President Harding wants action on the part of Congress. The republican party stands in need of action. Last fall during the campaign great things for this country were promised by the republicans were they only returned to power. The democrats helped return the republican party to power with a great majority in both houses. Congress has been in session four months. There is no peace with Germany; there is no "association of nations" as promised by the President; there is no tax revision; there has been no revenue measures passed; there has been no aid given the farmer and stockman; there has been no legislation of importance. No wonder President Harding is getting uneasy. While a member of the senate he resented suggestions from the chief executive as to what his body should do and not do. But he is going to be forced to use the whip if he gets action.

General Dawes is to be chief of the budget system. Dawes is a well-known banker and financier. He became famous in a day when he ridiculed the republican "spelling" committee which sought to make capital out of the mistakes in the conduct of the war. General Dawes was an officer in the American army in France and thoroughly understood the limitations imposed upon the Americans while upon foreign soil. He is an enemy of red tape and believes that the shortest distance between two points is a straight line—something unknown and unrecognized in official life. The budget system is the thing for national, state, county, municipal government. Dawes will come as near putting it over as any man. He will have the fight of his life against the extravagance and inefficiency of Washington.

The city officials state that there will be money left after the public square has been paved, and that the paving will be extended on the first street on which the property owners organize and ask for this paving. There should be a demand for this paving from property owners on every street leading to the square. Once the paving is completed around the court house, the citizens on every street will want the paving. The first to ask the city officials for this extension will be the first to get their street paved. There should be a friendly rivalry between residents on every street to procure this additional paving.

Editor J. M. Adams of the Plainview News is making the trip to Mexico with Fort Worth and West Texas business men. He writes interestingly of the trip for his paper. Jess stepped into a restaurant and ordered lemonade. Promptly the waiter brought him a splendid order of ham and eggs. We understand Jess recently applied for a position as Spanish teacher in some Eastern University. This should cinch the job. We are reminded by the incident that a good many fellows who had spent long weary hours studying French before going to France during the war soon discovered that even the French people did not know their own language.

The weeds are flourishing since the rains. Cut them now and help get rid of the flies, mosquitos and other pests.

There is great need for more houses in Canyon. Build a home this year.

Farmers in various sections report agitation among harvest hands for more money. Evidently the men are thinking of the golden days of 1919 and 1920 when \$7 and \$8 per day was to be had only for the asking. It is different now. The farmer who has to pay \$5 or more per day for harvest hands will make more money letting his wheat rot in the fields. The wheat farmer is the most generous of employers, but there is a limit to his ability to pay a big wage. His product will not stand a heavy wage this year.

Admiral Sims took his reprimand like a good fellow. He was sufficiently spanked, and admitted that he needed it. However, the old fellow is used to it, and will probably come back for more.

Samuel Gompers has been re-elected for his 40th term as head of the American Federation of Labor. The more radical element were whipped in their attempt to land Lewis in the chair.

There is great need for a mowing machine to cut the weeds on the streets. There is still greater need of cutting the weeds on many vacant lots in Canyon.

The big international fight comes off Saturday. There are many good Americans secretly hoping that the Frenchman will win.

A little paint will help the looks of your home and greatly beautify the town. Paint is cheaper now. Paint up.

Country Woman's Club

The Country Woman's Club met Thursday, June 16th, with Mrs. F. Bingham as hostess and Mesdames R. O. Allison, O. C. Tarpenning and J. W. Hancock assistant hostesses. A delicious dinner was served at noon and before the guests departed, ice cream and cake were served.

Those present were, Mesdames R. O. Allison, A. E. Burgan, H. J. Kraemer, O. S. Brown, L. G. Cummings, I. C. Tarpenning, J. Truck, E. E. Whitley, A. G. Thomas, W. J. Hancock, and R. D. Moore.

How Much It Costs to Keep a Cow
Some government studies of dairy costs in Vermont may be regarded as fairly typical of the rest of the country.

A cow needs half a ton of concentrates. Nearly two tons of dry roughage. Two and a half tons of silage. Three acres of pasture. Man labor, 123 hours. Horse labor, 24 hours. Other items of cost, taxes, etc \$25.36. Roughly you might figure this feed and pasture at \$75, and the labor at \$45—and thereby you would need to take in about \$150 a year on your cow before you could begin to make a profit.

Of course, the above items will vary in every community, and with every season, but they give you a basis on which to calculate the probable profits—or losses—of your dairy cows, per year.—Farm Life.

Why Not the Producer?

Mr. Kirby, in urging the Ways and Means Committee to place a tariff on hides, pointed out that in 1917-18 hides declined 2 1/2 cents per pound and shoes went up \$1.10 a pair, and that in 1919-20 hides declined 8 cents a pound and shoes went up \$1.45 a pair.

Mr. Kirby might have added quotations from the report of the Federal Trade Commission on profits in shoes during the years 1918 and 1919. It shows that the tanners made an average profit of 13.1 per cent on their investment including borrowed money, in 1918, and 29.8 per cent in 1919. The average profit of manufacturers was 16.2 per cent on their investment in 1918, and 29.8 per cent in 1919. The profit of wholesalers and jobbers was 22 per cent in 1918 and 31 per cent in 1919. And based upon investigation of forty-six typical shoe retailers, the profit at that end was found to be 25 per cent in 1918, and 32 per cent in 1920.

The shoe manufacturer is to be protected under the new tariff law. Why not the producer of hides?—Star-Telegram.

The Kansas Agricultural college at Manhattan owns a huge cow, said to be the largest dairy cow west of the Mississippi. She is nine years old and weighed 2,150 pounds at the time of freshening recently, and she is the mother of the largest two-year-old in the college herd.

Along with her distinction in size, Maid Henry Pontiac holds a very high record for yearly production of milk and butterfat, making 18,377 pounds of milk and 655.6 pounds of butterfat. She recently broke the state record for butterfat by making 31.9 pounds in seven days.—Farm Life.

Keep Your Stock Well
A good lick for hogs, cattle, sheep and horses:
25 pounds of salt.
5 pounds air-slacked lime.
3 pounds of sulphur.
10 pounds wheat bran.
Mix thoroughly and keep before them at all times.

To prevent worms in stock, take four gallons of water, pour over above mixture and stir good while pouring. This lick will keep off disease, prevent bowel trouble, and keep them free of ticks and worms.

The Spirits if Not the Letter
Pittsburgh Chronical-Telegraph: An Englishman signed the pledge after much persuasion on the part of a clergyman, but the minister saw the man's daughter hastening homeward with a pail of beer. He stopped and said, "My dear child, where are you taking that beer?"
"Home to father."
"But surely your father doesn't drink beer after signing the pledge?"
"Oh, no, sir," said the girl. "He doesn't drink it. He only soaks his bread in it."

Steady, light, alert, power to spare, economical of operation. Watch a Fordson Tractor in action and you will wonder how those apparently contradictory qualities of strength, lightness, power and speed could ever be combined in one unit.

The Fordson's speed is available for hauling heavy loads for long distances. Its power is available for dragging plows or disc-harrows through the heaviest soil or for running the cutting-box, grinder or threshing machine.

We take pride in handling such a compact, portable power plant.

We are equipped with every facility for giving quick service for the Fordson.

An Illustration

A few years ago, 12 to be exact, Chas. H. Smith of Iowa, a farmer, then of modest means, purchased two Holstein heifers and a young bull for \$235 and began breeding black and whites.

One afternoon, recently, he stood by the auctioneer's box at the Iowa Guaranty Sale and saw his herd of 21 head sell for an average of \$1,438, a total of \$32,200.

That evening, Charlie Smith, his wife, several of his helpers and a few friends formed a cozy little company around a big table in the dining room of the finest hotel in Waterloo.

It must have been a great hour in Charlie's life.

Emerson said something once, to the effect that men would beat a path through a wood to the door of a man who could build a better mouse-trap or something than his neighbor. We thought of the theme of Emerson's famous saying that night when several senators and publicans, rich men and poor men, weighed their way between tables to reach out for Charlie Smith's hand, paying tribute to what a man could do with \$235 in money and 12 years of time.—The Dairy Farmer.

Know Your Cows

No dairy cow has ever produced her maximum, unless her feeder knew her. Knowing her means more than simply calling her by name and reciting the names of her ancestors. It means understanding her every need, desire and condition. For after all, the dairy cow is an individual, and as such possesses individuality.—Farm Life.

Eliminate Low Producing Cows

The greatest need of dairymen is better cows. The best way to combat the present low prices of dairy products is to get rid of the poor producers and give better attention to the good producers, says the dairy specialist of the Agricultural College.

No doubt there are many cows being used for milk production in this state that will not pay for the feed consumed. If the same thing holds true here as in the recognized dairy sections of the country where cow testing associations have determined the exact production of the various herds, many dairymen would actually make more money if they sold part of their herd and milked fewer cows. They would not only make more money, but they would do it with less work, providing of course, that the cows sold were the poorer ones.

Another advantage of getting the poorer cows out of the herd is the fact that heifer calves which must build up the herd will be from good cows only, and if cows or calves are to be sold those from tested herds where the poor ones have been eliminated, should be worth more money.

The only way to weed out poor producers with certainty is by weighing the milk if possible, testing it for butter fat. If the milk cannot be weighed daily, it will be worth while to weigh it once a week or even once a month and from this data estimate the monthly production. To be of real value, the records should extend over a period of one year because short time records do not take into consideration the great difference in the persistency of different cows.

Along with the selection of cows must go the use of a purebred bull from a good milk producing ancestry and a good individual. The bull is more than half the herd if he is the proper individual when it comes to improving a grade herd.

"I just called, madam, to say—h'm—how sorry I was to hear that you had lost your husband. If—h'm. But we must all tread the same path. M'm. haw. And—h'm, h'm—I was wondering if the house is to let."—The Passing Show.

Your Eyes

When you say, "I saw this" or "I will see that," have you any idea how complex an operation you are describing in a few simple words? Of all the wonders of science none is more wonderful than the human eye or the God given sense of sight.

The finest camera can only take one picture on its plate or film and then the usefulness of that negative is over. The movie camera takes a number of pictures on different parts of a film rapidly revolving behind its lens.

The human eye is a wonderful living camera that is constantly picturing many various objects. It does this with uncanny rapidity and furthermore shows objects in their natural colors. It adapts itself for various distances and moves with infinite swiftness and matchless silence.

Sometimes the eyes fail to function perfectly and then bad vision and eye-strain result. When this happens many people pick up a pair of glasses at random from the ten-cent counter or use a pair that happens to be laying around the house. This is bad judgment, to say the least, and often subjects the wearer of these glasses to much eye-strain and discomfort.

What then should be done? Why if you are sick you should see a Doctor, if your teeth give trouble you should consult a Dentist, so if your eyes are not seeing perfectly you should lose no time in seeking the services of a man or woman who makes a specialty of examining eyes and correcting defects that may exist by perfectly fitted glasses. Such a specialist is known as an Optometrist. In 47 of our states all those who practice Optometry must show a State Board of Examiners, that they are competent to do so, and it is hoped that Texas will soon enact a law that when our citizens need glasses they will be sure to get proper ones.

Methodist Sunday School

Fred H. Ives, Superintendent.
J. D. Gamble, Intermediate Director.
Mrs. C. M. Hunt, Primary Director.
Begins at 9:45 a. m.

The Normal students seem to take a great interest in the Sunday School. Of the three hundred and six in attendance, one hundred and twelve were Normal students. Mr. Vaughn has charge of the division of Mr. Sheffy's class. His attendance was good and we expect it to be better since it has become an organized class.

The Methodist Sunday School will enjoy a fourth of July picnic, Monday, July 4. Mr. Bates has given us the privilege to the use of his pasture. Mr. Ives wishes to invite the people of the town and the students of other Sunday Schools.

A good time awaits everyone who goes. Play grounds will be equipped with swings for the children. There will be speeches, such as patriotic speeches, for the amusement of all. The sun's rays no doubt will be hot but shades and cold drinks will be provided to check the heat and quench the thirst.

Come and bring your lunch to the Methodist church Monday at 2 o'clock. If you have a car and would loan it, your services surely will be appreciated.

Everyone be there with a smile and a cheer; help to make "Old Independence Day" shine for the God of the things as they are.—Reporter.

The Wonders of America

By T. T. MAXEY

THE GALVESTON SEA WALL.

GALVESTON has the finest harbor on the gulf coast and ranks high as a city of delightful homes. Although not a resort, the semitropical climate attracts thousands of tourists annually to her long, gradually sloping beach.

To prevent a recurrence of the terrible flood of 1900, the sea wall—one of the sights of the country—was constructed along the gulf side of the city. This great wall is 22,403 feet long, 17 feet high, 16 feet wide at the bottom and five feet wide on top. It is built of concrete and granite and rests on a foundation of piling. These piles are 40 feet long, not less than 12 inches in diameter at the small end, four rows wide, set four feet apart. The top of the wall is used for a walk.

To prevent water from the gulf flowing behind the wall and flooding the city during severe storms, the grade of a large portion of the city was raised from 2 to 17 feet. This necessitated the raising of about 2,500 buildings and the readjustment of streets, sidewalks, street car tracks, electric lights, water and gas pipes to the new level.

The filling-in material was taken from the bay. The dredges, after pumping their holds full, steamed up a canal behind the wall and discharged their load through pipe lines leading down the various streets. When the work was completed the canal was filled. The magnitude of this undertaking is unparalleled in America.

Wayside Items

Good weather prevailed Sunday. A fair congregation attended services held by Rev. N. H. Smelson in the morning and again at night. He gave them a sermon at Beverly in the afternoon.

Harvest is in full swing, at least the grain is ready. Hands are scarce, and they want more wages than the most of the farmers feel able to pay. Good heavy grain, well filled. Some damage from smut.

Mrs. Annie Heister left Monday for Clarendon, to meet the body of her son, William, from France.

Mr. and Mrs. Van O'Neal made a trip to Tulla Thursday.

Miss Ella Carter has employment at the Wayside store owned by Roy B. Key.

K. Brooks has an appointment to preach at Beverly next Sunday, being the first Sunday in July. Dinner on the ground.

Mr. and Mrs. Sam Reeves visited with her brother Van O'Neal, and wife Thursday, returning to Tulla Saturday to visit her parents, Judge and Mrs. J. H. O'Neal.

Services at Fairview Sunday by Bond and Taylor. Baptizing in the afternoon. Candidates for baptism were Fletcher-Gilham, Ben-Fitzgerald and Robert Bryan.

D. J. Graham and family, W. R. Franklin, wife and children, Mrs. Wm. Payne and Doyle visited with J. S. Sluder and wife Sunday.

Miss Kate Rogers has a very severe case of poison oak, contracted in the canyons.

Miss Emily Brooks who becomes the bride of James Rutherford of Hereford Wednesday, was the honor guest of a lovely miscellaneous shower given Thursday evening by Mrs. Grady Oldham. For the evening the entertaining rooms were effectively decorated with cut flowers and ferns. After a season of informal visiting and greetings which was in order following the advent of bride to be, Miss Brooks was told to unwind the spider web which was suspended over the dining table. The extension of this request brought forth a pleasing collection of dainty tied gifts including silverware, cut glass, and linen, which were displayed by the recipient. An interesting feature of the occasion was the writing of the favorite recipes of the guests in the recipe book which was presented to the bride.

Hold on Tight
When a smoking car with thirty-five passengers jumped the track a railroad engineer in the car, off duty, yelled to the passengers to "hang on tight" and, while the car was turned over, no one was hurt.
"Hang on tight" is good advice in most respects. The man who "hangs on tight" to himself when his temper is upset will get through without hurting himself or others. The man who "hangs on tight" to his place when business upsets come, generally holds down his job. The man who "hangs on tight" when discouragement or even disaster upsets others, is a man to be hopeful about, because he will keep right side up, whatever else turns over.—Honey Grove Citizen.

THE GLORIOUS FOURTH

This is the day for fire-crackers and pink lemonade, a day when the spread-eagle orator covers himself all over with glory by trying to talk in opposition to a brass band, a merry-go-round and a steam calliope.

Great business, this Fourth of July. It is a day of hilarity now, but there was really serious business on July 4, 1776 when our forefathers declared their independence. We have a right to celebrate this great event and to feel proud of our country, the leading nation of the world. Our success is really due to the unlimited natural resources of America and to the industry, sobriety and thrift of our people, and the greatest of these is thrift. The man who saves, not only helps himself but his country as well.

LARGEST SALT DEPOSIT EXTENDS INTO TEXAS

Washington.—The largest deposit of rock salt in the United States and probably in the world, according to the United States Geological Survey, is that extending from Northern Kansas across Western Oklahoma, the Panhandle of Texas, Southeastern New Mexico and Western Texas. The area is not far from 100,000 square miles. The thickness of the deposit is from 300 to 700 feet. On the assumption that the average thickness is but 200 feet, the gross quantity would amount to about 30,000,000,000,000 tons, or sufficient to supply the United States for 1,000,000 years, the survey estimates.

Short Talk on Advertising
By R. T. Porte

The local newspaper must always be the mainstay of any advertising campaign designed to catch the eye of the masses of the people—the buying public. By no other means can so large a proposition of the best trade of the community be reached. The local merchant should not get this idea: "Oh, my dear fellow, I can not pay off my clerk without losing him; I cannot change my location without losing it; I can not suspend my insurance without losing my protection; but Advertising, that is different! Advertising is a faithful dog. I can kick him into the street whenever I feel like it and he wags his tail, comes back when I want to wipe my feet upon him."

This is not true. Advertising is not different. It is a great force in business and many foolish claims are made for it, but it is not greater, not more powerful than any other factor of business. If any good is to come from it it must be kept on the job.

The local merchant should set aside a definite sum to be spent in a year. His expenditure should be based upon a percentage of last year's business and he should spend it systematically. Don't let the question of "copy" frighten you to death; don't let him get the idea that "copy" is the whole thing in advertising. To be sure there is a great difference in the effectiveness of advertisements; but if he will forget all about fine writing or being smart or clever; if he will forget the big sounding, pat phrases which has been used so often that they mean nothing, and sit down and talk to the people of his community, about his store and his stock and his service, he will write a good ad without knowing it.

Is there any good reason in the world why the local people should buy the merchandise he sells. Let him tell them the reason; and tell them again and keep telling them. That's advertising—good advertising. Has he anything in stock that Mrs. Jones or Miss Smith or Hank Brown would be interested in? Let him tell them about it, and tell them about something else next week, and keep on telling them, until they know beyond all doubt that he has just about the "niftiest" stock of merchandise ever brought together.

That's advertising—good advertising. And it will pay. In this neck of the woods.

Five Farms on Manhattan Island

The Outlook: Some of the most valuable and productive real estate in the world is at the lower end of Manhattan Island, but there are still patches of vacant, unused land at the northern end. Of This City as the Representative of the

"Merchants of the Gold Plume"

It is a mark of distinction which is bestowed, upon only one merchant in each town, who in each case must conduct a store which is a credit to his community—such is the rank of the merchant with whom is placed the franchise of

Gold Plume Toasted Coffee

Sooner or later this franchise brings to every Gold Plume merchant the leadership in the coffee business, because the excellence of this blend which is toasted—not roasted—is such that its fame spreads throughout the community and folks WILL have it, once they taste it—even if necessary to change grocers to get it. Please congratulate the above store on securing the franchise of "Gold Plume" Coffee and try a pound can today—Real Coffee—Different—Better.

HOG PRODUCTION DECLINES DESPITE GROWTH OF TEXAS

Hog production in Texas during the last ten years has decreased despite the rapid increase in population, according to the government census report for 1920, which has been received by W. C. Barrickman, secretary of the Texas Industrial Congress. While the population increased approximately 20 per cent from 1910 to 1920, the number of hogs in the state decreased from 2,336,393 in 1910 to 2,323,774 in 1920, a loss of 126,619.

The acreage and production of corn and forage crops has increased since 1910 and hogs to consume these products would result in profit to the farmers, according to Mr. Barrickman, who also pointed out that the export demand for pork is greater than it was in 1910.

Texas now ranks eighth among the States in the Union in hog production, according to the report. Iowa, Illinois, Missouri, Indiana, Nebraska, Ohio and Minnesota are the leaders.

Harvey "Absurdly False"
For fifty years the St. Louis Globe-Democrat has been the great newspaper mouthpiece of western and southwestern Republicanism. And the St. Louis Globe-Democrat administered to Ambassador George Harvey the most scathing rebuke for his London Pilgrim speech that has appeared in any American newspaper. For instance: "It is not true that we went to war to 'save' the United States of America. At the time we entered there are few who believed the United States was in the slightest danger. It was not until over a year after our entry, when Germany's last desperate drives were alarming the world, that possibility of peril to ourselves was recognized. We did not fight to save ourselves, and, having no reason for fear, it is absurdly false to say that we were afraid not to fight. If it had not been for America's condemnation of Germany's purpose and methods, if it had not been for American sympathy for the cause of the allies, if it had not been for the American conviction, growing stronger every day, that civilization and democracy were imperiled, the United States would not have gone into the war, for all its material interests, all its selfish interests were against it. It was growing prodigiously rich from the conflict in Europe. There was in 1917 no serious menace to that accumulation, nor to the continuance of its growth. Yet deliberately we sacrificed all that, and more, far more, loaded ourselves with debts that will burden a generation, and spilled the blood of thousands of our sons."

Jazz Music Doomed, Dealers are Told
Chicago—Jazz music is doomed and dying, J. M. Preaul of New York told the convention of Sheet Music Dealers' Association.
The best sellers today, he said, are the old melodies, stirring military marches and a few new sentimental lyrics.
"Jazz has lost its popularity," he said. "The popularity was only temporary and superficial anyway. It never had a real appeal to the public. It was only fascination. For that reason jazz is doomed and dying."

"To Hell With the Owners"
We are going to move heaven and earth to educate our people that they and they alone are the owners of industry. The workers of Russia have found it out. God bless 'em. If I knew old Sammy Gompers knew as much as that I would tell you to go and do what the workers did in Turino. Ten thousand of them marched to the factories with music and a flag and they opened the door and went to work and said: "To hell with the owners of the factory." Everybody knows it is war. We are going to control the industry.
—Alderman Shiplacoff of New York.

This speech was made at a meeting of the Amalgamated Clothing Workers of America. The New York Evening Mail says few of the amalgamated members read or write English. They are chiefly Russians, Poles and Italians. Sidney Hillman is their president. He is one of the most aggressive radical Socialists in America. The Amalgamated Clothing Workers of America do not affiliate with the American Federation of Labor. They refuse to affiliate with American labor unions. The amalgamated workers call members of the American Federation of Labor "scabs." The Evening Mail says the strikers of the amalgamated posted placards in the city of Boston, "To hell with the United States." And yet there are men in America who are violent opponents of restricted immigration.

City Election
Now, therefore, be it ordered by the City Council of the City of Canyon, at a regular meeting thereof that an election be held on the 9th day of July 1921, at which election the following proposition shall be submitted:
Shall the 40 year bonds of the City of Canyon heretofore, to-wit on the 30th day of October, 1920, voted and issued for street improvements be made to mature and be payable 20 years after their date with option of the city to redeem at any time after 10 years, instead of to mature and be payable 40 years after their date with option of the city to redeem at any time after 20 years from their date?
Said election shall be held at the Court House in the City of Canyon and the following named person is hereby appointed manager of said election, to-wit, A. M. Smith.

Said election shall be held under the provisions of Chapter 1, Title 18, R. S. 1911, and Article 882, R. S. 1911, and the Constitution and Laws of the State of Texas, and only qualified voters who are property tax payers of said city shall be allowed to vote in said election.

All voters who favor the proposition to change the maturity date of said bonds shall have written or printed on their ballots the words "For Twenty Year Bonds" and those opposing shall have written or printed on their ballots the words "Against Twenty-Year Bonds."
The manner of holding said election shall be governed by the laws of the

State regulating general elections.
A copy of this order signed by the Mayor of the City of Canyon and attested by the City Secretary of said city shall be and constitute proper notice of said election.
The Mayor of the City of Canyon is hereby authorized and directed to cause such notice of the election to be posted up at the Court House in the City of Canyon, Randall County, Texas.
The Mayor of the City of Canyon is further directed and empowered to have said notice of said election published in some newspaper of general circulation in said City of Canyon, and which notice shall be published once each week for four consecutive weeks, the date of the first publication being not less than thirty days prior to the date of said election.

J. D. GAMBLE, Mayor,
City of Canyon, Texas.
Attest: PEARL JINKINS,
(Seal) City Secretary.

Baptist Church
 10 a. m. Sunday School, J. A. Hill, Superintendent.
 11 a. m. Preaching. Subject, "The Undertow of the Dance."
 It is the purpose of the pastor at this service to show that Christians in general and Baptists in particular should not dance nor give their sympathy or support to the dance as a public or private social function; that the people of Canyon should discourage dancing; that it is most regrettable that the American Legion of our town has given the dance a prominent place on their program.
 The pastor assures every one who may be interested in the discussion of this vital question that he may attend this service and hear the subject presented in the spirit of Christian love, faithfulness and truthfulness.
