

## BAPTISTS CLOSE MOST SUCCESSFUL ANNUAL ASSEMBLY

### LARGE CROWDS STAYED FOR ENTIRE SESSION

#### Encampment Offered Program of Educational and Recreational Activities.

After enjoying its most successful annual encampment, the Panhandle Baptist Assembly closed this morning, and stake pulling is the main occupation today. The encampment has been characterized by many as having been 100 per cent greater in every way than last year.

Many more people brought camping equipment and remained throughout nine day session. Sunday was a great day for the Assembly, and the attendance, which more than filled the large tabernacle, was estimated as considerably over two thousand. Under the general direction of Manager B. F. Fronabarger and others, the different activities were carried out smoothly. Fair weather added to the enjoyment of the campers.

Plainview sent a big delegation Saturday, and with her hand helped to liven up the encampment. Baptists from every community in this district attended, many of them coming over one hundred miles to the services.

This year's faculty is said to have been the strongest yet reported by any Assembly in the State. Competent instructors in religious training taught large classes, and the study courses formed a very important part of the program. Moreover, the speakers, both preachers and laymen, were the best obtainable. Combined with good-fellowship and cooperative spirit on the part of attending Baptists, an atmosphere was developed which, it is believed will mean much to the denomination.

Plans for the next Assembly are already under way, and more permanent improvements will be added during the coming year.

## Paving Started on the College Campus, to Run to Main Building

Paving has started on the College grounds, using the money that was appropriated in the emergency bill for this purpose.

The paving on the grounds will be eighteen feet wide, with a concrete border instead of the curb and gutter. The exact distance the paving will go is not yet known. It was planned to pave from east of the south drive-ways, with a loop around the building to the power house, but the money available will not go this far, and will probably extend only to the north side of each entrance.

After the paving is completed on the College grounds, the work will be started on the street in front of the building. A large part of the property owners along the street desire very much a thirty foot pavement on the south side of the campus, while some are inclined to only an eighteen foot pavement.

R. A. Terrill is in charge of arrangements regarding the paving in front of the college grounds.

### STORK SPECIAL.

- A son was born to Mr. and Mrs. O. F. Miller on June 30.
- A son was born to Rev. and Mrs. J. H. C. Sieck on July 26.
- A daughter was born to Mr. and Mrs. J. L. Matthews on July 21st.
- A daughter was born to Mr. and Mrs. E. W. Schaeffer on July 27.
- A daughter was born to Mr. and Mrs. J. A. Johnson on July 14th.
- A daughter was born to Mr. and Mrs. Lloyd Rusk on July 15th.

### MISS McLEAN TO TEACH HERE.

Miss Mary McLean of Clarendon will teach history in the normal work at the College next year, taking the position as held by Mrs. T. V. Reeves last year.

Miss McLean has the B. A. degree from Southwestern University, and has done graduate work in Chicago university. She has taught in the Garner, Iowa, high school, and for the past three years in the summer normal session of the College.

The Mexican Government considers dictionaries as advertising matter and levies an import duty on them.

## METHODIST CHURCH WILL BE STARTED NEXT TUESDAY, WITH GROUND BREAKING HELD; APPROPRIATE EXERCISES

The building committee of the Methodist church voted Tuesday afternoon to start operations at once upon the new church building, and plans are being made for fitting ceremonies to witness the breaking of ground for the new church building next Tuesday afternoon. The church will be erected upon lots east of the T. C. Thompson home on East Houston street.

Bids from contractors were opened last Friday afternoon, but the bids were found to be higher than the money available. Changes are being made in the plans to bring the building within the \$60,000 appropriated for the building.

The committee voted to build the church without contracting, using a very competent superintendent to oversee all of the work on the building.

The excavation for the basement is to be started next week, and as soon as this is completed, the concrete for the foundation will be poured.

The building committee has not as yet selected a superintendent for the job.

## New Optimus Press Installed and Prints Several Fine Jobs

The News office resembled more or less a mad house for several days this week with the large crew of men taking down the old Standard press for shipment to Lockney and the erection of the new Optimus.

The new machine was put into operation Tuesday afternoon and produced the first job. Several pieces of work have been put on the new press since its erection, and it works beautifully. W. Frank Dyer of Barnhart Bros. & Spindler, Dallas, is the erector in charge of the job, and will stay with the press until Friday. The things that Frank does not know about a press have not been written, and he is getting the new machine "tuned" up in great shape.

While the News force is inexperienced in the way of handling the new press, we hope to have fully mastered it within a short while.

The News made the assertion that our new press was the finest on the Plains. Mr. Dyer assures us that it is the finest press north and west of Ft. Worth.

After we get the animal eating out of our hands, we will set a day for the people of Randall county to come in and give it the once over.

### HEIZER CAR IN POOL.

The Overland car belonging to Mrs. W. E. Heizer got away when the breaks became loosened at the Wragge Pleasure Park Tuesday evening, and headed for the swimming pool. Three young boys were knocked into the pool, but not seriously injured. The car caught after the front wheel had gone into the pool.

### EXAMINATIONS MONDAY.

The state examination for teachers certificates will begin next Monday. More than two hundred who have been taking the summer normal work in the College will take these examinations and most of them will leave for their homes after the examinations close.

### TRUCKS MAKE FIRE CALL.

The fire department made record time Saturday at 11:40 when an alarm was put in from the house owned by J. E. Prichard, just east of the Baptist church. An oil stove had exploded, but did little damage.

Both of the two fire trucks were in use a few minutes after the alarm was sounded.

### COTTON HAD 32 SQUARES.

J. A. Cheatham stated Monday that he had counted stalks of cotton at his place which had 32 squares to the stalk.

This is considered by cotton growers as few fine for cotton on the Plains.

### BRINGING FATHER HOME.

Wallace R. Clark is bringing his father, T. M. Clark, home with him from Corpus Christi, where Mr. Clark was taken ill last week.

The Commoner, a weekly publication printed in Lincoln, Nebraska, by William Jennings Bryan, has been discontinued. The publication was 20 years old.

## DISTRICT COURT TO OPEN FALL SESSION MONDAY

### PAYNE CASE COMES SECOND WEEK FOR THE TERM.

#### Petit Jurors Called for the Second and Third Weeks of the Term—Grand Jury Starts Next Saturday.

The fall term of the District Court will be opened next Monday, with Judge Henry S. Bishop presiding. The term comes early this fall owing to the change in the law, which places Donley county in a district separate and apart from Randall, Armstrong and Potter counties.

Mrs. Ethel Woods, district clerk, states that few new cases have been filed for suit for the present term of court. Indications are that the civil business will be very light during the term.

The grand jury will be set to work the first thing Monday and with District Attorney Lloyd Fletcher will begin investigation law violations in the county.

The following jurors have been selected for the second and third weeks of the court.

- The following are the Petit Jurors the second week of District Court:
- |                   |                   |
|-------------------|-------------------|
| J. W. Dison       | A. R. Eastwood    |
| Henry F. Miller   | Homer Ball        |
| W. N. Crestsinger | B. F. Oatis       |
| W. H. Carr        | J. H. Madson      |
| C. W. Cox         | S. J. Burris      |
| W. W. Claunch     | C. E. Castleberry |
| C. V. Buchanan    | Wilford Taylor    |
| D. I. Dietrich    | T. H. Druham      |
| Iabon C. Campbell | J. W. Bourn       |
| T. J. Cochran     | A. A. Gregg       |
| R. B. Gist        | Albert Baird      |
| J. S. Bailey      | H. B. Hale        |
| W. B. Campbell    | B. F. Machen      |
| Wm. Laxon         | T. T. Burks       |
| B. C. Taylor      | Cass Jennings     |
| Jay S. Daniel     | J. A. Cheatham    |
| H. Betherum       | W. S. Cobb        |
| H. T. Gill        |                   |

The following are the Petit Jurors the third week of District Court:

- |                    |                  |
|--------------------|------------------|
| E. H. Albers       | Sanford Black    |
| C. J. Anderson     | C. A. Brundridge |
| W. P. Bishop       | G. B. Bourland   |
| J. E. Dickinson    | O. N. Gamble     |
| Arthur Cross       | S. F. Foster     |
| Grant Bellas       | B. T. Johnson    |
| John G. Batenhorst | F. E. Culp       |
| W. D. Boland       | J. B. Gamble     |
| L. H. Crawford     | J. M. Davis      |
| J. H. Craig        | J. R. Hileman    |
| J. B. Fox          | J. T. Coffee     |
| Henry Burtz        | R. A. Bellah     |
| B. F. Bennett      | H. C. Dolcater   |
| W. L. Browning     | W. A. Jennings   |
| J. D. Dybe         | O. A. May        |
| E. J. Bauer        | A. M. Olson      |
| H. R. Fulton       |                  |

## Large Shipments of Grain Shipped from Umbarger and Canyon

Anton Beckman was in the News office Monday and stated that the new farmers elevator at Umbarger would be ready for operation today.

Mr. Beckman stated that the Wheat Growers Association had shipped out from Umbarger 24 cars of wheat, 10 cars of barley and oats.

Mr. Beckman is strong for the Wheat Growers Association, and believes that it is the only way the farmers will be able to get a decent price for their grains.

Grain shipments are going out from Canyon regular every day. Grain is coming in from all over the county.

The grain market seems to be strengthening during the past week, barley having advanced several points.

### COLLEGE POSTERS OUT.

The News has printed illustrated posters for the College, advertising the opening of the regular session on September 25. These posters are being distributed to all parts of the Panhandle, and being sent to all superintendents in the state.

### DAVIS BABY DIES

The three months old baby of Mr. and Mrs. Bill Davis died Tuesday afternoon and was buried at Dreamland cemetery yesterday afternoon.

## Jarrett Granted Leave of Absence to Study; Fronabarger to Teach

R. P. Jarrett, head of the education department of the College, has been granted a leave of absence for the coming year and will accept Fellowship at Peabody to work on his Ph. D. degree.

Ford Fronabarger will take Mr. Jarrett's work in the Education department during the coming year. Mr. Fronabarger has been in the English department during the past year, and had intended studying during the coming year. He took his Masters degree in the Texas University with Education as major and English as minor.

## Company F Returns from Profitable Camp Held at Camp Mabry

Company F returned Sunday from the two weeks camp held at Camp Mabry, near Austin.

All of the boys say they enjoyed the camp very much and had a pleasant time.

Captain H. C. Gamble had one of the largest companies in the encampment at Camp Mabry.

### TWO LIGHT RAINS FALL.

Two light rains have fallen during this week, but not of sufficient moisture to be of great value to the row crops.

A rain of .29 of an inch fell Sunday morning, and one of .23 fell Sunday night.

Unfortunately the territory covers by the rains was not large.

### MARRIAGE LICENSES.

Marriage licenses were issued by County Clerk Mrs. Ethel Woods to Merle Kistler and Miss Everle Fuqua on July 21st.

## TECH LOCATING COMMITTEE WILL VISIT CANYON FOR SHORT WHILE FRIDAY AND INSPECT TEACHERS COLLEGE

The locating committee for the new Tech College will visit Canyon Friday afternoon and will inspect the plant of the West Texas State Teachers College before going on to Amarillo.

The locating committee will finish its inspection of the site offered by Tulla at about 2:30 o'clock. A committee from Canyon will take charge of the committee and bring the members in cars to this city where they will be taken for a short drive over the city, and then taken to the College for rest.

President J. A. Hill stated yesterday that the members of the committee desired no special entertainment from Canyon and the College, as this city was not an applicant for the new school. Several of these educators have never seen the plant of the College, and desired to stop off for a short while to see the College that had produced three Teachers-College Presidents from the original faculty which opened the school in 1910.

Mr. Hill and the Commercial League officials wish six or seven good cars to make the trip to Tulla. There are several newspaper men traveling with the locating committee, and the party numbers about twelve. Cars going to Tulla should be prepared to carry back one or two of the visiting committee men and the newspaper men. The Canyon delegation will leave here about one o'clock, and will be back to the city by four or four thirty o'clock. The locating committee wishes an hour for rest, and a plunge in the swimming pool before the inspection of the College plant.

The guests will be entertained at Cousins Hall for supper and at 6:30 the Amarillo delegation will arrive to take the party to that city.

Those who will take cars to Tulla will please confer with R. A. Terrill or W. A. Warren.

The members of the locating board are S. M. N. Marrs, State Superintendent of Public Instruction; S. B. Cowell, chairman of the Board of Control; Dr. W. B. Bizzell, president of the A & M. College; Dr. F. M. Bralley, president of C. I. A.; Dr. W. S. Sutton, acting president of the State University.

Messrs. Marrs and Sutton are the only members of the board who have visited the College.

## "SCENES FROM THE UNION DEPOT TO BE PRESENTED SATURDAY NIGHT AT COLLEGE AUDITORIUM—LOCAL CAST

## Students Named to Membership of Texas Scholarship Societies

Announcement was made Monday of students eligible to membership in the Lloyd Green Allen Chapter of the Texas Scholarship Societies as follows:

- Permanent—Harpen Allen, Mrs. J. J. Powell, Miss Ada Clark of Plainview, Miss Annie Woods of Cisco, Mr. Allen completed the work on his degree in June and his membership was announced at that time. The others take their degrees at the close of the summer session.
- Temporary, senior—Chas. Wilson of Lockney.
- Temporary, juniors—Miss Zelma Red of Lamesa, Jim Webb of Canyon, Miss Myrtle Miller of Lockney, Miss Harriett Kritzer of Amarillo, Jeff D. Smith of Anson, Miss Florence Barrier of Vega, Mrs. Allie Merle Dunaway of Canyon.

Those holding temporary membership will obtain permanent membership upon the completion of their senior work if they maintain their present standard.

### BAND CONCERT ENJOYED.

A very large crowd enjoyed the band concert Saturday night on the public square.

The College band, under the direction of C. E. Strain, is one of the best musical organizations in West Texas, and the concerts are very greatly enjoyed.

Mrs. J. S. Harrison and son, Frank, have returned from a month's visit with relatives in Tennessee.

## Valuable Contributions Made to Historical Society at the College

The Panhandle-Plains Historical Society has received valuable contributions during the past week.

The Morgan Historical Collection comes from Miss Lucile Morgan of Belton. It is a very large collection of arrow heads, guns and a fine assortment of the Republic of Texas money.

A detailed history of each article in the collection comes with the collection.

Bruce Gerdis of Tulla has presented by far the best single collection up to this time. It is composed of guns, Indian hunting and scalping knives, Indian lances and tomahawks, an old Spanish Toledo sword and other Indian relics.

The present need of the Society is adequate room in which to display the interesting collection that is being made.

### CHARTER GRANTED SOCIETY.

A charter was granted the Panhandle Plains Historical Society by the secretary of state last Wednesday. The society is without capital, and does not operate for profit. Those applying for the charter were President J. A. Hill of the College, Miss Hattie M. Anderson, Secretary of the Society, and Thos. F. Turner, President of the Society.

### INSTITUTE PROGRAMS OUT.

The New has printed 2000 program of the Consolidated teachers institute which will be held of twenty-two counties at the College the first week in September.

Prof. R. P. Jarrett is conductor of the institute and has arranged a very interesting program for the occasion.

Sherwood Forest, the haunt of Robin Hood, is to be destroyed to supply coal. It is estimated 10,000,000 tons a year can be mined in the historical region of Nottingham County. Edwinstown Hall, the ancient mission, is to be turned into an educational center for the miners. This historic forest is owned by lords who are poor and harassed by the income tax.

"Scenes in the Union Depot," a humorous entertainment, will be given at the College auditorium, Saturday night at 8:30 o'clock. The play is given under the auspices of the Ex-Students Association, and the committee in charge promises this to be one of the best and most popular programs that has ever been presented here.

The play is a farce comedy in one scene, and its nature is just what its title suggests: "Scenes in a Union Station."

Prominent students, faculty members, and business men make up the cast of more than forty characters. Tickets at 25 and 50 cents are on sale now. The proceeds from the entertainment will be used for the benefit of the Mary E. Hudspeth Hall.

The cast of characters is given below:

- |                        |                        |
|------------------------|------------------------|
| Train Master           | C. A. Peirle           |
| Ticket Agent           | Gilbert Tyler          |
| Clerk at lunch stand   | Irby Carruth           |
| Bootblack              | J. L. Duffot           |
| Mrs. Brown             | Mary White             |
| Mrs. Brown's young son |                        |
|                        | Grady Hazlewood        |
| Mrs. Snyder            | Ruth Lowes             |
| Miranda Snyder         | Mattie Lee Boyd        |
| Uncle John             | S. B. Orton            |
| Mrs. Larkin            | Mrs. Clyde McElroy     |
| Miss Sophia Piper      | Mrs. J. A. Hill        |
| Mr. Jones              | B. F. Fronabarger, Jr. |
| Josiah Potter          | Grady Hazlewood        |
| Nancy Potter           | Mary Ethel Adams       |
| Mr. Armstrong          | Hubert Hamill          |
| The Armstrong children |                        |
| Harold Shanklin        | William Flesher        |
| Vida Savage            | Martha Nell Lang       |
| Ruth Gamble            |                        |

## Large Number of Girls Coming to Camp on the Ceta Canyons

A large number of girls from all over the Northwest Texas Conference of the Methodist Church are coming to the annual encampment being held at the Walter Cobb place southeast of the city. More than 75 girls had come to the camp before it opened yesterday.

Mrs. Tom C. Delaney of Memphis is in charge of the camp, and has a very complete program arranged for the girls during the camp. The day program is filled with study, inspirational talks, recreation and music.

Next Monday is Canyon day at the camp, and a large delegation from this city will go out. The Methodist orchestra will furnish music for the evening's program.

### FEDERATION MEETING.

There will be a call meeting of the City Federation of Women's Clubs at the court house Thursday afternoon at 4:30, August 9. This meeting is for the purpose of hearing the reports of all committees appointed by the president and for transacting any other business which may come before the body. A full attendance is desired as some important business will come up. The mayor of the city will tell us some of his plans for building a better city. Reporter.

### NEED CAMPING GROUND.

A bunch of tourists were heard discussing Canyon Tuesday, and stated that it was a pretty town, but certainly needed a tourists camping ground to care for the many tourists.

Help Keep Canyon Clean!

THE AMERICAN PRESS ASSOCIATION

Radical writers predict a revolution in America one of these fair days. Not by a long shot. The farmers are looked to to start this revolution on account of present prices. The farm products. The farmers have a genuine kick coming on account of the absurd proportion between the prices of the stuff they have to sell and the stuff they have to buy. But the farmers are not going to start a revolution. They are not red to start with and are too sensible and patriotic to start such a thing as a revolution. But they going to kick out of office some of the politicians who have been propping so much and producing nothing.

The locating committee for the new Tech College is on a tour of inspection of thirty-seven towns, and it is probably the hardest trip any bunch of Texans were ever called upon to make. Lavish entertainment has been prepared by each of the thirty-seven towns, and at each town every member of the board is supposed to be at his best and in picnic eating capacity. When these men get through with this trip, they will fervently hope to never be called upon to make such a hard trip again.

Governor Walton of Oklahoma has removed Wilson from the presidency of the Oklahoma A. & M. after a very stormy two month's in office. The trouble with Walton is that he knows nothing of education and educational needs, and his puppet president knew less. Oklahoma is in a deplorable condition with its present Governor running rampant upon his bolshevistic ideas of government, or rather lack of government. The people of Oklahoma will awaken one of these days to the type of men they have elected to office.

There are thirty-seven towns in West Texas cleaner today than they have ever been before, and cleaner than they will probably be in many a day hence. These thirty-seven towns are those applicants for the location of the Tech College. It would be a fine thing to get some kind of a locating committee to visit every town in the land about this time of the year in order to get the weeds cut.

Hiram Johnson is not certain about becoming a candidate for the presidency upon the third party ticket. The Honorable Hiram had some experience once upon a time on a third party ticket, and knows the results.

The wheat yield of the county is a distinct surprise, and a very grateful one. A fair wheat crop is better than none at all—and it looked for a long while that none would be raised this year.

Another good general rain will insure a bumper row crop in Randall county and on the Plains generally.

**CHOOSING A COLLEGE**

Why did you come to this college? is the question that was put lately to the students of Tufts. The replies were of course various but probably did not include all the reasons that young men might honestly assign for the important decision. Undoubtedly a certain number of the students in Harvard or Yale or Princeton would, if they told the truth, admit that what may be generalized as social rather than educational motives controlled their choice.

A large number of those who replied to the Tufts questionnaire reported that they had chosen that college on account of its standing as an educational institution—a good reason, one of the best. Others went there because their fathers or other relatives had been graduated there, or because their school friends were already there. Some admitted that the athletic repute of the college attracted them. The nearness of their homes to the college, an economical reason, decided others. No doubt those and other motives more or less weighty account for the

student bodies of our now crowded colleges and will continue to explain them hereafter. But they are not all good reasons. We can admire the movement that transformed Dartmouth from a little country college to the populous institution of today, for a host of young men were drawn to Hanover by the personality of a great man, President Tucker. On the other hand, whoever chooses a college because it has a great and renowned for winning football matches will never confer on his alma mater any but muscular honor. No one can blame a young man for wishing to follow his father; and no one can quarrel with those whom necessity compels to choose an institution that, because it is near or inexpensive, is the best that they can afford.

Unless there is some overwhelming reason for a young man to choose a particular college, the only important question for him to answer is: Where can I get the best training for the vocation to which my tastes and talents lead me? It is because so many young fellows who have freedom of choice allow minor considerations to govern their decision that we hear it said that too many men go to college. It is for that reason too that so many employers are contemptuous of college men. Colleges and universities are not much given nowadays to specialization; but there is still room for choice. There are still colleges where a man may acquire something like the education that used to be regarded as the best preparation for a learned profession; and no one who aspires to an engineering career should go to any so-called college, for the best instruction for that career is to be had in the technical schools, and a degree from one of them is an open sesame to a good position.

The only rule that is of any use is: Go where you are most likely to get the kind of education you want.—Youth's Companion.

**WHAT A PAGE AD COSTS**

The price of a page ad for one insertion is as follows for the periodicals listed below:  
 Good Housekeeping .....\$2.500  
 Woman's Home Companion..... 6.300  
 Delineator ..... 8.000  
 People's Popular Monthly..... 2.000  
 Saturday Evening Post ..... 7.000  
 Literary Digest ..... 4.000  
 McCall's Magazine ..... 6.000  
 Colliers ..... 3.000  
 Randall County News ..... 30  
 Dollar for dollar that little thirty dollars is more effective than any money going into the big amounts listed above—in so far as local results are concerned.

**A GRACIOUS ACT**

The Panhandle Historical Society came into possession of the first piece of real estate on the occasion of the celebration recently held at Adobe Walls, when Mr. and Mrs. W. T. Coble deeded the site of the battle to that organization.

The old battle ground is a part of the Turkey Track Ranch, the property of Mr. and Mrs. Coble, and since the Historical Society has interested itself in marking and preserving the ruins there, it was a gracious act to convey the property to them. The tract covers five acres.

Next year will be the 50th anniversary of the Adobe Walls fight and the Historical Society is planning a big celebration to be held there. Funds are being raised with which to erect a monument in memory of the heroes who lost their lives in that memorable battle and an elaborate program will mark the dedication.

Old-timers will be especially interested in this, the Panhandle's only real battleground, and it is expected that many stories of pioneer days will be brought to light on the coming anniversary.

The ambition of the Panhandle Historical Society to preserve for the children of this section, the memory of that early struggle is a worthy one. It will be well for posterity to be reminded sometimes of the sacrifices that were made by the pioneers in or-

der that the future generations might enjoy the possession of this wonderful land. It will be a heritage of which they may well be proud.—Southwest Plainsman.

**RARE SPECIMEN**

I know a man who never drinks, Nor smokes, nor chews, nor swears; Who never gambles, never flirts, And shuns all sinful snares. He's Paralyzed, — I know a man who never does Anything that is not right. His wife can tell just where he is At morning, noon and night. He's dead.—Exchange.

Major Henry H. Curran has been appointed Immigration Commissioner at Ellis Island to succeed Robert E. Tod, who has resigned. Major Curran is forty-five years old and a graduate of Yale University and of the New York Law School. At one time he was a reporter on the New York Tribune. Major Curran was with the A. E. F. and in 1919 he was chosen by the Republicans to run for borough president of Manhattan. He was elected, the first man ever put in that office on a straight G. O. P. ticket. He is a writer and lecturer on politics.

"Candidate is, originally, a Latin word which means "white." With the ancient Romans, at election time, those who were running for office wore a "togas candida" a white mantle, emblem of the purity of their political intentions. A herald announced to the voters gathered in the forum: "taures agitur" (your interests are to be attended to); and then the tribunes took each candidate by the hand and led him around, presenting him to the crowd.

Japan has retired 850 officers, including seven generals, since August, 1922. The Japanese Government has announced that it will shortly discharge from the service 1,371 additional officers, including four generals, seventeen lieutenant-generals, and thirty-three major-generals. Many retired officers have entered the Department of Economics of the Imperial University to qualify for civilian occupations.

In Spanish cities at eleven o'clock at night the doors of all rooming houses are closed and locked. After that hour one can get in only by calling the guard or watchman of his particular block. This is an old Spanish custom which holds over to the present day in nearly all the cities of Spain. The watchman carries a lantern and the keys of all the houses under his charge.

When you feel lazy, out of sorts and yawn a good deal in the day time, you need Herbine to stimulate your liver, tone up your stomach and purify your bowels. Price, 60c. Sold by City Pharmacy. 1875

Purity in the Ice you use in your home is a most important consideration.

So many times you want to place food in direct contact with Ice, or you would like to put Ice into Summer Drinks.

You may do so with Ice, or you supply the Ice.

**OTHERS HAVE WEEDS**

Dalhart Texan: "Just look at this town. It looks like a weed patch." Thus spoke a tourist last week to a travelling companion. The conversation was overheard by a Dalhartan.

Pity it is that the old town doesn't put on a better appearance at a time when from two to four hundred tourists are passing through daily. Blades and knives and hoes don't cost much, and an hour or two daily would give marvelous results. Boys are plentiful and idle; hoboes are being fed daily; some husbands don't have much to do. There's joy-riding in abundance, while the evening shadows are lengthening, and while the weeds are still growing and spreading.

A professional ball player and manager of baseball teams has in a few words pointed out a fundamental distinction between the educated and the uneducated mind. "The college boy," he says, "or anyone with even a partly trained mind, tries to find out his faults and correct them. The un-schooled fellow usually tries to hide his." It is clear enough which of the two will go faster and farther.

701 POLK STREET AMARILLO, TEXAS

### Traveling Men Drive to Canadian In Burning Coupe

Canadian Record: Canadian was treated to an unusual sight yesterday afternoon at about five o'clock when a Dodge coupe came tearing into town on fire and with two occupants. The car halted at the Tubb garage where a stream of water was turned on it and the fire extinguished. The top of the car was destroyed but the body of the car was not damaged much.

The driver of the car was Frank Clowe of the firm of Clow and Cowan of Amarillo, wholesale plumbing material dealers, and his companion was W. G. Hamilton of Kansas City, factory representative of the general offices of Cleveland, Ohio, who supply Clowe and Cowan for distribution in this territory.

From what the gentlemen suspect, the fire started in the waste under the seat. When first they noticed the odor of burning material, they stopped the car to see if a tire or brakeband was hot, and as they lifted the cover to the rear compartment the fire blazed out. They undertook to smother it with dirt but without much success. Being on the hill on the highway a few miles south of Canadian, and seeing no help nor water close decided to make a race against the fire for town. So they threw the car into high and hit the high places with the blaze trailing behind them. The fire provided rather a warm seat for them on a summer day and ran up into the top, taking the covering from over their heads.

When they reached town the back and top were entirely gone, and the travelers could not exactly boast of an immaculate appearance, their clothes being badly burned and their suit cases almost destroyed, including necessary wardrobe for night wear. Their pants legs had been burned to their knees, and they gave the Record reporter to understand that they were not at home until they secured additional garments.

The body of the car was not damaged. It was a new Dodge, having been out only three months and driven only a little over ten thousand miles. Messrs. Clowe and Hamilton left this morning in the damaged car for Amarillo.

Thomas A. Edison says, "There is something wrong with the college system. I don't know what the trouble is; that's not in my line. I can only judge by the results. But one thing is certain: the present system of education in the colleges does not train men to think. I am in favor of the college. That is where I get some of my best men. I have 60 of them now, but they are 60 culled out of 2,000. That's a pretty low percentage, isn't it?"

The Spingarn Medal, which is given annually for the most distinguished achievement by a Negro, has been awarded to Dr. George Washington Carver, of Tuskegee Institute. Dr. Carver developed 165 by-products of the peanut and 115 of the sweet potato. The medal was awarded to Dr. Carver "in consideration of his services in agricultural chemistry, his recent recognition by a British royal society and for lectures on agriculture during the last year before white and Negro audiences, particularly in the South, where his clear thought and straightforward attitude have greatly increased interracial knowledge and respect."

Fisheries experts and scientists have been unable to ascertain accurately how sponges feed. An ordinary sponge will grow from one to one and one-half inches or more a year. The portion of the sponge with which we are familiar is the skeleton or framework of the sea product as it exists in the briny deep. The slimy, gelatinous substance is decomposed by wind, weather and sunshine and subsequent soaking in sea-water cures out any gelatinous material which still adheres to the sponges.

Bari, a seaport and important commercial town in Apulia, Italy, has a church dedicated to the memory of St. Nicholas (the American Santa Claus). The church was founded in 1087 to receive the relics of the saint, which were brought from Smyrna in Lycia, where he was a bishop, and which now lie beneath the altar in the crypt. It was at Bari that Peter the Hermit, in 1095, preached his first crusade.

Persons may eat toadstools and yet live, thanks to a medical discovery now being perfected in France. A horse was immunized by successive injections of poisonous mushrooms. The serum made from the animal was tried successfully on mice and rabbits who had been fed the deadly amanita mushroom.

An aching tooth in action is the latest subject for the movies in France. It is a film used in a crusade to improve the teeth of the people. During the war, seventy-five per cent of the men examined were dentally unfit. The film pictures a throbbing nerve in its most excruciating stages, and those who saw the picture attest to its vivid accuracy.

Charles Darwin always knocked off his day's work at noon. If that was part of the Darwin theory, we're for it.—New Orleans Times-Picayune.

Indications are that England slowly will approach aridity as more Americans get seats in the House of Commons.—Birmingham News.

All bathing suit designers must be from Missouri.—St. Joseph (Mo.) Gazette.

An instrument which automatically and accurately records the passage of any vessel over a given body of water, night or day, to observers who may be located on shore, has been invented by an Austrian. It consists of a small searchlight sending a ray no larger than a pencil across the space, to be controlled, and a receiving apparatus at the other end containing a light-sensitive selenium cell. A passing vessel interrupts the rays of a searchlight, the selenium cell closes a relay which starts a bell alarm, or operates a recording device. It will prove an aid in catching smugglers.

Monsieur Barbot, a French aviator, came to this country to demonstrate a remarkable machine which half flew and half glided its way across the country at an incredibly low expense. In one trip of seventy-five miles was made on a gallon and a half of gasoline. Meeting with a mishap, the machine was forced to the ground outside Philadelphia. It was slightly damaged and left in the custody of onlookers. Souvenir hunters tore the plane to shreds in search of souvenirs and Monsieur Barbot was forced to return to France without his machine.

With only about one-half of one per cent of the world's population, Canada produces ninety per cent of its cobalt, eighty-eight per cent of its asbestos, eighty-five per cent of its nickel, thirty-two per cent of its pulpwood, twenty per cent of its lumber and twenty per cent of its cured fish.

Profiteers in Bulgaria will be subject to public beatings with lashes, confiscation of their property and permanent disbarment from business under the terms of a bill to be submitted to the national assembly. Decision of what constitutes profiteering or illegitimate speculation is to be placed in the hands of the communal councils under the measure.

A new powder for use in small arms and artillery has been invented. It has all the driving power of the type now used and is smokeless, flashless and impervious to moisture.

President Harding says that the United States should help Europe with the Golden Rule. Europe, however, seems willing to rule itself if we will only furnish the gold.—Nashville Southern Lumberman.

Help Get Canyon Clean!

For many years the Chicago, Burlington and Quincy Railroad has systematically followed the crop conditions in the territory served by its lines. The records prove that a poor crop season occurs every seventh year. While there has not been an absolute failure every seven years, taking the five states of Illinois, Iowa, Missouri, Kansas and Nebraska together, there has been a marked reduction in the yield. Bible readers know that the Mosaic law decreed a rest of the soil every seven years.

Siberia has its bootleggers and illicit stills. Of 1,120,000,000 pounds of corn harvested in the Government of Omsk last year, 180,000,000 pounds were used for illegal distilling. Within a month 900 stills were confiscated and more than a thousand persons were arrested for illicit traffic in liquor.

The hollow-nosed "dumdum" bullets got their name from the place where they were manufactured. Dumdum is a town in British India, in the division of Bengal. It was the headquarters of the Bengal artillery in the early eighties. At The Hague conference the use of the bullets was forbidden by international agreement.

Alien appeasers seem to regard America as the land of the free and the home of the brave.—Washington Post.

When you feel dull, aching and sleepy and want to stretch frequently, you are ripe for an attack of malaria. Take Herbine at once. It cures malaria and chills and puts the system in order. Price, 60c. Sold by City Pharmacy. 1815

The unpleasant things about your job are what make the job worth paying for.

A slogan of the Zionist movement is: "Lead the people without a country to a country without a people."

**Child-birth**

Here is a wonderful message to all expectant mothers!

When the Little One arrives, you can have that moment more free from suffering than you have perhaps imagined. An eminent physician, expert in this science, has shown the way. It was he who first produced the great remedy, "Mother's Friend." Mrs. C. J. Hartman, Scranton, Pa., says: "With my first two children I had a doctor and a nurse and then they had to use instruments, but with my last two children I used Mother's Friend and had only a nurse; we had no time to get a doctor because I wasn't very sick—only about ten or fifteen minutes." Use "Mother's Friend" as our mothers and grandmothers did. Don't wait, start today, and meanwhile write to Bradford Baginley Co., Bk 46, Atlanta, Ga., for a free illustrated book containing information every expectant mother should have. "Mother's Friend" is sold by all drug stores—everywhere.

**LOCAL NEWS**

The labor shortage has become so acute that you seldom see more than a dozen idle men watching a sign painter.—Trinidad Picketwire.

**BUILDING NEW STORE.**

The Green Bros. Company of Amarillo is announcing in this issue of the News a big removal sale for their entire stock of furniture, preparatory to moving to their new building. C. R. McAfee is manager of the Green Bros. Co. He lived in Canyon until a few years ago when he moved to Amarillo to take charge of this big business.

Although Green Bros. have been in business for more than sixteen years, this is the first sale the firm has ever put on. This is an unusual record for a big concern like this store, for most furniture stores have sales often. Green Bros. frankly state that they do not believe in sales, and would not put this one on, except for the fact that they are building at the corner of Sixth and Taylor street, a new four story building, and expect to occupy it about September 25th. Announcement of the Removal Sale is found on the last page of this issue of the News.

During the first week of each New Year one can see in the older parts of the Japanese cities groups of men and

By stopping all the little leaks and women in a praying attitude, waiting for the rising of the New Year's sun. This religious ceremony is called the Hatsu-Hinode.

# 1,766,118 ARE SOVIET VICTIMS

Astounding Statistics Showing Executions in Russia Since November 7, 1917.

## FARMERS AT HEAD OF LIST

Practically Half Total Number Executed Were Farmers—Stories of Religious Persecutions Borne Out—Murder 28 Bishops.

Washington, D. C.—Washington officials and members of the diplomatic corps are astounded at statistics received here tending to show that 1,766,118 persons were executed in Russia by the soviet government since it came into power on November 7, 1917, to the end of 1921.

This total is given in what are claimed to be official statistics which have been received here by the diplomatic representatives of a European country which is generally regarded as not unfriendly to the existing Russian government.

### Farmers Lead List.

According to these statistics the persons executed were classified by the soviet authorities as follows:

Farmers, 815,000; intellectuals, 355,294; soldiers, 290,000; laborers, 192,500; officers, 54,650; gendarmes, 48,500; property owners, 12,950; police officers, 10,500; physicians, 8,800; professors and teachers, 6,775; priests, 1,215; bishops, 28.

The statistics did not indicate, it is said, whether the former Czar Nicholas and his family were included in the fateful list.

Some diplomats and officials said that while it is impossible either to confirm or refute it officially there was much information to support an assumption that the startling record of execution and wholesale assassination was approximately correct.

### May Explain Famine.

The fact that practically half of the total number of persons executed were farmers had occasioned some surprise, and is interpreted by certain officials as indicating that the conditions among the Russian peasantry have been much worse than commonly believed, and as explaining to some degree the shortage of foodstuffs in Russia.

Stories of religious persecutions in Russia seem to be borne out by the execution of 28 bishops and 1,215 priests, and unofficial reports received by the diplomat furnishing the statistics are to the effect that more church officials have been executed by soviet authorities this year than in any preceding year.

## MAY RUN OR RUIN THE WORLD

Scientist Explains the Force That Might Result From the Liberation of an Atom.

London.—By liberation of the atom man may some day control a force which will perform the entire work of the world, but if it gets beyond his control it may blow the earth and all its inhabitants to pieces, Doctor Ashton of Cambridge declared in a lecture before the British association. The chances of such a catastrophe are practically negligible, he explained.

Professor Rutherford succeeded in arranging a collision between the central portions of two atoms. The result was the transmutation of the atoms into entirely different forms of matter.

The possibility of such transmutation on any scale is of enormous importance. If the amount of hydrogen which goes to constitute a tablespoonful of water were transmuted into helium, the energy liberated would be 200,000 kilowatt hours—one-seventh of the total amount of electricity used in London in a day for lighting and power purposes.

The possibility has been discussed, that this energy, when first liberated, would be out of human control. In that case, if all the hydrogen on earth were detonated into space, the successful experiment would be published throughout the entire universe as the birth of a new star. The probability of this catastrophe is practically negligible.

## FALLS 8 FLOORS; IS UNHURT

Plunges Over Edge of Roof of New Building into Alley Below.

Detroit.—John Hancock, eighteen years old, of 510 Abbott street, pushing a wheelbarrow into a hoist shaft on the roof of the eight-story building at Third and Baltimore avenues, sought to save himself by letting the wheelbarrow hurtle down the shaft, but was dragged forward, and plunged over the edge of the roof and into the alley below.

The wheelbarrow at the bottom of the shaft was a total wreck, but after the surgeons had looked John all over very carefully, they could not find anything wrong with him.

Prickly Pears for Sheep. Johannesburg, S. A.—Experiments on the government agricultural farm at Groontfontein proved that a sheep can exist for 280 days solely on a diet of prickly pears and, if a little lucerne plant is added, for 500 days without a drip of water. That beats the camel

## Deeds Filed This Week Transferring Randall County Land

The following deeds as furnished the News by the Randall County Abstract Company, have been recorded in the County Clerk's office.

J. H. Miller to Ernest Housewright, 240 acres of section 4, block M-6. Consideration, \$7,500.

Mary C. Miller et al to E. M. Carter, South half section 179, block G. Consideration \$10.

Of the 2,000 actors engaged in the various legitimate productions in the New York theater, during the season now drawing to a close, about ten per cent are Jews. Forty per cent of the sixty-odd so-called American plays produced were written by Jews. The plays eventually produced were brought on to the stages of theaters of which more than half are either owned or controlled by Jews. And after a New York run these plays are booked on the road by organizations which are practically one hundred per cent Jewish.

One of the world's greatest iron ore regions is located in the interior of Brazil. The ore-beds are pure and abundant and the only drawback to development lies in the lack of transportation. The natives smelt the ore and fashion it into utensils and farming implements by the crudest process known to modern man. With the abundant waterpower to develop current for electric furnaces, the economic development of this area will soon be solved. Brazil now imports large quantities of iron and sheet from other countries.

A state law regulating aviation in Kansas supervises aerial flight, determines qualifications of pilots, prescribes uniform traffic rules and generally guards the interests of the public. The aircraft board has authority to issue licenses for airplanes at twenty dollars and flyers at ten dollars a year. Cities are empowered to establish and maintain municipal aviation fields out of the city funds.

Although Montenegro contains rich and fertile fields in parts of the country, taken as a whole it is one of the poorest countries in Europe. Before the European War Russia built roads, bridges, churches and schools there. The natives are brave and fearless and have beaten back the Turkish swarms for 500 years. Of all the Balkan peoples, they alone have never bowed to the Turk.

Alvin M. Owsley, national commander of the American Legion, says, "It will take five years to write a sensible law to govern immigration and until that time the United States should bar those who are coming here seeking to avoid the consequences of a war which they brought upon themselves."

Magnetism was known 3,000 years ago. Ancient Greeks discovered black-stones in the vicinity of Magnesian in Lydia which had the power of attracting iron and were themselves attracted to each other by an invisible force. "Magnet"—derives its name from its original point of discovery—"Magnesian."

Rudyard Kipling is a first cousin to Stanley Baldwin, the British Prime Minister.

Forty years of constant use is the best proof of the effectiveness of White's Cream Vermifuge for expelling worms in children or adults. Price 25c. Sold by City Pharmacy. 1875

Labor recruiters penetrate to remote villages of Northern Argentine and with the promise of high wages induce Indians and their families to leave home. The laborers are transported on flat cars with accommodations worse than those provided for livestock. They are herded on estates under the open sky without sufficient food. They are hard workers, and their pay is practically nothing, their wages being in the form of orders valid only at the plantation store, where they are charged exorbitant prices for the poorest quality of goods. If any balance is left at the end of the accounting, the workers are induced to spend it for liquors of which they are very fond. The national department of Argentina is authority for this information.

Abandoning his train full of passengers to take a peek at the Chicago-Philadelphia ball-game a motorman of an elevated train in Chicago recently held up "L" traffic on the north side for half an hour. Becoming interested in the game he forgot to return to his cab.

During the recent eruption of Mount Etna, a Sicilian peasant dug a hole in the outer crust of the cooling lava until he reached the almost boiling lava below. He lowered a pan filled with water, which was thus heated to a point where it could cook food. He then proceeded to prepare a meal for himself and other refugees.

The principal crop of Yucatan is the henequen (sisal). The fields are cleared with axes and machetes. No plowing or harrowing is done in the preparation of the henequen ground. The suckers of the plant are merely placed in holes in the sparse soil among the rocks.

In honor of his dog just dead and buried, the governor of Maine ordered the American flag displayed at half-staff over the state house at Bangor.

Ellis Island seems to be one of the most popular summer resorts in the world.—New York Herald.

Delicious Baked Goods

Every day adds to our rapidly growing list of customers—Women who have found that it is more economical to buy their Baked Goods than to do the work themselves.

Try it for a week or so yourself and you will know why.

## CANYON STEAM BAKERY

Rev. Mr. Maurice Rosencrantz, rabbi of the congregation Novah Zedek Tamud Torah, of Portland, Oregon, was fined \$44.44 for selling intoxicating liquor to Walter Smith, a state prohibition officer. It was on recommendation of the district attorney's office and passive acquiescence of S. L. Cleaver, state prohibition chief, that a nominal fine without jail sentence was agreed upon. There was no formal trial, admission being made that there had been a tentative agreement out of the court as to procedure. Attorneys for Rabbi Rosencrantz said that he pleaded not guilty to the charge even though he admitted that he had sold the sacramental wine to a person not belonging to his congregation.

Old Spain is just now being swept by a wave of enthusiasm for all kinds of athletic sports. Football, especially seems to have appealed to the young bloods of Spain and many of them are forsaking the lure of the bullfights for the gridiron sport. The tendency in young Spain is for participation in athletic sport rather than playing the passive role of spectator.

In Chicago 1,285,000 person or 300,000 families move every year, according to figures compiled by the gas company.

## The End of "Endless" Days

DOING farm work with an Allis-Chalmers tractor means more than raising bigger crops at less expense. You can do more and better work in less time and put an end to working days that hold you on the job long after dark.

Whatever the work to be done, you go into the fields with an Allis-Chalmers tractor and finish up on time! The powerful valve-in-head motor is as finely built as the engine of a motor car or truck. Rated conservatively, it is capable of developing and maintaining a power surplus which overcomes emergencies on either drawbar or belt. Two large side-inspection plates give quick access to crankcase; valves are easily reached for grinding or cleaning of carbon by simply removing cylinder heads.

All we ask is the opportunity to give you a demonstration of what an Allis-Chalmers tractor will do on your farm. Come in—ask us for the proof—and for details about our easy time-payment plan.

## ADVOCATES FEEDING SURPLUS WHEAT CROP TO HOGS BEFORE CORN CROP READY FOR FEEDING AND MARKETING

The next ninety days will present some unusual conditions in the hog raising business. The low price of wheat compared with corn offers, on its present price basis, an opportunity for the far-seeing hog feeder to substitute wheat for corn in the hog ration. This method will enable the hog feeders to take advantage of the higher hog prices by finishing out the spring litters in the fall before corn belt feeders glut the market with their hogs fattened on the new corn crop. By thus utilizing a large amount of the cheap feed there will be a tendency to the increase of the price of wheat.

Six and two-thirds bushels of wheat and forty pounds of tankage are equal to seven and one-seventh bushels of corn and fifty four pounds of tankage. Without a tankage supplement in the ration wheat is likewise superior to corn. So far as cost of production is concerned nothing is gained by mixing wheat and corn half and half. There might, however, be a slight difference in the quality of the pork. Wheat is richer than corn in protein, but for the most economical gains a protein supplement is necessary. Hogs on pasture will do well on five per cent tankage ration with wheat. Shrivelled wheat runs higher in protein percentage than wheat of high grade.

Coarse grinding or cracking the wheat improves the feeding value 16 to 22 per cent. Soaking whole wheat is not much better than feeding it dry, and should not take the place of grinding. It does not pay to soak ground wheat. Wheat should not be ground too finely as it tends to form a sticky mass in the hog's mouth. In such cases it is advisable to feed it in a slip. A self feeder is a very satisfactory method of feeding ground wheat. The tankage can be put in a separate compartment or fed in a 5 per cent tankage cracked wheat mixture. Wheat at 85 cents a bushel makes it advisable to put the spring pigs on a full wheat tankage ration and get them up to 200 or 225 pounds as quickly as possible. In most cases it does not pay to carry pigs along on a limited grain ration. Young pigs make the most of the feed consumed. Pigs should be gotten on a full wheat ration gradually. At least a week should be allowed to get them ready for the self feeder system. If pigs are not on a full grain ration the tankage should not be fed in a self feeder. In such cases it is better to mix tankage with wheat in the 5 per cent ration.

If the farmers over the country would feed 25 per cent of their wheat to hogs, it will influence the price of wheat up. If 25 per cent is fed to hogs, the balance of the wheat will sell for more money than the entire crop will bring if none is fed to the hogs. In other words, the farmers would get as much for their wheat crops and in addition would have the gain in hogs which they would lose otherwise.

Farm wages this year appear to be generally higher than they were in 1922. Farmers who think they can afford it are paying experienced men as much as \$60 a month and board; others are going without help and planning to raise smaller crops. Many a farmer wishes he knew where he himself could get \$60 a month in cash besides his living expenses.

The best place for a vacation is where you can be most cheerful.

### SIMPLICITY

Of all the varied elements of human life simplicity is perhaps the one that charms us most deeply and permanently. There is simplicity in thought. We like people to say what they mean, or, if they mean nothing, then to keep still, not wrap up nonentity in cloudy grandiloquence, which wears ears and minds both.

There is simplicity in art. The elaborate has its place, large developments of phrase and color and ornament, magnificence and munificence. But what pleases us and holds us most and longest is the quiet, simple touch that comes from the heart and goes to it.

There is simplicity in life. Most of us are always seeking complications, wealth, luxury, remote and subtle pleasures, which allure us and elude us and deceive us. But when we are young and happy with simple things, and when we grow old—and wise—we are likely to turn to simple things once more and to find that they content us.

There is simplicity in character, and it is needless to point out the charm and restfulness of it, the infinite comfort and security.

And of course there are elements of excess that injure simplicity as they injure other things. In the old country phrase "simple" meant "feeble-minded," and we all have a certain prejudice against simplicity in that sense. Also, there is what the French call so aptly "simplesse," the effort at simplicity, the labored affection of it, which is one of the most repellant things in the world.

The truth is that highly civilized, analytical, sophisticated spirits cannot easily maintain simplicity. They may worship it, or re-achieve it, in its exquisite white innocence and its adorable charm. But with a reasonable effort they can at least keep before them the ideal of eschewing the artificial, the elaborate, the pretentious, and of seeking, so far as possible, directness and lucidity of thought and the plain, substantial, satisfying, permanent interest in life.

Those who have been investigating the numerous fatalities that befell aviators in the United States last year report that it was to "gypsy" pilots, who go about the country picking up business wherever they can find it, that most of the accidents happened. As there are no national laws to license pilots and to certify that the equipment is safe many a young fellow picks up an old aeroplane for a few hundred dollars and continues to fly it until he comes to grief. In 1922 one hundred and twenty-two "gypsy" pilots met with accidents, whereas among those who were working for established companies there were only twelve.

More cheering than most news from Russia is the report that a vast vein of iron ore has been discovered in the province of Kursk, three hundred miles south of Moscow. The vein is one hundred and fifty miles long and lies at a depth of from five to eight hundred feet. Many years ago it was observed that the compass in that region was deflected as much as fifteen degrees from the magnetic north, but why it was deflected was not then discovered.

Time is valuable to some persons. If you can pick them out and save their time, they will pay you well.

### BILL BOOSTER SAYS

GOOD BRASS BAND PEP UP A TOWN! IT DEVELOPS AN APPRECIATION OF MUSIC! IT RAISES THE MORALE OF THE PEOPLE! THE CONCERTS BRING CROWDS TO TOWN! THE TOWN THAT BOASTS OF A BAND SHOULD SUPPORT IT LIBERALLY! THE TOWN WITHOUT ONE SHOULD ENCOURAGE ITS MUSICIANS TO GET TOGETHER!

### YOUR COMPETITOR IS NOT NECESSARILY AN ENEMY

Your competitor is not necessarily your enemy. He can be made your friend.

A common mistake is that there is just so much business to be had, and that the rival cuts your trade in half.

That is not true. As a rule, the more tradesmen the more trade. A good live competitor will increase your custom.

Two first-class groceries in a block are better for both than a monopoly would be for either.

Competition does not kill trade. It builds trade, makes new trade, stimulates trade.

No one can get all the business possible in any community. His personality attracts some, repels others. There's always a lot of business for someone else.

Don't shy from your competitor. Don't assume he's your foe. Get acquainted with him. You may learn something.

Beat your competitor if you can, but remember the surest way to beat him is to use fairer methods, and to be more courteous.

The United States Navy has converted the old battleship Kearsage into a unique crane ship, a feat that engineers regard as one of the greatest ingenuity, since it required rebuilding and strengthening much of the vessel. In appearance the crane ship is most unusual: all the superstructure has been cut away and a colossal jib built on a square tower amidships. Aft there is a tower with a saddle on top in which the jib rests when the vessel is at sea. The crane can swing a weight of two hundred and fifty tons through an arc of more than one hundred feet.

Don't regret too much your ups and downs; after all the only man who has none is in the cemetery.

Purity and healing power are the chief characteristics of Liquid Borzone. It mends torn cut-burned or scalded flesh with wonderful promptness. Price, 30c, 60c and \$1.20. Sold by City Pharmacy. 1875

### Umberger Notes

Nick Hollenstein spent Sunday at the Anton Beckman home.

Clem Friemel is threshing oats for O. J. Podzemney.

Mr. Downing shipped a carload of cattle from Umberger Monday.

O. J. Podzemney has some oats that is making 66 bushels to the acre.

The farmers are still harvesting and threshing.

The Farmers Elevator will soon be finished. Not much of this years crop will be handled in the new elevator.

The row crops are in need of rain. A small amount of rain fell here Monday. West of Umberger it rained about half an inch.

Calvary Church, Pittsburgh, on January 2, 1921, first broadcast by radio its Sunday service. Just how many people have since comprised the "unseen congregation" is hard to estimate, but to an appeal for contributions to erect a memorial to the first radio service more than four thousand seven hundred persons replied. The memorial, which is a bronze tablet, shows in relief a map of the territory where the services of Calvary have been heard. It includes all of the United States and a considerable surrounding territory in Canada and Mexico and a wide area of sea.

The Soviet government, in an official statement, says all Jews who wish to join relatives in America may do so by applying for emigration passports. Permission has been granted the all-Russian Jewish Relief Committee to establish branches throughout Russia to facilitate emigration.

## Stop that Eczema!

A MAZING results have been produced by S. S. S. in cases of eczema, pimples, blackheads and other skin eruptions. If you have been troubled with eczema, and you have used skin applications without number, make a test yourself, on yourself with a bottle of S. S. S., one of the most powerful blood cleansers known. S. S. S. makes the blood rich and pure, and when your blood is freed of impurities your stubborn eczema, rash, tetter, skin eruptions, pimples, blackheads, blotches and acne are bound to disappear. There are no unproven theories about S. S. S.; the scientific results of each of its purely vegetable medicinal ingredients are admitted by authorities.

S. S. S. is sold at all good drug stores in two sizes. The larger size is more economical.

### WHY NOT

Was there ere a thing so perfect as the sunset on the plains  
When the livid forming fire-ball dips his head beneath his wing.  
And the heavens fill with glory; burning crimson giving way  
To the softer hues of violet at the closing of the day.

When the earth with throbbing stillness echoes back each separate word  
Of the hours that we just slipped by us with the swiftness of a bird:  
Echoes in our minds a vision of the future, and our way  
Seems troubled with greater beauty at the closing of the day.

Why, we ask ourselves and ponder, why the best beloved of men  
Is still unsung and still unpainted by the poet's ardent pen?  
There she waits the master Artist: waits in silence one who may,  
Catch the feeling, glowing beauty at the closing day.

True she's had some valiant champions; yes she waits the master hand.  
Ah, she waits whil many know not of the beauties of her land.  
Know not? Ah, no never, not until with them they stay,  
How no hand can paint the beauty of the slowly dying day.

The fault in aliens is that those easiest to exploit are hardest to assimilate. —Colorado Springs Gazette.

This is a free country in which you may chortle, but not gurgle.—Boston Shoe and Leather Reporter.

Take it from the Literary Digest poll, McAdoo'll do!—Jacksonville Journal.
