

ROAMING THRU RANGER WITH LION ...

By Ronald Waters

JULY 4th—meant a great deal more to us about 10 years ago than it does now. Somehow, the fire crackers, noise and excitement, the roman candles—and all—don't excite us the way they use to do.

Closed on Independence day will be the bank, Post Office, most businesses in Ranger (including the Times.) Everyone that has any sense will declare it a Holiday, and spend their time fishing and skiing at Lake Leon.

Unfortunately, I'm going to work that day.

OUTSTANDING BASEBALL PLAYERS — in the Little League and Teen-Age League will be selected near the end of the present baseball season.

No details yet, as this is all in the planning stage. However, I think it safe to say that the outstanding player in each team will be selected by a secret committee, along with the runners-up.

COOPERATIVE EFFORT can accomplish most anything. It can pave roads, build hospitals, raise funds, and "move mountains".

But the lack of cooperative effort on building a ski jump at Lake Leon is appalling. With some measure of cooperation, a ski jump would be ready and waiting for the Celebration this Friday.

So far as this writer knows, no ski jump will be in the lake—then—nor will it be for some time. According to reports, three or four groups are planning to build the jump, and others have offered to donate materials. But that's as far as it goes—and the whole thing is "getting no where".

So it seems—that like the spunkies—cooperation, by all these various groups, is the necessary ingredient.

See that Virgil Moore of the Eastland Telegram wants us to come up with a fig story. Unless he wants a "fib", instead of a fig, he'll just have to wait for us to be last with a report.

Kennel Gene Baker of The Gorman Progress claims that H. D. Martin brought in a fig, weighing six and one-half ounces and measuring nine by 10 inches. Jerry Sittin of The Cisco Press says that Harvey Holloway and R. W. Spearman each brought figs by "... easily as big as pears."

Come on—Ranger—we can't let them beat us!

Glen Crousen of Breckenridge caught a seven-pound blue cat on a trot line.

Car Collision Injures Ranger Woman Here

A Ranger woman was injured and two cars seriously damaged when a blow-out caused a California couple's car to swerve into the path of an on-coming car, Saturday afternoon, at the intersection of Cooper and Highway 89, near the National Guard Army in Ranger.

Injured was Mrs. Dorothy T. Nelms, 25, driver of a two-door '53 Oldsmobile. She was taken to Ranger General Hospital, treated for cuts and bruises, and released. Two small daughters were also

rushed to the hospital, after being thrown from the car, and treated for cuts and bruises.

Driving the approaching car was Betty Virginia McMahon, 38, of Los Angeles, Calif. She was driving a '58 four-door Buick, going east, with her husband asleep in the back, and 3 children, when the accident occurred. The car swerved over into the opposite lane to strike the '53 Oldsmobile, driven by Mrs. Nelms.

According to investigating officers, the Oldsmobile was knocked over to the side of the road while the Buick went across the ditch and landed on the other side, about 35 yards away.

Damages were estimated at \$1,200 for the Buick. The Oldsmobile, belonging to A. T. Barron of Stephenville, was a total loss.

A celebration at Lake Leon will draw most of the crowds, Friday, with a Fishing Rodeo, B o a t Parade, and other events planned for the day.

Local Police officers urged area residents to drive with caution on the Fourth, whether in town or on trips. Over the nation, officials were predicting a heavy highway toll.

Rangerites will observe the Holiday weekend with firecrackers, picnics, water sports, and out-of-town trips.

They had been driving to local service stations, attempting to trade tires and collect the difference in money. According to Police reports, the stolen car—a '51 Dodge—was taken from a Birmingham garage Friday morning.

Messages have been sent to the owner, in Alabama, and to the FBI in Abilene. Abilene officers will handle the case.

Dates and Prunes Are Sure-Fire Dessert Hits

BY DOROTHY MADDOX

Like dates and prunes in desserts? If you do, you'll enjoy these two very good recipes.

Date-Brownie Fudging (8-10 servings)

Three squares unsweetened chocolate, 2 tablespoons shortening, 1 cup sifted flour, 2 teaspoons double-acting baking powder, 1 teaspoon salt, 1/2 cup sugar, 2 1/2 cups milk, 1 teaspoon vanilla, 1/2 cup chopped dates, 1/2 cup chopped nut meats, 2 cups water, 1 1/4 cups sugar, 1 square unsweetened chocolate.

Melt 3 squares of chocolate and shortening together. Cool. Sift flour, measure, add baking powder, salt, and 1/2 cup sugar and stir again. Add milk and vanilla.

Mix until smooth. Stir in cooled chocolate mixture, dates and nuts. Pour into greased 8x8x2-inch pan. Combine water, 1/2 cup sugar and 1 square chocolate in saucepan.

Place over medium heat and stir until sugar is dissolved and chocolate is melted. Bring to a boil. Pour over top of batter. (This makes a chocolate sauce in bottom of pan after pudding is baked). Bake in moderate oven (350 degrees F.) 40 to 45 minutes.

California Vineyard Pie (1 9-inch pie)

One and one-half cups cooked prunes, 1/4 cup port or sherry wine or water, 1/4 cup orange juice, 1 teaspoon grated orange rind, 2 tablespoons lemon juice, 1/2 cup prune cooking liquid, 1/2 cup sugar, 1 tablespoon butter or margarine, 2 tablespoons cornstarch, 2 tablespoons cold water, pastry for 9-inch crust and strip top.

Whipped cream tops this delicious date-brownie pudding. Look good? It is, and easy to make, too!

pan. Combine wine, orange juice and rind, lemon juice, prune liquid, sugar and butter and heat to boiling. Add cornstarch mixed with water and cook and stir until mixture boils and is thick. Pour over the prunes. Cover pie with strips of pastry. Bake about 25 minutes in a hot oven (425 degrees F.).

The Average Individual-
... gives little thought to the question of values when he should measure them in terms of personal worth in everything he buys, enjoys or does. For example, some folks will buy real estate without an abstract disregarding the fact that the principal value of the purchase is in the title, not in the land itself or the improvements thereon. This kind of thinking costs property owners thousands of dollars annually which loss could be saved and the savings wisely spent for abstracts of title.

Vets Buying More Land

AUSTIN — More veterans are buying land every month through the Veterans' Land Program, says Commissioner Bill Allcorn reports this week.

In March, the Veterans' Land Board bought 37 tracts of land in Texas ex-servicemen. In April this number increased to 95, and in May the Board bought 127

tracts.

Through June 20, 118 tracts have been purchased through the Program, and before the month is ended, this figure was expected to rise to 175.

In October, the Board expects to level off its purchases at about 250 tracts a month, Allcorn says.

The land is being bought with money from three sales of Veterans' Land Bonds since December 1957, which have made \$37 1/2 million available for land purchases.

Forget the Fifth!

Washington, D. C.—My friend and colleague, Jim Wilson, representing the Fort Worth Congressional District, quoted Henry Ward Beecher last week at a most appropriate time.

On an occasion and in an atmosphere similar to the one now prevailing, the illustrious Henry Ward Beecher said:

"Political dishonesty breeds dishonesty of every kind. A state of mind which will intend one fraud, will, upon occasion, intend a thousand. He that upon an emergency ill lie, will be supplied with emergency. He that will perjure himself to save a friend, will do it in a desperate juncture, to save himself.

"Circumstances may withdraw a politician from temptation to any but political dishonesty; but under temptation, a dishonest politician would be a dishonest neighbor, would be dishonest anywhere, in anything. The fury which destroys an opponent's character, would stop at nothing, if barriers were thrown down.

"Political dishonesty in voters runs into general dishonesty, as the rotten speck taints the hole apple. A community whose politics are conducted by a perpetual breach of dishonesty on both sides will be trained by immorality throughout. Men will play the same game in their private affairs which they have learned to play in public matters. The guile, the crafty vigilance, the dishonest advantage, the cunning sharpness; the tricks and traps and sly evasion; the equivocal promises, and unambiguous neglect of them, which characterize political action, will while the parlor remains clean.

"Let the hand of discipline smite the leprous lips which shall utter the profane heresy: All is fair in politics."

The Congress has recently provided benefits for widows of Confederate veterans. The names and addresses of the estimated 1500 widows are not known.

Members of Congress have been requested by the Veterans Administration to report to them anyone eligible to receive the pension. Anyone knowing of a widow of a Confederate veteran should contact me, and the widow's name will be submitted for consideration for the pension.

The United States Weather Bureau has recently inaugurated new radar detection equipment. It is a system of radar which can sight and track tornados at a distance of 70 miles away.

The Stretch of country from the Gulf Coast of Texas and Louisiana north is known as "Tornado Alley." Something like 90 percent of all tornados are reported to originate in this general area.

The Air Force operates its own warning system. New scientific devices are used for early detection.

No way has been devised to successfully break up and scatter a tornado, but scientific research is under way towards that purpose. The new detection system, however, can warn people in time for them to take safety precautions and reduce loss of life.

According to some of the trade papers and particularly the Wall Street Journal, the 1959 automobiles will show the biggest style changes since 1953.

695 Pounds of Dairy Products Is Average

CHICAGO — In 1957, if your eating habits were average for the United States, you consumed milk and other dairy products which utilized 695 pounds of milk produced on the farm, says the National Dairy Council.

Divided into individual dairy foods, your purchases last year were as follows: 24 quarts of liquid milk and cream; 8.5 pounds of butter; 7.8 pounds of cheese; 15.1 pounds of evaporated and condensed milk; 5.7 pounds of non-fat dry milk; 19.8 quarts of ice cream and other frozen dairy products; 5.7 pounds of cottage cheese; 5.4 quarts of fluid nonfat milk; 16.4 quarts of buttermilk; and 4.1 quarts of chocolate milk.

For the above-listed foods, you spent about 29 cents of each food dollar—or 20 percent of your food budget. But for this investment, you received many essential nutrients in excess of that percentage. For example, dairy foods contributed to the national food supply 26 percent of the available protein, 23.5 percent of the fat, 77.6 percent of the calcium, and almost 48 percent of the riboflavin. Weight watchers will be interested to know that all dairy foods combined contributed only 16.7 percent of the calories offered by America's food.

How much milk was produced by dairy farmers in 1957? The answer—contained in the dairy organization's just-published 1958 edition of "How Americans Use Their Dairy Foods"—is 126.3 billion pounds. This all-time record

production was accomplished with only 20.5 million cows, a smaller herd than the United States has had at any time in the last 40 years. The increased total production is due to greater milk yield per cow—a 3 percent increase over 1956 to an average 6,162 pounds per dairy animal.

This is a reflection of a long-term trend in which dairy farmers, through improved breeding and feeding practices, have increased the efficiency of each cow. Had the 1957 herd produced only at the 1925 rate per cow, 50 percent more cows would have been needed to meet the production record of 1957.

The sharp decline in the "real" price of milk—as contrasted to the increase in the money price of milk—is demonstrated in the following facts: In 1880, milk retailed at an average 7 cents per quart. Despite this low price, the average factory employee had to work about 25 minutes to earn wages equal to the price of a quart of milk. By 1929, it took 15 minutes of factory work to earn a quart of milk; in 1947—10 minutes; and in 1957 only 7 minutes, the dairy publication reveals.
