Sugar Beets For Floyd County? Developments during the past month have Floyd County farmers a little puzzled as to just where they stand in the overall picuture if sugar beets are to come to the Texas high plains. Several years ago interested farmers and business men met and formed a Floyd County Sugar Beet Association. They were prompted to take this action by beet boosters from the Hereford

cash crop. Richard Stovall was

some good licks working on their to cast their lot with the Plain-

Many of the county organiza-view on Monday night and intions have patterned their set-ups form them of this decision.

the high plains showed the folks order to be included for an acre-

Once efforts had reached this pecially if this is the only way to point there seemed to be a parting of ways. Hereford was in-county, terested in securing a mill for

their city and have some definite Of course there are some 20 or plans for such. Holly Sugar Cormore areas in the United States peared at the Seattle World's ence to Titov's remarks and said with Mr. and Mrs. Pete Hicker-from Ft. Polk, Louisiana, where locating there and backers have a sugar mill and in getting the Fair and, in his message, replied that the Russian's remarks were son.

Loran was stationed while in the an option on a proposed building beet acreage that goes with it. to Soviet Cosmonaut Gherman ". . . like a little earthworm Mr. and Mrs. Corkey Guffee, Service. He has been discharged

only the approval of the government and the allocation of beet acreage to back up the operation. Now Great Western Sugar Company is taking a close look at the Plainview area as a prospective building site. Plainview was as a prospective building site. Plainview New Jersey August 24, to embackers had not been talking too bark for France to serve the rest loud until they had things pretty of his enlistment in the Army. loud until they had things pretty of his enlistment in the Army, saw no God in space." well under control. Historical Spots In County Will Be Marked Soon

In a meeting Friday morning the county court room, a committee named by Judge J. D. McBrien will make a quick survey of public and private buildings which are old enough to have interest for tourists and sightseers.

The cause of history and the preservation of the state's heritage will be served by this survey. State Chairman Rupert N. Richardson, Abilene, of the Texas State Historical Survey Committee, declares.

The local committee's findings will be included in a regional report which will be made on Aug. 18 at Amarillo. The local committee, along with other county committees over the region will be working against time. What facts they come up with may be included in an official travel information folder of the state. The state's historical association is working with the State Highway Department in publishing a new

LAYNE PUMPS

PRODUCING WATER ON THE TEXAS PLAINS FOR OVER 40 YEARS

July 15, 1962

Cotey Chemical Company Box 1239 Lubbock, Texas

Dear Brad.

We were discussing the possibility of double treating wells to make sure all the plugging material was removed. Sometimes there seem to be too much material for a single treatment to remove because we have had some excellent results with a second treatment.

For example, the new gravel-packed well we treated east of Floydada was making only 52 gpm initially. A 275 pound Dry Acid treatment increased the capacity to 150 gpm. After this treatment was cleaned up, we retreated with 350 pounds of Dry Acid and developed the well at 300 gallons per minute.

The thing I like about Dry Acid is that it is really good for chemically breaking down the clays, shale, and drilling mud so they can be pumped or bailed out. Also, since it is packed in 50# steel pails, we can keep a supply on hand and carry it around on the rig or pick-up without any loss or damage.

In all the wells we treated we have had only one failure, which is something we cannot say of any other material we have

Sincerely,

Bill Tye

P.S. Our last well treated was only a single treatment, but it increasd the flow from 46 to 92 gallons per minute.

Air Conditioning experts agree...

WATER cooling is BEST!

Youngsters learn mighty early about the cooling effect of water when the

weather's hot. And air conditioning engineers know that water cooling

is far more efficient than air cooling. The reason is simple . . . 85°

That's why ARKLA-SERVEL Sun Valley's GAS air conditioners are WATER cooled! Water cooling, plus Sun Valley's "no moving parts"

principle, gives you two big advantages unavailable with other air

conditioners. One, a Sun Valley gives you CONSTANT EFFICIENCY, while air cooled units lose as much as 15% efficiency. Two, Sun Valley

YOUR KID BROTHER, TOO!

SAID FORD FALCON TO THE CHEVY II (AND CORVAIR)

No matter which compacts you compare the facts favor the Ford Falcon. Here's proof! FALCON VS. CHEVY II

Chevy II tried to copy Falcon's lines, length wheelbase, height, width—and many inside dimensions. But here's where it missed?

 Falcon's standard engine is a smooth Six; Chevy II's is a Four! Falcon offers more passenger comfort—almost 1 inch more rear leg room for example!

• Falcon has bigger rear doors-11/2 inches wider! Falcon goes 6,000 miles between oil and oil filter changes*; Chevy II, 4,000—a 33% savings!

Falcon has extra layers of insulation-50% more Falcon holds the Mobil Economy Run's gas mileage record for a Six or Eight!

PLUS 10% more glass area, multi-leaf instead of

single-leaf rear springs, wider trunk opening with a mat inside, heftier bumpers, greater maneuverability,

And Falcon's prices | start lower!

FALCON VS. CORVAIR

Falcon is a true family carl It's not only longer but almost 4 inches wider than the Corvair. It holds 6 big people in comfort. (Just try to seat 6 in a Corvair!) And that's just the beginning! Falcon's engine delivers more horsepower than Corvair's rear-mounted engine)

Falcon packs away almost twice as much as Corvair's front-end trunk!

Falcon bridges the bumps better with a 1½ inch longer wheelbase!

Falcon has bigger brakes than Corvair!

Falcon seats are comfortably higher—1½ inches higher in front, almost 3 inches in back!

PLUS 33% savings In oil and oil filters, record gas economy, 10% more glass area in the windshield alone, bumpers almost twice as deep—all in addition to falcon's bigger doors, more shoulder room, deeper seats!

And Falcon's prices | start lower!

Most Important The rains which finally covered the Southern High Plains rather generally have been excellent, and as a result the farmers have saved thousands of dollars through reduced irrigation pumping costs. Now, however, may are com-

Good Irrigation

Management Is

mencing again to pump water to the growing and fruiting crops. Some never stopped. During this stage of crop growth-when the crops are in peak bloom-adequate moisture is most necessary for optimum yields.

This is the time also when minority of irrigators will have water losses due to "tailwater" escaping from the cropland.

It is apparent that many farmers should take better care of their irrigation water. Particularin view of the fact that the High Plains Underground Water Conservation District has just published a map which shows delines of the underground water level amounting to more than 100 feet in some areas of the southern High Plains during the past 24year period.

In a day when farmers do coniderable talking about high production costs, and justifiably so, many of them could effect substantial savings through the use good irrigation management

To maintain an adequate level of economic prosperity in this region will require wise use of both rainfall and irrigation water by each and every water user. Spokesmen for the High Plains Water District state that the economic life of the ground-water supply will be prolonged if each farmer will practice this "good

PUBLIC NOTICE Proposed CONSTITUTIONAL AMENDMENT

NUMBER TWELVE ON THE BALLOT

PROPOSED CONSTITUTIONAL AMENDMENT TO BE VOTED ON AT AN ELECTION TO BE HELD ON NOVEMBER 6, 1962.

SENATE JOINT RESOLUTION SENATE JOINT RESOLUTION NO. 19 proposing an amendment to Article IX of the Constitution of the State of Texas to add a new Section to be known as Section 1-A which permits the Legislature to delegate certain zoning powers to the governing body of any county bordering on the Guif of Mexico or the tidewater limits thereof.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

contained herein.

"Should the Legislature enact legislation in anticipation of the adoption that not be invalid by reason of its anticipatory character."

Sec. 2. The foregoing Constitutional Amendment shall be submitted to a cote of the qualified electors of this state at an election to be held on the first Tuesday after the first Monday in November, 1962, at which election all ballots shall have printed thereon.

the Gulf of Mexico or the tidewater limits thereof.

BE IT RESOLVED BY THE LEG-ISLATURE OF THE STATE OF TEXAS:
Section 1. That Article IX of the Constitution of the State of Texas be amended by adding thereto a new Section, immediately following Section 1, to be known as Section 1-A which shall read as follows:

"Section 1-A. The Legislature may authorize the governing body of any county bordering on the Gulf of Mexico or the tidewater limits thereof to regulate and restrict the speeding parking and travel of motor vehicles on beaches available to the public by virtue of public right and the littering of such beaches.

"Nothing in this amendment shall increase the rights of any riparian or littoral landowner with regard to beaches available to the public by virtue of public right or submerged lands.

The Legislature may enact any laws not inconsistent with this Section which it may deem necessary to permit said counties to implement, enforce and administer the provisions contained herein.
