Good Eyesight Helps Build Sturdy Bodies

Growing children need the exercise they get in sports... but there's nothing to cut down on a child's opportunities for play like poor eyesight.

You can help protect your child's vision, help him to take part in the sports he should by making sure that whenever and wherever he studies... that the light is right. Give him the best available dependable electric lighting... always... to help him have better vision... and a stronger body. And remember GOOD lighting is ALWAYS economical with low cost electricity.

BETTER LIGHT MEANS BETTER SIGHT

A Public Service lighting specialist will be glad to give you lighting advice free of charge. Call your nearest Public Service office.

Uncle Sam's Selective Service

1. Q—Will there be a lottery or national drawing—as there was in 1940—to determine who will be classified and inducted into service first?
 A—No.

2. Q—If there is to be no national drawing, just in what order will the registrants be considered for classification and induction?
 A—The oldest men—that is, those in the 25-year-old age group—will be considered first.

3. Q—Will each local registrant receive a definite number that will identify him?
 A—Yes. It will be an identification number which will identify him as to state, local board, year of his birth, and his numerical position with respect to other registrants of his local board having the same year of birth, generally according to the sequence of their dates of birth.

4. Q—After the initial registration period is over (the period from August 30 through September 18, both dates inclusive), will men who become 18 after that have to register?
 A—Yes. They will have to register continually as they become 18 within five days after the 18th anniversary of their births.

5. Q—Where will these men register after the initial registration period?
 A—They will register at places designated by their local boards.

6. Q—Will ignorance of the law be accepted as an excuse for failure to register?
 A—No. Ignorance of the law excuses no one. The Selective Service Act specifically provides that everyone will be deemed advised when the President proclaims dates for registration.

7. Q—Will single men be considered first for classification and induction into the armed forces?
 A—Single men who are not fathers or not veterans probably will be considered first. The term "single man" is understood to include an unmarried man, a married man who does not live with his wife or who is separated, divorced, or a widower.

BRING IRISH TO CAPITAL
 WASHINGTON, D. C. — (AP) — Ever since they began representing the nation's capital in the National Football League in 1937, the Redskins have had one or more ex-Notre Dame players on their roster every year except 1944, when Wayne Miller, the brilliant end, was in the Navy. Present ex-Notre Damer on the squad is John Adams, the six foot, seven inch tackle. Miller is now tribe end coach.

Another Letter from
The Bootleg Philosopher

(Editor's note: The Bootleg Philosopher has hit a new low in backwardness, his letter this week reveals. The government is not about to demonstrate on his farm, although demonstrating on him might make sense).

Dear editor:
 I read in a copy of a paper which I absent-mindedly picked up of a cafe counter in Hereford Saturday and will return the next time I get back into town about the run-down farm up in Wisconsin which was miraculously made over in a few days by the government, and I been thinkin about the matter.

Up there, the government organized all its help, and at daybreak showed up at the farm with hundreds of workers and started tearin down and rebuildin barns, remodelled the house, terraced the land with twenty bulldozers, built new fences, installed modern plumbing, added new equipment in the kitchen, dug a well, graveled the road, swung new gates, etc.

When they got through they rubbed their hands in admiration and figured up the cost which come to slightly over \$20,000.

Now I ain't got no objection to any farmer gettin that kind of handout from the government, can't get too many hand-outs to suit me as long as they're passed around, a old age pension check is the greatest invention since free garden seed, except they wait too long to classify a man as old, old age ought to start at 45 instead of 65, but I will appreciate you tellin the government officials if they are plannin on any such kind of demonstration on my farm out here at Bootleg, and I believe I can prove there ain't no farm anywhere in Deaf Smith county and probably Texas which needs demonstratin on worse than mine, it would suit me a lot better and they could do it without goin to a lot of trouble and work if they'd just mail me the \$20,000 and let the blamed farm keep on degeneratin.

I don't like to see the government waste money, and spendin money to improve my place is about like tryin to put a windshield wiper on a walkin plow, and while it might be nice to have the house painted, I'd much rather have the money and if I'd wanted it painted very bad I'd a done it myself long ago. It might even help my farm to have it terraced, but I say let the weeds shift for themselves and if they can't eke out a livin on a washed-out hill side let em die.

I will appreciate you havin our new Senator, don't make no difference which one it is or both of em in case it's a tie, attend to this matter for me. We could use three any way to make up for not havin but one durin the last six years.

Yours faithfully,
 J. A.

"Did you have a hard day selling brushes today, Dear?"

Modern Study Club Has 'Snack Supper'

The Modern Study Club held its first meeting of the year at the club house Tuesday evening, Sept. 7th. A "snack supper" was served to the members and guests, after which the meeting was called to order by the new president, Eufaula Ethridge.

The minutes of the past two meetings were read and approved, reports from the standing committees were given. A motion was made to amend the constitution, increasing the membership from thirty-five to forty members. Mary Anderson was elected to membership to fill the vacancy made by the resignation of LaVerne Burrow.

An interesting program on "Pursuit of Happiness" was given by Robert's Seago and Rhea Foster. The club collect was sung by a trio consisting of Eva Miller, Faye Reeve and Pieta Terry, accompanied by Joyce Ann Miller.

There were thirty-one members and two guests present. The hostesses were Elsie McFarland, Wilma Jones and Lila Gaye Gee.

Baptist Revival Successful Here

The most successful revival ever held at the First Baptist Church closed September 5th. Large crowds attended consistently throughout the meeting.

A Sunday School attendance goal of 400 was set for the last Sunday and was exceeded with an all-time record of 433 present. The estimated crowd in the Tabernacle for the last Sunday Evening service was near 600. There were 69 additions, 39 by baptism and 30 by statement and letter. Four others made professions but did not unite with the Church.

The people of other churches of Friona were cooperative and helpful in making the Revival what it was.

Rev. John H. Osteen, of Amarillo, was the evangelist and Bill Sweency, of Phoenix, Ariz, and of Wayland College, led the youth choir and the congregation in gospel singing.

Harvest Sign: Better Days Ahead

The French wheat harvest promises to yield enough bread to supply the entire nation during the coming fall and winter, thanks to good weather. This pastoral scene in Blois, southwest of Orleans, shows peasants threshing and sacking the golden grain before carts haul it to the mill.

Poultry And Eggs Hold Firm As Prices Of Other Farm Products Begin Slipping At S.W. Markets

Only poultry and eggs held firm last week as prices of most farm products began to slip at southwest farm markets, according to USDA's Production and Marketing Administration.

Spot cotton prices dropped below the government loan value, yet improvement in domestic mill and export demand was reported.

Rice markets took a tumble as new crop offerings increased, but most other grains showed higher Monday than a week ago. Wheat was up about six cents, corn two to five cents, and oats two cents per bushel. Sorghums advanced 15 cents per 100 pounds.

This past week saw light demand for liberal offerings of southwest fruits and vegetables. As a result some prices began to slip below those a week ago. Colorado furnished the bulk of the shipments with New Mexico moving cantaloups, Oklahoma watermelons, Louisiana sweet potatoes and Texas Irish pota-

toes. Best peaches were about \$2.75 at Palsade, Colorado. Colorado sold Irish potatoes mostly at \$2.25 per 100 pounds for U. S. No. 1 Bliss Triumphs and Sweet Spanish onions, U. S. No. 1 quality, at \$1.90 to \$2 per 50-pound sack. Peanuts stood around the CCC support level at most-southwest terminals this week. Demand was dull for light offerings from the new crop.

Light offerings of poultry and eggs met with good demand at southwest markets this past week. Top quality eggs gained a penny or more at some markets while straight run farm eggs held steady at 37 to 40 cents per dozen. Heavy hens brought 28 to 30 cents per pound at Dallas, 26 to 28 at Fort Worth, 30 to 32 at Denver and 37 to 40 at New Orleans. Fryers ranged from 37 to 40 cents.

Southwest wools saw a flurry of trading last week. Prices in New Mexico and Texas ranged from \$1.62 to \$1.72 for average

French combing wools.

Reduced cattle receipts at southwest markets failed to halt declining prices last week. Losses ranged from 25 cents to \$2 per 100 pounds. Monday's quotation for common and medium cows stood at \$18 to \$20.50 at Houston, \$17 to \$19 at San Antonio and \$17.50 to \$20 at Wichita. Fort Worth sold common to good cows at \$16 to \$20. Oklahoma City quoted beef cows at \$17 to \$20. Denver turned good beef cows at \$21.50 to \$22.50. Most stocker cattle held fairly steady under good demand.

Hogs held about steady at southwest markets during the past six days of trading despite the heaviest receipts since May. Monday's market for best butchers was \$28 at San Antonio, \$29.50 at Fort Worth, \$29 to \$29.50 at Oklahoma City; \$29.50 to \$30 at Wichita; \$31 to \$31.50 at Denver and \$29 to \$30 at Kansas City. Sows cashed at \$22 to \$25 at Fort Worth; \$25 to \$26 at Oklahoma City and \$23.75 to \$26.50 at Wichita.

West Texas C of C To Oppose Writing Of New Water Laws

Abilene-West Texas will vigorously oppose the writing of new water laws, recently proposed at a meeting in Austin, which stand as a threat against municipal and domestic needs for water. It has been announced following a meeting of the water Resource Commission of the West Texas Chamber of Commerce here.

In a declaration of principles the commission went on record in strenuous opposition to that section of the proposed code which provides that all previous appropriations of water shall now be regarded as "vested right of priority."

This, it was pointed out by D. A. Bandy, general manager of WTCC, is wholly in conflict with present laws, which allow a city, town or municipality to recover from other inferior users all water necessary for domestic purposes.

"The new proposal makes worthless our municipalities' present superior rights, and such West Texas waters as are now being used for big industries and rice growers on the Gulf coast can never be recovered for our own use," it was pointed out in the committee's declaration.

The entire WTCC water commission came here for the meeting. It is composed of Winfield Holbrook, Plainview, chairman; James N. Allison, Midland; W. O. Fortenberry, Lubbock; C. E. Coombes, Stamford; and Charles South of Coleman. Homer Hunter, WTCC consulting engineer, also was present.

The group is making its report to President C. P. Dodson and the executive board, following the proposals recently offered for a revision of the Texas water code, by the Texas Water Conservation Association.

"That part of the proposed surface water code, which gives the present big dams the right to appropriate the ordinary flow, underflow, storm, flood or rain waters in amounts and quantities equal to the holding capacity of such dams over and above the right to impound wa-

ter for domestic purposes," is opposed by the group as "in conflict with Article 7472 which gives our municipalities the unquestioned right to recover the unappropriated for inferior uses. "On our Brazos and Colorado watersheds where appropriations are now nine times as large for hydro-electric power purposes as for domestic and industrial purposes combined, it means that hydro-electric activities must first be carried on before our West Texas communities and cities can have their drinking water."

The proposed law treating ground water as property of the state also was attacked. "In line with our previously adopted declaration of principles, we recommend opposition to this proposed groundwater code until more facts are available on sources, depletion and replenishment of ground water, and until ground water can be treated from the fundamental principle of the doctrine of correlative rights than on a state ownership basis," the group said.

Opposition also was expressed against rewriting the entire water laws of Texas, which would void the WTCC-Wagstaff-Woodward measure which now gives full protection to domestic users. It was pointed out that such revision would mean unnecessary litigation, because these provisions already have been construed.

While opposing these several actions, the group went on record as favoring a reorganization of the State Board of Water Engineers, but pointed out that any newly created board should represent the public interest "and be wholly divorced from water use authorities."

Elizabeth England, news reporter worked exclusively for great noblemen whom they kept informed of matters of interest.

The normal temperature of most birds is between 104 and 106 degrees.

Birds are very well insulated in their dense plumage and have no sweat glands.

Livestock Life-Saving Drive Starts

AUSTIN—Texas farmers were enlisted today in a livestock life-saving campaign this fall, designed to "keep 'em eating" and convert the big 1948 grain crop into needed meat supplies for the nation and the world. "A bumper crop of feed grains is now being harvested," the American Foundation for Animal Health explained. "This is the time to start a new and intensive effort to keep every possible animal on feed. Step No. 1 is to cut down the losses caused by disease, parasites and poor sanitation in many of our farm herds and flocks."

To check these losses, farmers were advised to observe the following practices:

"Supplement grains with extra vitamins, minerals and proteins for best feeding results.

"Check on the time and need to have animals and poultry vaccinated against infectious diseases.

"Make a gradual change from pasture to winter feed to avoid the danger of digestive upsets and more serious disorders.

"Check herds regularly for accidental wounds through which infection might enter. Have good disinfectants available, and use them wisely.

"Keep stock as free as possible from parasites. Provide adequate housing, well ventilated but free from drafts, and avoid over-crowding.

"Give special care to mother animals at farrowing, calving and lambing time. Provide clean, well-bedded, warm pens or stalls.

"Keep young animals and birds away from the older stock as much as possible, to minimize the risk of disease losses.

"Watch out for any sign of an outbreak of disease. Get a diagnosis at once if trouble threatens, and isolate infected stock from the rest of the herd or flock."

Oct. 1 Deadline For Entering State Poultry Contest

October 1 is the deadline for entering the statewide poultry contest sponsored by the Texas Poultry Council, Mrs. Tom Draper, County Home Demonstration Agent announced. Anyone interested should contact either Mrs. Draper or County Agent Hugh Clearman.

The contest closes July 31, 1949, and offers twenty prizes with the grand award of \$100. Judging basis will be the number of eggs per hen.

This is a new contest which the supervisors, the Extension Poultrymen of Texas A & M College, hope to make an annual affair. It is open to all Texas Poultry producers who own and manage 100 or more hens or not more than two breeds or varieties exclusive of R. O. P. breeders.

"The objectives of this contest are to get higher egg production, to put poultry raising on a sound business basis, to demonstrate the advantages of good breeding, feeding and management," Mrs. Draper said.

During World War II the United Nations controlled 99.9 per cent of the world's diamond production.

The number of feathers on a bird vary according to the species, the season, and the age of the bird.

Wheat Sowing Here Is Well Under Way

All farmers who were fortunate to have a wheat crop this season, those who had sufficient moisture last fall to produce a stand where sown, are now busy planting their wheat crop for next season.

Whether or not the wheat land still has sufficient moisture to germinate the grain and produce a stand, the Star has not been informed, but some of our cattlemen are fearing there will not be much wheat field pasturage for this winter.

Birds are much like airplanes but they produce both lift and propulsion with their wings. Airpropulsion is produced by the propeller and lift by the wings.

Mining in Ontario got its real start with the discovery of rich silver veins at Cobalt in 1904.

The grave of the Rev. Josiah Henson, the original Uncle Tom of Harriet Beecher Stowe's "Uncle Tom's Cabin" is in Dresden, Ont.

Sweet Pickle Publicity Story

Almost anywhere cucumbers are grown, when the cucumbers are ready to pick the farmer (or gardener) goes out and picks them and makes pickles out of them. Not so in Florida. When Florida's cucumbers are ready to pick, a couple of cuties in shorts and a guy with a camera go out and make publicity out of them. This is what happened at the Hialeah Park race track (of all places to grow cucumbers), in Miami, and the cuties they sent out are Betty Wagner, left, and Olga Petersen. The moral: Don't pickle your cucumbers, publicize them.

Pitcher

Lawrence Duane Stoddard, (above), 12, who had polio when three-years old, holds his crutches with his pitcher's glove and sends one down the alley. Lawrence is manager of one of the teams in the soft ball league operated by Kids, Inc., of Amarillo.—(AP Photo).

WTCC Convention Set At Abilene

West Texas Water Rights To Be Discussed In Project Clinics

A fight for West Texas water rights will be carried directly into Parmer and 131 other counties of the West Texas Chamber of Commerce territory in a series of project clinics authorized this week by members of the executive committee. At the same time the committee set the date for the 31st annual West Texas Chamber of Commerce convention to be held in Abilene, Monday, November 8. Project clinics have been set for the following towns: Tahoka, Tuesday Sept. 28; Panhandle, Wednesday Sept. 29; Quanah, Thursday, Sept. 30 and Decatur, Friday, Oct. 1. Monahans, Tuesday Oct. 5; Del Rio, Wednesday, Oct. 6; Stephenville, Thursday, Oct. 7 and Breckenridge, Friday Oct. 8. These project clinics will replace the regular annual referendum meetings, which have been held in the past and will be in the towns selected by directors at last year's meeting. "Due to the long range character of the work program adopted at last year's referendum and to the necessity of acting upon committee reports in pursuance of that program, your Executive Board believes that in this year's annual proceedings the energies of the organization should be devoted to acting on committee reports and to carrying out objectives already adopted by previous referendums and annual conventions," the executive board, which was presided over by President C. P. Dodson announced. In the program as outlined by Manager D. A. Bandeen the project clinics also will receive presentations of industrial reports made by committees of three major West Texas railroads, the Santa Fe, Texas & Pacific and Burlington. These reports will cover surveys now being completed by the respective committees and will represent approximately \$40,000 of factual information. Already for distribution is the grain sorghum report from the WTCC-Burlington industrial committee which was prepared by engineers of the Texas Electric Service. This report deals with factual information on the production and utilization of grain sorghums and will be a handbook for local WTCC directors in an effort at industrialization of this leading West Texas crop. It was announced the cotton report now being prepared under the WTCC-San'a Fe committee is nearing completion and likewise will be ready for distribution at the project clinics. This is an analysis of the cotton manufacturing potentialities of West Texas. It is being prepared by Mark Wood at Texas Tech. Another important project to be reported is that of the WTCC T & P industrial committee, which has under way an economic analysis of the West Texas area served by the T&P. Dr. Sidney L. Miller is preparing this analysis and he has already made three independent reports which include livestock feeding, leather goods potentialities and water needs of the area. The group also gave its support to the eight constitutional amendments to be voted on at the general election Nov. 2. Members said they found nothing political in the amendments and that each represented good government and would merit support. Today there are 9,000 farm airplanes, an increase of 8,000 per cent since 1941. This increase is symbolic of the growth in oil-powered farming in the war and postwar years.

Navy's Mars Sets New Flight Record

The Navy's largest operational plane, the Caronine Mars, boats in Lake Michigan off Chicago's Burnham Park after its record-breaking flight from Honolulu. The giant cargo carrier covered the 4748 miles on the trip to break the distance record for flying boats. The elapsed time for the non-stop flight was 24 hours and 13 minutes. The ship averaged from 185 to 190 miles per hour.

Bountiful Rains In Friona Area Followed By Withering Crops

The bountiful rains that covered the Friona territory as was reported in the Star a few weeks ago, and which produced such rapid and luxuriant growth of the large acreage row crops in this territory is now being followed by the withering of the only partially matured crops. During the two weeks or more, immediately following the rains, all vegetation including the crops made such a rapid growth as has never before been known in this locality, and this rapid growth has evidently taken the

moisture from the soil in the same rapid process, and not having been followed with supporting showers, the crops, for lack of such moisture, are now withering in the fields in an only half matured condition. Apparently none of the heads have matured their grain, and in many of them the grain has not yet formed, but farmers are obliged to cut it in this condition as the withered stalks are unable to support the heads and are thus falling badly. Only two weeks ago one of

the most abundant yields of sorghum grains this locality has ever produced, was in evidence, and the present conditions is an experience that has been unknown in this locality.

This condition applies to practically all fields where irrigation was not available, while those under irrigation are still looking promising.

America's farms are producing 51 per cent more food than in 1935, with a million farm workers. Food production has increased tremendously, as the farm has been mechanized, largely with equipment using oil products.

Despite common misconceptions caused by its name, only about one-eighth of Iceland is covered by glaciers.

The GRAHAM-HOEME PLOW

WE HAVE 'EM ON HAND

Manufactured by GRAHAM-HOEME PLOW CO., INC. AMARILLO, TEXAS

PROVEN FACTS

On the average, enough rain falls on your farm every year to make fine crops. But, after the first few minutes of rain a smooth surface seals itself, causing run-off. It has been scientifically proven that the same field will NOT seal itself when plowed with the Graham-Hoeme All Purpose Plow with a 2-inch chisel furrow every 12 inches. This method by-passes the rainfall through the top soil and keeps a straw mulch on TOP. Upwards of three times the moisture enters the ground. If the next day is fair and hot, the bare soil would soon be steaming and losing its moisture rapidly. BUT NOT IF THAT GROUND IS COVERED. The Graham-

Hoeme Plow leaves vegetation on top to shade and protect, and moisture stays in the soil longer to bridge between rains. These are not just opinions, but proven facts. A covered corrugated field in a good, brisk rain, will absorb 200 per cent more moisture than a bare field and 60 per cent more than a field with vegetable matter plowed into the surface. To supply this covering for the soil without the expense of artificial cover, and to place the soil in a condition to by-pass the moisture through the top soil is the purpose and achievement of the Graham-Hoeme Plow.
