THURSDAY, AUGUST 26, 1976

NUMBER 25

Steve Bland World All- Around Cowboy

Steve Bland, nineteen year old son of Mr. and Mrs. R. L. Bland of Trent, formerly of Ozona, was named world's champion all around cowboy of the American Junior Rodeo Association after the finals rodeo in Snyder, Texas.

Steve completed the season with a total winnings in money and prizes of 9,000.00. He finished as world's champion in optional roping, reserve champion in steer wrestling, 3rd in bareback riding, and 4th in tiedown roping. He was also all-around winner of the finals rodeo in Snyder.

Steve began riding in rodeos in Ozona as early as 1960. He is now a sophomore at Southeastern Oklahoma State University where he is a member of the world's champion National Intercollegiate Rodeo Association team.

Miss Seahorn Receives ASU B. S. Degree

Ruth Rebecca Seahorn of Ozona was among 204 students receiving degrees from Angelo State University during the University's summer commencement program. Ms. Seahorn received a Bachelor of Science degree.

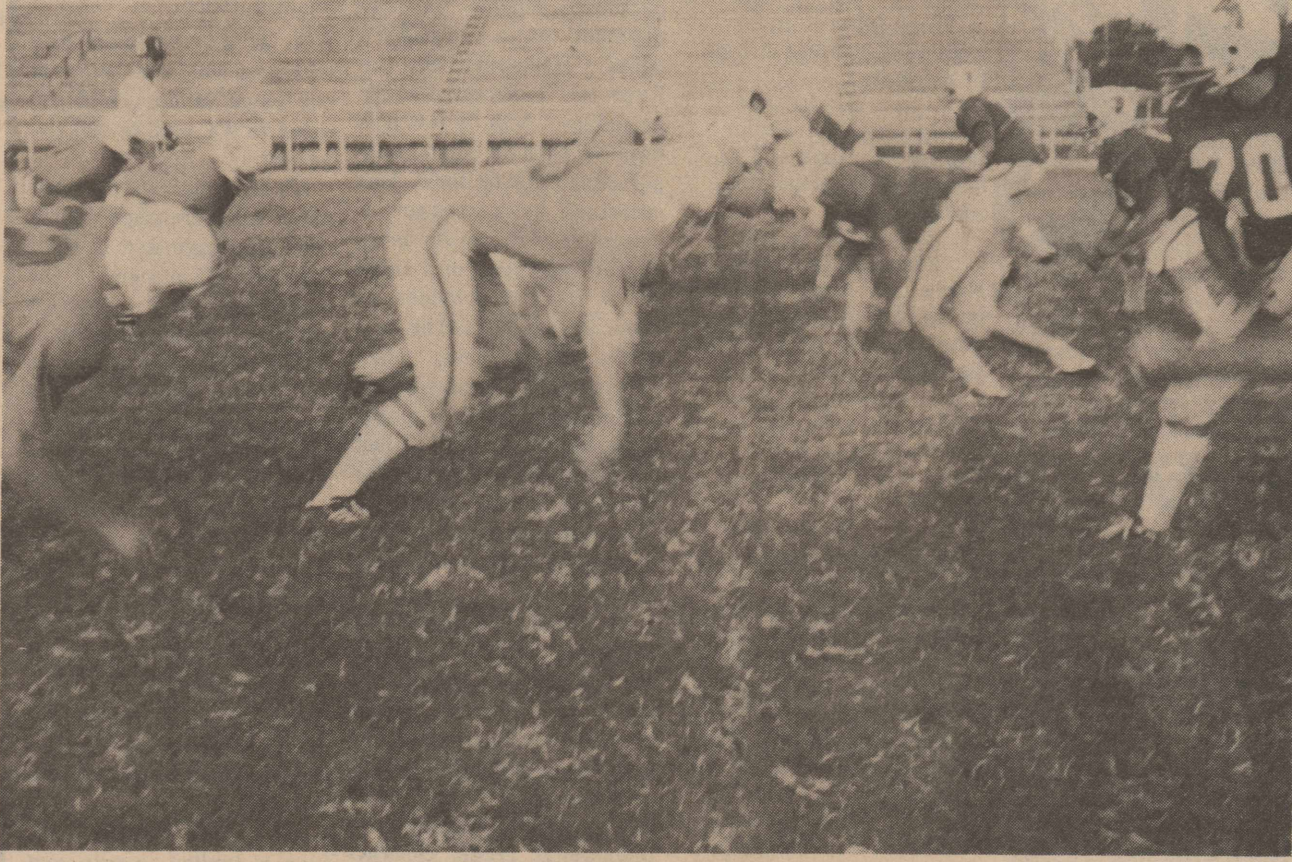

Featured speaker for the summer commencement was Dr. Bryce Jordan, president of the University of Texas at Dallas.

Of the 204 persons receiving degrees Friday, 29 were master's degrees and 175 were bachelor's degrees.

County Field Gains Third Producer

The Crockett County portion of the Whitehead multipay field gained its Third Strawn producer and a 4 3/8 mile west extension with completion of Amoco Production Co. No. 1 Joe T. Davidson, 13 miles southeast of Ozona, for a calculated absolute open flow of 1,100,000 cubic feet of gas daily.

Production was through perforations at 9,492-625 feet, which had been acidized with 3,000 gallons. (SEE OIL - PAGE 8)

OZONA LIONS IN ACTION -- The Lions looked good Friday night in an inner-squad scrimmage and fans were numerous too. The empty visitor's stands in the background indicate how partisan the crowd was. That, along with the fact that the sun was still high and hot. Coaches

Jim Williams and Rip Sewell, far left, are dressed for the weather as the Lions, padded and suited out, give a preview of what this season might be like. The team will scrimmage Rankin Friday night same time, same place. It will be the first workout with another squad.

Lions To Scrimmage Rankin In First Action Of Season

Ozona Lion football fans will have an opportunity to see the 1976 Ozona Lions in action against the first outside competition Friday night when the Lions host Rankin in a controlled scrimmage. Action begins at 6 p.m.

Couch Rip Sewell expressed high hopes for this year's Lions after an intersquad scrimmage last Friday night saw the Lions moving the football well on the ground and in the air. Coach Sewell said most of the emphasis would be placed on defense in the scrimmage tomorrow night.

Sixty-five players make up the varsity and junior varsity teams this year. Twelve returning lettermen will make up the basic structure of the varsity. The junior varsity will be in Garden City for a scrimmage tomorrow night, also to begin action at 6 o'clock.

Coach Sewell was especially pleased last Friday night to see the Lions' offense move the ball for a total of 757 yards, and feels this is a good sign so early in the season. The Lions scrimmaged for 80 plays. They rushed 47 times for a total of 494 yards and completed 20 of 33 pass attempts for

another 263 yards. Three running backs looked unusually good for the first action of the season, all returning lettermen. Orlando DeHoyos, 170-lb. senior, rushed for 138 yards on 9 carries; Blake Moody, 170-lb. junior, rushed for 155 yards on 12 carries, and Gary Warren, 170-lb. senior, had 167 yards on 14 carries.

Coach Sewell commented on the crisp blocking of the interior line, led by such stalwarts as Eugene Hood, 175-lb. senior letterman, at center; Ricky DeHoyos, 160-lb. senior letterman, at right guard; Sam Longoria, another 160-lb. senior letterman, at left guard; Javier Reyes, 200-lb. junior letterman, and Douglas Bean, 195-lb. junior, both performing at right tackle, along with Mike Fay, 170-lb. senior letterman, at left tackle. Both right ends, John Galvan, 170-lb. senior letterman, and Sterling Lay, 195-lb. senior transfer, blocked well and caught eight passes between them for 128 yards. Clifford Crawford, 170-lb. senior letterman, blocked well at left end and caught a pass for 30 yards.

Both quarterbacks, Vaden Aldridge, 150-lb. senior

letterman, and Danny Sewell, 140-lb. sophomore up from the junior varsity, performed well. Aldridge hit 13 out of 24 passes for 150 yards and Sewell had 7 out of 9 for 113 yards. Coach Sewell said the scrimmage was mostly to see what the offense could do. They found out they could move the ball, he said, and that is what puts points on the scoreboard. This is a bit of a switch from past years when defense was stressed and the philosophy was "the best offense is a good defense." So fans may expect to see more razzle dazzle scoring while the defensive line holds the opponents.

Other varsity team members and their positions are Randy Allen, QB, 160-lb. junior; Joey Borrego, HB, 145-lb. sophomore; Steve Pagan, HB, 160-lb. junior; Clyde Bailey, FB, 190-lb. senior letterman; Felipe Castro, Center, 190-lb. junior; Omero Flores, Center, 160-lb. sophomore; Max Schroeder, guard, 180-lb. junior; Cruz Garza, guard, 160-lb. junior; Ricky DeHoyos, guard, 160-lb. senior letterman; Jim Sosa, 165-lb. junior guard; Bill Dudley, tackle, 175-lb. junior Estalfo Vargas, tackle, 200-lb. junior; Ben Badillo, end, 145-lb. senior; John Henderson, end, 175-lb. senior; Bruce Whitley, end, 160-lb. senior; and Victor DeLaGarza, end, 160-lb. junior.

Assistant coaches are Jim Williams, Tom Wilson, Wayne Palmer, and David Porter. Statistician is Brian Gries. Jim Horkit is team manager this year.

The first game of the season will be Friday, September 3, with the Reagan County Owls at Big Lake. Although the two teams are not pitted in a conference battle, the annual game brings out the competitive spirit on both sides and will be an exciting one for the season opener. All games this season begin at 8 o'clock.

The first home game will be with Marfa September 10. The Lions will also host Eldorado Sept. 17. They travel to McCamey September 24 to

Roping Club Sets Benefit Event Aug. 28

The Ozona Roping Club has planned a day of events to benefit the American Cancer Society Saturday, August 28. Activities include a steer roping, a barbecue and a dance, all to be held at the rodeo arena.

The roping will get under way at 1 o'clock in the afternoon. The entrance fee for 4 steer is \$26, progressive after 3 head. The barbecue will be held at 6:30 p.m. with tickets \$2 for adults and \$1 for children under 12.

The dance will begin at 9 p.m. at the platform. Music will be furnished by The Westerners, a western music band from San Angelo, and the same band which furnished music for the rodeo dances. Tickets will be \$3 per couple or \$2 per stag.

Lt. Sanchez Awarded A.F. Wings

Second Lieutenant Richard A. Sanchez, whose parents are Mr. and Mrs. Jose M. Sanchez of 236 Santa Rosa, Ozona, Tex., has been awarded silver wings upon graduation from U. S. Air Force navigator training at Mather AFB, Calif.

Lieutenant Sanchez now goes to Kadena AB, Okinawa, for flying duty with a unit of the Pacific Air Forces. The lieutenant, a 1970 graduate of Ozona High School, received his bachelor's degree in 1974 from the University of Texas at Arlington. He was commissioned in 1976 through Officer Training School, Lackland AFB, Tex.

Attorney For County Files Answers To Civil Suit

Answers have been filed on behalf of Crockett County and all officials named in a Civil Suit filed in U. S. District Court by four Ozona men asking that the results of the Democratic Primary be set aside and further asking that there be no General Election in November for the posts of Crockett County Commissioner in Precincts 1 and 3.

The suit was filed July 28, in Northern District Court, San Angelo Division. The four men Hector DeHoyos, Robert Flores, Jesse Fierro and Armando Reina, claiming to speak for the Mexican American Community in Crockett County, claim in the original action that the precinct lines as redrawn in 1974 by the Crockett County Commissioners Court discriminate against the Mexican American segment in the county.

Objections to the lines came about after the Voting Rights Act of 1965 was amended by the Congress to include Texas on August 6, 1975. The Act requires that any difference in voting procedure from that in effect November 1, 1972, must be approved by the U. S. Attorney General.

Shortly after this amendment became law, a group of Mexican Americans made a protest to the court on precinct lines between precincts 1 and 4. After several meetings attorney George Korb, on behalf of the Mexican-American group, and attorney Lucius Buntun, for the county, met with the court and interested persons and reached what was thought to be an equitable solution for both sides, in a called meeting October of 1975, the defendants and plaintiffs met in an all day session with their respective attorneys. The meeting closed with an agreement on both sides after the line between precinct 1 and 4 was altered and 75 voters were moved back to precinct 1.

Both sides agreed to the lines at that time and the proposal, as altered, was submitted to the U. S. Attorney General's office by County Judge Troy Williams. Due to all information required and time involved, the proposal was not submitted until January of 1976, but still in plenty of time for a decision to be made within 60 days and well in advance of the first Democratic Primary. Correspondence continued between the Justice Department

and the county, but no official objection came until July of 1976, shortly before the suit was filed against Crockett County, most elected officials in the county and John R. Hunnicutt in his capacity as Democratic Party Chairman.

In the defendants' original answer, these facts are brought to the attention of the court, as well as the fact that the plaintiffs participated and voted in both primaries. Also, it is pointed out that one of the defendants actively worked on behalf of the unsuccessful candidate for commissioner in precinct 1.

W. Spiller Receives MED Degree

Walter M. Spiller of Ozona was one of 246 students receiving degrees from Sul Ross State University August 13 during commencement exercises.

Mr. Spiller received his MED degree. Keynote speaker for the ceremonies was Dr. Kenneth Ashworth, commissioner of Higher Education of the Coordinating Board, Texas University System.

The Plea in Abatement points out that the letter from the Attorney General's Office received July 12, 1976 voicing objection to the lines, arrived some four to five days past the statutory deadline, and asks that the court take no action until a final ruling is made. The first defense denies most allegations made in the suit and questions the plaintiffs' rights to speak for the group they claim to represent. The defense claims that the objection by the Department of Justice is invalid, since a sixty-day period lapsed between the submission of the plan and the objection. The defense further claims that the plaintiffs are not proper representatives of the class which they claim to represent. The defense claims the redistricting was done with the cooperation of an association representing Mexican Americans and accomplished the purpose of assuring minorities that their vote was not diluted or abridged on account of race.

The answer was filed on order of District Judge Halbert O. Woodward. The court will order a hearing on the matter as soon as possible following receipt of the answer.

School Enrollment Up By 8 Students

Enrollment figures for all Ozona schools numbered 999, according to a report issued by Superintendent Foy Moody, after classes began Monday. The figure is up over the first day last year by eight students. The enrollment figures are nothing to compare to last year's jump of 71 students over the previous year, but do indicate that Ozona's growth pattern is holding its own and up slightly over last year.

The enrollment figures are expected to jump in all schools following the Labor Day holiday, as they have in past years. Labor Day will mark the first holiday in the fall term and it will be observed September 6.

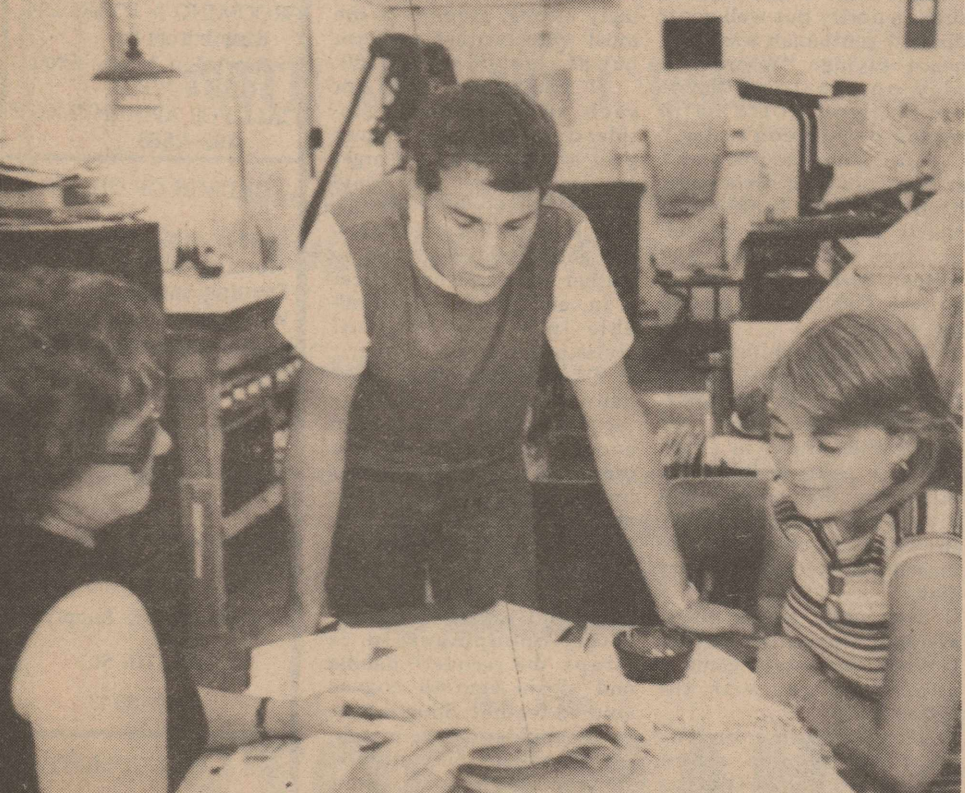

Total students enrolled in Ozona Primary School Monday were 256, up thirteen students over the first day of school last year. Of this number, 93 were kindergarten students, 108 were first graders,

and 73 were second graders. Ozona Intermediate School enrollment was 306 Monday, down 18 from first day figures last year. Third graders numbered 64, fourth graders, 72, fifth graders, 86 and sixth graders, 84.

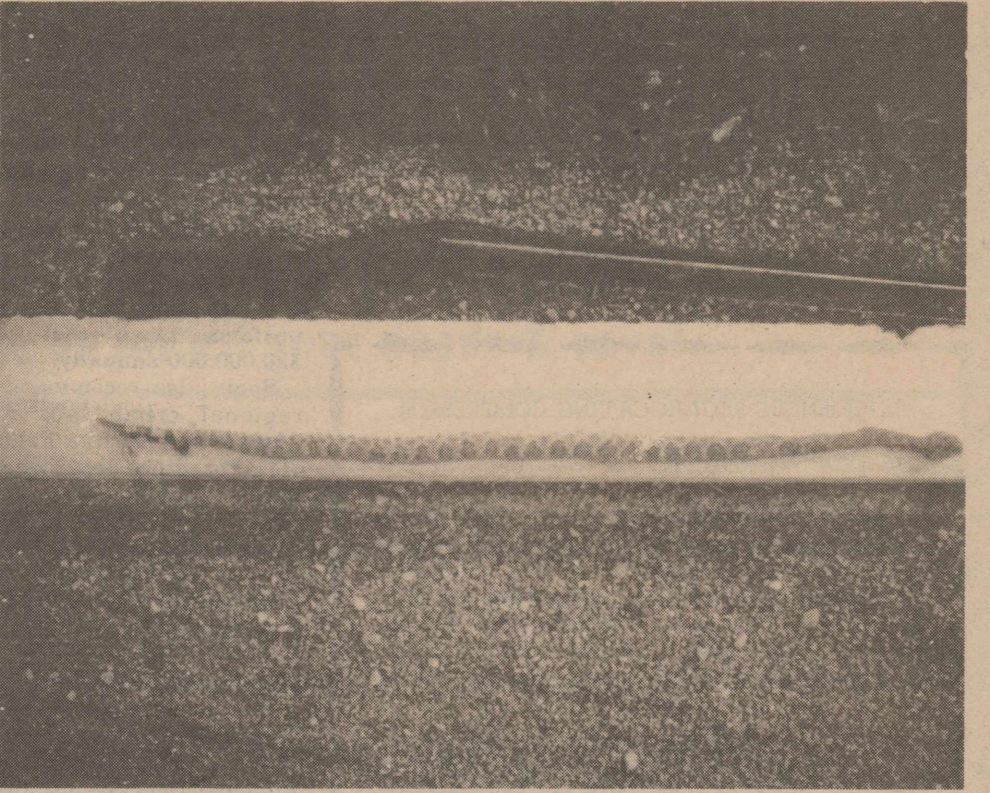

Junior High School enrollment as of Monday was 175, a jump of seven students over last year. Of this number there are 93 students enrolled in seventh grade and 82 in eighth grade.

High School enrollment was up six students over first day enrollment last year. Of the 262 students enrolled, 84 are freshmen, or ninth graders; 64 are sophomores or tenth graders; 57 are juniors and there are 57 members of the senior class.

All schools increased enrollment with the exception of Ozona Intermediate, but overall enrollment was up slightly.

CRANKING UP FOR THE LIONS ROAR - Kity Montgomery takes time out to make some suggestions for the Ozona High School newspaper, THE LIONS ROAR, which will be a part of the Ozona Stockman until the end of school. John Henderson, editor-in-chief, will be assisted by Helen Bunger and two other senior girls not pictured, Hope Phillips and Carmen Delgado. The first issue will be published next week.

RATTLESNAKE TIME? This is the second deadly rattlesnake killed recently on the nature trail which is bordered by Fairview Drive on the north and the Carlisle Clinic on the south. Visitors to the trail should be cautious especially this time of the year. The youngster who killed this snake said he had killed numerous small ones of the same vintage. Needless to say, the small variety is just as deadly as the larger.

Nuclear Proliferation

The United States has intervened dramatically, and most probably unsuccessfully, in an attempt to prevent Pakistan from joining the ranks of nuclear powers. This intervention came in the form of a letter from President Ford to Pakistani Prime Minister Bhutto asking Pakistan to call off its plans to purchase a nuclear reprocessing plant from France. Such a "reprocessing plant" would be capable of making bomb material from the irradiated "spent fuel" of civilian nuclear reactors. In short, it may enable Pakistan to make its own atomic bomb. Secretary of State Kissinger followed up the Ford letter with a personal visit to Pakistan in which he reportedly warned Bhutto that if Pakistan goes ahead with the deal it will result in a cut-off of U. S. military support.

It was a good attempt, perhaps, but much too late. The angry reactions of both Pakistan and France to U. S. meddling in their private business were all too predictable. "What is sauce for the goose is sauce for the gander," retorted Bhutto, referring, of course, to India's explosion of a nuclear device in 1974. It turns out that India apparently manufactured its device using U. S. "heavy water" in a Canadian-supplied research reactor, India was supposed to use both only for "peaceful purposes."

The nuclear genie alas is long since out of the bottle. Any nation which feels itself under a potentially mortal threat from a neighbor is going to develop any weapon it can to defend itself. Israel and South Africa undoubtedly have nuclear capabilities and will probably use them before they will submit to being overwhelmed by their enemies. Pakistan has good reason to fear India's intentions toward her, and in the face of India's nuclear explosion, would be remiss if she did not seek an equalizer.

Where else are such nations to find security in today's world? Not from the U. N., certainly, and not from a U. S. which will no longer play the role of world policeman.

Like it or not, we will all have to live with nuclear proliferation. The difference between an optimist and a pessimist may merely be the number of years he believes yet remain before someone pulls the nuclear trigger.

Spreading Untruths

Writing editorial opinion has many pitfalls, not the least of which is: "How accurate is the information on which to base one's opinion?" And if it turns out that the information used is inaccurate or untrue, then Ye Editor winds up with egg on his face-and sometimes through no fault of his own.

A case in point: A Ralph Nader "study group" has been propagandizing in favor of a Nazi Germany style of government control over business. And part of the argument used is the alleged inefficiency of the free enterprise system. To back that allegation, it is declared that "ineffective competition" is costing consumers 6.2 per cent of the GNP, or roughly \$90 billion in overcharges per year.

Who said so? Well, for one, Senator Philip Hart of Michigan. Another was no less than Thomas E. Kauper, Assistant U. S. Attorney for anti-trust, recently retired.

But then Barron's, the highly respected Dow-Jones financial weekly, looked into the matter. When a Barron's reporter checked with Mr. Kauper, it was found that Kauper had based his statement on a book written by Dr. Frederic M. Scherer, who was once the Chief Economist of the U. S. Federal Trade Commission (FTC). But when questioned by the reporter, Scherer admitted that he "threw scholarly caution to the winds" in arriving at his 6.2 per cent number. To put it more bluntly, there was absolutely no basis in fact for the declaration. The phony figure was thoroughly exposed in the October, 1974 issue of Barron's.

Of course the Nader "study group" should know better, and probably does. Unfortunately, unsuspecting victims, now knowing the unreliability of the group, can easily find themselves way out on the proverbial limb, should they pick up the misinformation and use it.

If there is a service which a consumer interest group, such as Ralph Nader's, can provide the public, it is accurate information and carefully drawn conclusions.

EXPERIENCED RECIPROCATING COMPRESSOR MECHANICS AND OPERATORS

A unique and growing engineering service company with worldwide operations, is looking for experienced mechanics and operators to staff compressor station located between Sheffield and Dryden in Terrell County. Wages commensurate with experience to \$6.50 per hour. Excellent benefits and opportunity for promotion.

Qualified candidates should contact KEN RENFRO, CREOLE-EAGLETON INC. McCamey, Texas 915/652-3255 or Fort Stockton, Texas, 915/336-3401 or 915/336-2438. An equal opportunity employer.

TIME TO PLUG THE LEAKS

STATE CAPITAL Highlights AND Sidelights

AUSTIN — Attorney General John Hill has ruled unconstitutional the Texas law limiting campaign expenditures in statewide races.

Hill based his decision on a recent U.S. Supreme Court ruling (Buckley v. Valeo) that a section of the Federal Election Campaign Act limiting campaign spending was an "invalid infringement upon the right of free expression guaranteed by the First Amendment to the United States Constitution."

The 64th Legislature passed a bill limiting candidates for statewide office in a general primary election or general election to campaign expenditures totaling 10 cents multiplied by the voting-age population of the state.

The runoff primary limit was set at four cents multiplied by the voting-age population. Candidates for State Board of Education were limited to campaign expenditures totaling \$1,500.

The opinion was requested by Secretary of State Mark White and Education Commissioner M. L. Brockett.

In other recent opinions, Hill concluded: — Comparable sales of farms and ranches should be considered in assessing the value of land used for agricultural purposes.

— County officials and employees can be paid for unused sick leave but are not entitled to interest on their matured but unpaid claims for accrued sick leave.

— The Railroad Commission is required to issue notice and conduct hearings in order to issue a formal declaratory ruling which requires an interpretation of a previously adopted Commission rule.

More Troopers Needed
Col. Wilson Speir, director of the Department of Public Safety, says he needs more troopers and is asking for a budget increase of 18% — \$97,600,000 for fiscal 1979.

Speir says the DPS is losing its battle to make Texans observe the 55-mph speed limit, despite the issuance of 700,000 tickets a year. He would like to have 1,000 more patrolmen added to the 1,481 now in uniform at a cost of \$20,000,000 annually.

Speir also recommends regional crime labs at Abilene and Wichita Falls. He is concerned about what may happen to his department's share of the Highway Fund if that share goes to the Department of Highways and Public Transportation.

Budget Cuts Ordered
The Legislative Budget Board wants state agency budgets for the next biennium cut 10 per cent unless the various agencies can justify specific increases. "Let's be hardnosed about this and tell all agencies we mean business," said House

Speaker Bill Clayton, who made the original motion. The board rejected Clayton's first proposal to direct the LBB staff to come up with 10 per cent cuts. Instead, the members adopted a motion that budgets should be cut when there would be no significant loss of services.

"We might as well be realistic about this," said Sen. A. M. Aikin of Paris, chairman of the Senate Finance Committee. "Are we going to apply this 10 per cent cut to the Highway Department?"

Sizeable revenue increases for the Texas Department of Highways and Public Transportation have been proposed by Gov. Briscoe. The governor has suggested giving the department an additional \$825 million to "preserve the Texas highway system from deterioration."

Briscoe said the system is imperiled by "an outmoded system of financing which offers no resistance to the ravages of inflation."

Those funds would go to the highway department by shifting moneys from other programs by: dedicating 75 per cent of the motor vehicle sales tax to highways; adding some \$45 million annually from sales taxes on tires, automobile parts, etc.; taking \$50 million annually from the Department of Public Safety; and adding \$100 million a year from Revenue Sharing funds.

New Medicaid Pact

The State Welfare Board has given up its five-week battle for a two-party Medicaid agreement, and awarded H. Ross Perot's computer firm a \$165.6 million contract to administer the state medical assistance program for the needy.

The board accepted the Dallas firm's low bid for the eight-month contract after negotiating sessions failed to produce a joint agreement between Group Hospital Services, Inc. (Blue Cross-Blue Shield of Texas) and Perot's Electronic Data Systems.

Blue Cross, which had administered the program since its inception in 1967, had been the next lowest bidder at \$167.3 million.

Commissioner Raymond Vowell recommended that DPW seek a joint contract with GHSI and EDS at the low bid. "The prices bid are so close and the variable factors of caseload and incurred claims so large that it is difficult to determine which bid would be the lowest cost to the state in all situations," he said.

Short Snorts

Lou Nelle Sutton, Bexar County's first woman state legislator, was sworn in last week to fill the unexpired term of her late husband.

The House Administration Committee has approved shifting the printing and enrolling duties to the Legislative Council. Mem-

SNIPS, QUIPS AND LIFTS by Lottie Lee Baker

Early to bed and early to rise, and you'll never see red in the whites of your eyes.

Some wives have cooled so many TV dinners they think they are in show business.

Youth: The first 50 years of your life—the first 20 of anyone else's life.

Failure is divided into two classes: Those who thought and never did, and those who did and never thought.

Mother Nature is a wonderful person-but she still can't jump from summer to winter without a fall-or from winter to summer without a spring.

The Break-Even Point: When you stop trying to balance the budget, and start budgeting the balance.

Gossips are often caught in their own mouth traps.

Mum's the word because chrysanthemum is too hard to spell.

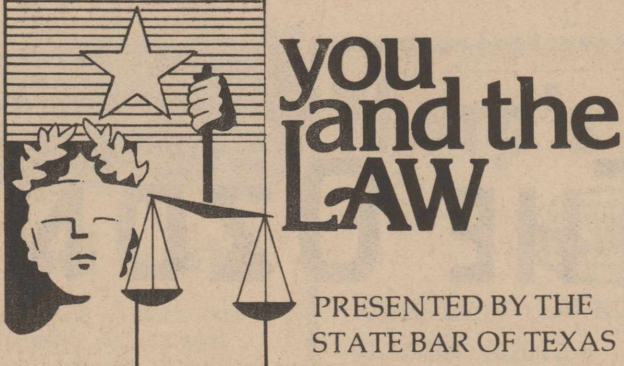

Some of the biggest problems for traffic planners are urban, suburban, and bourbon drivers.

No matter how well a woman carries her years, she's bound to drop a few once in a while.

For a community leader, life is a big bowl of charities.

A LIFT FOR THE WEEK Hats off to the past, coats off to the future.

bers estimate the savings will approximate \$175,000 annually.

Q: Can the Executor of a will be held personally responsible for any debts that may exceed the assets of a small estate? How are such debts disposed of, for instance the expense of a long terminal hospital stay?

A: As a general rule an Executor will not be personally liable for the payment of a deceased's debts. However, if the Executor violates a duty placed upon him by law it is possible that he could incur personal liability for a loss sustained by a creditor of the estate. Where the debts exceed the assets of a small estate the law provides an order for payment: The first debts to be paid, when allowed and approved, are those for funeral expenses and expenses of last sickness, not to exceed one thousand dollars; any excess expenses are treated as an unsecured claim against the estate.

Q: I bought a washing machine which stopped working within a week. The appliance company won't give me a refund, and the monthly payments are being collected by a finance company, which bought the installment credit contract from the appliance store, says it still expects me to pay. If I stop paying the finance company, can they sue me?

A: Your defense against a suit of this type depends on the date of purchase. If the sale was made after May 14, a new federal regulation allows the consumer to present a legal defense if suit

for non-payment is brought by a finance company to collect on an installment credit contract purchased from a retail store. The consumer can defend against the suit by showing the product was defective. Purchases made prior to May 14th are not covered by this regulation.

Q: If my husband dies without a will, what share of our home is our child entitled to if I need to sell the house?

A: If a married couple's home was purchased during their marriage and is their community property, the husband's half interest would automatically pass to his child if he died without a will. If the child is a minor, a guardianship must be created for the child before the home can be sold; if the child is over 18, he can join with the widow in the sale. The expense of a guardianship for a minor child can be averted by having a will prepared leaving the property to the widow.

Q: If my 17 year old son leaves home without permission, can we force him to return?

A: Juvenile Court jurisdiction is limited to acts committed by children after they are 10 years of age and prior to their 17th birthday. Unless your son already was under the control of the juvenile court, there is no law which gives you authority to force him to return to your home.

Send your questions to "You and the Law," State Bar of Texas, P. O. Box 12487, Austin, 78711. Answers may appear in columns in hypothetical terms; personal answers not possible.

Unsung Heroes Of America

JOHN SCULL'S NEWSPAPER
When John Scull came to Pittsburgh in 1786 with his printing press there were just six stores and 93 dwellings. Today, the great area of Southwestern Pennsylvania has a population of 2.9 million people.

Scull set up his small wooden press in a one-story structure behind his log house on Market Street. There on July 29, 1786, he began to publish the Pittsburgh Gazette, the first newspaper west of the Allegheny Mountains. The Gazette had three columns, cost six pence (in continental currency) and, while attempting to be nonpartisan, was conservative in tone.

Scull also ran a printing business and in 1793 produced the first book published west of the Allegheny Mountains, a satirical novel called "Modern Chivalry." Today there are many unsung heroes in the region now known as Penn's Southwest, which has two metropolitan daily newspapers, 95 daily

FIRST PITTSBURGH PAPER—The Gazette, was run off on small wooden press and cost six pence.

serve the nine-county area and one-eighth of all rail freight tonnage in the nation either originates, terminates, or passes through this vital area.

It's a far cry from the days when Scull started his newspaper.

TENNIS: PLAY IT WITH STYLE

As with other forms of recreation, winning or losing isn't nearly so important as how you play the game. This year more than ever the tennis buff is expected to play with style.

In a California tennis shop, a portly but well-coordinated gentleman was overheard saying: "When you play on the John Wayne courts, you gotta be in whites or you don't play."

Most tennis courts aren't so classic in their dress code, however. In fact, most courts are a blaze of colors this year as men and women rush to the net in striped T-shirts and matching shorts.

Even tennis whites have a surprise smash of color. Men's white shorts sport tricolor stripes down the leg. Rather Gucci in effect and very chic. White tennis skirts for the ladies might hide flashes of orange, strawberry, chocolate or lime in inverted pleats. Very kicky.

The adult tennis player averages four or five outfits. If your own style game is under par, get with the action.

If your game on the court needs more action, take a tip from Olympic athletes. A light meal before the game is the way to go. Carnation Instant Breakfast mixed with whole milk supplies plenty of food energy

and bounce. Maybe that's why it's the official instant breakfast of the 1976 Summer Olympics in Montreal.

There's still more action in the racquets themselves. The newest thing is a frame of graphite. Light yet amazingly strong, graphite is the most elite racquet you can buy at a cost of about \$160.

If you're not ready for such an investment, consider dressing up the racquet you already have. Forget novelty canvas and vinyl covers. What you want this year is something with quality and class. The genuine leather tennis racquet cover is in, and happily it's available in a wide range of styles and prices.

Twenty-five dollars buys quite a respectable leather racquet cover with a large enough pocket for several tennis balls. Fifty dollars buys a double racquet cover attached to a satchel, providing room for clothes and towels as well. And forty dollars buys the mind-blowing banjo cover that's definitely oneupmanship. It wraps the racquet—handle and all—in smooth cognac colored leather. Sling it over your shoulder by the matching strap and stride purposefully onto the court. Your opponent is dead.

Even if you don't usually care for strenuous sports, how can you resist such a dashing game?

Tips For Gardeners

From the Ozona Garden Club by Mrs. Bailey Post

Though vacation time and summer relaxation is almost over, another two months of more or less dry, hot weather is still in store, unless the usual pattern changes.

Watering will likely be your most critical task during the hot, dry days of August and September.

This time may be a low point for many gardeners, but there is still much life and beauty left in our rows of vegetables and beds of flowers, even though they may not look like it. Its just a matter of rejuvenation, yours and the garden's.

What we do now does show quick results. Newly planted grass soon greens up barren areas, cleanly cultivated and refertilized tomatoes produce new crops, and freshly seeded hardy flowers come up quickly and can soon be potted.

Weeds are a far greater problem right now than insects and diseases. Hoe out the weeds and mulch heavily.

Flowers and vegetables that have finished performing should be pulled up and removed to make room for fall plantings. You can replace most flowers with hardy potted chrysanthemums, calendolas, pansies and snapdragons.

Many times we forget about the growth bloom set, and bloom cycle of plants, causing us to do harmful things to our plants. For instance, dogwoods and azaleas are setting buds now, so watch the use of fertilizer around them, or you might impair the bloom set. By now camellia buds are swelling. Give plenty of water to these plants.

Now is the time to take stock of how your garden grew this summer. If you were not satisfied, first take a look at your soil. Probably the greatest numbers of failures come from poor soil preparation. Hard baked ground indicates a lack of humus and fertility.

The abuse of our soil is avoidable. Too often we add no humus and the soil becomes lifeless, hard to work, poorly drained, and generally non productive. In such instances, it might be wise to avoid a fall crop, and concentrate on a rebuilding program. Turn the area deeply, fertilize lightly, and seed crimson clover late this month. This legume produces excellent top growth for turning under next spring as well as large amounts of nitrate nitrogen from the root nodules. Even flower beds and old lawns respond extremely well to this revitalizing program. Work the soil right and it will work for you - producing more beautiful flowers and a more abundant harvest of vegetables.

MRS. ROGER GARREN HILL
... nee Miss Louise Perner

Miss Perner Becomes Bride Of Mr. Hill

Miss Alice Louise Perner became the bride of Mr. Roger Garren Hill in a 7 o'clock ceremony August 14, in the Ozona United Methodist Church with Rev. Ben Bohmfalk, pastor, officiating.

The bride, given in marriage by her father, wore a formal gown of silk organza and beaded Alencon lace. The peaked Empire bodice featured a deep V neckline and was fronted with a wide border of beaded lace. The long candlestick sleeves repeated the lace detailing at the wrists and a band of the beaded lace rimmed the top of the deep organza flounce at the hemline. The slender skirt flowed into back fullness to form the chapel-length train. The bride carried a cascade bouquet of blue and white sweetheart roses centered with a large Cattleya orchid. Her three-tiered veil of silk illusion was caught with a beaded lace cap.

Maid of honor was Luann Perner, sister of the bride. Bridesmaids were Lucy Perner, the bride's sister of Ozona, Mrs. Jane Jameson of San Angelo and Miss Susan Busch of Fort Worth. Flower girl was Charla Hardin of Iraan. The attendants wore floor length gowns of sky blue and leaf green with blue-green floral overdrapes of filmy chiffon. They carried nosegays of blue and white spider mums and roses.

Paul Hill of Odessa at-

tended his brother as best man. Groomsmen were Steven Hill, Allan Hill and Glynn Jameson all of San Angelo. Ring bearer was Garren Hill of San Angelo. Ushers were Mike Perner of Friendswood and Stephen Sloan of Saganaw.

The bridegroom's brother was the soloist accompanied by Mrs. Sara Hignight at the organ.

The church was decorated with candelabras holding white tapers entwined with Fuji mums and Gypsophelia. Arched candelabra behind the altar were draped with greenery. Palm trees surrounded the altar and pews were marked with white satin bows and Fuji mums.

A reception followed the wedding in the fellowship hall. The bride's table was centered with a three-tiered wedding cake, made by Mrs. Ed Shep-

person, and decorated with the blue and white sweetheart roses surrounded with greenery. The candelabras held blue tapers and were entwined with white mums. The bridegroom's table was centered with an arrangement of bronze, red and yellow mums and white roses and greenery with a single candelabra holding a blue taper decorated the registry table. Mrs. Shepperson also made the traditional bridegroom cake.

After a trip to California the couple will be at home September 1 in San Angelo where the bridegroom is a student at ASU and a night auditor in a motel. The bride is a recent graduate of ASU.

Out of town guests included Mrs. C. D. Hardin, Mrs. Charles Ray Hardin, Cole and Cody, of Iraan, Mr. and Mrs. Bill Sloan, Vivian, Cindy and Susan, of Hico, Mr. and Mrs. Chris Perner of Friendswood, Mrs. Era Bryant of Lubbock, Mrs. Leona Agnew of Odessa, Mr. and Mrs. John Bubenaldt of Midland, Mr. and Mrs. R. O. Parker of Kingsland and Misses Audrey Carey and Leslie Carey of Roby.

From San Angelo there were Mrs. Margaret Hill, Mrs. Fannie Williamson, Mr. and Mrs. Percy Williamson, Mrs. Steven Hill, Mrs. Mildred Boren, Miss Lisa Godwin, Mr. and Mrs. Gordon Aikman, and Miss Deborah Mathews.

Parties honoring the bride before the wedding included a coffee July 30 in the home of Mrs. James Childress with assisting hostesses Mrs. Weldon Maness, Mrs. George Montgomery, Mrs. O. D. West, Mrs. B. B. Ingham Jr., Mrs. Tom Powers, Mrs. Floyd Holdt, Mrs. Jerry Hayes, Mrs. Eldred Roach, Mrs. James Chapman, Mrs. Max Morris, Mrs. Louise Appel and Mrs. Harold Shaw.

A house plant shower and supper given by the bridesmaids August 9, a coffee in San Angelo, August 10, and a kitchen shower July 19 given by Mrs. Charlie Boy Davidson and Christy.

Debra Says

by Debra Price

Are you ready for school to start? It's that time again. It is also time to organize the 4-H food project groups. All boys and girls between the ages of 9 and 19 are welcome to join a group to learn to cook and eat healthy foods. Please call 2-2721 if you want to enroll in a 4-H food project.

Adults are also needed to help with the groups. 4-H leader and member food books are available from the Texas Extension Service. Make your routine different this fall and participate in the 4-H program.

Shower Curtain Made From Sheets Take advantage of August bedding sales to buy sheets for decorative purposes as well as bed use. Sheets are reduced seven to sixteen per cent, depending on the store and manufacturer.

Brighten up a bathroom with a colorful cloth shower curtain made from one flat sheet. This sheet, used with a plastic liner or an old clean plastic

shower curtain, will make a tub-size curtain. Permanent pressed sheets make their care a breeze, but pre-wash before using for decorative purposes.

To make a shower curtain out of a sheet, first turn the bottom edge one-half inch to the wrong side, then fold up a three-inch hem and stitch. Pressing after each turn or fold of the sheet will assure an even hem.

If the sewing machine has a decorative stitch use it for added appeal.

The second step is to turn the top edge one inch to the wrong side then turn it one inch again to form a double one-inch hem and stitch. To hem the sides, turn each edge down one-half inch, then turn once more one inch and stitch.

Identify holes for hanging the fabric curtain by placing the plastic liner against the wrong side of the sheet with top edges even and mark. Make a three-eighths-inch button hole at each mark.

Place hooks through the button holes in the curtain and then through holes in the liner. Hang on the rod with the liner on the inside of the tub and the fabric curtain on the outside.

THE OZONA STOCKMAN

ENCHANTED ISLAND

It was too good to be true. Suddenly I found I had the opportunity to visit the land of my dreams — a tropical island! It was long ago when my beloved "rolling stone" uncle visited my home, brimming with stories of the fascinating, delightful South Seas. I had been convinced that life in this land would be a forever-happy thing.

And now the magical moment had come. I found that the sky was, indeed, bluer than blue, the flowers brilliant and luxurious, the sea clear and everchanging. Yes, it was all this and more.

But one day as I stood on the shore listening to the roaring rhyme of the waves, I realized that I was no happier than I had been before. I discovered that my problems were within me. How could I have assumed that happiness would be guaranteed on an enchanted island?

These thoughts prompted me to return to my church which I had ignored for many years. Here I found my faith was renewed, and I found self-respect and understanding that come from loving God and doing His will. I sensed anew that no man can expect to experience true happiness without Him. Hurry to your church — there to find the ingredients to make your days and your life glad and secure.

Screwworm Control Aid Sought By ICA

The Independent Cattle-men's Association is asking ranchers throughout Texas to cooperate fully with new federal guidelines aimed at controlling a screwworm outbreak now gripping the state.

The new guidelines, applied to all counties in Texas by the U.S. Department of Agriculture this week, require spraying of all cattle within 72 hours of any planned movement to Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi or Tennessee.

Those seven southeastern states have climates in which screwworm flies can "over-winter" and set up a disastrous situation for next year. Movement of cattle to states other than those seven is not affected.

ICA President T. A. Cunningham of Goliad pointed out that the spraying requirements now being applied to all Texas counties have previously been in force in 39

The Scientists Tell Me... The Identity Discovered of the Mysterious Killer in Bitterweed

By Robert L. Haney
TAES Science Writer

In the western half of Texas grows a bitterweed that's a multi-million dollar killer of sheep, goats, and sometimes cattle. Such shocking annual losses sustained each year by producers may soon be reversed due to the discovery by scientists of the killer ingredient and its experimental antidote.

Consumers will benefit who appreciate the great textile qualities of wool and mohair or savor leg of lamb or cabrito (goat) barbecue, indirectly, you see, consumers help bear the cost of such losses through higher prices.

"Animals grazing bitterweed can eat only a little of it and get ill but recover," says Dr. B. J. Camp, one of the scientists who did this research for the Texas Agricultural Experiment Station, in cooperation with scientists at Sonora and College Station.

"The average poisonous dose is 1.3 per cent of the animal's weight and the plant is more poisonous during drought," Camp says. "Of course, that's when other grazing is most scarce and when an animal is most likely to eat bitterweed."

The poisonous substance in bitterweed is an alpha-methylene-sesquiterpene lactone whose antidote is L-cysteine, according to

Camp. He gives equal credit to fellow researcher, Dr. H. L. Kim, who is also a toxicologist in the College of Veterinary Medicine at Texas A&M University.

Scientists have long sought the cause of poisoning from bitterweed. Now we know the substance and have an experimental antidote.

But research by the range scientists with the Experiment Station shows that prevention is still the best cure. Dr. Leo Merrill, a Texas Agricultural Experiment Station scientist at Sonora devoting much research to grazing management, confirms that good range management is one of the most effective methods of avoiding bitterweed problems. Merrill says that the 4-pasture system on the Sonora Station, in the presence of bitterweed, has had no sheep losses.

However, in many parts of West Texas, loss of ground cover from periodic drought and short-time overuse during seasonal dry periods have resulted in continual bitterweed poisoning problems. Extended droughts in 1917, 1918, the 1930's and 1950's greatly intensified the bitterweed problem.

Poisoning problems are aggravated by fluctuations of the weather aside from droughts, Merrill says. Bitterweed poisoning may intensify during periods of freezing

temperatures and ice storms, and when early fall rains encourage early emergence of the bitterweed plants.

Bitterweed is spread by water, soil and livestock, according to Dr. Charles Scifres, a range scientist with the Experiment Station in College Station.

Scifres says that bitterweed has several years' reserve of seed in the soil that will keep replenishing bitterweed infestations regardless of control and management efforts. Therefore, economically feasible control efforts that may be employed for several successive years, if necessary, are badly needed.

A number of herbicides, applied in very low dosages at the right time, will give 100 per cent control of existing growth. Trouble is it's all to do over again next year, and the next, and the next... At present, in an effort to counter this, a residual herbicide is added to 2-4D to kill seedlings.

Another problem is that many of the herbicides also kill desirable plants that livestock need for grazing. Further studies are planned for this.

An astonishing side effect of the herbicide use is that the bitterweeds, in dying, don't immediately dry up. Instead, for a short time, they increase their water retention and become extra palatable to livestock. And at that time, livestock can apparently eat the bitterweed without being poisoned. A note of caution - sheep are sometimes poisoned when eating sprayed bitterweeds.

Currently, research is concentrating on developing a low-cost antidote for use on poisoned animals and seeking economic chemical control of presently infested ranges.

At the same time, range management practices are being studied that will prevent reinfestation of treated rangeland.

MEET THE BRUSH CONTROL SUPERSTARS

Dee Sims-Three Rivers Flying Service and TORDON* 225 Mixture can help you get more forage from your range.

Dee Sims is a professional. He, his crews and equipment are licensed by the Texas Department of Agriculture. Call Dee Sims today. Ask him to help you set up a program of brush and weed control. He has the product and the know-how to help increase the quantity and quality of your forage... the carrying capacity of your range.

TORDON 225 Mixture Herbicide is a brush control superstar, too. It's a consistent performer against mesquite, pricklypear, tasajio and many other undesirable species threatening to take over your valuable rangeland. It kills brush above and below the ground. When applied according to directions by a certified, professional applicator, it will give you good long-lasting control. Effective brush control helps you improve both the quantity and quality of forage... increase the livestock carrying capacity of your rangeland.

Savings Bonds Sales At 29% of Goal

June sales of Series E and H United States Savings Bonds in Crockett County were reported today by County Bond Chairman, Lowell Littleton. Sales for the six-month period totaled \$8,822 for 29% of the 1976 sales goal of \$30,000.

Texas sales during the month amounted to \$21,078,018, while sales for the first half of 1976 totaled \$139,566,833 with 51% of the yearly sales goal of \$272.4 million.

COUNTRY CLUB BRIDGE

Reddy's helpful tips for your Home Laundry

PLAN AHEAD

Sort clothes according to type of fabric, color-fastness, degree of soil and garment construction. You'll save both hot water and electricity by doing similar items together. Accumulate a full load before running your washer.

BE SELECTIVE

Choose the cycle that is precisely appropriate for the clothes you are washing. Is a "hot" temperature setting really necessary? Except for heavily soiled items, most loads will come clean in either a cold or warm wash. Look into cold wash detergents.

Use the least amount of detergent that will get your clothes clean — most loads require only an ounce or less!

Overloading causes extra strain and wear on your equipment; check the manufacturer's recommendations for load weight. Balance your load by alternating small and large items.

FOR SAFETY SAKE

Be sure control is "off" before reaching into your washer.

If one is necessary, use only a heavy duty extension cord.

Be sure your washer is grounded.

Keep dry cleaning agents, color remover and Fibregas out of your washer. It's a good idea not to wash clothes containing cleaning fluids in your washer.

Plant Bluebonnet Seeds Right Away

If you're planning a cover of Texas bluebonnets for the home landscape next spring, seed should be planted as soon as possible.

"Seeds must be sown by late August if blossoms are wanted next spring," emphasizes Everett Janne, landscape horticulturist for the Texas Agricultural Extension Service.

"Late summer planting is essential as bluebonnets are actually winter annuals," explains the Texas A&M University System specialist. They germinate in late summer, exist as a small rosette of leaves throughout the winter while developing a good root system, and then grow rapidly during the spring rainy season to produce acres of blue flowers.

Many seeds are wasted each year due to improper planting, notes Janne. Just tossing the seed into a grassy area along the road or in the corner of the yard does little else than provide expensive food for birds.

Germination is also a problem. Poor germination usually occurs unless something is done to soften the hard seed coat to allow moisture to penetrate.

"The oft recommended practice of puncturing the seed with a needle or ice pick will work but is rather time consuming as well as hard on the hands. Scratching the seed coat between two layers of sandpaper that have been glued to boards will also help," says Janne.

To treat large quantities of seed, the horticulturist suggests mixing them with sand and tumbling them in a cement mixer to scratch the seed coat. Or, they may be soaked in warm water (about 130 to 150 degrees F.) for a few days, changing the water at least daily until the seed feel soft.

After treating, broadcast the seed on tilled soil, firm the soil, and water. Keep the soil moist until seedlings appear—usually in a week to 10 days.

"Once established, bluebonnets seed themselves year after year provided the seed has been allowed to mature, grass or weeds haven't become too thick, and there has

been sufficient rain in July and August to soften the seed coat. With a late summer drought, it would be advisable to soak the bluebonnet seed several times to assure good germination," points out Janne.

Because of the poor stand of bluebonnets this spring, seed will be in short supply so you may have to put off planting until next year, he adds.

Mrs. James Baggett recently returned from a month's tour of Europe. She was accompanied by her sister, Mrs. Steve Corder of Odessa. Since her return she has been entertaining her grandchildren at the ranch prior to the opening of school.

ICA Asks Meat Import Restriction

The Independent Cattlemen's Association has called on the U. S. Department of Agriculture to show that American meat producers—already crippled by foreign meat imports—won't be further hurt by USDA's proposal to let the Republic of China, Taiwan, ship meat into the United States.

ICA President T. A. Cunningham of Goliad said that any imports permitted from Taiwan should be restricted within overall limits set by the existing Meat Importation Act. "If Taiwan simply got a chunk of existing import trade, then we wouldn't be hurt any worse than we are already," Cunningham

said, "but if these are new and additional imports, then for every pound an American stockman suffers."

The USDA has said its proposal to let Taiwan export meat to the U. S. is based on findings that Taiwan meat processing standards are at least equal to the U. S. meat inspection program.

"Assuming this is correct, it represents some protection American consumers don't now have with the millions of pounds of imported meat coming here," Cunningham said, referring to ICA's efforts to pass federal legislation requiring better inspection of foreign packing plants which ship meat to the United States.

Cunningham said also that ICA would like to see the Agriculture Department "show us that this is truly a proposal of the USDA instead of another example of the State Department using agriculture as a pawn in foreign policy."

Miss Trout Is Wed To Mr. Olson

Miss Rhonda Sue Trout became the bride of Gerald Wayne Olson in a Friday evening ceremony at Hope Lutheran Church in Sonora, Rev. A. B. Wagner, pastor, officiated.

Parents of the couple are Mr. and Mrs. Royce Trout of Denver City and Mr. and Mrs. George D. Olson of Ozona. Sharron Chumley of Odessa was maid of honor and Donald Olson, brother of the bridegroom, of Lubbock was best man.

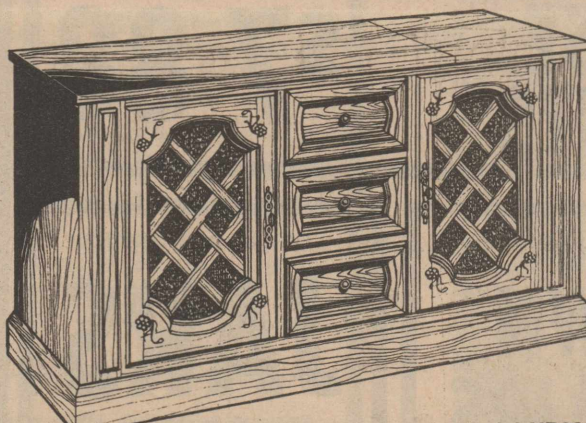

The bride is a 1976 graduate of Denver City High School. The bridegroom, a 1973 graduate of Ozona High School, attended Texas Tech and is presently employed by Delta Drilling Co.

Following a wedding trip to Dallas, the couple will be at home in Ozona.

you and the LAW
PRESENTED BY THE STATE BAR OF TEXAS

Q: My husband has two school-age children by a former marriage. His ex-wife has remarried and the children are using her present husband's name in school. Don't the schools have to use the student's name as shown on the birth certificate?

A: Many schools have a policy of requiring that a copy of a birth certificate be furnished when a student enrolls. However, Texas public schools are not required by law to use the birth certificate when they enroll a student. The legal names of children whose mother divorces and remarries remain unchanged unless they are changed by a court order.

Q: If I give my share of my community property to my wife and pay a gift tax, will this allow her to avoid paying a federal estate tax?

A: If the value of the gift exceeds the \$30,000 lifetime exclusion and the \$3,000 annual exclusion, there will be a gift tax. Whether the property given will be included in the husband's estate for the federal estate tax will depend on the facts and circumstances of the particular transaction. The property might be included in the husband's estate as a gift in contemplation of death, or as a gift with a retained life interest.

Q: My husband and I bought a house 10 years ago and we recently received letters saying we have to buy some kind of insurance. The notices said our house payments would be increased to include the policy payments. Can they do that even though

I don't want the policy?

A: State and federal laws provide that mortgage companies must protect their interest by requiring the homeowner to provide fire and extended coverage insurance for the property on which the loan is made. The mortgage holder can require insurance coverage in the amount no greater than the balance of the loan. The law permits the mortgage company to increase the homeowner's monthly payments sufficiently to cover the cost of this insurance.

Q: I was given a ticket for driving without a license when I was stopped for speeding. I had a license at the time but did not have it with me. Will I have to pay a fine for not having my license?

A: State traffic laws require persons driving vehicles to carry a drivers license; however, the law also provides that the judge must dismiss the charge if you present in court a drivers license which was valid at the time the ticket was issued. Although the law provides for ultimate dismissal of a charge where a person has a license, but failed to have it in their possession, motorists should remember that a drivers license could become of critical importance in the case of an accident where identification could help notify relatives.

Send your questions to "You and the Law," State Bar of Texas, P.O. Box 12487, Austin, 78711. Answers may appear in columns in hypothetical terms; personal answers not possible.

Miss Davis Engaged To Mr. Bailey

Mr. and Mrs. Nolan Q. Davis, Jr. of Seymour announce the engagement and approaching marriage of their daughter, Paula Annette to Mr. James Robert (Jim Bob) Bailey, Jr. son of Mr. and Mrs. James Robert Bailey of Ozona.

The wedding is planned for November 13 at First Baptist Church in Seymour. Miss Davis graduated from Seymour High School and attended Tarleton State University and Texas Tech. She was Miss Rodeo Texas in 1974.

Mr. Bailey, a graduate of Ozona High School, received his B. A. Degree from Texas Tech last semester and is presently engaged in ranching with his father here.

- Roy Heintz
- Evodia Garcia
- Domitila Alvarez
- John Paul Dunlap*
- Larry McMann

*denotes dismissal

MISS PAULA DAVIS
---to wed Mr. Bailey

Mrs. Stephen Perner, and Mr. and Mrs. Sam Perner spent several days in Hico last week visiting Mrs. Perner's daughter, Mrs. Bill Sloan, and her family.

4-H Food Groups To Organize

Enrollment for the 4-H food project groups will begin August 26. Please call the Extension Office 2-2721 or the Ozona Community Center 2-2710 to enroll. All youths between the ages of 9 to 19 are welcome to participate.

Volunteer leaders work with small groups of 4-Hers, teaching them "how to cook" and "the foods that make you healthy". The climax of the food projects is the county 4-H Food Show. Each youngster selects one food and prepares it for judging.

4-H member and leader books are available at the Extension Office. Any adult that is willing to assist with a 4-H food group should call the Extension Office.

Mohair Market To Continue Strong

The strong mohair market is expected to continue into the Fall, growers learned here Thursday (Aug. 19) during the summer directors meeting of the Mohair Council of America. The meeting drew about 100 persons interested in the mohair industry, including producers, warehousemen, buyers, researchers and one mohair producer from Australia who is visiting in Texas to learn about the American mohair business.

Clifton Mackey of Greenvale, Victoria, is on a month's tour of the mohair producing region of Southwest Texas. He commented that Australian mohair growers are vitally interested in Angora goat improvement and he wanted to see for himself what American producers were doing. "I have enjoyed my visit here very much," he said. "Everyone has made me feel right at home."

Mackey was one of several special guests attending the meeting, chaired by James T. Hunt of Sonora, the Council president. Other officers of the organization are Sid Harkins of Sanderson, vice president, and Bob Childress of Ozona, secretary-treasurer. The trio reported in depth on their recent visit to South Africa where they attended a meeting of the International Mohair Association. The IMA is in the formative stage, and is patterned after the Mohair Council, Harkins stated. When it becomes completely operational, the IMA will promote mohair on a world-wide basis. The men pointed out, however, that the IMA would not replace the Mohair Council as the American promotional organization. Although no formal action was taken on whether the U.S. will

participate fully in the IMA, most growers and directors seemed to think that the U.S. should work closely with the international group. The next annual meeting of the IMA will be held in June, 1977, at San Antonio, Hunt announced.

In other business, the directors approved the annual audit of the Council and voted to continue the election of directors for 1977 in the same manner as in years past.

The Council, faced with decreasing fund reserves, reported completing its past fiscal year some \$85,000 under its budget.

SS Visit For Sept. Scheduled

Garland Gregg, social security representative for the San Angelo Social Security office, has scheduled his September visit to Ozona. He will be at the County Courthouse on Wednesday, September 15th from 10:30 to 12:00 noon.

Anyone who wants to file a claim for benefits, get information, or transact other business with the Social Security Administration may contact him at this time. Persons who are unable to meet with him are encouraged to call the office in San Angelo. Residents of Ozona may call toll free by dialing "Operator" and asking for "Enterprise 2058."

MISS DARLENE WILKS
....bride-elect

Wilkes-Boyd Engagement Announced

Mr. and Mrs. H. H. Fuller of Midland announce the engagement and approaching marriage of their daughter, Wynemah Darlene Wilkes, to Kirk Lamar Boyd, son of Mr. and Mrs. Ray Boyd of Ozona.

The ceremony will take place at 2 p.m. Sept. 25, in the home of the bride-elect.

The bride-elect is a graduate of Lee High School. She is presently employed in a Midland bank.

Mr. Boyd, a graduate of Ozona High School, received his B. S. degree in pharmacy from the University of Texas in Austin. He is presently employed at Gibson's Pharmacy in Midland.

--0--

DIAL 392-2484 OZONA, TEXAS

A good opportunity exists for stockman to stretch the benefits of recent rains in the Crockett S. W. C. D. Livestock should be grouped where possible and graze a minimum number of pastures. This will also allow other pastures rest for range improvement and a buildup of forage reserve for grazing in winter months and dry periods.

The rains have stimulated the protein and mineral content of range forage above the normal for the late summer months. Grouping of livestock into fewer pastures will encourage grazing on opportunist type plants that make most of their production following rain. This will relieve the grazing load on the deeper rooted perennial plants in deferred pastures. The deep rooted perennial plants are the ones that have to carry the grazing load during dry or stress periods.

Oil—

(CONT'D FROM PAGE 1) and fractured with 35,000 gallons and 12,000 pounds of sand.

The Strawn was topped at 9,340 feet and the Eilenburger at 10,200 feet on ground elevation of 2,369 feet.

Originally drilled to 8,500 feet as a wildcat and abandoned June 11, 1973, it was re-entered in April as a water well to deepen to 11,100 feet. Drilled to 10,250 feet, it was plugged back to 9,940 feet and amended to the above field.

Location is 1,520 feet from the south and 1,320 feet from the east lines of 17-TG-GC&SF.

The Sutton portion of the field has seven Strawn producers and two Canyon wells, one of which is dually completed from the Strawn.

Football—

(CONT'D FROM PAGE 1)

heard the Badgers in their den. It's back home for the Lions October 1, when they host Seagraves, and then to Alpine on October 8. The Lions will host Junction Oct. 15 before having an open date.

Conference play begins October 29 when the Lions host the Crane Golden Cranes. The second of the three district games will be with Kermit, there, Nov. 5, and the Lions close out the season here Nov. 12 against the Sonora Broncos.

Season tickets for all the Lions home games are now on sale at the office of the superintendent.
