The Law Of Dimishing Returns-

. . like the law of gravity, is controlled largely by natural forces. When man-made laws come in conflict with natural laws there is never any doubt which will win. Long before the point is reached where cause equals effect the dimishing process sets in. Levying taxes is an excellent example, but the law operates in all fields of endeavor. Successful business men escape serious consequences of the law by selling a quality product for a reasonable profit.

what we feel than any statement we've ever heard. Like, we've said before, the American people can be regimented in times of stress but relieve that stress and they balk at regimentation.

It would be a dull old world ndeed if we were robbed of all individuality and that't just where we're heading right now. If we can't make as great a success of our lives as some others, we still want the privilege of trying on our own. And we think that the government would find itself in a great mess of cats when all of the failures started complaining that it wasn't their fault that they were failures, and blaming the government. But if they keep on pushing us into socialism, we hope that the failures really turn on the beefing.
