INSURANCE - REAL ESTATE

# You may pay more...

· A wholesale firm is one which sells in quantities to a retailer who intends to re-sell the merchandise to his individual customers.

· The reason the wholesaler can sell at wholesale is because he does sell in quantities - and does not have to deal directly with each individual retail customer.

· A good question to ask then is: How can a wholesaler print and distribute thousands of catalogues to individual consumers, stand the cost of each sales transaction and still sell at "wholesale" prices?

The answer is: He can't. He is mis-using the word "wholesale."

By actual comparison, the cost of some merchandise listed in such catalogues is even higher than that charged for comparable items by the retailer.

CAUTION-CHECK THE PRICES IN THE "Wholesale" Catalog YOU MAY SAVE MONEY!

There is no such thing as "Wholesale" prices to the buying public,

.. no merchant can stay in busi ne price he pays for it."
