and warned armies and navies of

air attacks.

The set used on the Grenville had a pointer on the radar screen which showed the direction of the ship while a sweeping beam aroun the screen revealed distances fro the ship to all objects at all poin of the compass.

Maximum range of the set of the Grenville was 34 miles. The set can be manipulated to show mlarged images of objects up to up to 20,000 yards.

It was reported that a log pr jecting only eight inches out o the water 2,500 yeards away was detected on the screen. However the radar will not detect object The Rec. Ceril McBeth's parents when they are closer than 250

The radar antenna is only four feet seross and rotates at the top of the Grenville's foremast. The apparatus to operate the radar is located in a compartment at the Eastland county attended a Land- law base of the mast.

(PREMIUM PACKAGE)

The best light is natural daylight, but daylight for your shaving mirror isn't aways possible. But you'll find that the new improvements in artificial lighting are a long step ahead.

How much light

is enough

for shaving?

For example, look at these new bathroom mirror brackets. They give far more light, and because of their plastic shields are almost shadowless.

Begin to enjoy the benefits of Better Lighting in your home by seeing that all lamp sockets are filled with large enough bulbs to make seeing easier.

> The natura! lighting you enjoy when reading under a tree is an example of good illumination. Better Light in your home beings you closer to nature's ideal.
