

Floydada Church to sponsor Old Fashion Bazaar

The third annual old-fashioned church bazaar, sponsored by the First United Methodist Church of Floydada, will be Saturday, October 31.

The day's activities include the opening of the General Store, Bake Sale, and Kiddie-Korner at 10:00 a.m. The serving of a turkey-dressing dinner begins at 11:30 and bidding in an auction at 1 p.m.

The General Store will have all craft items made and donated by the talented church members. This gives everyone an opportunity to buy really unique Christmas gifts.

The bake sale room promises to be filled with a variety of "yummy" treats and will make you want to stock your freezer for the coming holidays.

A new addition to the annual event is the Kiddie Korner. This room is for "kids only" and provides the children the opportunity to shop for parents, teachers, siblings, etc. in privacy. Many of these gifts will be personalized by the children. All of the gifts in Kiddie Korner will be priced very reasonably and gift-wrapped.

The turkey-n-dressing meal will be as delicious as

always. Tickets are on sale now by many church members and in the church office, or may be purchased at the door. The prices will be \$3.50 for adults and \$1.75 for children under 12.

Don McCandless is the auctioneer for the event that begins at 1:00 following the meal. All of the items not sold in the General Store and Bake-Sale room will be auctioned at this time.

One half of the proceeds for the day's events will be used for various church projects. The other half will go to the field of missions.

Lockney Care Center Capers

BY VICKIE HUTTON

We are really fortunate to have so many wonderful volunteers. A group of ladies made us some much needed bibs. We thank these ladies for taking time out of their busy schedules to make us these lovely bibs.

Our bingo games are more and more enjoyable as the weeks go by. This is one activity that the Resident truly love. During our monthly Resident Council Meeting, the residents clarified the rules for all the new Residents. In other business, the residents voted to go on another picnic, at the canyons east of Silverton before the weather gets bad. President Sally Carpenter closed the meeting. Our lucky bingo winner this week was Jewell Miller. Mrs. Miller won the blackout on Tuesday and Friday. Congratulations Jewell!!!

There was really a lot of foot stomping Wednesday afternoon. Kim Sherman

came for music therapy and really got us into the foot stomping mood. She really has a special talent!

Our administrator Laverne Christian is doing great after her surgery. We sure miss her and are looking forward to having her back with us soon.

Sherman Brashears, Amelia Aston, and L.A. Jones were able to come back home this week. They were truly missed. Nellie Gray, Pablo Salquere, and Alpha Kitchens are in the hospital. Alpha is in Methodist Hospital in Lubbock, Nellie Gray is in Lockney General Hospital, and Pablo is in Caprock Hospital in Floydada. We hope these special people are back with us real soon.

Don't forget our bake sale next Tuesday, October 27th from 10:00 a.m. to 4:00 p.m. or until sold out. Anyone wishing to place a special order may call me at 652-2502.

CONLEY BRADFORD* right, is congratulated by General Pietroski, Director, Tactical Air Command, at 'Pinning On' ceremony of Conleys Major 'oak leaves.' Bradford is the son of Mr. and Mrs. Floyd Bradford of Floydada.

Lockney Methodists invite community to religious film

"Reflections of His Love," a film highlighting the life and ministry of Jonie Eareckson, will be shown on Sunday, October 25th, at 6:00 p.m. in the First United Methodist Church in Lockney. The film is produced by World Wide Pictures, an arm of the Billy Graham Evangelistic Association.

In the film Miss Eareckson, who was paralyzed from the neck down in a diving accident, tells of the great transformations that have taken place in her life because of her willingness to accept

all of the things that have happened to her. There will be no admission charge to the film and the community is invited to attend.

Longhorn Sports

Longhorns fall in first district tilt

Continued From Page 1

Following intermission, the Lockney defense seemed to be inspired, holding the Hornets to a single field goal in the entire second half. The mistake ridden offense, however, did not seem to be similarly motivated, managing only a single touchdown and two extra points to bring the score to the Tulia 25 and Lockney 15 as the third quarter ended.

The Horns final TD came on a 13 yard pass from McCormick to Robert Rendon. McCormick then optioned right and ran it into the end zone for the two point conversion. The Longhorns had two more possessions, both of which ended with interceptions of McCormick passes.

With 3:07 left in the game, Mark Hill, Tulia's barefoot kicker blasted a 47 yard field goal to bring the final score to 28-15.

South Plains News

Sunshine welcome site to South Plains Comm.

BY MRS. MURRAY JULIAN
South Plains, October 18:

The sunshine was beautiful here Saturday and Sunday after so many days of fog, drizzle, rain and bad roads have kept those on dirt roads busy, as they take and get their children to school and other functions. We are all glad and thankful we did not have the heavy rains and flood of other areas.

Mrs. Frank McClure was brought home from the Lockney Hospital Friday morning at 9 a.m. October 16. She was in the hospital nearly two weeks.

Mrs. Mamie Wood took Mrs. Bonnie Moore to Lubbock Friday October 16, in the afternoon, to take the plane to Jacksonville, Florida, to visit a niece, and she plans to spend the winter there. Mrs. Ruby Higginbotham accompanied them to Lubbock.

Visitors at the South Plains Baptist Church Sunday morning for church services included Melissa Horne of Plainview, Mrs. Vera Rogers of Lockney, John Burson and Mr. and Mrs. Darvin Potter and Cody all of Silverton. We welcome a church member not present very often, Renee Sanders of Plainview.

Sunday, October 18, was the 34th wedding anniversary of Rev. and Mrs. Cecil Osborne and we offer them our congratulations and best wishes. We were glad to see Mr. and Mrs. Johnny and Oleta Wilson of Floydada at church Sunday. They have been spending some time out at their mountain home in Cloudcroft, New Mexico.

Thursday Mrs. M.M. Julian accompanied Kendis Julian to Lubbock where they went to the airport to meet Mrs. Bill Barnes and Jason of Commerce, and Mrs. Terry Julian of Roscoe joined them there. Later Kristi Julian met them and they all enjoyed lunch together and a time of visitation. Mrs. Barnes and Jason are spending several days at Roscoe with her parents.

Mrs. Lois Lyons was hostess in her home for a Home Interior Party, showing

Christmas things, on Saturday morning October 17, at 10:30 a.m.

Mrs. Ruby Higginbotham accompanied Mr. and Mrs. Alton Higginbotham to Lubbock Saturday night, where they attended a house warming at the home of Mr. and Mrs. Bud Higginbotham.

Mr. and Mrs. Sylvin Kinnibrugh spent two days at Truscott last week with his father, J.A. Kinnibrugh, and came home Friday, October 16. Lavoy and Peggy Kinnibrugh from Seymour are going to come and stay with

Sylvin's and Lavoy's father, J.A. Kinnibrugh, for the time being.

Wednesday night, October 14, at prayer meeting, officers for the coming year at the Baptist Church were voted on, and the church annual letter was read and approved.

South Plains Hobby Club met October 14, at 2 p.m. on Wednesday in the home of Mrs. Harold (Mildred) Hamm. Mrs. Letha Mulder presided at the business meeting, and Mrs. Dot Cummings gave a demonstration

of a new dish. Roll call was: A favorite recipe. Mrs. Carolyn Marble gave the "Thought For The Day." Mrs. Cummings cooked a Chinese dish, and hostess Mrs. Hamm served delicious pumpkin pie and coffee. Attending were: Mmes Carolyn Marble, Letha Mulder, Jewel Fortenberry, Juanita Teeple, Dorothy Cummings, Lillie May Milton, Navolia Kinslow, Louzilla Nichols, and Mrs. Mildred Hamm. The next meeting will be on November 11, at 2 p.m. in Lockney at the home of Mrs.

Jewel Fortenberry. Roll call will be: "A Trip I Would Like to Make."

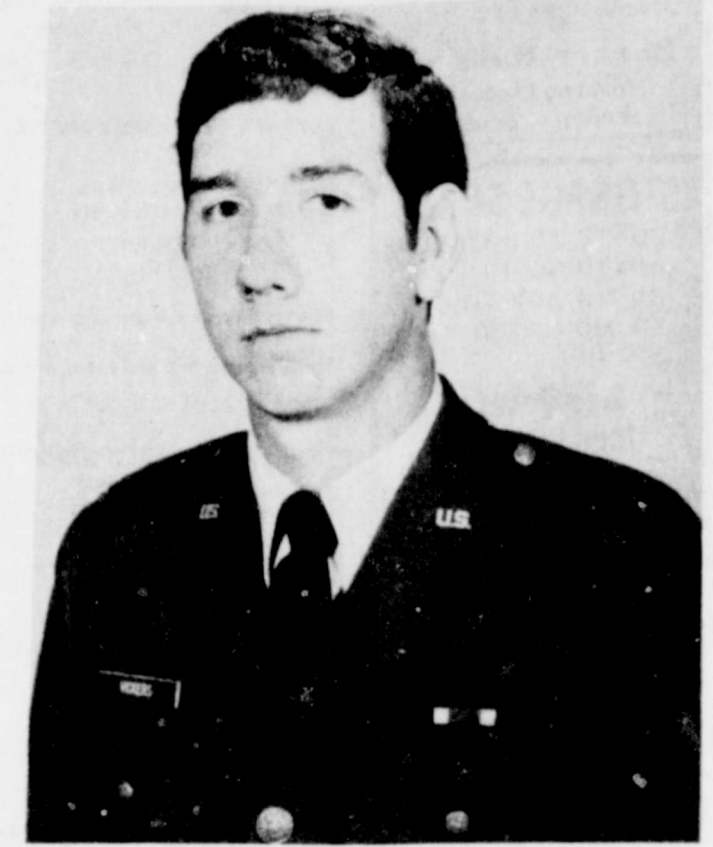

A baby shower will be given honoring the twin daughters, Tobey Lynn and Tessa Lannette Lutrick, born September 24 to Mr. and Mrs. Teresa and Roby Lutrick of Hereford. The shower will be held in South Plains, Saturday, October 24, at the home of Mrs. Carolyn Marble. Time of the party is 3-4 p.m. Grandparents of the twins are Mr. and Mrs. Dean Stewart, who live in South Plains.

DIFFERENT — This kitten, or "Cabbit", is showing off her bushy tail.

Better look again... Ever heard of a "Cabbit"?

October 22, 1981 Page 1B

From the front, she gives the appearance of being a typical, yellow brindle kitten.
 But "typical" she definitely is not. And terming her a "kitten" may be only half correct!
 Esther Trevino of Lorenzo calls her pet "Cabbit" or "Rabbit". The reason for the name is evident, because Mrs. Trevino believes her "less than a year old" pet may be half cat and half rabbit.
 Or she could be a "throw-back" of some type.
 "Cabbit" looks from the front and side — except for her bushy, rabbit type tail — like an ordinary young cat.

And yet her movements are much like a rabbit. The timid young animal hops on her back legs.
 Her mother is a "regular cat" and other kittens in the litter are "normal kittens". However, in one of the mother cat's other litters, a "cabbit" appeared.
 Mrs. Trevino assumes that her pet's father may have well been a rabbit, thus the name "Cabbit".
 The Lorenzo woman's pet makes sounds like a cat, further adding to the mystery.
 She is extremely shy, having little to do with humans. Mrs. Trevino points out that "Cabbit" just "doesn't like strangers." In

fact, she has not been overly affectionate with her owner since being sent to a daughter's home at Loop while Mrs. Trevino was "spraying my house."
 "Cabbit's" favorite person is Mrs. Trevino's son-in-law from Ropes. The small animal climbs on his shoulder or sits in his lap, hungry for affection.
FEW FRIENDS
 "Cabbit" gets along "fairly well" with Mrs. Trevino's small dog, although she "sometimes growls" at him. Generally, the cat or cat-rabbit has a genuine fear of dogs and dislikes to go beyond the confines of Mrs. Trevino's apartment in the senior citizens complex in

Lorenzo.
 Mrs. Trevino's unique pet was raised by friends of her daughter, who reside between Seagraves and Seminole. Her daughter received the pet as a gift. Her mother, who loves animals, persuaded the daughter that she needed "cabbit". This was "about two months ago".
 Although Mrs. Trevino doubts whether her pet will bear offspring because "she just doesn't go outside the house," she is curious about "what her babies would be."
 For that matter, no one knows for sure about "cabbit's" ancestry!

MOVES LIKE RABBIT

Home celebrates birthdays

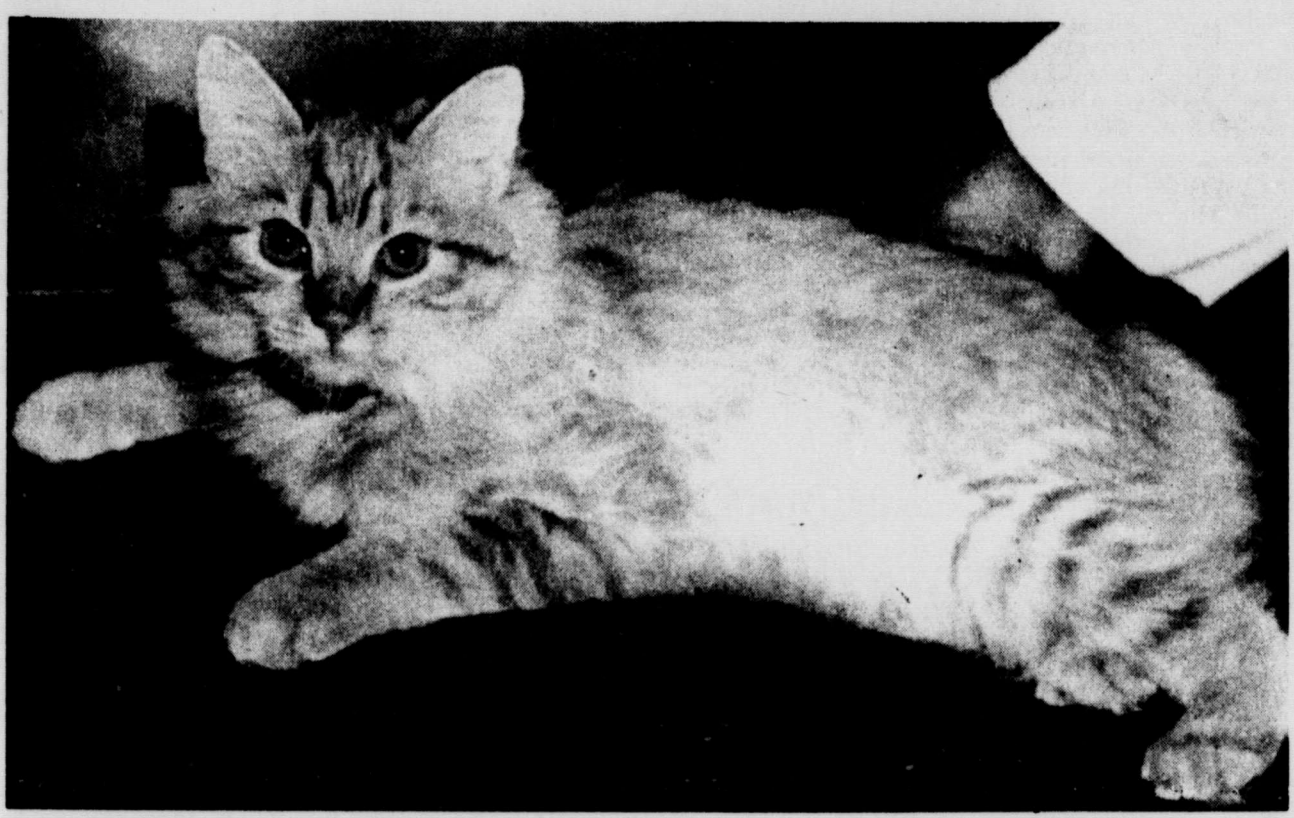

is October party.
 The "honor" table was laid with an ecru cloth and centered with a floral arrangement in gold and orange. Matching birthday cards marked the places for the honorees.
 Mrs. Finley was unable to attend as she is still in Caprock Hospital recovering from an illness. We missed her very much.
 Special guests of the honorees were Jean Kendrick with Mrs. McSwain, Sherry Colston with Mrs. Colston, Meral Freeman with her wife Jessie, Luther and Lorene Lancaster of Matador with her father, Mr. Lawrence and Imogene Gray with her mother, Mrs. Roy.
 Mrs. Lancaster surprised all of us with a beautifully decorated birthday cake honoring her father's 92nd birthday. It, along with a delicious pound cake and tangy orange punch was served to the honorees, guests. Home residents and employees.
 The poem was read and all joined in singing the "Happy Birthday" song. Dorothy Neff was certainly missed and everyone surely hopes she will soon be well and able to be on "the go" again.
 Thanks so much to Sherry, Jean, Lorene and Imogene, who so graciously helped with the serving and in getting the people in and out of the dining room.
 The next party will be Thursday, November 12.

2:30 p.m. Please attend especially if you have a loved one or close friend being honored.

Electric highways carrying convenience, comfort and commerce to the far reaches of the state are indispensable lifelines to growing communities.
 But, the power they carry is generated mostly by diminishing supplies of gas or costly coal and nuclear energy. As wholesale power costs go up conservation is the only sure way to save money on your electric bill.
 While the cooperative plans to provide more power, they are urging you to use less.

We have found that the Pat Walker program will give any woman the results that she wants, no matter her age, size or how many other programs, diets or gimmicks she has tried.

The most exciting thing about Pat Walker's is that it is based on permanency. By the time we have attained your desired weight loss by working together, you will have learned how to maintain your figure on your own for the rest of your life. That is something that no one will ever be able to take away from you!

When you come in for a free complimentary treatment and figure analysis you will first be given a 30 minute session on the Symmetricon. Afterwards, we will explain the Pat Walker program to you. We do not have contracts or membership fees.

The success of Pat Walker's for all these nearly 30 years is based on just two things: Consistently achieving the results desired by both us and the patron; and, through the introduction of Pat Walker's to women, making them aware that there is a safe, effective alternative to starvation and fad diets, pills and strenuous exercise.

Whether you feel the need to lose a substantial number of pounds and inches or if you just need a little firming and toning, we think Pat Walker's is for you. Interested? Pittman all children entering school for first time have a vision test. The Society applauds the law and has worked to help implement it. However both the Society and the Texas Department of Health emphasize that the earlier in life a child has a vision test, the better it is for the child. Had young Graham's amblyopia gone undetected until he was six or seven, it might have been too late to correct his "lazy" eye.

Many parents think that a child's vision can't be tested until the child is old enough to read the letters on the eye chart. Dr. Pittman went on to say that is erroneous. Doctors can readily test a baby's sight and Prevent Blindness looks forward to the day when every child's eyes will be examined by a professional at birth and preschool years.

"That, however, is an impossible dream," he said. "No eye charts have been developed for screening young children. The 'E' chart on the Prevent Blindness Texas school program 'Tumbling E' chart. FARM NEWS

New interest rates for USDA's farmers home loans

The Farmers Home Administration in the U.S. Department of Agriculture will start charging higher interest rates on several of its loan programs as a result of legislation enacted by Congress.

Dwight O. Calhoun, Acting Associate Administrator of FmHA said higher rates are required for community facility, water and waste disposal, emergency farm and limited resource farm loans. The changes were included in the budget reconciliation bill passed by Congress just before the August recess.

In addition to the new rates, the use of prime farmland for development purposes will be more costly in some cases under provisions of the 1981 legislation. Calhoun cited as an example an extra 2 percent interest on loans used to finance community facility and certain other projects on "prime" or "unique" farmland.

"Prime" farmland is described as having the best combination of physical and chemical characteristics for producing food, feed, forage, fiber and oilseed crops. It also must be available for those uses.

"Unique" land is other than prime land having special combinations of soil quality, location, growing season and moisture to economically produce high quality or yields.

Increases in interest rates are:

PROGRAM	OLD RATE	NEW RATE
Water and Waste Disposal	5	12.25
Community Facilities	5	*12.25
Emergency Farm Loans	15	17
(For disaster after Oct. 1, 1981) For persons able to obtain credit elsewhere (other than FmHA)		
For persons unable to obtain credit elsewhere	5	8
Farm Operating (Insured Limited Resource Loans)	7	*11.5 (for first 3 years, then reviewed every 2 years)
Farm Ownership (Insured Limited Resource Loans)	5	*7

*Plus 2 percent annually when prime or unique farmland is involved.

Calhoun said the interest premium for use of prime or unique land will not apply if the applicant is a public body or Indian Tribe and can demonstrate to FmHA that it cannot suitable locate on other land.

The community facility and water and waste disposal rate of 12.25 percent was derived from the statutory requirement that it not exceed the current municipal bond yield. This rate must be calculated quarterly based on market conditions.

Interest rates will remain at 5 percent for facilities required to meet health and sanitary standards in areas where median family income is below the poverty level established by the Office of Management and Budget, currently \$8,450.00 a year.

Other Farmers Home loan rates are not affected by these changes.

Landscape & Gardening

BY KEN LANGLEY

STORING — FALL GARDENING

Tomatoes is one type of vegetable that has to be harvested before the frost. The tomato will ripen very slowly if they are held at 55 degrees. If the tomato fruit is stored colder than 55 degrees, it will undergo chilling injury, which will hurt its flavor and hurt the nutrition content. If you want to ripen the fruit faster, increase the temperature to not more than 70 to 75 degrees and the fruit will ripen in about 5 to 7 days.

There are actually 3 classes of storage that are required depending on the vegetable. There is the warm storage, cool dry storage and the cold humid storage.

The sweet potato is probably the most sensitive of the crops that are harvested before the soil freezes. In fact, they should be harvested before

the soil gets below 50 degrees or they'll undergo chilling injury. When they're harvested, they must go through a curing period where they form a new skin underneath the thin skin they had in the soil. To do this, they need to be conditioned at 85 degrees. This is for about a week or 10 days. Then they're transferred to a cool temperature at about 60 degrees. Under those conditions they will store for as much as 8 to 10 months.

The next class of storage is the cool dry storage for pumpkins, squash, and onions. In common storage, raised benches or shelves, keep winter squash and pumpkins for several months at about 50 to 55 degrees. In a garage area or in a barn or a shed you can usually get this kind of condition. The onions will keep for several months, as long as 6 to 8 months, if kept down at freezing. High and dry for onions is the rule. The regular white potato, should be kept as

cool as possible and under high humidity if you want long storage.

The other class is cool moist condition like the cucumbers and beans. Keep them at 45 to 50 degrees. The refrigerator is fine for these. The vegetables like lettuce, spinach and broccoli, that are going to be held in storage, keep them as close to freezing as possible.

If you can provide these kinds of conditions you can have a fairly supply of vegetables for several months.

Crop residue benefits producer

Producers in Floyd County may get greater production on farmland using less fertilizer and water by a beneficial use of crop residue.

Crop residue left on or near the surface of soil can conserve moisture by reducing evaporation, increase benefits of rain water by slowing and decreasing runoff, reduce topsoil loss by protecting from blowing, and improve soil tilth and fertility by mixing of residues.

This can be accomplished by the use of a winter cover crop on clean tilled land, rotating cotton with high residue producing crops such as grain sorghum or corn, conservation tillage, or a combination of these. Leaving corn or sorghum stubble on the soil surface is also an excellent benefit for pheasant.

Benefits at present may only be slightly noted, but the possibility of increased production from year to year, while reducing fertilizer and irrigation costs will aid the producer in the battle against runaway inflation.

For more information on Crop Residue use and management, contact the Soil Conservation Service, 208 S. Wall, Box 430, Floydada, Texas 79235 or call 983-2352.

Tax Practitioner workshops offered

The Texas Agricultural Extension Service is cooperating with the Internal Revenue Service in offering 38 Tax Practitioner Workshops across the state reports Jett Major. The nearest workshop to our area will be held in Lubbock on November 30th and December 1. These two-day workshops are specifically designed for tax practitioners who work extensively with farmers and ranchers. Topics to be covered in the general workshops are: What's New; Capital Gains and Losses; Net Operating Losses; Credits-How to Report; Tax Principle Review-parttime activities, rental and personal use of property-travel and entertainment. This year Advanced programs will be offered in Houston, San Antonio, Austin, Lubbock, and Dallas, stressing tax preparation for small businesses also.

Topics to be discussed in the Advanced workshops are: What's New-including Windfall Profits; 351 Transfers; Dividends, Calculating Earnings and Profits; Liquidations and Redemptions; Partnerships-Transfers In; Operating and Partnership, Distributive Shares; Partnership Dissolutions and Withdrawals; Questions and Answers. This is one of the most successful Extension programs. Last year over 3,000 people participated in this state-wide series. These practitioners reported filing over 850,000 tax returns. For additional information, please contact Jett Major at the Floyd County Extension Office for a brochure explaining more about the program and registration information.

AG WEATHER CENTER
Texas farmers have an ally in the Agricultural Weather Service Center of the National Weather Service located at Texas A&M University. The Center issues daily agricultural advisories over radio stations and networks to help farmers and ranchers cope with weather-related matters. The advisories combine both agricultural and weather date to inform producers about various operations such as planting, fertilizing, spraying, irrigating and harvesting. With the development of crop models using computer programs, the effects of weather on various crops will become more predictable in the future.

Farmers live with risk in agriculture

When it comes to risk and uncertainty, farmers should be at the head of the line.

"Managing a modern farm operation in today's complex and risky world is no easy task," says Dr. James Ahrenholz, economist with the Texas Agriculture Extension Service, Texas A&M University System. "Farmers face ever-changing conditions in the weather, market place and their total environment that make their business a gamble."

While farmers have always had to cope with various degrees or levels of risk, it's important for them to have a better understanding of the different sources of risk in the decision-making process, notes Ahrenholz.

He presents these major sources of agricultural risk as identified by Gene Nelson, Oregon State University, and Ted Nelson, Oklahoma State University, in a special Extension Service, U.S. Department of Agriculture report:

—Production and yield risk: Yields and production can vary greatly due to weather, diseases, insects, varieties, machinery, timing of practices and related factors.

—Market and price risk: Prices paid for production inputs and received for farm products are affected by supply and demand conditions, trends, speculations, government programs, commodity cycles, seasonal variation and consumer demand.

—Business and financial risk: Increased use of borrowed capital and larger capital investments have increased financial risk and put more pressure on maintaining an adequate cash flow.

—Technology and obsolescence risk: Rapid development of new technology can make current production methods

obsolete shortly after important investments are made. Thus there is risk in adopting new technologies too late as well as too soon.

—Casualty loss risk: Loss of assets due to fire, weather and theft can be devastating, especially in inflationary times.

—Social and legal risk: Agriculture is subject to changing social attitudes that affect governmental laws and regulations dealing with such areas as environmental protection, use of certain chemicals, and land use planning.

—Human risk: Farming is a hazardous occupation, and accidents and health problems can be critical to the survival of the operation, particularly during crucial production periods. Dishonesty and undependability of business associates also can undermine an efficient operation.

"The key to coping with the uncertainties of agriculture is the risk-taking attitude of the farmer himself—how he views risk," contends Ahrenholz. "If a farmer is to be happy with his decisions, he needs to make them so as to be consistent with his attitudes regarding risk."

Risk-taking attitudes mainly result from farming goals and objectives, financial ability to assume the risk involved, and size of the possible gains or losses involved in the decision.

There are risk takers, risk avoiders and risk neutral farmers, notes the economist. All have their own management style and all can be successful. The main point is that a farmer needs to consider his attitude about taking risk since it will influence his decisions and give him a better feeling about them.

IT'S A FACT
More than 12,000 Texans learned about good gardening techniques through a unique radio shortcourse offered in 17 different counties across the state last year. The program was conducted through the joint efforts of local radio stations, garden centers, nurserymen and the Texas Agricultural Extension Service. This is another example of the Extension way—"People Helping People."
