OWIU LOCAL 478 HOLDS A MEETING

A meeting of the OWIU, Local 478, was held at the American Legion hall Monday evening at 7:30. The current wage disputes were discussed and Gordon L. Downing, Secretary of this local made this statement:

"It is the earnest and sincere wish of the OWIU, that a satisfactory adjustment of the wage situation will be reached at the conference to be held this week. This country was built with many hands not just one. America is a land built by both rich and poor, ignorant and wise, each man with a respect for the rights of his neighbor and the common good. We believe in that creed, for we too are a part of this land, part of this people. It is self evident that working against each other we shall perish, that something must be done. It is also evident that concessions must be made, a compromise reached before America's industrial civil war is over. So, with our belief in the integrity of the American public we hope to secure a fair adjustment of the proposed 30 percent wage cut."

After the meeting was adjourned, cold drinks were served.

Dairymen Urge People To Turn In Milk Bottles

They explained that it is impossible to replace the bottles at this time and careless hoarding of the bottles by customers has created a very severe shortage.

One man explained that he lost \$20 dollars worth of bottles last week and while the dealer paid him for the bottles, the loss is proving a great handicap to him.

Communists Say U.S. Marines In On Civil War

CHUNGKING (UP)—Communists demanded today that the United States "cease participation in the Chinese civil war" and the government countered with a charge that communists were striving to create a breach between Russia and America.

The dispute continued despite official denials of an earlier communist charge that U. S. Marines had gone into action in the undeclared war in North China.

SAYS RUSSIA SHALL HAVE ATOMIC POWER

LONDON (UP)—Soviet Foreign Commissar V. Molotov today charged that policies being advocated in the west on such matters as large military establishments and atomic energy are "directed against other powers" and "have nothing in common" with keeping the peace.

Speaking at an anniversary celebration of the Bolshevik revolution, Molotov declared that there were no technical secrets involved in the atom bomb which could long be held by any one country or small group of countries.

Molotov promised his listeners that Russia, too, "shall have atom energy—and much other energy." He said the Soviet would create highly skilled groups of workers to develop this and other great discoveries.

"The Soviet Union," he said, "has never held that powers should pursue a policy directed against other powers. However, this has been practiced in the west."

TERMS OF ARMISTICE REVEALED

WASHINGTON (UP)—The Allies today made public the long-suppressed Italian armistice terms under which Marshal Pietro Badoglio surrendered unconditional in the fall of 1943 and turned over Italy, lock, stock and barrel to the Allies.

But documents accompanying the armistice text revealed that the terms never were completely invoked, and, for all major practical purposes, were abrogated last February.

Under the original terms, Italy surrendered her political, military, economic and financial sovereignty to the Allies. The Allies never found it necessary to take advantage of their broad authority and under an "aid memo" of last Feb. 24, virtually restored sovereignty to the Italian government in those fields even before negotiation of a peace treaty.

The armistice documents made no reference to territorial settlement or reparations, leaving both for the final peace treaty. But they called for Italy to pay all occupation costs—an impractical step which had to be modified and followed by extension of U. S. credits to the Italian government instead.

MINE WORKERS CHIEF WINS POINT AFTER HOT DEBATE

WASHINGTON (UP)—United Mine Workers Chief John L. Lewis won an unanimous victory today after a heated debate on the first disputed issue of the national labor-management conference.

The question was whether the conference should create an executive committee of eight members, with two places each assigned to the conference "big four"—The National Association of Manufacturers, the U. S. Chamber of Commerce, the American Federation of Labor and the Congress of Industrial Organizations.

Lewis insisted the matter should be left to the rules committee to consider whether such independent organizations as the UMW and the Railway Brotherhoods also should be represented. The conference finally agreed.

Lewis objected to a provision on the conference agenda on the grounds that it did not specify from what organizations the eight executive committee members would be drawn. He was upheld by the conference after he and CIO President Philip Murray clashed over Murray's reference to a "reported blitz" in place Lewis on the executive committee.

The conference, settling down to work after yesterday's opening speeches, adopted the proposed agenda as drafted by the preparatory committee except for the executive committee provision and a section concerning the number of votes necessary for conference adoption of recommendations.

was tired and covered with oil
which zoo attendants said prob-
ably was from mosquito control

Last Member Recalls Start Of Dayton Club

COLUMBUS (UP)—Edgar W. Ellis, 81, today is the only surviving member of a "Last Man" organization formed on Oct. 9, 1886 by 10 young Dayton, O., men. Ellis, who retired in 1937 after 16 years in the state service, got the idea of a last man's group from reading about several Civil War veterans who had formed one. Membership was limited to 10 and meetings were held annually on the second Saturday in October in the homes of the members. Those who could not attend wrote what they had done since the last meeting. Ellis recalled how one of Dayton's famous Wright brothers, Orville, was excluded from joining the organization because he was too young. But Wilbur Wright, who with Orville invented

the airplane, was admitted. He was the first to die. Lorin Wright, a Dayton manufacturer, and Reuchlin Wright, who later became a successful Kansas farmer, brothers of Orville and Wilbur, also were admitted.

The club took charge of arrangements for a two day celebration honoring Wilbur and Orville Wright upon their return from France in 1909, Ellis said. President William Howard Taft, sent a representative to the celebration and former governor Judson Harmon was there.

The last meeting was held Oct. 4, 1939, in Dayton, with Ellis and Lorin Wright as the only surviving members.

Try Making Cough Syrup at Home. Quick Relief

Saves You Big Dollars. And It's So Easy! No Cooking. No matter what you usually use for coughs due to colds, you'll be more than surprised when you make up this simple home mixture and give it a trial. You'll wonder why you never used it before. It certainly does the work in a hurry. Make a syrup by stirring 2 cups of granulated sugar and one cup of water a few moments, until dissolved. No cooking is needed—it's so trouble-free at all. Or you can use corn syrup or liquid honey, if desired. Get from your druggist 2 1/2 ounces of Pinex. Pour this into a pint bottle and fill to 1 1/2 with pure lemon juice. Makes a full pint—family supply—and gives relief about four times as much for your money. It tastes fine and keeps longer. Children love it. And for quick action, you've never seen its superior. It loosens the phlegm, soothes the irritated membranes, eases the sore throat, makes breathing easier, and lets you sleep. Pinex is a special compound of proven substances in concentrated form. It's famous for its coughing relief for throat and bronchial irritations. Always remember it! It doesn't please you in any way.

For over sixty-two years it has been our privilege to render a service to this community.

Women's Fashions Won't Repeat World War Excesses, Expert Says

JACKSONVILLE, Fla. (UP)—From all signs so far, women are not going in for extremes in fashions during the reconversion period as women did after World War I.

At least that is the opinion of one fashion expert—Alice Wilson Richardson, merchandise editor of Mademoiselle magazine.

Skirts will be fuller and longer, but won't be taking off on a cock-eyed fashion tangent, she said during a visit here.

The nearest thing to the zany jazz age clothes of the early '20s would be the bobble-soxers' dress.

Terming it a fad "out of this world," she said, "That fad will just have to wear itself out of fashion."

The sudden change in the sloppy college girl attire of yesteryear is one of the best trends in fashions since the beginning of the war, Miss Richardson thought.

When asked if the currently popular fitted sweaters were the result of the Lana Turner influence, she conceded "perhaps so."

"But whatever the cause, it proves that swooning, giggling bobble soxers are going through a stage and are not a generation of permanently demented young girls. At least they can grow up in college," she said.

Referring to the effects of the war on fashions, the editor said the break-away of the American school of fashion from the Paris school.

America's close contact with other sections of the world during the war has not caused a nifty marked foreign influence on the American fashion school, she added.

Asked if the greater quantity of material to be available after the first of the year might cause extreme reaction and the use of yards and yards of cloth, Miss Richardson said she didn't think so.

When asked however, if she thought women's ideas on fashions were becoming more mature and conservative, the jauntily blond editor gave one thought to women's hats and declined to comment.

I GIVE YOU TEXAS
By Boyce House
("What Makes a Texan Tick?"—Concluded).

Texas is the home of cowboys who drove hundreds of thousands of Longhorns up the trail despite Indians, prairie fires, rustlers, swollen rivers and stampedes; then when the herds had been delivered at Abilene, the cowbo took in the sights, perhaps shouting, "I'm wild an' woolly an' full o' fleas; ain't never been carried blow by knees." Texas became a land whose Indians were high-heeled boots, jingling spurs, sharp, big hats, bright bandanas and blazing six guns.

The history of Texas is one of French and Spanish explorers, of heroic priests who built missions in the wilderness, of Indian fighters, gold-seekers, Texas Rangers, cattle kings, pioneer physicians, school teachers, circuit riders, pirates, outlaws, wildcaters with their pushers and boom towns, flamboyant politicians, King Cotton, cabins in the cleavings, heroic women whose prayers and unceasing toil helped to build a State.

It is a story of unique people and institutions and deeds; Joe Bailey of whom it was said that a 20-mile ride on horseback was adequately compensated for just to hear him say "My fellow countrymen"; Clyde and Bonnie, lovers and slayers; Albert Sidney Johnston, hero of Shiloh, who joined the army of the Texas Republic as a private; O. Henry, genius of the short story; the million-acre King Ranch; Amon Carter, greatest host of all time, and Jesse Jones, the greatest money-lender in history; the miracle of bringing the sea 50 miles inland to make Houston one of the foremost ports of the world; the University of Texas with millions of dollars derived from oil found under land that was considered virtually worthless; Robert E. Lee, before the Civil War, sitting on his horse motionless on the frontier, "listening to the tread of the millions that are to come"; the old settler who, when asked for the title to his land, simply pointed to the rifle beside the door; and Brit Bailey, who in his will said:

"Bury me standing up and facing west. I've never looked up at any man yet and when I'm dead I don't want anybody saying, 'Here lies old Brit Bailey.' So they buried him in a box, standing up, his gun at his side and a jug at his feet.

Farm Income Off During Month Of September
AUSTIN, Tex. — Farm cash income in Texas during September, declined nearly 5 per cent over September, 1944 income, Dr. F. A. Buechel, economic analyst with the University of Texas Bureau of Business Research, reports.

According to computations in the Bureau, the cash income was \$112,000,000 in September, as compared with \$117,500,000 in September, 1944.

Aggregate income for the year to date is estimated at \$770,000,000, compared with \$733,000,000 during the corresponding nine months of 1944—an increase of more than 5 per cent.

The cash income was computed on the basis of average monthly income for the period from 1928 to 1932 inclusive, which has higher been used as the base period.

Beware Coughs Following Flu
After the flu is over and gone, the cough that follows may develop into chronic bronchitis if neglected. Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. No matter how many medicines you have tried, tell your druggist to sell you a bottle of Creomulsion with the understanding you must take the way it quickly allays the cough or you are to have your money back.

"GREATEST FORD EVER BUILT"
Says Public from Coast to Coast!

"How Soon?" and "How Much?" Ask Throngs in Dealer Showrooms

On October 26 the new Fords for 1946 went on display in dealer showrooms the country over. In city after city, town after town, dealers reported that the crowds who came to view these fine new automobiles equalled those who greeted the introduction of the famous Ford Model "A" back in 1927—when showroom attendance passed the 10,000,000 mark.

The opening day throngs were matched by those who came Saturday and later. And their opinion has been unanimous. The words most frequently heard have been "The Greatest Ford Ever Built." They backed up their acclaim with orders—326,840 on "V-8 Day", October 26—and Saturday, October 27.

This advertisement is published to record the deep gratification of the entire Ford Organization at this splendid public reception and to answer, as directly as we possibly can, the two questions most often asked.

"How Soon Can I Get My New Ford?" We sincerely believe the answer is: "Sooner than you think!" And here's why—Ford, first with assembly line production of postwar cars, first to stock dealers for a nationwide display, is first in quantity production—1,000 units a day reached last week... 2,000 a day in prospect within 30 days.

"How Much Will My New Ford Cost?" We think the answer to this is found in Ford's unvarying policy through more than 40 years of operation: always the highest quality at the lowest possible cost.

TO THOSE WHO HAVE NOT YET SEEN THE NEW FORDS: All our dealers have them on display. Please make it a point to see if you, too, don't agree that these are the "Greatest Fords Ever Built."

You buy shoes that fit your feet; clothes that fit your figure. Why not be sure that lamp bulbs fit the lighting needs in your home?

Look at the end of the next lamp you buy. Note the "60 watt", "100 watt" or other wattage figures which indicate the size of the bulb. Then buy bulbs of large enough wattage to provide the amount of light you need for easier seeing, to safeguard the eyesight of those who read or study.

See the Lamp Bulb Chart at the right. It will help you select the proper size bulb to provide Better Light.
