POULTRY FACTS

DEATH FLOATS IN AIR OF HATCHERY

Floor of Room Is Common Source of Dust and Dirt.

Death floats in the air for the newly hatched baby chick, but the hatchery manager can take precautions which will reduce the probability of disease germs, carried on minute floating dust particles, from infecting baby chicks which emerge from their shells, free of the disease germs.

"The floor of the hatchery room is the most common source of dust and dirt. The floor should be kept clean," says a bulletin on "Sanitation in the Hatchery," just published by the agricultural extension service of the Ohio State university. "Less dust will be stirred up if the floor is flushed or scrubbed with water instead of being swept with a broom. When the use of water is impossible, sweeping compounds should be used. If possible the floor should be kept wet down. This prevents dust and by increasing the humidity of the air is an aid in hatching larger and better chicks.

"The practice of dropping and throwing egg shells, unhatched eggs, or dead chicks on the floor is bad. This refuse should be carefully handled and removed from the incubator at once.

"The hatchery room is not greatly unlike a hospital. Clean walls, clean floors, clean equipment and clean attendants are essential."

The new bulletin is written by Prof. E. L. Dakan, head of the poultry husbandry department of the university, and Dr. Fred Speer of the bacteriology department, who has been doing research work on the disinfection of incubators, under a poultry industrial research fellowship established at the university by commercial interests.

Poultry Houses Badly Infested With Vermin

When a poultry house becomes badly infested with mites, it is hard to control them with one application of any material. Mites may gather in the walls and around the ceiling and under the dropping boards or behind insulating material in the walls. They depend on the blood of the roosting birds as a means to live and if the perches are treated about once each week for a few weeks, all the mites in the house will eventually gather there and be killed. The nests often need considerable spraying, especially if they consist of boxes nailed on the side walls of the house.

By adding a little carbolineum to the kerosene oil or engine oil, the mixture will have greater powers for destroying mites. It may be best to paint the roost, dropping boards, and nests with clear carbolineum. If the side walls are rough and infested with mites, it may be best to whitewash them to seal up a lot of crevices and make the surface as smooth as possible. When the roosts are protected with spray dope often enough to keep down mites, they are not so apt to become entrenched in other parts of the house.

POULTRY FACTS

Dirty poultry houses harbor disease.

Moldy feed or moldy litter may give the baby chicks pneumonia.

In order to secure top prices for eggs on the market, they must be of high quality.

Move the brooder houses to fresh ground two or three times during the season in order to keep the young birds healthy.

Feed hopper space, not too much and not too little, is a big factor in determining feed consumption and growth of chicks.

To hatch a desirable chick, hatching eggs should weigh between 24 and 26 ounces per dozen, and should be uniform in shape, size and color.

Keep things as sanitary as possible around the growing chicks. The worst enemy and best preventive of coccidiosis is clean ground, clean water, clean feed, and clean houses.

The size of the egg a pullet lays has been found to be closely correlated with the age at which she begins to lay. Selection for very early maturity in the smaller breeds is likely to reduce the size of the egg of the flock.

The practice of reproducing the flock with eggs laid by hens produces a better quality chick than breeding from pullets. The old hens have stopped laying and are storing reserve vigor to be converted into strong, vigorous chicks.

The incubator should be cleaned and carefully inspected for defective parts. Wafer thermostats should be removed and tested. Testing may be done by immersing alternately in hot and cold water. If the wafer reacts sluggishly, it should be discarded.

Results obtained in 1928 show that chick losses can be reduced to a great extent on most farms if a definite program of sanitation is adopted. Over half of the loss last year occurred during the first four weeks. This reveals the need of better brooding management during the first few weeks.

Oddest Radio Station

in Virginia Graveyard

There are many strange radio stations in the world, but one of the strangest, perhaps, is the station that is located in a graveyard. The peculiar feature of this station is the fact that it is not a radio station but a ship graveyard.

Anchored in the James river near Fort Ewell, Va., are some 200 ships of the Emergency Fleet corporation, built for use in the time of the war and now of no use to the government, they are tied up awaiting sale, or death by decay. Tied up in 10 units of 20 ships each, they spread out over this historic river for some five miles.

When the high winds blow down the river the boats occasionally break away from their units and go drifting down the river, a menace to navigation. Also, when the high winds blow, the little land phone line that runs to Yorktown is carried away. It is in times like this that the radio station, which is located on the flagship of the fleet, comes into operation. A call is sent to the navy yard at Newport News and they are dispatched to remove the necessary part to the field.

Even in calm weather the transmitter gives an occasional workout by transmitting messages received by plane from the Yorktown mine depot to the navy yard. Fort Ewell, near which this peculiar little station is located, is also the home base of the only railway artillery unit in the United States army.

SHERIFF'S SALE

The State of Texas County of Callahan.

Notice Is Hereby Given That by virtue of a certain order of sale issued out of the Honorable District Court of Callahan County, on the 11th day of April 1929, by the clerk of said District Court for sum of Six Hundred Eighty Nine and 48-100 dollars and costs of suit, under judgement, in favor of Mrs. Johnye Magee, joined pro forma by her husband, D. H. Magee in a certain cause in said Court No. 7400 and styled Mrs. Johnye Magee, et al vs G. M. Hall, R. E. Hall and Gus W. Hall, placed in my hands for service, I, Everett Hughes as Sheriff of Callahan County, Texas, did, on the 11 day of April 1929, levy on certain Real Estate, situated in Callahan County, Texas, described as follows, to-wit:

Lot Number Three (3) in block number nineteen (19) in the town of Baird, Callahan County, Texas, as is fully shown in book F, page 636 of the deed records of said town, and levied upon as the property of G. M. Hall, and that on the first Tuesday in May 1929, the same being the 7 day of said month at the Court House door, of Callahan County, in the town of Baird Texas, between the hours of 10 A. M. and 4 p. m., by virtue of said levy and said order of sale, I will sell said above vendue, for cash, to the highest bidder, as the property of said G. M. Hall.

And in compliance with law, I give this notice by publication, in the English language, once a week for three consecutive weeks immediately preceding said day of sale, in the Baird Star, a newspaper published in Callahan County.

Witness my hand, this 11th day of April 1929

Washington's Cherry Trees

Mrs. Taft shortly after going into the White House ordered 80 Japanese cherry trees to be sent to Washington and planted. She had seen and admired these trees while traveling in the East. A Japanese resident of New York made her a gift of 2,000 of these trees. When they reached America they contained an insect that was injurious to American plants. For that reason they were thrown overboard. The city of Tokyo then gave the United States 3,000 of these trees. The water side around the Speedway and the "Tidal Basin" in Washington have these trees in blossom during the early spring.

Honoring the Dead

Annual Decoration day is now enthusiastically observed by the Lower Yukon Indians. Late last autumn 15 families of Indians from Nulato and other villages met to plan to fulfill the custom of erecting houses over the graves of the dead during the year. The

shelters of the old graves were given a fresh coat of brilliant paint. Many of the unique mansions have windows and floors and contain rugs and other articles that were used by the departed ones. Every western Alaskan Indian has a different method of erecting the spirit of departed ones.

Cumbersome Old Vessels

Galleons was a name formerly given to a large kind of vessel with three masts and three or four decks, such as those used by the Spaniards in their commerce with South America to transport precious metals. They were large clumsy, square-sterned vessels, having bulwarks three or four feet thick, all of which were so encumbered with topmammer and so overweighted in proportion to their draft of water that they could bear little canvas, even with smooth seas and light winds.

The Health Claims

of Rumford, the baking powder with real food value, make a strong appeal to women of keen judgment. Rumford is not merely wholesome in itself, it adds to foods with which it is used, those vitally necessary phosphates so essential to upbuilding the bodily structure.

ESSEX THE CHALLENGER

these important things
CHALLENGE TOO!

Hear the radio program of the "Hudson-Exes Challengers" every Friday evening

EASE OF BUYING

FOR INSTANCE, in this city your first payment, with your present car included, may be as low as \$17.50 and your monthly payments \$39.81

Your present car will probably cover the entire first payment. The H. M. C. Purchase Plan offers the lowest terms available on the balance.

EASE OF OWNING

On our own streets Essex the Challenger, under competent observation, averaged 21 miles per gallon. The average owner in this city can expect 18 to 20 miles and upward. Commercial users operating large fleets of Essex cars say that service and maintenance costs, covering millions of miles of operation, are lowest of any car ever tested.

ESSEX challenges the performance, the style, the luxurious roomy comfort of any car at any price, on the basis that no other gives you back so much for every dollar you put in.

and trading in their old cars for the big values Essex the Challenger gives. Essex challenges:

IN SPEED—challenging anything the road offers up to 70 miles an hour. IN FAST GETAWAY—any car regardless of size or price. IN RELIABILITY—60 miles an hour for hour after hour.

Essex offers a completeness of fine car equipment formerly identified only with costly cars, and available, when at all, only as "extras," at extra cost on cars of Essex price.

Check these items when you buy—they represent easily above \$100 additional value in Essex.

Wide Choice of Colors at No Extra Cost.

The variety is so great you have almost individual distinction

Standard Equipment Includes: 4 hydraulic shock absorbers—electric gauge for gas and oil—radiator shutters—saddle lamps—windshield wiper—glare proof rear view mirror—electro-lock—controls on steering wheel—all bright parts chromium-plated.

Industrial Recognition

Lower Living Costs

✖✖

Lower Labor Costs

✖✖

Lower Taxes

✖✖

Better Shipping Facilities

✖✖

Permanent Conservative Labor

The bid of the small cities and towns for industrial recognition is being accepted.

Far-sighted manufacturers are quitting the congested cities and removing their plants and factories to the unhurried, uncongested atmosphere of the small cities and towns.

Widespread distribution of electric power and the development of fast freight have given West Texas cities and towns an industrial status comparable with metropolitan cities.

Lower living costs and therefore lower labor costs, lower taxes, cheaper land, ample room for expansion and closer proximity to raw materials and markets, all have paved the way for industry's realization of the distinct advantages of small town factory sites.

As its contribution to the advantages offered, this company has 70,000 horsepower of electric power available, three great generating stations and 15 auxiliary plants, insuring uninterrupted service 24 hours a day, 365 days a year.

PULLING TOGETHER

If the citizens and residents of a town do not pull together how can they expect strangers to think well of their own community? True, every town has people who have disagreeable characteristics each one of us is "peculiar" in some respects in the mind of the "other fellow." But even if it is the truth, we should not say evil things of our fellow-townsmen.

Far better be like the Scotch, of whom Dr. Samuel Johnson said that no matter how big a rogue a man was in Scotland, all other Scotchmen sang his praises to every stranger in their precincts, simply because the rascal was their fellow-countryman.

It is better to be like the Scotch even straining our veracity, at least in a harmless way, than to be like the Irish with this same sage facetiously said: "I love the Irish because they are so honest; they never speak well of each other."

All of us know that Mrs. So and So should not let her chickens ruin the spring garden, but we should remember that the chickens themselves are things of practical value even if foragers in manner and predatory in disposition. We should be thankful we do not live in a country or neighborhood among the nabobs peacocks wake up the inhabitants with their screeches and roost all day on the front porch and which serve no useful purpose except to satisfy the vanity of their owners.

Learning to look for the good in our neighbor (and much good there is to be found) is a quality that will reap a harvest of benefits. A town divided against itself can never rise to the height to which our differences in petty affairs, or even in matters of magnitude is absolutely necessary if we are to pull together.

To be blinded by prejudice is a condition that harms most him who is afflicted. Having eyes with which to see, minds with which to think and enthusiasm with which to work, no job is too big for Santa Anna in a public way. —Santa Anna News.

OWE OBLIGATIONS TO COMMONWEALTH

There is a debt you own to your home town but whatever the bill, is none will be presented to you for payment. If you do not realize the size of it, nobody will try to tell you. You know what the town has done for you, and you should know what you ought to do for the town. Two questions may serve to bring the issue home to you.

When your wife and children were critically ill, was it the doctor from the city who pulled them through?

You never even thought of calling him. Your first thought was of the home town doctor, and he saved the lives of your dear ones.

When you lost your job, who gave you assistance during the winter?

It certainly wasn't the store in the city that advertises "bargains" for the country shopper. The merchant of this town stood by you when, and he will again some time when the emergency arises.

If these things have not happened to you, they have happened to your neighbors and you know

about them. Mere money cannot pay for disinterested service such as the doctor and the merchant. And these instances are not cited with the idea of wakening a feeling of obligation toward those individuals who render us service on extraordinary occasions, but they are brought up rather, with the view of making every man, woman and child realize his partnership in the community and his responsibility in that partnership which means so much to us.

The doctor and the merchant are not the only men toward whom others in the community owe this obligation to maintain the community as a self-sustaining entity. They are simply given as examples.

The stronger the home town spirit the more conveniences you will enjoy. The taxes you pay settle the bills for the things already acquired; the weight of your co-operation with the progressive leaders assures other improvements in the future. Be a home town man all along the line—patronize home town merchants whenever possible. —Clifton Record.

FARM LABOR SUPPLY AMPLIFIED

Agriculture enters the spring season with a farm labor supply slightly in excess of the demand in all parts of the country reports the Bureau of Agricultural Economics, United States Department of Agriculture. Farm wage also reported at a fraction higher than on April 1 for three years past.

The bureau's index shows the supply of farm labor on April 1 at approximately 4 per cent larger than the demand. The excess is somewhat smaller than on April 1 a year ago, the difference being attributed to the higher volume of industrial employment this spring compared with last. The farm labor supply on April 1 last year was 71-2 per cent more than the demand. The index of the general level of farm wages on April 1 is placed at 167 per cent of the prewar level on that date, compared with 166 on April 1 for the past three years. The April 1 scale of farm wages per month, with board, for the United States as a whole is reported at \$34.68; wages per month, without board, \$49; wages per day, with board, \$1.79; and wages per day, without board, \$2.34.

Wages per month, with board, range from \$24.20 in the South Atlantic States to \$53.94 in the far Western States; wages per month, without board, from \$35.10 in the South Atlantic to \$76.99 in the far Western; wages per day, with board, from \$1.26 in the South Central to \$2.42 in the far Western and wages per day, without board, from \$1.65 in the South Central to \$3.21 in the far Western.

These wage rates are considerably below those in industrial activities, but it is pointed out that farm hands receive many perquisites not enjoyed by industrial workers. The supply of farm labor is largest in areas where farm wages are highest, and smallest where wages are lowest. The supply of labor as measured in per cent of normal is slightly smaller demand as measured in per cent of than on April 1 last year, and the normal is slightly larger. The two combined put the supply at 3.7 per cent greater than the demand as compared with 7.5 per cent greater than the demand on April 1, 1928.

SEVENTY-FIVE THOUSAND DOLLARS As president of the United States Herbert Hoover will draw a salary of \$75,000 a year, a sum equivalent to his annual farm payroll.

Herbert Hoover is said to be cognizant of the farmer's problems not from observation and study alone, but from practical experience. Since 1920 he has been the owner of a 1,318 acre farm in California that is a model of scientific operation and diversification. He is calling a special session of congress to deal with the farm problem, yet his own farm in California is an object lesson to the average farmer might prove far more valuable than any contemplated legislation.

The Farm Journal, commenting on Hoover as a farmer, reveals that during the harvesting season Hoover has as many as 200 hired hands. His acres are a model of diversification. They contain vineyards producing ten varieties of tables grapes, with a yearly output of 600,000 pounds. There is also some 300 acres in cotton, 200 acres in alfalfa, 150 acres in potatoes, 100 acres in corn, 130 acres in peaches, 90 acres in watermelons and muskmelons, 90 acres in Spanish onions, 50 to 60 acres in sweet potatoes, and 70 acres in apricots. Moreover, the poultry yards on the farm contain some

2,500 hens, and there are 200 hogs and 150 cows. Many a farmer would be on a sound financial basis today instead of pleading for farm relief, if it were possible for legislation to make him operate on a diversified basis. Some of the hardships that have come as the result of buying all the table necessities instead of growing them on the farm, and Texas farmers as well as those of other states might accomplish as much for themselves through following the Hoover farming example as they would to wait on legislation. The only law really needed is one to make farmers diversify.—San Angelo Standard.

CHILD HEALTH AND PARENT EDUCATION CONFERENCE Abilene, April 25.—On Tuesday of next week the five-day Child Health and Parent Education Conference being sponsored by the Chamber of Commerce of this city will open. Among the special features of the program will be the four free clinics to be conducted during the Conference by well-known specialists. The first will be on Wednesday and will be given over to cases needing surgical attention. It will be directed by Dr. Felix P. Miller, El Paso, President of the Texas State Medical Association. On Thursday Dr. J. M. McKnight, superintendent of the Texas Tuberculosis Sanatorium will hold a clinic for those who have reason to believe that they have tubercular infection. Dr. W. B. Carrell of Dallas, chief surgeon of the Shrine hospital for crippled children will examine all children with bone trouble and suffering from infantile paralysis, who are brought to him Friday morning. A goitre clinic will be held by Dr. E. O. Roeding of Dallas Saturday morning. Dr. Russing is a graduate of the Crile clinic at Cleveland and has special training with Kiecher of Berne, Switzerland, the outstanding authority on goitre in Europe. All the clinics will be held at the West Texas Baptist Sanatorium and will start at 8 o'clock in the morning. No charges will be made for the services given by the specialists. Those who desire to attend should register with Dr. Stewart Cooper, Abilene, by mail or in person. In addition to the clinical work, there will be seventeen lectures given during the conference. They will deal with different phases of child health and training. All the people of West Texas have been invited to attend the programs. The lectures will be given in the City Hall Auditorium. Any persons interested can secure a detailed program of the conference by writing to or calling the Abilene Chamber of Commerce.

WHAT'S DOING IN WEST TEXAS

CARBON saw the installation of a cream route on April 22, this is the result of co-operation of the community club with farmers. O. Stone and County Agent Patterson made a canvas of the territory south and west of Carbon and reported at a meeting of the club presided over by S. P. Rumph that conditions were favorable.

ROCHESTER is laying claim to being the smallest town in the world with talking pictures. Greenwood, owner of the Rochester Theatre says that the newly installed machinery will make it possible to feature all the latest vitaphone pictures. All talking pictures will be shown the first three nights of the week. SWEETWATER'S band will be in charge of Geo. H. Winter after May 1. Winter has a record of 24 years in band experience in university and industrial organizations. He will conduct classes in band and orchestra instruments at his Municipal Building offices.

MUNDAY will keep several hundred dollars at home since the establishing of a modern laundry there by Miss Jewell McKee of Knox City. The capacity of the plant will be increased as fast as the patronage justifies. The plant is equipped with several washing machines and a drying closet.

WINTERS will hold an annual "Living at Home Fair" beginning with June 20, 21, and 22, of this year. Exhibits by communities and individuals, 4-H Clubs, vocational agricultural judging contests, short courses and field day, a "Living at Home" Banquet and the opening of the airport will be featured.

STEPHENVILLE will start work on the paving of 70,000 square of brick pavement to begin soon. The contract went to the Thurber Brick Company whose price on concrete was \$2.01 for six inch thickness reinforced with 40 pound steel. The paving will amount to between six and ten miles.

JUNCTION'S beautiful lawns this summer will be inspired partly by the contest being sponsored by the Parent-Teachers Association and other civic organizations. Kimble Courts is one of the models, and the work there is attracting the attention of all interested in landscape work.

LUBBOCK men are at work tearing down a two story structure to make way for the twelve story Hilton Hotel for which the permit for construction was taken out recently and was in the neighborhood of \$500,000.00.

CORRECTION: Loveland's latest scholastic census showed a tabulation of 837 school children between the ages of 7 and 18 years instead of 206 as given out previously. This is an increase of about thirty-three per cent, and indicates that the county has a population of more than 12,600 at this time.

TURKEY is elated over the announcement of a \$30,000.00 sanitarium at El Paso. An unlimited supply of water has recently been piped into the town, railroad surveyors have laid out a north and south railroad route, two buildings of brick are under construction and plans for others are being made.

The West Texas Chamber of Commerce is sending an invitation signed by Governor Dan Moody of Texas, Governor Dillon of New Mexico and Governor Phillips of Arizona to President Hoover asking that he attend the eleventh annual convention and the commemoration of the Gadsden Purchase at El Paso.

The April issue of West Texas today, official publication of the West Texas Chamber of Commerce will be in the mails this week. The issue was originally intended to be the Convention Number but was not on account of the postponement of the dates for the regional organization meet.

Jack was a worthless and imprudent fellow. One day he said to the local grocer: "I gotta have a sack o' flour; I'm all out and my family is starvin'."

"All right, Jack," said the grocer. "If you need a sack of flour, and have no money to buy it, we'll give you a sack. But see here, Jack, there's a circus coming to town in a few days, and if I give you a sack of flour, are you sure you won't sell it and take your family to the circus?"

"Oh, no," said Jack. "I got the circus money saved up already."

Claude Flores, returned Monday from San Saba, where he attended a week end house party at the Frank Hall Ranch.

CUTWORMS FEED AT NIGHT

Cutworms take unfair advantage of the home garden and carry on their depredations at night, and sometimes on dark, cloudy days. Investigation of the soil close to injured plants, however, will often disclose the guilty worms hiding in small burrows. It is easy to get rid of them by a poisoned bait, and the U. S. Department of Agriculture recommends this one: Mix 5 pounds of dry bran and 1-4 pound of Paris green, stirring very thoroughly. Mix 1 pint of sirup or rmo-lasses with 3 or 4 quarts of water, and add this solution to the bran and poison, stirring the whole mixture constantly and slowly. Add only enough water to make a crumbly mash. Put the bait around late in the evening so that it will not dry too much before the worms come to feed. It can be broadcast or sown by hand along the rows or about the base of the plants. Many kinds of cut worms over-winter in the soil and begin to work early in the spring; therefore early treatments before the crops are planted, or before they come up, will be of great advantage in the prevention of crop damage by these pests.

OPPORTUNITY MADE NOT FOUND How often one hears it said, "I could have been as great as he, but I was never given the opportunity." What is this wonderful thing so frequently referred to and to whom is it restricted? Apparently some believe that it is a gift offered to only a favored few who, immediately upon receiving it, are borne upward by its wonderful qualities to the height of fortune without further effort upon their part. Too often, those embued with such a belief wait patiently with idle hands contentedly dreaming of future success, each confident that the God of chance, as whose shrine they worship, will choose him as the recipient of that wonderful gift by which he will be enabled to reach the height of fame. Thus, they dream on. Daily tasks, forced upon them through the necessity of living, are lightly regarded, held in contempt, and accomplished with no other thought than to end them in the quickest and easiest way possible. As time goes on and old age creeps upon them, the dreams fade to be replaced by the realization of wasted lives. Embittered, disillusioned, cynical, they cry of the cruelty of fate.

Too late they learn that opportunity is not a gift but the reward of preparation and tireless search; that success is not a certain but only a possible result of opportunity. As a swimmer who has not trained is unable to get out in the channel and forge his way against the current, but must be content to stay near the shore among the driftwood, likewise, the man who has not prepared himself to battle with the current of life must drift aimlessly with his fellow idlers and seek sustenance from the tidbits that come within reach. It is not there that opportunity is found. Those who would grasp it must get out in midstream and have the determination and preparation to battle on up stream where lies the goal towards which it leads.—H. in Scottish Bite News Bureau.

AMERICA'S FIRST RAILROAD WAS LOCATED IN THE SOUTH

The first successful steam locomotive in the United States was put into operation by a Southern railroad. In his search for facts relating to the industrial development of the Southern states, Arthur Coleman, Associate Editor of Holland's, The Magazine of the South, learned that the first railroad in the United States chartered for general use was in the South. Beginning with a brief mention of the historic "Tom Thumb" locomotive, followed by the "Best Friend," which exploded after six months of successful operation on the South Carolina Railroad, Mr. Coleman brings his readers down to modern Southern good roads and airways and shows what the South's transportation system means toward developing Southern business.

In the current issue of Holland's, The Magazine of the South, he states that over 34 per cent of the total railroad mileage in the country is in the Southern states and that since 1860 the South has shown an increase in railroad mileage of 845 per cent, as against 465 per cent for all remaining states. The first steamship to cross the Atlantic, according to Mr. Coleman, was owned by Savannah capital and sailed from Savannah, Georgia. He says that last year Southern export values

through Southern ports, in the past quarter century, increased more than 840 per cent as against approximately 350 per cent for all remaining ports in the Nation. Southern ports handle 42 per cent of the country's total water-borne tonnage. Export values from Galveston and Houston alone exceed the combined ports of the Pacific coast. Navigable rivers of the South handle over 17,250,000 tons of commerce annually. Texas bus lines carry 4,500,000 passengers annually, and operate over 21,000 miles of highway. In 1928 there were, in the Southern states, a total of over 2,900 miles of air mail routes and more than 300 air ports and landing fields.

"As these various phases of the commercial world are expanding, so is expanding this entire region—industrially, socially, economically—rising head and shoulders above every other section of the Nation until its preeminence, so swiftly and so soundly attained, is the wonder of the United States today. But as its people prosper in the world of business and trade, they are giving thought, too, to those things in life which make for cultured and happy minds; for

beauty and charm and grace of living. They are giving their attention more and more to the planning and esthetic improvement of their cities and their towns and even their rural sections. Their forethought is repaying them richly in dividends immeasurable in terms of financial gains; and, as is always true when men do worthwhile things without thought of money, they are being repaid in money, also. Money which, in turn, is put back into further service for an appreciative people."

BLEEDING GUMS HEALED

The sight of sore gums is sickening. Reliable dentists often report the successful use of Leto's Pyorrhoea Remedy on their very worst cases. If you will get a bottle and use as directed druggists will return money if it fails. No. 2 "WHEELER'S"

Boren, Supt. of Baird High School was director of debates, Miss Bessie Mae Gillet was the only winner of First Place, she winning in Class A High school Essay Writing Contest, and will go to the State Meet at Austin.

ANOTHER SONG RALLY AT THE CHURCH OF CHRIST

Next Sunday afternoon at three o'clock is the regular date for the monthly Song Rally at the church of Christ in Baird. These community singings are attracting considerable attention among those who love sacred singing. Large crowds are attending from time to time, and great interest is being manifested. The public is cordially invited, and should be interested in encouraging such enterprises, they create an atmosphere of social equality. Lets go.

BAPTIST WOMEN BANQUET SENIORS

The Baptist womens missionary Society, on last Friday night, gave the graduating class of Baird high school a banquet.

The Chamber of Commerce building was secured and the good women prepared decoration very fitting and the three causes were fine. The program consisted of Mr. W. C. Scott as toastmaster, Mr. Draughton Margon and Miss Peden of Simmons University furnishing the music and Prof. Truett Walton of Simmons University the main speaker, all of them departed them selves well and every one present had a most enjoyable time.

Those doing the work and having the worry are to be thanked for their care and thoughtfulness of the senior class, and I am sure this honor shown will never be forgotten by any of the class, as for me I want to thank every one who contributed any part to the success of the banquet and assure them that I very much appreciate it. God bless you sisters you are a worthy band. Joe R. Mayes

WITH THE BAIRD BAPTIST

Sunday was a high day with us. Fine attendance at Sunday school and the program given by the party from West Texas Baptist Sanitarium was a real treat. Something like \$75 was given to the hospital and we think that pretty good for our church.

We believe in the sanitarium and are glad to help with our little bit so that those who do not have the money can get the medical aid they need.

It is always a pleasure to have Bro. Sanders and his folks come our way and entertain, and enthuse us in their good work. How glad we will be when it is our time again for them to come.

We want a great crowd next Sunday for all of the services. You are especially urged to be there with us. We love you and are so glad to have you with us in our worship. Joe R. Mayes

CARD OF THANKS

We wish to thank the dear people of Oplin and community for the many kindnesses shown us in the illness and death of our dear Mother Mrs. M. D. Irby, also for the beautiful floral offering. May God richly bless every one of you is the prayer of Her Children.

TWO CHARGED IN FATAL WRECK SIX YEARS AGO

When the grand jury meets in Eastland it will be asked to indict two men in connection with a wreck on the Texas and Pacific railroad almost six years ago in which seven people lost their lives. This was learned here following confirmation by the county attorney's office at Eastland that murder charges had been filed against the two men who are now serving terms in the state penitentiary.

According to the records in Justice of the Peace J. H. McDonald's court here, before whom the charges were filed, a specific charge of murder in connection with the death of Charles Baker, porter on one of the trains, war filed on April 1 by Assistant County Attorney W. B. Collie, against Fred Jordan, while a similar charge in connection with the death of the same man was filed on the same day against Henry Schussler by Sheriff Virge Foster. The charges were not made public until late yesterday afternoon.

Two men stand confessed today to having thrown the switch and set the light to show green at a Dothan switch, six miles west of Cisco in a scheme of revenge against the railroad after they had been put off a freight train, according to County Attorney Joe Jones.

"We were a bit sore at the company account of having been put off a freight train," relates the statement made by one man, according to the authorities, "and decided we would fix the switch so that the next train going west would have to stop."

Schussler broke the switch lock and Jordan turned the switch so that the next train would head into the passing track, the statement declares.

"We turned the switch light so it would show green. When we turned the lamp, it would not stay straight so we took some wire and tied the lamp to the stand."

The men waited for a while but no train came along so they walked to Cisco, seven miles east, where they separated. Schussler's statement declares the first he knew of a wreck was when he read about it in the newspapers.

The accident was one of the greatest disasters in the history of Eastland county. The number of persons crushed or burned to death was set at seven.

Sheriff Virge Foster and Deputy Sheriff Steele Hill went to Huntsville and brought the two men back to Eastland.—Cisco News.

Fame of Sargon Now Spreads Over Nation

Never before, perhaps, in all history has the demand for a proprietary medicine ever approached the wonderful record that is now being made by Sargon, the new scientific formula which has been accomplishing such remarkable results throughout this section. Its fame is rapidly spreading over the entire country and wherever introduced, Sargon is the most talked of medicine in the country today. Nothing like it has ever been seen before.

Sargon was first placed on the market just a little over six months ago. Its success was immediate and people everywhere were quick to recognize in it a new and epochmaking product—a medicine of great power and extraordinary merit. In leading cities where it has been placed on sale it has required from 70,000 to 100,000 bottles to supply the unprecedented demand, establishing a record probably never before equaled in the history of the drug trade.

Countless thousands of men and women, in all walks of life, suffering with stomach, liver and bowel troubles, some of them of long standing; as well as thousands of weak, thin, nervous men and women apparently on the verge of collapse have voluntarily come forward and testified that they have been fully restored to their normal health, strength and weight by its use.

Still others, who seemed fairly well, yet suffered with constipation in its worst form, indigestion, dyspepsia, headaches, shortness of breath, bad complexion, bad breath, loss of appetite, sleeplessness at night and of terribly dejected, depressed feelings, stated that they have been entirely relieved of these distressing symptoms and restored to health by its use.

Sargon is the result of the last

ten years of world-wide scientific research; it embodies new knowledge of certain organs and fluids of the body recently come to light; it is helping build up run-down men and women by modern methods undreamed of a generation ago.

Sargon may be obtained in Baird from City Pharmacy; and in Cross Plains from the Cross Plains Drug

CHURCH OF CHRIST

Albert S. Hall, Minister

Our attendance and interest last Sunday was above the average for the past several weeks. Our young people are to be commended in the splendid work they are doing. We shall be glad for all others to join them who will. We have special classes for all ages that are suitable in every way, they are doing. Come; you will not be the least embarrassed, but will feel perfectly free and at home, at any rate we are doing our best to make all feel that way. All our work is strictly undenominational. We begin promptly at 10 o'clock every Sunday morning Ladies Bible class Monday afternoon at 2 o'clock Prayer meeting Wednesday night, Song 3:00 Friday night. Next Sunday afternoon is the regular date for our community Song Rally. We had a great crowd and a great time a month ago, we hope for this occasion to be equally as great. Everybody invited, and urged to attend and take part in the exercises. COME.

3 Glasses Water Help Constipation

One glass of water is not enough—take three glasses one hour before breakfast. Much better results are obtained by adding a teaspoon of simple glycerin, saline compound (known as Adlerika) to each glass.

Adlerika acts on BOTH upper and lower bowel and removes old waste matter you never thought was in your system. Stops gas and sour stomach in TEN minutes! Relieves constipation in two hours. City Pharmacy.

"King Tut," President Hoover's big German police dog, makes the rounds of the police sentry boxes in the White House grounds through the night. He is shown with W. S. Newton of the White House police.

TORCH SLAYER

H. Otto Campbell, civil engineer, formerly of Chicago, who has confessed to having shot and killed his bigamous wife, who was Mrs. Benjamin S. Mowery, a nurse of Greenville, Pa. After murdering her he saturated her body with kerosene and fired it in an attempt to hide his crime.

From Earth to Sun
The distance between the earth and sun varies from something more than 91,000,000 miles to something more than 94,000,000. The mean distance is calculated to be about 92,800,000. The earth is nearest the sun in early January and farthest away in early July. That the distance has nothing to do with the seasons may be seen from the fact that while it is winter in the northern hemisphere, it is summer in the southern. The real reason for the seasonal changes is the fact that the earth's axis is at an angle (23 1/2 degrees) with relation to its path around the sun. At that season of the year when our northern hemisphere is tipped toward the sun, its rays fall more directly upon us, and we have summer.

Fish-Oil Ice Cream
Ice cream made from fish oil, snow and sugar recently was an unexpected winter dish of Eskimos of Alaska. The odor was strong but the dish is said to have tasted better than it smelt. Eskimos caught great numbers of eulachon, a species of smelt which is sometimes called the candlefish because it contains so much oil. These they placed in holes lined with heated rocks, and after the fish were cooked they were placed in covered baskets on which the women trod with bare feet to extract the oil. During cold weather the oil has much the consistency of butter. To make the ice cream, the oil was melted and sugar and snow were added, then stirred in.

Why Borah Couldn't Come
The Golden Book recounts the story of how Mrs. William Borah, wife of the senator, arrived alone at a diplomatic breakfast in Washington during the late days of the Coolidge administration when the Kellogg anti-war treaty was still in process of negotiation. Asked by Secretary of State Kellogg what had become of her husband, the gentle and literal Mrs. Borah replied: "He said that if you asked for him, Mr. Kellogg, I was to say that he is at home working on your d-d treaty."

History of the Diamond
India was the original home of the diamond as a jewel. For centuries India remained the sole source of Europe's diamond supply. About 1750 diamonds were discovered in Brazil. In 1867 diamonds were discovered in South Africa. South African diamonds constitute more than 90 per cent of the world's supply. From their discovery to the present time they have yielded 10,000,000 carats. The diamonds of the world probably represent a value of \$5,000,000,000.

Origin of Caledonia
The word "Caledonia" is the Latin name for North Britain, now Scotland. It was first used by the Roman writer, Lucan. It is now chiefly used poetically. The word is popularly believed to be derived from "Caldonia," which means "men of the woods." The first syllable, however, may be from "Gaul" and the meaning then would be "Gauls of the dunes" or hills.

Lice Are Enemies
Lice are a great annoyance to sitting turkey hens and are one of the worst enemies of young poults. To prevent their getting a foothold, the hen should be dusted thoroughly with some good lice powder before she is placed on the nest, and then both the hen and nest should be similarly treated once a week for the first three weeks of the incubation period. The nesting material should be kept clean, and if the eggs become dirty they should be washed.

Government Loans Easy
Nearly every farmer or ranchman is able to get a 5% Government loan. About \$500,000.00 has been loaned through my office already, saving around \$20,000 per annum for our citizens. Small expense, long time, low interest. Lots of money.
W. Homer Shanks, Sec-Treas
46-14 Clyde, Texas

CITATION BY PUBLICATION

THE STATE OF TEXAS
To the Sheriff or any Constable of Callahan County, Greeting.
You are hereby commanded to summon R. A. Harbin by making publication of this Citation once in each week for four consecutive weeks previous to the return day hereof, in some newspaper published in your County, if there be a newspaper published therein, but if not, then in any newspaper published in the 42nd Judicial District, then in a newspaper published in the nearest District of said 42nd Judicial District, to appear at the next regular term of the 42nd Judicial District Court of Callahan County, to be held at the Court House thereof, in Baird, Texas, in the second Monday in June, A. D. 1929, the same being the tenth day of June A. D. 1929, then and there to answer a petition filed in said Court on the 26th day of March A. D. 1929, in a suit numbered on

the docket of said Court No. _____ wherein Georgia Harbin is plaintiff, and R. A. Harbin is Defendant and said petition alleging being suit for divorce, on the ground of cruel treatment, alleging that plaintiff and defendant were married, in Callahan County, Texas, on about January, 11th, 1925, and separated about July 10th 1927, on account of the cruel treatment, outrages and excesses on the part of defendant toward plaintiff of such nature as renders the further living together of plaintiff and defendant insupportable, and plaintiff prays for divorce, and restoration of her maiden name of Georgia Marshall, all as more fully appears in plaintiff's original petition, on file in this court.
Herein Fail Not, but have before said Court, at its aforesaid next regular term, this writ with your return thereon, showing how you have executed the same.
Given Under My Hand and the Seal of said Court, at office in

Baird, Texas this the 26th day of March, A. D. 1929.
Callie Marshall, Clerk
District Court, Callahan County

Help!
Young Thing (at the library)—I want a copy of Liver.
Librarian—My dear, this isn't the butcher shop.
Young Thing—Maybe not, but I was told to get a copy of some kind of meat here.
Librarian—Maybe you mean Bacon.
Young Thing—You guessed right first thing so let me have Bacon for my little boy friend.—Cincinnati Enquirer.

More Howlers
A schoolboy's essay on Henry VIII included in the sentence: "At this time King Henry walked with great difficulty, having an abscess on his knee."
A business man says that a shortage in any commodity automatically raises its value.—This is doubtless the reason for the high price of evening gowns.

Ancients Excelled in Art of Glass Staining

The medieval artists in stained glass told the jewelers setting diamonds and rubies. Their ideal was not a pretty picture made transparent, but a window made beautiful. Years of experimenting with various combinations of glass taught them secrets of design which resulted in windows that have never been surpassed.

Glass staining and glass painting are two quite different things. One method is to build up a mosaic of pieces of glass, colored not only on its surface but its very substance. The other is to paint the design upon white or colored glass.

It was in glass making that the ancients excelled. The blue of one school was so vibrant that the workers groined down sapphires to obtain their magic color. The fancy, although popular, is probably fallacious. Nevertheless, the colors of the ancients were so expertly compounded that they blended into a uniform whole in a completed window and never appeared flat or "raw."

The greens, for example, were not a straight mixture of blue and yellow, but a combination of blue and red and yellow in such proportions that they did not fuse into adjoining blues and yellow greens. The reds likewise were distinctive, as they contained alternating layers of red, and green-white gave a melow softness to light before it reached the eye of the beholder.

Mendelssohn Hailed as Master of Philology

As a Jewish philosopher acting the part of a pioneer, Mendelssohn brought about the understanding of the beauty and humanism of the Bible, says a writer in the Boston Herald. He prepared a basis for the development of science and Judaism. His translation of the Pentateuch has inaugurated a new era in the education of the German Jews.

He gave to his brethren the German Bible, by which means he introduced them to the intellectual life of Germany, and thus through it once more into the civilization of the world at large. Mendelssohn has united Jewish and Hellenic life. He was the first to advocate the emancipation of the Jews. By his writings he contributed to a great degree to the removal of the brutal prejudices against the German Jews.

Mendelssohn died on January 4, 1786, and was deeply mourned, not only by his coreligionists, but also by all the learned world. His memory was celebrated as that of a "Sage like Socrates." The greatest philosophers of the day exclaimed: "There was but one Mendelssohn."

Came His Playthings

Many, varied, and strange are the belongings kept in safe deposits. During the recent visit to England...

Hope That...

of the rust of a semi-independent Indian state a score or more of gorgeously appurteled retailers visited the premises of one company every day to collect three heavy chests filled with cut and uncut precious stones. These were taken away for the dusky potentate to play with, and returned to the vaults when he tired of his daily amusement. The jewels were said to be worth over \$100,000.000 and were probably the most valuable collection ever stored at one time.

What Is Poverty?

Frank Robinson died and left great riches to the world—the riches of beauty translated through the glorious medium of music. Those who came to look into the attic of his room declared that he had died in poverty. He was the poor figure of financial tragedy. Lately a bit of his manuscript sold for \$2,000. But this does not establish his wealth. The great riches he left are for those who can appreciate them. Men may die with out money, but they need not die in poverty in the larger sense—Grove Patterson in the Mobile Register.

Cable Insulation

One can hardly see any connection between hoop skirts and the electrical industry, but one may be traced, strangely enough, which took place in the early days of the electrical development. The first cables were not insulated at all; they were simply braided steel lines with cotton. An inspiration crinolines were going out, so was his business. So he used his machinery for insulating copper wire with cotton braid, and he soon had no cause to regret the passing of the crinolines.

An Eye for Color

A little girl recently skinned her knee and her mother promptly applied a bright-colored antiseptic.

Several days later the mother served cold meats and catsup. The little girl, seeing her father generously helping himself to catsup, demanded: "Mother, I want some meat with mercurochrome on it."

Montana Holds Cold Record

Scientists believe that the maximum low temperature at the North pole is from 50 to 60 degrees below zero. Lower temperatures have been recorded in the United States. For instance, a temperature of 68 degrees below zero has been recorded at Havre, Mont.—Pathfinder Magazine.

No Standing Still

Progress is essential in this life. But whether it shall be forward or backward is for you to decide. You cannot stand still. This is impossible. The world is only a stairway on which you can either step up or down.—Grip

Divulge Historic Date

With saws and drills and microscopes, the specialists engaged in the beam studies are digging from the heart of ancient logs and beams a more accurate calendar of happenings in the south-western United States than that which we possess for the civilizations of the Egyptians or the Mayas.

The work is built on the fact that every growing tree leaves in its trunk a ring for each year; and on the further fact that each one of these rings has an individuality of its own—a different width, density, or character resulting from different climatic or seasonal differences.

Furthermore, all trees in a given region show the same ring sequence; and some of the rings, deposited in an especially characteristic season of drought or moisture, stand out so plainly that it is almost as if Nature had rubber-stamped the ring; "This is the year 1288 A. D."

This work was undertaken after expeditions of the National Geographic society had uncovered the ruins of Pueblo Bonito in New Mexico, one of America's earliest "apartment houses." Many interesting things were learned about the customs and culture of the 2,500 people who once occupied the great structure; but the date at which they flourished remains a secret.

Some of the old beams used in supporting the roof were well preserved, and when sawed showed characteristic rings. The idea was conceived of tracing a tree-ring calendar back from the present to the days when Pueblo Bonito's beams were growing.

Wisest Men Have Ever Been Clow of Speech

People are likely to set too much store by "conversation." A very large proportion of it isn't worth two cents. It must be conceded that there is a kind of exhilaration in talking. One can even get headache by it; showing that it has a direct effect on the tempo of the heart and on the nervous system. The popular notion that one must talk "for the sake of relief" is probably bogus; because silence, once it is learned and practiced, gives a greater relief.

Keeping still is an interesting game, to the point of being, at times, delightful; especially when employed to keep out of a furious row under full headway. It is a difficult game, therefore the more inviting to play. One may suffer from the futility implication that it is timidity instead of good sense that keeps him from participation, but let him remember that many of the wisest men within human knowledge were taciturn—shutted their own business, and did not know but just the day of speech and silence about as well as the words and imitations of the world's great speakers.

Hernandez Found Dahlia

It was in 1570 that Philip II of Spain sent Francisco Hernandez to Mexico to compile an official report of the tree and plant life of New Spain. He sent seeds to the director of the Royal Botanic gardens in Madrid, who, says Nature Magazine, disseminated the dahlia throughout Europe. Hernandez found the dahlia, not as a wild flower, but in the cultivated gardens of the Aztecs.

Sure

When a legislator declares he's going to study the merits of a proposal, he means he's going to study constituent reaction to it.—Cincinnati Enquirer.

This Frank Decade

Mary Elizabeth has just started to dancing school and on the occasion of her second or third lesson her mother, sitting by as an interested spectator, was glad to see that she and her boy partner seemed to be holding a conversation. "What were you and Jimmie talking about?" she asked when the little girl joined her after the dance. "Oh, just talking," evaded the youngster. "Well, what did Jimmie say," persisted the mother. "He said, 'Gee, you're a rotten dancer,'" revealed Mary Elizabeth. "Oh!" cried the strict parent, thinking her daughter would be offended. "What did you say to that, honey?" "I said," replied the child, calmly, "Say you're not so good yourself."

Catfish Peculiar

Catfish are called catfish because they have feelers on the head, like cats' "smellers." They have no scales, their bodies being naked and smooth, or mottled with long plates. The different species vary in size from dwarfs two inches long to six-foot giants. The some-ones and the mud-toms, seldom more than three inches long, sting painfully, but not dangerously. Only a few fossil catfishes have been found. The present scuteless members of the group evidently come from scaly ancestors. The peculiarities that distinguish them are caused by specialization of some parts and by degeneration of other parts.

Swedes Made History

Sweden's international relations were kept alive by the contact between the home country and Swedish emigrants and settlers abroad. Thus in the year 1575 Swedes penetrated as far south as the Black sea and founded an Austro-Gothian dominion. Others settled on the British islands and in Normandy. Headed by the great statesman and warrior, Rurik, one group went east across the Baltic and founded the empire of Russia, named after the coast district of Roshgen, near Stockholm, whence came its founders.

Old American Collage

Dartmouth college at Hanover, N. H., is an outgrowth of a school founded at Lebanon, Conn., by Eleazar Wheelock for the Christian education of Indian youth. Funds raised in England and contributed largely by Lord Dartmouth enabled Wheelock to move 150 miles to the Hanover plain, five miles north of the junction of the Connecticut and White rivers, and so allowed him to enlarge the scope of his work. The province of New Hampshire gave a charter to the new Dartmouth college in 1769.

THESE NEW BEET DISHES WILL TEMPT CAPRICIOUS APPETITES

By CAROLINE B. KING
Culinary Expert and Lecturer on Domestic Sciences.

IF YOUR housekeeping budget permits such extravaganzas as out-of-season vegetables you are, from one point of view, to be envied. But from another perhaps you are to be pitied, for you will miss much of the joy that comes from successful achievement against heavy odds. The woman who, although faced with the necessity of strict economy, is able consistently to provide her family with appetizing and sufficiently varied meals, has the best right to consider herself a master in the culinary department of the household arts.

One of the simplest means of attaining such mastery is to be constantly on the watch for new ways to prepare those inexpensive vegetables which are with us practically all the year round. Take the beet, for instance. Battered beets and beet salad are familiar to all of us, but I wonder how many housewives profit by the opportunity for other beet dishes that will tempt the most capricious appetite. I wonder, too, how many housewives know the secret of intensifying the piquant flavor of this vegetable. If you have never added a small amount of sugar to the water while boiling, try it the very next time, and see what a difference it makes.

Florida Beets provide a pleasant variation in the menu, and the dish is easy to prepare. Cook until tender, three large or six small beets in water to which one tablespoon of sugar has been added. Dip in cold water, slip off skins and slice. Make a sauce of one-half cup of sugar, one tablespoon of cornstarch and one-half cup of vinegar, cooked together till thick. Pour over beets. Add one tablespoonful of butter and let stand over hot water ten minutes.

Paprika Beets—Cook three to six large beets in boiling water to which a tablespoonful of sugar has been added. Chill in cold water and slip off skins. Slice, or, if small, halve the beets. Arrange in serving dish and pour over a sauce made by melting two tablespoons of butter to which has been added one tablespoon of sugar and one-half teaspoon each of salt and paprika.

Beets With Lemon Sauce—Mix one-half teaspoon of salt, one-half cup of sugar, two teaspoons cornstarch, one-half cup of water, and one-fourth cup lemon juice. Bring to a boil and boil for five minutes, stirring constantly. Pour over one pint of sliced, cooked beets, and let stand for a half hour. Add butter, heat again, and serve immediately.

Spiced Red Beets—Cook twelve very young beets until tender. Chill in cold water and slip off the skins. Cut them in very fine strips and place them in a preserving kettle in which two cups of sugar and a cup of water have been cooked to a thick syrup. Tie a cheesecloth of cloves in a piece of cheesecloth and cook with the beets until they have absorbed much of the syrup. Remove the bag of cloves and place beets in jars or crocks.
