GOODNIGHT LOSES TO NORMAL 22-0

EXCELLENT FORM SHOWN BY LO-CALS IN MONDAY'S GAME.

Forwards Pass Nets 168 Yards In Gains for Normal-Far Outclass Visiting Team.

The Normal football team defeated the Goodnight Baptist college team Monday afternoon on the local grounds by a score of 22 to 0. The locals showed great improvement in form over the last game and at every turn of the game sprung new plays that took the visitors off their feet. The ball was again placed over the goal line for anether touchdown in the final stages of play, but an unfortunate fumble lost the ball and an other six points.

The Normal boys worked the forward pass successfull 11 times, making 168 yards in gains by this method. It failed them five times. Goodnight tried the forward pass five times and failed each time. On straight line bucks and end runs the Normal got away for 122 yards, while the visitors made but 25 yards the entire game. They made first down but twice in the game. Prichard far out punted the visitors' bootsman. Goodnight Normal 10 vards.

Bill Black started the scoring for the locals in the second period by a drop kick from the twenty yard line, counting 3 another touchdown on a short forward pass in the same period. Score, Normal 15, Goodnight 0.

Goodnight held the locals durfirst down once. At the beginto action in this quarter and nings and family. made a thirty yard run for a touchdown. Score Normal 22, Goodnight 0. The spread formation was now put into action and forward passed were made at will. Starr tore loose on another 30 yard run and Mede got away for 28 yards, being downed within one foot of the goal. Mede was given the ball on a line buck to take it over, but fumbled and lost the touchdown.

The Goodnight captain stated that the Normal has a much stronger team than they had realized and admitted that his team was wholly outclassed.

The following was the line up of the Normal: W. Boston center, Tarlton, C. Boston guards, Scott, Lust tackles, Black, Mathes, Shotwell ends, Conner quarter, Mede, Starr, Glass halves, Prichard full.

Popular Young Lady Marries Amarillo Man - Left For Wedding Trip to Dallas.

Miss Ellen Donald and J. W. Mount of Amarillo were married this morning at 9:15 o'clock in the presence of a large company of friends and relatives at the bride's uncle, Judge C. T. Word, Rev A. B. Haynes officiating. The bridal couple left on the 10:00 o'clock train for a wedding trip to Dallas, Ft. Worth and will visit at the home of the bride's father in Justin.

The ceremony was performed under an arch of fern and autumn leaves. Mrs. W. G. Word sang, "Oh Perfect Love," which was followed by the wedding march played by Miss Lola Word. Miss Word played "The Rosery" during the ceremony.

The bride was beautifully clad

in a blue cloth coat suit. Miss Donald has made her home in the city for ten years. She is active in social and church circles. She is one of the most talented musicians in the city and has a large circle of friends who extend most hearty congratulations and wishes for a long and happy life. Mr. Mount has a splendid position as station master with the Santa Fe in Amarillo. He is an entergetic young man and has many friends in both this city and Amarillo where he has lived for sev-

After their wedding trip, Mr. and Mrs. Mount will return to Amarillo to make their home.

Resolution of Respect.

We, your committee to whom was referred the drafting of resolutions of respect and sympathy upon the death of Sister Lon B. Campbell, beg leave to submit the following: Whereas it pleased God-in his wisdom to is more offered. He will give a She had been in attendance to take from our midst 'Sister Campbell, age 48 years and 5 months, whose many kindnesses will long be remembered. Therefore we are called to weep in the loss of our sister but we bow in humble submission to Him who doeth all things well. Therefore be it resolved, that our lodge has lost a faithful member, the husband a loving wife, the sons a devoted mother Thursday from Amarillo. Miss and the community a noble Christian. Resolved, that this Lodge extend to the family our heart felt sympathy in this sad hour of bereavement. Resolved further, that our charter be draped in morning for a period of thirty days and a copy of these resolutions be furnished the family, a copy be furnished furnished the Randall County News and a copy be spread upon our minutes.

> Fraternally Submitted, Maude Nickson Dollie Taylor Mabel VanSant.

First Snow Saturday.

Saturday was one of the prettiest days the Plains' country ever saw, until the wind turned to the north at 5:30 and blew most of the night in a fierce gale. Snow fell during the night but was of no consequence. Monday was warmer but another north wind Tuesday brought down the temperature. There have been heavy frosts every night.

See Our Statement in this issue.

It will tell you what we are doing.

Thank Assessor.

The Commirsioners Court of Randall county met in a called session some two or three weeks ago to pass upon the Tax Rolls of Cyrus Eakman Tax Assessor of Randall county. After trying the rolls by all the methods known to prove them, they were found to be absolutely correct to a cent. The commissioners court especially and the people of Randall county in particular owe Judge Eakman a debt of thapks for the able manner in which the rolls have been prepared. They are very neat, legible and accurate. The comp troller at Austin has notified Judge Eakman that they are correct in every particular. The Commissioners Court extends their thanks to Judge for his very efficient services in the preparation of his rolls in such a neat and orderly manner.

C. E. Coss, County Judge.

A Marvelous Escape.

"My little boy had a marvelous escape," writes P. F. Bastiams of Prince Albert, Cape of Good Hope. "It occurred in the middle of the night. He got a very severe attack of croup. As luck would have it, I had a large bottle of Chamberlain's Cough Remedy in the house. After following the directions for an hour and twenty minutes he was through all danger." For sale by all dealers.

Crop Improvement

School Children Can Earn Half a Million a Year in Each County by Testing All Seeds Planted.

SEED CORN

Every Boy and Girl in School Should Select in the Field the Seed to be Tested Later-Work for the Country Seed Committee.

[National Crop Improvement Service.] The setting apart of a seed-corn day for the gathering of seed is important, but all time and labor is of no value unless the seed is properly cared for after gathering. Seed gathered early in the season in the proper way contains a heavy percentage of moisture, therefore requires much care in curing or it may mold and spoil. The day corn is gathered it should be husked and put where there is free circulation of air. The ears should be so placed that no two are touching. posed of ingredients which act specifically on the womanly constitution, and helps build the weakened organs back to health ion way of storing was to braid the cars in long strings and hang them in the attic. This method is very satis-

Boy Team Stringing Up Corn.

Another method that is used by the Corn Clubs and schools is to strip the ears entirely of their husks and tie them through the middle with binding twine, placing from ten to twenty ears to a string. The strings of ears are then hung in some place out of the sun and rain and where there is free circulation of air. Still another method that is sometimes employed is to hang poultry netting on the wall and place the ears one in a mesh. This gives free circulation all around each ear and is a very satisfactory method of drying. Sometimes finishnails are driven in the wall and one car space is plentiful, this melod is con-

storing: At this time they may be. taken down and stored in a bin, provided they are not piled over two or three ears deep, or better they may be left hanging until ready for shelling in the spring. In either case they must not be exposed to a damp at mosphere as the dry ears readily absort moisture from the air. During. e cold weather freezing will injure the germ if it is damp, but not if it is thoroughly dry .- L. B. Basset

CHOOSE THE CORN STALK Seed Corn Depends as Much on Leaf and Root as Upon Grain

[National Crop Improvement Service.] Maybe I ought not to say it, but there is not one man, in ten who uses just a little gumption in the selection of his seed corn. He does not understand the principles of selecting seed corn. We go to the show and pass judgment as to how the ears will rank in the show, but no man in the universe knows enough about corn to know which ear is the better producer. We can-only determine that by an actual trial and by the study of the plants on which the corn grew, and we cannot study the plant

rom the ear. We find sometimes that there are a few things that may indicate yield in corn, but the only true indication is by a study of the plant itself. In a contest we had in Pettis county the Claude Wolcott, Physician men brought in fifty good stalks of corn pulled up and with the ears at-

The contest was for the class to pick out ten stalks with the ears on them that they preferred for seed, and it was surprising how rapidly they learned that, and it is also surprising that we have not thought of a great many, of these things before

The leaf system and the root system correspond exactly to the lungs and digestive apparatus of an animal, and no animal can be a good one with poor lungs and poor digestive organs, and no corn can be good corn

without good vitality. We can give the contest work so far as corn judging is concerned, but the more important thing at this time is the selecting of the ear from the stalk, and that assists in broadening our classification.-S. M. Jordan.

SOAK SEED FOR SMUT.

Formaldehyde Solution Should be Used in a Barrel or Tank In stead of Sprinkling. [National Crop Improvement Service.] C. B. Hutchinson, of the Missouri Agricultural College, states that mere sprinkling of formaldehyde on seed wheat is not sufficient as it does not clean out the infection from the grain. He recommends soaking the seed in a solution of one pound of formaldehyde to forty gallons of water skimming off the light kernels that float to the surface.

The Crop Committee also recom-mends that every neighborhood club appoint a committee to inspect the seed wheat of each member, and obcain a smut machine and eradicate the smut systematically from every district, which is the only way that it can be done. A fanning and grading machine is efficient and economical and, is imperative in seed selection.

PERMANENT' CONCRETE ROADS

Cement Popular as Road Binding Ma terial-Maryland First-Michigan Second in Concrete Road Construction.

[National Crop Improvement Service Maryland according to Dr. Richar Hill, Director of Farmers' Institute in that state-leads all other states i the building of the new type of co crete roads.

Wayne County, Michigan, has built over 75 miles of concrete road and expects to have completed in this one county alone 100 miles of concrete road by winter. These roads are farmers roads and have been built by a both town and county.

A Proposition for Road Clubs.

cently, "because of its comparatively place. low first cost when compared with other hard roads; its permanence and durability, and the fact that when properly laid there are little, if any, annual charges for repairs or maintenance. A concrete road is not noisy. It is not slippery. Proof of this last tween the hours of 10 o'clock a. m. statement lies in the fact that in Kansas City, Missouri, and in Sheboygan, 2nd day of December 1913, in satis-Wisconsin, concrete roads have been faction of the judgment upon which laid on grades over 7 per cent, which said execution was issued, and which is 3 per cent more than some of the steepest railroad grades in the United States, which are seldom over 4 per For example, there is a 4 per cent grade on the "Moffat Road," in the Rocky Mountains in Colorado.

sanitary. There is absolutely no dust, dirt, nor mud. Motor vehicles and rubber-tired buggies will not skid on a concrete road. Again, however, two main points in favor of concrete roads are emphasized. First, the cost is generally less than half that of other types of hard roads--the annual cost of repairs (so great an item on most said sale will be applied to the paycountry roads and city pavements) is ment of said judgment, less said renext to nothing."

"It seems strange," continued this engineer, "that cement has not been thought of as a road as well as a sidewalk material. For over a generation cement has been used successfully in sidewalks, cross walks, curbs, gutters and culverts in the country, for retain ing walls of railways, for foundations of skyscrapers, etc. In view of these facts it is remarkable that more concrete roads have not been laid, although over 5,000,000 square yards were laid in the United States last year, according to the best authorities. It is probably not generally known that the average waterbound macadam road in the country costs be placed on each nail. Where wall tween \$6,000 and \$7,000 per mile, and girl that degree of general intelligence that the macadam roads in New York that you wish your children to have. state are now costing over \$1,010 a You can now get The Randall County After hanging in any of the above mile, per year, for maintenance. Un- News and The Dallas Semi-Weekly described methods for two months, doubtedly, there will be hundreds of near future, because, when honestly and intelligently laid, with what is called a 1:23 mix (one part cement, two parts sand and three parts gravel), a concrete road should last for half a century. The repairs during this period would be so small as to amount to practically nothing. For five years, up to and including 1911, 65 miles of concrete road in Wayne County cost the people only \$300 for

REPLACING BARN FOUNDATIONS

has arrived and has come to stay, be-

cause the farmers want a road which

is good 365 days a year. What the

farmers want they generally get."

Concrete is Good Material, as It Will Never Rot Out-Not Affected by Dampness.

National Crop Improvement Service.] Now is the time for farmers to replace barn and other farm building foundations. One of the leading beef feeders in Illinois, near Geneseo, has men adopted a unique scheme for conserving manure, the life of his animals and his own convenience. He first laid a concrete feeding floor or pavement, making it approximately 500 feet one way and 350 the other, and 6 inches thick, reinforcing it with triangular metal mesh. After twenty four hours he covered it with carth and kept it moist for 10 days, so that it could thoroughly "set." All of his barns, corn cribs and other buildings are upon top of this floor or pave ment- of concrete, which drains of into a cement manure pit.

When foundations of concrete are properly put in they need never be replaced. The mixture and the materials used are of great importance. but if a little care and common sense are used, the farmer can use concrete and other forms of cement construction a great deal easier than any other building material. Engineers recommend for foundations and or dinary walls, greater than 6 inches in thickness, what is known as 1:21/2:5 mix, that is, I cubic foot or I sack of Portland cement to 21/2 cubic feet of clean, coarse, well-graded sand and cubic feet of screened gravel or crushed stone, varying in size from 14 to 11/2 inches. Bank run gravel 7 Sherman St., Hornellsville, N. should not be used unless it is first screened through a 14-inch sand screen or wire cloth. All materials passing through this screen can be classed as sand.

For ordinary barn foundations the width should be 8 inches and the footings should go down below the free

It is now stated that the English sparrow will kill alfalfa weevil. It is ame he has some excuse for hving.

Notice of Sheriff's Sale.

By virtue of an execution issued out of the Honorable District court of Armstrong County, Texas, on the 9th dayof October 1913, in the case of T. K. Jones vs J. H. Altizer, et al, No. 260, to me directed and delivered, I did on the 11th day of October, 1913, at 9:45 o'clock a. m. levy upon the following described real estate, situated in Randall County, Texas, as the property of the defendant, J. H. Altizer, to-

All of section No. 30, Block No. 1, Tyler Tap Ry Co., patented to R. E. bond issue, voted for and approved in Foster. That said land is situated about three (3) miles north of Canyon City, in Randall County, Texas, con-"Concrete makes the best farmers' sisting of about 640 acres of land, and oad," said a prominent engineer re is generally known as the "Foster

I will proceed under said levey and execution to sell said real estate at public auction at the court house door of Randall County, Texas, on the first Tuesday in December, 1913, beand 4 o'clock p. m., same being the is described therein, to-wit:

Being a judgment originally rendered on the 8th day of October 1912, for the sum of \$12,986.74, in favor of T. K. Jones vs J. H. Altizer, and W. S. A concrete pavement is clean and Roberts, bearing interest at the rate of 6 per cent per annum, from its date on which judgment a remitter was filed by the plaintiff on the 11th day of October 1912, for the sum of \$850.48, and which judgment, less said remitter, remains in full force and effect, wholly unpaid; and the proceeds of mitter, together with the interest and cost of suit and the further cost of executing said Writ of execution.

Witness my hand on this the 24th day of October 1913.

Worth A. Jennings Sheriff of Randall County Texas.

THE PUBLIC SCHOOL is the one greatest factors in our country. When reinforced by good, wholesome, reliable newspapers, it gives the American child a practical education. Without the aid of newspapers the public school can not give a boy or Farm News for one year, three paper a week, for \$2.30

WONDERS OF THE WO

Will Be Shown at America's Great Celebration at San Francisco in 1915.

The Magnificence and Grandeur of the Panama-Pacific International Exposition Cannot Be Adequately Described—A Gathering of the Nations of the World.

will so many nations have participated in an international event. Of the nations that take part, and this includes all the great powers, it is exposition ever held outside of its own boundaries. Twenty-eight foreign countries have already respondof to President Taft's invitation. More than eight hundred leading exhibitors of the world have applied for exhibit space and a number of the exhibits will range in value from \$200,000 to 900,000; more than two thousand apdications for concessions have been seceived. The responses show the apirit of appreciation with which America's sister nations regard the work at Panama.

Display by Foreign Powers. The foreign powers will display all hases of their progress at home and in their colonies. Mr. Harcourt, colontal secretary of Great Britain, has addressed the governors of the selfgoverning dominions, crown colonies and protectorates requesting them to consider the question of participation with the remark that the British display should be worthy of the British compire. Japan will expend \$1,000,000 upon its pavilion which, upon the conclusion of the exposition, will remain as the gift of Japan to America. The pavilion and grounds, occupying five acres, will be located upon the United States Presidio military reservation immediately adjoining the exposition site. Marquis de la Vega Inclan of Spain, who visited San stances into the thousands of feet, Francisco, will arrange for a wonderful art exhibit to include the original paintings of the great Spanish masters and many historical trophies, shines as upon a vast bank of snow, tapestries, and rare pieces of sculpture. Holland will be represented the Netherlands. France cabled San on three sides by gently sloping Francisco requesting twelve acres as ground; within a short distance from the location of a superb exhibit pal- the boundaries of the site, these to be built by France. China. newest of the world republics, is thus the center becomes the floor of lanning to show both the China of the past and that of the future. China and Japan, and indeed all far eastern lands within the sweep of the Pacific, are planning to take part in a wonderful series of Oriental parades and pageants, during a ten days' by the wooded slopes of the Presidio festa in the fall of 1915. There will he assembled in these parades perhaps the greatest gathering of strange tribes and peoples of Oriental lands | leys. ever gathered in the Occident.

The World's Battleships. When the exposition opens-Februthe world will be assembled off Harthe territory of the country it reprements is a fact widely recognized in the procedure of international law, and so the nations of the world will. known from unofficial advices, particspate in a series of spectacular maneuvers in San Francisco harbor in 1915.

ing, which will be the exposition head- ater. quarters, is completed. Machinery hall, the largest of the exhibit palaces, will be the first of the great buildings to be completed. This structure will be 967 feet long and 370 feet in width: three great naves 122 feet high will run throughout its length from north to south. Contracts upon all the main exhibit palaces, of which there are fourteen, are being let at regular intervals and the highest point of construction will be reached early completion of the buildings will ernments.

The splendors of the world will be permit the setting out and planting own at America's Panama celebra- in the grounds and courts of several ion at San Francisco in 1915. Never hundred thousands of rare trees, plants and shrubs now being grown in nurseries.

Early next fall the sightseer in San Francisco will be enabled to lock probable that each one will be more from the rim of the encircling hills elaborately represented than at any at Harbor View down upon the exposition city and see the buildings in progress of construction. To the west he may look out to the Golden Gate and to the islands in the Pacific beyond. To the north he will see the stream of traffic that passes before the exposition site.

Easy of Access. One may easily reach the exposition in twenty minutes from the Ferry building. The site of the exposition at Harbor View lies within the city limits as a crescent upon the shores of San Francisco bay, just toside the Golden Gate. No more pleturesque location, nor one more appropriate to the celebration of a great maritime event, could be imagined. On the south, east and west it is encircled by towering hills with varying contours rising successively from 250 to 900 feet above sea level, like the enfolding walls of a vast amphitheater. Upon the north the site opens out upon the harbor of San Francisco. The panorama at Harbor View recalls the famous Riviera upon the shores of the Mediterranean. In the harbor before the site lies Alcatraz island, the location of a military prison whose white walls are reflected in the waters of the bay. Beyond are the hills of Marin county rising up into the hundreds and in some inwith Mount Tamalpais, loftiest of all, its summit often shrouded with a turban of fog upon which the sun

as a background for the setting. The central portion of the site lies spon a scale never equaled outside slightly above the sea and is encircled slopes change to steep hillsides and a huge amphitheater from whose sides the exposition will be seen stretched out below. To the east and south the residence section encircles the exposition grounds, and to the west and southwest the site is embraced military reservation, dark with cypress and eucalyptus and interspersed with occasional vistas of green val-

All told the site comprises 6_5 acres; it is two and one-third miles in length with a maximum width of ary 20, 1915—the nations of the world one-half mile. Its frontage upon the will, in actuality, officially come to harbor will be approximately two San Francisco, for the battleships of miles and further from the bay it will extend another one-third mile, Fort bor View, the exposition site, at that | Mason, a military post, occupying a time. That a battleship is virtually corner upon the extreme east and along the bay.

Faces the Bay.

The exposition buildings built upon an east and west axis will face the as it were, gather at the western bay upon the north; they will parallel gate of America. More than two the stream of the great incoming trafhundred foreign battleships will, it is fic of the world through the western gate of the United States. The harbor itself will be a part of the great theater upon which will be staged Construction upon the exposition has the world's jubilee and the Golden long since begun. The service build- Gate will be the entrance to the the-

A marvelous panorama will be afforded visitors on ships coming through the Golden Gate. As one looks from the harbor he will see three main groups of exposition buildings. There will be the great central group comprising the fourteen exposition palaces to be devoted to general exhibits; there will be the group upon the left hand or east and devoted to amusement concessions and covering sixty-five acres; this next fall. All the main exhibit pal- will be the "midway." hills and vast distances, called huge effects. The grouping of the fourteen great exhibit palaces will present this result. From afar the central group, facing for almost a mile upon San Francisco harbor, will seem as one colossal structure, a great Oriental city, with walls as high as the average six-story city block and with golden domes, towers and tower gateways rising to heights of 150, 270 and 400 feet. Nearer at hand it will be found that great inner courts lie between the buildings. Eight of the fourteen buildings in the main group will be joined in a rectangle to form almost a huge Oriental. bazar-a veritable walled city with its domes, towers, minarets and great interior courts. In general the buildings of the central group are to be brought into contact with those next adjoining by: arcades, courts and archways.

with its towering ampitheaters of

Through this method of treatment four of the general exhibit palaces: of the main group, fronting north upon San Francisco bay but set back at a distance from the water's edge, will present a single architectural design. Their walls and the adjoining arches will form the main northern facade of the exposition along the shores of the harbor, a marvelous, frontage that will be first seen by visitors who reach the exposition city by water and enter San Francisco bay through the Golden Gate. By day the glittering pillars and minarets of this mile long facade will be seen as a dream city, while by night they will reflect the sheen of a million lights into the waters of the bay.

A Great Esplanade. Before the facade and along the parbor's edge for more than a mile there will be built a great esplanade. vast stretch of ground and terraces in which fountains will play and groups of statuary be set at intervals.

The exposition site at Harbor View, the various tones. Mr. Guerin gives the following word picture of his color plan for the exposition:

"Imagine a gigantic Persian rug of soft, melting tones, with brilliant splashes here and there, spread down for a mile or more, and you may get some idea of what the Panama-Pacific exposition will look like if viewed from a distance, say from the Sausalito Heights, across the Golden Gate. For San Francisco's is to be unique among the expositions of the world in that it will be a 'City of Color.' Not that color is the chiefest value of the exposition, for its architectural features are equally remarkable. This color plan, that of making the group of buildings a veritable blaze of glory and at the same time avoiding the garish or barbaric, · is the great new salient feature of the exposition."

The Court of the Sun and Stars will be 750 feet in width from east to west and 900 feet along its main axis. At the south end of the court will arise the huge tower of the Administration building, 400 feet in height, and dominating the architecture of the exposition. The upper part of the tower will take the form of terraces leading up to a group of figures surrounding a globe typifying the world; the tower will be lined with jewels which will glitter like diamonds when searchlights are turned upon them. At the base of the tower, which will occupy an acre in extent, will be a huge arcade 125 feet high, beneath which the visitor may enter into the Court of Sun and Stars from the main exposition en-

In the vaulted archways of the tower will be grouped a series of mural paintings designed by Jules Guerin and expressing the keynote of the exposition color scheme. But perhaps the most impressive feature of the Court of Sun and Stars will be found in a classic colonnade extend-Brilliant flowers and hardy flowering ing entirely around the court and

N echo tower in the Festive or East Court. At night the East Court, with its pavements of gold, its great banks of flowers, and its lofty palms, will be flooded with light. Musical masterpieces of the world will be rendered by the chimes in the towers. Great saengerfests and choral festivals will assemble upon the floors of the court.

and color to the esplanade.

main group of exposition buildings from north to south. Their theme figures symbolizing the stars. Each will suggest the meeting of the east figure will support a huge artificial and west at Panama. One of the jewel four feet in diameter. At night huge courts, that on the east, will suggest the Orient, rich in Oriental splendors; another on the west, will suggest the Occident, its theme exemplifying the wealth which nature has conferred upon the Saxon who has ever pushed to the west. Between these two courts will be set be groupings of classic statuary, the greatest of all the courts, the superb Court of the Sun and Stars, nymphs; flowers, trees and vines will its theme upon a magnified scale symbolizing the union of the east and west at Panama. This court will stand out among the most brilliant architectural expressions of America and Europe. It will be distinguished by the majestic scale of its architecture; by the splendor of its conception, and by its life, color, and spirit of joyousness. The color plan of this court, as indeed of all the great courts, is designed by Jules Guerin. undoubtedly the foremost decorative artist in America.

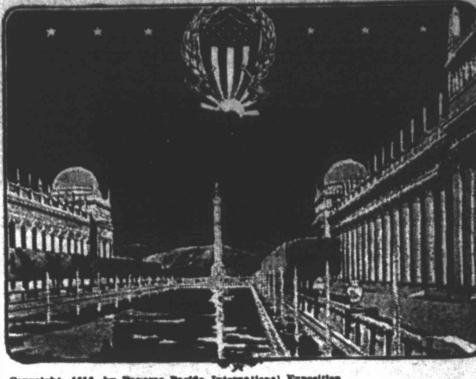

Beautiful Color Effects. In the courts marvelous blendings of colors will be attained. Pompetian red, strong Italian blues, vermilion and orange will predominate. The roofs of the exhibit palaces will be covered with Spanish tile, a reddish piets for from afar the sightsepr e ill gain the effect of the blending of

trees and shrubs will lend warmth | screening the walls of the environing exposition palaces. The columns will Three great courts will divide the be sixty feet in height; surmounting the colonnade will be a series of 110 these jewels will glitter with dazzling lights; by day their radiance will be obscured.

In the center of the court will be a great sunken garden with benches to seat about 7,000 people, surrounding the garden. In the garden will dancing figures, fauns, satyrs and contrast with the statuary and with the superb colonnades and the towering golden domes.

To the east as one passes from the Court of Sun and Stars to the great east or Festive Court will be a huge triumphal arch 90 feet in height and surmounted by a colossal grouping of statuary. Camels, elephants and Oriental warriors will crown the summit of the great arch. To the east bile Hall. In the south garden at the on the approach of the Court of Four Seasons will be a triumphal arch of similar size surmounted by a group representing western civilization. A huge prairie schooner will comprise the central motif of the group.

As the visitor in 1915 passes beneath either of the huge triumphal arches to the east or Festive Court. or to the west court, the Court of Four Seasons, he will traverse great avenues between the exhibit palaces

OOKING toward the hills of Marin county through the entrance of the great Court of Sun and Stars upon the harbor. In the center is seen a colossal column whose spiral represents man's climb towards fame. At the summit of the column the huge symbolical figure is designed to convey pirit of success

whose sides will be adorned with | 177 Hall, 367.8x967.8, and anne mural decorations and screened by classic colonnades. Huge pools of ied Industries, 414x346, and annexes; water will reflect the outlines of the lofty buildings. The walkways will be in pavements of gold. Great banks of flowers and potted palms will lend color and imagery to the vista.

If this visitor passes to the east or Festive Court he will behold a vision surpassing the richest dreams of the Orient. The Festive Court is dedicated to music, dancing and acting; it is designed for pageantry surpassing the luxurious Durbar and will constitute the proper setting for Oriental or modern drama upon a colossal scale. Here will assemble many of the fascinating pageants that will come from the concessions center to draw visitors to the amusement features of the exposition. The architecture of this great court will partake of the Oriental phase of the Spanish Moorish architecture and yet it will have that refinement which is characteristic of the architecture of the Spanish Renaissance. The main tower of the court will contain a huge pipe organ with echo organs in the smaller towers. Electric scintillators will play upon fountains at night; reflected colored lights will cast a spell throughout the court. The walls of the cloister will be decorated with mural paintings; exotic flowers, trees and vines, orange trees in fruit and in. blossom, will contrast with the statuary and the huge colonnades and

Court of Four Seasons, From the Court of Sun and Stars the visitor in passing to the west will come to the superb Court of Four Seasons of which Mr. Henry Bacon. creator of the Lincoln Memorial, is the architect. In its theme this court will typify the conquest of nature by mankind. In the center of the court will be a great grouping of statuary in which Ceres. Goddess of Agriculture, will be shown dispensing the bounties of nature. In each of the four corners of this court will be cut great niches into the encircling exhibit palaces. In each of the four niches will be four great mural paintings suggesting the seasons, spring. summer, autumn and winter; lofty

colonnades will screen the niches. The ornamentation upon the water front will be upon a colossal scale. The Court of the Four Seasons, opening upon the harbor, will be entered through a stupendous gateway, the Gate of Columbus. The visitor will pass through the gateway beneath a great tower to the esplanade upon San Francisco bay. Directly before the tower will be seen a colossal figure of Columbus, facing the water. Ornamenting the tower in recesses will be figures representing the great voyagers of the world.

Before the entrance to the grand Court of Sun and Stars upon the bay will be a colossal column whose spiral will depict man's climb toward success and at the summit of the column will be a figure representing achievement. On the left and before the Court of Four Seasons will be the gates of Balboa, before which will be a colossal statue of the discoverer of he Pacific ocean.

Each of the three main north and south courts will open out upon the asplanade on the shores of San Francisco bay upon the north and upon the great tropical garden upon the routh. Vast beds of flowers in bloom will be set in the south garden: the plants will be replaced by others when

heir flowering season is passed. The fourteen great buildings to be constructed by the exposition company, and to be devoted to general exlibits exemplifying the advance of the world in the arts, sciences and industries, will be the loftiest exposition structures ever erected. In addition there will be the huge series of palices and pavilions to be erected by

the states and foreign nations. To the east of the center group will oe Machinery Hall, the largest single structure of the exposition. Just south of Machinery Hall is Automoeast end and near the concessions center will be located Festival Hall, and near the west end the Palace of Horticulture, a huge structure of wood and glass. Flanking the great ectangle on the west will be the Palice of Fine Arts, a classic and beauiful structure embodying the spirit of talian Renaissance and facing upon a rreat pool from which its outlines

ill be reflected. The fellowing are the ammoviniale marketing of the buildings; Machin-

vines and Metallurgy, 574x451; Vadanufactures, 552x470; Transportsion, 614.6x574.6; Liberal Arts, 585x 170: Agriculture, large wing, 630.6x 574.6, smaller wing, 423.9x579.6; Education, 394.3x526; Automobile Hall. 172x752; Festival Hall, 380x200 (greatest 280); Horticulture, 630x295; Fine Arts (outside line), 1,100 feet.

Magnificent Illuminations. Throughout the entire exposition he illumination will be such as to oring out the colors of the courts n their proper tones, to sharpen and ntensify the color effects. The ilumination of the colonnades will be accomplished through purple lights: he windows of the exposition palaces will diffuse a golden ray. Giant batperies of colored searchlights will be inchored in the harbor before the site and will play against huge jets of steam and smoke that will be liberatd high in the heavens. Searchlights 500 or 600 yards out in the water and pefore the main axis of the exposition will direct batteries of light over the exposition palaces, going through more than three hundred evolutions n colors.

Of the three main groups the one on the east will be comprised in the concessions or amusement center. which will occupy sixty-five acres, and will be the first of all parts of the exposition to be reached by those who come from the downtown portion of San Francisco. Its entrang will be by way of a great plaza which the concessions district w open out upon Van Ness avenu Through the concessions area will rus a broad avenue which will mark an irregular course east and west, but will describe many right angles. At each turn as you pass along the street of concessions you will find some imposing concessions structure. Every corner will be marked by a great building. The street of concessions will be more than a mile in length. The domes of the buildings will be illuminated at night and startling electrical effects will contribute to the night life of the exposition at the amusement center

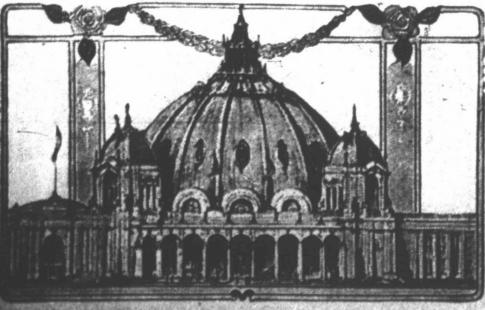

The western group will include the area occupied by the pavilions of the foreign nations, by the building to be erected by the United States government and by the states' buildings. The pavilions of the foreign nations. furthest from the bay, will rise tier apon tier in terraces as they advance, up the gradual slope of the Presidio; military reservation. Nearer at hand and closer to the water will be the buildings of the various states. Each structure in this part of the exposition grounds will be surrounded by ample lawns adorned with shrubs and flowers. In its entirety the western wing will present upon a magnified scale the effect of a superb residence

Great Drill Grounds. Still further to the west of the states and foreign district will be a great drill grounds, capable of accommodating at one time ten thousand troops in drill. Foreign nations will send their crack cavalry and infantry to participate in the maneuvers and trials of skill.

Encircling the drill grounds will be a race track where international speed and harness races will be held One racing association alone has guaranteed a purse of \$25,000 for a twovear-old trotting race.

Marking the extreme western limit of the exposition structures will be the stock pavilions and the buildings devoted to live stock, poultry, dome tic pets and other displays. The gov ernment life saving service display will also be located here.

Applications for exhibit space have been received from all parts of the world. More than eight hundred leading exhibitors have applied for extensive space in the great exhibit halls and many of the exhibits range n value from \$200,000 to \$300,000 The number of applications for con cessions is unprecedented at so advanced a pre-exposition period. Director of Concessions Burt has receiv ed more than two thousand applicawill be exceedingly original and strik ng. Appropriately enough, among the concessions will be a \$250,000 re of the Panama canal. It will take wenty minutes to make the trip. Another will depict the roaring days of torty-nine; the visitor in 1915 will be net at the ferry building by a oath typical of the gold days. ains Fe will expend \$250,000 on a Agrama of the Grand Canyon.
