

## DISTRICT COURT NOW IN SESSION FOR FALL TERM

### PAYNE MURDER CASE COMES UP NEXT MONDAY.

#### Grand Jury Selected Monday and Returned One Bill—200 Men Are Summoned for Next Week.

District Court opened the fall session Monday with Judge Henry S. Bishop presiding and District Attorney Lloyd Fletcher assisting the grand jury in its investigation.

The following men were selected for the grand jury: Ed Money, foreman, H. C. Zachery, W. E. McCormick, M. Rockwell, E. E. Adams, Will Scott, J. W. Blair, N. E. Root, Dave Covington, S. B. Orion, J. B. Knox and J. E. Park. The following are bailiffs: A. W. Hancock, T. D. Coffee, J. A. Tate, A. G. Thomas.

One bill was presented to the court by the grand jury, a felony charge. The grand jury will probably be able to take a recess for a week or more before continuing its work.

The two murder charges against D. L. Payne will come up in court next Monday. Sheriff Black is summoning two hundred men to appear for jury service next Monday.

Sheriff W. C. Black has requested two Texas Rangers to be sent here during the murder trial.

No jury cases have been tried this week.

In the case First National Bank vs. W. H. Woods et al, Mrs. Ethel Woods, a party to the suit, was disqualified to act in her official capacity as district clerk. A. N. Henson was appointed in her stead in handling this case.

Three judgments were granted by default Tuesday:

Amarillo Independent School District vs. H. B. Molyneax, suit for taxes. Amarillo Independent School District vs. A. N. Molyneax, suit on school taxes.

Canyon Independent School District, suit to clear title.

The docket for the term is very light, and little business of importance, aside from the murder case, is likely to come up.

## Tech Locating Board Stopped in Canyon for Rest Friday p. m.

The Tech locating board visited this city Friday afternoon, arriving at 4:00 o'clock, and leaving for Amarillo at 6:30.

Canyon is not an applicant for the new school. Canyon is the location of the West Texas State Teachers College, the only state school now located in West Texas, and only two members of the locating board had visited the institution. The other three expressed a desire to come to this city for a short while in order to see the institution and to become more personally acquainted with the members of the faculty.

Eight cars met the board at Tulia after that city had finished presenting its claims to the board, and the committee arrived here at about four o'clock. The swimming pool was opened to the members of the board, and the five newspaper correspondents accompanying the board. A refreshing plunge was enjoyed by all, as the day had been hot and dusty.

Only a short while was allowed for inspection of the College plant, but in those few minutes faculty members assisted President Hill in taking the men to all parts of the College plant. All members of the board were highly pleased with the College property.

President Bralley stated it to be his belief that to replace the College administration building at this time would cost the state at least a half million dollars.

The board and newspaper men were entertained at Cousins Hall at an informal dinner at 6:00 o'clock, and then started to Amarillo accompanied by more than a hundred Amarillo business men.

### SEEKS TO ASSIST CITY.

The City Federation of Women's Clubs has written Mayor C. N. Harrison expressing appreciation for the work that has been done in cleaning up the city, and making suggestions as to other work that may be done.

The Federation is devoting its work to making the town a better and cleaner city in which to live.

## Paper Giving Account of Lincoln's Death to the Historical Society

S. V. Wirt has presented to the Panhandle-Plains Historical Society a copy of the New York Herald of Saturday, April 15, 1865, which gives a detailed account of the assassination of President Lincoln.

The paper came into the hands of Mr. Wirt through L. S. Carter, who moved from here recently to Corpus Christi. A boy working for the Carters had left a trunk, and had never called for it. When the Carter family left this trunk and other things were turned over to Mr. Wirt, who discovered the copy of the Herald in the papers.

The display of relics of the Historical Society is growing rapidly as the people find that the Society can use and preserve these valuable relics.

## Canyon Night at the Girls Camp is Attended by Many Citizens

A large number of Canyon people attended the girls camp southeast of the city Monday night on account of this being Canyon night. The Methodist orchestra furnished the music for the occasion and was highly pleasing to the girls in the camp.

The camp will close tomorrow. The annual camp has been one of the most pleasant and profitable and pleasant the girls have ever held, and they appreciate very greatly the work and interest of their leader, Mrs. Tom DeLaney of Memphis.

While the girls were observing the rest period Thursday afternoon in the big tent, a small swirl wind came along, getting under the tent sufficiently to entirely wreck it, and tearing the canvas into shreds. One of the girls was struck by a falling pole, but not seriously injured. There was great excitement in camp during the day over this peculiar event.

A large number of visitors have attended the meetings during the week. Several conference ministers have spoken before the assemblies of the young women.

### 321 TAKING EXAMINATIONS.

Three hundred and twenty-one students are taking the examinations for teachers certificates at the College during this week. The examinations are being given at the old high school building in order to facilitate in the matter of room.

A majority of those taking the examinations are taking the summer normal course in the college and will leave for their homes at the end of this week.

Practically all of the summer normal faculty will also leave Friday and Saturday.

## Work on High School Building Will be Completed Saturday a. m.

Work on the new high school building will be completed Saturday, and the building will be received Saturday morning at 9 o'clock by the trustees.

Under the terms of the contract, the building was to be completed by Aug. 15th. Eight days were allowed for bad weather in the early days of construction. The building is completed at least two weeks before the time limit expires.

Furniture and equipment for the new building is arriving and it is hoped that nothing will be lacking when the term of school opens on Sept. 10th.

### HOUSES ARE SOLD.

S. B. McClure has sold two houses during this week:

The Sarah Weaver home to Ralph Harter and the E. H. Flynn house to S. W. Cain.

### TO CALL PASTOR.

The members of the Baptist church are called to meet Sunday morning to consider the call of a pastor.

Rev. W. C. Taggart of Artesia will preach Sunday morning and evening.

### COUNTY JUDGE GIVES EXAMS.

Judge Rector Lester will give examinations on August 17-18. So far fifty have expressed a desire to take these examinations.

Unless you make up your mind to enjoy your work, you will never like it even a little.

## CITY HAS MOTOR COP ON JOB—TO FINE OFFENDERS

### FINES INSTEAD OF FURTHER WARNINGS.

#### Commission Tells Drivers What Rules Must be Observed in Future Driving on Streets.

**Don't drive over 20 miles per hour.**  
**Don't cut corners.**  
**Don't drive with open cut outs.**  
**Don't double park.**  
**Don't turn without two good lights.**  
**Don't drive to the left.**  
**Don't turn in the middle of the block.**  
**Don't drive over 10 miles per hour past a school building.**

The city commission issued this warning yesterday, and Mayor C. N. Harrison states that all traffic regulations will be strictly enforced.

The city has a traffic ordinance to cover all to the points in the warning. Fines will be imposed on violators without fear or favor. The fines will be doubled upon each successive violation. The minimum fine for speeding is \$10 for the first offense.

Clarence Luce was employed yesterday as speed cop and will be on the job seven days of the week until the traffic ordinances are respected.

## Walker to Take Federal Position Beginning First of September

C. F. Walker has accepted a position with the Federal Government in the stock yard service, and will leave the first of September for his new work.

Mr. Walker has been county agent in Randall county for the past four years and has made an enviable record in his work in the county. He has been tireless in his effort to upbuild the county from an agricultural standpoint, and has been of great assistance to the farmers generally. He is an expert stock judge and in this capacity has introduced into the county a much higher grade of stock, and succeeded generally in building up the hog industry in the county.

Mr. Walker does not know to what point he will be assigned, but it will be in a western state. He reports to Ft. Worth, and will go to Kansas City and Chicago for instruction before he is permanently located.

The people of Randall county regret very much the fact that Mr. Walker is to leave the county, but rejoice at the splendid promotion he is to receive in recognition of his expert ability.

## Memorial Service Will Be Held Friday Morning 9:30 at the College

Memorial services for President Harding will be held Friday morning at 9:30 o'clock at the College auditorium.

A cordial invitation to extended to all of the citizens of Canyon to join in this service, and a special invitation is given to ex-service men.

The following will be the program: Invocation—Rev. M. M. Beavers. Reading of President Coolidge's proclamation, L. F. Shetty. Special music, College chorus. Scripture reading.

Memorial Address—Hon. Thos. F. Turner of Amarillo.

### KLAN WANTS MEMBERS.

J. E. Pope, Commander-in-Chief of the Texas Klan, Fort Worth, has sent into Canyon a large number of circular letters asking for membership to the Ku Klux Klan. Mr. Pope states that there is some important work to be done in this community.

## School Busses Here Ready for the Opening of Term in Sept.

The two school busses bought by the independent district to haul the children from districts 2 and 18, have reached the city and will be delivered to the school the first of September. The busses are International spee-ers, with school bodies built on a factory.

## Ritter Dental X-Ray Added to the Ingham & Ingham Offices

A Ritter Dental X-Ray has been added to the equipment of the Ingham Dental Offices, this being the only dental office in Northwest Texas so equipped.

A gas machine was recently bought for the office, this being another machine that is found in only one office in this section.

Dr. Geo. Ingham stated that a porcelain oven is to be added at once, and this is found in but one office in this entire section.

With this new equipment, this office will be the best equipped of any northwest of Fort Worth.

Dr. S. L. Ingham, senior member of the firm, has been practicing in Canyon for seventeen years. His son, Dr. Geo. Ingham graduated last year at the dental college in Dallas with high honors. He was offered a place on the faculty if he would return, but chose to stay in Canyon for general practice.

The X-Ray has been used to take several pictures since its installation, and the marvellous machine does very fine work.

## Lubbock Selected by Board as Location of New Tech College

FORT WORTH, Aug. 8.—The Texas Technological College locating board unanimously awarded Lubbock the new million dollar institution which authorized by the last session of the legislature reached its decision this afternoon.

Many towns which lost and which had delegates here took the award without criticism, in every instance voicing the sentiment that their townspeople would support the new institution of Lubbock to the fullest degree.

The official statement issued by the technological board shortly after it reached its decision in the caucus room of the Texas Hotel, reads:

"We, the members of the locating board of the Texas Technological College, in conformity with the law creating such college, having made careful study of the original and supplemental briefs, having visited and inspected the sites offered by the 36 applicant towns, having given consideration to the relative merits of the propositions submitted by the several towns, do hereby unanimously select and designate Lubbock, in Lubbock County, Texas, as the official location of the Texas Technological College."

The document was signed by all members of the board:

S. M. X. Marrs, state superintendent of public instruction; S. B. Cowell, chairman of the locating committee; Dr. W. B. Bizzell, president of the Texas Agricultural and Mechanical College; Dr. F. M. Bralley, president of the College of Industrial Arts; Dr. William S. Sutton, acting president of the University of Texas; W. R. Nabors, secretary of the locating board.

The board went in session at 9 o'clock this morning, and when it adjourned at noon was said not to have reached a decision. After a thirty minutes' session this afternoon, however, the decision was announced.

Representatives of towns seeking the school met and prepared a statement congratulating Lubbock. They said Lubbock would have the "most sincere co-operation of all our respective localities."

## College Band to Give Concert on Campus at 8:15 Saturday Eve

The College Band will give a concert on the College campus Saturday evening at 8:15, according to announcement made by C. E. Strain, director. Large crowds have been attending the concerts given at the College and upon the public school by the band during the summer.

The College Band is the best this summer in the history of the institution. Mr. Strain states that the outlook is fine for a good band during the regular session.

### TO SELL SCHOOL BUILDING.

The small school building on the public school grounds, just south of the high school building, will be offered at public sale Saturday afternoon 4:00 o'clock.

## DIRT BREAKING FOR NEW METHODIST CHURCH PARTICIPATED IN BY SEVERAL HUNDRED TUESDAY EVENING AT 6:30

"This is a real outstanding occasion for this town, for the College and for Methodism in this section"—President J. A. Hill.

Several hundred people gathered Tuesday evening at the site of the new Methodist church to participate in the impressive ceremonial which witnessed the beginning of the first actual work on construction of the new church building.

Rev. G. S. Hardy, presiding elder, was called upon by Rev. M. M. Beavers to give a brief history of Methodism in Canyon. He stated that this was the second building enterprise with which he had been associated in Canyon. In 1898, when there were about two hundred people in Canyon, the Methodists wanted a pastor here. He asked Rev. T. F. Robeson at Clarendon to come and take the charge. Rev. Robeson stated that he would if Mr. Hardy would come to Canyon and raise \$125 to build a house. This was done and Rev. Robeson became the first pastor of the organized Methodist church in Canyon.

Four years ago Bishop McMurry became aware of the wonderful possibilities in Canyon and started a movement to help the local congregation with a building enterprise. In loans and gifts only \$14,000 could be made at that time. Now the church is able to offer \$25,000.00 to the local church if it will raise \$35,000 on the building.

Rev. Hardy discussed some of the history connected with the selection of men to come to Canyon—and the importance of the charge so far as the conference was concerned. He highly praised the church plans and urged the congregation to get into the building spirit. A great work on the part of the Methodist church will be a great inspiration to the other churches of the city.

Rev. T. F. Robeson was called upon to lift the first shovel of dirt for the excavation of the new building. The old Christian gentleman, feeble with the labors of many years and bowed with the weight of the many heart aches that were poured into his sympathetic ears during his pioneer days on the Plains; yet young in spirit as during those stirring days when first he came to Canyon to mould out of the wide prairies and to build here for the church that he loved and for which he has given his life. Rev. Robeson slowly lifted the shovel of dirt from its virgin resting place, saying that he was glad to accept this honor of lifting the first dirt; that he might not live to see the completion of the building, but he thanked God he had lived to see its beginning, and in the name of the Father, the Son and the Holy Ghost, the dirt was slowly placed in the receiving wheel barrow.

Mrs. Oscar Hunt, a charter member of the local church lifted the second shovel, and was followed by others: Dr. D. M. Stewart, representing the board of trustees; L. F. Shetty, the Sunday School; Mrs. C. W. Warwick, the Missionary Society; Miss Jessie Green, the young people's work; J. M. Vetsch, the board of stewards; G. G. Foster, the church building committee.

W. J. Flesher was called upon by Rev. Beavers to discuss the Heart and Soul of the local church. He stated that the discipline stated that "The church is of God and will be preserved until the end of time," but not unless we, as individual members help preserve it. The church needs the human instrumentality. The church is no higher than the individual members.

Mr. Flesher discussed the two fold need of the local church—the need of a great local congregation of nearly five hundred, and the need of a large student body. He praised the plan for the new church because it met the needs of both the local congregation and that of the student body.

Mr. Flesher believed that the mission of the church was to seek and to save that which was lost, and that it was to go out to seek. The church at large was for this purpose willing to help the congregation, in building for the students who were in the College.

O. B. Vaughn was called upon to represent the student body in the College. He believed that a trained spiritual life was the meaning of education. That the evaluation of the opportunities before us, was the meaning of this occasion. The church of "ers the culmination of our education. President J. A. Hill was called upon and expressed appreciation for the opportunity of taking part in the exer-

cises. The significance of the occasion stresses the importance of the real Christian life to creed. Mr. Hill expressed the appreciation of the pastors of the local church.

He stated that college here shall be as consecrated to the high ideals as is any school. When we decided to separate church and state, too many interpreted it to separate Christianity from the state. That is where the state schools are criticised. Mr. Hill expressed the desire that this College be relieved of this handicap. The man is not educated unless the heart is pure. He wants his school shot through with the spirit of Christianity. School that trains teachers should be Christian.

Mr. Hill was glad to see the Methodist congregation take this step, and pledged his cooperation and help in any thing that was needed to be done. He discussed the temptations confronting the young life of today, and urged that they have sympathetic guidance. The boys and girls coming here are the very best boys and girls Mr. Hill trusted that the building program would not stop with the Methodist church, but would go on until all of the church would build.

## Contract Let by City Commission to Build the New City Hall

At the meeting of the City Commission Monday night the contract was let for the construction of the new city hall to Jim Reeves.

Brick and other material have been on the grounds for some time, so that work may start upon the building at once.

Canyon is going to have one of the best small town city halls and fire stations on the Plains.

The county jail will be the west end of the building, the cage having been moved there some time ago.

## Fire Chief Burroughs Calls Out Department on Test Run Tuesday

The fire alarm sounded at 1:30 o'clock Tuesday afternoon with a call to come west of the high school building. The new fire truck and the chemical engine made the run, arriving at practically the same time.

Fire Chief E. Burroughs met the trucks and complimented the firemen, explaining that it was a call put in by himself in order to test the efficiency of the department and the new trucks.

Mr. Burroughs states that it took exactly four minutes from the time he rang the telephone to put in the call until the two trucks had arrived two blocks west of the school building. Some time was lost when he had to explain to central that it was the Chief calling and that it was a test run.

Under the arrangements at present, fire calls are handled by the central operator. She must ascertain as nearly as possible the exact location of the fire and phone the Chief and all truck drivers before she turns on the electric fire gong which never fails to bring out the people of the city. The truck drivers are on their way to the trucks by the time the general alarm is given.

The next time Shelby, Montana, wants a little advertising, she will build a religious revival.—New York Tribune.

Possibly editors of small-town newspapers make a mistake in continually preaching about "patronizing home industry," says the Englewood, Colorado, Herald, for it generally works out that the editor gets the worst of it. When he goes into a place of business he is expected to shut his eyes, take what is offered, and pay the price. But when the other fellow wants a little job printing he shops around among all the shops with fifty miles of the home town and asks the local printer to beat the lowest price.

## CANNIBALS HERE 4,000 YEARS AGO

Scientist Finds Portions of Human Skulls in Mounds Near Omaha.

### RESEARCHES ARE IMPORTANT

Declares Peace-Loving Race Inhabited the Mid-West Section of America Prior to Time of Indians.

Omaha, Neb.—In an effort to obtain evidence to support his belief that Nebraska was inhabited 4,000 years ago by cannibalistic cave men, Dr. Robert F. Gilder, doctor of science, known throughout the West for his desert landscape canvases, has begun excavating a short distance south of Omaha. Permission was granted him after a dozen years of effort to induce owners of the land to permit the excavations.

The site of the excavations is marked by several eroded mounds which the scientist believes were community houses of the Omaha or Pawnee Indians. It is his theory that these mounds were built upon the foundations of the houses of the earlier tribe, possibly ancestors of the Mid-West Indians. In support of this belief, he has discovered that the upper structure—declared by him to have been built with mud and stone sides covered with thatch—had an entrance on the south, whereas the lower excavations clearly show entrances from the east.

**Finds Bones of Men.**  
Using the Darwinian accumulation theory—one inch of earth to each century—Doctor Gilder calculates that he has reached the 4,000-year-old surface level and there he has discovered portions of human skulls, arm and foot bones.

His discoveries include ashes, declared by him to be roasted human bones. From this he evolves the theory that the early inhabitants were cannibals. Some thirty or forty implements of bone and wood he has found are almost identical with creations unearthed by European archeologists, who have ascribed their age as preceding the historic.

**Peace-Loving Race, He Says.**  
"We have established the fact," declares the doctor, "that there lived in this portion of the North American continent a peace-loving race prior to the time of the Indians, as we commonly apply the term. I deduce this from the fact that the houses were large enough to accommodate from ten to twelve families and that the dwellings are separated by considerable territory. If the race had been warlike, the individuals would have felt a common desire for close association and would have built houses in groups for mutual protection."

### RADIUM IN NEW HAMPSHIRE

Edward Caron, a French-Canadian miner from Montana, has discovered radium in a mountain at Berlin, N. H. He has prospected with such success on a lot of woodland he purchased recently as to attract the attention of the United States bureau of mines. Engineers will investigate to determine the extent of the radium deposit. Caron is shown here with samples of the minerals he found on his property. In his left hand he holds a specimen of uranium, which contains radium. In his right hand is a specimen of beryl.

### Wolves Menace Farmers.

Warsaw, Ind.—Terrorized by the appearance of a flock of wolves driven from a swamp near here by fire one morning recently, farmers kept their children indoors while others, with rifles and shotguns, accompanied their youngsters to school. Drivers of school hacks also were armed.

While Roy Tople went to a field at the edge of the swamp to dig potatoes a large hound accompanying him was killed by six wolves. Cattle, sheep and hogs recently have been attacked by wolves. Families were organizing for a wolf hunt in which several hundred persons will participate.

**Tenants Get Landlord's Estate.**  
Los Angeles.—Tenants of George Leow, who died recently, learned they were his heirs. His estate, valued at \$25,000, consists of five houses, which were devised to the families occupying them. He was survived by no known relatives.

### Garbage Wagon Horse Is Blue Ribbon Winner

New York.—From the shafts of a garbage wagon to Fort Riley, Kansas, a chestnut gelding dubbed Submersible by a buck private who sometimes drove him to a post laundry wagon, leaped into fame at the national horse show as a blue ribbon winner, capturing the coveted championship for chargers.

The former laundry horse might still have been going the dull, routine rounds at the fort but for the eye of a lover of horse flesh, who saw possibilities in the animal. Submersible was relieved of his arduous task, the unkempt tail and the long mane got better attention.

### BANDIT HERO IN CUBA

Popularity With People Makes His Capture Difficult.

Escapes From Matanzas Jail by Blowing Hole in Wall at Midday—Sentences Totaling 200 Years Hang Over His Head.

Havana, Cuba.—With sentences totaling 200 years in prison hanging over his head and 250 troops and rural guards at his heels, Ramon Arroyito, Cuba's modern Jesse James, is still at large. His latest feat of escaping from the jail at Matanzas through a hole blown in the thick walls at midday has again made him a popular hero and added to the difficulties of the authorities, for they claim nobody will help them follow his trail. Arroyito took to the high road about three years ago, and if the hold-ups, kidnappings and other unlawful acts attributed to him are well founded, he operated in every part of the island before he went into retirement after two years of hectic endeavor, and with a fortune variously estimated at from \$50,000 to \$200,000. But last spring, while very prosaically traveling from Matanzas to a nearby village to attend a cock fight, he was captured by two rural guards, acting as a train escort, who held him first for carrying arms without a license, but loaded him with chains when they discovered he was the notorious outlaw.

Brought to Havana, Arroyito was greeted by thousands at the railway station and his trip to the city jail resembled a triumphal procession. While being tried and convicted on numerous counts he perfected his plans for breaking loose from jail, and only the accidental presence of a mounted policeman on the harbor side of the jail prevented a clean getaway three months ago.

His escape from the Matanzas jail, where he was lodged to await trial for kidnaping, is credited to a former pal, Julio Ramirez, whom Arroyito once rescued from jail at Jaruco by holding up the warden and turnkeys single-handed in broad daylight.

### AFTER GOAT, BUT GOT BABOO!

Ape Drops From Tree Into Surrey Driven by Woman on Long Island.

New York.—While Mrs. Samuel Powell, wife of a Babylon (L. I.) letter carrier, was driving to Capriague in a surrey, a baboon dropped from a tree to her shoulders in a back road near the village. Her screams were heard by an unidentified hunter, who came on the run and shot the monkey dead.

Mrs. Powell carried the carcass to Babylon, where she exhibited it. She will have it stuffed.

Mrs. Powell was on her way to Capriague to buy a goat.

### Aid Breathing 66 Hours: Lives.

New York.—After 66 hours of artificial respiration, Simon Shulin, 16, of Brooklyn, with paralysis resulting from a broken neck, regained his normal breathing and is on the road to recovery, according to a statement issued by the orthopedic hospital authorities.

The boy sustained a broken neck when he dived into shallow water at Coney island.

### Boy Kills Brother in Wild West Game.

Austin, Pa.—Playing "wild west" cost the life of Raymond Keene, thirteen years old. Picking up a revolver which he thought was not loaded, Robert, Raymond's brother, aimed and pulled the trigger. The bullet pierced the boy's heart, killing him instantly.

### Woman, 62 Years Old, Mother of Quintuplets

Dr. Ernest C. Levy of New York city, president of the American Public Health association, announces what he terms the strangest case known to medical science. It was the birth to a sixty-two-year-old woman in Venezuela of five normal children within eight hours. The mother worked as a laborer in a mine until two hours before the births.

### KILL TOO MANY WHALES

Valuable Industry Overworked, Says British Expert.

Urges Legislation Against Further Hunting of Whales—Present Rate of Killing Will See Extinction in Another Decade.

London.—If the killing of whales continues at the present rate they will be exterminated before another decade, is the warning given by Sir Sidney F. Harmer, F. R. S., director of Natural history department of the British museum. Recent investigation carried out in the whaling areas has revealed this alarming condition, he says.

The whaling industry has survived since the time of Alfred the Great, despite the fact that there has never been a year known when scores of boats did not leave the ports of England, France, Spain and Scandinavia to hunt the sea animals, Sir Sidney declared in a recent address in which he urged legislation against further hunting of whales.

The Greenland variety of the whale is already thought to be extinct, and the hunting of the last few years has been confined almost entirely to the southern seas.

The profits derived from the killing of these cetaceans are enormous, and they increase yearly as the retail price of the oil and bone increases. A fair-sized whale has a ton of whalebone in its mouth, which alone is worth \$10,000. It also produces about 30 tons of oil, worth about \$100 a ton. In the season of 1915-16 the oil production from Antarctic whaling stations was 654,000 barrels, or about 94,000 tons.

During the war this oil was recognized as of vital importance in the manufacture of nitroglycerin. It is now used in the making of soap.

The principal whales caught today are a species of orquals, or fin-whales, the blue whale and the sperm whale. The latter, the hunting of which is principally confined to Americans, not only gives sperm oil but also contains ambergris, which is sold at \$20 an ounce and used in the perfumery trade. The oil used for lubricating the wheels of watches comes from the dolphin and is the finest oil known.

### HERE'S A HUMAN LANDLORD

Remembering Early Experience He Now Encourages Large Families to Occupy His Tenements.

Lewiston, Me.—If there is a saint's halo for landlords willing to admit large families into their tenements, J. O. Poliquin, fifty-two years old and the father of eleven children, deserves one.

"Young people just starting out in married life should be encouraged in every way," he declares. "I had my experience a quarter of a century ago, being turned out of a home because there were three small children."

"You see, if you want your city to grow you must encourage large families, for the more of these there are the more people, the more patronage for the stores, the more business of all kinds. But you can't encourage this as long as every landlord shuts up his heart and waves away the fathers and mothers with little ones."

"I have one house for newlyweds exclusively; four rooms, curtains and gas stove. They swamped me with applications and only sixteen couples could get under the roof. Later these graduate into larger apartments, where more children can be accommodated."

### AIR SERVICE FOR HONDURAS

Government Encourages Ambitious Plans for Mail and Passenger Transportation.

Tegucigalpa, Honduras.—The capital cities of the republics of Central America soon will be linked together by airplane service for passengers and mails, if ambitious plans to this end, encouraged by the government of Honduras, are carried out successfully. An Italian aviator, Luis Stornaioli, is now here with six Italian and three French planes. Headquarters are at Tegucigalpa.

### BIRTH RATE IN FRANCE DROPS

73,000 Excess Over Deaths Last Year Falls to Only 9,000, Latest Records Show.

Paris.—Vital statistics for the first six months of this year show a decrease of 25,000 births and an increase of 39,000 deaths over the corresponding period in 1921.

The excess of births over deaths, which last year was 73,000, is only 9,000 this year. Births and deaths from January to July of this year numbered 396,000 and 387,000, respectively. In 1921 there were 412,000 births and 348,000 deaths.

### Finds Her Lost Diamond in Chicken's Gizzard

Raymond, Wash.—In the gizzard of a chicken that she was preparing for dinner, Mrs. D. E. Rooney of Zeban found a diamond which was lost two months ago from the setting of a ring she wore.

### ACETYLENE CUTTER WILL ASSIST DIVERS

French Inventor Perfects Instrument for Rapid Work Under Water.

An instrument to facilitate the work of divers bent on peace or war occupations and to enable them to work rapidly under water has been invented, patented and tested by Marius Royer, a Frenchman. His underwater blowpipe operated either by electricity or by acetylene, capable of cutting through the thickest sheets of metal without any danger whatever of being put out of use by water pressure, is considered a remarkable invention.

The instrument is simple and merely consists of a short tube six centimeters in diameter. The piercing flame is eleven millimeters long, three millimeters in diameter, and carefully protected by a thick mask covered with waterproof material. The generators are kept above water, the electric currents or acetylene gases simply passing through the tube to the jet. For its first test the blowpipe successfully cut through a steel plate 22 millimeters thick, 50 centimeters long and wide in 30 seconds.

In peace time the machine, capable of cutting steel at the rate of a meter a minute, is aimed to help either the refloating of large vessels or enable divers to get to the interior of ships and remove valuables. In war time there are various uses to which the instrument could be put, such as the cutting of enemy nets to trap submarines, the cutting of propellers and the loosening of fixed mines and their ultimate destruction. Tests are about to be made with M. Royer's invention on French ships sunk during the war.

### HOP TOAD NEEDS WINGS

Would Greatly Increase His Value to Gardeners, Says Report.

If only the "hop toad" had wings he would be a wonderful "bird." The lovely creature is valuable to gardeners, greenhouse owners and golf-course guardians in helping to curb numbers of insect pests, but because he can't fly the biological survey of the Department of Agriculture says he isn't of much economic importance.

But, the survey declares, the toad should not be destroyed, for a certain proportion of his daily diet consists of injurious insects and other pests of growing plants. An analysis of the contents of the stomachs of 500 common toads shows that, while the findings in regard to the toad's choice of food are of interest, the toad is not of economic importance because he can't fly.

A report of the investigation of toad life by the survey, however, does disclose one trait of value in the "rain-maker"—he is evidently not a busybody, for we read:

"Toads go constantly about their own work of gaining a livelihood, and so, undoubtedly, fill their proper places in nature."

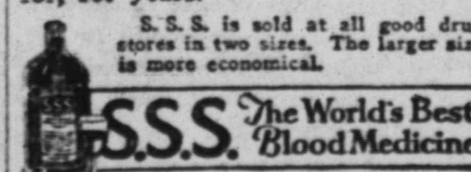

The investigation showed that the toad performs some service in such places as greenhouses, gardens, fields of small grain and golf courses.

Colleges teach men much more than Mr. Edison thinks. A lot of graduates have been offered major-league contracts.—Associated Editors (Chicago).

### Pimples

BLOOD impurities are pumped by the heart into the face. That is what causes that grainy appearance, that muddiness, sallowness, pimples, blackheads, acne, red spots; and that impossible "something" which no face cream, massage, or face powder can cover up or beautify! The foundation for a beautiful skin simply is not there, and no face treatment can give it to you. But increase your red-blood-cells, and quickly the ruby tint of purity begins to glow in the cheeks, the complexion becomes Venus-like and immaculate! Try it. It will do it every time. S.S.S. builds the red-blood-cells you need for a beautiful complexion. Begin using S.S.S. at once, and give yourself what you have been working for, for years.

S.S.S. is sold at all good drug stores in two sizes. The larger size is more economical.

## SCENES FROM THE UNION STATION WERE PRESENTED SATURDAY NIGHT AT COLLEGE AUDITORIUM—LOCAL CAST

The "Union Station" was a great success. The auditorium was well filled and the audience went away highly pleased. Everywhere we hear clever sayings that have been gleaned from the play, and satisfaction seems to be the common complaint. Each character appeared to be actually living the experience of the hour as the drama moved on without a hitch. There was plenty of comedy, many situations that were richly laughable. Troubles were forgotten while the listeners held their breath in anticipation of what was coming next. For once we were permitted

"To see ourselves as others see us." Among the outstanding features of the evening's entertainment were: beautiful Spanish dancing by Miss Franklin of Wichita Falls, the tragedy of "holding the baby," the sending of a telegram, the "bridal tower," the elopement, and the music furnished by the bunch of college fellows and the negro band. Each of these performances gained a hearty laugh and called for an encore.

The program was given under the auspices of the Ex-Students' Association, and was ably directed by Mrs. Tommie Montfort whose enthusiasm and loyalty made the success possible. The participants were drawn from the student body and faculty and from the leading business and professional men of the town. The money made will be added to the fast growing fund for the erection of the Mary E. Hudspeth Hall.

The following is the cast:  
 Train Master.....C. A. Peirle  
 Ticket Agent.....Gilbert Tyler  
 Clerk at lunch stand.....Irby Carruth

### Chemistry Class 203 Inspects Zinc Plant at Amarillo July 28th

The class in second year chemistry visited the Zinc Smelter at Amarillo Saturday, July 28, to get some first-hand information concerning the science of Chemistry applied to the smelting ores. Well, we got it and a great many other things. Having passed through the great establishment with much marveling, and blushing at the sights we saw, for the heat was intense in places, we were ready to interpret what we had seen at leisure. Wet with perspiration, weighted down with several tons of souvenir specimens of the metal in our pockets, and as much of the pulverized ore and dirt in our shoes, we entered again into a chilly world which but an hour before had seemed so unbearable hot. This phenomenon fixed the fact permanently in our minds that heat is only relative and that we should not be too chagrined if the summer sun seems to pour forth his blessing too generously.

The images of so many workmen, blackened by the coal black material which they handled with shovels down deep in the dark pits; the fantastic figures that seemed to fly through the flames in the intensely heated furnaces; and memory of the heat which we experienced there; seemed to have a lasting effect upon those who looked pensively into the future, such as Harper Allen and Elizabeth Dumas. The courtesy which we met there on the part of those in authority helped to make the trip altogether delightful. A great many of the Plains people are not fully aware of this great industry which has been made profitable by the nearby discovered wealth of oil and natural gas in that vicinity.

### Lubbock County Ex-Students Organize

Friday morning, July 20, at the chapel period the Lubbock County students met and organized for the purpose of carrying on the work of the Ex-students Association during the coming year. Mr. Alvis Lynch, the conductor of the meeting, made a short talk emphasizing the importance of such an organization and gave us many valuable suggestions concerning the promotion of the work. If you are going to be in Lubbock county this fall, why not join us now? We also have planned some special features, the purpose of which is to get before the members of the club the work of the ex-students and strengthen the ties of friendship and love for our Alma Mater. The following officers were elected.

President—Jack Wester, Idalou.  
 Secretary—Leola Cox, Lubbock.  
 Prairie Rep.—Irene Cox, Lubbock.

The Pollyanna prize for 1923 goes to John T. Adams, Republican national chairman, for his statement calling attention to the poor showing made by the Democrats in the Minnesota election.—Chicago Daily News.

If the baby suffers from wind colic, diarrhoea or summer complaint, give it McGee's Baby Elixir. It is a pure, harmless and effective remedy. Price, 35c and 60c. Sold by City Pharmacy. 18t5

### BILL BOOSTER SAYS

**BILL BOOSTER'S CREED**  
 I AM FOR THE TOWN, FIRST, LAST AND ALL THE TIME! BECAUSE IT IS MY HOME; BECAUSE IT AFFORDS ME A LIVING; BECAUSE MY FRIENDS LIVE HERE. I WILL PATRONIZE ITS BUSINESS FIRMS, SUPPORT ITS INSTITUTIONS AND DEFEND IT FROM THE KNOCKERS. I AM A BOOSTER!

### Miss Walker to Return in Time For Institute

A letter has been received from Miss Martha Walker, head of the Geography Department, from Berkeley, California. Miss Walker stated that she had just returned from Yosemite Park and other places of especial interest to her and to the subject of geography. She will return some time about August 21 to make preparation for her work in the Panhandle Plains Teachers Institute.

### Floyd County Exes Perfect Organization

July 27, at chapel period a representative number of students from Floyd county met and organized the Floyd County Club as a unit of the Ex-Students Association of the W. T. S. T. C., and elected the following officers:  
 President—R. E. Castleberry.  
 V. President—Miss Vera Fry.  
 Sec'y-Treas.—Miss Frawline Broyles.  
 Mr. Tate Fry, Chairman of the Social Committee, promises to arrange for an enjoyable outing party in the very near future. All students from Floyd county are welcome.

Forty years of constant use is the best proof of the effectiveness of White's Cream Vermifuge for expelling worms in children or adults. Price 35c. Sold by City Pharmacy. 18t5

### Potter County Exes Organize

On Friday, July 27, a number of students met to organize the Potter County Club. The purpose of this club is to be an active and permanent organization which shall form a connecting link between the Alma Mater here, ex-students, and the general public. The aim of its members is to function with students of W. T. S. T. C. and also to make themselves known and heard in their home county. After a general discussion concerning the future work of the club the following officers were elected:

President—Carrie Bier.  
 Vice-President—C. C. Walden.  
 Sec'y-Treas.—Winnie Mae Wood.  
 Prairie Reporter—Edith Ratliff.  
 Each member is to be a personal "booster" for W. T. S. T. C., "booster" for Potter County in W. T. S. T. C.

A committee appointed for the purpose has already secured the names of a large number of the people eligible to membership in the club, people back at home and in the school. They are planning to get better acquainted with each other by having a picnic at an early date.

Premier Poincaré apparently believes the chief worrying over Germany's financial condition ought to be done in Germany.—Pittsburgh Chronicle Telegraph.

### Child-birth

Here is a wonderful message to all expectant mothers!

When the Little One arrives, you can have that moment more free from suffering than you have perhaps imagined. An eminent physician, expert in this science, has shown the way. It was he who first produced the great remedy, "Mother's Friend." Mrs. C. J. Harlan, Secaucus, N. J., says: "With my first two children I had a doctor and a nurse and then they had to use instruments, but with my last two children I used Mother's Friend and had only a nurse; we had no time to get a doctor because I wasn't very sick—only about ten or fifteen minutes." Use "Mother's Friend" as our mothers and grandmothers did. Don't wait, start today, and meanwhile write to Brookdale Regulator Co., P. O. 46, Atlanta, Ga., for a free illustrated book containing information every expectant mother should have. "Mother's Friend" is sold by all drug stores—everywhere.

### CITY PHARMACY

### The End of "Endless" Days

DOING farm work with an Allis-Chalmers tractor means more than raising bigger crops at less expense. You can do more and better work in less time and put an end to working days that hold you on the job long after dark.

Whatever the work to be done, you go into the fields with an Allis-Chalmers tractor and finish up on time! The powerful valve-in-head motor is as finely built as the engine of a motor car or truck. Rated conservatively, it is capable of developing and maintaining a power surplus which overcomes emergencies on either drawbar or belt. Two large side-inspection plates give quick access to crankcase; valves are easily reached for grinding or cleaning of carbon by simply removing cylinder heads.

All we ask is the opportunity to give you a demonstration of what an Allis-Chalmers tractor will do on your farm. Come in—ask us for the proof—and for details about our easy time-payment plan.

G. W. JOHNSON

## NEW-YORK PIER PIRATES DARING

Waterfront Freebooters Are Proficient at Looting Cargoes of Vessels.

### TAKE BIG FORTUNE IN GOJDS

Modern Thieves, With Value of Loot Mounting to Fifty Millions a Year, Make Captain Kidd Look Like Mere Piker.

New York.—None of the thousands who live quietly in the cramped apartments and narrow houses of New York city have any first hand knowledge of robbery, beyond enforced association with rent thieves, coal, highwaymen, and mercantile crooks.

They will, therefore, be surprised to discover that the populous waters about the city yield more than \$50,000,000 every year to the modern pirates and sea-rovers. All the buccaneers of antiquity, whose names and deeds are written fast into the texture of memory, never approached such capitalistic magnitude.

**Government Wages Campaign.**  
The modern thieves steal more each month than Captain Kidd, is said to have accumulated out of all his flagrantcies. In the last few years the federal government has waged a campaign against these thieves, aided by the railroads which deliver goods to tidewater, the owners of ocean-going ships and harbor craft, the companies operating piers and docks and, particularly, by the great marine insurance companies.

A number of gangs of river and harbor pirates have been broken up and a trickle of the robbers has run into the prisons, but the losses are as great as ever and promise to increase. Probably three-fourths of the stealing near New York city is aimed against exports.

The merchandise is consigned to Europe, to Asia, to Africa, to the furthest isles in the southern seas, and the outermost ports and lands. It may be months in transit. If part of a consignment is stolen who is to discover the crime until the bales and cases arrive at their far-off destination and are examined by receivers?

#### Pier Officials Go Crooked.

One of the typical ways of accomplishing such robberies is made clear by the case of a silk goods exporter of Fourth avenue, New York city. Five heavy cases of merchandise, valued at close to \$40,000, were sent to a pier to be loaded for South America. The cases got into the hands of a truckman who was working with the harbor thieves.

He took the cases to the pier, got a signed bill of lading from the shipping company, turned his truck about and drove off the pier again without even unloading. The trick was accomplished, of course, by means of collusion. One of the officials of the pier was working with the thieves and he had supplied the truckman in advance with a pass, which the guard at the land end of the pier was bound to recognize.

#### SMALLEST SHRINER

The smallest midget and the smallest Shriner in the world, known as Major Mite, caused more excitement when he called at the White House recently than many a notable has done. He declared he'd like to be a cameraman but found that he was but little taller than one of the average size cameras, being only 28 inches in height and weighing only 22 pounds. Major Mite is eighteen years old.

#### Lake Low; Blame Beavers.

Middletown, N. Y.—Shortage of water in Electric Lake, near Branchville, N. J., which has caused much inconvenience to the borough lighting plant has been traced to the operation of beavers. The animals have diverted a considerable amount of water from its natural channel by constructing dams.

**Ask Planes Keep Away From Church.**  
Santa Monica, Cal.—An appeal to city authorities to prohibit airplanes from soaring over his church during services has been made by Rev. W. H. Cornett, pastor of the First Presbyterian church. He says the splutter of the engines throws the hymns sung by his choir sadly out of harmony.

## WANTS 13-CENT STAMP

College Class Shows How U. S. History Is Bound Up in "13."

Post Office Department Petitioned to Issue Stamps of That Denomination Again—Gives Some Interesting Facts.

Washington.—Postmaster General Work has received from members of the American history class of the Shepherd college state normal school, Shepherdstown, W. Va., a petition that the Post Office department again issue stamps of the 13-cent denomination, which was recently abandoned.

The petition declares the entire history of the United States is bound up in the figure 13 and gives the following historical reasons why the 13-cent stamp should be issued:

America was discovered on the night of the 13th of the month.

The republic originally consisted of 13 colonies.

The first official flag had 13 stars and 13 stripes.

The American eagle requires 13 letters to spell it, as does also the motto, "E Pluribus Unum."

The first word to pass over the transatlantic cable was transmitted on the 13th of the month.

The silver quarter is written all over with 13. Around the head of Liberty are 13 stars; the eagle bears an olive branch with 13 leaves in one claw and 13 thunderbolts in the other. On his breast is a shield bearing 13 bars and in his beak is a ribbon bearing the motto with 13 letters, each wing has 13 feathers and it takes 13 letters to spell quarter dollar.

There are 13 letters in John Paul Jones' name.

There were 13 ships in the first American navy.

Perry's victory on Lake Erie was won on the 13th of the month.

The Stars and Stripes were raised over Fort Sumter on the 13th of the month.

General Pershing arrived in France on June 13, 1917.

The Thirteenth amendment to the Constitution freed the slaves.

It would not cost any more to make a 13-cent stamp than any other one.

The petition to Postmaster General Work also suggests several designs for the stamp, all commemorating the 13 colonies.

## FIND PREHISTORIC BUILDINGS

Ancient Homes on Isle Royale Believed to Have Been Used by Copper Miners.

Port Arthur, Ont.—The remains of homes believed to have been used by prehistoric copper miners, have been found on Isle Royale, in Lake Superior, says William P. Ferguson, archaeologist, of Franklin, Pa.

"Mining was in progress there at least 1,000 years ago; how much longer we do not know," says Ferguson. "We found pine trees six feet in diameter growing on the ancient rock dumps. There is an area two miles long and half a mile wide, over the whole of which we found remains of human habitations."

"There were larger pits which had been dug for homes. They range from eight to ten feet deep and were protected by carefully built stone walls which kept them free from water. The people incidentally used communal dwellings in some instances, at several of the pits were 20 by 40 feet and one, which may have been a fort was 20 by 50 feet."

"These people mined in solid rock the whole island over, but did not dig their shafts more than 20 or 30 feet deep. Their tools were black egg shaped stones of great hardness, such as are found on the north shore of Lake Superior but not on Isle Royale."

## SMYRNA ARMENIAN LOSS BIG

Twenty Millionaires Penniless—23,000 Missing or Made Prisoners by Turks.

Athens.—The losses of the Armenian community in Smyrna total \$118,000,000, according to a tabulation made by a committee under the direction of the bishop of Smyrna.

Sixty millions of this total is in real and personal property, and the remainder in intangible assets like stocks and bonds in Armenian companies operating in Asia Minor. The annual income of 8,000 Armenian families in Smyrna used to be \$7,500,000, of which it is declared that 15 per cent was given to charities and to the church.

Smyrna, which was the richest Armenian community in the world before the coming of the Turkish army, had 20 millionaires, but today every one of these men is virtually penniless. The largest losers are the land owners, textile importers and exporters of fruits, cereals, carpets and opium.

The number of Armenians killed in Smyrna, according to the committee, is 4,000, and the number of persons missing or made prisoners, is stated to be 8,000 men and 15,000 women.

The most prominent Armenian business men killed were Sarkis and Kasparian, land owners, and Gurunian and Panossian, textile merchants.

## Divorced and Remarried in Five Days.

Belle Plaine, Ia.—Divorced and then remarried within five days is the unusual record of Mr. and Mrs. Elmer R. Rusk. The Iowa law prohibits divorced persons remarrying within six months, so the couple crossed into Missouri for the second ceremony.

## COLLECTOR PAYS \$1,000 FOR RARE U. S. STAMP

First 10-Cent Stamp of 1847 Had Been Cut in Two to Pay 5-Cent Postage.

A United States postage stamp, said to be the only copy in existence, was purchased for \$1,000 recently at an auction sale held in New York. The name of the buyer was not announced, but it is stated that he has one of the best collections of the United States stamps in the country.

The rarity was a horizontal half of the first 10-cent stamp issued by the United States in 1847. A 5-cent stamp was issued in the same year, but the user of the stamp sold evidently had no 5-cent stamps when he mailed his letter from Baltimore, so he carefully cut the 10-cent stamp in two pieces and used one of the halves to pay the 5-cent letter postage. The stamp was on the original envelope. Had it not been on the envelope the stamp would probably not be recognized as genuine. A few copies of the 10-cent variety have been cut vertically and diagonally to serve for 5-cent postage and they are valued from \$200 to \$250.

An inverted center copy of the first United States airplane stamp, 24 cents, crimson and blue, issued in 1918, sold for \$515. It was unused, but not perfectly centered, for a 4-cent Columbian issue, 1893, printed in blue, the wrong color, \$111 was paid. This was slightly higher than the standard catalogue price, but it was a superb unused copy. An unused copy of the 24-cent, 1890 issue, with wide margins, sold for \$125. An imperforate copy of the 4-cent brown, 1902 issue, but with oblong perforations at the sides privately applied for machine use, sold for \$93. Only 24 copies of this odd variety are known.

Among the foreign stamps which brought high prices was a Bulgarian error-stamp, the 5-stotrick, rose, printed in the color of the 10-stotrick, which sold for \$101, and the same price was paid for a 15-centime French stamp, unused, in the rare blue green shade on green paper. For a choice special collection of Netherlands stamps covering the years from 1852 to 1867, inclusive, \$151 was paid. There were 179 stamps in the collection, nine being on original envelopes.

## SCULPTOR COMPLETES MEMORIAL TO DOUGHBOY

What has been conceded to be the most beautiful and impressive statue created to honor and exemplify the American war hero has just been completed by one of America's foremost sculptors, Alonzo Lewis. The memorial has been named "American Doughboy Bringing Home the Bacon," and was created by Mr. Lewis for the American Legion. It is to occupy an honored position (in a field of Flanders poppies) on the campus of the University of Washington. The statue is 15 feet high and has been cast in bronze.

The photo shows Alonzo Lewis, sculptor, putting the finishing touches on the statue.

## KEEP OFF STREET, PENALTY

White Plains Man Uses Back Door to Avoid Going to Jail.

Edmund J. Ryan, a New York broker, was directed by Judge Holden in the City court to remain off Grand street, the principal thoroughfare of White Plains, N. Y., for one year, because his wife, who is instituting separation proceedings, complained that he had annoyed her and their three children. Ryan was warned that if he was caught on the street on which Mrs. Ryan's home faces he would be sent to jail. He had to leave court by a rear exit to keep out of jail.

## Beethoven's Piano Found.

Beethoven's piano has just been discovered in Vienna, a dispatch states. Because of the master's deafness the piano was made especially for him so the sound would be louder than ordinarily. The dispatch adds it is probable the piano will be bought by Beethoven museum, housed in the once Royal library in Berlin.

## BEAUTY SPOT MADE MOCKERY

Honeymoon Island, in the Pacific Ocean, Once Knew All the Cruelties of a Convict Station.

"Honeymoon Island," the nickname for Norfolk island in the Pacific, is so called from a prevailing superstition that honeymoon couples who pass the first month of their married life there are certain to enjoy lasting happiness. Apart from the legend it would be an ideal place for a honeymoon, for it has been called the most beautiful spot on earth. This earthly paradise started its career as a convict station. The history of those early days is a tale of horror. Ruins of the famous "silent cells" are still to be seen. These cells, made of concrete, four feet thick, were just large enough to enable a man to stand up or lie down. On the walls can be seen the prayers carved by convicts. Known as "the tombs," the silent cells provided the worst form of punishment, and those confined in them rarely came out sane. Hardly a day passed without a murder taking place, and the convicts became worse than savages. Some even became cannibals. There are only eight families on the island. Money is very scarce. The islanders, however, are entirely self-supporting, and have everything they need, as well as a number of luxuries. The island has its own government, which is presided over by a governor sent out from Australia.

## ANOTHER GAIN FOR SCIENCE!

Information as to Respiration of Insects Said to Have Been Accurately Ascertained.

A scientist abroad has constructed a delicate instrument that registers and measures the respiration of insects. The apparatus is composed of a crystal tube with an aperture in the end. Imprisoned in this, the locust, in the effort to extricate itself, turns over, bringing his thorax immediately under a needle having a ball in the point. In this way, thanks to the ascending and descending movement of the needle working over a lever, the movements of the thorax are registered on a plate or metal leaf. It is thus possible to study attentively the quickness and the length of each breath of the insect and, what is more important, the strength and action. By this means it has been ascertained that insects respire in a manner directly the reverse of human beings. We are required to put the necessary strength into the inspiration, while expelling it is largely automatic. The locust, on the other hand, inhales automatically, but expels with more trouble.

A flat-rock fry is a great attraction for a picnic. Place a flat rock two or three inches thick on supporting stones so that you can kindle a fire underneath. Let the stone get hot enough to fry bacon and so grease the rock, then lay on a steak and surround it with

## Ready to Serve Meats

Why spend your time these hot days over a stove cooking Meats, when you can come here and choose from these choice, ready-prepared Meats at a saving over what you pay for those you must prepare.

Keeping a supply of these Meats in your ice box is a splendid plan.

### Vetesek's Market

## TYPE D GRINDERS

The Type D, McCormick-Deering feed grinders are designed especially for sections where kaffir corn, milo, maize, and other hard corns are raised. Ear corn can be fed directly into the mill without husking because the mill is designed to cut up the cobs and husks into small bits and feed them directly to the grinding plates. Type D grinders will also grind shelled corn and small grains without the addition of special accessories. Where kaffir corn is fed without grinding, the animals do not digest their food thoroughly. Both horses and cattle are likely to swallow their feed whole without chewing it because the kernels are hard. This means that they do not get the full nourishment from their feed. Type D grinders handle these crops successfully, and put them in shape to be digested easily.

For grinding corn in the husks, ear corn, shelled corn, and small grains. Made in two sizes with 8-inch and 10-inch grinding plates.

### THOMPSON HARDWARE CO.

Holcomb's Transfer, phone 28 or 238

B. S. Livingston and family and Mrs. Mark Foster and baby returned yesterday from a week's visit at Lockney.

Stay off the Fire Trucks unless you are a Fireman. E. Burroughs, Chief

The Osage river in Missouri is so crooked that at one place a farmer floats his produce six miles down to a market where he disposes of his load and buys what he needs; then he goes on down the river to a point where it almost touches his farm again. There a team of horses drags the boat across a narrow neck of land to the original starting point.

At the Olympic Theatre, Friday and Saturday, Aug. 10 and 11, "MAIN STREET," at popular prices, 10c and 35c.

The destiny of a man lies in his character.

The gossips do us this service: they punish the indiscreet.

A doctor observes that a generation that lives on wheels should eat more fruit and fresh vegetables than the generations that walked.

For bargains in Groceries, call 33. WEST EVELYN GROCERY.

The General Land Office of the Interior Department still does a "land office" business. Last year 12,904,821 acres of land passed from public to private ownership.

Out in Montana the judge of a United States court has ruled that the Volstead law is void so far as it limits the number of liquor prescriptions a physician can issue in a month. A similar decision was recently made in the national court in New York when the enforcement officers arrested a doctor for prescribing more than a half pint of alcohol for a patient in ten days. The point is taken that so long as the law permits a physician to use alcohol as a medicine it cannot properly limit the number of patients he may treat or interfere with his judgment as to the amount required in any particular case. Judge Bourquin in the Montana case held that such legislation violates the fifth amendment to the Constitution.

The British House of Commons, after debating Mr. Phillip Snowden's motion condemning the capitalistic system and demanding legislation looking toward the public ownership and the socialistic direction of all industry, voted it down by 368 to 121. The Labor party members generally voted for the resolution, but it got no support worth mentioning from any other source. The debate, though warm, was perfectly decorous.

An instrument has been invented that automatically sounds an alarm when the radio set to which it is attached receives a predetermined signal, such as the S. O. S. distress signal at sea. On ships that carry only one radio operator the alarm will be useful in calling him back to his instruments in case of need.

**Happy Happenings**

Marie, Lucy, Mable and Raymond Schmitz of Canyon spent last week in the N. W. Uselding home.

Mr. and Mrs. Potts and daughter, Annie Parr of Amarillo, spent Sunday at the H. G. Bowie home.

Ed Hendrix of Portales, N. M., was here Saturday on business.

Dr. and Mrs. C. K. Arnold of Petrolia are visiting at the parental P. J. Neff home this week.

Mr. and Mrs. Carlos Reynolds of Dimmitt spent the week end with Mrs. Reynolds' sister, Mrs. John Burgess.

Miss Lois Whitley left Saturday for Amarillo where she will visit for a while.

Floyd Cole of Plainview who has been working here returned to his home Sunday.

Miss Vannie Kate Groves of Canyon is visiting Miss Vivian Gatten this week.

Mr. and Mrs. Percy Walters of Colorado are visiting friends and relatives here this week.

Mr. and Mrs. C. L. Grounds and son Emit, were Tulia callers Tuesday.

J. P. Evans and W. G. Newton left Tuesday for Littlefield where they will be for a few days.

Mrs. F. C. Scott and son Fance, are visiting in Tulia this week.

Mr. and Mrs. W. O. Newberg of Tulia spent the week end at the C. L. Grounds home.

Mr. and Mrs. A. L. Harrison and family left Wednesday for Stratford where they will make their future home. We surely regret to have these good people to leave our town; but we hope to have them back in the near future.

W. W. Stephenson and family of Tulia visited relatives here Sunday.

Mr. and Mrs. W. H. Bellas left Monday for Amarillo where Mrs. Bellas will be under treatment of doctors.

Ruby Zachery of the Fairview community spent the week end with Ruth Grounds.

Mrs. A. E. Hays and son Albert Lens and Mrs. Manning and daughter Margaret Lee, of Dallas spent Saturday with Mrs. Hays' brother, W. H. Brown and family.

Mr. and Mrs. Avery were Tulia callers Monday.

Mrs. E. J. Miner of Roby, who has been visiting here for the past two weeks, returned to her home Friday.

Mr. and Mrs. Sam Selvidge left Tuesday for O'Donnell where they will visit for a while.

Mrs. Ex Brooks of Tulia is visiting her mother, Mrs. Bell, here this week.

Mr. and Mrs. D. J. Graham left Sunday for various points in Colorado. Frank Bell is carrying the mail this week.

Mr. and Mrs. C. S. Sanford and daughters, Ethel and Mrs. Guy Garrison, and Mrs. Sanford's sister, Miss Alice Wooten, left Tuesday for Cooke county to attend the funeral of Mrs. Sanford's and Miss Wooten's nephew, Hayden Wooten. Mr. Wooten was well known here as he had visited here several times.

At the conference in Chicago of the various elements that are interested in organizing the farmers and the labor unionists into a single political party, similar in its aims to the British Labor party, dissension triumphed. Partly by numbers and partly by audacity and determination the extreme communist wing got hold of the conference and brought in a platform so radical that it frightened many of the delegates. Mr. Ruthenberg, recently convicted of violating the Michigan law against syndicalism, was the active leader of the radical wing, which openly proclaimed its communistic principles. Most of the men who were connected with the original Farmer-Labor idea in politics withdrew from the conference and will not co-operate with the "Federated" Farmer-Labor party because it is too much controlled by Moscow.

France has at last ratified the naval treaty that the Washington Conference drafted. There was distinct hostility to it, but by uniting forces M. Poincare and M. Briand won a substantial victory. The Pacific treaty, or "four-power pact," was ratified without opposition.

Cash and carry is theoretically a good principle. A Philadelphia woman who tells her story in the Grocery World, however, is not entirely convinced. She made up a miscellaneous list of forty-one items that amounted to \$22.94 at the store to which she usually telephoned her orders. By purchasing at the cash-and-carry stores she saved on twenty-seven of these items a total of \$1.29; on five items she lost 66 cents; nine items she could not get. Her apparent saving was 63 cents, but she paid a boy 25 cents to carry her basket home. She actually saved 38 cents but had lost a good part of the morning and her spirits while she did the shopping.

Learn how to creep: you use the same motions in climbing.

**Week Transferring Randall County Land**

The following deeds as furnished the News by the Randall County Abstract Company, have been recorded in the County Clerk's office.

Mrs. Nellie F. Hurd to W. E. Stockstill, 275.95 acres of section 183, block 2. Consideration, \$20,604.44.

Henry Bradford to Tip Bradford, lot 5 and south 10 ft lot 4, block 42, Canyon City. Consideration—\$4,000.

A. F. Smith to S. N. Lively, lots 18, 19, 20, Block 40, Canyon City. Consideration—\$10,000.

**THE COUNTRY WOMAN'S CLUB**

The Country Women's Club met with Mrs. J. Tucek. An elegant dinner was served, and a special treat of ice cream and cake was served in the afternoon.

The Soviet Central Executive Committee has adopted a new constitution for Russia. As usual, no one except the leaders of the inner circle was consulted about it. The interesting assertion is made that the constitution is modeled on that of the United States, because it decrees a federal system of organization. But it is expressly provided that no state may secede from the union, and the chief executive powers are not in the hands of a president but in the hands of the Central Executive Committee. The eight federated states are Russia proper, including Great Russia and Siberia, the Ukraine, White Russia, the Georgian Federation, Armenia, the Tartar Republic and the republics of Khiva and Bokhara. There is a two-chamber congress and a body called the supreme court, which does not, however, have the power of invalidating legislation. The cabinet of commissaries is nominally responsible to the congress. There is no provision for direct election to any federal office, and the power remains, fixed inevitably with the Central Executive Committee, which is the directing body of the Communist party. There are no provisions for freedom of speech or of the press.

Every day brings some news of importance from Germany. The French occupied several of the Krupp properties at Essen in order to make sure that some seventy thousand tons of coal there did not find its way into Germany instead of into France. Some of the Krupp mills had to close because the coal for their use was also seized. The diplomatic agents of both Belgium and France told the German government that, if the Chancellor did not expressly repudiate the sabotage and other crimes in the Ruhr, all diplomatic relations between Brussels and Paris on one hand and Berlin on the other would be suspended. The Pope's nuncio in Berlin is busy trying to find some grounds for a settlement of the Ruhr question, but Premier Poincare—with the support of the Chamber—is determined not to submit to any mediation from the Vatican. The mark continues to fall—it has reached the fractional value of about one twelve-thousandth of a cent some days ago and was still dropping. The Ruhr episode still remained unsettled. The Germans make no move toward meeting the French demands, though the deadlock is more and more burdensome to German industry.

When a boy from North Dakota, Martin Tabert, stole a ride on a freight train in Florida he did something that led to issues he had no conception of. Arrested, jailed, leased out to a convict camp, beaten there so cruelly that he died, he did in fact accomplish through his agony and death a real reform. The state legislature has passed laws prohibiting the leasing of convicts either to private citizens or to corporations and has taken steps to improve the inspection and regulation of the state prison camps. Various officials who were shown to have administered the law corruptly were removed, others were indicted for violating the national peonage laws. The man who actually whipped Tabert so cruelly has been convicted of murder in the second degree and sentenced to twenty years in prison. The boy from Dakota did not die in vain.

The Florida Legislature has submitted to the people a constitutional amendment that prohibits levying income or inheritance taxes on any citizen or resident of the state for a period of twenty-five years. The amendment will be voted upon in November, 1924, and probably will pass, for there seems to be little opposition. Obviously the action is intended to attract wealthy residents to the state and is likely enough to succeed in its purpose.

THE AMERICAN PRESS ASSOCIATION

**OUR NATION MOURNS**

America is in mourning over the untimely death of President Warren G. Harding. American is a sympathetic nation, and national feeling is high on occasions like the death of a great leader. Without regard to political affiliation, the American people are in mourning, and each American feels a personal loss in the death of our President.

Warren G. Harding is the sixth President to die in office. Three have been shot by murderers who thought they were doing the nation a kindness. Three have died by hard work accompanying the office.

Woodrow Wilson gave his life to America as much as did Warren G. Harding. In times of stress and strain such as this country is going through for the past ten years, men like Wilson and Harding could not stand up to the great physical demands that the burdens of office imposed upon them.

Being president of a hundred and ten million of people is a big job—bigger than most men are able to undertake. President Harding will go down in history of one of the lesser lights in our presidential galaxy. He was not aggressive by nature. He loved his friends and rather please than hurt them. He was a good man in every respect and sought to do his duty as leader of the greatest nation upon the face of the earth.

Our new president, Calvin Coolidge comes into office probably better prepared to be a national leader than was Warren G. Harding, but his term of office will be short of duration, and his chances seem to be slight for receiving the nomination of the party next year.

As Governor of Massachusetts, Mr. Coolidge came into prominence overnight when he quelled the police strike of Boston. He is red headed and an Irish fighter. Many were the Americans who thought the republicans chose the weaker of the two men for president in the Harding-Coolidge combination. Out of respect for his former chief, Coolidge will carry out the Harding policies. No chance may be expected for months, and by that time nominations will have been made by the republicans for the 1924 campaign, and Hiram Johnson and Bob LaFollett will be in the saddle.

President Coolidge has the best wishes of a great people for the period that he will serve us as President.

Friday is the funeral day of President Harding. The nation is called upon to bow in respect in memory of the man who gave his life for his country, and died in line of duty while out trying to know better the country over which he exerted authority.

Thirty-six West Texas towns are going to be disappointed when the Tech board announces its decision, and some of them will set to work doing everything to create another new school. The Tech College is going to open under more favorable circumstances, perhaps, than any state school ever opened in Texas. But it is altogether likely that the people of this section are really expecting more than the school will ever be able to do. The new college is not going to revolutionize West Texas in a year, or even in ten years. Colleges are not made that way. Usefulness goes with age and experience. West Texas is behind the Tech up to this point. It may be the last college this section can hope to get from the state for several years. The people of West Texas should be as interested and work as diligently to see that the state schools in this section are properly maintained as they were in seeing the Tech bill passed by the legislature. It is not a good idea to put a thing in operation, and then go off and leave it. It is not a good thing to demand that the state create new institutions, and then complain because it takes money to support these institutions. West Texas will have two excellent colleges with the Tech and the West Texas

State Teachers College, and to make these college worth all that they should be worth to the state, they must be adequately supported, and West Texas people are the only to get behind this program of support.

The death of President Harding leaves the republican party without a leader. Several men will attempt to assume control, with a great contest between the extra radicals and the conservatives. It looks very much like a split in the republican party, as neither of these factions love each other, and are not likely to love each other much more by this time next year. The democrats are going to stand a mighty fine chance to win the presidency next year. The dry and wet question is going to be the big issue in the democratic ranks next year as to the selection of the candidate for president. The wets will never win, but may be able to forestall the nomination of a strong dry candidate. Politics are going to be hot in America next year.

It is stated that the farmers have lost three billions of dollars by the deplorable condition of the farm produce market. The farmer is usually the goat of political and financial manipulators, but he learning that party lines do not help him and he is becoming independent in his political thinking. In spite of the fact that the republicans firmly control Minnesota and the republican machinery had its former governor as a candidate for the senate, Mangus Johnson, a real dirt farmer, is elected Senator, and is going to make life miserable for the old guard.

Governor Neff's friends are attempting to start a boom for him as a candidate for president or at least vice president before the democratic convention next year. Take your choice. Just as well make it the presidency. A man from a solid democratic state in the south or southwest has as much chance for these nominations as does a man from Honolulu. Doubtful and eastern states furnish the candidates on winning tickets.

The buildings trades unions seem bent upon a program that will greatly retard building in this country. With building materials showing a decline, and business on a low ebb, and with farmers receiving unprecedented low prices for all farm products, these unions have demanded and are receiving scales far above the peak prices of the war and pre-war days. It looks like an attempt to kill the goose that laid the golden egg.

The News man has lived in Randall county since July 29, 1910, and it has failed just twice to rain good and plenty the last of July or the first of August. The prospect for rain this year is mighty slim. The row crop is suffering greatly on account of the extreme dry weather.

The continued dry weather all over Texas has badly damaged crops. The cotton has been cut by a third down the state. This is going to be one of the shortest crop years the country has ever seen. Yet farm products cannot be sold at a profit.

**SAME HERE IN CANYON**

Quannah Tribune-Chief: How would you feel if some day the firm or individual that gives you employment, told you that you were not needed any longer, and that another man, presumably just as good as you, could be engaged from either Vernon or Childress at a few dollars less per year?—What would you say?

The same principle applies to "Buying-at-Home." Every time you send money out of town, and fail to give the local merchant an opportunity of at least showing what he has to sell, you are doing exactly the same thing in a different way. Put yourself in the merchant's place, and you will know exactly how it feels.

Remember that you are earning your

**MISS HAMNER EXPRESSES OPTIMISM IN ANTICIPATION OF THE COMING CONSOLIDATED COUNTY INSTITUTE**

livelihood in Quannah, and that the merchants are entitled to the same consideration from you as you expect from your employer.

The next time you feel the inclination to send money out of town, just give the local merchant a thought. See which merchants are advertising in the Tribune-Chief and tell them what you want.

Advertisers in the Tribune-Chief want your patronage and invite you to deal at their places of business. It is through this business spirit of our valued advertisers, that it has been found possible to publish a semi-weekly for your benefit, a metropolitan newspaper which we have every reason to believe is appreciated by a large percentage of the population.

Buying at home means more than the hard economical problem which we must all face—there is another aspect to the question, the aspect we pointed out for your consideration in the opening paragraph of this article.

Buying at home also means that the industrial firms of the city should make it a point of buying all they can conveniently and economically procure in the city. Several of them do, and their action is highly to be commended, but are there not several firms which possibly overlook this important phase of local economics, buying at home?

Hospital statistics suggest that too many put the quart before the horse. —Washington Post.

### President S. P. Brooks Makes College a Visit

Doctor S. P. Brooks, president of Baylor University, made the West Texas State Teachers College a visit July 25.

Mr. Hill introduced Mr. Brooks as a co-worker in education. His earnestness of purpose in showing the great necessity of trained individuals in the teaching profession, showed where his interest lies. He mentioned the value of training soldiers for the American Army during the world war. He mentioned the fact that churches were continually putting on campaigns for the training of religious leaders to take the places of retiring individuals in church work. He announced the necessity for skill along all lines of work. He made the challenge of life to be that of holding oneself in training.

His earnest plea for volunteers to fight against ignorance marked him as a champion of education. Mr. Brooks said that the crowning success of a man's life was the ability to think for oneself. The ability to think accurately was the highest qualification. Mr. Brooks placed upon the American citizen.

Not only to think accurately was one of the qualifications that Mr. Brooks attributed to the good citizen, but in addition he pointed out the necessity of "The Long Look" of life. His illustrations to the two characters have come up from the ground to success had about them the personal element that made the speaker seem real to individuals who are here in preparation to accomplish the ideals of their "Long Look" of life.

Ford would be the appropriate candidate for the middle-of-the-road party.—Arkansas Gazette.

Dr. Barrett says failure to live to 75 is going to be a crime. Punished with death, too.—Greenville Piedmont.

If none of us worried any more about our debts than Germany does, there'd be no gray hairs before seventy.—Wichita Eagle.

Prohibition would be an issue in 1924 all right if either party could get the other to take the wet end of it.—Columbus Dispatch.

As a place to spend Sunday the church may have disadvantages, but it never turns turtle.—Richmond News Leader.

States should be able to get along with smaller institutions for the feeble minded now that so many of that class are behind steering-wheels.—Medford Mail-Tribune.

The Ford boom is like the Ford car. It is always in the wak of the big machines.—New York Tribune.

### Canyon vs. the Mail Order Houses

The local printing house offers you the same value and quality with better service than the out-of-town printer.

Why criticize the farmer for patronizing the mail order houses, when keen business men will let salesmen from the cities sell you your printed matter?

### Randall County News

#### WHITE WASH HELPS CLEAN DAIRY BARN

A coat of white wash applied to dairy stables improves the appearance and also adds to the cleanliness and sanitation a good deal. This can be done with little expense, if the material is on hand, some rainy day. The accompanying recipes offered by the Purdue dairymen give a good mixture for application.

The Government white wash is made as follows: Slack half a bushel of lime in boiling water, covering to keep in steam. Strain the liquid and add a peck of salt previously dissolved in warm water, three pounds ground rice boiled to a thin paste and stirred in while hot, one-half pound of Spanish whiting, and one pound glue dissolved by soaking in cold water and then hung over a slow fire in a glue pot. To this mixture add five gallons of hot water, stir well and let stand for several days covered from dust. It is best applied hot.

Ordinary whitewash is as follows: Slack 10 pounds quick lime with 2 gallons water. Allow to stand in pail for 1 hour before using.

These mixtures are best applied by

means of a spray pump but may be put on by means of a brush.

### Pleasantview Items

Most farmers are almost through cultivating.

Miss Belle Schramm returned home last week from Roswell, N. M., where she has been visiting with her sister, Mrs. Ruth Harris. Her little niece, Ella Ruth, returned with her.

C. J. Crawford made a business trip to Spearman last Wednesday, returning home Saturday.

Mrs. Wesley T. Gibson returned to her home Thursday at Childress, after spending a few days at the Ed Gibson home.

Mr. and Mrs. Dave E. Covington and son, Earl, visited friends at Sedan Saturday and Sunday.

Misses Dewey and Edith Gibson motored to Claude Saturday to visit with friends for a few weeks.

Mr. and Mrs. C. J. Crawford and daughter, Ura, went to Amarillo Wednesday, where Mrs. Crawford underwent an operation on her nose.

A large crowd attended our Sunday School Sunday. Everyone come next Sunday and bring someone with you. A singing will be held after Sunday School.

Those who complain about the accommodations at Ellis Island seem to overlook that those who make use of them do it voluntarily. The United States does not insist on immigrants.—Pittsburgh Gazette Times.

We can now understand why Dempsey didn't fight during the war. Uncle Sam didn't offer to pay enough.—Des Moines Register.

Oregon folks are all at sea because army worms are eating up all their navy beans.—St. Petersburg Independent.

Purity and healing power are the chief characteristics of Liquid Borzone. It mends torn cut burned or scalded flesh with wonderful promptness. Price, 30c, 60c and \$1.20. Sold by City Pharmacy. 1825

GRAIN CO.

### Golf Grounds Are Put in Shape and Ready for Playing of the Members

The Canyon Golf Club numbers only eighteen members, in spite of the fact that the Club has one of the best and sportiest golf courses in West Texas. With the opening of the fall season close at hand, invitation is being given to more people to get into the club and participate in this great national pastime.

J. L. Duflot has been working on the course and has put it up in the very finest shape for fall playing. In spite of the fact that he is soon to leave to be away on a leave of absence for the winter term, Mr. Duflot has given all of his spare time to work on the golf course to put it in excellent playing condition for his fellow members.

The field in which the course lies is owned by C. O. Keiser, who has generously donated the use of the grounds to the golf club without charge. Such a ground in a city course would cost the membership several thousand dollars, in addition to the high monthly dues. The dues in the Canyon Golf Club is just sufficient to keep the course in good condition.

According to the books of the organization the following are members of the club in good standing: T. V. Reeves, Grady Oldham, Wallace B. Clark, Ford Fronabarger, J. P. Hix, C. N. Harrison, C. F. Walker, C. H. Jarrett, C. W. Warwick, Hud Prichard, Shorty Prichard, J. W. Reid, D. A. Shirley, S. L. Ingham, C. O. Keiser, L. G. Allen, J. L. Duflot and Bob Moxley.

#### WILL HAVE HOG SALE.

The Duroc Jersey sale of H. C. Roffey and John Knight will be held at the sale pavillion on Friday, August 17th.

#### 27 BRICK SCHOOL BUILDINGS

Lubbock county leads the Panhandle, and doubtless all of West Texas in the number of brick school buildings in the county. During the past eight months 14 brick buildings have been erected making 27 in the county. There are 26 school districts in the county, 10 of them being independent.

The Russian people complain that readable and interesting newspapers in their language have ceased to exist. All they have is an "elaborate machinery for spoiling paper." An observer in Russia writes that under the present government the newspapers are merely the mouthpieces of a small despotic group; the really able journalists have given up their profession, and the daily run of printed matter is little more than a lot of colorless propaganda. Before the revolution the Moscow Ruskoje Slovo had a circulation of more than 1,200,000; today the combined circulation of all the soviet press is no more than that.

A dealer in electrical merchandise in Harrisburg, Pennsylvania, has discovered that the right side of his store, as you enter from the street, sells goods much more readily than the left side. People who enter the store usually turn to the right and are attracted by what they see in the show cases. The storekeeper now uses the left side of his store for staple goods only. Of

two telephone booths in the rear of the store the one on the right collected four times as many nickels as the other.

The United States "prohibition navy" on the Atlantic will soon consist of four revenue cutters and eight speed boats. The revenue cutters make only about fifteen knots, but the speed boats, which will act as scouts, are capable of 30 knots and should be a match for anything that the rum-runners can muster. The boats will mount guns of a caliber up to four inches and have been ordered to fire directly on the rum-runners instead of across their bows.
