To Ranger General Hospital A Tribute

I've been in hospitals large and small, And when one goes, it's never a ball. In large ones you're just an admission slip, As a human, you don't amount to a flip. But at Ranger General, You're a friend from the

start. And they prove to you that they have a heart. In this small hospital they're good and they're kind, And show you that they have your welfare in mind; And that every patient is a human in need, They do all that is possible by word and by deed.

It will surely hit someone right in the heart, But let me say this without any malice: "Ranger General is a sick one's Palace."

Summer cooking make your kitchen "like an oven"?

## Change to cool flameless electric cooking!

Women who cook electrically will tell you that electric cooking makes a big difference in kitchen comfort during hot weather. That's because flameless electric surface cooking units transfer heat by direct metal-to-metal contact with utensil bottoms. They send their heat through the utensils and into the food, not into the kitchen air. Electric oven cooking is cooler, too. There's no flame, so no intake and exhaust of air is needed to support combustion. The oven is insulated all around, including the bottom, to keep heat inside where it belongs. See your electric range dealer soon and start cooking the cool, flameless electric way!
