

**Price Freeze Has Little Effect**

Apparently the price freeze has had little effect on most retail establishments in this area, according to a survey by The Beacon Wednesday.

Wholesale prices were unchanged for some establishments and some reported that wholesalers were still "going up."

Cattlemen over the country were predicting that the price freeze on meat would create a meat black market.

Exceptions in the price freeze included such items as rent, rates or fees for professional services; prices on books, magazines, newspapers, motion pictures; advertising rates of newspapers and radio; insurance rates; rates charged by public utilities; sale of used personal or household effects by private owner; sale of commodities made or produced by the seller at home without the assistance of hired help; any raw agricultural commodity when sold by its producer.

Another paragraph however said that cotton and wool would be frozen at the manufacturer's level and that the price of eggs would be frozen.

All prices are fixed at the highest level between December 19 and January 25.

In Education • 1876-1951  
Our first state college—Texas A. and M. is now in its seventy-fifth year

The idea of tax-supported technical colleges, offering higher education at a cost which the sons of all economic classes could afford and teaching men how to make better livings in such ordinary fields as agriculture and industry, grew out of the American Revolution. Thomas Jefferson was one of the first to see that the old type of college, in the ivory tower tradition, could not serve the needs of the newly-created democracy. It was not enough, he said, to educate the sons of wealth for the professions of medicine, the ministry, teaching and literature. Men needed more practical training, and it must be available to the sons of all economic groups. "The true function of education in a Democracy," he declared in one famous speech, "is to cull from every kind and condition of our people that true aristocracy of talent and virtue." It was on this philosophy that the A. and M. College of Texas was founded, a hundred years later.
