If Europe Fights, It Will Be Over European Issues

Today, anyone with a long memory has a dream-like feeling that he has lived through all this before.

Yes, it was in 1914 that an expanding, ambitious imperial Germany, bitterly complaining of "encirclement," ran headlong into war. And the cry rang out, "Save the world from this barbarism, this militarism!"

Imperial Russia, that historical defender of the rights of minorities and of small neighbor peoples, rushed to war, and with her France, bound by a military alliance. England hesitated a bare moment, then plunged into the mael-

We know now that Eritain, France and Russia went to war for one basic reason; to prevent the rise of a great German power on the continent of Europe.

Today it is happening all over again. A resurgent Germany seek domination over Europe, and again Britain and Regulation of the France seek to prevent it.

Again Germany cries "encirclement!"

Again the cry of democracy is raised, but Britain allies herself with the Polish dictatorship, and seeks aid from totalitarian Russia, while France gives dictatorial power to her own ruler.

A world recoils with horror at the German purges and persecutions of minorities, yet we are asked to sympathize lation, and especially Federal regwith Poland, whose treatment of minorities certainly leaves | ulation, of the film business, has semething to be desired, and with Russia, whose arbitrary and brutal purges rival Germany's.

Planning 1940 Auto License Plates Has Already Started

AUSTIN, fex.-Now that evrvone has bought 1939 motor vehicle license plates and put them on, we sigh and say, "That's taker care of for another year," and proceed to forget it. But in the Highway Department at Austin, their work begins all over again.

The 1940 plates must be designed, ordered, manufactured, and delivered to County Tax Collectors by February 1, 1940. The order must be placed early so the prison system at Huntsville, where the plates are manufactured, may buy the steel and paint used in making the plates. All the forms used in register-

ig motor vehicles must be order ed and delivered to the counties and shipping lists revised annual y, for movement of oil field traffrom one field to another causes changes in the number of plates sent each county.

The white background paint of 1938 did not prove durable and many plates rusted. So the departnent's paint chemist who has had years of experience with paint for center striping, equipment, guard fence, bridges, etc., was called on to write complete specifications governing the manufacture and application of paint. An inspecto representing the department was present at the factory while the paint was manufactured, and at the prison while the plates were being made. This procedure was started with the 1939 plates and will be continued.

Sample plates of other states are checked and often a color
