UNITED PRESS SERVICE BRINGS LATE NEWS OF THE WORLD TO TIMES READERS  
RANGER, TEXAS, THURSDAY EVENING, JANUARY 24, 1935

It's said you need a vocabulary of 10,000 words to understand the day's news, unless you confine your reading to the funnies, of course.

PRICE FIVE CENTS No. 210

## Mayor of Carbon Injured In Auto Collision

### ROOSEVELT IS FOR RESOURCE CONSERVATION

WASHINGTON, Jan. 24.—President Roosevelt today recommended to congress the spending of millions of dollars for conservation and orderly development of natural resources that have been used in past generations.

With a special message he transmitted the report of his national resources board which presented a long-range planning program and the need for more than \$100,000,000 for public development projects over the next 20 years.

He said he would use "a substantial portion" of the pending \$500,000,000 work relief fund for projects recommended by the board to conserve land, timber, coal and water resources.

In years past, the government had planned to spend each year a considerable sum in the development of this program," he said.

### Outlaw Branded Traitor to Kin

Facing trial for the kidnaping of Edward G. Bremer and accused of betraying his own mother and brother to death to win clemency, Arthur "Doc" Barker, southwest outlaw, is shown here in St. Paul jail. The gang leader was held prisoner in Chicago for ten days before federal agents revealed his capture.

### BLIZZARD IS MOVING OUT OF THE STATE

Slowly rising temperatures were forecast for Texas tonight and tomorrow as the high pressure area, bringing the second cold wave, moved east.

Early frozen by the intense cold, the ground will thaw slowly, Dr. J. L. Cline, meteorologist, said, and really warm weather will not return for several days.

The second cold wave, which followed the first, brought freezing as far south as San Antonio, where 32 was recorded today. Amarillo reported 24.

### Bandit Escapes; Girl Left Behind

Shooting his way out of a police trap in an Atlantic City, N. J., hotel Harry Campbell, left, escaped with Alvin Karpis, notorious gang leader, and the pair now are targets of a far-flung hunt. When the bandits escaped, they left two girls behind, one of them wounded. The other, Winona Burdette, 21, is shown here after her capture, when she admitted identity of the outlaws.

### STATE RESTS IN MURDER TRIAL OF HAUPTMANN

FLEMINGTON, N. J., Jan. 24.—Testimony of Bruno Richard Hauptmann today after introducing the witness chair Christian Frederickson of New York.

Frederickson is the owner of a bakery in which Mrs. Hauptmann formerly worked.

The early part of Hauptmann's testimony dealt with his education in Germany, his entrance into the country and recital of the jobs he held before he was arrested.

He told, under direct examination, of his early life in Germany and said he spent two years in the German army during the World War. Following the end of the war he came to America and was deported. He again tried to get into the country and this time was accepted.

### Proves Failure as Dillinger II

Ambition of Clyde Stevens to emulate John Dillinger by freeing convicts and leading them in crime forays was crushed when he was trapped a few hours after he had smuggled guns to four San Quentin, Calif., prison inmates for a break in which one was killed and the others recaptured. Stevens, paroled convict, is shown here being led, hand-cuffed, back to prison.

### OCCUPANTS OF TWO CARS ARE ALSO INJURED

M. C. Tucker of Carbon And Several Others In Cars Hurt.

ABILENE, Jan. 24.—M. C. Tucker, mayor of Carbon, and others were injured in a head-on collision at the Taylor-Callahan county line on the Bankhead highway early today.

Injuries of Tucker were a lacerated eyelid, left cheek slashed mouth to ear, bruises and concussion.

M. C. Tucker, barber from Cisco, in the automobile, received a broken jaw bone, and knocked out lower teeth.

Mrs. M. C. Tucker, Jr., and her five-year-old son, Gray Lee, received scratches and bruises. The Tuckers, driving a 1934 Chevrolet coach were enroute to San Angelo to return Mrs. M. C. Tucker, Sr., of Carbon to her home after a week's visit there.

The car collided with one owned by Leland Jackson of Baird. He was driving a new model Ford. He was given first aid treatment for a mangled hand.

Hubert T. Reynolds of Baird, with Jackson was the most severely injured. His throat was slashed ear to ear. Loss of blood had weakened his condition.

Mrs. Lela Searcy, Baird, 26, in the car, received a fractured left leg at the knee, lacerated right hand, bruises.

The machines met on a curve in the highway. So powerful was the impact that the motors of the automobiles were jammed together, the cars turning crosswise and forming a barrier to traffic the full width of the highway.

Mrs. J. M. Reynolds, long-time resident of Baird, is at the bedside of her son, Hubert Reynolds. Less than a year ago her husband, a Baird ginnee, was killed in an accident at his gin.

Mrs. E. Poe, daughter of the Carbon man and sister of the Cisco, a brother, R. L. Tucker, Mr. Poe and Mrs. R. O. Sutton, mother of Mrs. M. C. Tucker, Jr., came here from Cisco. Mrs. M. C. Tucker, Sr., came from San Angelo.

### British Air Force 1934 Record Good

LONDON.—British Royal Air Force planes flew about 47,000,000 miles in 1934.

The estimate authoritatively made is for a conservative one, a record for post-war service.

The previous highest figure was 44,000,000 miles in 1931. In 1921 when the Royal Air Force was about one-third of its present size the machines flew about one-tenth of the distance flown in 1934.

The 93 squadrons of the service suffered 19 fatal accidents in 1934, involving 28 deaths. In 1933, when the strength of the force was only 33 squadrons, there were 22 fatal accidents and 37 deaths.

The worst year for British military aviation since the war began in 1914, when 61 squadrons suffered 54 fatal accidents and 103 deaths.

The number of fatal accidents proportion to flying hours has decreased tremendously. For 1934, 228 hours of flying in 1931 attended by a death, but in 1934 there was only one death to 17,000 hours. In addition, the year showed an exceptionally low record in other accidents which were not fatal but caused serious injury to personnel.

It was pointed out that the year's record is particularly striking in that it is recalled that there was an increase in flying in air exercises and maneuvers conducted by the Royal Air Force.

As possible, Royal Air Force machines undertake patrol and policing duties over a million square miles of territory.

### Sinclair to Build Filling Station On Highway In Ranger

Harold Wright, district man for Sinclair-Prairie, is making negotiations for building a new filling station for the company on the corner of Houston and Railroad avenues, just across the T. & P. tracks from the passenger station.

Work on the station will likely start in the next 45 days, Mr. Wright said today, as the orders for the construction have to be forwarded to New York city for final approval and signatures.

"With the completion of Highway 89, between Weatherford and Ranger," Mr. Wright said, "we expect a considerable increase in the oil and gasoline business in Ranger, as well as improvement in other lines of business. After tourists leave Fort Worth they will not want to stop for gasoline and oil at Weatherford, but most of them will make the run to Ranger, which will be their next logical stop."

It was stated that when the station at Houston and Railroad was completed it was possible that another location on the new highway through Ranger might be made by the Sinclair company.

### Unemployables of County Number 508, Survey Shows

Analysis of case load of unemployables and those not eligible for FERA assistance shows a total of 508, consisting of the following cases: Women eligible to mother aid, 74 cases; persons over 65 who have not been regularly employed and who cannot receive physician's certificate, 203; persons under 65 physically or mentally incapable of working, 218; others 13.

To the above a total of \$7,163.24 was granted for relief in December. H. E. Driscoll, county administrator, stated that as far as he knew these cases would now fall back on the county and state, and that ways and means for carrying them must be found without FERA assistance.

### Information Is Sought On Pension Eligibles In County

Information in reference to those available for old age pensions was sought by State Director of Relief, Adam R. Johnson, through H. E. Driscoll, county administrator, through a special form for the purpose sent on January 22nd. Mr. Driscoll stated that the form properly executed must be back in Austin not later than January 30. The form covers a survey relative to anticipated pension legislation and the return of the report was urgent.

Part one of report requires information on all persons on relief rolls over 70 years old. Part two requires identical information for persons on relief rolls over 65 years old. Report also embodies amount of relief issued entire family group and must be included. Information is confined to whites, Mexicans and Negroes. Male and female and married couples both over 65 and 70 years old.

### Oldest Train Crew May Be Pensioned Under New Laws

RUSK, Texas.—If the federal pension law involved in a suit pending in the supreme court is upheld, the Tyler-Lufkin branch of the Cotton Belt passenger service will lose the distinction of having the oldest train crew in Texas.

Only the junior member, A. W. Campbell, 53-year-old brakeman better known as "Grannie" in railroad circles, will be left on the job. Campbell is called "Grannie" because he was such a scrupulously clean "house keeper" in his days of freight service when freight crews slept and ate in the caboose.

Conductor E. H. Sims and Engineer I. W. Saterfield, who for the past 37 years have made the run, will retire. The former entered railroad service on the old East line from Jefferson to McKinney in 1877, remained with the Katy after that company purchased the line and accepted employment with the Cotton Belt 44 years ago. For 54 years Saterfield has been an engineer, numbering among his passengers President Taft, Jay Gould and James Stephen Hogg.

Since automobiles have played havoc with the once heavy traffic on the Tyler-Lufkin, Conductor Sims and Brakeman Campbell have ample time for reminiscence.

One of "Grannie's" best stories has to do with a Tennessee lady's effort to save payment of her 15-year-old son's fare by smuggling him through in a cotton sack. The day grew hot, "Grannie" saw the sack squirm. So he investigated and brought forth the contents.

### C. of C. Officers Will Be Elected

Election of officers by the directors of the Chamber of Commerce will be held at a meeting of the old and new directors, called for tonight at 7:30 by Dr. P. M. Kuykendall, president.

After the new directors are inducted into office, officers for the coming year will be elected and the meeting will be turned over to the newly-elected president, Dr. Kuykendall has announced.

### Texas Has Many Farmer-Trappers

DALLAS, Tex.—Texas, with 115,810 farmer-trappers out of a total of 495,480 farmers in the state, ranks just below Pennsylvania and Illinois in the number of furriers who supplement their incomes through fur sales, according to Michael Hollander, chairman of the National Fur Tax committee.

Texas farmers' income from furs in good years often exceeds \$5,000,000 or approximately \$30 per trapper, Hollander estimated. "United States farmers generally average about \$30 each though in some states the average is much higher.

Altogether farmers in the United States receive annually about \$60,000,000 from the sale of furs. This is nearly all profit and is equal to the net profit from a \$300,000,000 crop, Hollander estimated.

A 10 per cent federal tax on all furs selling for more than \$75 has cost farm trappers at least \$25,000,000, Hollander said, as the fur customers have resisted all efforts to pass the tax on to consumers.

### Fair 'Hot Check' Artist Held In Arkansas Town

A fair feminine "hot check" artist who fled from an Eastland merchant of a large sum of money was Thursday held by officers in Berryville, Ark.

Held with her was a man, thought to be wanted for passing hot checks in El Paso and Big Spring.

Return of the woman to Eastland, it was said, was to be arranged.

### Catfish Halted Oil Well Development

McALLEN, Tex.—Drilling on an oil well 25 miles west of McAllen in the Sanford pool was temporarily stopped by a catfish.

When heavy trouble developed from using salt water from a nearby well, a line was run to the Rio Grande. The pumps sucked up a fish and the drilling was halted until it was removed.

### Dallas Homicide Cases Number 86

DALLAS.—There were 86 cases of homicide in Dallas in 1934, according to a report of the police department which was prepared recently.

In 1933 there were 52 homicide cases and in 1932, 36. During 1934 there were 2,192 automobile theft offenses reported, 226 arrests, 213 persons were charged with automobile theft and 48 were convicted.

Out of 2,342 persons arrested during the year, 2,019 were charged with various criminal offenses and 323 were found guilty.

### Work Relief Bill Is Before House

WASHINGTON, Jan. 24.—The \$4,880,000,000 work relief bill reached the amendment stage in the house today after a sharp partisan debate in which democrats charged opponents of the measure playing politics with human suffering.

An amendment offered by the appropriations committee, striking out of the bill a long list of types of projects on which funds could be expended, was approved, 171 to 55. The amendment permits the president to utilize the huge relief fund for any "federal or non-federal project," as he sees fit.

### Chinese Watching Japanese Advance

PEIPING, China, Jan. 24.—Chinese newspapers, anxiously watching the movement of a Japanese military force in North China, charged Japan today with inventing pretexts for using formidable instruments of war for "territorial expansion."

Their charges came as nightfall put an end, temporarily, to tilting in the mountains north of the Great Wall.

The Chinese soldiers, driven back, entrenched themselves for new activities. The Japanese moved steadily westward, consolidating the position they had attained.

In two days the fighting Chinese casualties numbered 50, mostly from bombing planes.

### LeRoy Lane to Die In Electric Chair

HUNTSVILLE, Jan. 24.—LeRoy Lane, convicted of killing a deputy sheriff during a holdup in Dallas county, will go to the chair early tomorrow.

He will be the first to be electrocuted during the term of Gov. James Allred, brother-in-law of the late Gov. James H. Bell.

Yester-day refused to commute the sentence after the state prison board had recommended unanimously against commutation.

### College Given Old Bible

FAIRBANKS, Alaska.—A Dutch Bible, printed 400 years ago, was presented to the Alaska College library by Gerrit Snider of Wasilla. The book was bound in heavy leather, with a chain to fasten it to the wall. It was well-illustrated with pictures curious nowadays, including one of the devil with horns and spiked tail.

### House Won't Take Recovery Program Without Study

AUSTIN, Jan. 24.—Members of the house of representatives today decided they will not take the administration recovery program until they have had a study.

They tackled a time limit on existence of the governor's proposed state planning board, deferred final action on treating the board and put off a major housing bill until next Tuesday.

Federal Housing Representative E. A. Stuart of Fort Worth refused to take a hand in the fight over the building and loan bill. It is not one he advocated, but a substitute offered by building and loan interests.

### 109 More Taking Marital Vows In 1934 Than 1933

An increase of 109 marriage licenses issued in 1934 over those issued in 1933 is revealed by records in the county clerk's office.

For 1934, 365 licenses were issued and in 1933 there were 256.

The 1934 license issuances were greater than those of the past three years. In 1932, 205 were issued. In 1931, 218 couples were issued licenses to take the marital vows.

"June as the month for brides," proved to hold true in 1934 in licenses issued in Eastland county. The month in which 41 were issued was the high month of the year.

The license issuance by months in 1934 is as follows: January, 37; February, 38; March, 28; April, 27; May, 35; June, 41; July, 12; August, 36; September, 32; October, 28; November, 23; December, 40.

According to the present rate of license issuance, 1935 will fall below the mark of 1934. Up to Wednesday, 19 had been issued. In the corresponding period last year, 30 had been issued.

### Suits Are Brought For Code Violations

WASHINGTON, Jan. 24.—The justice department has instituted 106 suits charging as many consumers and individuals with violation of the petroleum code, Attorney General Homer Cummings announced today.

Defending his department against hints that it was not pressing oil cases sufficiently, Cummings said:

"Any cases that come over here from any department are promptly considered and if there is merit in them suits are promptly brought.

**City Suburb Sets Fire Loss Record**  
SAN ANTONIO, Texas.—Alamo Heights, a suburb of San Antonio, has set a fire loss record for all cities to date.

Loss for the entire year in 1934 was only \$111.43. R. I. Decker, chief of the volunteer fire department, said. The town has a population of 5,000.

**HENRY DAVENPORT ILL.**  
Henry Davenport, who has been ill at his home with flu for the past few days, was reported today to be still quite ill. Mrs. Davenport, who has also been ill, was reported as being much better.

**WANTS FEMINE PREACHER**  
TORONTO, Ont.—Rev. Phillip Duncan, prominent local minister, believes more women should enter the ministry. "Women are more intelligent than we men," he said. "There ought to be more women in pulpits, but, remember, women will deceive as quickly as men."

**PERFECT WEDDED BLISS**  
PEABODY, Mass.—The distinction of being an ideally married couple is accorded Mr. and Mrs. William Sheen, 89 and 85, respectively. When they celebrated their 67th wedding anniversary, they announced that they never had had a verbal skirmish during their married life.

**ALLIED VISITS HIS BROTHER IN TYLER**  
AUSTIN, Jan. 24.—Gov. James Allred returned to his desk today after an airplane trip to Tyler and the bedside of his brother, Judge Rene Allred, seriously ill.

It was the governor's first airplane trip in a long time. He quit flying, except in emergencies, when injured in a plane crash in a Texas sandstorm.

**Work Relief Bill Is Before House**  
WASHINGTON, Jan. 24.—The \$4,880,000,000 work relief bill reached the amendment stage in the house today after a sharp partisan debate in which democrats charged opponents of the measure playing politics with human suffering.

**Democracy Has Faith In Man's Wisdom**

Harvard's President James B. Conant tells a convocation at Amherst College that one of the great threats to human society today is a revival of "the ever-recurring suspicion of man's creative intelligence."

The scholar, says President Conant, has faith in the human mind—faith in its ability to solve any problem which human association can present.

Because of this faith, the scholar favors the freest kind of research into social problems, and the fullest kind of discussion of them—believing, as he does, that human intelligence is capable of finding the way out of it is just given the chance.

But today a distrust of this capability is growing. Some people are rising to protest against this kind of free inquiry. They call for closed minds, as if some questions were so dangerous that even to examine them from an unbiased viewpoint were to court grave danger.

"The universities and colleges, as focal points for speculation and research," says President Conant, "are the subject of hostile criticism, and in at least one country have suffered a devastating prosecution. Man's restless spirit of inquiry has always been disconcerting to those who demand a final and unchanging picture of the universe."

Now all this may seem rather remote and academic, to those of us whose daily routine is conducted far from the campus. But it is worth remembering that it is precisely this faith in man's creative intelligence—this faith which animates every college and university worthy of the name—which is the foundation stone of the democratic theory.

In other words, we live under a democracy for exactly the same reason that men like President Conant devote their lives to scholarly research: Because we believe that the race has the brains to find a way out of its troubles and the collective good will to follow such a way once it has found it.

This viewpoint is not popular in the world today. In nation after nation, men have abandoned this faith and have asked to be led by some autocratic power which will make all decisions for them.

Some of them have even proclaimed jubilantly that democracy is an out-of-date concept, and that only the authoritarian state can survive in the modern world.

For ourselves, we still believe in freedom—freedom in government, in academic research, and in all other forms of social activity. We hold that belief because we still have confidence in the power of human intelligence.

lowers were jumped a few feet from the Houston city limits, a neighboring farmer complained. Three carloads of officers of the scene in a downpour of rain. The automobiles became stuck in the mud. John furnished the gypsies with trucks in which to take them to town to face heavy charges.

**Man Calls Police to Get Liquor Supply**

FORT WORTH, Tex.—If you are a visitor in Fort Worth, don't take a stranger's word for anything. An out of town business man recently decided he needed a few "shots" while visiting here. He called what he had been told was a bootlegger's number and gave his name and address along with an order.

**Gypsy Chief Aids Arresting Officers**

HOUSTON, Tex.—Ephraim John, 32-year-old gypsy chief, wants it known he cooperates with the law, even when members of his band are the targets. John and about 75 of his followers were jumped a few feet from the Houston city limits, a neighboring farmer complained. Three carloads of officers of the scene in a downpour of rain. The automobiles became stuck in the mud. John furnished the gypsies with trucks in which to take them to town to face heavy charges.

WHAT IS HOME WITHOUT A GARDEN? The Modern Seed Catalog

The seed catalog still functions as a stock joke for cartoonists and columnists, though it has been years since the catalogs stopped promising the miracles of which the humorists make fun. Watermelons large enough to fill a hay wagon, and vines whose growth rivals the fabled beanstalk of the fairy story are no longer pictured as possible to the purchaser of a favored brand of seeds. The modern catalog is as precise in its descriptions as the American Poultry Standard, for example, in its specifications for pure-bred poultry. The seed catalog is indeed, a standard of breeding, and its illustrations as well as its descriptions record what its publisher has to offer in pure bred standard and improved varieties of vegetables and flowers. Catalog descriptions are prepared primarily for commercial growers, by whom seedmen are held strictly to account for the performance of their strains. In size, color and length of season, the crop produced must be uniform and up to specifications, or business will be lost. Garden seed production under these exacting requirements has come to be scientific, and the catalog records the scientific standard. Each year offered is grown for its merits, which are duly set forth in descriptions upon which one relies. The seed catalog is therefore current encyclopedia of gardeners revised each year and brought up-to-date. Some of them are so complete as to be the preferred reference books in agricultural circles. The first step for anyone planning a garden, then, is to send for a seed catalog of the current year. Most of the questions in a gardener's mind will be answered in a good catalog. Books on gardening obtainable at any public library will give much information more complete fashion, and help one to interpret and use the data presented by the seed catalog. But a good catalog is not only to plan the garden to refer to throughout the year. Send for one and keep it close, if you wish for gardening success.

**SILKEN SPINDLES**  
by Laure Lee Brodman © 1935 NEA SERVICE, INC.

**BEGIN HERE TODAY**  
GAIL HENDERSON, pretty, 23, works in a silk mill. She and her brother, PHIL, 19, support their mother and father. STEVE MEYERS, who also works in the mill, asks Gail to marry him. She promises to give him an answer in a few days. That night Gail goes skating on the river. The ice breaks and she is rescued by BRIAN WESTMORE, whose father, now dead, built the mill. Brian asks Gail to wait while he gets his car but when he returns she is gone. Mysterious VICKY THATCHER, daughter of ROBERT THATCHER, general manager of the mill, hears that Brian has come home. Vicky changes her mind about taking a trip to Havana. Next day MARY CASSIDY is discharged from the mill. Gail goes to Mary's home that night. The baby has come. Gail and a neighbor work to save the child's life.

**NOW GO ON WITH THE STORY CHAPTER VII**  
THE girl in green leaned back in her chair. "Well," she said, "I see Vicky's out for game."  
"Vicky Thatcher? What do you mean?" The little blond with the braids around her head put the question.  
"I mean she's out to land the town catch—Brian Westmore. Haven't you seen them?"  
"Oh, was that Brian Westmore?" The little blond leaned forward excitedly. "I saw her dancing with a man I'd never seen before. So that's Brian Westmore! Good looking, isn't he? They say he's been in Paris—"

"Yes, my dear, he's been in Paris. And he's frightfully good-looking. And he's the heir to the Westmore fortune. But don't let that excite you. Vicky Thatcher's made up her mind she's going to have him, so hands off! If you don't—!"  
The young man standing before them raised his cocktail glass and drank. "I don't see why you girls all pick on Vicky," he said. "I think she's a darned nice girl."

"Oh, of course she is!" the girl in green went on hastily. "Sweet as can be—when everything goes her way. When it doesn't—watch out! I remember the way she treated Sally Troy at the Lawrence's house party. The Troys left town a couple of months later. And that Evans affair—well, I'm just telling you I don't ever get in Vicky Thatcher's way! When she wants anything she goes after it—and gets it."

"Vicky's a brunette with a blond temperament and a red-head disposition," put in a third girl who had come up and joined the group. "It's a dangerous combination."  
"She's so pretty," the little blond said. "It's no wonder man like her."  
"They do," the girl in green agreed. "She treats them abominably and they love it. Why is it, will someone please tell me, that girls with the most detestable dispositions are invariably surrounded by fond admirers? Is it because they're so hateful, or in spite of it, that men fall for them? I'd like to know—"

A short, heavily built youth appeared in the doorway. "Oh, there you are, Mari," he said to the girl in green. "I've been looking for you! How about dancing this one with me?"  
Strains of a song—the song of a new Broadway show—reached them. The girl in green arose and said, "Of course, John." She put her hand on his arm and they went out into the corridor.

Vicky Thatcher . . . a brunette with a blond temperament and a red-head disposition.  
It was 11:30 and the Country Club dance was in full swing. The big room was filled with dancers—most of them young. Girls in scarlet, in silver, in yellow and blue and a myriad of other colors moved about the floor in the arms of their black-clad partners, creating a gay, constantly shifting pattern.  
On the platform at the side of the room the orchestra leader had raised a megaphone to his lips and was singing the despairing chant of a cast-off love, to the throbbing accompaniment of piano, banjo, saxophone.  
Vicky Thatcher smiled into the eyes of the man with whom she was dancing. "You do say such nice things, Greg," she said softly. "Darling, do you know what I'd like most in all the world right now? A cocktail—one of those with the cherries, not the other kind."  
"All right," said the young man. "Come along—"  
But Vicky shook her head. "No," she said, "you get it. You get two cocktails and bring them into the lounge. I'll be waiting for you."  
"I won't be a minute," the young man agreed, turning away. Vicky flashed a glance after his departing back, then crossed the

Comic strip panels showing characters talking about writing a composition, a teacher's reaction, and a school assembly.

### Huge Telescope May Explode Old Theories of Space

By United Press  
 SYRACUSE, N. Y.—The Cyclotron telescope "eye" now being completed at the Corning Glass Works, may prove or disprove many advanced theories regarding the universe—including Prof. Albert Einstein's latest belief that space is curved and finite, in the opinion of Dr. Harlow Shapley, famous astronomer and head of the Harvard Observatory.

Dr. Shapley expressed his opinions here before addressing the Technology Club.

"Within six years after the giant telescope has been set up," Dr. Shapley declared, "we may be able to say accurately whether space is curved and finite or open and boundless.

"And this is only part of what the telescope will do. Astronomers will be able to analyze parts of the universe millions of light years away from us, bringing the nebulae into sharper focus than heretofore possible.

Dr. Shapley pictured verbally the vast depths of the outer universe and told of thousands of new island universes found in the far reaches of space through his survey of the Cosmos.

"We have in our survey of the metagalaxy discovered and photographed about 130,000 new galaxies, many of them larger than the earth's immediate universe, he declared.

"Twenty years ago there was no astronomical theory, as we know it. Then the universe was a static thing; today we consider it dynamic.

"Out of our research and the work of mathematicians and physicists has arisen a new picture of the universe in which the laws of cause and effect, once regarded as rigid, no longer have the same meaning."

The doctor told of an exhaustive study he had made of the newly discovered exploding star, Nova Herculis.

"This star," he said, "has increased its brightness more than 200,000 times. The usual exploding star increases only 1,000 times.

### South Dakota May Revamp Its Income Tax Law

By United Press  
 PIERRE, S. D.—South Dakota's gross income tax, restricted in scope by the State Supreme Court, yielded \$3,000,000 during 1934, according to State Tax Director W. C. Welsh.

Welsh, however, is dissatisfied with the present law which expires June 30, 1935. He is rewriting it, hoping to extend its scope and reach all possible incomes. In its present form it replaced the property tax levies 31.5 per cent in 1934 compared to 1933, Welsh said.

The gross income tax was designed to tax every dollar of income from any source. The State Supreme Court, however, ruled that it could only function as an occupational or privilege tax. The court excluded all receipts of interstate transactions.

This permitted farmers and others to evade the tax by selling in foreign markets. It also made it difficult for the tax department to collect on private investments such as bonds and real estate rentals, Welsh said.

The largest items of gross income tax revenue last year included \$983,895 from a one per cent levy on public utilities, communication systems and mines, and \$546,000 from a graduated tax on salaries.

Welsh said he plans to advocate an increase in rates but believes that successful levying on receipts now exempted by the Supreme Court can be provided through an occupational privilege tax incorporated in the present bill. This, he said, would provide an equitable and satisfactory program.

### WHITE HEN PHEASANT IS SEEN

By United Press  
 SOUTH CHARLESTON, O.—A pure white hen pheasant, one of the rarest of game birds, was reported seen at close range near here by three persons.

### YOUNG WOMANHOOD

FOR young girls growing into womanhood, for women in middle life going through the "change," or those who suffer from headache, weakening drains, backache, Dr. Pierce's Favorite Prescription is a dependable tonic. Mrs. A. T. Ford of 112 Roosevelt St., New York, writes: "I have been using your medicine for a period of years. Both my grand-daughter and I have found it an excellent remedy. Before using the 'Prescription' I was so weak, but after taking this medicine I feel like a new woman."

New size, 10-cent, 25-cent, 50-cent, 1.00, 2.00, 4.00, 8.00, 15.00. All druggists.

### "OUT OUR WAY" - - - - - By Williams

### The Newfangles (Mom 'n' Pop) By Cowen

**500 ABANDONED MINES SEALED**  
 By United Press  
 POMEROY, O.—Five hundred abandoned mines in Meigs County have been sealed since last March by FERA workers. Their closing is expected to stop the flow of polluted water into streams.

**HITS ADMINISTRATION CRITICS**  
 By United Press  
 WOOSTER, O.—Ex-Congressman Charles West, endorsed the policies of President Roosevelt and condemned critics of his administration in a Jackson day banquet speech here. "Critics of the present administration policy of spending four billions during the coming year to keep our people from starvation are the leaders of a system which permitted international bankers to take 14 billions out of the savings of our people," West said.

**CITY HAS BIG CASH BALANCE**  
 By United Press  
 MANSFIELD, O.—Carrying over a cash balance of \$82,730.57 in their general operating fund at the end of 1934, city officials here claimed Mansfield's financial conditions "probably the healthiest of any city in Ohio." City Auditor Paul L. Kelley said the balance was the largest in the city's history and is approximately \$75,000 higher than that for the boom year, 1927. Strict economy in municipal operations is given as the reason.

### ALLEY OOP

### 'Dusting the Covers of Texas History' for The Texas Centennial Celebrations of 1936

The first issue of The Texas Gazette was off the press. Wooden peg fastenings on front doors were quickly pulled out as eager Texans hurried to get their copies of the newspaper. Goodwin Brown Cotton remained at his print shop all day to accept the congratulations of his fellow-citizens. He had been confident that his paper would come up to their expectations, and he had not been disappointed. Without a doubt, he had been rather elaborate in his praise of the country, but it was well to give the people back in the states a good picture of Texas.

"We are here situated in an interesting and highly favored portion of the earth. The God of nature has scattered choicest blessings in rich profusion. A temperate climate, salubrious atmosphere, and fertile soil, together with its natural advantages for commerce, all unite to render it by nature one of the most delightful and eligible situations in the world and promise fair to reward with in luxury of abundance the toils of the enterprising and industrious."

Those skeptical relatives in Connecticut and Virginia would no longer doubt the advantages of living in Texas. To correct various stories which had been told of Texas, Cotton had written an editorial.

"Crops are superior. It has been erroneously stated in some places that the seasons are very dry and uncertain and that it never rains, or only at long intervals. The experience of seven years, since Colonel Austin commenced this settlement, totally disproves this statement, for during that period there has not been one season that would not have produced great crops if planted in time and properly tended. . . . The health of Texas generally has been good this year. The towns of Bexar and La Bahia and the country around them are proverbial for health, salubrity, and the longevity of their inhabitants, and Nacogdoches and its vicinity has long been celebrated for health, good water and agreeable temperature."

"It cannot be expected that the present inhabitants of Texas will do much more than lay a permanent foundation for the future value and usefulness of this country," Cotton wrote.

The Texas Centennial celebrations of 1936 are in honor of those

who laid the permanent foundation for the state. Without their courage and efforts to carry on in spite of hardships, there could have been no future "value and usefulness of this country."

The World War cost us nearly \$42,000,000,000, and the world has still to be saved for democracy.

### Divorce Hits Man and Wife Partnership

By United Press  
 CLEVELAND, O.—A partnership in business and romance that had endured for 29 years is broken. Mrs. Jessie W. Allhouse has been granted a divorce from her husband, Harry R. Allhouse.

Mr. and Mrs. Allhouse were partners in the Ohio Wood Products company in the management of real estate properties and other business. Allhouse holds title to Flustedown race track here.

Common Pleas Judge Harrison W. Ewing granted Mrs. Allhouse a divorce after listening to a recital of the differences over business methods that caused a breach between husband and wife.

"We didn't differ over anything but business," explained Allhouse. "Our marital life was smooth."

Mrs. Allhouse said she planned to continue her business career, but Judge Ewing warned her not to compete with her husband's company. The couple has no children.

Last year's drought, the U. S. Weather Bureau decides, after

who laid the permanent foundation for the state. Without their courage and efforts to carry on in spite of hardships, there could have been no future "value and usefulness of this country."

### Clean Out Kidney Poisons

Wash Out Your 15 Miles Of Kidney Tubes  
 If kidneys don't pass 3 pints a day that contain nearly 4 pounds of waste matter, the 15 miles of kidney tubes and filters become clogged with poisonous waste products and the danger of acid poisoning is greatly increased. Bladder poisons are difficult to . . . which often smart and burn like scalding water and cause discomfort.

This acid condition, brought about by poor kidney functions is a danger signal and may be the beginning of uric acid, rheumatism, leg pains, loss of pep and vitality, getting up nights, lumbago, swollen feet and ankles, rheumatic pains and dizziness.

Most people wash their bowels which contain only 22 feet of intestines but neglect the kidneys which contain 15 miles of tiny tubes and filters. If these tubes or filters become clogged with poisons, it may knock you out and lay you up for many months. Don't run any risk. Make sure your kidneys empty 3 pints a day.

Ask your druggist for DOANE'S PILLS, an old prescription, which has been used successfully by millions of kidney sufferers for over 25 years. They give quick relief and will help to wash out the 15 miles of kidney tubes.

But don't take chances with strong drugs or so-called "kidney cures" that claim to fix you up in 15 minutes. Treatments of this nature may seriously injure and irritate delicate tissues. Insist on DOANE'S PILLS—the old reliable relief pills—contains no "dope" or habit-forming drugs. Be sure you get DOANE'S PILLS at your druggist. © 1934, Foster-Milburn Co.

## WARDS FEBRUARY FURNITURE SALE AND SALES FOR THE HOME

**CLEARANCE**  
 Cushion Dot Pricillas, 79c values, reduced to 49c
