NUMBER 7

Agriculture Must Mobilize for Help

FEDERAL BOARD LAYS DOWN POLICY THAT RELIEF WILL COME THROUGH CO-OPS.

WASHINGTON, Aug. 7.—The Federal Farm Board has sent word to American agriculture to organize.

In a statement Chairman Legge and Vice Chairman Stone called attention that the board was directed under the recent farm relief act to do its relief work through the co-operative marketing agencies.

The board has concluded after several days' study of the law that its work is confined almost entirely to contact with the co-operative marketing associations.

Just how the board will attempt to encourage efforts to mobilize the farmers into marketing groups is indefinite.

Legislation to encourage co-operative marketing organizations was embodied in the Capper-Volstead act of 1923.

BLACK HEAD AMONG TURKEYS

During the past month there have been many reports to the county agent in regard to sick turkeys, and upon investigation in nearly all cases, traces of blackhead and intestinal worms have been found by the county agent.

The Motorist's Money—Where It Is Spent

A rise of \$64 since last year in the cost of operating an automobile, according to the president of the American Motorists Association, does not indicate that maintenance and operating costs are necessarily increasing.

"An average of \$293 was spent by each motorist in the United States during 1928 in the operation and maintenance of his car, according to figures compiled by the American Motorists Association. Of this sum \$101, or 34 per cent was expended for fuel and lubricants, this being the largest item in the motorist's annual operation and maintenance bill.

"The \$293 does not take into account depreciation. The average life of a passenger automobile, according to a computation of the government, is approximately seven years. During 1928 the average retail price of passenger cars in the United States was \$875, which based on a seven-year life expectancy, would mean an average depreciation of \$125 per year.

Farmer Killed In Dry Raid

SAN ANTONIO, Aug. 3.—Captain Charles Stevens, head of a federal dry raid yesterday near Poteet in Matagorda county in which Tom Chandler, 33, was shot fatally, testified at a preliminary hearing at Poteet today that the officers had no search warrant. Stevens was charged with Chandler's death.

Two Weeks' Revival Will Begin at Bula

Methodists of the Bula community, assisted by those of other communities adjacent, will, on Sunday, August 18, begin a two weeks' series of revival services.

The services will be in charge of Rev. Clarence Bounds of Megarge, and the public in general is cordially invited to attend and lend assistance in the good work.

TERRACING SHOWS BENEFIT DURING THIS DRY WEATHER

According to Albert Parks, upon whose farm the county agent is holding a terracing demonstration, "my crops are holding up much better on my terraced land, and my crops are far more uniform than ever before, and so far my expense in farming my terraced land has, with a possible higher yield than ever before."

At the present time when rainfall is lacking, one can surely see the benefits of keeping every drop of water on the land during periods of rainfall in the early spring, and the only way to do this is through terracing.

Those who are interested in this should drive to the Parks farm one mile south of Amherst, and see the actual results. Terracing of wheat land during the past few years has proven very profitable, and the county agent is available to hold terracing demonstrations on the wheat stubble of the past year.

A trip is being planned by the county agent to visit the Spur experiment station within this month, to see the soil erosion experiments that have been carried on during the past few years, and those who are interested in making this tour should turn in their names to the county agent within the next few days. These experiments are very important, especially so in relation to amount of actual loss in value of water and soil that have escaped from this land during the past few years where no terraces have been, and the surprisingly small amount when they have terraces. This tour will be taken during the latter part of this month.

LAMB COUNTY DELEGATION RETURN FROM SHORT COURSE

The Lamb county 4-H Club boys, and County Agent D. A. Adam, returned Saturday afternoon from the Farmers' Short Course held at the A. & M. College during the past week. A profitable short course was held, and the boys are more than anxious to attend more often in the following years to come.

Lamb county dairy judging team entered into competition with some 60 other county teams, but at the time of this writing do not know the placing received by this team as the final results were not available upon departure from the college. However, a very creditable showing is expected for the first year of club work in Lamb county.

Spotted Fever Found in United States

WASHINGTON, Aug. 1.—Public health officials said Thursday that Rocky Mountain spotted fever, highly fatal malady, resulting from the bite of ticks, had appeared with increased prevalence and unusually high death rates "over a considerable portion of the Rocky Mountain region."

One report reaching officials, they said, "indicated that 10 cases had developed in Wyoming, with seven deaths resulting. Higher death rates than normal, it was added, were indicated in parts of Idaho, Nevada, Oregon and Montana."

Cotton Prospects Good if Dry Weather Holds

DENTON, Aug. 1.—With some cotton opening now, the first bale of this year's crop is expected in Denton about Aug. 10, gin men say. As a result of the continued hot and dry weather for nearly two months, which has kept the boll weevil damage down to a minimum, cotton has fruited rapidly and at present promises a large yield.

Experienced cotton men here say that if there is no rainy weather before the middle of August, the yield is almost certain to be good, as after that time a crop of weevils hardly would have time to mature soon enough to cause heavy damage.

Big Wild Turkey Crop

SAN ANGELO, Aug. 3.—The wild turkey crop in this section probably will be the largest in several years, say local sportsmen. The shooting season does not open until mid-November.

APPARENTLY POOR POLICY.

It has been only within a comparatively short span of years that scientific agriculture has been taught in the public schools as an item of the regular curriculum. But since its gradual adoption by the states into their public school systems, it has rapidly grown in public favor, and farming interests generally have benefited greatly by its teachings.

Still the system is not yet all that it should be, and lacks much of being what it might be, the principal shortcoming being, as The News sees it, a matter of mistaken policy on the part of schools teaching agriculture.

For instance: The majority of Texas counties have created the position of county agent, and the schools have included in their courses of study that of vocational agriculture. Now this is as it should be and perfectly all right, provided the positions are filled as they should be. But right here comes the fly in the ointment.

It appears that prospective incumbents of these positions must secure them through Texas A. & M. College, being recommended by the head of that institution.

Now, whether or not bona fide promises are given to that effect, at least it seems to be generally recognized that, when a young man has completed the course at that institution, he automatically steps into a nice fat county or school job. Of course this is gravy for the youngsters. But, contrary to the views of some, this lacks much of being fair to the farmers themselves.

Admitting for the sake of argument, that these youngsters fresh from college with their degrees, must needs have practical experience on the farms before arriving at any degree of proficiency—still, is it exactly fair to the farmer that they secure that experience at his expense, at the same time drawing down a nice fat salary? We think not.

Another matter: The publisher of this paper has personal knowledge of men who, after several years' service as county agents or teachers of vocational agriculture, have been quietly but effectively laid on the shelf while youngsters fresh from A. & M. have taken their places. We maintain that this is grossly unfair to all concerned except possibly the young incumbents. These parties being thus shelved have gained by their years of service, practical knowledge which the youngsters must yet assimilate, and are equipped to really be of service to agriculture. For this reason these men should rank at the top in their calling, and should be most in demand. Until after further investigation, this writer does not make the accusation that this is a fixed policy of A. & M., but we maintain that appearances are very much to that effect.

BIRTHDAY PARTY.

Miss Wanna B. West, daughter of Mr. and Mrs. R. M. West, entertained with a party Saturday, August 3, at her home, celebrating her eleventh birthday. The guest list included Miss Lena Louise West, Miss Ruth Woods, Miss Thelma Woods, John Criswell, Miss Sarah Criswell, Miss Lora Liston, Willie Massey, Elmer Pruitt, Joe Serratt, Miss Frankie Ruth Farris, Miss Mildred Holden, Miss Katherine Hunt, Miss Margaret Hunt, John Cooper Jr., Miss Audelia Arnold, Miss Ruth Arnold, Miss Loretta Wright and Miss Doris Hutto. Miss Wanna was presented with a number of gifts.

Time takes care of all things, and the tobacco coupon passed out of existence just in time to keep from being confused with the new paper money.—Detroit News.

ROLL CALL SERVICE AT BAPTIST CHURCH

The Sudan Baptist church is to have an old fashioned roll call service Sunday, August 11, at 10:00 a. m. All members are especially invited to be present.

The pastor, W. B. Phipps, is now living in the new parsonage in front of the high school building. At present we are having preaching services on second and fourth Sundays. We hope in the very near future to have full time work here. We are planning a great revival meeting to begin August 18th and continue two weeks.

The public at large is invited to come worship with us.

W. B. PHIPPS, Pastor.

Our Neighbors

Littlefield

(Lamb County Leader.)

The Littlefield financial campaign for the South Plains Boy Scouts council will soon be completed. The Rotary Club of Littlefield is sponsoring the work and a quota of \$625 has been accepted by Littlefield, 4409 of which has been raised.

Sometime after Tuesday midnight yeggs entered the Walters drug store on South Main street, and the Magnolia oil station on State highway, blowing the safe in each place and making good their escape with the financial contents.

The annual convention of the South Plains I. O. O. F. association will meet in Littlefield Monday, September 23, it being the first time the association has ever been held in this city.

Mayor Otto Jones, Commissioners R. E. McCaskell and Wm. J. Harris, and City Attorney E. A. Bills left Sunday for Austin to appear before the State Highway Commission relative to retaining a grant of \$8,416 previously made for paving the State highway through Littlefield and which grant now appears to be in jeopardy.

At Tuesday's meeting of the Chamber of Commerce many projects were outlined for action at an early date. One which was favorably acted upon was the issuing of a folder for the Chamber of Commerce, outlining the many advantages this section of the South Plains offers.

Material is this week being assembled and work of constructor will begin the latter part of this week on a brick business building to be located on Main street or the former site of the Littlefield bakery.

Morton

(Cochran County News.)

The call for a joint conference of representatives of Lubbock, Levelland, Morton, Portales and Elida Chambers of Commerce, and the county commissioners of Cochran and Roosevelt counties to meet in Morton last Tuesday afternoon, was met with a wholesome response. After going over the proposed line of highway, and viewing same from every angle, it was the opinion of the conferees, with one or two exceptions, that the proposed route as outlined by the Commissioners court was the most feasible.

Petitions have been prepared by George E. Lance, president of the Morton Chamber of Commerce, to be circulated in every part of this county, southern Lamb and Bailey counties, and in eastern Roosevelt and Lea counties, New Mexico. The petitions are directed to the officers, directors and stockholders of the St. Louis & San Francisco Railway, the Missouri, Kansas & Texas Railway, and the Fort Worth & Denver Railway, petitioning for a line through this section.

We are to have a new business house. The Lubbock Poultry and Produce Company has rented the E. A. Long building on the south side of the square and will open for business this week.

Rev. Wages of Lamesa is assisting Rev. Watson in revival this week.

Landseekers from central Texas and Oklahoma have been flocking into Morton by the dozen the past week. Some sales have been made.

A. D. Boyd, who has served in the capacity of attorney for the commissioners court for the past eight months, and who resigned from that office last Monday, left Tuesday for Oklahoma City.

The housing committee for the Cochran County Fair will meet next Saturday to arrange for taking care of the exhibits.

Dimmitt.

(Castro County News.)

With the acquirement of three lots facing the street, running just south of the court house, and between third and fourth streets, just south of the present site of the Dimmitt Coal and Grain Co., C. W. Boothe expects to erect a new elevator with a capacity of thirty thousand bushels.

Announcement is made of the early closing of the mercantile establishments of Dimmitt during the month of August.

Advertising matter is out this week for Castro county's 38th Annual Anniversary Picnic, to be held in Dimmitt on the court house lawn on Wednesday, August 14th.

The Castro County Annual Fair

Big Shipments by Cotton Groups

FARM CO-OPERATIVES HANDLE MORE THAN 1,100,000 BALES OF 1928 CROP.

WASHINGTON, Aug. 2.—Sixteen farmer-owned and operated cotton marketing associations with approximately 100,000 members, handled more than 1,000,000 bales of the 1928 cotton crop, the department of agriculture announced today.

The best record made by any association is that reported by the Oklahoma Cotton Growers Association, Oklahoma City which received more than 352,000 bales from its 25,000 members.

The Staple Cotton Co-operative Association, Greenwood, Miss., handled more than 232,000 for 1,500 active members. This is an average of 154 bales per active member.

A third association handling a large volume of cotton is the Texas Farm Bureau Cotton Association, Dallas, with about 20,000 members, which received more than 115,000 bales.

The Mississippi Farm Bureau Cotton Association received about 75,700 bales, and the Arizona Pima Cotton Growers more than 65,000. The other associations report handling smaller quantities.

Ten train loads of co-operative cotton, 60 cars to the train, recently moved out of Houston, Texas, one train each day for ten consecutive days.

The Future of the Automobile

Within ten years, automobiles will safely travel a hundred miles an hour, weigh less than a thousand pounds, sell for less than a thousand dollars, and cover eighty miles on a gallon of gasoline.

This is the prophecy of Charles F. Kettering, president of the General Motors Research corporation, and inventor of the self-starter and many other automobile improvements. The pressure of airplane competition will bring this about, he asserts.

"Lightness of construction is one of the things we have learned from the airplane," he says in an interview with Henry Morton Robson in the September issue of Popular Science Monthly. "Until 1920, we used to boast of how heavy our cars were. Now a chief selling point is how light they are. Aluminum, lynte, and invar all came into automobile construction by way of the airplane. And right now we are perfecting for commercial purposes a new metal fifteen times stronger than nickleed steel, yet only one-third as heavy as steel.

"Light weight and improved methods of carburetion are going to double the mileage we can get on a gallon of gasoline. I also believe that many parts will be eliminated on the automobile of the future. The whole method of gear shifting is undergoing a series of changes right now—changes that eventually will do away with the cumbersome shifting lever. Shifting, braking and possibly steering eventually will be a part of the electrical system.

"Body design is due for marked changes, also. We are only beginning to learn the possibilities of the streamline body in reducing wind resistance. Major Seagraves never could have made his recent record unless he had thoroughly understood the science of streamlining.

"As far as I can see—and I am taking a long look into the future—the automobile and the airplane will never conflict. Instead, they'll complement each other—and inside of another ten years it'll be a wise man indeed who can tell, when blindfolded, whether he is riding in a plane or a car!"

Ladies of The Church of Christ Bible Study

Our class met with Mrs. C. A. Daniel last Tuesday, with seven members and one visitor present. We would like very much for all of our members to be present at our next meeting. Our Revival begins next Monday night, so it would be well for all of us to be present.

We meet with Mrs. J. A. Hutto next Tuesday at 4:00.

We extend a welcome to all.

Statesmen are men who plan carefully to avert a war the people never would dream of if there were no statesmen.—Publishers Syndicate.

will be held on Friday and Saturday, September 20 and 21, this year, and, according to the plans of the board, the winning exhibits here will be taken immediately to the exposition at Amarillo, to be held the week of September 23.

"Buster" Booth, of the Dimmitt Coal & Grain, is building a concrete storage bin for coal, on his property east of the court house. The capacity of this bin will be approximately ten cars.

The Dimmitt Culture Club met with representatives from various sections of the county last Saturday afternoon at the court house, and perfected a Club Federation of Castro county.

Construction work will probably be started immediately after the contract is let next week for the new \$15,000 school building at Big Square, 22 miles southeast of Dimmitt.

Diver Requires Care

A diver is not simply "dropped overboard" to fall almost like a stone to the bottom of the sea. He is lowered very carefully at a rate—averaging about two feet a minute—that allows the pumps to supply the proper air pressure. Otherwise he would probably suffer great pain with bleeding at the eyes, nose and ears. The rate at which he is withdrawn from the water is slower still.

How to Raise Poultry

By Dr. L. D. LeGear, V. S., St. Louis, Mo.

Dr. LeGear is a graduate of the Ontario Veterinary College, 1902. Thirty-six years of veterinary practice on diseases of live stock and poultry. Eminent authority on poultry and stock raising. Nationally known poultry breeder. Noted author and lecturer.

The Great Mystery of Molting

The Puzzling Phenomenon of Molting May Be Used as a Valuable Guide When Culling Flock to Eliminate Poor Egg Producers.

A rather amusing story has gained considerable circulation among poultry fanciers. Young Mrs. Newlywed stopped the local veterinary on the street and demanded that he come over immediately to inspect her flock of blooded leghorns. A lot of them, she said, had suddenly become afflicted with a strange, apparently contagious, malady.

When asked for a description of this peculiar disease, she explained that one after another, they had ceased laying and then begun to lose their feathers in a most alarming fashion. Starting with the neck feathers, they had successively lost in turn the body feathers, then the tail feathers and, finally, most of the wing feathers until they were practically nude and truly pitiable objects. The young woman was naturally quite relieved when the old doctor informed her that it was just as natural for her hens to shed their feathers at a certain time of the year as it was for certain kinds of trees to shed their leaves. They were simply molting and would recover shortly without any great effort on her part.

I shall make no effort to vouch for the truth of this story. I do not hesitate to say, however, that I have often been amazed at the comparative lack of knowledge even among a great many experienced poultry raisers on the subject of molt. For example, there is considerable difference of opinion even among experts as to whether the molt affects and controls egg production, or whether egg production controls the molt. Some contend that a hen stops laying because she is getting ready to molt, and others contend with equal spirit that the hen won't molt until after she is through with the business of egg production, for the

time being at least, I, myself, am strongly inclined to the latter theory and I am supported in my belief by a great many qualified observers who also have given the matter considerable scientific study.

The exact sequence is of no particular moment to practical poultry raisers, however. The fact remains that molting does not start until after egg production has ceased, only in exceptional cases, regardless of which governs the other. Just why hens are committed to this peculiar habit of shedding their feathers once a year is another matter which has been the subject of a great many profound treatises by learned scientific men. The average poultry raiser is, however, mainly concerned with the fact that this peculiar phenomenon may serve as a very valuable guide in the culling out of poor layers from the rest of the flock.

Most authorities now agree that the hens which start molting earliest and keep it up longest are the poorest layers. Good layers seldom start molting until later in the fall and are completely finished in from six to eight weeks. Less productive hens, on the contrary, may start as early as June, July or August and fiddle around for four or five months before they have regained something like what President Harding would probably have called "a state of normalcy."

While nearly all feathers are molted at one time or another, the most reliable guide is the manner in which wing feathers are molted. High producing, late molting hens molt faster than one feather at a time, or else they molt only a part of their feathers, carrying others over to another year. Poor layers, on the other hand, may molt but one wing feather at a time so that the process may require as long as 24 weeks. Most poor layers take very nearly this long to complete the molting of their wing feathers, so it can be seen that this is a very accurate index of productiveness.

Although the alleged dismay of young Mrs. Newlywed as related at the beginning of this article is doubtless more or less of an exaggeration, there is no escaping the fact that a hen during the molting time is really very much out of condition and should receive extra food and attention. The care and feeding of hens at this time might be the subject of a separate article in itself. I shall, therefore, let it suffice to say that molting hens should have plenty of good shade, nourishing food and ample protection from bad weather. A good mineral tonic should also be given them so their appetites will be whetted for an abundance of food. Then they will take the necessary nutriment to offset the strain on their system, grow their feathers again and get back to laying.

Feed a variety of good, sound grains, such as oats, wheat, corn and bran. But do not feed too much corn, as that is too heating. Feed also some sunflower seed and linseed meal. Also a little more of meat, green cut bone or meat scraps than is usually fed and give plenty of milk, if possible. Feed an abundance of greens. Have pure, fresh water available at all times. All this will help to bring the hen back into laying condition rapidly.

THE PANHANDLE AND HOGS

By FRED HALE

Chief, Swine Division Texas Agricultural Experiment Station.

What makes a country suited to hog production? Let us reason this question out in a business way. In the first place let us determine where hogs are produced and why. Take the state of Iowa, for instance. Iowa markets around 11 million hogs annually. Texas has only about 1,400,000 hogs. Why does Iowa market so many hogs? The only answer is, Iowa produces millions of bushels of corn annually, and the corn growers have found out by experience that they can market their corn through hogs at a higher price than they could get for their corn by selling it on the market as corn. The Iowa farmer has found out, too, that a system of farming including livestock insures a more regular, consistent and dependable income than does a system of farming where no livestock is included.

Now, coming back to the Texas Panhandle country, we have even better conditions for hog production than does Iowa. Why? In the first place, we raise Milo and grain sorghums that are practically as efficient as corn for fattening hogs. In the second place, it takes less expensive equipment for hog production in the Texas Panhandle than it does in Iowa. In the third place, two litters of pigs may be farrowed per sow per year in the Panhandle. In the fourth place, we have available a cheap protein feed in the form of cottonseed meal that we can well make use of up to 9 per cent of the total ration. We also have access to good markets for hogs produced in the Panhandle. We are a little handicapped in the late fall and winter as far as green pasture is concerned. Sometimes the small grains can be depended upon for winter pasture, but here are times when we should probably include a pound of green, early alfalfa hay in the breeding herd's ration, feeding a pound a day per hog. The fattening ration could well be taken care of in winter months by adding 55 per cent of alfalfa leaf meal to the ration. One might say that the Panhandle falls sometimes to make a grain sorghum crop. That is true, but the thing to do is to always save back enough grain for two years, and then one will never be caught with hogs and without grain.

It looks like from the above reasoning that the Texas Panhandle is well suited to hog production. Now, are hogs suited to the Texas Panhandle? We have to say yes, or in a way the same answer fits both questions. Hogs are suited to the Texas Panhandle because hogs make more efficient use of the grain sorghums than do any other class of animals. With good hogs, fed right and managed efficiently one can produce 100 pounds of gain for from 375 to 400 pounds of grain. No other animal can produce gains with so little feed as can the hog. Of course, the grain must be supplemented with a good protein supplement before the hog can use it so efficiently, and tankage, and skim milk are the two best single protein supplements that we have. However, a mixture of 2 parts of tankage, 1 part of alfalfa leaf meal and 1 part of cottonseed meal has been found by State Experiment Stations to be a better protein supplement than straight tankage when the hogs are fed in dry lots. The following example will show in a concrete way just how hogs are suited on farms where grain sorghums are produced. Say we

produce about 1500 pounds of Milo per acre on the average. This is equivalent to 1 ton of heads. Now, if we take this 1500 pounds of threshed Milo to town and sell it on the market, we would get on the average about \$1.00 per hundred pounds for our Milo or a total of \$15.00 per acre.

The question now is, what could we get for this 1500 pounds of Milo if we market it through hogs? This can be determined in the following way: Fifteen hundred pounds of Milo supplemented with 165 pounds of 80 per cent protein tankage will produce 425 pounds of gain when fed to fattening hogs. The above statement is true where the hogs are fed, not to exceed 225 pounds live-weight. The 425 pounds of gain thus produced will sell for 9 cents per pound over a period of years if sold in March, April or September; 425 pounds of pork at 9 cents per pound totals \$38.25. The 165 pounds of tankage will cost (if purchased in ton lots) about \$4.10 per 100 pounds.

We purchased 165 pounds of tankage to go with our 1500 pounds of Milo, so we will have to subtract the cost of 165 pounds of tankage or \$6.77, from \$38.25, which leaves \$31.48 or the amount we got for our 1500 pounds of Milo when market through hogs. Of course, it takes some labor, equipment, etc., to take care of hogs, but the feed cost is from 75 per cent to 80 per cent of the total cost of hog production. Our feed cost was 1500 pounds of Milo or \$15.00, plus \$6.77 worth of tankage, or a total of \$21.77.

This represents 75 per cent of the total cost, or the total cost would be about \$29.00. The 425 pounds of pork brought \$38.25, or \$9.25 above total cost. In other words we got \$15.00 plus \$9.25, or a total of \$24.25 for our 1500 pounds of Milo when marketed through hogs as compared to only \$15.00 when sold as Milo.

The Panhandle of Texas is well suited to hog production; but hogs will prove a success in the Panhandle when and only when the farmers are willing to grow slowly and cautiously and seriously into the business instead of jumping or buying themselves into the business. There are several phases related to successful hog raising other than feeding, e. g., breeding, sanitation and disease, marketing, general management, and pastures.

Get the Facts Before You Build

We can tell you how to build a beautiful, livable home

When our ancestors along the Atlantic Coast built homes of unusual beauty which are standing today after two and three hundred years of service, they knew what they were doing. They built of virgin timber and they built skillfully.

You may do the same today. You may build a home, as the early Colonials did, that will be a joy to your children—that will be beautiful, easy to heat in winter, and cool in the hottest summer weather. It is only necessary that you use plenty of good wood, and proper construction. That is what made the early Colonial homes so livable, beautiful and lasting.

Valuable Free Information

Stop in at the first opportunity and get our suggestions on your own home building problem! You can get just the information and ideas which will assure you of a home of worth, comfort, and appearance—built of materials best suited for lasting economy.

THE AMERICAN CREED

"I believe in the United States of America and the principles of freedom, justice, equality and humanity upon which it was founded and for which American Patriots have given their lives and fortunes.

"I believe it is my duty towards my country to love it; to support its constitution; to obey its laws; and to defend it against all enemies."

Any erroneous reflection upon the character or reputation of any person, company or corporation which may appear in these columns will be gladly corrected upon its being brought to the attention of the management.

"BOOST OR MOVE."

FARM RELIEF.

The new farm board is now ready for business. The board was created by a farm relief bill which was passed by the recent special session of congress and is equipped with government backing in the millions. Most of this money will be spent during the next twelve months in a way experts believe will give the maximum help to the farmer. But those who are looking for a miracle and expecting farmers overnight to become free from all troubles will be disappointed.

"The full value of the new law depends upon the degree of team-work between the board and the farmers themselves," says Secretary Hyde. "In all the history of America, there has been no program and no legislation in aid of any industry comparable with the farm relief bill."

Secretary Hyde says the department of agriculture does not intend to try to run the farmer's business. "We intend merely to place the facts before you for your reasoned decision," he says.

A farm paper expresses the opinion that there are better days and better years ahead for the people who produce. The supply of fertile lands in the world cannot be increased, unless we call increasing acreage by putting water upon lands otherwise unproductive. "The farming business is the best opening for young people," says this farm publication. "The purchase of good productive farm land at present prices is the best investment from a business standpoint which can be made."

RECEIVED AT PAR.

The Sudan News will continue to accept old bills of any denomination, size or state of wear. Money which has been much used and might be called second-hand will be received at par and we shall not attempt to demand all new money of the smaller and more modern model. Personally, the publisher's

billfold is amply sufficient to take care of either or both sizes at one time.

BEAUTIFUL FLOWERS.

There are some lawns and gardens about Sudan that are wonderfully beautiful just now with their flowers and foliage. Note the beauty of these flowers while they are in bloom, and then make a vow to plant more flowers next season. Flowers cost but little. Anyone with a few square feet of earth where the sun shines a considerable part of the day can have flowers and they pay abundantly. Flowers and beautiful lawns help to make a town more attractive. The impressions visitors carry away are molded by the general appearance of the town.

- Don't knock but boost.
- Once a sucker always a sucker.
- Drive carefully and live longer.
- Set the calendar for Thanksgiving.
- Corn on the cob is a real delicacy.
- Quarrels always leave a wound somewhere.
- Two's company; three's in the rumble seat.
- Only a few short weeks until school opens.
- Every little radio has a static of its own.
- Capone is to stay in jail—where he belongs.
- Every time a man helps his town he helps himself.
- A town without a band is like a hat without a band.
- These hot days give one a new appreciation of trees.
- How's this for an auto ad: "Good to the last ditch."
- A man with a summer cold has a right to be mean and grouchy.
- What's the use to have an idea if you never carry it through?
- What any state in the Union needs is settlers who settle their debts.
- Automobile and airplane accidents give a new meaning to the week-ends.
- One never hears of a moving picture star wanting a double in a beauty contest.
- Maybe Harry Sinclair wishes he could serve two jail sentences at the same time.
- Outside of a bow and arrow, a flat tire is the biggest drawback in the world.

- Acting as president of the U. S. seems to be a weight losing job. It is stated that President Hoover has lost 15 pounds since going into office.

ART GOEBEL PILOTING FAMOUS WOOLAROC ON FAREWELL TOUR

WOOLAROC LANDING AT WHEELER FIELD, HONOLULU

MAP SHOWING ROUTE OF FAREWELL FLIGHT OF WOOLAROC PLANE

Custom of Artists

Certain of the old masters of painting divided their canvases into squares in order to determine correct proportions. Some modern portrait painters use the same methods.

Highest "Mountain"

Although Sunday Island, in the Pacific, has a maximum elevation above the water of only 2,000 feet, it is in reality a mountain 30,000 feet from base to summit!

Laughed at the World

Democritus of Miletus, who laughed at the follies of mankind, was given the name "Laughing Philosopher" to distinguish him from the "Weeping Philosopher," Heraclitus, who mourned for human depravity and in situation.

Democratic Hats

The Turkish fez was the most picturesque and economical hat in the world. Worn winter and summer by every man in Turkey from the sultan to the poorest laborer, it was the world's most democratic head covering.—Woman's Home Companion.

National Park Officials

There are 19 national parks. Temporary park rangers are employed in 14 of them. Approximately 100 temporary park rangers are employed each season. Approximately 100 permanent park rangers are in the service.

Old Belief Dispelled

Experiments made at the University of California have proved that a bull's reaction to the color of red is no more than any other color. In fact, judging by the conduct of the steers tested, it seems doubtful whether it can tell red from green, white or blue. It is even possible that the animals have no realization of color at all.

House Chose President

The house of representatives elected Thomas Jefferson President on February 17, 1801. The candidates in the popular election in November, 1800, were Jefferson, Aaron Burr and John Adams, but no candidate received a majority.

Comets With Long Tails

The naval observatory says that Donati's comet in 1858 was a very conspicuous object, with a tail said to be at one time 60 degrees long. Tebutt's comet of 1801 was another great comet, seen in June of that year, with a tail 100 degrees long.

Recovering

"Oh I'm coming along, thank ye," cheerily piped old man Totterly, who was ill. "I'm getting weller all the time. I can quarrel with my son-in-law a little, and hope to hold him level after a while. Yes, sree! I'll be strong enough to play checkers by and by."—Philadelphia Record.

Recipes for Happiness

To make much of little. To find reasons of interest in common things. To develop a sensibility to mild enjoyment. To inspire the imagination to throw a charm upon homely and familiar things, will constitute man master of his own happiness.—Henry Ward Beecher.

Controversial

A polemic theme is a controversial theme or a theme written in support or defense of an opinion or doctrine, especially as against another. A well known example of polemics is Huxley's polemic vs. Herbert Spencer.

Tulips and Daffodils

In tulip culture the removal of the flowers as they fade is necessary, but in daffodil culture there is no such imperative requirement, although there seems to be a difference of opinion in this case.

Label Them

Family photographs should be labeled on the back with the person's name whose picture it is. Otherwise, they will prove useless to a future generation who might otherwise prize them very highly.

Earth's Lowest Spots

The lowest spot in this country is in Death valley, California. It is 276 feet below sea level. The lowest spot in the world is said to be the Dead sea in Palestine, 1,290 feet below sea level.

Justification

The man of science has learned to believe in justification, not by faith, but by verification.—Thomas Huxley.

Superfluous Plant

The attempt is made to manufacture rubber out of everything now days. This suggests that a new use might be found for that now superfluous plant, the mistletoe.—Boston Transcript.

True American Spirit

The phrase, "Don't give up the ship!" is attributed to James Lawrence, American naval officer, who commanded the Chesapeake, an American ship, in the encounter with the British ship, Shannon. Lawrence was wounded early in the encounter in the leg, but retained his post on the deck. He was mortally wounded a second time, and while being carried below, noticing that the crew was hesitant, cried, "Boys, don't surrender the vessel!"

Compiling Average Weights

Average weights of men and women are usually compiled from insurance figures, and are merely what the adjective implies. Ideal weights differ somewhat. An authority on dietetics says that average and ideal weights are nearest together when individuals are between twenty and twenty-five years of age. As the years progress the average weight is higher than the ideal weight.

Season Your Knowledge

Knowledge is essential to success. Just as timber is necessary in building a house, but neither is it at its best until well seasoned.—Rushville Republican.

He Is That Sort

He is the kind of man, we said in our bitterly intolerant way, who would get all worked up over the paramount importance of revising the calendar.—Columbus Ohio State Journal.

Idle Women

There are millions of idle men, but I thank the good Lord there is still some objection to them. . . . But there is no objection to idle women. . . . And how many millions there are of them! We regard our idle women as a fine tribute to our gallantry, but the naked truth is they are our greatest disgrace. . . .—E. W. How's Magazine.

Interesting Islands

The Galapagos islands, lying about 600 miles off the coast of Ecuador, are of extreme interest to zoologists in view of the peculiarities of their fauna and the bearing the facts have upon the evolutionary history of animals. Reptiles are represented by the famous giant tortoises, two species of snakes and four of lizards.

Slow at First but—

Roe is twelve and delights in large words. When he attended his first evening party, his mother was curious to know how the evening was spent and whether he had a good time. "Well, at first it was pretty slow," he reported, "but toward the last it got quite light-hearted!"

Postage Stamps?

It was in a small country town during the World war that an eager collector selling her quota of war saving stamps met an amusing experience. She explained the purpose of her visit to one woman, and received this answer: "Well, I guess I don't need any of the stamps. We don't write many letters."

A German Sentence

The German system of forming a sentence consisting of a number of words strung together with the verb at the end, has long been the butt of jokes by writers of other countries since the days of Mark Twain and perhaps before that. A recent feat of German syntax is said to be composed of 230 words.

No Putting Off

"My boy, think of the future." "I can't; it's my girl's birthday, and I must think of the present."—New York Central Lines Magazine.

Of European Origin

The principal and most valuable breeds of the American cattle have been derived from Great Britain and other portions of northwestern Europe.

Babylon in History

The earliest mention of Babylon, the ancient city on the Euphrates, is on a tablet inscribed during the reign of Sargon of Akkad, approximately 3800 B. C.

Derivation of Limerick

The term limerick is said to have been taken from a song with the same verse construction current in Ireland, the refrain of which contains the place name, Limerick.

The Use of Force

First, sir, permit me to observe that the use of force alone is but temporary. It may subdue for a moment, but it does not remove the necessity of subduing again; and a nation is not governed, which is perpetually to be conquered.—Edmund Burke

The Comeback

When A publishes a book in which he is described as the "world's greatest authority on bridge," there is really nothing for B to do but get out another in which he is called the "world's foremost authority on bridge."—Detroit News.

Medical Definitions

Quarantine is an interesting word. It first meant a period of forty days because that was originally the fixed period of quarantine, regardless of the disease. Sinus is Latin for a bent surface of fold. Vaccination comes from vacca, a cow, because the vaccine is obtained by a process in which cowpox plays a part.—Hygein Magazine.

Saved by Molasses

A ship in danger of destruction by mountainous waves was saved by the captain pouring a 70,000-gallon cargo of molasses overboard. The molasses, the uncrystallized syrup drained from raw sugar, had the same effect as pumping oil overboard, and stilled the water around the ship.

World's Oldest Ship

The inscription on the tablet on the main deck of the restored H. M. S. Victory, in Portsmouth dockyard (England), records the fact that this vessel is the oldest ship in the world.

Genius and Reliability

The wild force of genius has often been fated by nature to be finally overcome by quiet strength. The volcano sends up its red but with terrific force, as if it would strike the stars; but the calm resistless hand of gravitation seizes it and brings it to rest.

Petrification Begun

Remains of an ancient California forest in the early stages of petrification were discovered by workmen excavating nearly sixty feet below the surface at Oakland, Calif. The wood was still soft enough to be crushed in the hand but was visibly in the process of becoming stone.

Scarecrow Carries Gold

Hearing a clinking sound as he passed a scarecrow whose overcoat was flapping in the winter wind, a farmer, near Trier, Germany, investigated. In one of the pockets he found coins which he was able to cash in at Trier recently for nearly \$250.

Greek Culture Widespread

Excavating an ancient tomb in Mongolia, Professor Kozlov discovered a Greek tapestry and a carpet representing a deer on whose back is a winged lynx. Such discoveries as these in Eastern tombs indicate that the ancient Greek art and culture spread as far East as Mongolia, he said.

Beaver Broke Precedent

There is a tradition that no beaver was ever caught by a falling tree, but in an instance at Shagg pond in Maine this tradition was upset. A tree that a beaver felled slipped off the stump and caught him by one foot, exactly as if he were in a steel trap. No one happened along to discover his plight until after he had died.

Norman French Term

The prefix Fitz in proper names is a Norman French prefix which means son of. It is a corruption of the word filius. As one authority says: "In contracting the word filius the old scribes drew a stroke across the i to denote the omission of the i and thus assimilated it in form to the letter t. The character s is the usual contraction of us. Thus the word looked like fitz and came to be so pronounced."

Latin to English

The exclamation, "Oh, dear, dear!" is a corruption of "O, Dieu, Dieu!"—an invocation of the Deity. "All my eye and Betty Martin" is from "O mibi, Beate Martino," meaning "Help Me, Blessed St. Martin."

Thought and Action

I have always thought the actions of men the best interpreters of their thoughts. Locke

And Only Then

Once in a while you see a man who doesn't want any more money. He is holding a lily.—Buffalo News.

Note for Pedestrians

It is a foolish assumption that a swiftly moving motor car can stop quicker than a pedestrian can jump.—Boston Herald

Many Unnamed Islands

Of the 7,083 islands that form the Philippine archipelago 2,441 are named.

Origin of Common Words

Delirium comes from the Latin verb delire, to rave; delirium tremens means a trembling delirium. Delphicatory means that which removes hair derived from pilus, a hair. Lumbago, a rheumatic pain in the lower part of the back, is so named from the Latin lumbus, meaning loin. Morphine is named from the Roman Morpheus god of sleep.—Hygein Magazine.

Secret of the Cave

Bones of at least 2,000 hippopotami killed by prehistoric hunters were found in a single cave in Sicily.

Jockey's Position

A jockey rides with short stirrups so as to take the weight off the horse's back. He rides on the horse's shoulder so as to give with the horse.

Talking Parrots

The Mexican double yellow head is probably the best talking bird among American parrots. This is probably equal to the African gray, which is the Old world favorite. Parrots must be taught to talk while young. Older birds learn little and very slowly.

Invisible Borers

How bacteria can bore into marble has been demonstrated by the British building research board. In three weeks the little destroyers had penetrated the rock to a depth of two inches.

High Cost of Prodding

Another thing the ultimate consumer says without realizing it is the salary of the bill collector.—San Francisco Chronicle.

The Ideal!

A member of the British nobility was recently pitched out of a motor boat into a choppy English channel sea. That must have calmed the waves at once. There's nothing like pouring an earl on troubled waters.—Farm and Fireside.

Largest Prime Factor

Few will undertake to contradict the mathematician who has figured that 2,147,483,647 is the largest prime factor; that is, the largest number which is evenly divisible by no other whole number except itself and one.

Sweet Charity

We have noticed that charity is not quite so sweet as it is cracked up to be. If we give a hobo a nickel for a cup of coffee, it seems to us his mind is full of curses that it was not more. And we usually swear, because we only gave the nickel to keep up appearances.—Achtison Globe.

Walk With the Wise

He that walketh with wise men shall be wise; but a companion of fools shall be destroyed.—Proverbs 13:20.

"Poor Man an Insult"

In this extravagant age, a poor man is an insult to a woman. A poor man is frequently able to fool a woman before marriage, and make her believe he is very promising, and will become rich, but he can never fool her after marriage.—E. W. Howe's Monthly.

Inside Information

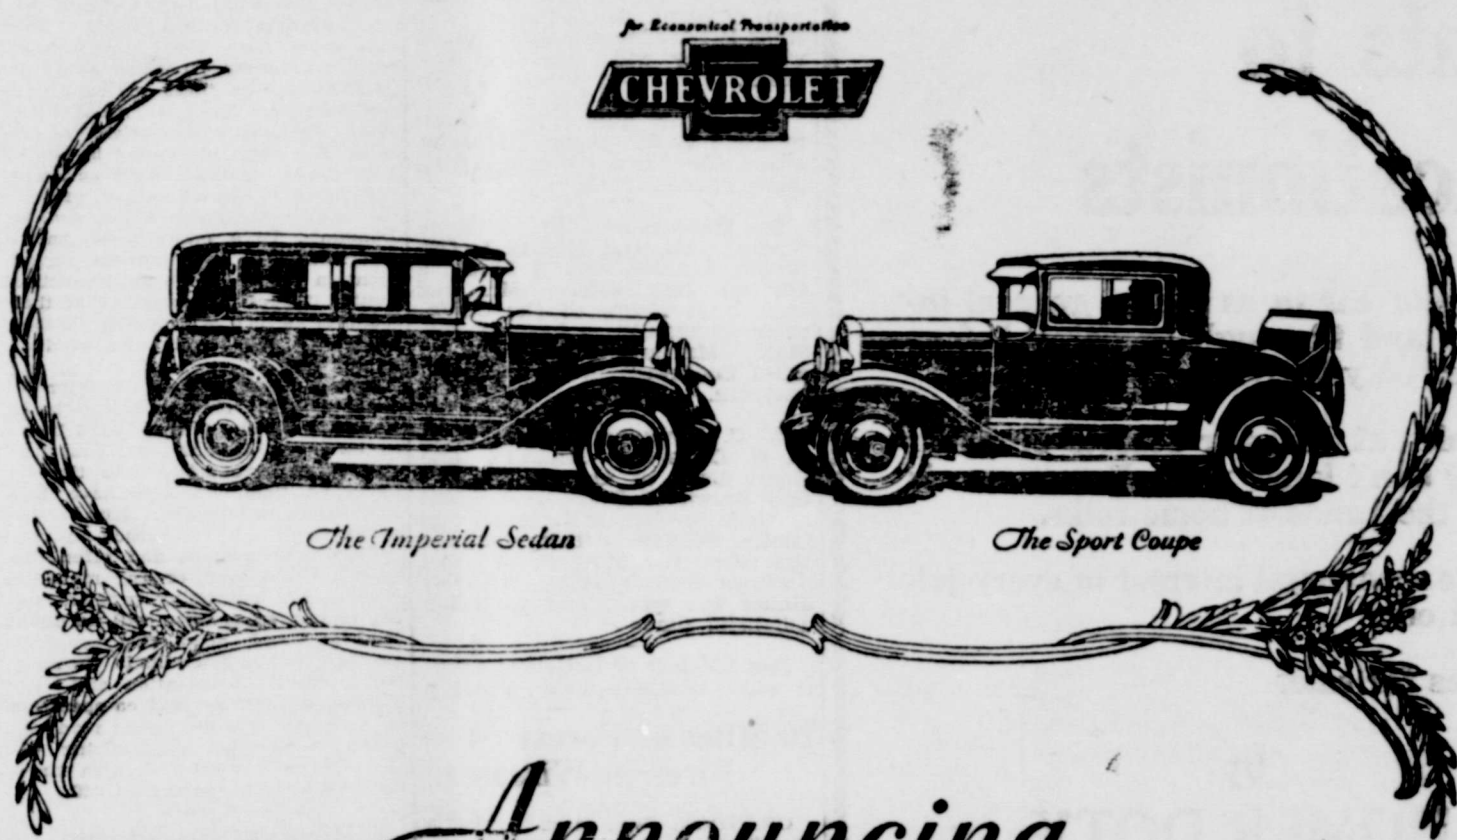

"Inside information" gets on the outside quicker than any other kind of information.—Achtison Globe.

Easy

Being happy is just a matter of selecting an ambition small enough to fit.—Nashville Courier.

No Contagion in Cancer

Cancer is not contagious. At least this is the present belief of medical science. In spite of the fact that physicians and nurses have come into intimate contact with cancer patients for so many years and taken no precautions against infecting themselves, said a bulletin on this subject, there is no recorded instance of one case of cancer giving rise to another.—Exchange.

Announcing
Two New Models
of the CHEVROLET SIX

Broadening the appeal of a line of cars which has already won over 950,000 buyers since January 1st, Chevrolet presents two distinguished new enclosed models of the Chevrolet Six—the Imperial Sedan and the Sport Coupe. With beautiful new Bodies by Fisher available in a variety of striking color combinations and with numerous advanced convenience features—these new models provide, in abundant measure, those elements of distinction ordinarily associated with more expensive automobiles.

you will be impressed by their individuality and completeness. But you cannot fully realize what an achievement they represent until you get behind the wheel and drive! For here are all the qualities of six-cylinder smoothness, power and acceleration which Chevrolet alone provides in the price range of the four—combined with economy of better than twenty miles to the gallon of gasoline!

When you examine the new Imperial Sedan and Sport Coupe,

Come in today Learn for yourself the new standards of quality and luxury that Chevrolet has made available in six-cylinder cars—at prices within the reach of all!

The Roadster, \$525; The Phaeton, \$525; The Coupe, \$595; The Coach, \$595; The Sport Coupe, \$645; The Sedan, \$675; The Imperial Sedan, \$595; The Sedan Delivers, \$595; The Light Delivery Chassis, \$400; The 1½ Ton Chassis, \$545; The 1½ Ton Chassis with Cab, \$650. All prices f.o.b. factory, Flint, Mich.

COMPARE the delivered price as well as the list price in considering automobile values. Chevrolet's delivered prices include only reasonable charges for delivery and financing.

TOWN AND COUNTY

Mr. J. C. Cryder, father of Mrs. Chas. Crawford, Mr. and Mrs. R. Casereoler and Mr. A. C. Tresp of Dallas county, and Mrs. Mike Dinty of Clovis, N. M., are the guests of Mr. and Mrs. Chas. Crawford, and all visited in Clovis and Portales Wednesday.

Randolph Parker, of Trinity who was a teacher in our school two years ago was visiting with friends in Sudan Sunday.

Mr. and Mrs. J. A. Ladd who have been visiting Mrs. Ladd's brother at Memphis returned to their home near Sudan Monday.

Mrs. T. J. Anderson of Clovis, N. M. and her sister Mrs. J. O. Kinsey and children of Sparta, Tennessee, spent several days this week with their father and grandfather E. C. Barber.

Mr. and Mrs. G. C. Terrell are visiting relatives in Arkansas. They will be gone several weeks.

Mr. and Mrs. J. O. Covington and children and Mr. and Mrs. Emery Horn left Wednesday for several days visit at Ruidoso, Carlsbad and other points in N. M. and Colorado.

Mr. and Mrs. F. W. Dent and two children, Miss Pauline and Jinks left Wednesday for Colorado where they will spend several weeks.

Alice Gean and J. O. Barnett returned from Bangs, Monday where they have been visiting their grandparents.

Dr. Foote reports the following births: Mr. and Mrs. C. L. Gilbreath, 9 miles west of Sudan, a boy, on July 30th. Mr. and Mrs. J. E. Moore of the Circle-back community, a boy, on July 31st. Mr. and Mrs. Evans, 15 miles Southwest, a boy, on August 6th.

A. C. Davis of Wichita Falls, G. C. Davis of Amarillo, and Henry Davis of Abilene and Mr. Eph Brown of Byers were guests of their brother A. L. Davis and family Sunday. This was the first time the brothers had met together since grown. A lovely dinner was spread and all had a delightful time.

Jess Mitchell of Littlefield Leader was a visitor in Sudan Tuesday.

20 Miles of Forest Fires in Wisconsin

CRANDON, Wis., Aug. 1. — A crackling, hungry flame nearly 20 miles long covered the northwestern corner of Oconto county Thursday and, fanned by a stiff wind, was licking deeper into Forest County and the northern Wisconsin lake country.

Actually there were five separate fires strung out in a wavering line, roughly paralleling the Northwestern Railroad right-of-way. However, with not a single rain cloud speckling the blood red night sky, and the wind that Wednesday was in the southeast early Thursday morning veering to the north, the gaps between the fires were growing smaller.

With more than a thousand state conservation officers and volunteers fighting the flames with ax and shovel to check their inroads on some of the most valuable timber still standing in Wisconsin, the residents of half a dozen lumbering towns were ready to flee.

Fires in Other States
SPokane, Wash., Aug. 1.—One thousand men were fighting forest fires Thursday in Idaho, Montana and Washington under conditions that were made acute by the lack of rains.

New Yorkers kill one another in a stampede to get out of the rain. How that town hates water.—Publishers Syndicate.

Sink High Explosives

The War department says that dangerous high explosives, which cannot be salvaged and have no money value, are sometimes disposed of by dumping them into the ocean. Such ammunition in small amounts has been so disposed of since the World war. The approval of the secretary of war is necessary before ammunition may be destroyed in this way. No act of congress is necessary.

Famous American Actor

Joseph Jefferson was born on February 20, 1829, in Philadelphia. He was one of the most famous of American actors. His chief role was "Rip Van Winkle" in the play dramatized by himself and Dion Boucicault from Irving's tale.

Holds Its Age Well

Scientists at the University of California, after geologic survey of Colorado, Utah and Arizona, claim the world is 75,000,000 years old.

Enough's Enough

No matter how much money a man has, he can only eat three meals a day, wear one suit of clothes at a time and sleep in one bed.—American Magazine.

It Never Comes

One sure way not to get along in life is to say: "I'll show a little more life just as soon as the boss gives me a raise."—American Magazine.

New Brougham Sweeps Clean

"The new brougham, fresh from the factory, skidded," says a Jersey Journal story, "and plunged into a cluster of pushcarts, sweeping them over one by one."—Farm and Fireside.

Littlefield Secretary of C. of C. Resigns

LITTLEFIELD, Aug. 1.—J. W. Ratekin, secretary-manager of the Littlefield Chamber of Commerce has tendered his resignation to take effect Aug. 15, to accept an attractive offer in another city. Ratekin has very efficiently served the Chamber of Commerce of Littlefield since the first of the year and has been responsible for building up a good organization for the city.

FARM CO-OPERATION'S FIELD.

(Fort Worth Star-Telegram.)
Farm co-operatives doing a business of half a billion dollars already have notified the Department of Agriculture of their wish to co-operate with the federal farm board, according to dispatches from Washington. This is a large fraction of the entire farm co-operative establishment. Nevertheless half a billion dollars represents only about 4 or 5 per cent of the output of American agriculture. More than 90 per cent of the business remains to be hooked up with the new program, which indicates how far general co-operation has yet to go before such a project as the federal farm board is organized to promote can be said to be successful.

There are two farm co-operative marketing organizations, each doing an annual business of more than \$80,000,000, while half a dozen others approximate \$50,000,000 each and more than 150 organizations have a turnover exceeding a million dollars. Besides these major organizations there are a great many small or local co-operative associations. But farm marketing is not by any means organized on a co-operative basis to the extent of practice in some other countries, notably Denmark. To a majority of American farmers it is a dubious experiment in theory, while as a practical matter it goes against many of their instincts as men accustomed all their lives to handling their own products as individuals.

This individualistic tradition of farmers is the chief handicap to be overcome by the federal farm board in its effort to bring all American agricultural production into the co-operative field. Farmers have held off from co-operation largely because they lack confidence in centralized management and often distrust the manager, or any manager. Placing the marketing problem under federal supervision will no doubt tend to break down this prejudice among the individualistic farmers. Both federal co-operation and the increasing publicity that co-operation is to receive as a marketing plan will greatly help in popularizing co-operative farm marketing with farmers who have hitherto held off.

Biggest on Plains

Although only two months old, Draughon's College is by far the largest school of its kind on the Plains. It costs no more to get the nationally-known Draughon Training than to attend some small, unknown school. Clip and mail this ad for Special Opportunity today. Draughon's College, Lubbock, Texas.

Sore Gums — Pyorrhea

Foul breath, loose teeth or sore gums are disgusting to behold, all will agree. Leto's Pyorrhea Remedy is highly recommended by leading dentists and never disappoints. Drugists return money if it fails.—H. G. Ramby Drug Store.

Mr. Hoover criticized Al Smith so vigorously in the course of the late unpleasantness for believing in state socialism that we guess the \$500,000,000 farm relief plan must be some other kind.—Ohio State Journal.

GENUINE ANTIQUES.

A certain small restaurant was kept by a man who prided himself on his cooking. He was amazed to hear a young salesman criticize a pie, one day.
"Pie, young feller? Why, I made pies before you were born."
"O. K. But why sell 'em now?"—Mintreal Star.

Take the Right Route

The rich can spend money and last quite a while.
Can live in great splendor and put on the style;
But the rich have license to live rather high.
While those without means had better not try.
So if you are trying to live like the rich,
And you are not able, then you better switch
To the manner of living your income will bear.
Those who mimic the rich never get anywhere.
The First National Bank has found without doubt
When you live too high you take the wrong route.
