## GOVERNOR HAWLEY ATTACKS PRESIDENT

### SAYS TAFT'S INTERFERENCE HAS BROUGHT JUSTICE INTO DIS- REPUTE AND WEAKENED COURTS.

## COLLUSION IS CHARGED

### Says U. S. Department of Justice Has Usurped Functions of the State.

By Associated Press.  
Boise, Idaho, Nov. 15.—Governor James H. Hawley today gave out a signed statement addressed to the people of Idaho condemning President Taft for pardoning Clarence W. Robnett, a bookkeeper in the National Bank of Lewiston, Idaho. Robnett was convicted of embezzling the bank's funds and sentenced to ten years imprisonment, but never entered on the service of his sentence. Governor Hawley says, "I am not surprised at the pardon. In fact no act ever done in connection with the courts of Idaho has brought justice into disrepute and weakened the courts in the estimation of our people as the injustice of the action of the president inspired without doubt by special prosecutors. It will long rank in the minds of the citizens and inspire them with a wholesome contempt for such disgraceful methods."

He says the United States attorney general's assistants have been usurping the functions of the United States attorney and have been running cases in which the United States is interested.

"For more than four years," he said, "important cases in which the United States has been interested the regular prosecutors of the cases have been retired and special assistants to the attorney general have been in full control without the slightest interest in our state, caring nothing for our people and simply desirous of establishing reputations in the department of justice, these special prosecutors have done more to injure Idaho and retard development since the fall of 1907 than all other causes combined. It is probably unfair to blame the president directly for this unspeakable action as he undoubtedly acted at the request of General Wickorsham who has evidently been in collusion with his associates in charge of the prosecution."

## DEATH PUNISHMENT IS ASSESSED

### No pro Found Guilty at Cold Springs With Others He is Moved to Huntsville for Safe Keeping.

By Associated Press.  
Cold Springs, Texas, Nov. 15.—The jury in the case of Ernest Sewell, charged with the murder of Charles Davidson, at Shepherd, three weeks ago, returned a verdict of guilty this morning, fixing death as the punishment. The case against the other four negroes was continued and they will be moved from under the rangers protection to the Huntsville penitentiary.

A motion for a new trial will be filed in Sewell's case and on failure to secure it an appeal will be made. The removal of the prisoners obviates the necessity of keeping the thirteen rangers under Captains Ford and Sanders on duty here at present. All is orderly and no outbreak is feared.

## Right of Way Contracts Closed to Point 6 Miles North of Beaver City

Frank Kell, vice president and general manager of the Wichita Falls & Northwestern has just returned from the "front" where he closed contracts for right of way to a point six miles north of Beaver City in Beaver County, Okla., near the Kansas line.

## REVIVAL WORKERS CALLED INTO CAMP

Evangelist Ham spoke last night from the question "Am I My Brother's Keeper?" He showed that every person was held responsible under the state law for the peace, health and happiness of every other citizen and as a result of a willful intention to cause such or a careless indifference and neglect to property safeguard him against the same, constituted a crime under the statutes. "So," he said, "in the spiritual realm, God has commanded His people to warn the sinner of his coming doom and if you fail to warn him and he dies in his sin, God will require his blood at your hand. Just how we do not know. The only way for your skirts to be clear of the stain of lost souls when you stand before the great Judge is to acquire yourself by never failing to warn those with whom you come in contact and by taking advantage of every opportunity to lead them to Christ."

A halt has been called in the aggressive work of saving the lost, pending the completion of the tabernacle and the evangelist has called the forces in a sense into camp to recuperate strength and get additional training to the end that the battle may be renewed with greater earnestness Sunday and pushed even more zealously than at any time in the present campaign.

## SPECIAL SERVICES

Today noon a service was held at the Denver round house.

Tonight at the church the men of the city who are interested in this revival campaign are requested to meet the evangelist for the purpose of planning for the work to be done in the immediate future.

Tomorrow morning at ten o'clock Evangelist Ham will conduct a service dealing with the "how" of personal work in which numerous passages that apply to various conditions will be given. Persons attending this service may ask how to meet any special difficulties they have encountered and receive the help of the evangelist in meeting them with Bible quotations.

## ANOTHER ELECTION ON COUNTY SEAT QUESTION

### Voters of Waurika Allowed Outsiders to Mark Ballots, So All Are Thrown Out.

Oklahoma City, Okla., Nov. 15.—The Ryan-Waurika county seat case, one of the most hard fought of all those which have arisen since statehood, will have to go to a new election under the decision of the supreme court Tuesday, to the effect that neither town received a majority of all votes cast at the last election. The towns are in Jefferson county.

In the case the court passes for the first time on the question of whether the statute governing county seat elections is directory or mandatory. Under that ruling the entire vote of Waurika precinct is eliminated, so far as being counted for either candidate, because of the fact that the election inspectors placed blank affidavits in the hands of outside parties, who filled them out for voters at a table 100 feet from the polls, after which they were sworn to by the voters before the election commissioners.

With these votes thrown out, the court finds that Ryan received 1,461 legal votes and Waurika 1,047, but when the 549 votes cast at Waurika are added in to find the whole number cast, it is held that neither side obtained a majority.

## SPECIAL OIL RATE BEFORE COMMISSION

### MR. WEST JUSTIFIES FIVE CENT RATE FROM WICHITA FALLS TO DALLAS ON ACCOUNT OF TONNAGE.

## NO DECISION REACHED

### Chairman of Commission Apparently Believes Special Rate is Discrim- inatory.

Austin, Texas, Nov. 15.—Whether or not specially lower oil rates are of public benefit was the most important question discussed at yesterday's monthly hearing of the Railroad Commission, though there were a number of minor matters considered, and in quite a few instances the commission indicated its decision.

It was the commission's proposition to cancel all special rates of crude petroleum now in effect in Texas and the new rates raised by the Fort Worth and Denver and Trinity and Brazos Valley when they learned some weeks ago that the Katy had secured the approval of the rate of 5 cents per hundred on oil from Wichita Falls to Gates, the Texas Company's refinery station, just outside of Dallas.

The Texas Company applied for that rate from Electra to Gates, but was turned down. Electra is about thirty-five miles from Wichita Falls on the Fort Worth and Denver, and an oil field has been opened there. The Texas Company proposes to build a pipe line to connect with the Katy at Wichita Falls and get the oil out that way, using the 5 cent rate. The other lines protested.

General Freight Agent West of the Katy supported his rate and the other lines were quiet, except that the Cotton Belt said it does not participate in any low rate anywhere. The oil producers made a vigorous fight for their retention of the specials, arguing that they were very small producers, the independent producers, the competitors of pipe lines, new and small fields, and the consumers over the State.

The commission, at least the chairman, said the low rates were made in the interest of the large oil concerns and small consumers, like cotton seed oil mills, and four mills did not get the low rates.

The answer was quickly given as above stated that consumers and small producers and pipe line competitors are benefited, and Mr. Wallis of the Higgins Company filed a strong petition.

The opposition of Mr. Sterley was based on revenue decrease, insisting that if the 5 cent rate stands the rates to other refineries will come down, meaning a reduction of 50 per cent.

The oil producers apparently reading a termination on the part of the commission, asked that if the rates are to be canceled that sufficient notice and time be given to fill contracts based on existing rates, pleading for at least six months to close them out.

## DATA CONCERNING GEOLOGICAL SURVEY

### Interesting Facts About the Copper Ores Found in Wichita and Archer Counties.

Special to the Times.  
Austin, Texas, Nov. 15.—The following bulletin concerning the survey of the Electra oil field now being made by the Bureau of Economic Geology of the State University was issued today:

During the last several months a great deal of activity has been shown in this district. Not a few experienced oil men were, to say the least, not entirely optimistic concerning it. It is not too much to say that up to a month or six weeks ago there were hopes instead of realizations. But during this time and within the last three weeks the situation has changed radically and for the better. It is likely that the present production touches the 9000 barrel mark and that the Electra field is now the largest producer in Texas, with the Humble field, north of Houston, second.

The investigations which this Bureau has now in hand, in that oil field, will be of the greatest value in its development and for the reason that a large number of well records have been turned over to us for study and comparison. These records are not generally available, nor has any attempt been made to correlate them until this time. There has been little or no study of the oil and gas fields of Clay and Wichita counties from the standpoint of structural geology and it is in this connection that the cordial co-operation of the producing companies is of so much value.

The supply of good drinking water at Electra has not been at all satisfactory, but the recent organization of the West Springs Water Company promises to correct this. This company will pipe good water in from some springs that are about 8 miles north from the town.

Since the publication of our Press Letter No. 13, November 1st, we have had letters of inquiry concerning the copper ore that occurs within easy reach of these oil and gas fields. As early as 1874 more than 10,000 pounds of high-grade copper ore was sent from this district to the Schuykill Copper Works, and the different lots averaged nearly 60 per cent of copper (Texas Geological Survey, Section Annual Report, 1890, p. 450). Some of the ore, from Archer county, was used for making gun caps for the Confederate Army.

In the Report just quoted the statement is made that several hundred tons of the better grade ore was mined and shipped to Philadelphia and Baltimore somewhere between 1865 and 1874, the distance to a railroad, in some cases being two hundred and fifty miles.

General Geo. B. McClellan, who died in 1885, was with Captain Marcy in the Red River Expedition, in 1852 and had his attention called to these ores at that time. In 1882 to 1884 he organized a company for exploiting and working them, but owing to a misapprehension as to their nature and the almost total lack of transportation facilities, the enterprise did not succeed.

With the coming in of cheap fuel and the opening of the region by several lines of railroad, traversing the ore regions, it would appear that some at least, of these rich copper deposits could be utilized.

WM. B. PHILLIPS,  
Director Bureau of Economic Geology and Technology.

## HIGH OIL RENTALS.

### Two Million Dollars is Sum Collected in Tulsa County, Okla.

Tulsa, Okla., Nov. 15.—Statistics just complete show that farmers of Tulsa county received the past year in oil rentals the sum of \$2,000,000. As the scope of proven oil territory will be widely enlarged by the development of the new Perryman pool, southeast of this city, and by numerous wildcat ventures now in progress, the farmers of this county will fare better even in oil rentals the coming year. Within a radius of fifty miles of this city during the past year 51,000,000 barrels of crude oil was produced, or one-seventh of the total oil production of the world. This production was marketed for \$24,000,000. Development has been stimulated by high prices.

The young women's prayer service will be held at the Y. W. C. A. Rest Room tomorrow morning at 11:30 o'clock. Merchants are requested to allow their young lady clerks a recess to attend this service.

## ROAD BOND BIDS WERE REJECTED

### COMMISSIONERS BELIEVED OF FERB FOR \$150,000 ISSUE WERE TOO LOW.

## FOR PAR AND INTEREST

### All Bidders Asked Allowance for At- torney's Fees and Other Ex- penses.

The county commissioners today rejected all bids made for the \$150,000 road bonds voted in Precinct 1 and will again call for bids. The date upon which bids will be received had not been set late this afternoon. The bids were rejected because the commissioners believed them too low and there was doubt whether their acceptance would be legal.

The Provident Savings Bank bid par and accrued interest, provided they were allowed \$5,250 for attorney's fees and other expenses.

The Harris Trust and Savings Co. of Chicago, bid par and accrued interest, provided it was allowed an amount hereafter to be agreed upon for furnishing the blank bonds, attorney's fees, etc.

Hohler and Cummings of Toledo, Ohio, bid \$150,000, under condition they be allowed \$5,250 for expenses.

The Fidelity Trust Company, of Kansas City, bid \$150,000, upon condition that the money was to be paid in certain instalments but that the bonds were to be issued to their credit and placed with the county treasurer.

L. D. Lanning of Kansas City, bid par and accrued interest upon \$100,000 of the issue with the condition that he receive \$3,000 for attorney's fees and expenses.

## HAULING A RIG TO THE FASSETT RANCH

### Special to the Times.

Iowa Park, Texas, Nov. 15.—An oil rig was hauled out to the Fassett ranch, southwest of here yesterday, where work on a well will begin at once.

Quite a number of families have been moving into the Park recently. Nearly all the empty houses are now occupied.

Rev. and Mrs. H. B. Johnson and their two boys left yesterday for Gainesville to attend the North Texas Conference which commences today.

Grandma Winfrey who has been visiting in Dallas county, returned to the home of her son, Mr. J. B. Winfrey last week.

Mrs. W. L. Law returned Friday from a trip to Spur, where Mr. Law now is on business. They are thinking of locating in Spur.

Miss Emma Kate Urbach of Gold-waith, Texas, stopped off here to spend the first of the week before going to Electra, where she has a position as bookkeeper.

Miss Burns from Brownwood, the new principal of the school, arrived last week and began work Monday.

Mr. Tom Corridon of Wichita Falls, spent Sunday in the Park.

Mr. F. L. Emanuel of Dallas, was in the Park on business the first of the week.

## AUTO FACTORY A SCENE OF ACTIVITY

The Times representative had occasion to visit the auto factory today and found this new industrial institution a scene of much activity. Through the courtesy of the officers in charge he was shown through the factory in its entirety.

Work is progressing nicely and while the main factory structure is now completed there is much more building of a minor nature to be done on the grounds before the factory as a whole will be completed.

The main building is a large, well ventilated brick and metallic structure and of course modeled especially for factory purposes being well provided with light. The flooring consisting of creosoted wood blocks which is said to be superior to any other flooring material for factory buildings.

The major portion of the great machines designed to make automobiles are now in position, and working, some so intricate as to be almost beyond human conception. Machines that snap and trim steel with as much apparent ease as one would point a pencil, are daily performing the function of their intention.

In the paint and upholstering department many different designs and types of body for the "auto trucks may be seen, some finished, some in course of construction and all with lines of gracefulness as well as being provided with the greatest amount of convenience and accessibility, which is to be a glaring feature of the auto truck designed and constructed by the company.

In the chassis department one may see the construction of the frames from the cold steel to the finished article.

However, the mechanical end of the factory is the most interesting feature to one who understands the details of mechanical construction. Here trained mechanics with an adeptness born only in the mechanical brain handle the great machines and shape with the minutest accuracy the delicate parts of the motors.

The capacity of the factory under full capacity will be from five to eight cars daily, and while no cars have been turned out yet, it is no far distant day when one may see autos that are constructed in their entirety in Wichita Falls and made by men who are citizens of this city.

The factory is an interesting sight to anyone who cares to go out, and the hospitality of employees and officers in charge makes a visit to the factory indeed a pleasure.

## REBELS RESPECTING FOREIGN PROPERTY

### By Associated Press.

Amoy, China, Nov. 15.—The republicans who took possession of the city yesterday have issued an address to the foreign consuls in which the neutrality of the consuls is requested. Assurance is given that their property, including churches will be protected. The city is quiet today.

The American cruiser, Saratoga, and gunboat, Quires, will sail for the north. The British cruiser, Monmouth, is relieving the British sloop Rosario. Hai Cheng on the mainland, southwest of Amoy, has gone over to the revolutionists. The city magistrate has been made a prisoner. Chang Chow, 24 miles west of here reports fighting there. Word comes from Tsuan Chow, a seaport fifty miles northeast of Amoy, that the local officials have fled and the rough element is in control.

M. Dobson, a prominent citizen from Burkburnett, was a visitor in the city today.

## Buffalo Man Leases 308 Acres From J. A. Fisher, Paying \$9,240

S. C. Reed of Buffalo, New York, has leased 308 acres out of section 24, H. and G. N. R. R. survey from J. A. Fisher, the Electra merchant, paying a cash mous of \$9,240. The tract in question is located south of the Fort Worth and Denver railroad about three miles southwest of Electra. The field is now being developed in that direction.

Miss Sylvia Lacik returned to her home in Mangum today, after a pleasant visit with friends in the city.

## BEATTIE'S LAST HOPE SWEEP AWAY

### ELECTRIC CHAIR NOW AWAITS SCION OF AN OLD AND RE- SPECTED VIRGINIA FAMILY.

## WILL NOT INTERFERE

### Governor Mann Refuses Commuta- tion of Death Sentence of Young Wife Murderer.

By Associated Press.  
Richmond, Va., Nov. 15.—Governor Mann today declined to interfere in the case of Henry Clay Beattie, Jr., and the young wife murderer's last hope of escaping the electric chair was swept aside.

In a signed statement Governor Mann said in part: "I followed the case during the trial and as its horrible facts were developed, regretted that a crime so cruel and malicious should have occurred within the confines of the State. That Beattie is guilty of the willful, deliberate and cruel murder of his young wife I have not the slightest doubt nor is it insisted there shall be any greater relief offered than a commutation of his sentence to imprisonment for life. I do not think the affidavits of Paul Beattie or any other evidence brought to my attention are sufficient for that purpose. To grant a respite would be to set precedent to temporize with the law and encourage appeals to the supreme court with the sole purpose of gaining time. I believe the best way to prevent such crimes is to punish them adequately and speedily, therefore the judgment of the circuit court of appeals will be carried into effect without interference from me."

## Prominent Wise County Farmer Dead.

Special to the Times.  
Decatur, Texas, Nov. 15.—Rube Studdard, a prosperous farmer who lived northwest of Decatur, died yesterday. The day before Mr. Studdard was found unconscious on the road between his home and Alvord. He was returning from Alvord when he was struck by what is supposed to have been apoplexy. He was found by a neighbor and taken to his home, where he died in ten hours.

## WILBARGER COUNTY FARMER SUICIDES

Special to the Times.  
Vernon, Texas, Nov. 15.—Yesterday about noon Thos. Kincheloe, a well known young farmer, committed suicide at his father's farm about ten miles southwest of town by shooting himself through the heart with a 38-Cal. revolver. The funeral takes place here this afternoon at 2:30 o'clock.

A brief note left by the dead man explains his rash act by saying that troubles and debt were the cause. The note was concluded by committing the two little children of the deceased to the care of his mother, Less than a year ago Kincheloe's wife died, leaving two small children, and it is thought that this and a protracted illness from which he had only recently recovered, were the principal causes of self-destruction. The Kincheloe family are known to be well fixed financially and it is not believed that money matters could have furnished a motive for suicide.

The dead man was about twenty-five years of age.

Dr. R. L. Miller came in last night from Fort Worth, where he had been on professional business for several days.

## W. M. BROWN, SR. DEAD AT HOME AT ELECTRA

W. W. Brown, Sr., father of W. W. Brown, the Electra banker died at that place at five o'clock Tuesday afternoon after an illness with cancer of the stomach.

His body was taken to Vernon, where the funeral was held this afternoon.

### About Overcoats

The perfect hang or drape to an overcoat is essential to its appearance. The coats hang from the shoulders and are cut full and roomy. The collars hug the neck like a sweetheart, while the shoulders are as broad as an athlete's. Our New York-made overcoats have all the essential style features. Plain and fancy materials in various lengths and all sizes. Tailoring outdoes its previous best in these coats.

## Map Showing Latest Locations of Oil Wells in This Section

So many calls were received for copies of The Times containing the map showing the locations of oil wells in Northwest Texas, that we are here with reprinting the map, showing additional locations at Newcastle, Loveland, Davidson, and Iowa Park, all of which have been made since the printing of the first map last week. Since this map was prepared yesterday a report has been received to the effect that a well is to be put down at Dean, southwest of Petrolia.

### The Trend of the Electra Oil Field

By W. M. Stephenson, Batson, Texas

When the Beaumont gusher began to spout forth its liquid lucra, on that memorable 10th of January 1901, it became intensely interested, and from that day to this have delved into the secrets of nature regarding the origin and location of oil. I believe that I have not only arrived at the true origin of oil (see Gypsum Theory by W. M. Stephenson, in Oil & Gas Journal, April 27, 1911), but have also discovered the true trend of all of the oil fields of the world, both known and unknown. There is a natural law governing the deposition and accumulation of petroleum. I claim that oil is found in paying quantities only on anticlines which traverse or cross old sea beds; the anticline must parallel the nearest granite mountain system. If that be true, and it unquestionably is, then the longer axis of the Electra oil field will be in the same direction as the Wichita Mountains on the north, which direction is approximately west 30 degrees north. The oil fields in Pennsylvania, West Virginia, Ohio, etc., are on the western flank of the Appalachian Mountains and the trend or longer axis of all of the oil fields in these states extends in a northeast and southwest direction. They extend so, because the foot-hills of the mountains extend in that direction. All oil men who have been raised to the oil business in Pennsylvania, West Virginia, and other eastern fields, know absolutely know that oil runs northeast and southwest, but they do not know why and because it runs northeast and southwest in state with which they are familiar, they think it runs northeast and southwest over the whole oil world. It does not run or have its general trend northeast or southwest at any place except where the nearest granite mountain system trends in that direction. In California the oil fields of Panoche, Coalina, Devils Den, McKittrick, Midway and Sunset, are located on the Tumbalos, which are foot hills of the West Coast Range and all trend in a northwesterly direction with the West Coast Range exactly opposite to the trend of the oil fields in Pennsylvania, etc.

By making a long article of this I can show conclusively (I have the hope as the oil man says), that the fields of the world parallel the main mountain systems. An oil man from Pennsylvania, drilling in this country will always make the fatal error of drilling northeast of the pool. One cannot blame them though, for its but natural that they should fall into this error, but he who drills northeast of any pool found along either side of Red River takes greater chances than he who drills northwest for all of the pools yet to be found along the Red River, both on the Texas and Oklahoma side will trend west 30 degrees north, or approximately north-west, and the reason is as above stated, because the Wichita Mountains so trend.

### JEFF DAVIS OPENS SENATORIAL CAMPAIGN

Little Rock, Nov. 15.—United States Senator Jeff Davis went to White County today to deliver the opening speech in his campaign for re-election. His successor will be chosen by the legislature to be elected next year and an interesting contest is in prospect. The situation has been somewhat simplified by the announcement of Governor Donaghey that he would be a candidate for renomination. For a long time doubt existed in the minds of the politicians as to whether the governor would try for another term or become a candidate for senator. His decision in the matter has left the senatorial contest a straight race between Senator Jeff Davis and former Congressman Stephen Brundidge, Jr., who is expected to be his only opponent. Mr. Brundidge represented the second district in Congress for two years and has a strong following throughout the State.

### FREE IF IT FAILS.

Your Money Back If You are Not Satisfied with the Medicine We Recommend.

We are so positive that our remedy will permanently relieve constipation, no matter how chronic it may be, that we offer to furnish the medicine at our expense should it fail to produce satisfactory results. It is worse than useless to attempt to cure constipation with cathartic drugs. Laxatives or cathartics do much harm. They cause a reaction, irritate, and weaken the bowels and tend to make constipation more and more chronic. Besides, their use becomes a habit that is dangerous. Constipation is caused by a weakness of the nerves and muscles of the large intestine or descending colon. To expect permanent relief you must therefore tone up and strengthen these organs and restore them to a healthier activity.

We want you to try Rexal Order or our recommendation. They are exceedingly pleasant to take, being eaten like candy, and are ideal for children, delicate persons, and old folks, as well as for the robust. They act directly on the nerves and the muscles of the bowels. They apparently have a neutral action on other associate organs or glands. They do not purge, cause excessive looseness, nor create any inconvenience whatever. They may be taken at any time, day or night. They will positively relieve chronic or habitual constipation, if not of surgical variety, and obviates of associate or dependent chronic ailments. If taken with regularity for a reasonable length of time. 12 tablets, 10 cents; 36 tablets, 25 cents; 80 tablets, 50 cents. Sold in

### We Have Been Silent for Some Time But Now We Are Sounding Our Trumpet—

We have had very little to say this summer as we have been reducing our stock, so we could not have a new clean stock. Now we wish to state we have the goods ready for delivery; we are not asking any one to wait till we can order; the goods are here and arriving daily. We will have more to show you this year than last as our business has increased ever since we have been in business here. SATISFIED CUSTOMERS IS THE REASON. We are not running a junk shop but a first class Jewelry Store. WATCH OUR ADS. It will mean money to you as well as the best selection on the Denver road. WE HAVE BARGAINS but nothing to give a way. Diamonds, the largest stock in West Texas. We live honestly direct from the cutters and can save you the middle man's profit. A. S. FONVILLE Jeweler and Manufacturing Optician.

### IN OUR NEW LOCATION

We have moved our furniture store from 721 Indiana avenue to the News building on Seventh street. The new location gives us more room and a much better opportunity to show goods. We are carrying a larger stock than ever of NEW AND SECOND HAND FURNITURE, STOVES, RUGS, MATRESSES, AND HOUSEHOLD FURNISHINGS, and selling at lower prices. Come in and see.

### Moran's Furniture Store

### You Will Appreciate My Meat Service

Perhaps beef, pork and veal wherever you see it looks a great deal alike to you. There is quite a similarity in the GENERAL appearance of all beef, but when you get on the table you have no trouble in telling the difference quickly. You would probably be startled if you could figure up the money you have lost in the past year on meats of all kinds because they were either tough, tasteless or for other reasons the family did not like it well enough to eat it all and you had to throw a considerable part away. You won't get any meats of that kind at my meat department. My meat buyer is an expert in selecting and cutting and you can bank on always getting your money's worth. Ring up and tell me your favorite cut of meat and let me send it as my meat cutter prepares it. I'm sure it will be very satisfactory to you. Give me your meat and grocery orders together—all delivered at one time.

Rohatch's Mineral Water. is highly recommended by physicians and patrons who have tested its merits, for indigestion, catarrh of the stomach, kidney and bladder trouble. This water stimulates the secretions of the stomach, increases digestion and favors a more complete absorption of the food, and prevents the ac-

tion of germs that cause typhoid and other infectious diseases. This water can be purchased at the wells or delivered in jugs or cases. This well is located one mile south of Adams school building in Floral Heights, two deliveries daily morning and afternoon. O. J. Rohatch, Owner. Phone 1601—1 long—4 shorts.

### Spooks in the Storm Sewer

There was considerable suppressed excitement at the city hall this morning over the report that a negro is hiding in the storm sewer.

G. D. Samples, and another man who drives the street sweeper and hauls off the trash, reported that at 7 o'clock this morning, while loading the wagon with debris they distinctly saw a negro man beneath the grating of the manhole. Consequently the marshal and police are on the quiver trying to locate the negro or his ghost. It may be necessary to lower Engineer L. C. Hinkley into the sewer to use his transit before they can detect the castaway, whose raft may be stranded at an intersection of a lateral branch of the sewer.

Now anyone who knows S. D. Samples (among them The Times reporter) will vouch for his sobriety and truthfulness. Therefore, whether it was an optical illusion or a real negro we are satisfied Samples saw, what he believed to be a negro. So as the incident stands, the mooted question is "Whar is dat nigger?"

Now, there is only one other possible explanation of the negro in the sewer and that is, that Evangelist Ham has Old Nick's curiosity aroused and he is skulking around to see what is the matter with Wichita Falls, that

she is losing her nerve? There is no one thing certain, if the devil is running the risk of hiding in the city storm sewer, he is now between the power of the gospel and the vigilance of the police, and sure to be chased out.

LATER—Will Nolen reports that a man was seen crawling, out of a manhole near the corner of Eleventh street and Scott avenue at about ten o'clock this morning. The identity of the man and the reason for his presence in the sewer are matters of conjecture.

At its outlet into Holliday Creek the sewer is more than six feet high. It gradually grows smaller as it approaches the business section of the city. For some time it has been quite innocent of moisture and would afford a comfortable retreat for a fugitive or a hobo seeking shelter.

### HEARD ON THE STREETS

George L. Woodward has purchased a new American Tourist 40 automobile.

E. M. Everton of the Harrison-Everson Music Co. is in Byers' today on business for his firm.

F. W. Tibbets and F. A. Smith were over in the Charlie neighborhood yesterday looking after the former's loan business.

Local interest is increasing in oil prospects and the location of several new sites for boring wells is being canvassed. In the mean time the total corridors are filled with out of town prospectors.

The Salvation Army have recently recruited several volunteers to their local camp in this city, and are holding street services before large crowds.

V. E. Stampfl left on the noon train for Fort Worth today to return with J. W. Filgo in his auto. Mr. Filgo had the misfortune of disabling his car on a trip to the Dallas fair, and it has since been undergoing repairs in Fort Worth.

Mrs. Delaney, evangelist for the Church of the Unknown Tongues, accompanied by Miss Jennette Brown and Miss Gladys Libby, returned yesterday from San Antonio where they have been holding a series of meetings.

Mr. J. B. Stokes returned last night from points in Oklahoma on the extension of the Northwestern line, where he is in charge of the new town site sales for the company. He states that many of the new towns, ever beyond the point already reached by the road are growing very rapidly and new industries are opening up in all of them.

From the amount of waste paper and other light debris that is scattered over the city from the effects of the late dust storm, it is apparent that property owners and business men are not taking the proper care to guard against extra hazard from fire. Vacant lots and corners of barnyards seem to catch the most of this trash.

H. C. Gilman and wife left this afternoon for Fort Worth, where they will make their home in the future, and possibly engage in the picture show business. Mr. Gilman has been with the Gem theatre here almost since its opening and has made a great many friends who will be sorry to see him go. For some time, however, he has been ambitious to get into a larger city where there are more opportunities, and for that reason is leaving. His place as singer at the Gem will be taken by Miss Ruth Baker, who so ably filled it during Mr. Gilman's vacation.

### A GHOST STORY FROM TURNER FALLS

Party of Gentlemen Follow the Sprites to Where it Disappears at a Grave.

Davis, Okla., Nov. 15.—Ghost stories are usually taken with a "grain of salt," but here is one that is vouched for by men whose reputation for truth and veracity has never been questioned. They are willing to make oath to it and their word should be accepted in this instance.

Col. S. W. Wood, manager of the Scott Braden mines, two miles south-west of Turner Falls, has been assisting his Davis friends that a real live ghost makes its appearance every night about 11 o'clock. The Colonel has not been well of late and a few friends decided to stay with him Sunday night and watch for the mysterious visitor. His tents are situated about 300 feet from an old tumbled down cabin, and from this cabin the ghost would walk out, according to the old miner. On Sunday night, E. A. Hill, C. B. Ramsey and Joe Morris waited for the ghost. Promptly at 11 a ghostly white figure slowly emerged from under the ruins of the cabin and walked directly towards the camp. Mr. Hill picked up a shotgun and was ready to shoot when Col. Woods grabbed it from his hands. The ghost slowly passed the tents and disappeared up a small stream, disappearing behind some trees. Col. Wood urged the men to accompany him. As they reached a point about 500 feet above the camp they again saw the white figure stooping as if picking up something. Col. Wood then told his visitors there was a grave there and the ghost would always walk there and disappear from view. He said on one occasion he stood within ten feet of the ghost when all of a sudden it disappeared in the old grave site. He expresses the belief that this is the departed spirit of a woman who is said to have been murdered in that cabin about forty years ago. Her child was buried where she disappears nightly. That it was a ghost and not a mere joke, there can be no doubt. The gentlemen who vouch for

GOOD YEAR'S WORK FOR M.E. CHURCH SOUTH

Rev. O. T. Cooper, pastor of the First M. E. Church, South, accompanied by Mrs. Cooper, left yesterday for Gainesville to be present at the forty-fifth annual session of the North Texas Conference.

During the year one hundred and three new members have been received into the church. Subtracting the names of those who have been dismissed by death and other causes the membership now numbers six hundred and seven.

Another noticeable feature is the number who have come into the church upon profession of faith. A score and more have thus come into the church. This is of interest because the Wichita church receives its members largely by certificate.

The President of the United States has been spending much public money and delaying much public business by his long round of campaigning.

SPECIAL OIL RATE BEFORE COMMISSION (Continued from page 1)

mission that the special rates were put in upon the request of the railroads and that these low charges inured to the benefit of certain large interests. Judge Hiram Glass of the Texas and Fort Smith Railway asked for the retention of the 7 cent special rate from Port Arthur to Houston in connection with the Texas and New Orleans Railway. F. C. Proctor of Beaumont, representing the Gulf Refining Company, asked for the retention of the rate of 3.12 cents per 100 from Nacogdoches

to Lucas, El Vista, Port Arthur and West Port Arthur, on the ground that it would save increasing the capacity of the pipe line from Oklahoma following action at Lufkin from the Cad-do oil fields. General Freight Agent West of the Katy justified the rate of 5 cents from Wichita Falls to Gates on the ground of the immense tonnage moving there for the Texas Company refiners. In reply to a question Mr. West said he was not willing to have the crude oil tariff reduced and that the special rates do not form any basis for tariff reduction. Judge A. L. Beatty, representing the Texas Company, told of how special rates had been made either to meet pipe line competition or save pipe line construction and often to meet water competition. That small fields could not be developed unless low rates were put in, as they would not justify the construction of an extensive pipe line. It was out of the question, Judge Beatty said. The small consumers demand and by right are entitled to consideration and he would be glad to see it adjusted, but that unless the railroads are permitted to meet pipe line rates they would lose the revenues, and too, coal competition must be met at scores of places. C. L. Wallis of the Higgins Oil and Refining Company read a petition from several oil producers asking for the special rates to be retained in order that the small producers may ship in competition with the pipe lines otherwise the pipe lines would control the price, also the special rates would enable oil producers to ship their surplus production to established tankage and refineries until pipe lines and storage facilities are built in the new fields; and further, because the special rail rates protect the consumers of oil generally by providing competition and saved from the pipe lines, and finally because usually the oil is handled in large quantities, train load lots, enabling the railroads to handle it at a minimum cost. The petition was signed by the Higgins Company, United Company, A. C. Richardson, Paraffine Company, Sun Company, R. S. Blatter, Heywood Company, E. S. Dennis, W. W. Fondren, H. F. Stall and B. W. Armstrong. Mr. Wallis elucidated at length on points brought in the petition and agreed as a traffic and revenue proposition, that a large tonnage moving steadily is more remunerative than an article moving spasmodically at irregular higher rates. Therefore, the oil rates are not out of line with other rates, and compared with the special oil rates from Louisiana fields to the Sabine River. He also made comparison with the lignite and coal rates and method of handling these commodities compared with oil shipments, and unless these rates were retained the Louisiana producers with their cheap rates would hurt the Texas producers. General Freight Agent Sterley of the Fort Worth and Denver objected to the 5 cent rate from Wichita Falls to Gates, saying he had refused to make it because, in his opinion, it was too low and might mean a reduction to all other refiners, and the present rates are low enough. He did not want a 50 cent reduction to all refiners as would follow the use of the 5 cent rate to Gates, he argued. Judge Beatty asked for at least six months' time to close present contracts if the special rates are to be canceled. He said the pipe is on the ground for the construction of the line from the Electra oil fields to Wichita Falls. Mr. Proctor asserted that the consumers of oil are getting the benefit of the reduced rates. He also wanted time if cancellation is to come. General Freight Agent Lehane of the Cotton Belt said that line does not participate in the low specials. Mr. Wallis gave notice that when the new refinery is built at Fort Worth, ground for which has been purchased, he will ask that the 5 cent rate from Wichita Falls be put into that place, and said it would not be opposed unless the commission objected and that subject was concluded.

customary State dinner will take place in the evening and on Saturday his royal Highness the Governor General and the Duchess of Connaught will hold their first drawing room. This function, as well as the opening itself always attracts society leaders and debutantes from many outside points. This year the opening ceremonies promise to be of exceptional brilliancy. There is not only the added interest from the advent of a new Government, but also the great social eclat attributable to the presence of royalty. An almost unprecedented number of applicants has been received for seats on the floor on in the galleries tomorrow. The demand greatly exceeds the accommodation, and a great number will necessarily be disappointed. The duration of the present session and the extent and character of the business to be presented are not as yet definitely known. It is the general belief, however, that the session will be brief and rather uninteresting. The prevailing idea is that no very contentious legislation or legislation of a constructive character will be brought down at this time, but that, instead, attention will be devoted mainly to passing the appropriation measures necessary for the remainder of the fiscal year. Parliament will probably be prorogued before Christmas. It is expected that it will meet again in February or March, when the new government will be ready with its most important measures of legislation. Among these will be a proposal to establish a tariff commission, to create a western division of the Federal Railway Commission, and to provide for Government ownership and operation of terminal elevators. That the tariff will be taken out of politics will be made the subject of a general board is generally accepted as being a leading plank in Mr. Borde's platform. He made this proposal as an offset to the appeal that the Liberals made to the farmers on the ground of lower tariff. The same proposal has been endorsed by the Canadian Manufacturers Association as a means of taking the tariff out of politics.

THE INDUSTRIAL PACKERS have now banned all that. When they found districts that were fertile they established canneries there and entered into contracts with neighboring farmers to grow things for them. This in any sections of the country today. This was especially true of fruits and vegetables that had to be plucked and permitted to ripen in transit. In the days before the can there were great areas of land that would not be cultivated owing to the great distance the products had to be hauled to the nearest source of consumption. This was especially true of fruits and vegetables that had to be plucked and permitted to ripen in transit. The industrious packers have now banned all that. When they found districts that were fertile they established canneries there and entered into contracts with neighboring farmers to grow things for them. This in any sections of the country today.

Ottawa, Ont., Nov. 14.—The first session of Canada's newly elected twelfth Parliament opened today. The proceedings were purely formal, having reference to the election of Dr. Thomas S. Sproule as Speaker and other preliminary business of a routine character. Nevertheless the chambers and corridors of the Parliament buildings were the scenes of much bustle during the day, the members of both sides exchanging greetings and scouting about to get their bearings. Owing to the change of Government there has been a complete reassignment of rooms, these heretofore occupied by the Liberals going to the Conservatives and vice versa. The spectacular function in connection with the assembling of the new Parliament has been reserved for tomorrow, when his royal Highness the Duke of Connaught will open the proceedings in State. On this occasion there will be the customary military display—the cavalry escort, guard of honor and royal salute. The

Jimmy Dime will take his string of boxers including Tony Ross, Tom McMahon and Patsy Brannigan to Australia. James White, the London promoter, says that trying to promote the Johnson-Wells bout in England set him back just \$65,000. J. O. Fonville, father of A. S. Fonville arrived today from La Vau, New Mexico.

### OIL LOTS FOR SALE

in the  
**ELECTRA OIL FIELD**  
\$10.00 EACH

The Powell Oil and Development Company owns in fee simple 211 acres of land situated about three miles south, 63 degrees east from the Electra Oil Field. This company is owning 3 1/2 acres of this land on the market for the purpose of developing holdings.

The land is a part of the F. & G. N. R. R. Survey of land located in Wichita County, Texas, Survey No. 21, Abstract No. 147. Oil men of experience consider holdings as being in the heart of the oil-bearing territory for the reason that the geological survey marked by the government shows that the oil strata runs northwest and southeast from the town of Electra.

The first shallow oil encountered is about three and a half miles southwest from our holdings. The 31 acres of land is near enough the railroad to afford shipping facilities. It is also within one mile of a two hundred acre tract bought by the Fordyce Oil Company for drainage purposes.

OUR PLAN.

There are 1500 oil lots as shown by that on file with the county clerk of Wichita County. Each lot contains one square foot. The purchase of each lot is entitled to one share of capital stock of the company, when same is finally organized. When one half of the lots are sold we will at once begin operations on a deep well to be put down to a depth of 2000 feet unless oil or gas in paying quantities is found at a less depth, and when well is completed it will be turned over to the stockholders to be managed by a Board of Directors. 100 lots in the center of the field will be reserved for the deep well. The price of these lots is \$10 cash in hand.

Mr. and Mrs. Wylie Blair left this morning in their new automobile for Haskell.

Major and Mrs. Haggart of El Paso are the guests of their daughter, Mrs. A. P. Ferguson at 1008 Bluff street.

Mrs. H. A. Allen will be hostess to the Bridge Club at her home on Burnett street Friday afternoon.

The Unity Club will meet with Mrs. H. B. Patterson at her home on Tenth street tomorrow afternoon at three o'clock.

The ladies of the Christian Church will serve a chicken pie dinner in the basement of the Kemp and Kell building Saturday, November 25th.

A party of Wichita Fall people will motor to Electra tomorrow where they will spend the day. Included in the party will be Dr. Coons and daughters, Dora and Cora, Dr. and Mrs. Bennett and little daughter, and Mr. and Mrs. S. D. Lynch and daughter, Catherine.

Court No. 168 of the Tribe of Ben Hur will be organized here next Tuesday night, November 21. The new court will have 27 charter members. All members of the Tribe in the city are invited to attend the institution of the new court.

Good wholesome advice was given to the school boys of the city by Dr. Laulin in his lecture at the high school auditorium yesterday afternoon on the "Suppression of the Tobacco Habit." The lecture was given under the auspices of the Mothers' Club and the boys from all the schools attended in a body.

The Bush and Loaders Stock Company at the Colonial Theatre this week is making a big hit, and all who have seen them have been well pleased. The company consists of eight people. All of whom are good actors and while they have attempted only the lighter sort of farce comedies, their work has been such as to meet with high appreciation. The offering tonight is "The College Girls," in which the whole company appears, and which is said to be the best of their entire repertoire. Especially good is the comedy work of Mr. Bush and Mr. Fisher, who do the Irish and Dutch comedian parts to perfection. In addition to the big comedy show, there is also two reels of pictures on the Colonial program.

Orth-Terry Nuptials.

Miss Lucretia Orth, elder daughter of Mr. and Mrs. T. R. T. Orth was united in marriage at one o'clock this afternoon to Mr. B. F. Terry of Dallas, Texas. The ceremony took place at the home of the bride's parents on Tenth street and was witnessed by a number of friends. The couple left following the ceremony for Dallas where they will make their home. Mr. Terry being manager for the Oriental Oil Company there. The marriage is the happy culmination of a friendship that began in this city several years ago when the groom was manager of the same oil company here. The happy couple were the recipients of many handsome presents.

Hebing-Gerdeman Nuptials.

The marriage of Mr. Albert Gerdeman and Miss Grace Hebing occurred at the home of the bride's parents Mr. and Mrs. P. M. Hebing, 15 Twelfth street, today at high noon. The ceremony was performed by Rev. Laulin in the presence of a few of the most intimate friends and relatives.

The young couple are both well known in society circles, especially the Christian church, and have a large number of warm friends who will extend to them the best of wishes for long and happy life. The bride is a charming young lady who has made her home here for several years. Her groom is a machinist by trade, and a fine young man. He has been a resident of the city about a year, and in that time has built up a warm friendship with all who know him.

Madame Sherry.

It was George W. Lederer during his New York Casino regime, who gave a musical farce or musical comedy most of the wrinkles that made the feminine choruses of the Lederer shows distinctive from the average Broadway musical production contemporaneous with his pieces. It was Lederer who first introduced a whistling number, piped by choristers and also it was he who changed the fashions in popular chorus duties from just plain chorus girls to show girls, and from these to girls in log skirts, and likewise it was Lederer who first gave the country a dancing act of girls labeled "ponies."

This in his production in the New York Theatre, New York, of "The Man in the Moon." Employing only blonde girls at one time and brunette at another, and swinging the style from girls of generous amplitude to tiny feminine charmers which he termed "bottlers" were other successful whimsies of the producer. In Madame Sherry, the manager, has found a new quirk in his treatment of the handsome feminine pulchritude that separately constitutes the singing and dancing feminine ensembles of the production. The newest Lederer chorus girl innovation caught the fancy of New York, and will probably be a noted feature of the performance of Madame Sherry during its engagement here; the novelty being what is described in some advertisements as "a talking chorus."

Advance seats will be on sale at Marchman's Drug Store.

About 46 per cent of the inhabitants of the United States live on farms or in towns of less than 2500 population.

With the idea of becoming a city beautiful, Buenos Ayres has planted more than 142,000 trees in the past ten years.

### Poker Not a Game of Luck

#### But a Game of Cinch

argument benefit or profit to any of the parties interested, neither to the professional gambler who makes the money to the good and sufficient reason that they do not know how to go about it. Many players take an advantage by forgetting to put up the required chips. Others when in a game of jack-pots may hold a pair of jacks or queens and say nothing about either passing or opening until after everybody else has passed, when feeling that there is no danger of being raised, they wake up with the cry "Wait a minute! I can open the pot" with the result that they generally win the center by means of this little trick.

It is a well established fact that the hand is quicker than the eye. An expert can take a card off the bottom of the deck with practically the same motion made in dealing from the top, with such speed that it is absolutely impossible for anyone to see the trick. Cards are ordinarily dealt from the side, and very seldom from the end. Some cheaters deal from the side when dealing from the top, but pull from the end when dealing a bottom card, as many persons find it easier to deal a bottom card from the end than from the side.

The amount of practice required and the degree of experience necessary for the successful use of such a trick prevents many people from using it. They are willing enough but not proficient. Such people turn to marked cards or paper as it is known to the gambling fraternity.

With paper in the game it is easy to win, but there is one decided disadvantage incident to its use—the evidence is always there. With card manipulation or sleight of hand there may be suspicion in the mind of a player that something is wrong, but there is certainly no trace of the work left behind.

"Absence of Love No Grounds." Cincinnati, Ohio, Nov. 14.—"Absence of love between husband and wife is not a valid ground for divorce," declared Judge Warner in Insolvency Court today, when, on application of an attorney representing the wife, the Judge adjourned a divorce trial until later to give the couple a chance to compromise their differences.

"The testimony shows nothing against the husband," the court said. "He is a hard worker; he does not drink and does not use bad language."

And how about the sucker? Well his lot is also one that is not to be desired, but at that he is not as badly off as the gambler. He will lose his money—that is a foregone conclusion, he often jeopardizes his health by reason of the late hours, accompany or follow a session at the gaming table; he makes acquaintances who are not likely to ever be listed among his assets. In short, he is very apt to retrograde morally, mentally and physically, while financially he is sure to suffer. In gambling, as in everything else, the novice has no chance against the professional; but gambling is different from all other vocations in that one has no means of ascertaining which of his opponents are professionals.

Cheating at Poker.

Very few poker games are absolutely fair. The desire to win is very strong and human nature is weak, consequently it is not beyond the bounds of reason to suppose that in every game there are one or more persons ready to take an unfair advantage if the opportunity presents itself.

Some individual players do not cheat, but this is frequently due only

to the good and sufficient reason that they do not know how to go about it. Many players take an advantage by forgetting to put up the required chips. # The Humble TIN CAN

A Tin Can Dump

Shanty Plated with Tin from Cans

Machine that Automatic-ally caps and seals Cans

Interior of a Sash Weight Factory

Acres of Cans at Foundry

Cases of Cans Leaving Factory

WHEN the average American housewife buys a can of corn, peas or what not, she gives her attention solely to the contents, the can being hurled to the garbage can without any thought as to what becomes of it. To her the can is just so much waste and to be rid of quickly.

As a matter of fact by her throwing away the can she is unwittingly putting that can to its first step of rejuvenation to eventually return to her in some other form. In New York there is a beautiful home that might well be called a "Tin Can House," not because it was constructed of cans, for it was not, but because its owner erected the structure out of the proceeds of what he made through tin cans discarded by housewives.

This man was the first to realize that there was value in the tin cans that were to be found in quantities on the city dump. He was a poor man and he began his trade in the cans in a small way. First he took the cans, cut off the ends, flattened out the tin and used the pieces in the repairing of roofs.

The easiest way to get the ends off was to throw the cans into a fire and melt them off. In so doing the man discovered that there was considerable solder. This solder, he discovered, was as valuable as the tin, and it was not long before he had many employes gathering the tin cans. Then he built a regular furnace. Later he found that the whole can could be melted and that, as iron, it was an asset. True the iron is not of a good quality, but it has its uses, particularly as sash weights, and thus grew instantly the sashweight making industry, a business that employs many thousands of persons.

There are today but few large cities in which there are not sashweight foundries, and while much of their material is junk from a goodly portion consists of the lowly and much despised tin cans.

Although everyone is familiar with canned goods, for the cans with their highly colored wrappers are to be seen everywhere, few realize the extent of the business of making these cans.

It is estimated that the annual output of cans is two thousand million, which placed end to end would cover a distance of 100,000 miles and would girdle the earth four deep. What is more the output is increasing each year and not a can goes out to lead a

life of idleness. Everyone is filled. The farms, the orchards, the mines and the waters furnish the material that is handled by hundreds of thousands of men, women and children, packed in these cans and then sent to all parts of the earth.

While the user of tinned goods usually regards the can as no value there are countries in which the can is held in more esteem than the contents, in the wilds of Africa, for instance, there are many chiefs who take pride in their collection of cans, polished to a high degree. In the far north the natives regard the tin can with reverence, although the day is fast approaching when they too will see nothing of value in the tin receptacle, and will throw it away just as their American brothers do.

Although the art of preserving fruit and vegetables is an old one, known centuries ago, the age of the tin can is young. Prior to 1850 but few cans were made, and the small amount of food stuffs thus preserved and put on the market was regarded with suspicion. When the civil war broke out enormous armies were put in the field the question of feeding the men was the greatest of all problems. Napoleon is said to be the man to have discovered that an army travels on its belly, and there is little doubt that had he had the advantages of having tinned food his Russian campaign would have ended differently.

At this period, however, most of the tin used in making the cans was imported. Today most of the tin is made in this country by a score of great factories, whose output aggregates more than a billion pounds a year.

There has also been a change in the methods of the manufacture of the cans. The original can was soldered and was crudely put together by hand. Today there are types of cans used that are put together without solder and are produced by machinery so rapidly that they have to be tallied on a counting machine.

In the days before the can there were great areas of land that could not be cultivated owing to the great distance the products had to be hauled to the nearest source of consumption. This was especially true of fruits and vegetables that had to be plucked green and permitted to ripen in transit.

The industrious packers have now changed all that. When they found districts that were fertile they established canneries there and entered into contracts with neighboring farmers to grow things for them. Thus in many sections of the country today

fruits and vegetables are sold to the packers before they are picked.

The packing of fish is one of the great industries not only on the Atlantic but on the Pacific coast. In the cod and salmon fisheries several thousand vessels and about 100,000 men find steady employment. The oyster, clam and scallop industry employs nearly as many. Even crab meat, for years regarded as impossible to can, finds its way into the tin box.

In the meat industry the annual output runs into enormous figures. Beef, ham and chicken are as well known in South Africa as in the United States.

The tin can has conquered the seas. In winter one may eat fruits and vegetables practically as tasty as though they were just plucked. Indeed with canned fruits one may make pies that rival those that mother used to make.

The making of the tin cans is naturally a huge industry within itself, employing hundreds of thousands of men, women and boys, representing an investment of many millions of dollars. It has led to the development of tin ore mining on a gigantic scale, a thing that only a comparatively few years ago was thought practically impossible. Until the mining of the ore in this country was developed practically all of the tin was imported. Today but little tin is imported.

Machinery plays a most important part in the making of a tin can, not

only in the fashioning of the plates, but giant machines, intricate of mechanism, take those plates, cut, shape, crimp and solder them so fast, that one can scarcely count them as they roll out complete and ready for the packer.

Scores of inventions for the improvement of the tin can have been put upon the market. There is a can that has an airtight cap that can be removed without the aid of a cutter. More than that the can can be put back again after the contents have been broached. These cans are used for paints, coffees and other things that do not spoil by being opened for a while and then closed again. Once a can of fruit or vegetables is opened the contents must be taken from the can or they will spoil.

Immensely other types of cans may be seen—cans that require keys—and yet the ideal has not been reached. Of more than three hundred applications for patents for improvements on tin cans more than 100 have been granted and yet the demand for the perfect can has not yet been answered. Whether it will come is a question.

But whether the perfect can comes this year or next is of little interest to those who deal in the can after it has ceased to be of use as a carrier. Indeed to the foundry man the tin can represents to him just so much iron, of an inferior grade and as such it is only fit to be melted and cast into window weights, the common fate of millions of cans picked up

in alleys and on the dumps. "We buy the cans by the pound," said a foundry man, "and while I haven't heard of anyone making a fortune out of the business in recent years, the founders of the industry did very well; at least that is what I have heard."

The tin can is not tin at all. The only tin about it is that which is washed on by a plating process, just as silver or gold is put on some other metal. The tin can is really an iron can lined. The coating of tin is so thin that one cannot measure it. It will remain there however some time especially on the inside.

"When the cans get to us there is not much of the tin either on the inside or outside. The solder remains however and this is worth something when recovered. Some of the smaller foundries are careful about recovering the solder, but in the larger establishments the can, solder and all is thrown into the pot and melted down after which the metal is cast into window weights."

To those who were in the early rush to the Klondike the greatest aid was the tin can, for in the cans was the provision on which most of the prospectors lived. Meat, fish, vegetables, fruit, milk and other foods safely sealed in tin receptacles, were packed across the narrow trails into the wilderness. When the cans were emptied the resourceful pioneers turned them into other uses. The larger can that had held oil was converted into a stove, while the smaller cans were used for lamps, crude to be sure but more efficient than the tallow dip.

The tin cooking stove was one of the greatest boons. The prospector did not dread moving his camp. Slinging his home-made cook stove across his back and with his dog sledge in hand with other equipment he had no hesitancy about "hitting the trail."

There was comparatively little danger about one losing the main trail either, for the way the trail was marked by discarded tin cans on either side. The first winter in Klondike City will ever be known as tin can year, because of the number of tin cans that came into camp. It was also during that winter, or rather, the following spring that some genius thought of tinning his house with the old cans, thereby starting everyone else upon the same course. Handy men made cooking utensils

out of the cans and made good money peddling their wares. Until the building of the railroad the tin can had its uses filled or empty and today there are standing some of those houses that have given to the world the name Tin City.

There is now, however, a real tin city, a community in the heart of the tin ore district in Alaska, but those who made the early rush to the gold mine region will never forget the part the tin can played. Without the tin can few would have been able to make more than a start.

### The Animal Man is Never Satisfied.

From the cradle to the grave he pants for something he has not. He is never satisfied with his present surroundings. If he had been he would have still been dwelling in the cave. He never has so much that he doesn't crave for more. He never does anything so well that he doesn't see room for improvement. It matters not how much he knows, he wants to know more. His heart pants for knowledge and wisdom. He never constructs anything but what after its completion, he can look at the thing over and see some defects in its make-up. The sum total of his whole life is made up of mistakes. If he appears in the forum and makes a speech, and although it may please the multitude, he always feels like going out and kicking himself, because he didn't make a better one. Our great grandfathers lived in log huts with sun-choon floors, plowed their fields with a crooked stick, and harvested their grain with scythes blades and threshed it with a flail; today we dwell in palaces, plow our fields with the iron horse, harvest our grain with the twine binder, and ride in palace cars. So man is never satisfied. When God created man he kindled within him a breast a little flame, ambition, which has ever been man's torch light; it has lighted his pathway, and led him from the ignorance of barbarism into the great highways of civilization. He stroled forth at night and gazed up at the starry heavens; he discovered that his vision was imperfect. Next we see him working and toiling, grinding his lenses, and the fruits of man's dissatisfaction was telegraphed. No, the animal man is never satisfied, and that is the reason why we progress.

Home runs were plentiful in the American league last season. Thirty-five four sackers were made at Detroit, thirty at Washington and Boston and twenty homeward bound boys slid across at St. Louis.

add Captain Paddock recited the legal custom of reading the interpretation of a law by reference to the conditions in mind when the act was passed, showing how the courts read journals of legislative procedure to arrive at a construction.

"Surely no one will say that the legislature in 1878 had motion picture shows in contemplation," he said. "Electricity was then used for but few purposes and they were unknown."

loud applause greeted the statement that the members of the public welfare committee were doing more for the actual moral benefit of the city by advocating a liberal Sunday than the opponents. Salem withcraft days were cited and the lesser liability of law breaking with innocent amusements.

The declaration was made that men left idle on the streets would look for an open back door and that the men looking for them led to the temptation to have such doors open.

Declaration was also made that the committee and signers of the liberal Sunday had in no way receded from their positions as outlined in petitions and declared they could no more be justly called in favor of law violation than those clamoring for enforcement against the motion pictures and contending the other technical infractions.

F. W. Axtell, chairman of the recently organized Law Enforcement League, was at the doorway into which the crowd overflowed and heard a large part of the addresses made.

Hoke Smith Gives Up Governorship. "Atlanta, Ga., Nov. 15.—Hoke Smith retired from the governorship of Georgia today, preparatory to taking up his duties as United States senator to which office he was elected by the last legislature. Three aspirants are in the race for governor to fill on the unexpired term. The selection will be determined by the Democratic primary early in December.

In New Haven they are saying that Freeman, a halfback, is a second Coy.

### CATARRH DOCTOR.

You Can Get the Best One in the World for \$1.00.

Go to O. F. Marchman's Drug Store today. Say "I want a HYOMEI out fit," take it home with you, open the box and pour a few drops of HYOMEI into the little hard rubber inhaler.

Then breathe, pleasant, soothing, healing, germ killing HYOMEI over the raw, inflamed, germ ridden membrane.

Stuffed up head will vanish. Keep up the treatment four or five times a day for a few days and hawking, spitting and forming of mucus in the nose and throat will cease.

HYOMEI is guaranteed to cure catarrh, coughs, colds, croup, asthma, catarrhal deafness, or money back. Complete outfit \$1, subsequent bottles if needed 50 cents at O. F. Marchman's Drug Store and druggists everywhere.

The Pendleton will referee the Pennsylvania-Michigan game at Ann Arbor next Saturday.

PERSONAL MENTION

Hugh Wolf and Mrs. Frank Smith of Dallas are here to attend the Orth-Terry nuptials. Attorney Ed Napier left this afternoon for Electra, where he goes on legal business. Dr. E. Jones returned this afternoon from a professional visit to Electra, where he went to attend a typhoid fever patient. John Moore, from the Thornberry neighborhood, is in the city today and says that the wheat fields are needing rain. Sam Walkup, constable at Electra, was here this afternoon, and placed a prisoner in the county jail. John Mitchell, formerly of this city, and now a resident of Fort Worth, arrived here last night on a few days visit to friends. A. W. Leonard, vice president of the Devonian Oil Company, is in the city for a few days, looking after their large holdings in North Texas. Norman Bachman and Homer Bennett arrived home last night from San Antonio, where they have been for the last several days on a business trip. R. T. Orth returned this afternoon from Oklahoma City, where for the last several days he has been on business connected with a lawsuit now in progress there. P. Morgan returned last night from Electra, and immediately left on the next train for Decatur, where he goes to join T. J. Waggoner in a conference concerning business matters. J. L. Waggoner received notice this morning that some of his cattle near Burk Station had broken out of the pasture, and he accordingly left at once for that place. J. B. Doovey, general baggage agent of the Fort Worth and Denyer rail road, passed through here this afternoon en route to his headquarters at Fort Worth, after a short trip to Chillicothe, where he has been attending to company business for a day or two. Clifford and Clarence Moore returned last night from San Antonio, where for the last several days they have been attending the San Antonio fair, and visiting friends in the Peacock Military school there. John Moore, after a few days spent in seeing the sights of San Antonio returned this afternoon. He was accompanied on the trip by J. Carnes and both report having had a good time. Sheriff R. L. Randolph returned last night from Canyon City, after escorting to that place a girl wanted as a witness in a trial in the district court there. Mr. Randolph remained here only a few hours, and left for Gatesville to place a boy in the reform school there. Judge R. F. Arnold, former candidate for District judge, passed through here this afternoon on his return to Graham, from Electra where he has been on a business mission for several days. During the short time while he was in this city today, Judge Arnold was the guest of Attorney L. H. Mathis.

OUR CANDIES WILL PLEASE HER

of all the attentions you can show or the presents you can buy, nothing is more appreciated than a box of nice candy now and then. OUR CANDIES TASTE GOOD AND ARE IN GOOD TASTE. This is about all the argument needed for the young fellow, but remember this. After she is yours—such things are appreciated even more than before. She knows that you think more of her, of course, but still she likes to be told and she likes to be shown even better. Naturally she cannot tell you this, but try her just once with a box of our candy and see how much it means. Why not? MARCHMAN'S DRUG STORE FREE DELIVERY 702 Indiana Avenue—Phone 124

Give Us One Chance

at your business and if we don't make good it's our fault and we will beg your pardon for being on earth and expect you to leave us like a pay car leaving a tramp.

Our toilet department is where we are strong. Our line of mug, medication and beauty makers has 'em all down on their knees yelling quit.

We win on always being on the job and giving you what you think you want without a whisper about something just as good. We take it that people that the police department will allow to run at large have sense enough to ask for what they want. A fellow might look like he needed a bath tub, but if he asked for and orange stick you would never send him to the plumber.

The funeral of Miss Lizzie Van Hoozer, aged 18, who died in this city Monday afternoon, was held this afternoon at 4 o'clock from the family residence on 12th street, and the remains were laid to rest in Riverside cemetery. The funeral sermon was preached by the Rev. J. M. Morton, and the body was followed to the cemetery by many friends who sincerely regret her untimely death.

Mrs. Lester Wright was brought down on today's noon train from Electra, and was immediately placed in Miller's Sanitarium here. She has been seriously ill for several days, and it was decided yesterday by the physicians in charge, that Mrs. Wright should be removed to a sanitarium in this city. She was met at the train by a number of nurses and friends, and was carried from the train to the hospital in an ambulance. It is hoped that her recovery will be rapid.

A. J. Shulz of the Clara neighborhood is in the city today. What wheat he has sown is up and doing well, but it is too dry to sow more.

AMARILLO WILL SEIZE WICHITAS OPPORTUNITY

Amarillo, Texas, Nov. 15.—At a meeting last night of the Amarillo Young Men's Civic League it was determined to organize for an all-Panhandle fair, to be held next year in Amarillo. A dinner will be given Tuesday night, Nov. 28, at the Hotel Magnolia, at which time a definite campaign will be outlined and work begun. A fight for a commission form of government was begun.

\$10.00—Reward—\$10.00

We want every family in Wichita Falls to test our fresh roasted coffee, and see the difference between it and goods roasted out of town. We know that one pound means repeat orders, and are willing to pay something for that first order. Have hit upon the following plan—Commencing Wednesday, November 15th until December 1st we will take orders for a special blend at 35c per pound. This coffee to be roasted by us and delivered the same day it is roasted. Each pound purchased entitles the purchaser to submit a name for this particular blend and we will pay the party who submits the most appropriate name (which we will adopt for this blend) the sum of Ten Dollars. We are to be the sole judge, but the Ten Dollars will be paid to someone who submits a name for the coffee. The coffee will be delivered and award made as soon as possible after December 1st.—which will be within the first five days of the month. Our solicitors will make a canvas of the city but that no one may miss the opportunity we will accept telephone and mail orders and orders may be left at the store. Now we promise you will get more than full value for your 35c and in addition you get a chance at the \$10.00. If the coffee don't make good we are the loser as we are staking our reputation as roasters on this deal. All coffee sold by us under the name adopted will be exactly like the first pound. As these orders will be small will expect to collect on delivery.

O. W. BEAN & SON Grocers and Roasters of Fine Coffees
