Outside, these two homes look different, but inside they have a lot in common. Because both are Total Electric homes in which clean, flameless electricity does everything from operating work-saving appliances to lighting, cooling and heating the entire house. The point is that Total Electric living is not limited to any particular size of home or style of architecture. Total Electric homes may be large or small, new or old.

And the extra comfort, convenience and cleanliness they provide is more economical today than ever before on our low rate for Total Electric homes. Before you build, buy or remodel, let us tell you about the many advantages of modern Total Electric living.
