

VOLUME LVII

HICO, TEXAS, FRIDAY, SEPTEMBER 26, 1941.

NUMBER 18

Appreciation is one of the biggest words in the English language. And reciprocity in the matter of favors, if it affects others as it does us, always brings a glow of satisfaction and a stronger belief in the goodness of human nature.

Newspapers are called upon at home and from abroad for numerous things in the way of cooperation. Sometimes we have to stretch a little to see our way clear to grant requests for publicity.

When our efforts and intentions are appreciated and bring reciprocal favors of a tangible nature, naturally the spirit of the other party or parties is brought out in the open for us to view and understand, without having to guess as to whether or not our cooperation has been appreciated.

Since being privileged to guide the destinies of the News Review over a period of a dozen years, we have always appreciated the true value of Tarleton College at Stephenville to this section, and the efforts being made by that college's heads to push ahead.

And when we receive press courtesies such as extended us last week, accompanied by a nice letter of appreciation, we are made to overlook many of the things which are unpleasant about business and living in general.

Stephenville, Sept. 18, 1941. Mr. R. L. Holford, Editor, The News Review, Hico, Texas.

Herewith you will find annual passes for you and Mrs. Holford to all athletic and lyceum events held on our campus for this fiscal year.

Probably a word of explanation about these passes is due you. Being a State institution, it is not the policy of John Tarleton College to issue passes to any persons except those who are rendering special services to the institution.

We will be happy to see you upon all occasions, and we deeply appreciate your kindness and your services to the college.

Sincerely, J. THOMAS DAVIS, Dean.

During our comparatively brief career in newspaper business we have had passes to many attractions and occasions. We have been privileged to attend a presidential inauguration in Washington, D. C. on the face of coveted ducaats extended without cost.

In the same mail with the above letter came an annual pass from East Texas State Teachers College at Commerce, and the customary urge from E. Paul Jones, Roy Ruppard and Harry L. Seay to attend the State Fair of Texas at Dallas on Prexy Day and take in the whole thing—midway, luncheon, floor show, Queen's Pageant and all—as a guest of the management.

Again we say it's a small world. Paul Reeves, now living at Clifton, came in to insert a want ad and casually mentioned a mutual friend who sent greetings.

But back to Noyes. We shall al-

Mail Carrier Delivers Last Letter

E. S. Jackson, rural route carrier out of Hico, is shown delivering a letter to the last box on the last route he served before retirement, that of W. D. Brown, Hico Route 5.

retirement is official. His route is being served in the interim by L. J. Chaney, substitute carrier, but will be taken over October 1 by J. P. Rodgers, clerk in the Hico post office for a quarter century, according to authorization received from the Department by Mrs. Jimmie L. Holford, postmaster.

THE WEATHER

The following report, submitted by L. L. Hudson, gives conditions locally as reported to the Chronological Service of the Weather Bureau of the U. S. Department of Agriculture:

Table with 4 columns: Date, High, Low, Prec. Day. Rows for Sept 17, 18, 19, 20, 21, 22, 23.

Total precipitation so far this year, 40.64 inches.

Army's Program In Mineral Wells A Big Radio Hit

MINERAL WELLS, Sept. 24.—The new radio show using army talent from Camp Wolters here has quickly established itself with thousands of listeners in widely-separated sections of the country.

The new program also includes Jack Amulung's Band along with the Camp Wolters talent. All talent is composed of former professional artists and entertainers from the worlds of music, radio and the stage.

In addition to the featured talent of all kinds, "Mike Maneuvers" also has a soldiers' mail bag skit that's proving to be a tremendous hit. The listeners are requested to write a "fan" letter to "Dear Soldier Boy," care Radio Program, Baker Hotel, Mineral Wells, Texas.

ways remember him for the story told about the time he wanted a piece of cheese cloth for some work he was doing in Dallas. Newman-Marcus was just a few doors away from his office, and—country boy fashion—he naturally supposed that a big drygoods store like that would have any item wanted.

Reports are current that it's going to be a hard winter. Proof is offered through the fact that doves have a heavy coating of feathers, and that rattlesnakes are rustling about earlier than usual and hunting places to hibernate for the winter.

W. R. Hampton, who lives south of town, believes the snakes ought to seek some other place to hibernate than his house, though. Last Saturday morning he brought a four-foot rattler to the office with the information that said reptile had knocked for admission at his window the night before, but that his wife requested that the visitor be not admitted, at least alive.

Tanks No Terror For Texas, Says Col. Thompson

The following statement was recently released by Colonel Ernest O. Thompson, commanding 141st Infantry, 36th Division, and Chairman, Railroad Commission of Texas.

"In the big battle this week at Flatwoods, La., the 141st Infantry, Blue, was attacked by twenty tanks from the Red Army. The 141st Anti-tank Company from Gonzales, Texas, armed with 37-millimeter guns knocked out and captured nineteen tanks, the other tank turned tail and escaped.

"This successful defense from tank attack shows me that tanks are not invulnerable. Our Texas troops do not get excited any more when tanks attack. Our Texas boys simply proceed to knock the tanks out. Tanks make an easy target for 37-millimeter guns and 75-millimeter guns. We use both and keep our anti-tank mobile defense so that it can beat the tank to the draw. That is, we get our work in before they can get their work in.

"There have been no deaths and dysentery in the 141st Infantry during these maneuvers. The men are in fine spirit and the actual fighting they are having is just exactly what they needed for morale.

"One day last week, the 141st Infantry marched 22 miles on foot, then were picked up by truck and hauled 46 miles to the front line where the fighting was going on.

"Troops have to be good to perform like that. Two hot meals and a sack lunch were served during this period. Only 10 men dropped out on the march. There were 2,000 men of the Regiment in this march.

"Our Regiment is looking forward with zeal to the big battle."

Mr. Jackson, who began his services as a rural carrier in Corsell County, transferred to the Hico route long enough ago that he is considered a veteran around these parts.

Stampede For Drivers' Licenses to Start Oct. 1st

Austin, Sept. 23.—Nearly half the people in Texas will start a stampede for new drivers licenses October 1.

There's really no need to get in a hurry about it. State Police Director Homer Garrison explained today. From Oct. 1 until Dec. 31, old licenses numbered from 1 to 450,000 will be renewed.

From Jan. 1, 1942, until March 31, those numbered from 450,001 to 900,000 will be renewed.

Those numbered from 900,001 to 1,350,000 will be renewed between April 1 and June 30.

Any license numbered from 1,350,001 upward will be renewed between July 1 and November 1.

Here's the procedure for getting your new license:

Obtain an application form from any Highway Patrolman or Drivers License Examiner, or by writing directly to the Department of Public Safety in Austin. The forms will also be available from police and sheriff departments, banks, and other public places.

Either print in ink or use a typewriter to fill out the application, enclose a 50-cent money order or cashier's check with it, and mail it directly to the Department of Public Safety, Austin. The new license, good for two years, will be mailed to you from Austin.

Persons renewing licenses will not have to take an examination unless they have a bad record of traffic violations and collisions.

But if you fail to renew your license in the stipulated time, you will be liable both to arrest for driving without a license and an examination.

Methodist Church

Promotion Day in the Church School will be observed Sunday morning. The pastor will preach on the subject: "In the School of Christ."

The evening service will begin at 7:30. The pastor's sermon subject will be: "How to Get Into the Church of Jesus Christ and What to Do After You Get In."

Visitors are always welcome at the Methodist Church.

Nears Commission

DAN W. HOLLADAY

Hico Aviation Cadet Completes Basic Training

Moffett Field, Sept. 26.—Aviation Cadet Dan W. Holladay, 21-year-old son of G. R. Holladay, Hico, is a step nearer his commission as a second lieutenant and pilot in the Air Corps Reserve, completing his basic flight training here today with a class of 158 young men.

He leaves this week end for Mather Field, Calif., where he will undergo the final 10 weeks of the 20-week Army Air Force pilot training program.

Holladay received his 10 weeks of preliminary flight training at the Ryan School of Aeronautics, Hemet, Calif., one of the Army's civilian elementary flying schools. He began his basic training at Moffett Field on July 14.

A graduate of Hico high school, he later attended Howard Payne and John Tarleton colleges. His flying time prior to enrolling as a cadet in April totalled approximately 35 hours. While at Hico high school he captained the football team his senior year.

With the completion of his advanced flying, he will either be assigned to an Air Force tactical unit, or he will instruct flying at one of the Army's several training schools.

World's Record Broken by Hen In Egg Contest

Stephenville, Sept. 24.—A world's record was broken at the John Tarleton College Poultry Farm Tuesday when an English single-comber White Leghorn hen dropped her three hundred forty-third egg to end a 357-day contest of egg-laying in which there were over a thousand hens from all parts of the United States.

This bird, which belongs to a poultry farm in San Antonio, seemed to cackle a little louder than usual as she stepped off the nest—maybe it was the imagination of the caretakers or maybe it was the fact that the feathered fruit factory knew that she had done something really big. But it was really the points she ran up over the long stretch which spelled victory for her—376.25 in all.

This phase of the Tarleton poultry plant, along with the rest of it, is under the supervision of Mr. T. A. Hensarling, who is a member of the Tarleton Agricultural faculty.

This marks the second time that a bird in the Tarleton contest has broken the world's record. Back in 1937 Lady Temple, another English single-comber White Leghorn, broke the record at that time with a total of 345 eggs in 357 days with a total of 371.25 points. Since that time another hen from another contest broke Lady Temple's record, but Tuesday the bird from San Antonio brought the honor back to Tarleton and dares any other animal of the species to take it away from her.

Stuart and Meador Back In Automobile Business In Hico

H. E. Stuart and Roy Meador, who have been associated in a used-car business at Stephenville since leaving Hico last year, have announced that they are "back home and glad to be here." They have a display advertisement in this issue of the paper calling attention to their shop equipment, and their offerings in new and used cars and other services.

The business will be conducted at the former location of Jones Motor Company, six blocks from the post office on the Stephenville Highway. Mr. and Mrs. Stuart have moved into the upstairs apartment in the attractive stone building erected there by Mr. Jones when he operated at that location.

Mr. and Mrs. Meador plan to move down from Stephenville as soon as possible, their arrangements pending making arrangements for a residence.

Baptist Laymen Of Brotherhood To Talk Sunday

The Brotherhood organization in the Hico Baptist Church will have charge of the regular service that Sunday night, 7:30, according to an announcement by the pastor.

There will be no sermon by the pastor, but brief talks by laymen as follows:

"Religion and Business a Help to Each Other," by J. N. Russell.

"The Christian Making a Good Citizen," by R. B. Jackson.

"What the Bible Has Meant to Me," by J. B. Pool.

Besides the congregational singing, there will be two numbers by a male quartet.

Everybody is invited and urged to attend.

Highway Work On New Route of 281 Progresses Rapidly

DEFENSE BOND QUIZ

Q. Do the retail stores receive any fee or percentage for the sale of Stamps?

A. No. Some retail stores are offering their facilities as a patriotic service, just as banks, savings and loan associations, and others are giving their help in the sale of Defense Bonds.

Q. How can I form the thrift habit necessary for me to buy many Defense Bonds now, to help the Government?

A. The easiest way is to instruct your employer or banker to hold back a small fraction of your salary or other income. Even 10 cents a day and a dollar on your birthday will amount in one year to \$37.50, the purchase price of a \$50 Defense Bond. Bigger savings buy bigger bonds.

NOTE.—To buy Defense Bonds and Stamps, go to the nearest post office, bank or savings and loan association; or write to the Treasurer of the United States, Washington, D. C., for mail-order form.

WPA Lunch Room Expected to Open In Near Future

The following article was submitted to the News Review with a request for publication this week:

"There shall be somebody around Monday afternoon for what you have for the lunch room in Hico.

"We hope to have it running not later than Monday week.

"We have already received the following materials and several more have promised material:

"3 gas stoves, 1 electric refrigerator, 1 (2 gal.) crock, 1 (1 gal. crock, 1 (6 hole) muffin tin, 1 bottle opener, 24 cup towels, 8 dish rags, 13 hot pot holders, 4 tin cups, 1 measuring cup, 20 dessert dishes, 45 glasses, 1 biscuit cutter, 1 wooden spoon, 5 cooking spoons, 1 egg turner, 1 butcher knife, 1 bread knife, 4 paring knives, 4 cooking forks, 1 chore boy, 1 egg whisk, 3 potato mashers, 1 butter knife, 9 knives, 21 forks, 28 teaspoons, 2 tablespoons, 1 strainer, 14 plates, and 4 teacups.

"We are indeed grateful for the cooperation of the people of the community.

"R. B. JACKSON"

Tigers' First Conference Go At Dublin Tonight

Hico High School's football squad will go to Dublin tonight (Friday) for the first conference game of the season. Many fans are expected to accompany the Tigers to Dublin for their first out-of-town game of the season.

While a hard game is expected with Dublin, the dope gives the locals a chance with their ancient rivals who have been victorious in similar struggles during the past few years. The Tigers played Stephenville a good game here in the opener Friday night before last, yielding to a 13-0 score in the visitors' favor while outranking them on first downs and in other ways.

Stephenville defeated Dublin last Friday night by a 18-0 score, while the Tigers were barely nosing out on a Class B team from Gustine to the tune of 7-6. Gustine's team, however, was strong for its class as they won championship in their district last year and went through a bi-district engagement creditably.

C. of C. Meeting Next Tuesday At Russell Hotel

S. W. Everett, entertainment chairman, and Rev. Alvin Swindell, secretary of the Hico Chamber of Commerce, have announced that body's regular monthly meeting for next Tuesday evening, Sept. 30, at the Russell Hotel.

Time for the dinner has been set at 7:15 p. m., with the meeting following immediately afterward. Matters of interest to all members will come up at that time, according to J. N. Russell, president of the organization, although no special plans have been made for out-of-town speakers or entertainment aside from routine matters.

All members are expected to attend, say the officials.

Future Farmers Elect Officers At Sept. 10 Meeting

The Hico Chapter of the Future Farmers of America met September 17, 1941 and elected Pete Russell as President to serve for the coming school year.

Other officers elected for this year were Sanky Latham, vice-president; Fred Jagers, reporter; Raby Bruner, treasurer; Walter Ramey, secretary; Hubert Pittman, farm watch dog; Donald Lewis, parliamentary; Fred Ray Hyles, song leader; and J. R. Glover, historian.

The past two weeks the boys have been selecting projects and supervised practice programs.

Both V. A. classes have spent some time at the home of Mr. Fred G. Schwarz, learning to cull chickens.

FRED JAGGERS, Reporter.

Base Is Almost Ready to Top; Bridge Steel In

D. W. Phillips, foreman of the Burnham Construction Company of Naples, Texas, was in Hico Thursday morning making preparations for moving in men and equipment for rip-rap and grass work on Highway 281 south of Hico.

Mr. Phillips stated that there would be about 12 men in his crew, and that they would be here a month and a half. The Naples firm holds a sub-contract under the Dean Word Construction Company, original bidders, who are rapidly approaching the final stages of their work on this 8-mile stretch of road between Hico and Olin.

Gravel hauling has been in progress for the past few days on the north end of the road, where this treatment was necessary, and the entire stretch will be ready next week for the application of six inches of flexible base, according to Bryan Carl, foreman of this work for the Word firm.

Application of the flexible base will start as soon as a rock crusher is released from a job now in progress by the same firm near Elgin. The asphalt topping will be applied as soon as the base is ready if weather conditions permit, Carl said.

Progress on the big bridge over the Bosque River, delayed through inability to secure steel shipments on account of defense priorities, is expected to be fast now that the steel needed has begun arriving.

Arrival of materials has been anxiously awaited by Leo P. Cloud Jr., in charge of this phase of the work, and the big structure is expected to take shape rapidly within the next few days. All culverts and other structures have been completed for some time.

Barricades were placed at the intersection of Highways 281 and 67 at the Hico Service Station Thursday, and will be erected across the highway while work is in progress at the new intersection near the Moon & Eubank Station. Traffic will be detoured around by the school buildings while the regular route is under construction.

Editors At Fair To Be Entertained Press Day, Oct. 4

Dr. J. J. Taylor, editor of The Dallas News, will officiate as toastmaster for the Press Day dinner at the State Fair of Texas on opening day, Saturday, Oct. 4. Simultaneously with Dr. Taylor's acceptance, Harry L. Seay, fair president, announced that Gov. Coke R. Stevenson had accepted an invitation to address the 500 or more Southwestern newspapermen at the dinner.

Texas, Oklahoma, and Arkansas will be represented at Press Day, the State Fair's traditional gesture to newspapermen. The editors will be guests of the fair at Midway attractions during the afternoon. The dinner will be held at 6 p. m. in Cafe Esplanade, the huge night club now being prepared for the fair.

Besides Governor Stevenson's address the visitors will hear the cafe's attractions, Orrin Tucker's orchestra and Bonnie Baker, and will see the six-act floor show. Following dinner the newspapermen will be honor guests for the Queen of Queens Pageant and Coronation in the Cotton Bowl, after which they will attend Earl Carroll's Vanities, the auditorium attraction.

There will be a minimum of speaking and Governor Stevenson's address will be brief. He will be introduced by Mr. Seay.

Future Farmers Elect Officers At Sept. 10 Meeting

The Hico Chapter of the Future Farmers of America met September 17, 1941 and elected Pete Russell as President to serve for the coming school year.

Other officers elected for this year were Sanky Latham, vice-president; Fred Jagers, reporter; Raby Bruner, treasurer; Walter Ramey, secretary; Hubert Pittman, farm watch dog; Donald Lewis, parliamentary; Fred Ray Hyles, song leader; and J. R. Glover, historian.

Carlton

By Mrs. T. C. Thompson

Mr. and Mrs. Jack Upham were business visitors in Dublin Monday.

Mr. and Mrs. Dee Pollard and daughter of Lubbock are visiting his parents, Mr. and Mrs. J. O. Pollard this week.

Mr. and Mrs. Lee Turney of Lewisville and Mr. and Mrs. Leo Finley and children of Walnut Springs spent Sunday with Mr. and Mrs. Hobdy Thompson and children.

Mr. and Mrs. M. D. Manning Jr. of Austin spent the week end with their parents, Mr. and Mrs. Roach Clifton and children. They also spent Sunday with Mr. and Mrs. M. D. Manning Sr. of near Hamilton.

Mr. and Mrs. Lee Reeves left Friday for Vernon to visit his brother, Hubert Reeves, and family. They expected to do some big fishing while there at Lake Kemp.

Jake Roach of Brownwood spent the week end with his parents, Mr. and Mrs. Tom Roach.

Mr. and Mrs. Chesley Kennedy of Iredell spent Saturday with their parents, Dr. and Mrs. F. P. Kennedy, and Mr. and Mrs. Rance Sowell.

Mrs. Cora Prater of Stephenville is visiting friends in Carlton this past few days.

Mr. and Mrs. Truitt Gibson and children of Corpus Christi have been visiting his parents, Rev. and Mrs. R. H. Gibson.

School has dismissed until Oct. 6th so the children can help gather the cotton crops.

Rev. R. H. Gibson and wife, Mr. Truitt Gibson and children are visiting relatives in the West.

Mrs. Betty Fisher spent last week with Mr. and Mrs. Grady Laws and family of Cisco.

Mrs. Mary Lemley and daughter of Cleburne were here Monday visiting her parents, Mr. and Mrs. Martie McPherson.

T. J. McKee and Dearth Thompson of Wichita Falls spent the week end with homefolks.

Brooks Wilhite left for Grand Prairie Wednesday, where he has accepted work.

Mr. and Mrs. Raymond Lowe and daughter of Hico spent Sunday with Mr. and Mrs. Lawrence Adams and children.

Mr. and Mrs. Jeff Souder and son of Dallas spent the week end with her mother, Mrs. Clyde Thompson, and children.

Miss Kalene Allred, who has been visiting her aunt, Mrs. Kermit Smith, and husband at Sentinel, Okla. the past few weeks, returned home Sunday.

Millerville

By Chas. W. Giesecke

Mrs. G. W. Phipps returned home Sunday from a visit with her sister at Plainview and a daughter at Bisbee, Arizona.

Mr. and Mrs. C. G. Land of Dallas visited his mother, Mrs. Land, who is very ill at the home of her daughter, Mrs. Marion Elkins.

Braxton Miller of Waco was here this week and paid a short visit to his sister, Mrs. Higginbotham.

Mr. Billy Nix, who is attending a school at Dallas is spending this week at home. He will go back to school next week.

Edward Williams' brother and family of Clairette visited him Sunday.

Mrs. S. S. McCollum has been on the sick list for several days.

Mr. and Mrs. Abh Glover are in a Dallas hospital for several days.

Mr. and Mrs. E. G. Shaffer and daughter, Miss Lelia, visited Marta Hipp and family of Unity Sunday evening.

We must arm ourselves against the forces of evil and destruction. You can help by buying Defense Savings Bonds and Stamps regularly.

Nearly \$250,000,000 was spent last year in Texas in the drilling of 9,775 oil tests in every section of the State.

The best investment you can find: Defense Savings Bonds and Stamps. Buy them regularly.

SAVING MONEY With Cotton Bags

Protect your bedding with covers made from Cotton Flour, Sugar, Feed or Meal Bags. The coil springs cover protects the mattress from rust stains caused by the springs. The mattress cover helps prevent the soiling and fading of the mattress. The quilted mattress pad shields the mattress from wear and helps to keep it clean — also makes a softer, smoother bed. Pillow protectors and pillow slips can also be made of Cotton Bags. All these covers can be washed easily and your bed will always be fresh and clean.

Other Cotton Bag Sewing ideas are illustrated in a free booklet. Write to National Cotton Council, Box 18, Memphis, or Textile Bags, 100 N. LaSalle St., Chicago.

Dry Fork

By Johnnie Ruth Driver

Mr. and Mrs. Bill Needham and family of Hico spent Sunday with Mr. and Mrs. Jack Sanders and family.

Mr. and Mrs. Travis Columbus and family returned to their home Sunday after spending two weeks with his father, J. P. Columbus.

Mr. and Mrs. Giles Driver and daughters, Opal and Johnnie Ruth, attended the Driver and Lockhart reunion at Stephenville Sunday.

Giles Driver was a business visitor in Hamilton Wednesday morning.

Duffau

By Mrs. W. A. Deskin

Rev. and Mrs. Carl Grissom of Fort Worth spent Saturday night in the home of Mr. and Mrs. Lem Weeks.

Sam Anderson, who has employment at Refugio, spent Monday night and Tuesday with his family.

Several from here attended the Baptist Association meeting last Tuesday and Wednesday at Morgan Mill.

Mr. Mose Cole is very ill at this writing.

Earl Moore, who is attending school at Arlington, spent the week end with his family.

Mr. Lester Herrod left Tuesday for Arlington to enter the airplane assembly school.

Mr. and Mrs. J. V. Starnes visited Mr. and Mrs. Arnold Hale of Stephenville Saturday.

Mr. and Mrs. R. O. Wyson and Mary Jean visited relatives at Lingleville Sunday.

Those visiting Mr. and Mrs. Alva Deskin Sunday were Mr. and Mrs. A. B. Robertson of Hico, Mrs. Jack Owen of Hemit, Calif., and Mr. and Mrs. Earl Bowman of Artesia, New Mexico.

Mr. and Mrs. W. C. Pouts visited his sister, Mrs. Ed Meisenheimer, and husband of Carlton Sunday.

J. B. Moore who has been in the CCC camp at Floydada, returned home Saturday to attend school.

Eugene Anderson who has been employed at San Angelo, also returned home Saturday to attend school.

Mrs. Roy Lawrence of Iredell spent Saturday with her parents, Mr. and Mrs. W. C. Pouts, and brother, -oub B.

The Duffau Home Demonstration Club met with Mrs. L. J. Jordan Thursday.

Mr. H. H. Hancock visited relatives in Fort Worth the past week.

Miss Hannah Nabors, the new Erath County Agent, and Miss Roberta Martin gave a demonstration on school lunches last Friday.

Buck Springs

By Lorene Hyles

Bobby Ratliff visited Wendell Ray Knight Sunday.

Lorene Hyles visited Annetta Oakley Sunday.

Mr. and Mrs. Stanford visited Mr. and Mrs. Harper Pace and daughter, Mattie Lou, Saturday night.

Mr. and Mrs. Carrol McCleendon visited in the home of Mrs. N. J. Land Sunday, who has been suffering for some time.

Mr. and Mrs. Fred Hyles and family of Unity community and Mr. and Mrs. R. D. Massingill and family of Comanche visited Mr. and Mrs. C. F. Hyles and family Sunday.

Mr. and Mrs. Carol McCleendon attended the State singing convention at Stephenville Sunday afternoon.

COMING EVENTS

Sept. 29—Joe Louis vs. Lou Nova for the heavyweight championship of the world, Polo Grounds, New York.

Sept. 29—American Bar Assn. opens 64th annual meeting at Indianapolis.

Oct. 1—First game of the World Series, Yankee Stadium, New York.

Chance for a bright idea

There's only one reason why so many people use advertising — they haven't found a cheaper way to do what advertising does.

And what it does is save time in finding enough customers to keep factories and stores busy.

There's a chance here for a bright idea.

But it's got to be mighty good. Advertising is.

SIX INCH SERMON

REV. ROBERT H. HARPER

The Fulfillment of History: The New Jerusalem.

Lesson for September 28: Revelation 21: 1-7, 10-12, 22-24.

Golden Text: Revelation 21: 7.

It is said the ancient Jews believed that God would renew the world in 7,000 years. The preceding lesson gives sufficient assurance that things will not go on all ways as now. In the present lesson we find the inspired seer beholding "the fulfillment of history" in the "New Jerusalem."

John saw all things made new—rather, restored to their pristine beauty and purity. It is difficult to understand just what is meant by a new heaven and a new earth—these would imply a vast alteration in the universe. It is enough to know that the redeemed will enjoy marvelous and unending blessings in the new order of things—tears, sorrow, pain and death shall be done away. Certainly the resurrection would imply that death would be abolished.

The New Jerusalem, twice mentioned as "coming down out of heaven," means the Christian church in a state of purity and perfection. It is inspiring to read in John's vision the fulfillment of the Master's promise that the gates of hell should not prevail against the church.

There will be no temple, though, for none will be required. Men will no longer need to approach God through ritual and sacrifice. For He will dwell always in the midst of his people.

Certainly in this appalling time it is good to read of the nations bringing their glory into the New Jerusalem. Then let us renew our hope of a warless world and of redeemed nations as well as individuals—in the new order of things.

Falls Creek

By Lula Mae Coston

Herbert Martin of Abilene spent Thursday night with his sister, Mrs. J. A. Massengale.

Martha Ann Abel of Fairy spent the week end with Lula Mae Coston.

Mr. and Mrs. McClain of Cameron spent Friday with Mrs. W. W. Foust and Mrs. Foust's brother, Mr. Jim Stutts, returned to Cameron with them.

Marguerite and Dorothy Lewis of Unity spent Sunday evening with Virginia Coston.

Mr. and Mrs. Joe Ryan and daughter, Joyce, of Meridian spent Sunday with Mr. and Mrs. J. D. Ryan.

Mr. and Mrs. Stubbiefield and Mr. and Mrs. John Trammell and daughter, Mildred, of Red Hill spent Sunday evening with Mrs. W. W. Foust.

Mr. S. White returned home the first of the week from Munday, Texas.

by Miss Stella Jones, Local Correspondent

Mrs. Homer Woody left Thursday for California, where she will visit relatives.

Mrs. Della Phillips, after a visit to her mother, Mrs. Squires, and other relatives, left Thursday afternoon for her home in Crystal City.

Mrs. D. W. Appleby visited her son, Charles, this week, who is in the Army hospital at San Antonio. The Iredell Band went to Cranell's Gap on Thursday night and played for the P-T. A. Some of the parents went also.

Mr. and Mrs. Ralph Echols moved to one of the rent houses of Mr. and Mrs. Kraemer, Mrs. Rucker, who lived north of town, bought where they lived.

The farmers have started picking cotton. Several bales have been ginned.

Mr. and Mrs. Bill Conger of Tucson, Arizona, Mrs. Ruby Schottlander and Miss Dora Evans of Midland visited their sister, Mrs. James Wyche, Tuesday.

John Chewning returned from Dallas Saturday after a two weeks visit to her son, Ellis, and family. They brought her home.

Mrs. R. S. Echols was called to Orange Friday. Her father, Mr. White, is very ill.

"Dad" Newman came in Saturday for a visit of ten days. He is in the training camp close to San Antonio.

Mrs. Kathleen Hughes is working in Fort Worth.

Mr. Andrew Jackson has returned from Beaumont, where he has been with his uncle, Mr. Thad Deatherage, who is ill.

Mr. and Mrs. W. H. Loader have returned from Dallas and Fort Worth where they visited their children.

Carl Bryan and two other men from Dallas spent Friday night here and fished.

Mrs. Walter Sadler spent the past week end in Dublin with her brother, Mr. Shields.

Miss Grace Simpson of Dallas was here Saturday.

Mr. and Mrs. Billy Joe Fouts of Dallas spent the week end here with relatives.

Mr. Will Myers returned from San Antonio Saturday, where he visited.

Mr. and Mrs. Ray Gibbons of Myersville are visiting their parents, Mr. and Mrs. Gibbons, and Mr. and Mrs. Webb, Mr. and Mrs. Gibbons, who accompanied their son Roy and wife on a visit to Mexico, have returned.

Mr. and Mrs. Delbert Thompson, who lived in San Antonio, came through here Friday going to Dallas. They will move there Sunday as he has work. They went to Dallas to get an apartment.

Mr. and Mrs. Wallace McDonel moved to Dallas this week.

Mrs. A. L. Harris and daughter, Miss Maggie, spent the week end

in Meridian with their daughter and sister, Mrs. John Appleby.

Messrs. Charley Conley, Ernest Allen, J. D. Gregory, and Homer Woody attended a ball game at Hico Friday night.

Mr. Ed Stephens made a business trip to Gorman this week.

Mrs. C. R. Conley was in Stephenville Wednesday to see her daughter, Charlene.

Mr. and Mrs. Bert Crump, her sister, Miss Mae Chaffin, and their brother, Willie, all of Dallas spent the week end with their parents, Mr. and Mrs. G. W. Chaffin.

Mrs. W. R. Newsom is in Odessa with her husband, where he is working.

Eudelle Horton spent a few days recently with Miss Stella Ross, who lives east of town, and when she got ready to leave, Miss Stella presented Eudell with a pretty Persian kitten Eudell named it after Miss Stella. She says it is a smart kitten and she is proud of it.

Mr. and Mrs. John L. Tidwell spent Sunday in Dallas with relatives.

Misses Josie Harris and Theta McElroy were in Hico Saturday afternoon.

Wednesday, Sept. 17, was officers training day for the W. S. C. S. at the Methodist Church, from 10 a. m. until 3:30 p. m. Mrs. Bradley led the devotional, Rev. and Mrs. Morphis came, Mrs. Morphis gave a good talk on the work and election of the officers. The following ones were elected: president, Mrs. Jack Blakley; vice-president, Mrs. Bill Heim; corresponding and recording secretary, Mrs. Pike; secretary of Christian social relations and local church activities, Mrs. B. L. Mitchell, secretary of literature and publications, Mrs. Ray Tidwell. As Mrs. Morphis would call these names she would present them with a little candle. A large pan was nearly filled with water, vines and flowers were draped around the sides and it looked very pretty and was placed on a table. The candles were in a piece of bark and were lighted and placed on the water and supposed to float. The service was very impressive. At 12 we had lunch which all enjoyed. At 1 p. m. we had a program on faith which all enjoyed. We meet every Monday afternoon, and we have interesting meetings. All the ladies of the Methodist Church are invited to attend.

Mr. and Mrs. Roy Lawrence and his sister, Mrs. Frank Cunningham and children spent Sunday in De Leon with their sister, Mrs. Lelan Neighbors.

Mrs. Myrtle Duncan is working in Austin.

Mr. Charlie Woods of Seymour is here visiting his brothers, Pat and Bill.

Mr. and Mrs. Marlan Benson of Louisiana came in Sunday for a

visit of a week with her parents, Mr. and Mrs. W. D. Oldham, and other relatives.

Mrs. Deatherage returned Saturday from Cleburne, where she visited relatives.

Mrs. Jack Blakley and son spent a few days in Meridian. She was at the bedside of her cousin, Miss Faye Young, who was operated Friday at the Holt Hospital.

Work is progressing nicely on the new residences of Mr. and Mrs. Henry Newsom and Mr. and Mrs. Ralph Echols.

Mr. and Mrs. Charlie Adkinson's residence is near completion in the south part of town.

John Richard O'Quinn was born in 1857 in Henderson County, Texas, and was married to Barbara Allen in 1891. To this union three children were born. One son and one daughter preceded him in death. His wife and daughter, Mrs. Jim Locker, survive. He leaves five grandchildren and five great-grandchildren and some other relatives.

He professed religion and joined the Methodist Church in 1912 and was ever faithful to his Lord and his church. He lived a quiet life, and did all the good he could for all. He was kind to his family and friends, and he numbered his friends by the people he knew. He and his wife made their home with their daughter, Mrs. Locker. He was ill for some time and was well taken care of by his relatives and friends. He lived out his life. God called him and he was ready to go to be forever at rest. He passed away Saturday night, September 20. The funeral was held Sunday afternoon at 2 p. m. in the Methodist Church with Mr. Barrow of Hico in charge. Rev. Morphis officiated. The floral offerings were beautiful. The pallbearers were Messrs. R. J. Phillips, J. E. Lawrence, T. M. Tidwell, Allen Dawson, and Clem McAden. Interment was in the cemetery east of town. His wife and daughter are no doubt very lonely without him but they know they will see him. They have the sympathy of their friends. Several out-of-town relatives attended the funeral but I failed to get their names.

also because results obtained from the addition of weight aren't nearly so spectacular as those derived from a reducing orgy. It has been my consistent observation, however, that the thin man has a far more difficult time putting on weight than his fat brother has in taking it off.

Granted that your problem is one of increasing your weight, you must first decide which of three types of leanness has you in its clutches: hereditary leanness, functional leanness, or careless leanness.

If you consistently remain at the same weight year in and year out, and if you have been unable to put on weight through rational methods, your thinness is undoubtedly hereditary. It is, therefore, completely normal and you have no cause for worry.

Gravitation may be caused by ill health or some functional disturbance. If you are underweight and continue to lose over a period of months, see your doctor and your dentist. They can determine whether or not your thinness is due to teeth, your tonsils, a glandular disturbance or some other infection which requires professional treatment.

Your condition, like that of most thin people, may be the result of careless habits in the matter of diet, exercise, relaxation, and sleep. The addition of weight in your case is the result of combining the proper elements of these four all-important factors. I believe that fully 50 per cent of all underweight persons can correct their condition. The remaining 50 per cent are naturally slender and will remain that way.

### 'Keep Fit' for Beauty

If I were asked to give one brief rule to all women for more beauty, richer life, deeper contentment, a more glorious grandchild, a more life-long happiness, I should round it up in one short and simple phrase: "Keep fit." It is truly remarkable that with the increased responsibilities of this age, women are able to look and feel younger and more attractive than ever before. The modern matron regards her home responsibilities of primary importance but she seldom allows them to eclipse her responsibility to herself.

I am most thoroughly in accord with the woman who seeks to make herself more beautiful, for in seeking greater beauty she is also seeking better health. Beauty and health go hand in hand and it makes little difference which comes first. It is not at all unusual to see a modern woman walk out in her smartest clothes at any time of the day for a chat with a neighbor, a shopping tour, a lecture, or a visit to the movies. She has learned the danger of mental fatigue and she recognizes the value of relaxation. If her household tasks are causing her to become unduly tired, she takes time out and after an hour's diversion returns refreshed and invigorated, capable of accomplishing more in the next hour than she otherwise would in the entire afternoon. That is why Mrs. Modern is young and active at an age when grandmother was an "old lady."

If you find your household tasks becoming too great a burden during the day, declare a "walk-out!" Rearrange your schedule, if necessary, so that you can take an hour or two off during the afternoon and still leave time for your regular duties. It's a sure-fire method of warding off that premature old and haggard look and of maintaining youth and beauty!

### Eat to Live—Don't Live To Eat

In the matter of diet, my opinion has always been, "If you like it, eat it," but I naturally expect this rule to be tempered with a little common sense. Eating properly is an amazingly simple habit that comes quite naturally to most of us. But, as in everything else there is a large group of people who eat to the point of overindulgence. Dissipation is not merely a matter of late hours, wine, women and song. Many a person who feels certain that he is leading a temperate life is intemperate in his choice and the amount of his food. These people literally gorge themselves with food, feeling that nothing less than a 12-course dinner could appease their appetites. Unfortunately, we have no gauge on the body to tell us just what our food intake should be, but we do have the equivalent for such an instrument—common sense. Overeating brings on overweight and as the figure grows more and more grotesque, the dangers to the system grow proportionately.

The heavy eater who laughed at diets in the days when they might have been helpful seeks them when it is too late. Overworked organs and consequently lowered resistance invite serious ills. He will eventually find that, with digestion ruined and organic ills present, he is unable to indulge in the one pleasure which life held for him. But it is difficult to convince such a person that stoking a one-manpower engine as though it has a 60-horsepower capacity will cause the motor to break down.

An excellent common-sense maxim to keep in mind is this one: Eat to live—don't live to eat!

### NEWS QUIZ

- The American freighter sunk in the Red sea September 7 was named (a) Steel Seafarer; (b) Steel Sailor; (c) Steel Mariner.
- Iceland has an area of 39,700 square miles. This is about the size of (a) Puerto Rico; (b) New Zealand; (c) Ireland.
- Donald M. Nelson is executive director of one of President Roosevelt's newest defense units, the SPAB. These initials stand for (a) Securities Planning Administration bureau; (b) Supply Priorities and Allocations board; (c) Special Priorities Administration board.

### ANSWERS TO NEWS QUIZ

- (a) is correct.
- (c) is correct.
- (b) is correct.

## Does your child SQUINT?

When you find your child squinting and groaning over his homework, maybe the best thing you can give him is better light. You may not realize that the lighting in your home is unsafe for young eyes. Yet science has discovered that one out of every five school children suffers from defective vision. A child can "see to read"—and yet be risking a serious case of eyestrain.

### TWO WAYS TO PROTECT YOUNG EYES

Put an I.E.S. study lamp on the table where the children do their homework. Or use a pin-to-wall lamp if the study table is against a wall. Both are scientifically designed to give enough light and the right kind of light for safe seeing.

DEFENSE STAMPS IN EVERY TOWN

We Americans go to town— but sometimes we are a little casual about getting around to doing the unaccustomed things that translate our good intentions into action.

Helping in National Defense, for instance. We all want to help. If we are the average people earning pretty good money in these times of plenty, we know we should be putting away some of those U. S. Defense Bonds, not only to assist our Government but to do ourselves a favor. Of course, lots of us have.

The Treasury Department has made it easy for everybody to buy Defense Savings Bonds. All we need is enough Defense Savings Stamps to fill a Stamp album which can be exchanged for a Defense Savings Bond worth \$25 to \$100 in 19 years, an increase in value of 33 1-3 per cent. Simple!

Now, thanks to the cooperation of a million retail merchants in the larger towns, the Treasury has made it almost impossible for the people in those towns to forget. For wherever they go, Defense Savings Stamps are at the cash register.

Soon, we believe, the government will allow retailers in towns like Hico to sell Defense Savings Stamps. Then Hico citizens will be constantly reminded of Defense Savings Stamps.

When you're buying in one of the local stores and when you have your money out, think about buying Defense Savings Stamps and then go to your post office before you forget.

As they multiply through systematic purchase, your Stamps will become your Defense Savings Bonds.

Those bonds will represent savings sure to be useful when the war is over and readjustments begin. Moreover, the money you put into Bonds will be taken out of earnings that might otherwise go for luxury and other goods. Such widespread spending when the national income is mounting causes heavier consumer demand, leading to inflation.

Therefore by purchasing Defense Savings Bonds, you are not only aiding our Government to arm but accumulating savings for yourself and holding down the cost of living.

Buy a Defense Savings Stamp Next Time You Shop

CUTTING DOWN ON ELECTRICITY

As government departments take steps to cut down on civilian consumption of necessary materials, the consumer is gradually benefiting by an education in economy.

We have learned, for instance, as a result of the alleged gasoline shortage, how we can drive a car on less gasoline than we have used in the past.

Now, because of a shortage of electrical power, we are to be taught how to get along with less electricity. Some of us have already thought that electricity was limitless.

But now with an impending shortage, due to the great amount of power needed for running defense plants, we are offered dozens of suggestions for cutting down our electrical bills. Outstanding among those suggestions are the following:

- 1. Turn out lights when they are not needed. 2. Conserve on hot water if you have an electric hot water heater. Keep the thermostat on your electric water heater between 135 and 140 degrees, no higher. 3. Keep the radio on only when you are listening to it.

- 4. Turn off the electric fan when it is not badly needed. 5. Use small bulbs for night lights. Use only those night lights that are absolutely necessary. 6. Use all other electric appliances sparingly and efficiently: your electric mixer, toaster, small heater, washing machine, vacuum cleaner and iron. 7. Don't put hot food or dishes in the refrigerator. 8. See that your refrigerator is properly placed in your kitchen. Your refrigerator should be in the coolest part of the room away from your radiator, steam pipes, oven or hot sun.

All of these suggestions are good practical ones which require no sacrifice and which will save us all money. And the best way we can thank our government for showing us how to save money on our electrical bill is to invest that saving in defense stamps.

SPEAKING OF PRESIDENTS

The notion that next to being a Supreme court justice, the berth of college president is the nearest thing to a "job for life" seems to be a fallacious conception. Actually, judging by the changes in college presidencies which have been made this year, the average freshman has more chance of sticking it out for four years than has the head of the college.

The Association of American Colleges lists changes on 75 campuses this fall. Although the reasons for the changes are not given, they are undoubtedly the same reasons that lead to changes in executives of any business—such as rows with the board, failure to advance the standing of the institution, and offers of a better job.

Dr. Robert D. Leigh, president of Bennington college, Vermont, made news when he announced he had long believed in a short term for college executives and resigned. The College of Emporia, Kansas, decided to get along without a president and put the control of the college in the hands of three men. A New York magazine publisher has been made president of Temple university and the university secretary at Rutgers, who had "always wanted to be a college president," became one at Rhode Island State.

The turnover of chief executives of our educational institutions follows pretty much the pattern of any other occupation, and as in other fields, there are also a number who manage to hold their jobs practically for a lifetime. Nicholas Murray Butler, president of America's largest educational institution, Columbia university, has the record tenure of office, having been president of Columbia for forty years.

Dr. James Madison Wood holds the record among presidents of women's colleges, having been president of Stephens college in Missouri for 30 years during which the student body has been built from 50 to 1,700 students.

THE SILK STOCKING ERA

As prominent women begin setting an example for conservation of silk by wearing cotton stockings, it is interesting to note the rise and fall of the silk stocking era.

In 1899, at the turn of the century, silk stockings first made their appearance in American stores. That year, 12,572 pairs of silk stockings were sold, which constituted one pair sold for every 2,500 pairs of cotton stockings.

It didn't look then as if silk stockings were going to go over with women and even ten years later, in 1909, less than one per cent of the stockings sold were made of silk.

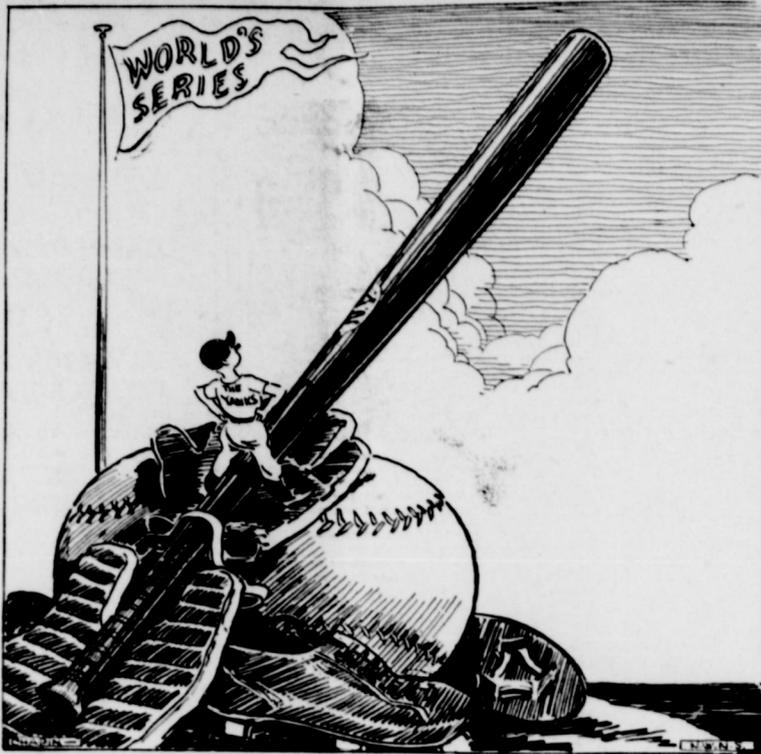

It was not until after the last war that silk stockings approached the peak of popularity that they have had recently. Even in 1919, over half the stockings sold to women were made of cotton, but during the next ten years cotton stockings became a drug on the market. In 1929 about 86 per cent of women were wearing silk stockings and last year over 90 per cent of the stockings sold were made of silk or rayon.

Girls who have grown up during the period since the last war may find it hard to get used to the cotton stocking idea, but their mothers should have less difficulty in dropping a fashion which has actually had such a comparatively short life.

As for men, most of them have never cared much whether their socks were made of silk, cotton or wool. All have preferences, but last year only about five per cent of men's socks were made of silk.

Huh, Who's Afraid of Invasion?

This Week in WASHINGTON

Washington, D. C. (NWNS)—After each talk which President Roosevelt has made to the nation in the past year, the first comment of a large number of people, including many congressmen quoted in the newspapers, has been, "His talk was practically a declaration of war."

One congressman is known to have made that or a similar comment following nine different statements of the President's. But in each case, after the spell cast by the President's voice has faded away and his talk is analyzed, it is evident that although he is determined to see that Hitler is defeated, he still is wording his talks to avoid a state of actual war.

In his most recent talk to the nation for example, when he made it clear to Germany that our ships would shoot first at any German ships sighted on the Atlantic, he said: "It is no act of war on our part when we decide to protect the merchant ships engaged in commerce." His policy in regard to this was clearly stated when he said: "No act of violence will keep us from maintaining intact two bulwarks of defense: first, our line of supply to the enemies of Hitler, and second, the freedom of our shipping on the high seas. From now on, if German or Italian vessels of war enter the waters, the protection of which is necessary for American defense, they do so at their own peril."

Although it is easy to interpret that statement as almost amounting to a declaration of war, a well-known Washington correspondent seemed to hit the nail on the head when he said: "Why do we have to try to extend the President's statements? He has said that our ships on the Atlantic will defend themselves by shooting first. His explanation of that was clear and understandable. But he points out that it isn't war. So why do we have to try to say it is war? We may say that it invites war or that it is a step to war, but in defining what we actually are doing we might as well use the terms the President himself uses rather than try to tack the 'war' label on every act."

There are many in Washington who feel that the President's speech was merely a matter of informing the public about what we actually have been doing on the Atlantic for several months. The action of our navy on the Atlantic has naturally been kept very secret and it may be that we have been "shooting first" since the beginning of the war. But that is a matter of guesswork, but there are many well-informed men here who make that particular guess.

Aside from the President's speech and the reaction of everyone to it, the most talked over subject here recently has been the senate committee hearing to determine whether the moving picture industry should be investigated for producing films aimed at rousing us "to a state of war hysteria." Although those who favor such an investigation consist largely of the leading isolationists in the senate, the case has been given much attention because Wendell Willkie last year's Republican candidate for President, is handling the defense of the movie industry. The isolationist committee claims that the movies offer no opportunity to spread their views to the American people but has produced numerous films which it claims are produced as propaganda for getting us into war.

Among the films named are such well-known ones as "That Hamilton Woman," "The Great Dictator," "Manhunt," "Convoy," "Escape," and "I Married a Nazi."

In defending the stand of the movie industry, Mr. Willkie said: "The motion picture industry despises the racial discrimination of Nazism. We make no pretense of friendliness to Nazi Germany nor to the objectives and goals of this ruthless dictatorship."

Mr. Willkie has also come into the limelight here by his statement that he will work in the coming election for Republican candidates who support the administration's foreign policy but will be silent where Republican candidates do not support the President's policy. He made it clear that opposition to domestic policies of the President is in keeping with his own feelings but he is striving to bring about more unity in congress on foreign policy.

A more optimistic spirit on getting our defense program working at full speed has been apparent here since the President's recent appointment of Donald M. Nelson, who was once vice president of Sears-Roebuck, as a sort of a one-man central planning agency to survey the whole defense situation, including defense and civilian requirements, materials available, machinery requirements and our labor supply. When completed, the survey is expected to give the first clear picture we have had of this country's actual capacity for production. For a long time one of the chief criticisms of our defense program has been lack of centralized planning. Mr. Nelson's assignment is the answer to this need.

As a result of the appeals for unity in the address of President Roosevelt and many national figures in the unions on Labor day, it is expected that labor problems may be somewhat reduced, although the shipbuilding, aviation and automobile industries feel no assurance that there will not be new outbreaks to interfere with their production schedules.

Many industrialists with big government contracts are coming to Washington with bags full of statistics to show the government they are actually losing money on defense production due to increased cost of materials, shortages of materials, increased labor costs and expensive adjustments in government specifications for the defense items they are making.

The newly appointed super-priorities board, headed by Vice President Wallace, is expected to look into all problems which are delaying production and to figure out how best to allocate supplies to take care of the interests of both defense industries and the civilian population. President Roosevelt expects the new board to speed production of arms for all anti-Nazi nations and at the same time to give due consideration of keeping the home fires burning in America. On the new board, besides the vice president, are: William S. Knudsen, director general of the Office of Production Management; Sidney Hillman, OPM associate director general; Harry Hopkins, special assistant to the President; Leon Henderson, federal price administrator; Secretary of Navy Knox, and Secretary of War Stimson.

sincere effort to reduce non-essential, non-defense expenditures of the federal government. Reductions made in these items this year have been inconsequential, and probably will be wiped out entirely when all the supplemental deficiency appropriation bills are passed.

It is little short of outrageous to impose the burden of this tax bill upon the citizens of this country without at least a sincere attempt to reduce federal expenditures outside of essentially emergency items."

Although the debate on the tax bill is being conducted pretty much along party lines, the Republicans urging economy and the Democrats defending New Deal expenditures, it is expected that some economies in a non-defense spending will be forthcoming. The debate on the tax bill is creating more heated arguments even than surrounded the famous lend-lease bill. On the outcome of the tax measure and its amendments, our financial policy for the future will be set.

Labor, Materials, Priorities. As a result of the appeals for unity in the address of President Roosevelt and many national figures in the unions on Labor day, it is expected that labor problems may be somewhat reduced, although the shipbuilding, aviation and automobile industries feel no assurance that there will not be new outbreaks to interfere with their production schedules.

Many industrialists with big government contracts are coming to Washington with bags full of statistics to show the government they are actually losing money on defense production due to increased cost of materials, shortages of materials, increased labor costs and expensive adjustments in government specifications for the defense items they are making.

The newly appointed super-priorities board, headed by Vice President Wallace, is expected to look into all problems which are delaying production and to figure out how best to allocate supplies to take care of the interests of both defense industries and the civilian population. President Roosevelt expects the new board to speed production of arms for all anti-Nazi nations and at the same time to give due consideration of keeping the home fires burning in America. On the new board, besides the vice president, are: William S. Knudsen, director general of the Office of Production Management; Sidney Hillman, OPM associate director general; Harry Hopkins, special assistant to the President; Leon Henderson, federal price administrator; Secretary of Navy Knox, and Secretary of War Stimson.

Milk is another economical source of several essential nutrients. Calcium and phosphorus, proteins of good quality as well as vitamins A and G are abundant in milk.

The family can do their share by learning to like more foods. Pot roasts can be deliciously savory and inviting and they are much cheaper than steaks. The food values of the edible portion of the cheaper cuts are quite the same as those of the expensive prime roasts and steaks. Learn to eat more vegetables. Cabbage and all the good root vegetables of fall and winter are splendid foods and are never high in price.

If all the food sources are made the most of the law of supply and demand can be kept in a more even balance. Plan menus to take advantage of market specials.

For ordinary everyday fare use fresh fruits and vegetables in season. Dried fruits are rich sources of vitamins and minerals and can be used in innumerable dishes.

Dried vegetables are worth keeping in mind for hearty cold weather meals. Split pea soup made with milk and served with a cabbage salad followed by a fruit dessert provides a good luncheon or supper that is low in cost and rich in nourishment.

Well-balanced meals must be planned. Each meal must meet the requirements of good nutrition. This means that the necessary number of calories as well as minerals and vitamins must be furnished. The total number of calories needed depends on the habits and amount of exercise of each member of the family. The average person needs from 2,500 to 3,000 calories a day. Children from nine to twelve years of age require from 2,000 to 2,500 calories.

Dale Carnegie

Author of "How to Win Friends and Influence People."

IF YOU CAN'T FIND A JOB— MAKE ONE

If you can't find a job, then make one! These are not foolish words by any means. Here are examples of how we persons made jobs for ourselves. I found them in the new book "The Strategy of Job Finding."

"A young woman, desiring a position in the sales promotion and advertising department of a large manufacturing concern, dealing in cosmetics, familiarized herself with this field and with the company. She then began an original piece of research on one of their products. By conversing with local druggists and with friends, she learned the names of the five or six outstanding competitors of this company in the lipstick field. She then purchased one stick of each brand, prepared a careful questionnaire, in which appeared such questions as, 'What lipstick do you use now?' 'How did you first come to use it?' and so forth.

"These questions were grouped in appropriate classifications which permitted ready analysis. A survey was then made among potential buyers. Upon completion the results were carefully tabulated in report form, followed by a summary of the outstanding comments for and against the manufacturer's product. The findings were recorded on little cards, attached by ribbons to samples of competing lipsticks, placed in a plush-lined case, covered, and held firmly in place with a sheet of cellophane. The novelty of this approach, plus the quality of the job done by the applicant, won her the coveted position.

"A recent college graduate, interested in seeking employment in the trade-publication field, learned in the course of a job interview that the company was considering the introduction of a new publication. He was advised he would be considered for a position if plans went through. He obtained all pertinent information about the new project at his first interview and asked permission to discuss the matter further with one or two of the other interested officers.

"After analyzing the information gathered, he again approached the company with a recommendation that he be permitted to try a bit of independent research. He requested permission to prepare and send a dummy of the first issue to fifty firms (prospective customers) for the purpose of obtaining their reactions. His research indicated that the publication would not be well received by 80 per cent of those approached. He regretfully presented the negative report to the management, but because of the excellence of his analysis, he was rewarded with a position despite the fact that the project was abandoned.

What had these two done? One simple thing: showed their prospective employers how money could be derived from their services.

Perhaps every individual is not qualified to create a job, but if you get an idea, for Heaven's sake, don't sit around dreaming. At least, make an effort. I doubt if there's any one who doesn't get ideas at times—good ones, if they are only made good. If you don't do something about it, you may wake up some day and find that some one else has.

Nancy Hart's HOME NEWS

Every woman has a deep interest in the food she feeds her family. The nutritive value, the family's likes and dislikes, the eye appeal, the taste appeal and the cost all are factors in her food problem.

It behooves all of us to study food values from many angles. The potency of the nutritive content of certain foods in comparison with others determines the desirability of each particular food.

A careful study of food values in relation to costs shows that some types are much more economical than others. Some foods supply only one or two nutrients the body needs while others are important sources of several. For example, flours, meals and cereals are very valuable in low-cost diets because they furnish an inexpensive supply of several elements—all the calories, phosphorus and iron, vitamin B and vitamin A in whole grain products.

Milk is another economical source of several essential nutrients. Calcium and phosphorus, proteins of good quality as well as vitamins A and G are abundant in milk.

The family can do their share by learning to like more foods. Pot roasts can be deliciously savory and inviting and they are much cheaper than steaks. The food values of the edible portion of the cheaper cuts are quite the same as those of the expensive prime roasts and steaks. Learn to eat more vegetables. Cabbage and all the good root vegetables of fall and winter are splendid foods and are never high in price.

If all the food sources are made the most of the law of supply and demand can be kept in a more even balance. Plan menus to take advantage of market specials.

For ordinary everyday fare use fresh fruits and vegetables in season. Dried fruits are rich sources of vitamins and minerals and can be used in innumerable dishes.

Dried vegetables are worth keeping in mind for hearty cold weather meals. Split pea soup made with milk and served with a cabbage salad followed by a fruit dessert provides a good luncheon or supper that is low in cost and rich in nourishment.

Well-balanced meals must be planned. Each meal must meet the requirements of good nutrition. This means that the necessary number of calories as well as minerals and vitamins must be furnished. The total number of calories needed depends on the habits and amount of exercise of each member of the family. The average person needs from 2,500 to 3,000 calories a day. Children from nine to twelve years of age require from 2,000 to 2,500 calories.

An occasional coat of wax applied to the polished surfaces of your furniture will make the daily dusting an easy matter. Wax seals the pores of the wood, enhances and preserves the grain and develops a hard dry finish.

Axis Warning

President Roosevelt is shown as he addressed the world, grimly warning Germany and Italy to keep their war craft out of all water related to American defense and told U. S. armed forces that the time has come to shoot first in self defense wherever U. S. interests are jeopardized.

# Local Happenings

Mr. and Mrs. James N. Stewart of Whitney were visitors in Hico Sunday.

Carol Anderson left Thursday for Stephenville where she will be employed.

Mrs. Sidney Wieser of Hamilton visited in Hico Tuesday with her parents, Mr. and Mrs. H. N. Wolfe.

Mr. and Mrs. Cyril Gates and little daughter, Martha, of Stillnett visited friends in Hico Wednesday.

Mrs. W. A. Moss and Ana Loue and Mrs. J. W. Jordan Jr. attended the Home Demonstration Council at Hamilton Saturday.

Mrs. Roy Sears, Wanda Nell and Pansy spent Sunday afternoon with Mr. and Mrs. W. A. Moss, Ana Loue and Madge.

Mr. and Mrs. R. M. Hanshaw visited her mother, Mrs. J. C. Hanshaw, and son, Ernest, in Iredell Sunday.

Little Margie Ann Hanshaw of Fort Worth visited her grandparents, Mr. and Mrs. R. M. Hanshaw, a while Sunday.

Mr. and Mrs. C. B. Simmons and daughter, Jo Ann, of Bertram, spent the week end here with Mr. and Mrs. Jack Gray.

Mrs. Ira Scudder and little daughter, Linda, of Graford spent the first of the week here with her mother, Mrs. J. R. McMillan.

Mr. and Mrs. Elgin Coulburn of Olney were here last Friday visiting her uncle and aunt, Mr. and Mrs. J. P. Owen.

Mr. and Mrs. Elbert Phillips of Wichita Falls spent the week end here with her parents, Mr. and Mrs. John Lane.

Mrs. J. G. Gollightly went to Gorman Hospital again Tuesday for treatment of an eye ailment which has been giving her considerable trouble lately.

Miss Nettie Wieser returned home Monday from Fort Worth, Hillsboro and Dallas, where she had been visiting for the past three months.

Those visiting Mrs. Opal Sites and family Sunday were her husband, Mr. B. F. Sites, and Mr. Sites' sister and husband, Mr. and Mrs. Smith Houghs, all of Dallas.

Mrs. Jess Askey has returned to her home in Van Alstyne after spending several days here visiting her parents, Mr. and Mrs. French.

Mrs. R. M. Bowles returned home the first of the week from Dallas, where she had been visiting with her granddaughters, Mrs. Bill Rusk and Miss Elizabeth Boustead. Before coming home she also visited with her daughter, Mrs. C. B. Boustead, in Fort Worth.

Mr. and Mrs. Ray Connally and daughter recently moved out to the Russell Stock Farm, between Hico and Carlton, where he will take care of the Russells' ranching interests. The residence they moved from, which also is owned by Mr. and Mrs. Russell, is being refurnished and modernized.

Mr. and Mrs. Albert Alexander, Mr. and Mrs. J. D. Patterson and baby and Curtis Christopher, in a letter received to friends here, said that they arrived in San Diego, California, Wednesday of last week after leaving here Monday. They will start to work Friday of this week at the Consolidated Aircraft School in San Diego.

M. A. Cole, who has been seriously ill at his home near Duffau for several months, was reported this week to be in a serious condition. His daughter, Mrs. Ardis Shook, has been making arrangements for moving to their home in Hico as soon as possible, where he will be able to receive closer medical attention if needed.

Mrs. Geo. B. Gollightly, who returned from Scott & White Hospital at Temple to her home in Hamilton early this month, was in Hico Tuesday visiting her son, Rollie, and her many friends who were glad to see her perky as usual. She says she is feeling fine, and doesn't ever intend to get sick again.

Mrs. J. D. Nix, who had been visiting here for two weeks with her parents, Mr. and Mrs. L. A. Powledge, returned Sunday to her home in Wichita Falls with her husband, who had come down the day before. Other visitors in the Powledge home over the week end were Mr. and Mrs. Russell Powledge and children, Doris Jean and George Russell, of Dallas; and Mr. and Mrs. Jno. O. Potts and children, Bob and Bill, of Gatesville. The menfolk went fishing Saturday night, and the entire family enjoyed an old-fashioned fish fry Sunday.

ROSS SHOP, Jeweler. 45-tc  
Thirty Egg Mash at \$2.20 per cwt at K. B. Feed Store. 15-1c.

Dr. Gunn's Compound for sale at Hico Confectionery. 14-4p.

Book your chicks now for October deliver. K. B. Feed and Chick Store, on Railroad Ave. 18-tc.

Buck Jordan of Brownwood was a week-end visitor here with his parents, Mr. and Mrs. A. J. Jordan, and his sister, Miss Hester.

Mrs. Maud McMurray of Big Spring came in last Tuesday for a visit here with her sister, Mrs. Rucker Wright.

Mr. and Mrs. L. B. Creath of Coleman spent the week end here with her parents, Mr. and Mrs. R. F. Wiseman.

Mr. and Mrs. Marvin Marshall left Thursday for Range where they will spend a few days visiting relatives.

C. P. Coston, division manager of the Community Public Service Company, was in Hico Thursday on business.

A. T. McFadden Jr. of Brady visited here over the week end with his parents, Mr. and Mrs. McFadden moved Monday to their new home at Gatesville.

Mrs. Lenora Langston returned to her home in Hico Sunday after visiting several weeks with her daughter, Mrs. Fred Wylie, at Moran.

Mr. and Mrs. Jack Owen of Hemit, California, came in last Friday for a visit with their parents, Mr. and Mrs. J. P. Owen and Mr. and Mrs. A. B. Roberson.

Mr. and Mrs. H. E. McCullough and daughter, Frances, attended Ringling Bros. and Barnum and Bailey Circus in Fort Worth Thursday.

Mrs. Ida Tunnell of Fort Worth is spending the week here with her sister, Miss Nettie Wieser, Rosemary and Ted Tunnell of Fort Worth are expected to spend the week end here also.

Leslie Patterson has accepted a position at the J. W. Richbourg store in the men's department, taking the place vacated last week by A. T. McFadden. Leslie, who is experienced in this line of work, started his new duties this week.

Mrs. C. B. Segrest has ordered the paper sent to her daughter, Mrs. Fred Leeth, who now lives at 409 1/2 Peak St., in Dallas. Mr. and Mrs. Leeth and family moved to Dallas several months ago, where he has employment.

Mr. and Mrs. Ned Chapman, who have occupied the Dr. Russell home place recently purchased by Mr. and Mrs. Roland Holford, this week moved to the J. C. Rodgers house vacated by Mr. and Mrs. A. T. McFadden.

Sam Hawes of Waco was here Sunday to visit his father, Dr. V. Hawes, who has been ill for some time. His condition is reported as very serious, although he has been very patient throughout his suffering.

Rev. and Mrs. Floyd W. Thrash and family moved last Thursday to the new Methodist parsonage, the former home of Mrs. Ida Porter, which has been recently remodeled and rearranged. The site and residence formerly occupied as a parsonage have been bought by Barnes & McCullough for erection of a new station for Magnolia Petroleum Company, and work is expected to start soon.

CARLTON 4H CLUB MET THURSDAY IN LABORATORY  
Thursday morning at 11:15 the Carlton 4H Club and their sponsor, Miss Ana Loue Moss, met in the laboratory of the school house.

The house was called to order by the president, Wanda Nell Sears. The roll was called by Miss Moss. Several members were present who hadn't been able to attend during the summer. The secretary, wasn't present at the last meeting, so several members gave a short report on what happened.

Officers were elected to serve next year as follows: President, Alma Jean Wright; vice-president, Marilyn Pierce; secretary, Wanda Nell Sears; treasurer, Joy Rizzotto; reporter, Ana Loue Salmon; program chairman, Madge Moss; recreation leader, Bettye Jones.

Plans were made to go to the State Fair of Texas at Dallas October 6th, as that is 4H Club Day. The group decided on white blouses, embroidered in green, for a remembrance and novelty.

We received word that another of our reports was sent to College Station.

We were very glad to welcome two new members, Helon Reigh and Peggy Joyce Cavanaugh.

Those present were Doyce Smith, Alma Jean Wright, Zonell Funk, Madge Moss, Marilyn Pierce, Peggy Ann Ragland, Louise Ledbetter, Winnie Mae Kerley, Ana Loue Salmon, Wanda Nell Sears, Bettye Jones, Ila Faye Totten, Joy Rizzotto, Joyce Garner, Loretta Funk, Pansy Sears, Marjorie Smith, Helon Reigh, Peggy Joyce Cavanaugh. We were very sorry to notice that Charley Ford, Dortha McClaren, and Murlene Roberts couldn't attend, but we hope next our members can be present next meeting, October 2nd. Miss Jones will be with us at that meeting and we will make final plans for the Fair. The meeting will be held at Alma Jean Wright's home at 10 a. m.

REPORTER.

## Senator Connally To Talk On Defense Day At State Fair

Dallas, Sept. 24.—With plans virtually complete for National Defense Day at the State Fair of Texas on Sunday, Oct. 12, more than 150,000 persons are expected to hear the stirring address of Senator Tom Connally of Texas.

As chairman of the powerful foreign relations committee of the United States Senate, Senator Connally is expertly qualified to deliver an address befitting the occasion, intended and destined to be the greatest patriotic gathering ever held in the Southwest.

R. L. Thomas, general chairman for the event, announced that National Defense Day at the fair has been planned to "foster unity among the people of Texas and to bring this state solidly back of President Roosevelt in his administration of foreign affairs. Since the president issued his 'shoot first' order, we believe that our boys who are on the firing line deserve the full support and backing of the people of Texas."

Gov. Coke R. Stevenson will introduce Senator Connally at ceremonies scheduled to begin in the State Fair's huge Cotton Bowl at 3 p. m. The 45,000 seats of the Cotton Bowl are expected to be filled for the address, while loud speakers, distributed over the fair grounds, will bring the talk to 100,000 or more others. Radio will carry the address throughout the State and Southwest.

Scores of civic and patriotic organizations in every section of the state have heartily endorsed National Defense Day and many of them will send groups to attend the ceremonies. Invitations to participate have been extended to 500 military and veterans' organizations, including the American Legion, Veterans of Foreign Wars, and units of the Texas Defense Guard. An effort is being made to have Lynn U. Stambaugh, new national commander of the American Legion, come here for the celebration.

## Local Terracing Increasing, Says AAA Chairman

Terracing is finally coming into its own in Hamilton County, E. H. Couch, chairman of the County AAA committee, announced this week.

According to information from the State Office, College Station, the conservation materials and services phase of the AAA program has been enlarged to include terracing under the 1942 farm program, he said.

This phase of the AAA program, designed to assist farmers in carrying out more soil-building practices, already makes it possible for them to obtain phosphate, Austrian winter peas, common, hairy and Willamette vetch with costs of the materials being deducted from future payments. Similar arrangements will be in effect on the terracing program, Mr. Couch pointed out.

With more emphasis placed on soil-building practices under the 1942 program than ever before is probably an indication that future appropriations will be more contingent upon the amount of soil-building practices carried out, the AAA chairman explained.

The conservation materials and services program may result in difficulties in securing necessary seeds and supplies and terracing is being added to help farmers in earning maximum soil-building assistance.

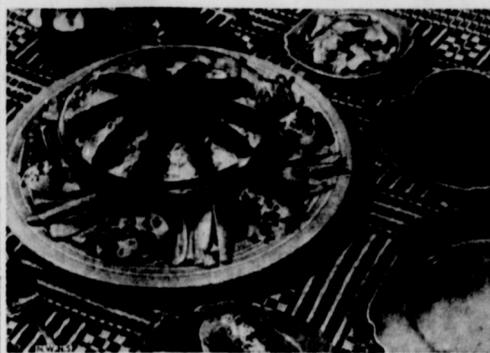

In explaining the terracing program in Hamilton County, the county chairman said that if the demand is sufficient, the county committee will let bids to contractors to build terraces for cooperating farmers. The contracts will be let on a 100-foot basis and contractors will be paid by the AAA after the terraces are completed.

Under this phase of the program farmers may use 70 per cent of their total payments, less any previous assignments, for terracing Hamilton County farmers who wish to participate in the terracing program should file their requests in the county office in order that the demand might be ascertained, the AAA official said.

# Your SUNDAY DINNER

Here's a lesson in how to stretch, add and multiply your food budget without subtracting from flavor, nutrition and appetite appeal of your meal. Serve a casserole of sauerkraut baked with pork sausages. Buttered carrots and parsley boiled potatoes are the natural accompaniment. For dessert there's nothing better than apple pandowdy.

**THE DINNER**  
\*Sausage and Sauerkraut Casserole  
Parsley Potatoes  
Buttered Carrots  
Crisp Rolls Butter  
\*Apple Pandowdy Beverage  
\*\*Recipes Included

This menu is properly balanced for nutritional value. It supplies:  
**The Meat:** Proteins, minerals, vitamins A, B, C, and G, and fats.  
**Sauerkraut:** Vitamins A, B, C, minerals.  
**Potatoes and Carrots:** Vitamins A, B, C and G; minerals and carbohydrates.  
**Rolls and Butter:** Vitamins A, B, C, and G; minerals, carbohydrates and fats.  
**Dessert:** Carbohydrates, minerals, Vitamins A, B, C, and G and some fats.

**TO SERVE 6 YOU NEED:**  
1 1/2 pounds pork sausage  
1 No. 2 1/2 can sauerkraut  
6 potatoes  
1 large bunch carrots  
4 tart apples  
(Balance of materials among staples)

**Sausage and Sauerkraut Casserole.**  
1 1/2 pounds pork sausage  
1 No. 2 1/2 can sauerkraut  
Place sauerkraut in greased casserole and on top arrange the pork sausages which have been browned nicely. Add 2 cups water, cover and bake for 45 minutes in 350-degree oven.

**Apple Pandowdy.**  
4 tart apples  
1/2 cup sugar  
1/2 teaspoon cinnamon  
2 tablespoons butter  
1 recipe baking powder biscuits  
Pare and slice apples and arrange them in a well-greased shallow baking dish. Sprinkle with sugar and cinnamon and dot with butter. Cover with biscuit dough, which has been rolled to about 1/4-inch thickness. Cut several gashes in dough to allow steam to escape. Bake in 350-degree oven for 30 minutes. Serve hot with nutmeg flavored sweet cream.

**SERVING HINTS:**  
Place the casserole of sauerkraut and sausages in large chop plate. Arrange buttered vegetables around it as illustrated.  
Serve with crispy rolls and plenty of butter. That's all the accompaniment you need. The main dish is really a dinner in a dish—all the necessary nutrients present.

**JOE GISH**  
I know, some folks are like the stone in a slingshot. . . . They farther circumstances draw them back, the farther they go ahead. . . .

**MT. PLEASANT INDUSTRIAL CLUB MET SEPTEMBER 24**  
The Mt. Pleasant Industrial Club met with Mrs. O. J. Clark on Sept. 24. The quilters quilted three beautiful quilts.  
Delicious punch and cake were served to the following: Mmes. John Abel, Henry Wilson, Ella Shepherd, Kate Slater, E. Z. Brummett, Roy Dillard, Ben Wright, Cecil Parks, Mamie Thomas, A. B. Clark, Bill Lackey, Roy Davis, Wauwick Ogle, A. V. Rachug, H. R. Brummett, Clair Brunson, Dale Hughes, Nona Brunson, Jetty Palmer, Emmett Anderson, and J. W. Abel; and to Misses Nora Abel and Willola Slater and the hostess, Mrs. O. J. Clark.  
We were happy to have as visitors Mmes. Roy Dillard from Granbury, Cecil Parks, Mamie Thomas, Bill Lackey, Clair Brunson, Nona Brunson, and Dale Hughes, all of the Mt. Pleasant community.  
Next club meeting will be with Mrs. Ben Wright.  
REPORTER.

## Guest List

Names of those who have visited the News Review office and registered since the list printed in last week's paper appear below. (Unless otherwise indicated, the parties are from Hico.)

**GUEST LIST**  
Mrs. L. L. Houston, Iredell.  
D. M. Johnston, Dallas.  
John Gorman, Brownwood.  
R. M. Bowles.  
Mrs. W. E. Goyno, Wilma Grace and Malinda Lou, Fairly.  
Mrs. T. C. Thompson, Carlton.  
Lee Hendon, McCaulley.  
Mrs. Alice Hopkins, McCaulley.  
W. B. Hendon, Austin.  
Mrs. Emma Blair, Merkel.  
Mr. and Mrs. James N. Stewart, Whitney.  
Mrs. Dale Hughes and Janice, Elbert Phillips, Wichita Falls.  
Mrs. Marvin Wallace, Marble Falls.  
Karl Segrist, Dallas.

Rev. and Mrs. Alvin Swindell will be in Brownwood today (Friday) for attendance upon the annual meeting of the executive board of District No. 16 of Texas Baptists. They expect also to visit with their son-in-law and daughter, Mr. and Mrs. Ralph B. Griffin, and little granddaughter, Sarah Jo, planning to spend the night and be in Hico Saturday morning.

# News of the World Told In Pictures

## Refugees Cross Atlantic on Freighter

Scores of refugees are pictured lining the rail of the Spanish freighter Navemar, which docked in Brooklyn following an unprecedented voyage. With normal accommodations for 15 passengers, the vessel transported 1,200 refugees across the Atlantic. All but a few of those making the voyage, under conditions said to be worse than the steerage conditions of former years, are refugees from Germany and other Nazi-dominated countries.

## 'Mrs. America'

## An Interlude

Mrs. Ruth Licklider, New York City, holds aloft a banner announcing her the winner of the fourth annual "Mrs. America" contest held at Palisades Park, N. J. Scores of married women from all parts of the country competed for the title.

Betty Gordon, glamour girl of 1941, is caught here by the camera in an "unglamorous" interlude as she rests her aching feet during the twenty-first annual Debutantes' ball held in Raleigh, N. C. With 145 other belles, Betty made her debut at this event.

## 'Pop' Patten Joins His Seven Sons in Navy

Saluted by admirals and bluejackets alike, Clarence F. ("Pop") Patten, 52-year-old former farmer and sawmill operator, joins his seven sons on the battleship Nevada. The navy overlooked Pop's age of 52 to enable him to join his sons. Top row, left to right: Clarence Jr., Myrno, Allen, Gilbert and Ray. Bottom row: Bruce, "Pop" and Marvin Patten.

## How To Become a Naval Officer in 4 Months

**1** COLLEGE GRADUATE, 20 TO 28, UNMARRIED, ENROLLS FOR RESERVE MIDSHIPMEN TRAINING PROGRAM

**2** HIS FIRST MONTH IS SPENT IN BASIC TRAINING DURING WHICH TIME HE IS FREQUENTLY INTERVIEWED BY NAVAL OFFICERS

**3** INTENSIVE STUDY AND CLASS WORK MARK THE ENSUING THREE MONTHS IN A MIDSHIPMEN TRAINING SCHOOL AT NORTHWESTERN U., ON THE U. S. PRINCE GEORGE STATE AT N. Y., OR AT THE U. S. NAVAL ACADEMY AT ANNAPOLIS

**4** HIS REWARD... A COMMISSION FROM THE PRESIDENT AS ENSIGN, U. S. NAVAL RESERVE

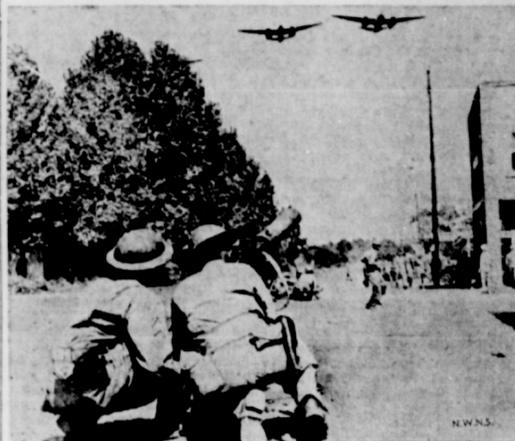

**5** ON BEING COMMISSIONED, ENSIGN GOES ON ACTIVE DUTY WITH THE FLEET, THE COASTAL PATROL, OR A SHORE STATION, TAKING HIS PLACE WITH REGULAR NAVAL OFFICERS... HE RECEIVES A BASE PAY OF \$125 A MONTH, PLUS MAINTENANCE AND LIBERAL ALLOWANCES, INCLUDING \$250 FOR UNIFORMS

## Founders of Legion Meet at Convention

Founders of the American Legion are shown as they gathered at the twenty-third annual convention of the Legion in Milwaukee, Wis. Seen looking over a collection of mementos from the first Paris caucus forming the group are: Leon Schwartz, Alabama; Lee Warner, St. Paul, Minn.; J. P. Pfeil, Milwaukee, Wis.; and J. H. Reass, Wheeling, W. Va.

## Real Action in U. S. War Maneuvers

Machine guns and anti-tank guns blaze away as the new 30-ton medium tanks supported by attack planes attempt to capture a cross roads at Castor, La., during the war maneuvers of the U. S. army. These maneuvers rank among the most extensive in peace-time history.

## Mass Production Comes to Aircraft Industry

The above drawing of Vultee Aircraft's mechanized final assembly line shows the revolutionary production developments at the California plant in the last few months. It is the graphic story of how modern airplanes are made compared to the methods of but a year or two ago, and shows the first mechanized assembly line in the aircraft industry.

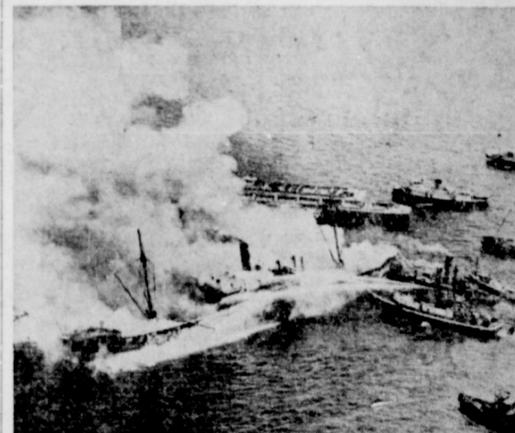

Instead of the old system of adding one part at a time to a framework and gradually building up a complete plane, Vultee breaks the ship down into five major units—fuselage, tail section, engine assembly, center wing section and outer wings. Each is completely put together in sub-assembly departments. Conveyor lines reach out finger-like to bring all five together at the nerve center of production shown above where they are joined to make the plane ready for flight.

At the right of the picture, tail sections are assembled, complete with monocoque, stabilizers, rudders, elevators and control cables, and move around on tracks to the center. Meanwhile, at the left, skeleton fuselages travel through assembly stages on a long U-shaped conveyor rail, winding up close to their starting point, complete with instruments, controls, canopies, wiring, etc. A short rail section then moves them across to the finishing line where they join the completed tail sections.

The center wing section comes in at the right center of the picture from the fabricating and assembly departments. Meanwhile, at the upper left of the picture, on a balcony, another assembly line is joining motor with engine mount and attaching controls, piping and other "plumbing." A chain-driven overhead conveyor carries the complete engine assemblies high overhead to the center of the picture where they drop from a hoist to the wings below. Farther down, other wings come through the paint shop to be attached to the ships. Beyond that point controls are adjusted, final inspection made, and Vultee planes roll out of the shop and "into the blue."

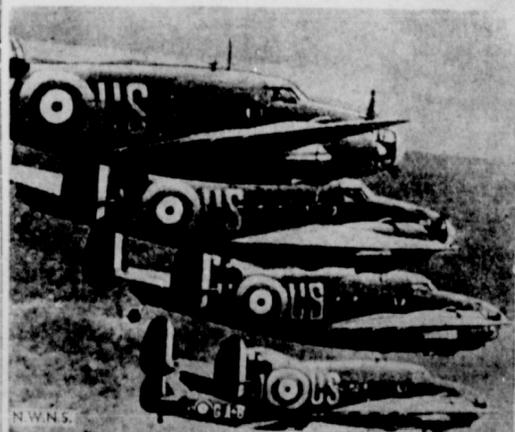

This new mechanized conveyor line has increased Vultee production fourfold in the last few months.

## Spectacular Fire on Brooklyn Waterfront

Brooklyn's waterfront experienced one of the worst fires in its history, when explosions and flames recently swept over it. The Cuban liner Panuco, at the pier, is shown after it was towed into mid-bay in a near-sinking condition. Fireboats are playing streams of water on it.

## Australian Air Force Over Singapore

Flying American-built Lockheeds and Australian-built Wirraways, a squadron the Australian air force is shown winging its way over Singapore. The great British base at this crossroads of the world has been greatly reinforced since Japan began making threatening gestures.

**THEY MAKE THINGS GROW**

THIS IS A MONTH OF HARD, HOT WORK FOR FARMERS' BOYS.

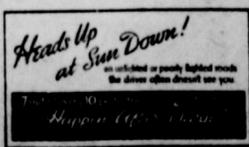

BUT FIELD AND GARDEN HAVE A WAY OF MAKING THINGS BESIDES FOOD GROW.

AMONG THESE THINGS ARE PERSEVERANCE AND HARDIHOOD, AS FOUND IN JOHN PAUL JONES, SON OF A GARDENER, IMMORTAL ADMIRAL, FATHER OF THE AMERICAN NAVY.

## Smart Styling Keynotes New Chevrolet

Distinguished styling, characterized by a new massiveness, marks the new 1942 Chevrolet, introduced to the motoring public today. Shown above is the Special De Luxe Sport Sedan, a roomy, luxurious, six-passenger model. A new grille treatment, with integral parking lights, and the smart new elongated front fender, which sweeps back into and opens with the front door, are design highlights. Interior appointments are in the modern mode.

# WANT ADS

## CLASSIFIED ADVERTISING INFORMATION

### Classified Rates

The rates below apply to classified advertising rates, and two and three-time rate, etc., apply only to ads scheduled consecutively.

Count five average words to the line. Each initial, phone number or group of numerals count as a word. Allow four words for a News Review box number address.

Lines	Words	1t	2t	3t	Add
2	10	.25	.30	.40	.10
3	11-15	.30	.45	.60	.15
4	16-20	.40	.60	.80	.20
5	21-25	.50	.75	1.00	.25

### Adjustments and Kills

An error which affects the results of an ad entitles the advertiser to an adjustment for one week only. After the first insertion the News Review is not responsible for errors. Charge is made for only actual insertions on an ad killed before completion of its original schedule, at the rate earned by the number of times it has been published. Adjustments and refunds are not made after 30 days from publication date.

### BUY UNITED STATES SAVINGS BONDS AND STAMPS

When a modern young father is asked what he is planning for his son in the way of a career, he will smile a superior, enlightened smile and say, "Oh, I'll let him make his own life." But when it comes to which sport the child shall excel in, the telegrams announcing the baby's arrival to far-flung college friends as often as not describe the infant as a future tennis star or a fullback of fabulous power. Now if there is really a family tradition of excellence in a certain sport the exuberant young parent's ambition for his son may not be misplaced, for aptitudes and types of co-ordination can be inherited. But for a parent to choose a game for a child because of his own spectator enthusiasm for that particular sport and expect the youngster to make good at it, may lead to grief for both parent and child. This doesn't mean, however, that you should leave your child's education in games entirely to chance. For proficiency in any sport requires a great many things of bodily performance, and some of these nerve and muscular skills have to be learned in childhood. Moreover, they have to be learned so well that they appear to be outright gifts of the gods when the time comes for them to function in a chosen game. Your first responsibility then, is to see that the child participates in the varied play activities which will

## CANADA—OUR NEIGHBOR

Experience of Ontario's Hydro-Electric Power Commission proves value of continued Daylight Saving

By MARTIN L. PETRY

WITH a strong advocacy for continuation of Daylight Saving Time throughout the year in the United States to conserve power for national defense use, it is interesting to note that the Hydro-Electric Power Commission of Ontario found a reduction of approximately six per cent in the load of the large Niagara system as a result of the extension of daylight time during the last part of 1940. Daylight saving is not universal throughout Ontario, similar to this country, so it was rather difficult to determine accurately the percentage of power conservation but it is definitely known that the extension to an annual basis proved effective.

W. L. Houck, vice chairman of the Commission told this correspondent that the increased use of power for war purposes, coupled with the fact that local demands during the day, made it doubly difficult to evaluate with accuracy the effect of the extension of Daylight Saving Time.

"However, taking into consideration the factors involved," declared Mr. Houck, "it is estimated that the reduction in peak load attributable to this cause was, during the closing months of 1940, from 56,909 to 58,900 horsepower in Southern Ontario."

"I might explain that the extension of Daylight Saving Time last fall and winter was not made universal throughout Ontario, but those municipalities which previously had adopted Daylight Saving Time for the summer were asked to continue it for the fall and winter months. This had the effect of staggering the peak loads, thus reducing the total system load to an equivalent of approximately six per cent. Our engineers emphasize the fact that the control of system peak loads by this extension of Daylight Saving Time is a highly technical problem and one which varies greatly with the locality so that, while large savings in system peaks can be made in some localities, to others practically no saving at all will be made."

Ontario's "Hydro," as it is familiarly known to all Canadians, is a cooperative municipal enterprise administered by the Hydro-Electric Power Commission with T. C. Hogg, chairman and chief engineer; Mr. Houck, vice chairman; J. Albert Smith, commissioner and Osborne Mitchell, secretary. Mr. Houck, incidentally, was born in Buffalo and, after studying law in this country, went across the border to enter politics and is a member of the Ontario Legislature from the Niagara district in addition to his many other governmental duties.

The Commission has successfully demonstrated how the development and application of power resources can be efficiently coordinated to the social and economic interests of a large population covering an extensive territory. It is entrusted with the duty of supplying the electrical needs of the citizens of Ontario at the lowest possible cost consistent with sound economics and has been supplying electric service for more than thirty-two years. During this period the costs of electricity to the consumer have been substantially reduced and the finances of the enterprise have been established on a secure foundation. All the power resources of the undertaking are derived from water-power developments, including the power generated in Commission-owned plants as well as the energy purchased for redistribution.

At the end of 1938 the Commission was serving 821 municipalities in Ontario, including twenty-six cities, 102 towns, 285 villages and 408 townships. To provide this service the Commission operates several widespread but coordinated systems of generating plants and transmission networks, interconnected where advisable. It owns and operates forty-six generating stations, having a total capacity of 1,519,400 horsepower and with the purchase of 540,000 horsepower in 1938, has a total maximum capacity of 2,059,405 horsepower with an average output exceeding 7,500,000, 960 kilowatt hours. Since the outbreak of the war this has been increased.

## SUCCESSFUL PARENTHOOD

### SOCIAL SKILLS AND COURTESY

Time-honored social graces are a great asset to boys and girls in making their school life happy. True, the want of these may not be felt until adolescence when the budding social urge makes a youngster conscious of his drawbacks. But childhood is the time for instilling such valuable attributes as politeness, consideration and interested participation in group affairs.

"We'll come back to these, but first I want to discuss the more often neglected social skills. Parents will, for example, take great care to teach the usage of please and thank-you, and accepted forms of greeting and good-by, and then fail to train the child in how to remove his hat and what to do with it, in keeping the speaking voice at a pleasing level, in entering and leaving a room with ease, and most important, in handling table silver correctly.

Not long ago I sat near a group of high school boys and girls at luncheon in a downtown tea room. They were all well-mannered, nice looking, intelligent young people, but I could never have imagined so many wrong ways of holding a knife and fork as I saw that day. Since youngsters today seem so eager to make a good appearance and do the right thing—as witness the way they devour books on etiquette—it is a double shame that they should be handicapped by this lack of a necessary manual skill. You wouldn't, for instance, expect a youngster to become a good golfer

unless he had been taught how to hold a club, or to swing a tennis racket just any old way he happened to pick it up. Just so, there is a proper technique for eating which must be acquired through practice.

Of course a young child's control over the fine muscles of the hand isn't sufficient to enable him to use silver properly from the beginning. Nor should his baby efforts to feed himself be discouraged because they are awkward and messy, for encouraging self-help is more important than teaching manners in the very young. But you can gradually train a child through well-chosen toys to use his hands skillfully and after that it will not be beyond him to carry out simple instructions in correct eating.

Some toys used for this purpose of training hands are peg boards of varying sizes, dotted blocks, then on to blunt scissors for cutting out pictures, crayon and chalk for blackboard work, paints and large pieces of paper for drawing, and still later, pencil and tablet for practice writing.

As for the fundamentals of courtesy without which the smoothest manners are counterfeited, these are best instilled by parents who practice them in their daily living. Knowing them, teaching them, insisting on them, even, aren't enough. They must be given value for the child by being as much a part of his happy childhood as his mother's eyes and voice.

### RESPONSIBILITY IN WATCHING CHILD'S SPORT ACTIVITY

When a modern young father is asked what he is planning for his son in the way of a career, he will smile a superior, enlightened smile and say, "Oh, I'll let him make his own life." But when it comes to which sport the child shall excel in, the telegrams announcing the baby's arrival to far-flung college friends as often as not describe the infant as a future tennis star or a fullback of fabulous power. Now if there is really a family tradition of excellence in a certain sport the exuberant young parent's ambition for his son may not be misplaced, for aptitudes and types of co-ordination can be inherited. But for a parent to choose a game for a child because of his own spectator enthusiasm for that particular sport and expect the youngster to make good at it, may lead to grief for both parent and child. This doesn't mean, however, that you should leave your child's education in games entirely to chance. For proficiency in any sport requires a great many things of bodily performance, and some of these nerve and muscular skills have to be learned in childhood. Moreover, they have to be learned so well that they appear to be outright gifts of the gods when the time comes for them to function in a chosen game. Your first responsibility then, is to see that the child participates in the varied play activities which will

insure proper muscular development and co-ordination of nerve center and muscle. Growing children need from four to five hours a day of big muscle activity—that is, the muscles of the trunk, shoulders and hips—and boys and girls during early adolescence need from two to three hours of such activity if they are ever to realize their maximum physical and nervous powers. Does this mean that "Have you done your climbing and jumping for today, Junior?" should be added to the maternal query as to the day's consumption of vegetables? Such extreme vigilance on the part of parents would do more harm than good, for the modern emphasis on establishing a liking for exercise, Calisthenics have their place, especially in an adult program for keeping fit. But with the child just encourage his enjoyment of the activities he thinks are fun and you'll be taking nature's most reliable tip as to what will aid his proper physical development.

Finally, consensus of physical education experts that early specialization in a single sport is a disadvantage, rather than an advantage, should relieve your mind of the fear that your child may miss his chance to win championships later on unless you choose a sport for him when he is still too young to know his own preference, and keep him persistently at it.

### Salem

By Mrs. W. C. Rogers

The farmers are taking advantage of the nice dry days about gathering corn, feed, and hay. With the abundance of rain the past season, all the crops are fine except cotton, which is a very short crop.

Several families from this community attended the singing convention at Stephenville Saturday and Sunday.

Mrs. W. D. Nelms returned home last Wednesday from Hamilton, where she had visited her son, Mr. D. G. Nelms, and Mrs. Nelms.

Misses Verna Mary Childress and Para Lee McDowell of Duffau spent Friday night with Miss Mary Alice Crist.

Mr. and Mrs. H. W. O'Bryant and children of Stephenville spent Sunday with her parents, Mr. and Mrs. S. P. Saffell and daughters.

Duane Crist and Marshall Rogers left for West Texas to seek their fortunes too. We wish them luck, too.

Miss Oleta Hunter visited friends in Duffau Friday night.

Mr. and Mrs. J. H. Albright and children of Selden spent Sunday in the home of Mr. and Mrs. W. C. Rogers and daughter.

Erwin Berrin of Altman and Harold Crist left Saturday night for Fluvanna, Texas, where they have employment.

Miss Nora Mae Driver spent Saturday and Sunday in Stephenville visiting friends.

Mrs. Wylie McPhaden of Hico and Mrs. Anna Thompson and two daughters of Big Spring visited a while Monday afternoon with Mr. and Mrs. Goog Lambert.

Mr. and Mrs. J. W. Scott and son Von were accompanied to Fort Worth this week by Mr. and Mrs. Elmer Scott and children, Mr. and Mrs. Julian Scott, Mr. and Mrs. Everett Scott and daughter, Betty Jo, and Mr. and Mrs. J. H. Ripley and children, all of Johnsonville, to visit Mr. and Mrs. James Thompson and children.

Mr. and Mrs. H. G. Driver and Mrs. J. C. Laney visited Sunday with Mrs. Callie Roberson at Hog Jaw.

Mr. and Mrs. Hubert Waugh and son, Hubert Eugene Jr., spent last Sunday evening with Mr. and Mrs. S. P. Saffell.

Mr. and Mrs. L. C. Reed left last Sunday for Old Glory, Texas, where they have employment.

Mr. and Mrs. S. E. Tunnell spent Sunday in the home of Mr. and Mrs. Bob Fort at Cranfill's Gap.

Mr. and Mrs. J. W. Moore and Mr. and Mrs. Buster Moore and daughter of Falls Creek spent Sunday in the home of Mr. and Mrs. Bob Fort at Cranfill's Gap.

Mr. and Mrs. J. W. Moore and Mr. and Mrs. Buster Moore and daughter of Falls Creek spent Sunday visiting Mr. and Mrs. Roy Moore and daughters, Gean and Kay.

Mr. Edd Phillips of Duffau visited Sunday with Mr. and Mrs. J. C. Killebrew.

Mr. B. B. Elkins and children of Stephenville visited Thursday and Friday of last week with her sister, Mrs. J. D. Lambert, and children.

Mrs. Carrie Alexander of Waco spent the week end with her parents, Mr. and Mrs. W. E. Koonsman.

Miss Winnie Moore spent the week end at her home at Cedar Point.

Mr. and Mrs. Ira Bright and children attended the Driver-Lockhart reunion at Stephenville Sunday.

Mr. Wayne Muse of Louisiana spent last week with Mr. and Mrs. S. P. Saffell and children.

Mr. Jim Montgomery of Comanche is visiting this week with his cousin, Mrs. W. E. Koonsman, and Mr. Koonsman.

Mr. and Mrs. Edd Crist and daughter, Mary Alice, and Tina Rogers visited Monday evening at Altman in the home of Mr. and Mrs. Henry Inger and son, Paul.

### Clairette

By Nila Marie Alexander

Rev. Jewel Greenwood, the Baptist pastor, filled his regular appointment here Sunday at 11 o'clock and Sunday night.

Next Sunday night, Sept. 28th, is our regular singing night. We are expecting a good singing and lots of visitors. Everyone is invited to come and take part.

Mr. R. M. Alexander, Mrs. Alice Fenley and daughter, Zelma, and Mr. and Mrs. Thurman Alexander of Hico visited in Waco last Saturday.

Several from here attended the State singing convention at Stephenville Sunday.

School will start here next Monday, Sept. 29.

Mr. and Mrs. D. E. Whitesides and family spent Saturday night in the home of Joe Alexander.

Miss Joylette Abel of Fairly spent Saturday night with Misses Rita and Vita Roberson.

Mr. and Mrs. W. E. Alexander Jr. and little son, Lynn Paul, spent Saturday night in the home of Mr. and Mrs. Wm. E. Alexander. They left out Sunday morning for Wichita Falls to make their home, where Mr. Alexander is working.

Mr. and Mrs. Arthur Lambert and James Edwards of Dallas visited homefolks over the week end.

Rev. Jewel Greenwood was a guest of Mr. and Mrs. Henry Hardin Saturday night. They also attended the singing convention at Stephenville Saturday night.

Mrs. W. W. Head and children and Mrs. Susie Salmon were guests of Mrs. Bonnie Alexander last Friday.

## LETTERS from Readers

### IREDELL INVENTOR CLAIMS TO HAVE "DEATH RAY"

To the Editor, Hico News Review:

Associates and myself have developed, I believe, the world's most gigantic invention in modern warfare. It's the Death Ray. We have tested same in a miniature way by exploding gasoline cans, also killing rabbits, at a distance of 1000 feet, which proves beyond the shadow of a doubt that the principles are basic and sound. We are getting ready to build large-scale models, believe we can build Death Rays capable of bringing down a fleet of airplanes quickly and equal to an army of more than a million men against invasion, which proves the merit and magnitude of same.

Hitler got his foothold by securing the best brains he could get to build up his war equipment. Now it will require the world's best brains to beat him.

He conquered the various nations of Europe by creating horror and fear amongst men, women and children. Now we can reverse it a hundred-fold with the Death Ray, causing a panic of fear in Hitler, his armies and the Axis gang. Make them believe that they would be mopped off the earth quickly. Would make them turn into the world's greatest cowards and surrender to any terms the Allies would suggest. By so doing this would shorten the war and save millions from being killed or crippled for life, also relieve untold suffering amongst women and children in the war-torn zones of the world. Being so destructive, it would really be humanitarian—a Christian act instead of murder.

Which, I believe, is paramount in the hearts and minds of all loyal, patriotic Americans.

To help bring the world back on a fair, safe and sane basis, create new hope and joy amongst the nations now in despair.

O. A. JACKSON, R. F. D. 1, Iredeil, Texas.

### Peace Officers Of Central Texas Study FBI Work

WACO, Sept. 15.—One hundred and two Central Texas peace officers, meeting in a body with officials of the Federal Bureau of Investigation, were explained their part in the FBI national defense mobilization plan when they gathered here Friday.

Congressman W. R. (Bob) Poage, the principal speaker, stressing world conditions and particularly the present national crisis, declared that co-operation of local and state officers with the FBI is essential if this country is to protect its internal security.

"The peril which this nation faces is at present far greater than that which faces the individual and it is for this reason that all necessary steps must be taken to insure protection of our vital industries which are contributing to each individual's well-being," he asserted.

"I would like to repeat a statement made recently by one of our commentators to the effect that the nations which choose to follow the dictators are certainly following them—in chains. The reason for this is that they didn't take the necessary steps to purge their countries of the fifth columnists who were operating within not for the well-being of the country but for its eventual downfall," he said.

The speaker was introduced by M. W. Acers, Acting Special Agent in Charge of the San Antonio Division of the FBI.

Exactly double the number of agencies were represented at Friday's meeting as compared to the number represented Friday whereas there were only 25 represented previously. This conference attracted 197 persons, including guests, as compared to 72 in May.

These figures, according to Acers, show the tremendous increase in the interest of local and state officers who are responsible to such a great extent in this country's welfare.

Acers also pointed out that there were eleven counties represented at this conference as compared to thirteen counties included in the May meeting. The Waco session was the second in a series of 19 conferences being conducted by the FBI throughout Central and South Central Texas.

### Sportsmen Are Scratching Heads Over New Laws

Austin, September 24.—Central, South and West Texas hunters, fishermen and others who take either a sporting or professional interest in field and stream already are scratching their heads over new wildlife legislation passed by the recent Regular Session of the 47th Legislature.

The lawmakers passed 195 wildlife bills, almost one per day, and thus set a record. Only 19 of them were general bills, that is, applicable to the State as a whole.

A multitude of the local bills apply to Central, South and West Texas Counties. In all 44 Counties in that portion of the State are affected, according to the Executive Secretary of the Game Commission.

The general bills passed provide that:

It is unlawful to take muskrats from the bank of another without permission, whether or not the land is enclosed.

Prairie chickens may not be hunted until September 1, 1946.

Deer, with certain exceptions, must be removed from storage by June 5th of each year.

Doves may be taken during the open season now in progress. But this law was amended in certain particulars by Federal regulations which control the shooting of migratory birds and waterfowl.

Carrier pigeons, or homing pigeons, may not be killed or molested at any time.

Persons may not catch fish in parks under control of the State Parks Board without the consent of the caretaker or superintendent of the park in question.

Hunting in public parks under control of the State Parks Board is prohibited.

Non-resident, alien, and artificial lure licenses are no longer required of those fishing for sport in salt water. They still are required for those fishing in fresh water.

The coastal shrimp season was modified and the 5 1/2 inch shrimp length limit was repealed.

Golden eagles, or Mexican brown eagles, abundant in the western part of the State, may be killed at any time.

There follows a brief summary of new legislation passed by the 47th Legislature applying to Hamilton County. Officials emphasized that the list does not include all game and fish laws applicable at present, but that it summarizes only those laws enacted by the recent Regular Session of the Legislature.

Fishing in Hamilton County:—May use set nets of one and one-half inch square mesh at any time to take suckers, buffalo, carp, gar or shad, but may not take or possess any other fish when using these devices. Unlawful to use drag seines or drag nets at any time, except 20-foot minnow seine to take minnows for bait. Unlawful to take fish by gieging, roping, snaring, grappling with hands, or by use of grab hooks or fish traps of any kind. May take catfish or perch at any time of year with trotlines, throw lines, set hooks, or ordinary pole and line. Size limit on catfish, 19 inches. Unlawful to sell or buy any catfish taken in County. Unlawful to take minnows for purpose of sale or to transport from County more than 125 minnows at any one time.

There follows a brief summary of new legislation passed by the 47th Legislature applying to Hamilton County. Officials emphasized that the list does not include all game and fish laws applicable at present, but that it summarizes only those laws enacted by the recent Regular Session of the Legislature.

### Dental Defects Rank First In Draft Rejections

"Nothing in recent years has more graphically called attention to the seriousness of the American dental health problem than the present defense crisis," said Dr. Geo. W. Cox, State Health Officer.

"The figures of the National Draft Board show that dental defects rank first as cause for rejection of draftees. Nineteen and one-half per cent of young men examined at army induction centers are rejected because of dental defects.

"These figures reveal the inadequacy of our dental health programs during the past generation and the public's inertia toward this vital phase of health. If this problem of dental health is to be solved, it must be done at its source, which is the child.

"From surveys made by the United States Public Health Service, of two million school children throughout the United States, it is estimated that approximately 90 per cent of the elementary school population are in need of dental care. To solve this problem the public must be aroused to the gravity of the status of dental health and its effect on general health. This should be accompanied by an intelligent, effective dental health program in our schools, impressing both child and parent with the importance of dental health.

"Since the health of the community is a community problem, the aid of all civic and welfare organizations in the community should be enlisted to carry out the program of dental health. It is only in this way that we can bring our children to adult life free from the devastating effects of untreated dental defects which so influence their physical, mental, and social well being. It will also contribute to his usefulness to the community and better enable the individual to assume the responsibilities of citizenship, whether in time of war or peace."

### Map Shows Importance of Invaded Iran

This map shows the importance of the little country of Iran which has been invaded by the British and Russian forces to quell an alleged coup by the Germans. Arrows show the points of invasion by the British and Russian armies. Gen. Archibald Wavell who commanded the British in Africa led the main British detachment from the south while the Soviet troops pushed down from the Caucasus in the north. Iran is important because (1) it contains rich oil fields that Germany could profitably use and (2) even more important, it possesses a strong geographical position if the principal war action between Germany and Russia shifts from the East to the West during the coming winter months. Military experts believe that when the cold winter weather sets in, the Nazis will have to push their invasion by a southward route. Iran would be in a most important position to the cause of Russia and Great Britain.

### Home Demonstrator Gives Good Advice On Fall Gardens

Farmers should take "time out" from cotton picking long enough to free the garden of weeds and plow the soil three or four inches deep. If the ground breaks up cloddy, chop up the clods until the soil is thoroughly pulverized. If this is done now, you will be ready to plant fall vegetables as soon as moisture permits. As soon as the garden soil is prepared, secure a supply of vegetable seed. Don't limit your fall garden to turnips and greens alone. There are other vegetables such as carrots, beets, English peas, radishes, beans, collards, cabbage, mustard and lettuce that will grow as well in the fall garden as turnips and greens. Try them this year and see for yourself.

Early vegetables should be heat proof. I would suggest mustard greens, using the Tendergreen variety. An ounce of seed will plant 100 feet of row. With proper moisture you should harvest "a mess of greens" in thirty days. Back yard farmers should infringe on flower beds and plant a couple of ounces of mustard seed. An ounce of Purple top or Shogoin turnip seed planted in rows will take care of another 100 feet of row in the garden. Two pounds of onion sets will plant a third row, while two or three rows of full Irish potatoes will contribute further to the food supply. Twenty-five or thirty foot rows of radishes will add savor to the

table. Scarlet Globe or White Icicle are good varieties for fall and winter.

With this done, fill an old tub or box about two-thirds full of dirt, mixing equal parts of rotted manure and loam soil. Then plant about 1-4 ounce cabbage seed, taking care not to cover more than 1/2 inch deep. When the weather cools off, the cabbage plants will be large enough for transplanting. Copenhagen market is a good variety for most Texas gardeners to use.

Cool season vegetables should not be planted until October, because hot weather causes the tender plant to burn. To the early planting, the following vegetables may be added. A hundred feet of carrots, using the Nantes or Denver's half long varieties, will provide the family with this vegetable throughout the late winter and early summer. Beets should be grown as a fall, winter and spring vegetable, using the Detroit Dark Red variety. Be sure to thin the plants when they have attained a height of about three inches, in order to encourage early growth. Spinach thrives best in limy soil and under cool climatic conditions. It must have good drainage. Once it has started growth, it does better in areas of limited moisture. Bloomsdale Savoy would be our choice.

Late in October you will find that the cabbage or collard plants that were started in the box or tub in September are large enough to be transplanted into the garden. A frame garden will contribute a good supply to fall vegetables. A

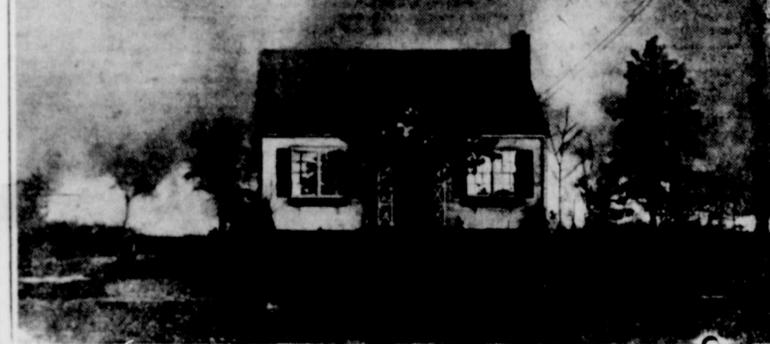

structure 4x20 feet, made of planks and with a cloth or glass sashover, can be depended upon to produce fresh vegetables such as mustard lettuce, onions, radishes, beets and carrots until Christmas. This same bed may be used in the spring for starting tomato, cabbage, pepper and other plants for transplanting to the open garden. Extension circular 121 "Frame Garden Suggestions" gives details on construction and operation of a frame garden. Leafy vegetables grow especially well in the frame garden.

### The House That Didn't Burn

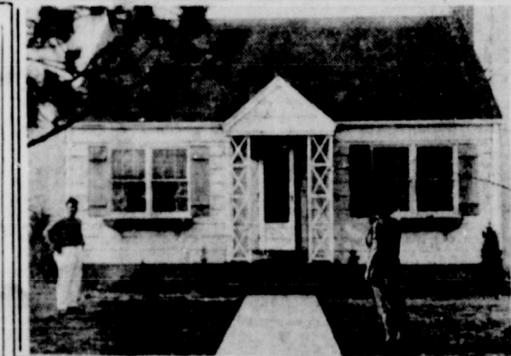

This bright new house withstood a sea of fire. Though flames licked at its walls, and showers of sparks and glowing embers fell on its asphalt shingled roof, it successfully withstood the full fury of a rampaging forest fire that laid bare and black the countryside around it.

It happened only a few weeks ago on Long Island, within 50 miles of the teeming city of New York. A forest fire was sweeping through the pine forests, engulfing trees, brush, grass—everything combustible—that stood in its path. Relentlessly, it moved upon this nearby cottage. Firemen worked feverishly to turn it aside—to stop it, out to no avail. The flames came on, finally wrapping long, whip-like fingers around its walls and roof.

Step by step the firemen were forced back. The house was now barely visible as a country photographer, recording the progress of the fire, took one last photograph before fleeing with the others.

A half hour later he returned. But instead of the seared, gaping hole in the ground, with its gaunt chimney, that he expected to find, there stood the house, apparently untouched. Inspection revealed only two cracked basement windows and slightly blackened walls. The re-

(Above) This picture, showing the flames already whipping around the house, was taken only a moment before it was completely obscured by dense smoke. (Below) This was taken when the photographer returned a half hour later, expecting to find the house burned down. Instead, he found that the fireproof siding and the fire-resistant asphalt shingled roof had saved the house from damage.

mainder was in perfect condition, although it stood at the forefront of a black, charred field that had once been forest and garden.

Only one thing had spared this home, firemen explained. That was its fire-resistant exterior, which

### BACK HOME . . .

● We are both glad to be back in Hico, and hope we are here to stay. Our shop is completely equipped to serve every need.

● Painting, Body and Fender Work, New and Used Tires, New and Rebuilt Batteries, Salvage Parts for Some Cars.

● First Class Mechanical Work

● New Cars and Trucks

● 93 Used Cars and Trucks
