"Surprise" Vote Elects 2 Water Committeemen

In an unpublicized election held Tuesday of this week two county committeemen to serve the High Plains Water Conservation District No. 1 were elected for Floyd County and the county voted overwhelmingly to admit three areas to the water district.

According to results secured by The Beacon from election officials Tate Jones of Floydada and J. R. Belt of Lockney were elected Floyd County Committeemen succeeding Sid Thomas and Grady Walker. Other names on the ballot were Lon Davis of Floydada and Horton Howell of Lockney.

The vote in the Lockney box was reported by Election Judge Frank Dodson as follows:

Tate Jones 1
Lon Davis 0
Horton Howell 22
J. R. Belt 24

For admitting Crosby county, 20 for, 1 against.
For admitting Swisher county, 21 for.
For admitting Hale county, 20 for, 1 against.

In the Floydada box the vote was reported by W. G. Collins as follows:

Tate Jones 28
Lon Davis 25
Horton Howell 6
J. R. Belt 15

For admitting Crosby county, 41 for.
For admitting Swisher county, 41 for.
For admitting Hale county, 38 for, 4 against.

These totals show Jones with 39, Belt with 39, Howell with 28 and Davis with 26. Two were to be elected.

The vote to admit the three other counties to the district was to no avail, since all three voted about two to one against coming into the district. Complete returns were not available but unofficial reports said the vote in Hale County was 146 against to 82 for and in Crosby county 96 against and 48 for.

Hold over committeemen for Floyd County are R. C. Mitchell of Lockney, Robert Lee Smith of Sterley and Lee Trice of Floydada.

Seeking to overcome the lack of publicity, they spread the word of the election person to person and also over Radio Station KFLD. Floydada seeking to get a representative vote out.

City Council Asks For Road West

The Lockney City Council met with the Floyd County Commissioners Court Monday afternoon at Floydada and asked the Court to consider providing for a paved highway west from the Baker Hotel to intersect Highway 70 west of Lockney about 1 1/2 miles.

The Council felt that such a road would be a safety feature since it would divert considerable traffic from use of the Y intersection in South Lockney. Also it would provide direct route through Lockney from the farm highways east and north of Lockney onto Highway 70, Mayor J. E. Cox said.

The Court was unable to give the Council any definite answer at this time, it was said.

Approve 40 Miles Of Gas Line In North Floyd Co.

The Pioneer Natural Gas Company has approved plans to lay approximately 40 miles of natural gas line in North Floyd County to serve irrigation wells, Charlie Boedecker said Wednesday morning. The approval by gas company officials was given Tuesday and the company will start laying the main lines as soon as right-of-way easements can be secured, Mr. Boedecker reported.

A total of 90 wells have been signed up for the lines and Mr. Boedecker estimated that 115 would be on the line by the time it was completed.

The project includes two lines both running east and west for the most part. The big line, approximately 30 miles in length, comes out of Hale County west of Providence school, runs due east by the school to a point two miles north and two miles east of South Plains, turns south six miles and then back east four miles.

The second line runs north from Aiken two miles, turns east to a point 3 miles east of the Lone Star farm-to-market road. This is the section road just north of the Paul Cooper home on the Lone Star road.

Mr. Boedecker and Joe Foster have been doing most of the work on the gas line project. Mr. Boedecker said Wednesday that it is doubtful that the lines would be in time to water beds this spring but that the laying of lines would begin just as soon as possible.

WHAT SAVES MAN?

When two cars collide and people are seriously injured, several things are required in bringing relief to the suffering. There might be need for an ambulance, a doctor, instruments, nurses, hospitals, etc. And although it might be said the doctor saved the lives of those involved, common sense tells us it is not presumed that nothing else contributed to their recovery. And so it is in spiritual matters. Man is saved from his sins by a combination of things, some of which are:

GRACE — "That, being justified by his grace, we might be made heirs according to the hope of eternal life." Titus 3:7. God was most gracious in that he provided for man a way to escape condemnation, and were it not for His grace, none could be saved. But is God the only one who has a part in this salvation?

FAITH — "Being therefore justified by faith, we have peace with God through our Lord Jesus Christ." Rom. 5:1. If the grace of God is all that is required in salvation, then even faith is not necessary. Neither is man saved by faith only, for that excludes grace.

BLOOD — "Much more then, being now justified by his blood, shall we be saved from the wrath of God through him." Rom. 5:9. We see that Christ also had a part in saving man, and had it not been for the shedding of His blood, there could be no forgiveness of sin. "For it is impossible that the blood of bulls and goats should take away sins." Heb. 10:4.

GOSPEL — "Now I make known unto you, brethren, the gospel which I preached unto you, which also ye received, wherein also ye stand, by which also ye are saved." I Cor. 15:1-2.

BAPTISM — "The long suffering of God waited in the days of Noah, while the ark was a preparing, wherein few, that is, eight souls, were saved through water: which also after a true likeness doth now save you, even baptism." I Pet. 3:20, 21.

WORKS — "Ye see that by works a man is justified, and not only by faith." James 2:24. Abraham, a great man of faith, was justified because he was willing to do what God commanded him to do, and did it. "Be ye doers of the word, and not hearers only, deluding your own selves." James 1:22.

WORDS — "An I say unto you, that every idle word that men shall speak, they shall give account thereof in the day of judgment. For by thy words thou shalt be justified, and by thy words thou shalt be condemned." Matt. 12:36, 37.

This list is by no means complete, but is sufficient to show that salvation is not entirely a matter of God's good grace, although without it there could be no salvation. The Bible teaches that we are saved by all of these things, and not by faith only, nor baptism only, nor by any other one thing apart from other things God has incorporated in His plan.

By the grace of God and in view of the foregoing lesson, it is fervently to be hoped that you will, in the words of the apostle Peter, "Save yourself from this crooked generation." Acts 2:40.

WHEN I WAS A GIRL...

When I was a girl they used to say that bread was the staff of life. It's an expression that you still hear, of course, but not so much as you once did.

True, there was something tantalizing and wonderful about the smell of home-baked bread waiting in from the kitchen. And how the men folk loved it, after a hard day at work in the fields.

But as I grew older, I began to realize that neither bread nor anything else you can see, touch, and smell is the staff of life. Sound funny? Well, think it over, and you'll see what I mean. Our greatest strength comes from the things that aren't tangible. The spiritual things, I guess you'd call them.

My own staff of life has been the Church. It has supported me when I have needed it the most. When my children came along, I taught them to believe that the Church was their real staff of life. In this belief they have found hope, solace, and comfort, just as I have.

THE CHURCH FOR ALL... ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

Library Notes

By Ivy Pearl Reber

The first Story Hour session of 1955 got the year off to a very good start Saturday morning. There were five newcomers and several old-time visitors. Mrs. Q. D. Williams told the stories, and I am sure that all who heard them are looking forward to a whole year of happy Story Hour experiences.

The list of library borrowers continues to grow. Eleven new borrowers were reported at Lockney last week, with approximately the same number at Floydada.

A new book in the library now is "Art for the Family" published for the Museum of Modern Art. This book begins: "Art is for you!" Do you like color? ... bright colors like red and orange and yellow ... soft colors like gray and beige and moss green? Would you like to invent your own colors?

"Do you like to touch pleasant things? ... like petting your cat? ... or feeling soft silk? Do you like to discover things? ... drawings and patterns on the sidewalk? ... or explore strange places? Do you like to make things? ... build with blocks? ... make castles in the sand? ... decorate a cake? ... use tools?"

"If you do, then you will like to ... make feeling pictures ... tell your ideas in clay. And you will like to ... paint pictures of sounds ... make paper magics ... build space designs ... or any number of things. This is art. You don't have to be an artist, and you don't need talent. Everyone can do it."

And then it proceeds to tell you how. This little 110-page book is filled with pictures and diagrams enough to furnish the entire family with fun for a lifetime.

"Bye now. This is my last week to write the library notes. But I will be thinking about you and wondering if you are reading all these good books that are waiting for you at the library."

Mrs. Sarah Jetton Marks 88th Birthday

Mrs. Sarah Jetton of Cedar Hill community was honored on her 88th birthday last Friday when old friends and neighbors gathered at her home bearing gifts and refreshments.

The afternoon was spent in reminiscence and admiring Mrs. Jetton's ability to keep pace with the world. At the age of 88 Mrs. Jetton is still carrying on the duties of home maker, and does most of her own sewing. She does nice handwork, cares for a number of chickens and raises some of the best vegetable and flower gardens in her neighborhood each year.

To know Mrs. Jetton is to admire her. She has never been a patient in a hospital, isn't under the care of a physician. She has had very few shots, takes no medicine or vitamin pills and what's more, her friends say she never complains or uses her age as an excuse for doing or not doing things. Mrs. Jetton says her formula for staying active and useful is to stay busy physically and mentally.

Mrs. Jetton's husband passed away a number of years ago and she makes her home with her son, Andrew, in Cedar Hill. She also has two daughters, Mrs. Mamie Yeary, Bakersfield, Calif. and Mrs. T. E. Duke of Tulla. Her many friends join in saying congratulations to another wonderful pioneer who has contributed much to the community and the county in making it a better place to live.

The man who lives only for himself runs a very small business.

EVERY STATEMENT or article we have read lately regarding economic conditions in 1955 have been highly optimistic. A very good barometer of the financial condition of the country is automobile sales and the experts are saying that auto sales will be higher in 1955 than in 1954. The automobile companies are putting more into their products to make them sell. The 1955 models of all makes or cars are by far the most colorful in the history of auto manufacturing. Another item that is due for an increase in sales, probably more than automobiles, is automatic gadgets. The demand grows more and more for automation and only 15 per cent of the full potential of automatic control has been reached, the experts say. Soon everything (well, most everything) will be done with the flick of a switch.

REFLECTING the fine economic condition of this area are the deposits in the First National Bank here. By way of comparison, here are deposits as of December 31, 1954 in banks in the

GOOD THINGS HAPPEN, TOO
 —All too often the gloomy and tragic news rates a banner headline. To correct this situation Changing Times, the Kiplinger Magazine, has assembled some statistics that reflect the sunny side of life in the United States. There are 162,922,000 Americans who are not members of the Communist Party.

Some 37,011,460 couples will stay more or less happily married during the year.
 On the average, there are 61,868,000 people working to bring home the bacon.

Last year, the scheduled airlines safely carried passengers 18,962,134,841 miles in the U. S. and possessions; railroads safely carried passengers 31,674,931,200 miles.

Some 162,717,890 persons will not die of cancer in 1955.
 And 162,280,580 persons will be safe from fatal heart attacks.

About 629,000,000 acres of forest land will not be set on fire by careless smokers and picnickers this year.

Most of the time, 15,720,000 organized workers are not on strike.

Of the 18,977,472 little boys in the country who are under the age of 10, only six or possibly seven will have to go through the terrible ordeal of being President of the United States.

At least 162,944,424 people have not been frightened by seeing flying saucers hurtle through the air.

The Internal Revenue Service will find that 43,846,154 income tax returns are filed correctly in 1955.

Finally, there are 83 countries in the world that have not discovered the secret of the hydrogen bomb.

America-Russia's Frustration

With Our EXCHANGES

REGENERATION
 The new year begins with hope in our hearts that it will end as peacefully as it begun, with no out and out warfare involving our young men anywhere in the world.

The developing interest of thinking men in an attempt to bring about a moral revolution or regeneration is heartening indeed, for it does begin to seem that all other means have failed to make brothers of the world's citizens, and a spiritual approach has the advantage of having nothing to lose in the trying.

Conferences to develop a spiritual awakening in the world are bright spots in a time when conferences over new and more horrible weapons are the order of the day.

We believe that only through an awareness of moral responsibility can the world become a good place in which to live a gain. We think that the moral standards of the people of the

world have been allowed to drop to the danger point and it is high time we got back to some of the teachings which are the basis of Christian living.

Instead of distrust and suspicion, we would like to see trust and mutual understanding. Until this comes about, and it could come in 1955, we think all the conferences and diplomatic missions are wasted effort. — Muleshoe Journal.

THE OLD PROPHET
 I have been fairly accurate in my infrequent attempts at forecasting the weather, many of my predictions on athletic events have been accurate, my predictions on cotton and wheat production have been right on the button about ninety-eight per cent of the time. But despite my near-perfect record in the forecasting profession I refuse to predict who will win the Stork Race in the First Baby Contest. It just isn't fair for some of our readers to request that we make predictions on such matters. We will, however, report the outcome of the race when the contest is resolved. — B. M. Nelson in Castro County News.

VALUE OF ADVERTISING

We think one good reason why Crosbyton has weathered successive years of drouth is the manner in which businessmen support their home-town newspaper. Although the Crosbyton area is admittedly the toughest on the South Plains, economically speaking, merchants there have offset these disadvantages by extensive newspaper advertising. The Crosbyton Review consistently carries more home-town advertising than this one carries, and the practice spells the difference between success and failure for some Crosbyton merchants. That kind of merchandising will keep a town in business during hard days, and will keep it growing, too. — "It Sez Here" in The Ralls Banner.

ABOUT THE SAME?

While things are rocking a long smoothly here at home, things may be a little different up in Washington. Outwardly in the new Congress things were calm on opening day, but the Democrats went about systematically taking over all those high offices lost to the Republicans two years ago. Now we have a progressive Republican president (progressive, that is, for a Republican), and a conservative Democratic Congress (conservative, that is, for Democrats). We have a feeling they will get along fine together, because a progressive Republican and conservative Democrats are just about the same — good old American middle-of-the-roaders. — Trends in Crosbyton Review.

GREAT INVENTION

My personal nomination for the greatest discovery in a thousand years goes to the inventor of a method which permits the mind to acquire knowledge while the body is asleep. While being handicapped by the limited tolerance of my family, friends and school teachers, I have conducted extensive experiments in the theory most of my life. Failure met me more than half way but I have always been willing to turn over and try again. As one inventor to another, I salute this genius, and predict that schools of the future will cease to be institutions of dread and horror but pleasant asylums of refuge. They will allow students to sleep in dignity and comfort free from the old fear of awakening to reprimand. — Matador Tribune.

Your Credit Record Is An Open Book

PRESERVING a good credit record is not only a matter of convenience, but of personal prestige. For if you fall into the bad habit of not paying your bills promptly, the fact may become known to the merchant, physician, dentist, hospital, fuel dealer and other credit centers.

The files of the Retail Merchants show how you pay your bills. This record is available to all members of the Retail Bureau in your own community.

Your Credit Record is an open book — written by you in the way you meet your obligations. The only way to maintain it is by paying every bill on the date it is due.

AN EXCITING NEW DIRECTION in motorear styling begins with Chrysler for 1955 . . . longer, and inches lower than other big cars, in the most striking new car design of recent years! CARE FOR SNOWSUITS

Washable snowsuits and hats are a blessing for busy mothers, for the children always look as if their suits were brand new. When the knees, cuffs and collars start looking grimy from play, it's time to launder them. First, dampen the extra-soiled places, then brush well with a suds-covered soft brush or sponge. Roll up the suit and let it stand for about 15 minutes to loosen dirt. To your wash water add a cup of bluing to brighten colors, with your favorite soap or suds. Run your machine for just a few minutes, then wash again in fresh water if necessary. Rinse well, especially if the suits have water-repellent finishes.
