There's much talk in it about Liberty Bond drives and thrift stamps. And a story about the "Huns" big guns. Ireland was mad at Great Britain because conscription was extended to the Irish and 50 year old men in Britain were to be drafted.

The advertisements are just plain funny and why women ever thought the styles of those days were pretty, is a mystery to us. But, we'll have to admit that some of the styles today are nothing to brag about.

It's a fine thing when one mar can call a halt to industrial procedure in the country and then defy the government to do any thing about it. Lewis' attorneys even well the government that they haven't any right to charge Lewis with contempt.

### Back-Stage Behind the Curtains-

. . in every organized business, large or small, there is a mass of preparation, work, skill, experience and expense before any thought can be given to profits from the finished product. For example, the cost of typing a 100-page abstract is a trifle compared to that of assembling, classifying and posting the records day after day in preparation for your next order. The abstract, therefore, can't be cheap like dirt, but always there is the element of safety and a saving in including it in every real estate transaction.
