LOYALISTS IN BARCELONA SEE POWER FALL

HENDAYE, Spain, Mar. 15.—Extreme left elements were reported today to be seizing power in Barcelona, capital of loyalist Spain, as defense lines crumbled toward the Cateonian border. Dispatches from Barcelona described scenes of panic and said the nationalist attack could be heard from the west where loyalists have failed to halt a four-day drive by the forces of Gen. Francisco Franco. Reliable reports said Loyalist Premier Juan Negri fled to Paris early this week and made a futile appeal for French artillery and airplanes. Unconfirmed reports said loyalist leaders, now established in Barcelona, were preparing to flee France as extremist elements demanded that power be turned over to them. Franco's Moroccan cavalry swept east. It also was pressing rapidly toward the coast in a movement that would cut off Madrid, Valencia and other parts of loyalist Spain from Catalonia.

PARIS, Mar. 15.—The Spanish news Agency said today it had rumors that the government at Barcelona had sent an offer of capitulation to the insurgents but that the agency was unable to recontact Barcelona by telephone. The British steamer Stanwell was bombed and set off Taragona, Spain, today by an unidentified airplane. The vessel did not sink. A rebel hydroplane, manned by five Germans, was shot down near Barcelona, it was announced officially.

Railway Labor Votes To Fight Wage Slashes

WASHINGTON, Mar. 15.—Railway labor voted today to resist vigorously wage reductions that would affect nearly 1,000,000 employees and which has been proposed by American railroads.

George Harrison, president of the Railway Labor Executives Association, announced the decision to fight wage cuts as he started to attend the White House meeting called by President Roosevelt to consider the railroads' critical economic problems.

"There is no justification for a reduction in wages," Harrison said. "The railroads recently got an increase in freight rates, which more than compensates them for the wage increases granted us last summer."

As Nazi Riots Turned to Thunderous Celebration

When Chancellor Kurt Schuschnigg finally capitulated before the iron-fisted ultimatum of Hitler, Nazis who previously had been rioting burst into a wild celebration such as pictured in the striking radio-photo above. Mounted police found their job almost as difficult as during the earlier street clashes, so riotous were the demonstrations of the victorious Nazis. Similar scenes were enacted all over Austria.

GERMAN ARMY PARADES IN VIENNA TODAY

VIENNA, Mar. 15.—The pride of the German army marched past Adolf Hitler today as he formally accepted Austria into the German Reich and proclaimed it to be the newest eastern frontier of Greater Germany and its defender against enemies.

War planes roared overhead as infantry, cavalry, artillery, tanks and armored cars passed in review. About 25,000 German and Austrian troops participated.

Shortly after the review Hitler left by airplane for unich, leaving his lieutenants to complete the nazification of Austria.

In accepting his homeland into the Reich as "the greatest accomplishment of my life" Hitler gave hints of the promised land of nazism when he said, "by work and industry and collaboration we will solve the great social problem."

Hundreds of thousands massed around the square where Hitler stood, madly cheering Hitler and the troops. It was the greatest military display Vienna had seen since the world war.

Regulations for the April 10 plebiscite included a sentence, "Jews are excluded from voting." The high point in Hitler's speech was "as leader I report the entrance of my home country into the German Reich."

Prior to Hitler's speech Dr. Arthur von Seys-Inquart handed over to Hitler his powers as provisional chancellor and president, and was designated by Hitler as governor of the German province of Austria.

The TVA resolutions were tabled in both houses, pending a conference of congressional leaders and the completion of President Roosevelt's conference Friday with TVA directors.

Meanwhile the debate on the \$1,000,000,000 naval expansion bill entered its second day in the House. Rep. James Wadsworth of New York said that the United States needs a navy even stronger than the one contemplated to defend the western hemisphere against the "march of dictatorship."

An instrument for shaking serologic tests, which was invented by J. H. Holt of the West Texas Hospital of Ranger, is described in the February issue of the Journal of Laboratory and Clinical Medicine, published in St. Louis. The article reads:

"The shaking apparatus described in this article was designed to fill the need for a simple, yet efficient and inexpensive means of shaking test tubes."

"The apparatus consists of a complete motor vibrator, such as is used by many beauty parlors and barber shops for massage. The motor is clamped to a ring stand by an adjustable clamp, or may be bolted to a wooden base. The end of the vibrator, to which the rubber tip is attached, has a small threaded hole. By means of a screw passed through the bottom small mailing carton or baking soda can is attached firmly to the end of the vibrator and the junction soldered. Washers are used to reduce the strain on the thin bottom of the carton. When in use the tubes are placed in the carton, the lid screwed on and the motor started. This imparts a vigorous shaking motion the speed of which may be controlled by means of a rheostat.

"An apparatus, such as described above, has been used by the writer (J. H. Holt) for many months, and the results have been entirely satisfactory in every respect."

BOTTOM HOLE WATER WORRY TO LONE STAR

Observers reported Tuesday the Lone Star Gas company was planning to plug back to the bottom of the oil pay in its No. 1 Van Farmer, showing as fourth producer in the deep lime pay area nine miles northwest of Cisco.

Reports were that the hole was full of water and the well had been shut in under pressure. Current developments followed the acidization of the well with 5,000 gallons of acid from top of the lime at 3,972 to 3,988 1-2 feet, total depth.

It was said that the acidization extended total depth about one foot and did not materially increase oil. The bottom hole water was preventing completion as a producer. Operator was to eliminate the bottom hole water by cementing gradually until it is shut off.

No. 1 Van Farmer is 800 feet east of the No. 1 Cozart, also a deepened gas well, which was completed for 288 barrels daily. No. 1 Van Farmer is in section 477, S. P. R. R. survey, about 3,000 feet north and slightly west of the Hiekok Producing and Development company's pool opener on another Van Farmer lease.

LONGVIEW, Mar. 15.—Harry Wells, 24, captured today at Gladewater, told Capt. Lee Miller of the State Highway Patrol that he robbed the Citizens State Bank of Luling, March 5, and wounded two Bee County officers in a gun fight.

Story of Peter Liebman, Who Worked for PWA

Every once in a while a news story makes all the jokes and haggling over work relief seems only mean and cruel. Such a story is that of Peter Liebman.

Peter Liebman left Hungary to come to the United States in 1909, when he was 50 years old. As usual, times were hard in Hungary and the threat of war hung close over all Europe. So Peter came to America. His wife stayed in Hungary.

Peter got a job in Cleveland. He took out his first citizenship papers. Then he sent for his wife, Katherine. Things went well for the Liebmans. Peter neglected to get his second citizenship papers—but no one said anything about it, and Peter didn't think it was awfully important.

Then came the depression. Money was hard to get—even harder than back in Hungary in 1909. Peter lost his job. Then just as his savings were about gone he got another job—with WPA. The pay wasn't much but Katherine Liebman had learned in her 57 years how to make the pennies go far.

Early this year an order went through that only American citizens would be kept on the WPA rolls. So Peter Liebman, never having obtained his second citizenship papers, was out of work again.

He didn't tell his wife about it. Instead he got up at the usual hour the following morning and spent the day looking for work. There was no work for 59-year-old Peter Liebman. He kept on looking, though, inventing little stories each night to tell his wife about the day's work on the WPA project. When pay day came he pretended to be sick and stayed at home. He didn't know how to explain not bringing home his pay the following day, but Katherine didn't ask questions.

Meanwhile Peter applied again for citizenship papers—but these were held up because government routine delayed certification of his entry into the United States.

When the second pay day came, Peter knew his play acting must end. He had been living a lie—to save his wife worry, but a lie just the same. He felt licked. He went into the bathroom and took six poison tablets. And what did Peter Liebman say to his wife Katherine when she came to him in the hospital? He said, "It was the first time I lied to you."

WPA officials say Peter will be able to go back to work when he is well again—providing they are notified of the certification of his entry into the country.

There are several morals to this story. One is that Peter Liebman should have gone through the necessary forms of becoming an American citizen when he first came here.

Another is that he shouldn't have attempted suicide.

And still another is that there are really sincere, hard-working people in this America—like Peter Liebman—who prefer death to begging or asking charity. These people need and deserve help.

High School Play

"Tomboy" Scores Big Hit
"Tomboy," a comedy in three acts, by Boyce Loving, given at the Recreation building last night scored a big hit and is declared one of the best high school plays ever presented. "The Tomboy," played by Priscilla Miller, and played excellently, was given

beautiful support by other members of the cast. One would be hesitant in believing the characters had only four weeks of coaching, but under the splendid ability of Miss Lolita Connelly and Mrs. O. B. Denney, the play progressed well, culminating in last night's performance, attended by a house taxing the capacity.
