# Scurry Find Flows Oil At Higher Rate

Oil was flowing at a higher rate at Lion Oil Company No. 2 E. C. McLaughlin, Pennsylvanian discovery in Southwest Scurry County.

After a 1,000-gallon acid treatment through perforations at 6,592-6,614 feet, the new field opener kicked off and flowed to pits until cleaned out.

Operator then turned the flow to tanks for two hours. Through a one-half-inch choke, the venture produced at the rate of 55 barrels of oil per hour. No water developed. Gravity of the petroleum was 43 degrees. Gas-oil ratio was 1,000-1. Casing pressure was 600 pounds. On last report, the pay opener was still flowing. Operator plans to perforate a section covering about 20 feet slightly above 6,585

### Let's Stay On Top

The proposed merger of American Overseas Airlines with the trans-Atlantic division of Pan American Airways may raise a question in some minds. It may even bring accusations of monopoly. For the three principal American lines on this route (Trans World Airline is the other) carry 75 per cent of the passenger traffic. And all three are operating at a profit.

But even if there were only one American line flying the North Atlantic there would still be competition. There are four major foreign companies on the same run. And though they are dividing only a quarter of the business among them, it is quite possible that their percentage of profit is higher.

Prices among these competitors are fixed by international agreement. But the foreign lines are owned and operated by their own governments. The American lines, on the other hand, are only partially subsidized. Our government guarantees a minimum payment for air mail, and that's the extent of it. Yet it reportedly costs an American line twice as much as the British line and three times as much as the Dutch to operate a plane at the fixed tariff.

So it can be seen that while they have most of the business, the American lines cannot afford to run many half-empty planes across the ocean. And lack of capacity business seems a big reason for the proposed AOA-PAA merger.

In a way, American air and ship lines on the Atlantic are in the same fix, although the airlines obviously have the best of it The SS America is the only one of our ships convention of the Popcorn Processors Association, they U. S. Supreme Court but the Sentrumped, then South takes two that can compete for the "luxury" trade with Britain's two Queens and other big passenger liners, and this competition is not very keen. American air equipment is on a 000,000 class. So if there ing the marketing season just closed par with its competitors', and it is more numerous. Yet both types of carrier must face the problem of much higher labor costs and incomplete subsidy.

Foreign airlines are buying the latest and best American equipment. Our lines must do the same, if they are to enjoy supremacy in at least one of the two means of transoceanic trave. And with new Boeing Stratocruisers at 000,000 pounds. Average for the last about \$1,500,000 a throw, that is quite an item.

If a merger of two lines can help maintain that supremacy through more efficient operation, and can reduce the government's subsidy expense in the process, the question of monopoly seems academic rather than realistic.

14-Year-Old Youth Charged In Robbery Of South Texas Bank

CORPUS CHRISTI-(P)-Ramon Rico, 14, was arrested Wednesday in connection with the robbery of \$9,000 from the Corpus Christi National Bank on November 23. The boy was charged in federal court with juvenile delinquency.

He told police and federal agents he walked into the bank a little after noon, strolled through an open bank vault, put a canvas sack containing the money into a cardboard carton and carried the carton back out through the front

The boy's mother, two brothers, a brother-in-law, and sister were charged with receiving the bills. \$4,538 Recovered

Federal Bureau of Investigation Agent Ross D. Wolcott said the alertness of a teller at the State National Bank was responsible for the recovery of \$4,538 of the money and arrest of the Ricos. Wolcott said that on December 17,

Theodore Vasquez, a brother-inlaw of Ramon, went to the window of Paul Jones, the teller, and asked to change 300 one-dollar bills into larger bills. Jones gave him the money, but

took his name, address and description. The entire family then was placed under surveillance by FBI

agents and city police. U. S. Commissioner J. A. Mount set bond for adult members of the family at \$2,500 each. Mount set bond on Ramon at \$1,500. They are being held at the county jail. Helen Rico, the juvenile sister, was released on her own recognizance.

#### Affecting Boredom Makes Girl Appear Immature To Others

By ALICIA HART NEA Staff Writer

Don't be afraid to show your youthful enthusiasms The young girl who assumes an

indifferent attitude because she thinks such a manner makes her appear more grownup is only making her immaturity more evident. Few truly poised women look or act bored with life.

A lively interest in other people and in what is happening around you is one of the most endearing personality traits a girl can possess. However, that endowment doesn't mean that you have to adopt an unwavering everythingis-lovely outlook. But whenever you see a chance to appraise a person or situation wholeheartedly, don't stifle your impulses.

If your little brother scores a triumph on the basketball court, let him know that you are proud to be his sister. If your Mom gets decked out in her best party dress, tell her that she looks like a million. If a girl chum snatches off the prom date with the most popular boy in school, don't try to belittle her conquest by assuming an air of bored indifference. Instead, tell her that you think her boy friend is a lucky guy and that you know she'll be the belle of the ball.
