A STATEMENT BY THE BUTCHERS' UNION N. Y., in 1897, but for two years it made

CHICAGO, Aug. 5 .- The following is a statement given out by the strikers:

"As the strike of the butcher workmen begins to affect seriously the whole consuming public, as this public is more deeply stirred than by any labor struggle since the coal strike of 1902, it now becomes our duty to place before the public, first, the evils against which we have struggled; second, how the packers forced this crisis upon us; and, third, the two deep issues which make this strike of so much importance to our organization.

We wish first to offer certain plain, hard facts. We stand ready to prove every statement made.

"When there was no union the men naturally enough were treated by the packers as mere parts of their equipment. The profits alone were considered.

cattle killing department as typical of all half of us at the doors to underbid the the other departments. The largest runs men who are working. The union has

Farm on Fish Creek, Near Arlington, Is Bought by J. W. Martin

ARLINGTON. Texas, Aug. 5 .- One of the biggest land deals ever made in Ar-Hington was consummated Wednesday. whereby R. W. Collins sold to J. W. Martin 320 acres of land out on Fish Creek for \$10,000. Mr. Martin already owns 320 acres of land out that way and buys this last piece for speculative pur-

The land in question is slightly poisoned with Johnson grass and is growing worse each year, and Mr. Collins, who is an aged citizen, felt that it would take more vigorous action than he could or a tenant would give to rid the farm of the pest, and in looking about for one who could do this he decided on Mr. Martin and his boys, and offered them the farm at the price named, which is \$31.25

The land once cleared of grass is easly worth \$40 an acre, and will possibly sell for \$50 an acre. Such deals and such methods of doing business illustrates the broad scale on which business is done here, and the possibilities for a man with such energy as Mr. Martin has. He came to these parts a few years ago a poor man.

Chicago for medical treatment. Mr. Spencer has been connected with the Rock Island some time and is considered an efficient traffic and passenger man, and will be a valuable acquisition to the working forces of that popular line.

THE FRISCO TELEGRAPHERS News comes from St. Louis that the

elegraph operators employed on the risco system have asked for a conference, through their committee, with General Manager Gray, looking to an advance in the wage scale and the right to legislate for exclusive agents and train dispatchers.

The committee submitted its demands all before it. Houses were lifted by hess to the World's Fair now being done the tide. to the company some time ago and the tide. request to confer with the general site suffered serious damage from the floods. Eight miles of the new dirt peal. The conference will take place pany in St. Louis in a few days, and it is given out that the matter will be amicably settled without any trouble following the request.

DAVIDSON DENIES A REPORT Rumors originate even in Chicago railway circles. A statement was recently sent out that the general of-fices of the Frisco were to be removed from St. Louis to Chicago. The reason given was that President Winchell might be in close touch with the officials of the Frisco and be able to direct their movements with greater precision than is now possible. President Winchell has nothing to do with the operation of the Frisco. Denying

THE SEASON AT TEMPLE

NEW YORK, Aug. 5 .- A new thing in naval propulsion has been in construction for more than a year on the roof of an architectural iron works building in this city. The new boat has been lowered to the street and taken to the North river, where it will be tested soon. The inventor believes that he will be able to produce a speed hitherto unheard of on the water.

The scheme involves the principle used by the squid. Beneath the boat, running two-thirds of its length, between the keel and the bottom is a tube fifteen inches in diameter. The tube is open at both ends,. Within it are four propellers on a shaft running the length of the tube, and attached by gearing to an engine in the center. The revolution of these screws drives

the water violently from the tube. This concentrates the energy of the propelers in one direction, instead of dissipating it in every direction, as in the case of the ordinary screw.

a five-foot beam. A 14-horse power period of rebuilding and remodeling. Oneengine will be used. The inventor is a half of it, that on the east side, has been graduate in naval architecture of Cor-nell university, and worked for two years at the Union Iron Works in San the floor, new joists and the tightening the floor floor the city, and next season an the floor floor the city is the floor floor the city is the floor floor the city is the floor floor floor floor the city is the floor Francisco.
