# AMERICAN FORCES OCCUPY ICELAND

## ANNOUNCEMENT IS MADE TODAY BY PRESIDENT IN A SPECIAL MESSAGE TO THE CONGRESS

### American Naval Forces Are To Replace And Supplement British Troops Now Holding Island

WASHINGTON, D. C., July 7.—President Franklin D. Roosevelt today announced that United States forces have occupied Iceland.

The president announced the move in a special message to Congress this afternoon, advising the legislators that American naval forces had arrived there to supplement and replace British troops, which have occupied the island since the German invasion of Denmark in April, 1940.

### Mrs. B. L. Hargus Died Sunday A. M.; Funeral Today

Funeral services for Mrs. Mackie Gilbert Hargus, 72, wife of Barry L. Hargus, prominent Eastland county farmer-stockman, who died at 9:30 Sunday morning, were conducted from the Eastland Methodist church of which she had been a life-long member, at 4:00 o'clock this afternoon. The pastor, Rev. Lance Webb, was in charge of the services.

LONDON, July 7.—The Moscow Radio heard in London, reported tonight that Soviet tanks counter-attacked in the Ukrainian sector, destroying 300 Nazi tanks, capturing 12 long-range guns and taking 500 German prisoners.

The Russian Red Army was reported to be counter-attacking or repulsing the German mechanized armies with heavy losses on the entire Central Front guarding Moscow today, but in the south the Nazis claimed they had made a breakthrough in the Stalin Line in the Ukraine.

Neither Berlin nor Moscow officially reported sufficient details of the hard fighting—including a big night tank battle along the Eastern Front to give a positive picture of the operations. In general both communiques agreed that the German offensive toward Moscow had been blunted, if not driven back sharply.

On the Central Front Moscow reported that the enemies' mechanized forces had been repulsed with heavy casualties from Ostrov, near the Latvian border, southward to Bobruisk, on the Berezina River, and the Russians were on the offensive in the Lepel sector.

On the Southern Front the German news agency claimed a breakthrough on the Stalin Line in the Ukraine, apparently in the sector 120 miles from Kiev. The news agency gave no details to indicate the Nazis had done more than capture a few fortifications.

The Russian communique was in sharp contradiction to the German claims in the south. Moscow said that the mechanized forces had suffered heavy losses when they had been repulsed in the Kiev sector and in Bessarabia.

On the Far Northern Front the Germans reported that their forces were advancing, with Finnish support, in the direction of Murmansk while bombers cleared the way with heavy attacks on enemy positions and bases.

### Scranton Residents Try Wooden Nickels

SCRANTON, Pa.—Scranton residents are using wooden nickels these days which may not fit in phone slots but still will be considered legal tender until July 25.

More than 20,000 of the unusual coins were put in circulation by city officials in commemoration of Scranton's jubilee and centennial celebration.

The rectangular shaped woodens will be included in pay envelopes, mailed to former city residents in the hope that they will return to spend them and in many cases simply keep as souvenirs. Money realized on the sale of the special specie will be put on deposit.

### Kilgore College Has Given First Degree

KILGORE, Tex.—Kilgore Junior College bestowed its first honorary "degree" recently, honoring amiable Knox Lamb, local theater manager, for his interest in college affairs and his help in development of the 53-girl Rangerette Corps.

Lamb carefully framed his honorary certificate of graduation and said: "For a guy who couldn't get out of the third grade, I'm doing all right."

Lamb was just being modest, however, for he's invited all his friends to his office to take a look.

### PERU USING ARTILLERY ON EQUADOR LINE

GUAYAUL, Ecuador, July 7. Frontier dispatches reported today that Peruvian artillery was bombarding the Ecuadorian village of Aguallas, as Ecuador and Peru engaged in an undeclared war, shattering peace in the eastern hemisphere.

Well informed quarters expected President Arroyo Rio to assume extraordinary powers to deal with the situation.

Official dispatches, meanwhile, indicated earlier reports that Peruvian forces had occupied several frontier points.

Ecuadorian troops are reported to be holding strong all along the border.

WASHINGTON, July 7.—Acting Secretary of State Sumner Welles today said that hostilities between Peru and Ecuador form a matter of profound regret to the Americans, and indicated that there is suspicion existing at the trouble was fomented by outside sources.

### H Club Boys Win Free Trip To Cheyenne, Wyo.

Marvin Dupuy of the Des Moines 4-H Club and William Eakin of the Carbon 4-H Club won a free Educational Tour for 4-H club boys to Cheyenne, Wyoming, a result of the outstanding 4-H club work they have performed in Eastland County this year.

This trip is an annual affair held each year, that is judged to be the most outstanding work in the 4-H Club. These boys will be accompanied by other boys who have done outstanding work in District No. 7. There will be boys and five county agents making the trip in a school bus.

Marvin Dupuy has been in 4-H club work for four years and has some very outstanding work with crops and dairy cattle. Recently he was a gold award winner in the crops contest and was one of the seven boys of the county in a similar award. He used crops as his demonstration, for three years and used the money to buy dairy cattle. He now has several good dairy cows on his place and is continuing to raise crops to feed them.

William Eakin has been in 4-H club work for three years and has had crops and sheep as his demonstration. He was one of the first boys in the county to market his feed crops through the year and has been very successful. Recently he received a gold award in the crops contest. He plans to improve his herd and show in several stock shows. Along with this he plans to finish 12 lambs for the year.

According to John A. Wright, district county agent, the following is the approximate course of the tour: Spur, Lubbock, Amarillo, Clayton, New Mexico; Denver, Colorado; Cheyenne, Wyoming; Omaha, Nebraska; Kansas City, Kansas; Joplin, Missouri; Fort Worth, Oklahoma; Denison, Dallas, Brownwood. This will be approximately a 2500 mile trip.

The boys leave August 2nd, and return August 14th.

### Defense Bond QUIZ

Q. How much money have the American people invested in Defense Bonds and Stamps since the savings program began?  
A. Total sales from May 1 through June 21, 1941:  
Series E Bonds... \$185,736,000  
Series F Bonds... 61,488,000  
Series G Bonds... 376,795,000  
Total Bond Sales \$624,020,000  
Series Savings Stamps 5,677,000  
Total—To buy Defense Bonds and Stamps, go to the nearest post office or bank, or write to the Treasurer of the United States, Washington, D. C., for an order form.

### Truckload of Morale for Uncle Sam's Boys

Army truck transports, military escorts, as Northwestern University girls leave Chicago campus for Fort Sheridan, Ill., to dance with soldiers.

### HITLER-NAPOLEON ANALOGY AMPLIFIED BY SIMILARITY OF THEIR RUSSIAN CAMPAIGNS

NEW YORK.—Germany's war on Soviet Russia seemingly has placed the capstone on the analogies that have been drawn between Adolf Hitler and Napoleon.

Historians agree that Napoleon did not want the Russian war. He desired peace, and Hitler has repeated that wish several times since his armies invaded Poland in the fall of 1939. But Napoleon wanted peace on his own terms, as Hitler does.

More than 100 years ago Lord Wolsey, English field marshal, termed Napoleon's war on Russia as "merely a very important episode in the life-and-death struggle with England."

Napoleon had a mighty force for the campaign that was to end so disastrously, with some estimates as high as 680,000 and others as low as 450,000. But military historians are agreed on the great cavalry strength, which consisted of at least one-fifth of the entire force.

The Grand Army crossed the Niemen river on June 24, 1812. Hitler's legions struck just two days earlier, on June 22, 129 years later.

Russian Force Divided  
When the French advanced from Kovno, Ploona and Brodno, the forces of Czar Alexander were divided. One Russian army commanded by Barclay de Tolly, numbered 127,000 and was spread out thinly along the line Schavli-Vilna-Prushany. The other first under Prince Bagration, numbering 66,000, at Lutsk, was separated by the upper Pripiet marshes.

Napoleon's strategy was to move forward to Vilna and separate Tolly from Bagration. Tolly fell back and the French entered Vilna on the fourth day of the campaign. There Napoleon delayed until July 16 because his supply lines had broken down. In the meantime the two Russian armies formed a junction at Smolensk.

While the Russians declined engagement in the early weeks of the war, Napoleon's armies suffered heavily. The summer took its toll of both troops and horses. Dust, heat and drought brought on an epidemic of dysentery. Saint Cyr's Bavarian corps lost from 800 to 900 men a day. Horses foraged on green crops and died of colic until the mounted force lost a third of its strength.

Last Stand Before Moscow  
Napoleon pressed on despite these reverses, lengthening his line of supply, and still the Russians fell back. But on Sept. 3, the van of the French forces halted on the right bank of the Kalatsha river opposite Borodino. The Russians were to make one last stand before Moscow.

The night before the battle Napoleon issued a stirring address to his troops, summoning them to

### Public's Lien On Football Is Great

OKLAHOMA CITY, Okla.—The men and women who have invested millions of dollars in football stadium bonds at hundreds of universities throughout the country are the principal reason why intercollegiate football must continue as a big business, Joseph A. Brandt believes.

The president-elect of the University of Oklahoma contends that university presidents and boards of regents have little choice but to let football remain a major enterprise because of the heavy investments of the general public.

Brandt, who takes over as president in August, said he was personally opposed to intersectional games. He said, however, that he had no intention, at least now, in trying to keep the Oklahoma team from scheduling games outside the Big Six Conference.

Oklahoma played Santa Clara in California last year. The year before the Sooners played Northwestern at Evanston, Ill., and the year before that went to the Orange Bowl game at Miami, Fla. "Football and baseball," said Brandt, "are accepted American sports. They are of some importance to college institutions."

Brandt was responsible for the Oklahoma team scheduling a 10th game for the 1942 season with William and Mary, historic Virginia school. He met Coach Dutch Voyles of William and Mary at the Princeton University campus and called Athletic Director Lawrence (Jap) Haskell at Norman and suggested the game as a feature of Oklahoma's semi-centennial celebration.

Brandt is responsible for the Oklahoma team scheduling a 10th game for the 1942 season with William and Mary, historic Virginia school. He met Coach Dutch Voyles of William and Mary at the Princeton University campus and called Athletic Director Lawrence (Jap) Haskell at Norman and suggested the game as a feature of Oklahoma's semi-centennial celebration.

### New York Yorking

Napoleon had entered the city on Sept. 14, two months and 20 days after the Grand Army started its advance. Meanwhile, the Russians had begun a wide-scale guerrilla war on the French line of communications and this danger prompted Napoleon to evacuate the city before the winter season. On Oct. 19, at the head of 108,000 men, heavily laden with loot and booty, he set out for Smolensk on what was to be the most famous retreat in history.

The chill winter was approaching although the cold was not intense yet. The Grand Army, however, was in summer uniforms and scarcely a soldier had sturdy boots. The long lines of men marched down roads lined with charred ruins, and stretching far in every direction were devastated fields. As the army skirted the battlefield of Borodino the horrors of the battle were recalled.

World War hero Alvin C. York arrives in New York for opening of movie built around his life.

### Battle of Bums Tonight Will Be Just a Big Joke

By United Press  
ABILENE, July 7.—L. D. (Pup) Thomas sells automobiles when he's not selling haberdashery. That is, when he is not trying to sell a four-round fight to the fans.

Thomas has sold many a scrap to the fans. There was his Max Baer-Babe Ritzche tussle in Lubbock a couple of years ago in which he gave Baer a cool \$10,000 to stop Ritzche. Then there was his "battle of the Babes"—the Babe Hunt-Babe Ritzche fight at Odessa last year which drew a record Texas fight gate.

He once even dreamed of a Joe Louis-Max Baer brawl and plunked down \$75,000 to have it fought in New Mexico.

Now comes Pup Thomas' latest, and perhaps wildest, brainchild—the pitting of "two-ton" Tony Galento against Kingfish Levinsky in what Thomas calls the "battle of the bums." The scrap is scheduled to be sandwiched in between a pair of more bloody bouts tonight at the Abilene High School stadium.

For a 55-cent bleacher seat Thomas offers a glimpse at the scrap for the scrawny crown of America. There'll be a barrel-shaped Tony leading with his 42-inch waistline as he tangles with the gaunt-faced former Chicago fish peddler. Fans are hoping Tony, who usually trains on a rigid diet of beer, will be slugging hard and that the Kingfish will revert to his old you-hit-me and I'll-hit-you-harder tactics which skyrocketed him to boxoffice prominence back in his prime more than seven years ago.

Pup Thomas isn't trying to put anything over on the fans. In fact, he's the first to admit the cigar-smoking Galento and the generous Kingfish are has-beens. Pup admits the bout will be no comeback effort on the part of either fighter—in other words, nothing more than a ring-full of laughs.

Galento reached the top in the prize ring despite his freakish actions and appearance. Less than two years ago the 250-pounder gave heavyweight champion Joe Louis a scrap for four rounds and had the Brown Bomber on the floor in the early sessions.

Levinsky, although a younger man than Galento, has been out of the fight game for some time. The Kingfish fought a 20-round draw with Max Baer several years ago at Reno and it was Levinsky who played a leading role in stopping Jack Dempsey's ring comeback.

After Dempsey, in his comeback, had laid out more than 100 foes in less than a year, Levinsky stepped into the ring with the Mauler and walked out with a decision.

"If that guy can beat me," Dempsey said, "I know that I'm through."

However, at the high peak of his career Levinsky was a nervy kid who fought Primo Carnera twice, Max Baer three times, Jimmy Slattery twice, Jack Sharkey, Maxie Rosenbloom, Mickey Walker, Jack Dempsey and Joe Louis.

### Daddy Was a Hero

Martin and Rosemary Featherstone examine the British Distinguished Service Medal posthumously awarded their father, Chief Petty Officer Bertie Featherstone. Attached to H.M.S. Esk, he died in action.

### Folk Dancing Is Scheduled To Be Held In Ranger

A free square and folk dance festival will be held in Ranger Tuesday evening, beginning at 8 o'clock to which all lovers of the old-time dances are invited. It will be held at the Municipal Park just south of the swimming pool, on a large dance pavilion which was built for that purpose.

A band from Eastland will furnish music for the occasion, and a square dance team from Eastland is expected to be present, along with teams from Strawn and other surrounding towns.

No charge will be made, either for dancing or for spectators who wish to attend and watch the proceedings, it was stated today, and the public is invited to attend.

If the dances prove popular it is expected that they will be made semi-monthly affairs throughout the summer.

In addition to square dancing old-time folk dances will be presented, including such popular dances as the heel and toe, schottische and other similar dances.

### Settlement of Coal Strike Ends Threat Of Serious Nature

NEW YORK, July 7.—Settlement of the long and bitter dispute between the United Mine Workers and the southern coal operators today banished a threat in New York of stoppage of the bituminous coal industry, which was considered a serious threat to the national defense program.

Fallbearers were Clyde Wellman, John Nix, P. L. Crossley, Earl Bender, Jack Frost, Curley Maynard, T. M. Collier, V. T. Seaberry.

### Colonel Fish

Off for a month of training at Fort Bragg, N. C., is House isolationist Hamilton Fish. He's a colonel in the specialist reserve.

### Ranger Youth Has Earned Promotion To a Radio School

Private James G. Cox, son of Mr. and Mrs. Walter Cox of 297 Gord St., Ranger, has been sent by special order of Lieutenant-Colonel George M. Palmer, post commander of the Air Corps Basic Flying School at San Angelo, to the Army Air Corps Technical School at Scott Field, Belleville, Ill., where he will pursue a course in radio operation and mechanics.

Private Cox won this appointment in an open competitive examination given to all men at this station. Upon completion of his course Private Cox will be assigned to a key position in Uncle Sam's rapidly expanding defense program.

### COCONUT SHELLS IN GAS MASKS

By United Press  
SYDNEY, Australia.—Erection of a factory in New South Wales to produce activated carbon from coconut shells is hailed as an example of wartime resourcefulness. Activated carbon is an essential component of gas masks.

### BISHOP BANS LOVE LYRICS

By United Press  
BRADFORD, Eng.—The Bishop of Bradford, Dr. A. W. S. Blunt, has imposed a strict ban on the playing of profane music at church weddings. "It's indecent," he says in the Bishop's Messenger, "to secularize the atmosphere of a church wedding by the introduction of love lyrics of the stage and drawing-room."

## What the Seas Mean to the Earth

Of the whole surface of the earth, more than 70 per cent is water; less than 30 per cent is land.

The oceans of the world are its greatest highways. On them, above them, under their surface, move the bulk of the world's vital commerce.

We of the United States, who happen to inhabit one of the greatest and choicest of the world's land masses, often think we are more or less independent of the sea. To Britain, to Scandinavia, to Chile, the sea is the breath of national life. So it was to us in the early days when we were a narrow ribbon of colonies along the Atlantic coast. During the hundred years when we were absorbed in developing the west, we thought less of the sea. Then, as the present century dawned, we began to realize that as our own land grew larger, the world was growing smaller, and that all our vast continent was but an island surrounded by the encompassing sea.

The great struggle of 1914-1918 was, in one very important sense, a struggle for control of the sea. With such control in British hands, we felt at least that it was in hands unlikely to oppose our own aims and interests. We saw to it that it remained that way.

Now again control of the sea, present and future, is being contested on a broad scale, with a new element entering—control of the air above the sea. No longer is there any sea control without control of the air above it. The present war has made it perfectly clear that any nation to whom sea power is a necessity must control not only the sea surface on waters closely affecting its interests, but the air above it.

The United States now has every reason to believe that it has the greatest navy in the world. With the new bases in the Atlantic and Pacific, when they are completed and equipped with air strength, we should be in an effective defensive position against any single nation.

Unfortunately the world has gone beyond that, for a new technique has sprung up, of international coalitions linked by common governmental ideals as well as interests. A coalition of Germany, Italy, France, Japan, and a host of smaller conquered nations is now much more than a possibility.

Against such a coalition, no country, not even the United States, can build sea power that will guarantee security. That is why such a coalition must not be allowed to develop.

And that is why the "after-the-war" problem must include some sort of a solution providing that the seas, common property of all the peoples of the world, must be free on equal terms to all.

When the price of wheat goes up, grocers say it with flour.

## Starting After Another Bottleneck

### SERIAL STORY

## ANOTHER MAN'S WIFE

BY DONNA ASHWORTH

COPYRIGHT 1941, NEA SERVICE, INC.

YESTERDAY: Settled in Farmington, Lisa—now Ann Marshall—goes to church. She's mother and dislikes her. She expects Ken to call, but he has to take his mother visiting and to church again. Ann sees herself sitting alone, while Lisa escorts his mother.

### COUNTRY CLUB SUPRISE

#### CHAPTER VII

AT last Farmington had recognized Ann. Slowly, fearfully, as if afraid it might do the wrong thing, it had taken her in. Neighbors had called. She had been invited to parties. And Ken had made it evident for all to see, that he was interested in her. Only his mother did no more than greet her at church. So far, the much-sought-after invitation to tea had not arrived.

"That's just Mother, darling," he explained. "It takes time. . . . Time," snorted Ann as she looked into his eyes. "I came here the first of February and now it's March. Have you told her yet that you expect to marry me?" "Darling," he protested. "You know I haven't. She would be horrified to know I could be engaged to a girl I had known less than two months. I have to go slow. I want her to like you and approve of everything we do. "Which reminds me, I'm taking you to the Country Club, darling, to the opening spring formal. You will get to know everybody you haven't met. There are a lot of members in the smaller towns around and then they invite people from Richmond. It really is quite an affair. After that you won't need to worry about what people are going to say."

was beside him, his arm was about her shoulders, they were driving through a perfect moonlit night, and that was all that mattered. "It may be too late when she does." She laughed as she spoke. "I might have another engagement. But forget about her. Kiss me and tell me you love me and let's think about the dance and what a good time we are going to have."

ANN planned for the dance eagerly, bought a new dress for the occasion. As she sat before her dressing table that night, giving a final touch to her make-up, Sally stood back and surveyed her. "You look lovely. I do believe you get more beautiful every day. And say what you will, this rest has done you a world of good. I hadn't realized how tired you were, now you look as fresh as a spring day."

"Thanks. I hope Farmington thinks so," answered Ann as she stood up and for the twentieth time looked at the full view reflection of herself to see that everything was right. Her hair was rolled high in front and hung in a mane of gold about her shoulders. Her dress was white satin, a slim gleaming sheath that revealed her white throat and shoulders, that fell in a swirl of folds about her ankles, with a lovely jeweled belt and clips.

"You're lovely, sweet." He caught her as she reached the last step. "Lovely, than I've ever seen you. Everybody will be crazy about you." The car sped over the highway, into the Country Club driveway. The echo of laughter floated out from the clubhouse, the music of an orchestra, gay voices. So this was Farmington's society at play.

"I hope so," she murmured, her eyes dancing. The music had stopped. People were crowding about; men were asking for dances. Ann had never known this kind of dancing, this way of being rushed, had never heard this kind of compliments.

At intermission she walked out on the veranda with Ken, clinging to his arm. It was chilly, but she did not even feel the cold as she stood by the porch railing looking out over the rolling fields toward Farmington, twinkling in the distance like a tiny jewel. The stars were so close she felt she could reach up and touch them. Cold—she wasn't cold, not when her heart was warm and glowing.

As Ann and Ken stood a moment at the entrance, watching the scene before them, there was a startled exclamation from a tall, rather handsome, middle-aged man standing in the stables just a little beyond them. He was staring at Ann.

"Jean! Am I seeing things? Am I crazy? Jean's darling!" HE rushed toward Ann, catching her shoulders, peering into her face. She had a glimpse of dark blue eyes, straight, good-looking features, black hair sprinkled liberally with gray, but she couldn't think, for he was flinging words at her. "Jean . . . you aren't . . . you can't be Jean Ann. . . . Why it's been 25 years. . . . I—I thought you were dead."

## Nova Tells 'Em What He'll Do to LOUIS

Lou Nova, in land of big lakes and pine trees near Jackman, Me., tells group of young admirers how he'll battle Joe Louis in New York in September.

### THE PAY-OFF

BY HARRY GRAYSON  
NEA Service Sports Editor

FOR signing with Detroit, Richard Cummings Wakefield parted to have banked \$45,000 of the too much money in the hands of Walter O. Briggs is fortunate enough to have.

Fancy the St. Louis Cardinals, for example, giving a 20-year-old college outfielder anything like that, especially in these times of dough in his life.

Owner Briggs may be stuck for \$45,000 he wouldn't mind though inexperience is not necessarily a fatal handicap to attempting to crash the big wheel from law.

FROM college campus to the big show may not be baseless, but it has been done. Indeed some of the game's great names, past and present, stepped directly into the arena from high school.

Bob Feller and Mel Ott are current striking examples. Pitchers frequently find the long jump fairly simple. Eddie Plank was fresh from Gettysburg and Jack Combs from Colby when they reported to the old Athletics.

Connie Mack signed Edward Trowbridge Collins from Colby, we require his University. Walter Johnson was a long legged lad from Fullerton, Calif. High School when Clark Griffith first saw for Tom Zachary skipped from Guilford College to the Senators.

GEORGE UHLE was as effective for the Indians as was his Cleveland high school. Herb Pennock came out of Wenonah Military Academy, Pennsylvania. Ted Lyons had pitched for no other club than a of Baylor.

Hal Schumacher learned the fundamentals at St. Lawrence University. Frank Frisch slid from the Fordham campus, and there is doubt that Lou Gehrig could have made the grade at the school had the Yankees needed him. The same is true of Joe Judge.

Dick Wakefield, who foregoes an economics course at Michigan as a sophomore to take his whirl, does not have to go to Ann Arbor to find a precedent.

George Harold Sisler left Michigan requiring no further coming, no help. If young Dick Wakefield turns out to be any part of a Sisler, Walter O. Briggs will have a bargain . . . and then you

## THIS CURIOUS WORLD

Two of the gleaming speed appropriately named the "Potters," will be placed in service that date to extend light-high-speed passenger service the mineral-rich, 650-mile route to the Utah cap

# New, Secret Tools Telescope Cannon-Making Days into Hours

## Once-Laborious Process Is Now Four To Ten Times Speedier

By NEA Service  
WATERVLIET, N. Y.—The big news about the booming cannon business is speed.

Miracles of metallurgy are making better guns, of course, but one important right now is the acceleration of manufacture. Almost every item in the artillery line short of huge naval and seacoast guns is being turned out from four or five to ten times more rapidly than ever before.

But a layman visiting the Watervliet Arsenal has a hard time adjusting his perspective to vital technical details. This entire government factory and laboratory is impressive enough, from its ancient copy cannon under the great eaves to the vast building where a score or more of the biggest guns of the modern world are being machined on lathes that are 208 feet long.

It was all begun in 1813, on a site flapped by spring floods of the Hudson river and called "Waterlet" because that's a Dutch word meaning "flowing stream." The 12-acre reservation has grown to 108. The other buildings—where paper cartridges, saddles and harness, percussion caps and currying combs once were made—are warehouses now, filled with millions of dollars worth of cannon and parts. The first cannon shop was built in 1887, but most of them date from the \$16,40,000 expansion of the World War.

And now the arsenal makes cannon exclusively. Not the cranes and recoil mechanism nor the breech—just the shooting unit on breech block to muzzle. "Development is the first part of our job," explained Col. J. C. Varty. "From blueprints, we make a 'pilot' gun by hand and take it to the Aberdeen Proving grounds for testing.

"Every cannon of U. S. design is made by private industry and then put into production here. In our procurement program, we require factory experts to come and study our operations before they submit bids for contracts, because guns are tricky to

pressing forward into a long forging which would be a 90 mm. anti-aircraft cannon. The forging itself was whirling around the lathe at a speed which would have burnt up any previously designed tool.

"This job used to take from eight to nine hours," Knight said. "Now we get a finished borg in an hour and a half."

The same amount of time is saved in rifling some of the cannon. Previously—a 37 mm. gun, for example—a cutting tool would move back and forth in a bore for about eight hours as it ploughed out metal and left the spiral ridges which gave the projectiles their whirling stability in flight.

Today the rifling is done in an hour and a half by pushing

through the bore of a series of 28 "broaching discs" of an amazing hardness.

**GREATER PRODUCTION WITH FEWER MEN**

For this same cannon, the breech recess and block that closes it are square. The new type mechanism allows faster firing, but until recently it was the slowest to manufacture. Making a square hole in a heavy chunk of hard steel was mostly a grinding job and took about 25 hours. Today they drill a round hole and then use hydraulic pressure to force breaches through it. These tools are long bits bristling with cutters, and they change shape along their length. The sixth one leaves a perfectly square hole, and the whole process takes 30 minutes.

There are other developments which can't be described in the speed-up of cannon making. Better steel also makes possible the manufacture of some guns, up to six-inch bores, in one solid piece. Longer life and better performance come from honing the bores with abrasive stones which give a hard, polished glass. And there's a secret treatment that increases the density and strength of the metal.

Faster and faster, they roll out the barrels at Uncle Sam's big Watervliet cannon factory. Microscopic precision rules each job, symbolized by the workman (top) checking inside of barrels with star-gauge that registers to 1-1000th of an inch. At right is seen a huge gun barrel suspended from one of the overhead cranes that swing 217-ton barrels "like jackstraws." At left, above, an inspector looks over the glass-smooth surface of a giant "rifle," destined for naval or coast defense use.

Production figures are not available, except that Knight declared that twice as much material is being made here now, with some 3500 employees, as during the World War, when there were about 5000 at work. Besides, several industrial concerns are making cannon on contracts from Watervliet, and using machines leased to them by the arsenal.

In apathetic peacetime, the Army has difficulty keeping its arsenals going, and there was one trying period about eight years ago when the Watervliet shops

had only 37 mechanics. Luckily, though, the Navy got some money to spend, and an order for 5-inch anti-aircraft guns was given this arsenal. Activity spurred, and development work was done on new cannon-making processes. Some new equipment has been coming from machine tool concerns for four years, but much of it has been built since the defense emergency was declared.

### OUT OUR WAY BY WILLIAMS

### FRECKELS AND HIS FRIENDS

### Hitler-Napoleon—

(Continued from Page 1).

rors of that conflict still were evident. The ground was covered with unburied corpses, French and Russian alike, lying where they had fallen.

**Napoleon Walked With Men**

Napoleon no longer rode on horseback. Sometimes he used a carriage but more often he walked with his men. He was brooding and listless. On Nov. 14 it began to snow and the Grand Army now really began to suffer from the cold.

The Russians were harrying the French constantly with raids on vulnerable flanks and the rear. At Wiazina a small-scale battle was fought in which the French lost 4,000 and the Russians 2,000. Neither army seemed inclined to force a decision and the French resumed their retreat until brought to bay at Beresina on Nov. 28-29. Napoleon's losses were heavy in this engagement, running as high as 25,000 killed and wounded, according to some estimates. On the closing day of the battle a severe frost ushered in the Russian winter.

The French army took up the march again and the Russians continued their harrying tactics. Napoleon at this stage was pale, silent and grim as he trod the rough ground beside his troops. He wore a long Polish fur coat and carried a stout staff. He shared the hardships of his men, bivouacking in the snow and eating the meager rations of horse meat broth thickened with flour.

**Famous Order Futile**

As the Grand Army became

**Q. WHAT 'MAKIN'S' TOBACCO PRACTICALLY ROLLS ITSELF?**

thinner and the men weaker, the Russians became more daring. Their strategy was to contact the main French force so Napoleon headed his march for Borisov but the enemy under Tchitchagov beat him there. It was then that the Russian commander issued his famous general order to his subordinates—that all captives below medium stature be brought to him. "He (Napoleon) is short, stout, pale, has a short, thick neck and black hair," the description said. But the prize prisoner was not to be taken.

By early December the mercury was as low as 25 degrees below zero. The remnant of the Grand Army was swathed in clothes of dead comrades, rags, and even cast off women's garments.

On Dec. 8 at Smorgoni, Napoleon handed over command of the tattered remnant of his army, which numbered scarcely more than 5,000, to Murat. The emperor departed for France.

Of the Grand Army that crossed the Niemen in June, it was estimated that 250,000 perished, 100,000 were captured and another 100,000 were missing—they had dispersed and straggled away. Russian losses were estimated at 200,000.

Building Trade With South America Means Rejiggering of U. S. Trade Practices

BY PETER EDSON  
NEA Service Staff Correspondent

WASHINGTON—A good many unorthodox things may have to be done before this war is over in welding the Americas, North, Central and South, into an economic unit. But one of the more orthodox steps taken in furthering commercial relations between the United States and the 21 southern republics is the formation of a chain of Inter-American Development commissions, one for each country, to study foreign trade needs and the problems of internal economy so that all the countries can help themselves and help each other overcome the handicaps of having the pre-war trade channels broken by the messing up of Europe.

Ten of these Inter-American Development commissions have already been set up and are functioning, and the other 11 will get going just as fast as they can be organized. Impetus for their creation comes through the Rockefeller Office for Coordination of Commercial and Cultural Relations Between the American Republics, and young Nelson A. Rockefeller is co-ordinator of the whole movement, with State Department blessing.

A hypothetical case will show how these development commissions will work. Brazil has been exporting increasingly large amounts of raw cotton to Europe. That trade cut off, Brazil decides she needs mills of her own to manufacture cotton goods for local consumption.

The Brazilian Development Commission, made up of Brazilian business men and government officials, looks over the project. They determine how much Brazilian capital they can get together, what capacity the mills must have, how much machinery they'll need and where they can get it. If they can't swing the whole proposition themselves, they determined how much foreign capital they'll need. If it can't be obtained privately, maybe some Santa Claus money would help, so the proposition is put up to the U. S. Export-Import bank, which was organized with a \$75 million capital for just such foreign trade developers as this.

Another way the development commissions have been working is in promoting more trade between the South American republics themselves. Surprisingly enough, these countries are just finding out they can trade with each other. Chilean nitrate can be swapped for Argentine meat. Brazilian coffee and fruits can be bartered for Argentine grains. Venezuelan oil, its European market cut off, is finding an increasing place in the markets of Brazil and Uruguay, which have no oil, and in Argentina—which produces only 40 per cent of its consumption. That inter-American trade was up 9 per cent last year over the year before, and it will be up still higher in 1941.

ALL this above comes under the head of orthodox trade development. Some of the Rockefeller-engineered deals have been more unorthodox, like the Argentine tinned beef purchase, which, while perfectly justified because the United States can't produce quality canned meats at a price that competes with the South American product, still had all kinds of opposition.

One of the most striking examples of how international trade has to be rejiggered to meet war conditions comes in considering another phase of the cotton problem. Because of the shipping shortage, Canada has been having difficulty in getting the cotton she formerly bought from Brazil. If the worst comes to the worst, the United States may have to give Canada U. S. surplus cotton, taking a change for it cotton stored in Brazil.

of the Church of God in Campaign, Tennessee married the young couple.

The bride wore a navy blue and white chiffon dress with navy and white accessories. Her corsage was of white gladioli. For something old the bride wore a locket which had belonged to her great grandmother.

The living room of the home was beautifully decorated with daisies and gladioli.

At the reception following the ceremony Miss Vera Lea Hall presided over the punch bowl and Miss Elizabeth Barker served the three tiered wedding cake which was decorated with a small bride and groom.

The young couple will make their home in Dallas.

Guests attending the wedding were Goldie Luttrell, Mr. and Mrs. W. B. Melton and son, Mr. and Mrs. L. A. Luttrell, Jr., Mrs. Joe Young, Miss Lyla Johnson from Tennessee; Mr. and Mrs. Jeff Laughlin, Mr. Rupert C. Starr, Mr. and Mrs. S. H. Smith, Mrs. Nell Griffice, Rev. and Mrs. George Brazell from Tennessee; Mr. and Mrs. J. E. Hall, Mr. and Mrs. S. S. Luttrell.

### Ruth Class To Have Picnic

The Ruth Class of the First Baptist church will be entertained with a picnic at the Willows Tuesday afternoon at 1 o'clock. All members are urged to attend and bring a picnic lunch.

### Officers of O.E.S. To Meet

All officers of the Order of the Eastern Star are requested to meet at the Masonic hall Tuesday afternoon at 2 o'clock.

### 50-50 Class To Meet

The monthly business meeting of the 50-50 Class of the First Methodist church will be held Tuesday evening at 8 o'clock in the home of Mr. and Mrs. E. F. Latham.

All members are urged to attend.

## Society Personals

Mrs. Jimmie Simpson and Mr. and Mrs. E. E. Joyner have returned from a visit in Glen Rose.

Mrs. Katherine Naylor has returned to Denton after a visit with relatives and friends here.

Mrs. I. D. Carlisle has returned from a visit in Brady.

Mrs. Luther Roberts and daughters, Virginia Ruth, Elizabeth Ann, Marjorie and Rosemary have returned from a month's stay in Melissa and Dallas. While in Dallas Mrs. Roberts studied at the Dunning School of Music.

Mrs. Iretta Smith had as her guests for the week-end, her mother, Mrs. Beulah Holman of Margsville, her sister, Miss Thel-

## MAKING AMERICA STRONG

### SHIPBUILDING INDUSTRY EXPANDS TO MAKE U.S. NAVY WORLD'S GREATEST. EMPLOYMENT DOUBLED IN THREE MONTHS

**EMPLOYMENT IN SHIPBUILDING**

NOV. 1940 (124,900)	124,900
FEB. 1941 (250,000)	250,000

SOURCE: NATIONAL ASSOCIATION OF MANUFACTURERS

This is one of a series of illustrated articles designed to inform the public of the progress being made by American industry in providing the weapons for national defense. The facts presented have been gathered in surveys of leading defense industries and from other authoritative sources.

The story of ship production in the United States during the current defense program is a story of unprecedented expansion in designing, engineering, and building facilities throughout the industry from one ocean to the other.

It is also a thrilling story of American shipbuilding ingenuity adapting itself to modern needs at short notice, adopting new techniques, perfecting others. Tens of thousands of new workers are being trained and put to work. The program is in full swing. Both merchant and war ship construction move ahead as unbelievable speed.

This record of achievement is well reflected in the amazing increases in employment that have taken place in the industry. In November, 1940, the U. S. shipbuilding industry employed approximately 125,000 men. In the short space of three months that figure was nearly doubled—some 250,000 in February, 1941—and it has risen steadily since.

But many more thousands of men will have to be trained to meet the building program already laid down by the U. S. Navy. For example, in May, 1940, there was a total of 77 warships

(8 battle ships, 2 aircraft carriers, 8 cruisers, 40 destroyers, 19 submarines) under construction. In May, 1941, ships building totaled 361. That total breaks down as follows: 15 battleships, 12 aircraft carriers, 54 cruisers, 200 destroyers, and 80 submarines.

In order to cope with this vast construction problem, it is estimated that the shipbuilding industry will have to employ more than 500,000 workers by January, 1942.

This will mean even more employees training in shipbuilding trades and even greater expansion of the ways, already humming 24 hours a day on the great, all-out job of making the ships that make the nation strong.

## Company B To Get Measured for New Uniforms At Drill

An important drill for Company B, Home Defense Guard, will be held tonight, when all members of the company will be measured for new uniforms.

The uniforms will be made in the WPA sewing room, and the only cost will be the wholesale price of the materials used, which is estimated at approximately \$3.

Only about 32 of the 81 enlisted men of the company have been measured for the uniforms, it was stated today, and it is hoped that the entire company can be uniformed within the next few weeks.

## Youths May Enlist In CCC By July 15

Mrs. Waurine Long, in charge of the Ranger relief office, stated today that a number of boys will be taken into the Civilian Conservation Corps between now and July 15, and all youths wishing to join should see her at her office next Monday.

The youths need not be from relief families, Mrs. Long stated, but should be in need of employment.

Only youths between the ages of 17 and 23 will be accepted.

of San Antonio, a sister of Mr. Rice.

Mr. and Mrs. W. M. Bourdeau have as their guests, Mr. and Mrs. J. B. Money, V. C. Mooney and daughter, Mr. and Mrs. C. I. Bourdeau, formerly of Ranger, all of Coalinga, California and Mrs. H. M. Rogers and daughter of Butler, Pa. Dr. and Mrs. E. V. Mooney who were here for the week-end have returned to their home in Dallas.

Mr. and Mrs. George Nicholson have as their guests, Mrs. Nicholson's sisters, Mrs. John King of Sayre, Oklahoma and Mrs. G. M. Young of Vernon.

Mrs. Ven White and Mrs. Susan Hunt spent Sunday in Ft. Worth.

Sam L. Burnett, instructor for the Lou Foote Flying Service, had as his guests for the week-end, his mother, Mrs. A. R. Burnett, his sister, Miss Juanita Burnett and Miss Thelma Brammer, all of Dallas.

Mrs. Jack Thomas and young son of El Centro, California, are the guests of Mrs. Helen C. Yorker and other relatives.

Mr. and Mrs. W. H. Mayes had as their guests for the week-end, Mr. and Mrs. Wendell Mayes, Miss Jane Ellen Mayes and Miss Elbridge Mayes, all of Brownwood.

Woodrow Bailey of Jal, New Mexico, is a guest in the home of his aunt, Mrs. E. H. Jenkins.

Mr. and Mrs. Charles Cooper left this afternoon for their home in Kilgore after a visit in the home of Mr. Cooper's father, V. V. Cooper, Sr.

## 300 Youths Given Drivers Licenses

AUSTIN, Tex.—More than 300 Texas youths between 14 and 16 years of age have been granted driver's licenses under authority of county judges, it was announced today by State Police Director Homer Garrison, Jr.

Colonel Garrison said the latest tally showed 304 such licenses issued, as provided by the new drivers' license law, and that the number is increasing rapidly.

Those from Eastland County who obtained their first licenses were: Emerson Junior Hallenbeck, Route 2, Eastland; Orval Lee Russell, 1125 Sinclair, Ranger; Harvey Leonard Todd, 602 1-2 W. Commerce, Eastland; Doris Jean Sterling, 402 W. 11th, Cisco; David Lee Jameson II, 302 S. Austin, Ranger.

## LEGAL NOTICE NOTICE TO CREDITORS OF THE ESTATE OF NETTIE HAMILTON, DECEASED.

By David Lee Jameson  
Time for camp! Yes, the life of boys at camp is all that any younger boy would or could hope for.

Every normal boy craves adventure, new experiences and thrills. Seven days or more spent in camp is more than a vacation.

Safety is the watchword of the camp. No boy leaves the camp without permission.

Camp gives the boy outdoor recreation which produces good health and strength. It also gives an outdoor education which is so necessary in the all-around development of our American boys.

The program is well planned for each day well ahead of time and the camp staff members are each experts in their line of work.

Each day there is printed a paper in the camp and there are contests that are open for all wide eyed youths.

Camp Billy Gibbons is located in the hill country on the Gibbons 45,000 acre ranch, 15 miles south of the village of Richland Springs at the mouth of Brady Creek, on the San Saba River.

Every Scout will have an opportunity to observe his 12th Scout law: A Scout is Reverent. General services will be held under the beautiful trees each Sunday morning.

Also the Scouts here in Ranger wish to make a tribute to a man that we called Uncle Dan, only at his request. His name was Dan Beard. He died in his home only a few weeks ago, but in his last copy of the Boys Life in his Page by Dan Beard, he said this:

The Boy Scouts of America are a most up-to-date and modern institution. Uncle Dan realizes that he is close to the end of the trail, but it is a modern trail and he wants you boys to feel that what ever happens to him, he will still be with you in your camps, in your homes, and you may know he is whispering in your ears his confidence in you and his faith in your ability to carry on your grand work of Scouting wherever you may be!

**RUN OF LUCK ENDS IN WILLOWS, Cal.**—Manuel Eleshio had a running streak of luck at a card game played for several days in succession. His luck was still running high when a friend jokingly remarked: "A fellow's always lucky before he dies." Eleshio left the game in a few minutes and was struck by a truck and killed.

Life is either a gambol or a gamble, depending on the way you play it.
