Dear Editor:

I see in the paper a while back where 1000 postal workers got together and offered up mass prayers for higher wages.

Got tired of waiting on Congress to boost their pay and decided to go over the heads of that body and take up the matters with Higher Authority.

It might be said that in answer to this prayer, Congress was inspired to pass the postal pay raise bill. But President E. Vetoed it, so I guess neither the Lord nor the postal union have got much pull with him.

We Appreciate your business

a Home is part of a community

... and a most vital part, too ... because the BUYING POWER of our HOMES is the chief strength and support of the schools, the churches, and the convenient sources of supply and service that we enjoy.

And, the more of each home's buying power that is released where that home is located, the finer these community facilities will be . . . the better the jobs available, the more profitable the businesses, the more valuable the property . . . the richer our whole social and economic environment will become.

Every nickel of any home's Buying Power that is spent in some other community means a little less prosperity . . . a little lower standard of living . . . for those who live in that home . . . and in all the homes around it.
