hand, and at the same time write or draw with the other. At an examination before doctors she drew a portrait with each hand in twenty seconds. She can also write with three pieces of chalk at the same time. Just how or why—nobody yet knows.—Family Herald.

### Bean Beetles in Higher Altitude.

Mexican bean beetles in Colorado have begun to live higher. Four years ago they were not found higher than 5,000 feet above sea level, but now they have reached 8,231 feet.

### Decorated Gardens With Hives.

Romans sometimes made their beehives of bronze with inlay work of elaborate designs and used them to decorate their gardens.

### Taking Advantage of Leap Year.

He—"Scientists say that blondes will disappear in a few years." She (seizing her opportunity)—"Well, if you want one, you'd better speak up now."

### One of the Inducements.

Phillippa—"I don't want to go to a girl's school. I'm going to a co-educational college." Lucy—"But the men there are likely to be bold and flirtatious." Phillippa—"That's what the girls all tell me."

### Negro Tattooing.

Tattooing is widely practiced by light-skinned races. Negro races on whom the marks would not show, prefer to raise scars.

# HOWDY FOLKS!

We made our bowe to you last Saturday and we are very grateful to you for the patronage given us. We have enjoyed a good business since our opening and we take this means to thank each and every one of you.

To those who have not visited our store, we extend you an invitation to come in, even tho, you only have time to say howdy.

We will have specials each Saturday and invite you to come in and get your share of them.

A Variety of Fresh Vegetables will arrive in time for Saturdays trade.

Yes, we buy eggs. Bring your eggs in and get our prices, we may have something in store for you. NUF SED.

Last Saturday we served Wamba Coffee, and most of you folks who visited our store and purchased coffee. For those that did not have the opportunity to sample this coffee we ask you to ask your neighbor about it. This coffee is sold on a money back guarantee. You are to be the judge. The Parent Teachers Association receives 15 cents for three pound lids and 5 cents for one pound lids. Lids to be returned to the store.

We refrain from quoting prices on specials and also on regulars. But if you fail to visit our store you are apt to be the lossier.

### Errors Will Occur

Every newspaper man tries to print the truth about events and the home town reporters are especially anxious to have names and initials and events exactly right, but if you will take a list of a score of your own closest friends and write down their first names spelled correctly, give their middle initials without error and write a quarter of a column of the most interesting things in their lives without error, adhering strictly to the truth and without being censored by any of them or their friends, we'll find you a place in the Hall of Fame.

Errors will occur. We find them every day in every newspaper which we pick up. There is no automatic machinery which can prevent errors in a newspaper. A newspaper is an open book wherein every error glares from the pages. The errors cannot be hidden under "tellers' unders." There's no such account in a newspaper office.

But the home town newspaper is on the job day and night, fair weather and foul, in season or out of season, boosting the home city, praising unstintingly everything and everybody within its bounds. There's nothing else in all the world that will show the good in mankind, and pass over the bad, so often and so easily as the home town newspaper.—Medford (Mass.) Daily Mercury.

Man does not live unto himself alone, neither does he live in the present. Were it not for the hopes of tomorrow, and the plans for the future, few, if any, of us would consider life worth the cost. Short sighted indeed is the man who does not apply to his community the same yardstick with which he takes the measure of his personal business and private life, and who cannot dream as hopefully of the future of his town as he can his individual prosperity. He to whom his town is large enough is too small for his town.

### A town must be ever vigilant, A SPLENDID FEELING

That tired, half-sick, discouraged feeling caused by a torpid liver and constipated bowels can be gotten rid of with surprising promptness by using Herbine. You feel its beneficial effect with the first dose as its purifying and regulating effect is thorough and complete. It not only drives out bile and impurities but it imparts a splendid feeling of exhilaration, strength, vim, and buoyancy of spirits. Price 60c. Sold by

H. C. Ramby Drug Store

for truly it is said that opportunity knocks but once at any man's door, and this applies also to towns. There are in Texas today some great examples of this fact. Two cities, and they are large ones, started out. One dealt with the problems of the present and the other, with more vision, looked ahead. Today the problems that so engrossed the first city are of the past, and the city is confronted with the desperate problem of finding markets to justify its growth. The second city builded well and is today enjoying the sunshine of prosperity, with a splendid plan for the future, and happy in the knowledge that they are well founded and their continued prosperity is assured. What kind of a town will yours be twenty years from now?—Frank Potter, Sec. C. C., Levelland.

Al Smith is still making claims and Jim Reed is still making speeches. Which method will win out at Houston is hard to determine just at this time. Smith's claims are causing a lot of politicians to hop on the band wagon while the hopping is good but Reed's speeches are converting a lot of people to the cause of the Missourian. Last week Smith swept the big eastern states of Massachusetts and Pennsylvania which he was expected to do. Smith is a stronger candidate in the East than is Reed. Reed is scrapping Smith for the West Virginia delegates and seems in a fair way to get the most of them from the New Yorker. The California primary will be held after this is written and that test will give a pretty fair conception as to how Smith, at least, lines up. It will not determine the issue but will have a big bearing on the result at Houston. If Smith can win in California it will be a big setback to the McAdoo following and will break, in part, the only block in the way of Smith's nomination. If Reed or Walsh wins in that state it will give hope to the anti-Smith group that they can block Al and, in the final analysis, put over a second choice candidate.—R. W. Reeves in Booneville (Mo.) Advertiser.

Just as "it's the little things in life that count," so also it is the little things in a store that count. Possibly, the "little things" sometimes seem nerve-racking nuisances, but if it wasn't for them, think how many less people would come into your store, get acquainted, and some day come back for bigger, more profitable-to-you things? If people only went into a luggage store to buy an expensive bag or trunk, how many would enter in a day? But the small handbags and pocket-books draw many customers, who, satisfied, come back when needs are larger. The same is true, whether you run a grocery store, paint store, jewelry store or what not. Treat the customer of the smallest item you have for sale with the same consideration as if she were buying your most expensive article.—Wichita Price Current.

### The Nineteenth Hole.

At an English Inn a group of golf enthusiasts were discussing over the drinks their wonderful performances on the greens that afternoon, when the jolly proprietor said: "I'm sorry, gentlemen, but it's time to put up the shutters, so we'll have to shut up the putters."—Boston Transcript.

### Look for Silver Lining.

Get into the habit of looking for the silver lining of the cloud, and when you have found it, continue to look at it, rather than at the leaden gray in the middle. It will help you over many hard places.

### The Human Body.

The approximate chemical analysis of a man, five feet eight inches in height, weighing 148 pounds would be: Oxygen, 92.4 pounds; hydrogen, 14.9; carbon, 12.6; nitrogen, 4.6; phosphorus, 1.4; calcium, 2.8; sulphur, 0.24; chlorine, 1.12; sodium, 0.12; iron, 1.02; potassium, 0.34; magnesium, 0.04; fluorine, 0.02; total, 148.50 pounds.

### Condensed Music.

Little Benjamin, aged four, had two pets—a canary and a cat. One unlucky day the door of the cage was left open and the cat was caught in the act of swallowing the last morsel of the poor bird. Little Benjamin gazed at the cat a few minutes in sorrowful meditation, and then suddenly asked: "Mamma, will pussie sing now?"

### Suicide.

Invention is the most interesting ramification of the human intellect—and sometimes the most startling. There is hardly anything that has not received the attention and midnight oil of inventors. In London an old inventor, George Stevens, is found dead—killed by his latest apparatus, a machine for committing suicide painlessly and scientifically. It worked all right. But did you ever hear of a stranger inventive quest?

### This England.

"I am English, born and bred," announced the political candidate. "My father and grandfather were English, my wife is English, my works are in England and my workpeople are all English. I stand before you as an English candidate." And then a plying voice came from the audience: "Oh, man, hae ye nae ambection ava?"—Sporting and Dramatic News (London).

MOTHER!

Baby's Best Laxative is "California Fig Syrup"

When baby is constipated, has wind-colic, feverish breath, coated-tongue, or diarrhea, a half-teaspoonful of genuine "California Fig Syrup" promptly moves the poisons, gases, bile, souring food and waste right out. Never cramps or overacts. Babies love its delicious taste.

Sign Was Correct Mrs. Hopkins—I thought your sign read: "Photos While You Wait?" Photographer—It does, madam, but as you'll have to wait four days, maybe you'd rather wait at home.

Good Health Keeps A Woman Young

Texarkana, Ark.—"I was rundown, weak, nervous and sick. I was advised to try Dr. Pierce's Favorite Prescription, so I did and it proved to be a great benefit to me. In a short time I was feeling like a different person. All I can say is, that I was greatly benefited by the 'Favorite Prescription' and I have heard other women say that they were, too."

Idle Island

By ETHEL HUESTON

CHAPTER XIII—Continued

"Now, I won't bite you," he said. "don't be afraid of me. Just be a good girl and do as I tell you, and—sweet papa!" He laughed lightly at his own humor, then he added briskly, "See here, Ron. You'll have to be married at once. If anybody should come on board to look us over, you smuggled the girl aboard without my knowledge or consent. She is your sweetheart, see? And you did it. So they'll have nothing on the ship. Now if you get married at once it will clear me of any suspicion of complicity."

"Y-yes sir," stammered Ronald faintly, his eyes pleading with Gay. "N-no," she gasped. "Yes. You came for that, did you not?" There was severity beneath the captain's amorously playful tone. "You came for it—now you get it. Not all women are so lucky. We'll have Bates and Hodge come up to witness it. Only takes a minute, nothing to it, really. Otherwise, Gay," he explained kindly, "it is an irregularity and we have many reasons for not wishing to subject ourselves to an investigation. You, who know everything, know that."

Ronald's eyes begged her for assent, for acquiescence, promised protection. But Gay did not look at him. "Captain," she pleaded desperately. "I—I did think so. I—I did want to. But now—suddenly—I am frightened. I am not sure. He seems different to me. My—my heart falls me."

"Ah!" The brown eyes were narrow black slits. The voice sank to a purr. "You know—what you know. Much. One shrinks from a lawfully wedded husband who happens to be—at odds with the law?"

"Oh, no, it is not that." She flashed a sudden warm look full upon him. "Not that. What is the law to a woman who—really loves? But do I? Or was I only thrilled for a time, stirred by mystery? Really, I do not feel the same to Ronald. I thought him so rugged, so big, so virile. Now he is just the same as you—inefficient. Can he hold my love?"

The captain's head went back in a great soft laugh. His eyes upon Ronald Ingram were straight and unflinching. "Oh, that is fair, is it not, Ron? She must be sure of herself. But you cannot stay here while you decide. Not the thing, you know. Come with me. The captain is the official guardian of his guests. I will take care of you—until you are sure."

Ronald Ingram flung himself against the door. "No," he shouted. And then more faintly, "Never." The captain's pleased eyes did not waver from Gay's vivid face, where fear and daring struggled for control. He did not so much as vouchsafe a glance to the officer who defied him. But the silken voice purred. "Oh, yes, Ronald. Oh, yes. Come Gay."

Ronald Ingram slid slowly away from the door, his eyes upon the captain, and stood motionless while the captain, with Gay's hand in his, led her back to the room from which he had brought her. "You're not only a very pretty girl, you're a very wise one," the captain said, as he helped her, solicitously attentive, from the big slicker, and put her coat, gloves and leather hat upon a hook on the wall, beside his own coat. "I like that," she smiled, giving it a little pat. "Looks nice and domestic. Sit here."

He put Gay into a big chair, and glanced appraisingly the length of the slim young figure, in its knickers and boots and flannel shirt. Gay self-consciously straightened her tie and smoothed her sleek dark hair. Now that the protection of the high collar and the low-set cap was gone, weariness, exhaustion, showed in her face, and her eyes were fringed with black. He touched the bell, and stood in the door to answer it. "Some port," he said, "two glasses. You are tired," he said to Gay. "Are you hungry?"

"No. But I feel—very tired." The boy passed in the tray at the door, and the captain quickly filled a small glass for her. "Take this. And then you shall rest. But first, let me tell you this. No, drink it. It will quiet your nerves. It has been a shocking night." His kindness was disarming. Gay drank it slowly, felt the grateful warmth in her throat, at her heart. She smiled at him. "Now you are going to sleep, but these things you must bear in your mind. You can see that you are tied to the boat as long as you live, can't you? Now, is there any reason why you should limit yourself by marrying a young subordinate? People are only married for the eyes of the world. Well, the eyes of the world aren't going to see much of you. We'll go

through a sort of form—to get the papers right—and I'll sign you on. But you would be very foolish to tie yourself to an underling—unless you are very sure you are very much in love, would you not?"

"I—suppose so." "I'll say so. Of course, all this is only laying up trouble for myself. Ronald, who has been my friend, will be my enemy, but I can take care of Ronald. Our doctor is a rank idiot when there's a skirt about, and there'll be trouble with him, and trouble with the crew, and trouble at the ports. But then, I've had trouble before." He smiled at her. "You are a very pretty girl—and a very brave one. I think it's the nerve of you that really gets me. Worth a bit of trouble, I fancy."

A short rap at his door caused him to pull himself up, impatiently. "Not now, not now. I'm busy," he said sharply, although he barely raised his voice above its wonted softness. "Sir, beg pardon—it is very important."

The captain, with a bare sign indicating Gay to move back into the shadow of the room and remain quiet, went to the door. A seaman passed him a folded bit of paper on a tray. The captain read it, nodded his head respectfully, glanced back at Gay. "Send the chief engineer to me," he directed the man.

And then he came to Gay. The companionable frankness of his voice was gone, instead it dropped to its most silky fineness, a fineness she already learned meant danger. "Now tell me, who knew that you came aboard this boat?" His eyes hypnotized her.

"Nobody," she said quickly. "I give you my word. Nobody knew it." "Who would discover your absence, and search for you?" "Nobody. I am an orphan, an artist. I live alone. The people on the island will think I have gone to New York for a visit. Nobody will seek me. I am a free soul. Ask Ronald Ingram. He knows."

The engineer touched the door, opened it and came in. He did not glance at Gay in the corner. The captain handed him the bit of paper. "Shall we show them our heels?" The engineer considered. "How are the papers? Everything tight?" "Tight as a drum. Except this woman—who smuggled herself aboard. But we can fix that up. The papers are perfect."

"Then I say we lay to, and give 'em the gab. What to run for? Then they know it's guilt. Face 'em, and flaunt it, I say." The captain smiled at him, nodded assent. "You're right, or course. All right, then. I'll be right down."

The engineer went out. The captain came to Gay and took her hand. His voice was soft, his touch caressive. "Now, Gay, this is your chance. A boat is drawing up to us to look over our papers. You can go back on it if you wish. Would you like to?"

Wild hope throbbled in Gay's heart. She felt she must have heard its music. But she remembered what Ronald Ingram had said, she was warned by the silken softness of the captain's voice. Still, as best she could the hope that swelled in her heart at the thought of rescue she said faintly: "Oh, no. Not yet. Can't I just stay on—with the boat? Can't I wait till I am sure?"

"Are you sure you want to?" His voice was a velvet breath. "This may be your last chance to go back. Are you sure you wish to stay on?" "Yes, please. I am not afraid now. You will take care of me. I took a chance and came. I'd rather take another chance and stay. If you'll let me."

"Good for you!" His voice was warm and hearty. "I see we're going to hit it off first rate. I'll fix it up with Ronald. Stick to the original story, Gay. You smuggled aboard—under my own bunk—I always tell the truth when convenient—and I didn't see you until I had finished my paper work ready to turn in. I was just going to marry you to Ronald when they signaled us to lay to. Now you've got balance, and you've got nerve. You'll get through it. Right?"

Gay nodded briefly. "Stay right here. I won't have you up at all unless I have to." He pulled a book from the rack on the shelf and threw it on the table. "Marriage service," he said. "Just ready to read the lines over you. That'll clinch it. Don't be frightened, Gay. They're nothing on us. Just sit tight, and— he kissed her hand—"I like you. Poor Ronny!"

Then he went out unhurriedly, smiling back at her. Gay turned off the light in the room, got her coat and hat, and crouched by the door which she held ajar, listening. When the moment came, she intended to run out boldly and demand a rescue.

dolph Wallace, and he was laughing. "I know that boat," the captain said, "she's been held up time and time again, but she always manages to get clear. Slick as the dickens, that gang. Money back of them. That's how."

"She's a beauty," Rand said, admiring eyes on the Roger Williams. The coldness of the morning air, the grayness of the pale dawning, the tang of salt on his lips and in his nostrils, exhilarated and thrilled him. "What'll they do with her, I wonder—the boat? I know there's a big reward out for this gang, but I think I'd rather have the boat. Do you suppose they would give her to me, instead of the reward? I feel just like settling down to a profession this morning. The last of the Captains Wallace. I think I'll go to sea. Gosh, how Gay would laugh."

The captain laughed, too, companionably. "They'll put her up at auction," he said, "and if you really want her—and if your charges against the gang hold water—they'll fix it up so you can bid her in. They couldn't give her to you outright—at least, I don't think so—too much red tape. But they could let you in on the bidding, and see that you had the money."

Rand's eyes, already shining with pride of ownership, roamed the Roger Williams, showing strong and stanch in the gray light, coasting the waves. "I wonder I never thought of it before," he mused thoughtfully. "Yeh—Captain Wallace, last of the line. Pleased to meet you." He grinned loosely to himself, thinking of Gay. As they pulled alongside he spoke again, suddenly.

"Any red tape to keep me from going aboard first? I want to make sure of a good looking chap, with sad eyes like a cow." The captain laughed and motioned him up, so that the first feet aboard the Roger Williams were not those of

The Roger Williams, Showing Strong and Stanch in the Gray Light.

active United States service, but the idle wandering ones of Randolph Wallace. Naval officers, however, were close behind him, followed by twenty service men.

Captain Garman stepped up to them quietly, all at ease. "You say you're after an escaped convict, but you come well heeled for a single stowaway."

"You have found no stowaways aboard, then?" asked the officer courteously. "Well, a sort of one. A woman—running after one of my officers. We discovered her under my own bunk, if you can imagine such gall. I was just going to marry them when we got your message. Only this woman."

"Will you bring your passengers up and let us look them over?" "We are only a freighter, as you know. But we carry up to twenty passengers on the side. Sublimated steamer passengers they are, cheap. Their papers are all right. I went over them myself."

"We'll look them over, if you don't mind." Captain Garman gave a quiet order in an untrilled voice, and a man detached himself from the group and ran down to put it into execution. "We're taking you back with us, captain," the officer went on slowly. "We have the goods on you. If you want to go peacefully, all right. Or if you want a scrap, we have the guns on you."

"What charges, sir?" "Oh, a nice variety. Running Chinese, for one thing. Getting crooks out of the country on our side, and bringing them in on the other. Little matter of murder, too, if I am not mistaken."

The birds are known as "weavers," getting their name from the work in which they are so proficient.

Captain Garman's eye turned slowly out to sea, swept the horizon. His men were willing to fight, and the ship was built for speed as well as for endurance. But what chance, with six of the steel gray service dogs lurking watchfully at bay, hemming them in. Rather match wits with the lawyers in the courts, which he had done before, and come off never second best.

"You'll find everything O. K., I fancy," he said imperturbably, "but of course if you insist I will return with you."

The passengers were hurried up from below, huddled back against the railing, and with them Gay, once more in her dark slicker and leather cap, who had slipped among them as they passed the captain's door. Gay's heart was glad in the knowledge that she was saved. But when, in the rear of that group on deck, she saw Rand, debonair, triumphant, smiling, her first feeling of heart-bursting joy that he was safe gave way to one of humiliation and shame. Rand came in triumph, with the United States navy at his back, to find her here, knickered and booted, like a thief among thieves, captured, disgraced and bandied lightly from man to man. She sank back farther into shadow, almost preferring the hazards of the sea with Garman and the Roger Williams, to humiliation before the dear loved eyes of Rand.

"Go over the lot of them," came the crisp order. "Look for papers, especially, and weapons. Lieutenant, take the second detail, and search the ship."

Gay cowered farther into the corner. Search her! She watched the approach of a brisk young officer with horrified staring eyes. She bit her lips until she tasted blood; she would not move, she would let him handle her, let him search. At the sudden slap of his hand upon her hip she shrank back silently. Feeling the bulk of the pistol in her pocket, he thrust his hand roughly inside her coat.

"Oh, no!" Her faint gasp was irrepressible, instinctive. But soft as it was, it carried across the deck. "See here!"

With a bound, Rand leaped from his posture of careless grace against the rail, and hurled the astonished group from side to side before him. He caught Gay's arm, and drew her about, amazed, incredulous.

"That's the stowaway," the captain explained silkily. "Found her under my own bunk. I was just going to marry her to my second officer."

"Gay," stammered Rand, "Gay, is it you? But it can't be you! But it is you!"

Gay cowered before him. "Oh, Rand," she sobbed, "I thought they had captured you and I came to be with you, and they hadn't, and you weren't, and—"

She was a pitiful, ridiculous figure in the flapping slicker. The faint morning light showed her wan face, smeared with tears.

"Gay," Rand repeated, helplessly, staring at her, unbelieving. "It can't be you—it isn't!"

"Rand," she pleaded tearfully. "Please! He can marry us, the captain, he can marry anybody. Rand—just to please me."

"Oh, Rand!" "Well, there's no reason why he can't, is there?" Rand demanded quickly of the officer who commanded the capture.

Don't Make a Toy Out of Baby—Babies Have Nerves

Much of the nervousness in older children can be traced to the over-stimulation during infancy, caused by being dinged by a sort of animated toy for the amusement of parents, relatives and friends. Baby may be played with, but not for more than a quarter of an hour to an hour daily. Beyond that, being handled, tickled, caused to laugh or even scream, will sometimes result in vomiting, and invariably causes irritability, crying or sleeplessness.

Fretfulness, crying and sleeplessness from this cause can easily be avoided by treating baby with more consideration, but when you just can't see what is making baby restless or upset, better give him a few drops of pure, harmless Castoria. It's amazing to see how quickly it calms baby's nerves and soothes him to sleep; yet it contains no drugs or opiates. It is purely vegetable—the recipe is on the wrapper. Leading physicians prescribe it for colic, cholera, diarrhea, constipation, gas on stomach and bowels, feverishness, loss of sleep and all other "upsets" of babyhood. Over 25 million bottles used a year shows its overwhelming popularity.

With each bottle of Castoria, you get a book on Motherhood, worth its weight in gold. Look for Chas. H. Fletcher's signature on the package so you'll get genuine Castoria. There are many imitations.

A rich man with a lot of fool ideas is supposed to have an artistic temperament.

Quickly Relieves Rheumatic Pains

12 Days' Free Trial

To get relief when pain tortured joints and muscles keep you in constant misery rub on Joint-Ease. It is quickly absorbed and you can rub it in often and expect results more speedily. Get it at any drug-gist in America.

Use Joint-Ease for sciatica, lumbago, sore, lame muscles, lame back, chest colds, sore nostrils and burning, aching feet. Only 60 cents. It penetrates.

Send name and Address for 12 FREE day trial tube to Pope Laboratories, Desk 3, Hallowell, Maine.

Joint-Ease

The words of a weak woman often carry more weight than the muscles of a strong man. One has to eat even in a world crisis.

DON'T suffer headaches, or any of those pains that Bayer Aspirin can end in a hurry! Physicians prescribe it, and approve its free use, for it does not affect the heart. Every drug-gist has it, but don't fail to ask the drug-gist for Bayer. And don't take any but the box that says Bayer, with the word genuine printed in red.

Tropical Birds Happy Only When Employed

In the tropical bird house at the Audubon Park zoo, New Orleans, lives a collection of birds said to be the most industrious creatures of all flying beings. They are so industrious, say the zoo supervisors, that materials with which the tiny creatures carry on their ceaseless labors are withheld from the spacious bird house except during certain hours. When the birds are deprived of this material, known as "raffa," a kind of palm fiber, they become dissatisfied, apparently because they are forced to remain idle.

The birds are known as "weavers," getting their name from the work in which they are so proficient.

The weaver comes from the Transvaal and lake regions of Africa, southern Asia and Australia. When the "raffa" is placed in the bird house the little workers start weaving nests. When the supply of material is exhausted they start tearing down nests already woven and rebuilding them. Thus they occupy themselves until all but exhausted.

Not of Rose Family The name "Rose of Sharon" is given to an ornamental shrub called Hibiscus syriacus. The Rose of Sharon referred to in the Bible was probably a kind of narcissus.

**WHAT'S DOING IN WEST TEXAS**

**Llano**—Location has been selected for the 40 room hostelry to be erected by the Llano Community Hotel, Inc., at a cost of \$96,000.

**Farm Book Holds Big Opportunity**

Through the courtesy of the Kokomo Steel and Wire Company of Kokomo, Indiana, the Sudan News is enabled to give a special service to its farm readers. The Kokomo Company has just published a farmer's book on diversification which will be sent free on request from the Kokomo Steel and Wire Company to Sudan News readers.

After a thorough research in the problems of the modern farmer the Educational Department of the Steel Company compiled authoritative information on how to make a farm pay bigger prof-

its by diversification.

The book is quite lengthy, comprising sixty-four pages, devoted exclusively to tried and proven methods of farm diversification that insure greater financial returns. This book is attractively bound for constant use and reference by farmers.

Farming in different parts of the country is taken up at length, giving detailed information concerning the layout, management, rotation of crops, and selection of stock for particular sections. The News readers are urged to drop a card or letter to the Kokomo Steel and Wire Company, Kokomo, Indiana, for this free booklet.

I am prepared to give the Hot Oil treatment for Dandruff and other scalp diseases. If you are bothered with dandruff or other scalp diseases it will pay you to see me. I also make face creams suitable for different skins, hand lotions and shampoo.

Mrs. Cora Clements.

## Improved Uniform International Sunday School Lesson

(By Rev. F. H. FITZWATER, D.D., Dean Moody Bible Institute of Chicago, (6), 1923, Western Newspaper Union.)

### Lesson for May 13

#### JESUS ENTERS JERUSALEM

LESSON TEXT—Mark 11:1-11.  
GOLDEN TEXT—Behold, thy King cometh unto thee; He is just, and having salvation.  
PRIMARY TOPIC—Hailing Jesus as King.  
JUNIOR TOPIC—Hailing Jesus as King.  
INTERMEDIATE AND SENIOR TOPIC—The Kingship of Jesus.  
YOUNG PEOPLE AND ADULT TOPIC—Jesus Asserts Messianic Authority.

I. Jesus Officially Presented to the Jewish Nation as King.—vv. 1-11). This should not be designated the triumphal entry, for it was so only in outward appearance. The shouts were empty and meaningless. It was the promised King publicly offering Himself to the nation.

1. The preparation (vv. 1-6).  
(1) Two disciples sent for the ass (vv. 1-3).

He told them just where to go to find it, and how to answer the owner's inquiry. The providing of this animal was the working out of the divine plan according to Christ's foreknowledge.

(2) Obedience of the disciples (vv. 4-6). Without asking why, they go at His bidding. The command may have seemed strange and unreasonable, but they rendered explicit obedience.

2. The entry into Jerusalem (vv. 7-10).

(1) The disciples put their garments upon the ass and set the Lord upon it (v. 7). This act showed their recognition of Him as their King (II Kings 9:18).

(2) The multitude (vv. 8, 9). Some spread their garments in the way; others who had no garments to spare cut down branches and strewed them in the way, which was just as acceptable unto Him. This entry was in fulfillment of a prophecy uttered some five hundred years before (Zech. 9:9). They uttered the very cry which the prophet foretold. This is a clue to enable one to understand the prophecies which are unfulfilled as yet. If the prediction of His first coming was thus literally fulfilled, we must believe that those of His second coming will likewise be literally fulfilled. The prediction of Zechariah 14:3-11 will be just as literally fulfilled as that of Zechariah 9:9.

(3) The Lord's action (v. 10). Upon entering the temple, He looked around upon all things; but as it was eventide He withdrew to Bethany with the twelve.

II. Jesu Exercising His Royal Authority (vv. 12-19).

1. The barren fig tree cursed (vv. 12-14).

The fig tree is typical of the Jewish nation. The fruit normally appears on the fig tree ahead of the leaves. The presence of the leaves is the assurance of fruit. This was an acted parable of the Lord's judgment on Israel for pretension of being the chosen people without the fruits thereof.

2. The temple cleansed (vv. 15-19).

For the various sacrifices in the temple, many oxen, sheep and doves were needed. Many persons came from the distant parts of the land; therefore it was impracticable for them to bring their sacrifices with them, so they brought money and bought the animals needed. This privilege the law had granted to them (Deut. 14:24-26), for the exchange was necessary. When evil men used it as an opportunity for gain it became an offense before God. It defiled His house. Jesu made Himself a scourge of cords and drove out the money changers, overthrowing their tables and pouring out their money. By this act He declared Himself to be the Lord of the temple and one with God. That which God intended to be a "house of prayer for all nations" was made a "den of thieves." This action symbolized the call of the nation to repentance.

III. Jesu's Authority Challenged (vv. 27-33).

They challenged Him to show by what authority He accepted the honors of the Messiah, and who gave Him the authority to cast out the money changers. This seemed to place Jesu in a dilemma. He responded by a question which placed them in a counter dilemma. Since Jesu was His forerunner, the divinity of His commission rested upon that of Jesu. They were powerless to discredit Jesu, because the people accepted him as God's prophet. If they had accepted Jesu's message they would have been prepared to accept His. They weakly confessed that they could not answer the question.

#### Route to Glory

"He must increase, but I must decrease." This is your route to glory. Unless He increases in your life and you decrease, your life will be contrary to what He wants it to be. In fact, it will be fruitless. In all things He must have the pre-eminence if you would be fruitful for Him."

#### Worthy Qualities

A man cannot persistently admire worthy qualities and not eventually partake of them.—Brown.

## POULTRY

ALL-MASH RATION GIVEN APPROVAL

All-mash poultry rations, for both growing chicks and laying hens, are suggested in the most recent bulletin on poultry procedure issued by the extension service of the Ohio state university. "The newer idea of poultry feeding favors the feeding of all the ingredients ground, mixed, and fed as a mash," says Prof. A. R. Winter, of the poultry husbandry department of the university, author of the bulletin.

"The method is simpler, more sanitary, and more economical in the use of the feed than where the ration is fed partly as scratch grain and partly as mash. Since birds prefer a granular mash to one finely ground, it is advisable not to grind the ingredients any finer than is necessary to prevent the chickens from picking over the material and taking out what they like best."

Two "starting and growing" rations, both of them all-mash, are listed in the bulletin. Three all-mash rations and one scratch grain and mash ration are suggested for laying hens.

The first starting and growing ration, a mash, consists of:

Ground yellow corn ..... 72 pounds  
Wheat middlings ..... 20 pounds  
Meat scraps (50% protein) .. 5 pounds  
Poultry bone meal ..... 2 pounds  
Salt ..... 1 pound

Skim milk instead of water is given to drink during the first eight or ten weeks. Other forms of milk may be substituted.

The first ration suggested for laying hens is:

Ground yellow corn ..... 65 pounds  
Middlings or ground wheat .. 20 pounds  
Meat scraps ..... 10 pounds  
Bone meal ..... 4 pounds  
Salt ..... 1 pound

Water is given to drink. If milk is available, the meat scraps in the ration may be reduced to five pounds.

The bulletin discusses 21 feeding materials for poultry, with reference to their constituents and the particular feeding purpose for which they are available. It is entitled "Poultry Feeding Stuffs and Rations" and may be obtained by writing to the agricultural publications department of the Ohio state university.

### Toulouse Best Goose

#### Breed for Marketing

The best breeds of geese for market are the Toulouse which is sometimes called the Land goose because it does not seem to miss the water; the Embden geese which are white and are profitable market geese, and the African which are nearly the color of the Toulouse and are also fine, large market geese. These are smaller, however, weighing only a little more than one-half of what the others do. Whenever Canadian geese are used to cross with the three or four above mentioned breeds, this cross produces a hybrid goose which is called a mongrel goose on the market. They are considered a great delicacy and bring the highest prices of any poultry per pound. Only a few of them are raised, however, as the demand is limited.

#### Successful Incubation

Successful and careful incubation, in the case of either duck or chicken eggs, is one of the first and most essential steps towards a strong, healthy flock. Many early chick losses are due to improper incubation and much of the low hatchability of eggs can be traced to poor incubator management. As a consequence, care to details at this time will mean dollars and cents for the poultryman when selling or egg-laying time comes.

#### Goose Septicemia

There is a disease of geese and goslings known as goose septicemia which causes sudden death. This is a disease undoubtedly due to poison in the feed. No cure is yet known. Sanitary conditions will prevent the disease.

The healthy goslings should be removed to new quarters, a coarse mash should be fed and everything kept as clean as possible. With clean water and a fresh range there should be no trouble to raise them.

#### Raising Baby Chicks

Raising baby chicks is not such a difficult operation as some would think. Yet a few things are necessary for proper care and raising of chicks. You can raise chicks without much preparation or very much equipment, but your losses will be heavy and your profits will be little if you do not use the proper methods.

You should be prepared to receive the chicks so that when they come you will not have to delay putting them in their future home.

#### Dirt Floors Poor

Dirt floors are the poorest kind for the poultry house because of the great amount of labor required to keep them clean through each year. Board floors are better than dirt but are hard to clean thoroughly. Concrete floors are the most sanitary and economical. It pays to put in concrete floors in the spring or early summer so they will have time to dry out before the hens are housed for winter. The concrete floor should be 6 or 8 inches above the outside soil.

## NEW DRAPERIES For A FEW CENTS By Mae Martin

All of us realize nowadays how bright-colored draperies seem to invite people in, and how warm touches of color in spreads, cushions and runners help to make us love our own surroundings.

No woman need deny herself these touches of cheer, because they can easily be had at the expense of a few cents and a little planning. Curtains that are faded or drab in color can be made bright and pleasing with a package or so of Diamond Dyes. Then spreads, covers, runners, etc., can be tinted or dyed to match. Anyone can do it. Tinting with Diamond Dyes is as easy as bluing, and dyeing takes just a little more time. Brilliant new colors appear like magic, right over the old, faded colors. Diamond dyes give true, fadeless colors. They are the kind of dyes used when the cloth was made. Only Diamond Dyes produce perfect results. Insist on them and save disappointment.

My new book, "Color Craft," gives hundreds of dollar-saving suggestions for beautifying your home and clothes. Sixty-four pages, fully illustrated in colors. It's FREE. Just write Mae Martin, Home Service Department, Diamond Dyes, Burlington, Vermont.

#### Dress-Alike Party

Perhaps the dinkiest dance I have been to lately was Lady Joram's. All the dancers were dressed exactly alike—up to the masks, which grinned. There were some charming embarrassments. And the queer thing was that when everybody unmasked for breakfast, even then, somehow, we all seemed alike. Quite remarkable, wasn't it?—"Lady of Fashion," in G. K.'s Weekly.

Muscular inactivity is the parent of much ill health.

### Tablet for Grave of Famous Lady Godiva

Of the fair Lady Godiva, the most romantic female figure in English legend, every child has heard, but how many who are grown up could say where she is supposed to be buried?

The lovely wife of Leofric, earl of Mercia and lord of Coventry, died probably shortly before 1055 and was buried in a porch of the Benedictine Abbey church, which stood on Hill top, Coventry, and by which, it is most probable, she passed that day when she rode unclothed through the ancient city to obtain the people's relief from the burdensome toll imposed by her hard-hearted husband.

On that spot now stands 8 Priory row, the offices of the Coventry Insurance company, and in order that the unique historic interest of it may definitely be fixed an appeal is being made for funds for a commemorative bronze tablet.

### Player on Bagpipes Stirs Canadian City

When William Brand, a twenty-two-year-old Highlander in Sandwich, Ont., pours forth his soul in the shrill tones of bagpipes, neighbors plug their ears and call the police.

For months he had been practicing in his bedroom. But a Scotsman, to be a finished artist on the bagpipes must march as he plays, and when William decided to tramp around his back yard to the tune of the pipes, that was worse.

Sandwich police investigated and reported that Brand, with typical Scottish caution, did not put a foot, nor half a foot, outside his own lot.

But Sandwich has a curfew law. At 9 the town bell sounds the knell of objectionable sounds. The neighbors watched the clock. To their dismay they discovered that at 8:59 each night the bagpipes ceased.

#### And That's All

Ted—I have two desires.  
Harry—What are they?  
Ted—Blonds and brunettes.

#### The Explanation

"You have a cupful of hot water every day!" "Yes, my landlady calls it soup."

If it weren't for the optimist the pessimist would never know how happy he isn't.

Some fools have the gift of speech and some wise men have the gift of silence.

## Kill Rats—Without Poison

A New Extremator that is Absolutely Safe to use Anywhere!

Will not injure human beings, livestock, dogs, cats, poultry, yet is deadly to rats and mice every time.

Poisons are too dangerous

K-R-O does not contain arsenic, phosphorus, barium carbonate or any deadly poison. Made of powdered snail as recommended by the U. S. Dept. of Agriculture in their latest bulletin on "Rat Control."

"One of our good customers just told us he gathered 105 dead rats on his farm from using a 2-ounce package of K-R-O. We hear of many finding 30 or 40 rats after using K-R-O, which is highly successful and should please you."—Wolganess & Loring Store, Richmond, O.

75c at your druggist; large size (four times as much) \$2.50. Best postpaid direct from us if dealer cannot supply you. **SEND US MONEY-BACK GUARANTEE.** THE K-R-O COMPANY, Springfield, Ohio.

KILLS-RATS-ONLY

## DIXIE FEVER AND PAIN POWDER

Reduces Fever 25% Produces Rest

#### The Legless Days

A generation ago legs were unknown except on tables and chairs, although "limbs" were very plentiful, even though thought to be a trifle indecent.

All women then were good except maybe one that grandmother had heard about in her younger days, and this one was mentioned in whispers.

Then a divorce suit attracted the attention of the whole county for an entire year and a bath was something not to be mentioned except to an intimate friend, for it not only was an unfit topic for general conversation, but was so rare as not to be discussed lightly.—Capper's Weekly.

No ugly, grimy streaks on the clothes when Red Cross Ball Blue is used. Good bluing gets good results. All grocers carry it.—Adv.

In writing, it is dreadful to be merely sour and not smart.

Keep enough going on and you won't mind the weather.

A college education also teaches a man that money isn't everything.

#### X-Rays Find Buttons

New uses are always being found for X-rays. One of the latest is that of searching for buttons and other solid materials in piles of rags that are to be used for paper-making. Serious damage to the pulping machine is likely if buttons, hooks, eyes, and such like are not removed from the pulp. To prevent this, endless bands convey the rags over an X-ray tube, where the solid materials are readily detected by fluorescent screens in the X-ray outfit.

#### Why Not?

Bride—Dickie says he can hear my voice in his dreams.  
Friend—Why don't you stop talking long enough to let him sleep?

#### Dad's Error

Ma—Daughter says she has nothing to wear to the dance tonight.  
Pa—What became of the beads I got her last week?—Life.

It's usually the thing you haven't got that would seem to make life worth living.

## ANNOUNCING

# "Should Auld Acquaintance Be Forgot And Never Brought to Mind?"

Not on our part, if we can help it. We have landed back to renew our old acquaintance and our old business relations which have always been pleasant, and we hope, mutually profitable. To our old list of friends and customers we want to add new ones, and to this end we have studied your wants and needs as far as they extend to anything in our line. So we have established the HI-WAY Motor Co. where every imaginable thing--- necessities, luxuries, comfort, low prices, best cars, best service, are all combined for our old friends and the new ones we hope to make. Upon this rock we hope to build our business.

Gulf Gas and Oils, Mobile Oils, Amalie Oils, and Quaker State Oils.  
Ford Parts and Accessories.  
Tires and Tubes.

Storage. Cars called for and delivered.  
**FREE!** Saturday only. 1 quart of Oil with every purchase of 5 or more gallons of Gas.

**SERVICE!** It's one of the principles of our business---a thing you will be impressed with the first time you drive into our Station. We have installed every item of modern equipment in order that we can give you the best service possible. Yes, we know that the word SERVICE is somewhat over worked, but it is the only word we know which so fully expresses the policy on which the Hi-Way Motor Company is to build.

## Hi-Way Motor Company

H. C. Holt

Carlisle Daniel

### Popularity of Used Cars

Detroit, Mich., May: An entirely new slant on the used car, elevating it to its rightful place in the industry, was taken here by R. H. Grant, vice-president in charge of sales of the Chevrolet Motor Company, in an interview just prior to sailing for a month's trip to Europe.

As evidence of the growing importance of the used car, Mr. Grant pointed out that during the first quarter of 1928, when the Chevrolet dealer organization was moving 250,000 new cars, it also was delivering at retail more than 200,000 used cars.

This was made possible by a changing attitude toward the used car on the part of both the automobile dealer and the public, Mr. Grant said.

"Where the automobile dealer

formerly paid little attention to the used car," Mr. Grant declared, "the proportion of used car to new car sales has mounted so high that used cars are now an important part of his business. Today, practically all the direct dealers in the Chevrolet organization have Ducoing equipment with which they refinish used cars in a manner similar to the factory. Cars are gone over: from headlight to tail lamp by skilled mechanics trained in approved factory methods. The reconditioned cars bear an 'O. K. Tag' showing that every vital part has been checked. They are then displayed attractively, and lenient time payments are made available to the purchaser.

"The public owes directly to the used car the wide range of prices at which transportation may be purchased, and the wide

variety of models from which selection may be made. If there were no such thing as a trade-in price, the owner of an automobile, instead of turning it in on a new model, would drive it himself until its usefulness was spent, just as he now uses his furniture on his farm or garden implements. There would consequently be no used car market for the man who wants to buy a car at less than new car cost. Millions of present motorists who are attracted by used car prices would not now own automobiles if there had been no used car market.

"Every good automobile today is built with many years of service in it. The original purchaser generally turns it in on a new model after he has driven it a few years. There remains in the car many miles of dependa-

ble service which is available to the man who needs transportation on the basis of a low first cost.

"Of some 25,000,000 passenger cars now registered in the United States, it is estimated that approximately sixty per cent are in the hands of their second or third owners. In other words fifteen million motorists are now riding in cars that were purchased on resale.

"Eliminate the used car from the market, and a good share of those fifteen million people would be denied the privilege of owning a car. And most of the remaining ten million motorists would be driving cars that do not measure up to their ideas of style simply because they would not be able to get a trade-in allowance, and would refuse to scrap their cars with unused value remaining in them.

"The result would have been a great many less new car sales within the past twenty years, and most of the twenty five million present motorists would have either no car at all or a car that fell short of their present taste for style, durability and performance.

"Our dealers know that the used car buyer of today is the new car buyer of tomorrow. They are anxious to satisfy him because it means future business. By reason of the unprecedented demand for the Bigger and Better Chevrolet, our dealers have a better variety of used cars than ever before---cars that are better serviced, better finished and that

represent better values.

"There is every indication that our used car turnover this year will establish a new high record even though both our new and used car sales are bigger than ever before during this season of the year."

### I. O. O. F. Organize.

The members of the I. O. O. F. Lodge met on last Tuesday night May 8th. The object of this meeting was to organize a Lodge at Sudan. A good number was out, and much interest was shown. Committees were appointed, and plans were made for another meeting Monday night May 14th., at Hi-Way Garage. A program has been arranged. Rev. C. H. Ledger will make the welcome address. The District Deputy will give a talk on Odd-Fellowship.---Contributed.

### Golfers' Numerals.

A French caddie, after listening to many visiting players, British and American, informed a friend that he learned how to count the strokes in English, viz.: "Von, do, three, fore, fif, sees, damn, six, damn." Being asked how seven was distinguished from nine in this scoring he replied that when the latter was meant it was pronounced with double force.

### Keeping Out the Cats.

The Leicester City bench yesterday decided that any person was legally entitled to place on his garden broken bottles to keep off dogs and cats. A summons for serious injury to a dog was dismissed.---Manchester (Eng) Guardian.

### Dice Games Ancient.

No one can say positively when dice were invented. Credit for the invention is usually given to Psalmedes of Greece (1244 B. C.). Games played with dice are the simplest and most universal games of chance in the world.

### Boring Metals.

Brass, copper, iron, steel and other metals are easily drilled if you use oil or grease as a lubricant. Do not try to drill too rapidly, and when nearly through the metal go very slowly, as a drill may easily be broken by trying to turn it too rapidly as it pushes itself through the surface.

### Parasit Has Double Growth.

A parasit which extended its growth through the neck of a bottle, is among the garden freaks of the year. This unusual growth is reported from Ryde, Isle of Wight, and it was a healthy specimen when displayed. It resembles a double parasit in that from the surface down the parony grew to good proportions, then, pointed a course through the neck of a broken bottle and again grew to fair proportions on the other side of the temporary obstruction.

### Smoking a Real "Deadly Sin."

Smoking is a real deadly sin in some countries today. It is probable that more men have died for tobacco smoking at the hands of Sikhs, Senussis and Wahibis, whose religions forbid this practice, than died under the Roman empire for professing Christianity.

Capital Punishment With Sword. Execution by the sword still exists for capital punishment in one or two German states.

### Available Gabriel's Call.

What has become of the man who always wanted to die "with his boots on?" He has a son who now expires peacefully in bed sans tonsils, appendix, a tumor or two, and with a silver plate in his knee joint. Times have changed since the pioneer days of America---worse luck!

Author of "Nearer, My God, Nearer."

### St. Augustine, Fla.

St. Augustine, Fla., was settled September 8, 1565, by Spaniards under Pedro Menendez de Aviles; but the place had been visited as early as 1512 by Ponce de Leon.

### Window Refrigerator.

Its inventor has patented a refrigerator so mounted on hinges outside a window that it can be swung to one side to leave the window opening clear.

### Twelve Year-Old Patriarch.

For the past 400 years the patriarchate of the Nestorians has been a hereditary post. The present patriarch is the youngest religious dignitary in the world, being but twelve years old.

### Duty, Like Vice.

Duty, like vice, is often a creature of unpleasant men, but unlike vice improves on acquaintance which isn't followed by regrets.
