GOLD AND SILVER MINE

Some of the ore from this prospect has been assayed at El Paso; also of the ore has been sent to the U. S. Bureau of Mines at Washington, D. C. Ore from near top of ground assays traces of gold, silver, and possibly platinum. Mine located in Terrell county Texas. Paying ore will be found 35 to 50 feet underground. I have no money to develop this claim so would like hear from some party or parties who will develop same. Expenses very small; a rare opportunity for some one. For particulars write Gavino M. Aragon, Box 32, Sanderson, Texas.

Enamel Ware, Glasses, etc.

Also WOOL SOCKS and Twine.

We carry at all times a complete line of Groceries and Hardware. Call on us for your wants.

SMITH & ELDRIDGE

BRIDAL SHOWER

One of the nicest affair that has recently been given was the bridal shower by the Maccabees Wednesday afternoon from three to five thirty, at the home of Mrs. Dave Pollard, for Miss Cecile Bodkin, a coming bride.

The reception room and dining room was tastefully decorated with the Maccabee colors, red, white and black, together with numerous pot plants.

Soon after the guests arrived it was announced that the "Special" would be in. On looking everyone observed that here come little Nell Lea and Melvin Pollard dressed as bride and groom, pulling a little "express" wagon loaded with many beautiful as well as useful gifts for the honoree. Packages were opened by the coming bride and some time was spent in admiring the gifts and extending congratulations and best wishes to Miss Bodkin.

Delicious refreshments consisting of fruit jello with whipped cream and nuts, and nut cake were served.

The time was quickly passed and all departed expressing thanks to Mrs. Pollard for a pleasant afternoon.

Mrs. Ethel Raysor of Tyler was an invited guest of the lodge.

Maccabee Lodge

The Sanderson Review Lodge No. 72, W. B. A., met at the lodge hall Tuesday afternoon at a call meeting. A notable visitor in the presence of Mrs. Laura B. Hart, the Great Commander of the Woman's Benefit Association of the Maccabees of Texas, was in attendance. The lodge enjoyed a pleasant, helpful and inspiring talk from Mrs. Hart. After the business meeting was over, a social hour was enjoyed. Refreshments consisting of delicious cake and hot chocolate were served to some 30 members of the Maccabees.

LADIES ATTENTION

I have just received another nice shipment of ladies and childrens hats, which arrived Wednesday of this week. It will be to your interest to call and see them at once.

Mrs. Stella Sherrod.

Oh! You Married Fellows!

(The following article was handed to the Times this week by a Sanderson man who vouches for its truth.)

When a man marries he's free from all care.

His wife gets his money and figures HER SHARE.

She gives him a nickel, sometimes a dime.

But never a quarter at any one time.

He is also free from all pain of ever thinking of his welfare again.

For every move in his whole married life

is marked down and chalked off by his wife.

BRIDGE CLUB.

Mrs. G. J. Meckel was hostess to the Wednesday Bridge Club last Wednesday afternoon at the Kerr Hotel. Four games were played, high score made by Mrs. G. R. Reave of El Paso, second high by Mrs. F. B. Carter, and out prize by Mrs. J. B. Murrh. Favors to each guest were tiny George Washington hatchets. A delicious two course luncheon was served.

Marathon has an epidemic of scarlet fever. Sanderson has an epidemic of "marriageitis."

BRIDE'S SHOWER

(Contributed)

The eighth, ninth and tenth grades met at the residence of Mrs. Evan Hord, Saturday, February 24th, giving a class shower to Mrs. Leta Robertson, a recent bride.

The afternoon was spent playing games and dancing. Nelberta Lea and Iva Hord assisted Mrs. Hord in serving delicious refreshments to the following pupils and teachers: Leta Robertson, Katharine Sharp, Grace Martin, Mary Alice Happle, Annie Farley, Mable Harrell, Lora Mae and Hazel Winn, Mary Farley, Garnet Worchester, Lula Glover, Eddie Mae Stirman, Lolette Lemons, James Smith, Misses McKee, Puckett and McGuire.

Many beautiful pieces of silver, china and linen were showered on the happy bride; all left expressing themselves enjoying the affair and some were wondering how soon they could give another shower.

One of the delightful social affairs of last week was a Bride's Shower given for Mrs. Frank Robertson Jr., nee Leta Poozley, at the home of Mrs. Chester Smith.

In spite of the rain there was a very large number of ladies out and Mrs. Robertson was the recipient of many beautiful and useful gifts.

Mrs. Smith, as hostess, served salad, wafers and tea and each lady present voted Mrs. Smith a charming hostess and expressed herself as having had a pleasant afternoon.

MCKINNEY-GRIGSBY

Last Sunday night, February 25th, in the presence of a few friends, Miss Johnnie McKinney and Mr. Lee Roy Grigsby were united in marriage at the home of Mr. and Mrs. Oran Schuppach, Rev. Adams, Pastor of the Baptist Church officiating. The wedding came as a surprise to many friends of the couple.

The bride is a daughter of Mr. and Mrs. D. Y. McKinney, she is a student of the Sanderson High School and a popular member of the senior class. Her sunny disposition and ever ready smile has won for her a host of friends who wish for her, success, happiness and prosperity through her journey in life.

The groom is a son of Mr. and Mrs. Lee Grigsby, and an employee of the G. H. & S. A., as tonnage clerk. He is a popular member of the younger set.

The young couple are now at home to their many friends at the home of Mr. and Mrs. Lee Grigsby.

The Times joins in with their many friends in wishing for their success and prosperity.

Moving to Louisiana

B. F. Purl and family are moving this week to Lafayette, Louisiana. Mr. Purl has been promoted and transferred to that place. Mr. Purl and family have been residents of Sanderson for a number of years, during which time Mr. Purl has held positions with the Kerr Mercantile Co., the Sanderson State Bank, the Post Office, the Bassett Mercantile Co., and the G. H. & S. A. Railway. The family has many warm friends here who regret to see them leave but hope they will like their new home.

No matter what you think of the taste of a young man who gets married in times like these, you can't help admiring his nerve.—Indianapolis Star.

New Buildings

Roy Landers returned Wednesday evening from Dryden where he has been employed for several weeks with the Shirley Martin cement gang in putting up the Edmond Jones building. Roy said that the building was completed with the exception of some carpenter work, and that Mr. Jones would move into the building in about two weeks.

Mr. Martin and his men will go to A. D. Brown's ranch where they will build a house for Mr. Brown.

ATTENTION RANCHMEN!

We will assist you in the preparation of your INCOME TAX RETURN without charge.

SANDERSON STATE BANK

BANK OF FRIENDLY SERVICE

The Baptist revival meeting which had been in progress for the past two weeks at the Presbyterian church, closed last Sunday night. The revival was conducted by Evangelist Palm. The meeting drew a large crowd every night and there were a number of conversions, some of them uniting with the Baptist church, and others uniting themselves with other denominations.

Fal Elder purchased 100 head of goats this week from Rollie Rutledge and has moved them to his ranch near the Rio Grande.

Wear made-to-measure clothes and you will always appear well dressed. Call at the Royal Tailor Shop and let us show you some of the "smartest" samples for suits you ever seen. The cost is low and satisfaction guaranteed.

Mrs. Willis Carter and children returned from El Paso Wednesday, where they have been visiting relatives and friends.

Grover King was in from the Arvin ranch Friday, on business.

Black Damp Blast Kills 120 in New Mexico

Scene of the mine disaster at Dawson, N. M., where 122 miners were entombed when an explosion of black damp occurred. Only two escaped. Inset shows a rescuer about to enter the mine.

Tampa Falls Into Hands of Pirates

The Gasparilla carnival in Tampa, commemorating the historic arrival of a Spanish pirate ship, is vastly entertaining to the winter visitors to the Florida city. Here is the pirate craft as it enters the harbor each year to capture the town.

Lariat Expert to "Rope" Crooks

Mrs. Millicent Cooper, who, after serving for two years in police work in Lewiston, Mont., is now in Washington as a finger-print expert in the identification department of the women's bureau of investigation of the Metropolitan police department. A few years ago she taught school in a remote section of Montana, 150 miles from a railroad.

What Home Brew Can Do to a Home

This is what home brew can do to a family home, this photograph showing the remains of a ten-room house at 4753 Reservoir street in Washington in which police say a two-hundred gallon still exploded and in doing so set off four smaller stills.

STATE SENATE AND HOUSE PROCEEDINGS

Legislators Now Busy Making New Laws and Changing Old Ones.

Friday's Senate Proceedings.
Austin, Tex.—The senate Friday passed finally the following senate bills:
Allowing appointment of more than two deputy constables in precincts of counties containing cities of more than 100,000 population.
Providing for collection of delinquent taxes in Wilacy County.
Penalizing concerns selling electricity, water and gas that allow meters to register more than actual sale.
Creating Texarkana court at law.
Broadening powers of independent executors.
House bill creating corporation court at Port Arthur.

Creating the following independent and common school districts: Santa Cruse, Hearne, Granbury, La Parita, Green Lake, Sharp, Harris, Farnell.
House bill reorganizing the thirty-eight and sixty-third judicial districts.
Friday's House Proceedings.
Austin, Tex.—Several senate bills were finally passed in the house Friday as follows:
By McMillin—Requiring posting of hotel rates and thirty days' notice of changes.
By Davis—Providing that when a court of civil appeals declines to follow the ruling of another such court or the supreme court, it shall certify the question to the supreme court for a ruling.
By Davis—Providing that where there is a dissenting opinion in a decision by a court of criminal appeals the party shall have the right to have the question upon which there is dissent settled by the supreme court. If the case is one that has been appealed to the court of appeals from a district court.
By McMillin—Extending the right of absentee voting to general elections; that those out of the state may have ballots sent to them to be opened before a notary public and voted to the election judges.
By Burkett—Establishing the ninety-first district court in Limestone and Freestone counties.
By Fairchilds—Making it the duty of the state insurance commission to issue a classification of hazards and rates under the workmen's compensation act.
By Davis—Providing for one additional district court of general jurisdiction and a temporary court in Dallas county.

Thursday's Senate Proceedings
Austin, Tex.—By vote of 19 to 4 with three pairs, the senate today passed finally the bill by Parr to remit over a period of twenty-five years state and county taxes in Hidalgo County in order that the people of that county might vote bonds for protection against overflow.
The senate Thursday finally passed the house bill by Representative Fields of Hillsboro which is designed to make convictions for perjury less difficult. The bill amends the perjury law so that it is sufficient to charge in the indictment and to prove upon trial a witness made a statement knowingly and willfully under oath legally administered, contradicting another statement made by him under oath in the same legal proceeding.
Lacking two-thirds vote of the full membership, as required in such cases, the senate joint resolution by Clark, proposing repeal of the constitutional provision for free school textbooks, failed on final passage in the senate Thursday. The vote was 17 to 9. Twenty-one votes were necessary for final passage.

Thursday's House Proceedings
Austin, Tex.—The house Thursday passed finally Senator Rogers' bill authorizing expenditure of the remaining \$100,000 of the \$1,000,000 American Legion sanatorium appropriation. The bill also authorizes the board of control to use for purposes for which it was collected approximately \$17,500 collected by the American Legion to erect cottages. The \$100,000 balance is to be used for furniture.
House bills introduced Thursday:
By Baldwin—Harmonizing the law as to public weighers and enforcement of correct weights.
By Moore—Providing that vacancies in the office of county superintendent of public instruction may be filled by county commissioners courts.
By Carter of Coke—Providing that veterans of the world war may be exempted from state bar examinations as graduates of colleges now are exempted, even though they have not taken the two years' academic work prior to taking the law course.
Monday's Legislative Proceedings.
Senate committee adopted favorable reports on the following bills Monday:
By Hledsoe—Making the usual extension of two years for railroads to construct their lines as called for in their charters and thus prevent forfeiture of charter.
By Woods—Establishing a supreme judicial council with authority to equalize the dockets of all the courts of the state so that litigation may be expedited and isolated congestion relieved.

Wednesday's Senate Proceedings
Austin, Tex.—Senate bills passed finally by the senate Wednesday:
By Woods—Allowing consolidation of indictments in criminal cases, where they may be properly joined, when same defendant is charged with several violations of the law.
By Murphy—Permitting religious and charitable organizations to increase their directorates from twenty-five to seventy-five members.
By Pollard—Exempting from gross receipts tax concerns composed of students which deal in textbooks.
By Watts—Creating Ennis Independent School District.
By Darwin—Requiring depositories of independent school districts to give bond only to extent of amount of funds passing through their hands annually.
By Darwin—Fixing beginning of term of employment of teachers engaged on twelve months contracts in independent school districts as of July.
By Holbrook—Allowing Galveston & Western Railway Company to abandon part of its tracks in the city of Galveston.
By Holbrook—Permitting the Gulf, Colorado & Santa Fe Railway to acquire property of the Galveston & Western Railway in the city of Galveston west of the east line of Thirty-eighth street.
By Floyd—Making fiscal year for state officers begin Jan. 1.
By Bangh—Validating certain school district bond issues.
By Rice—Appropriating \$10,000 for temporary dormitory for North Texas State Normal College at Denton.
House Bills passed finally by the senate today:
By Stewart—Creating Barksdale Independent School District.
By Stewart—Creating Kempwood Independent School District.

Wednesday's House Proceedings
Austin, Tex.—The house Wednesday concurred in senate amendments to textbook investigation resolutions. Passed finally bill fixing minimum interest on state deposits at 4 per cent. Engrossed bills permitting absentee voting at general elections; requiring hotels to post rates in rooms; regulating procedure where courts disagree.
A plan to create five temporary criminal district courts to relieve court congestion in place of creating permanent additional district courts, now being sought in various parts of the state, was offered to the house by the governor in person Wednesday morning. The governor presented a draft of a bill carrying out the plan, which was formerly introduced later, signed by Representative Nelson and twenty others.
The governor prefaced presentation of the bill with the statement that there are now pending bills for the establishment of fourteen new district courts and that several others are in contemplation. District courts, once created, he said, can not be dispensed with later, practically.
His plan provides for five district criminal courts to continue until Nov. 1, 1924. These courts would have concurrent jurisdiction of criminal cases with the district courts in their territory and their judges would have the same qualifications and same pay as other district judges. The bill also provides for prosecuting attorneys for each of the courts, with qualifications of other district attorneys. Expenses for travel are provided in the bill.

Tuesday's Senate Proceedings
Austin, Tex.—By a vote of 4 to 3 Tuesday the senate state affairs committee returned an adverse report on Melson's house bill, levying a tax of 3 per cent on sulphur production in Texas.
Senators Clark, Floyd and Stuart gave notice of minority report favoring a tax of 1 per cent on sulphur.
Before the vote was taken there was a brief address by Mr. Melson, urging a tax on sulphur, and response by counsel for the sulphur companies, opposing it.
A majority of the committee was against imposing any tax on sulphur, while the minority thought it should pay some tax and favored the house bill, with amendment reducing the amount to 1 per cent.
Bills finally passed by the senate Tuesday include:
Limiting liability of hotels for property lost by guests at \$50.
Creating Barksdale independent school district.
Abolishing Mexia and Thucana independent school districts.

Tuesday's House Proceedings
Austin, Tex.—The Carpenter bill equalizing the dockets of district courts by providing that temporarily idle judges may be assigned to hold special courts in districts with crowded dockets was finally passed by the house Tuesday, 102 to 5.
By a vote of 84 to 38, the house engrossed the Williamson amendment to the highway bill Tuesday after a two-day fight.
Although amendments to the amendment were presented both Monday and Tuesday not one was adopted, if the action of the house in reconsidering the vote by which one amendment was adopted to be later voted down, is taken into consideration.
The bill, if finally passed, will gather into the treasury of the highway department more than \$5,000,000 annually. This money will be used in the construction and maintenance of the highways of the state.
By Faubion—Adopting a schedule of fees for public weighers

TEXAS IS LEADER IN AGRICULTURE

Total Value of Its Crops Is Greater Than That of Any Other State.

Washington.—Texas occupied first rank in the production of crops during 1922, as shown by figures just compiled by the United States department of agriculture, a place it has held for many years. The total value of its twenty-two leading crops is given as \$84,619,000, but the hypothetical value of all crops is placed at \$716,408,000. The Texas cotton crop, amounting to 3,290,000 bales, grown from 12,125,000 acres, was worth \$386,575,000, and comprised the leading crop for the state. Production and value of other leading crops was:
Corn, 114,920,000 bushels, \$95,101,000; winter wheat, 9,992,000 bushels, \$10,991,000; barley, 1,767,000 bushels, \$1,149,000; oats, 33,570,000 bushels, \$18,406,000; rye, 117,000 bushels, \$145,000; broom corn, 2,200 tons, \$440,000; tame hay, 1,074,000 tons, \$12,351,000; wild hay, 221,000 tons, \$2,210,000; sorghum syrup, 2,414,000 gallons, \$1,739,000; rice, 5,959,000 bushels, \$8,760,000; Irish potatoes, 2,418,000 bushels, \$3,869,000; sweet potatoes, 8,715,000 bushels, \$7,408,000; peanuts, 96,320,000 pounds, \$3,853,000; grain sorghums, 39,400,000 bushels, \$33,400,000; apples, 2,640,000 bushels (compared with 274,000 bushels in 1921); peaches 1,920,000 bushels and pears 290,000 bushels.

FEBRUARY ALLOTMENTS FOR HIGHWAYS TOTAL \$570,087

Austin, Tex.—The state highway commission at its February session granted a total of \$570,087 for road construction in sixteen counties. The largest allotment was made to Ward County, amounting to \$113,000. Bexar County was awarded \$44,000 and Dallas County received an allotment of \$37,500. Other awards made were: Harrison County, \$36,500; Washington, \$75,285; Hunt, \$18,302; Harris \$17,000; Jasper, \$50,000; Robertson, \$54,000; McLennan, \$17,000; Sabine, \$14,000; Runnels, \$20,000; Nolan, \$3,500; Medina, \$9,000; Matagorda, \$6,000; Reeves, \$5,000.

British Rejects Plan.

London.—The house of commons Monday by a vote of 305 to 196 rejected the joint liberal amendment to the address in reply to the speech from the throne proposing an investigation by the league of nations with American co-operation into Germany's capacity to pay reparations. The debate on the question was lifted above the ordinary by the brilliant speech of former Premier Lloyd George, who revealed undiminished parliamentary energy.

Asks for Property Return.

Washington. Return to German citizens of \$45,000,000 of the \$347,000,000 trusts held by the alien property custodian, as a result of wartime seizures was urged Saturday in a statement issued by Allen Property Custodian Miller. Such a reimbursement, he said, would "contribute vastly to a relief of the economic situation in Germany" at the present time.

Shoe Imports Taxed

El Paso, Tex.—Mexico uses 4,000,000 pairs of shoes a year. Mexican factories make 2,000,000 pairs, and 1,000,000 pairs are mostly imported from the United States, says a bulletin from Mexico City received at the El Paso Mexican consulate. The federal government of Mexico has placed a duty of three pesos (about \$1.60) on every pair of shoes, to encourage the home shoe factories, the bulletin says.

Names County Depository.

Cuero, Tex.—The commissioners court, which recently rejected all bids submitted for the custody of county funds for the ensuing two years, reconsidered its action when the First State Bank of Westhoff revised its bid and named that institution as county depository.

President Hands Out Jobs.

Washington.—William C. Deming of Wyoming was nominated by President Harding Friday to be a member of the civil service commission. Henry H. Glaspey of the District of Columbia was nominated to be a member of the tariff commission. Postmasters nominated included Carlton A. Dickson, Cleburne, Texas.

Will Plant Potatoes.

Smithville, Tex.—Many farmers and truck growers have begun planting Irish potatoes and other truck all of which promises to do well with the thorough season in the ground. The potato acreage in this section will be greater than last year.

Prohibition Agents Make Raid

Houston, Tex.—Eleven stills, 175 gallons of moonshine whiskey, 10,000 gallons of mash and a quantity of wine were captured at Dickinson, twenty-two miles southeast of Houston Wednesday, in what was described by prohibition enforcement agents as one of the most successful raids in the history of dry regulation in Texas.

Australian Wheat Crop Large

Melbourne.—The Australian wheat yield this season is estimated at 100,000,000 bushels.

STUDENT KILLS SELF

Overwhelmed by the dark philosophies of an English naturalist whose career was a failure, this Barnard college junior, Marie Bloomfield, committed suicide as the man of her inspiration had often wanted to do. She was in love with his spirit and sought death as an avenue of their meeting.

EXPLORER OF AFRICA

Lady Dorothy Mills, British author and explorer, daughter of the earl of Orford, who has started another exploring trip into the wilds of Africa, as she dresses for the expedition.

WHEELS TO HIS DESK

After an illness of two years—he was confined to his bed during the entire period—Representative J. J. Mansfield of Texas is again on the job at Capitol Hill. Although not quite recovered from the severe strain and still unable to walk, he staunchly attends every session. This photograph shows him in the wheel chair which he uses in his trips from the house office building to the capitol.

Mrs. A. A. White

The Appealing Charm of Perfect Health

Silom, Colo.—"I was sick for two years, could not regain my old time strength after motherhood, had no appetite and was so nervous I could not sleep. I lost fifteen pounds in weight. My friends all thought I had lung trouble, I got so thin and pale. All the medicine the doctors gave me failed to help me. One day I read about Dr. Pierce's Golden Medical Discovery and decided to try it. I got a bottle right away and after the first few doses I began to feel better. I took four bottles and it certainly did wonders for me. I can't say too much for this 'Medical Discovery' and always recommend it to my friends."—Mrs. A. A. White.
When run-down you can quickly pick up and regain vim, vigor, vitality by obtaining this Medical Discovery of Dr. Pierce's at your nearest drug store in tablets or liquid, or send 10c for trial pkg. to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y.

VICTIMS RESCUED

Kidney, liver, bladder and uric acid troubles are most dangerous because of their insidious attacks. Heed the first warning they give that they need attention by taking

LATHROP'S GOLD MEDAL HAARLEM OIL CAPSULES

The world's standard remedy for these disorders, will often ward off these diseases and strengthen the body against further attacks. Threesizes, all druggists. Look for the name Gold Medal on every box and accept no imitation

Retribution.

"Did she marry Mr. Willdotes to reform him?" "No," replied Miss Cayenne; "to punish him."

Stearns' Electric Paste

Is recognized as the guaranteed exterminator for Bed Bugs, Lice, Cockroaches and Waterbugs. Don't waste time trying to kill these pests with powders, liquids or any experimental preparations. Ready for Use—Better than Traps. Sold by Druggists. W. N. U. HOUSTON, NO. 9-1923.

DESERT GOLD

by ZANE GREY

Author of RIDERS OF THE PURPLE SAGE, WILDFIRE, ETC.

Copyright by Harper & Brothers.

NELL BURTON

SYNOPSIS—Seeking gold in the desert, "Cameron," solitary prospector, forms a partnership with an unknown man whom he later learns is Jonas Warren, father of a girl whom Cameron wronged, but later married, back in Illinois. Cameron's explanations appease Warren, and the two proceed together. Taking refuge from a sandstorm in a cave, Cameron discovers gold, but too late, both men are dying. Cameron leaves evidence in the cave, of their discovery of gold, and personal documents. Richard Gale, adventurer, in Casita, Mexican border town, meets George Thorne, lieutenant in the Ninth cavalry, old college friend. Thorne tells Gale he is there to save Mercedes Castaneda, Spanish girl, his affianced wife, from Rojas, Mexican bandit. Gale "roughhouses" Rojas and his gang with the help of two American cowboys, and he, Mercedes and Thorne escape. A bugle call from the fort orders Thorne to his regiment. He leaves Mercedes under Gale's protection. The pair, aided by the cowboys, Charlie Ladd and Jim Lash, arrive in safety at a ranch known as Forlorn River, across the border. The fugitives are at Tom Belding's home. Belding is immigration inspector. Living with him are his wife and stepdaughter, Nell Burton.

CHAPTER IV.—Continued.

"What is he? Who is he? Where did he come from? Surely you must be—"

"Laddy swears he's all right," interrupted the husband. "That's enough reference for me. Isn't it enough for you?"

"Humph! Laddy knows a lot about young men, now doesn't he, especially strangers from the East? Tom, you must be careful! He'll fall in love with Nell!" protested Mrs. Belding.

"Well, wouldn't that be regular? Doesn't every man who comes along fall in love with Nell? Hasn't it always happened?"

"But, Tom, Nell might fall in love with this young man!" exclaimed the wife, in distress.

"Laddy, Jim, didn't I tell you?" cried Belding. "I knew she'd say that. . . . My dear wife, I would be simply overcome with joy if Nell did fall in love once. Real good and hard! She's wilder than any antelope out there on the desert. Nell's nearly twenty now, and so far as we know she's never cared a rap for any fellow. And she's as good and lovable as she is pretty, but I'm afraid she'll never grow into a woman while we live out in this lonely land. And you've always hated towns where there was a chance for the girl—just because you were afraid she'd fall in love. You've always been strange, even silly, about that. I've done my best for Nell—loved her as if she were my own

"What is he? Who is he? Where did he come from? Surely you must be—"

daughter. I've changed many business plans to suit your whims. There are rough times ahead, maybe. I need men. I'll hire this chap Gale if he'll stay. Let Nell take her chance with him. She'll be all the better for it."

"I hope Laddy's not mistaken in his opinion of this newcomer," replied Mrs. Belding, with a sigh of resignation. "Well, supper is to be got. That young man and the girl will be starved. I'll go in now. If Nell happens around don't—don't flatter her, Laddy, like you did at dinner. Don't make her think of her looks."

Dick heard Mrs. Belding walk away.

"Shore she's powerful particular about that girl," observed Laddy. "Say, Tom, Nell knows she's pretty, doesn't she?"

"She's liable to find it out unless you shut up, Laddy. When you visited us out here some weeks ago, you kept paying cowboy compliments to her."

"An' it's your idea that cowboy compliments are plumb bad for girls?"

"Downright bad, Laddy, so my wife says."

"I'll be darned if I believe any girl can be hurt by a little sweet talk. It pleases 'em. . . ."

"Chop it!" interrupted Belding.

"Here comes Nell now."

Dick's tingling ears took in the patter of light footsteps, the rush of someone running.

"Here you are," cried a sweet, happy voice. "Dad, the senorita is perfectly lovely. I've been peeping at her. She sleeps like—like death. She's so white. Oh, I hope she won't be ill. How strange and sad, that about her! Tell me more, Laddy. You promised. I'm dying to know. Didn't you say the senorita had a sweetheart?"

"Shore I did."

"Is he the young man who came with you?"

"Nope. That fellow's the one who saved the girl from Rojas."

"Ah! Where is he, Laddy?"

"He's in there asleep."

"Is he—nice, Laddy?"

"Shore."

"What is he like?"

"Well, I'm not long acquainted, never saw him by day, but I was some tolerable took with him. An' Jim here, Jim says the young man can have his gun an' his hoss."

"Wonderful! Laddy, what on earth did this stranger do to win you cowboys in just one night?"

"I'll shore have to tell you. Me an' Jim was watchin' a game of cards in the Del Sol saloon in Casita. That's across the line. We had acquaintances—four fellows from the Cross Bar outfit, where we worked a while back. This Del Sol is a billiard hall, saloon, restaurant, an' the like. An' it was full of Greasers. Some of Campo's rebels were drinkin' an' playin' games. Then pretty soon in come Rojas with some of his outfit. They were packin' guns an' kept to themselves off to one side."

"A little while afterward I seen a fellow standin' in the restaurant door. He was a young American dressed in corduroys an' boots, like a prospector. He looked round the saloon, an' when he spotted Rojas he sorta jerked up. Then he pulled his slouch hat lopsided an' began to stagger down, down the steps. First off I made shore he was drunk. But I remembered he didn't seem drunk before. It was some queer. So I watched that young man."

"He reeled around the room like a fellow who was drunk," a lord. Nobody but me seemed to notice him. Then he began to stumble over pool-players an' get his feet tangled up in chairs an' bump against tables. He came round our way, an' all of a sudden he seen our cowboys. He gave another start, like the one when he first seen Rojas, then he made for us. I tipped Jim off that somethin' was doin'. Then this queer young man shot some cool, polite words at me an' Jim."

"He was only bluffin' at bein' drunk—he meant to rush Rojas, to start a rough house. The bandit was after a girl. This girl was in the hotel, an' she was the sweetheart of a soldier, the young fellow's friend. The hotel was watched by Rojas' guards, an' the plan was to make a fuss an' get the girl away in the excitement. Well, Jim an' me got a hint of our bein' Americans—that cowboys generally had a name for loyalty to women. Then this amazin' chap—you can't imagine how scornful—said for me an' Jim to watch him."

"Before I could catch my breath an' finger out what he meant by 'rush' an' 'rough house' he had knocked over a table an' crowded some Greaser half off the map. Then, quicker'n I can tell you the young man dove at Rojas. Like a mad steer on the rampage he charged Rojas an' his men. The whole outfit went down—smash! I figured then what 'rush' meant. The young fellow came up out of the pile with Rojas, an' just like I'd sling an empty sack along the floor he sent the bandit. But swift as that went he was on top of Rojas before the chairs an' tables had stopped rollin'."

"I woke up then, an' made for the center of the room, Jim with me. I began to shoot out the lamps. Jim threw his guns on the crazy rebels, an' I was afraid there'd be blood spilled before I could get the room dark. Bein' shore busy, I lost sight of the young fellow for a second or so, an' when I got an eye free for him I seen a Greaser about to knife him. Think I was considerate of the Greaser by only shootin' his arm off. Then I cracked the last lamp, an' in the hubbuboo me an' Jim vanooosed."

"We made tracks for our hosses an' packs, an' was hittin' the San Felipe road when we run right plumb into the young man. Well, he said his name was Gale—Dick Gale. The girl was with him safe an' well; but her sweetheart, the soldier, bein' away without leave, had to go back sudden. There shore was some trouble, for Jim an' me heard shootin'. Gale said he had no horse, no friends, his skin was brown, and his dark eyes beamed with a genial light."

"Young man, did you run into any-

thing as you came out?" asked Belding, with twinkling eyes.

"Why, yes; I met something white and swift flyin' by," replied Dick.

"That was Nell Burton, my girl—stepdaughter, I should say," said Belding. "She's sure some whirlwind, as Laddy calls her. Come, let's go in and meet the wife."

In Mrs. Belding, Gale found a woman of noble proportions and striking appearance. Her hair was white. She had a strong, serious, well-lined face that bore haunting evidences of past beauty. The gaze she bent upon him was almost piercing in its intensity. Her greeting, which seemed to Dick rather slow in coming, was kind though not cordial. Gale's first thought, after he had thanked these good people for their hospitality, was to inquire about Mercedes. Mrs. Belding said the girl had suffered no great hardship, other than mental, and would very soon be rested and well.

"Now, Gale," said Belding, when his wife had excused herself to get supper, "the boys, Jim and Laddy, told me about you and the mix-up at Casita. I'll be glad to take care of the girl till it's safe for your soldier friend to get her out of the country. That won't be very soon, don't mistake me. . . . I don't want to seem over-curious about you—Laddy has interested me in you—and straight out I'd like to know what you propose to do now."

"I haven't any plans," replied Dick; and, taking the moment as propitious, he decided to speak frankly concerning himself. "I just drifted down here. My home is in Chicago. When I left school some years ago—I'm twenty-five now—I went to work for my father. He's—he has business interests there. I tried all kinds of inside jobs. I couldn't please my father. To tell you frankly, Mr. Belding, I suppose I didn't much care."

"What do you want to do?"

"I want a man's job. I want to do things with my hands. I want action. I want to be outdoors."

Belding nodded his head as if he understood that, and he began to speak again, cut something short, then went on, hesitatingly:

"Gale, you could go home again—to the old man—it'd be all right."

"Mr. Belding, there's nothing shady in my past. The governor would be glad to have me home. That's the only consolation I've got. But I'm not going. I'm broke. I won't be a tramp. And it's up to me to do something."

"How'd you like to be a border ranger?" asked Belding, laying a hand on Dick's knee. "Part of my job here is United States inspector of immigration. I've got that boundary line to patrol—to keep out Chinks and Japs. You'll not be hired by the U. S. You'll simply be my ranger, same as Laddy and Jig, who have promised to work for me. I'll pay you well, give you a room here, furnish everything down to guns, and the finest horse you ever saw in your life. Your job won't be safe and healthy, sometimes, but it'll be a man's job—don't mistake me! You can gamble on having things to do outdoors. Now, what do you say?"

"I accept, and I thank you—I can't say how much," replied Gale, earnestly.

"Good! That's settled. Let's go out and tell Laddy and Jim."

Both boys expressed satisfaction at the turn of affairs, and then with Belding they set out to take Gale around the ranch. The wide grounds were covered with luxuriant grass and flowers and different kinds of trees.

Belding explained that the luxuriance of this desert place was owing to a few springs and the dammed-up waters of the Rio Forlorn.

"I've got one never-failing spring on my place," said Belding. "Fine, sweet water! You know what that means in the desert. I like this oasis. The longer I live here the better I like it. It's beautiful and healthy. Forlorn and lonely, yes, especially for women like my wife and Nell; but I like it. . . . And between you and me, boys, I've got something up my sleeve. There's gold dust in the arroyos, and there's mineral up in the mountains. If we only had water! There are possibilities, and I want you boys to stay with me and get in on the ground floor. I wish this rebel war was over. . . . Well, here are the corral and the fields. Gale, take a look at that bunch of horses!"

Belding's last remark was made as he led his companions out of shady gorges into the open. Gale saw an adobe shed and a huge pen formed by strangely twisted and contorted branches or trunks of mesquite, and, beyond these, wide, flat fields, green—a dark, rich green—and dotted with beautiful horses. There were whites and blacks and bays and grays. In his admiration Gale searched his memory to see if he could remember the like of these magnificent animals, and had to admit that the only ones he could compare with them were the Arabian steeds.

"Shore I reckon I savvy why you don't sleep nights," drawled Laddy. "I see a Greaser out there—no; it's an Indian."

Suddenly, Sweetly, She Blushed.

door. It was awkward for him, having only one hand available to lace up his boots. He looked out of the window. He heard bees, birds, chickens, saw the red of roses and green of grass. Then he saw, close to the wall, a tub full of water, and a bench upon which lay basin, soap, towel, comb and brush. The window was also a door, for under it there was a step.

Gale hesitated a moment, then went out. He stepped naturally, forward and expecting that the cowboys would hear him. But nobody came. Awkwardly, with left hand, he washed his face. Upon a nail in the wall hung a little mirror, by the aid of which Dick combed and brushed his hair. He imagined he looked a most haggard wretch. With that he faced forward, meaning to go round the corner of the house to greet the cowboys and these new-found friends.

Dick had taken but one step when he was halted by laughter and the patter of light feet. He saw a little foot sweep into view, a white dress, then the swiftly moving form of a girl. She was looking backward.

"Dad, I shall fall in love with your new ranger. I will—I have—"

Then she plumped squarely into Dick's arms.

Dick saw a fair face and dark-blue, seductively flashing eyes. Swift as lightning their expression changed from surprise, fear, wonder. For an instant they were level with Dick's grave questioning. Suddenly, sweetly, she blushed.

"Oh-h!" she faltered.

Then the blush turned to a scarlet fire. She whirled past him, and like a white gleam was gone.

Dick became conscious of the quickened beating of his heart. He experienced a singular exhilaration. That moment had been the one for which he had been ripe, the event upon which strange circumstances had been rushing him.

With a couple of strides he turned the corner. Laddy and Lash were there, talking to a man of burly form. "Hello, there's the young fellow," spoke up the burly man. "Mr. Gale, I'm glad to meet you. My name's Belding."

His greeting was as warm as his handclasp was long and hard. Gale saw a heavy man of medium height. His head was large and covered with grizzled locks. He wore a short-cropped mustache and thin beard. His skin was brown, and his dark eyes beamed with a genial light.

"Young man, did you run into any-

"That's my Papago herdsman. I keep watch over the horses now day and night. Lord, how I'd hate to have Rojas or Salazar—any of those bandit rebels—find my horses! . . . Gale, can you ride?"

Dick modestly replied that he could, according to the eastern idea of horsemanship.

The ringing of a bell, which Belding said was a call to supper, turned the men back toward the house. It was not until they reached it and were about to go in that Belding chanced to discover Gale's crippled hand.

"What an awful hand!" he exclaimed. "Where the devil did you get that?"

"I stove in my knuckles on Rojas," replied Dick.

"You did that in one punch? Say, I'm glad it wasn't me you hit! Why didn't you tell me? That's a bad hand. Those cuts are full of dirt and sand. Inflammation's setting in. It's got to be dressed. Nell!" he called.

Dick saw a glimpse of golden hair and a white dress in the door. But they were not visible longer than a second.

"Dad, what's the matter?" asked a voice that was still as sweet as formerly, but now rather small and constrained.

"Bring the antiseptics, cotton bandages—and things out here. Hurry, now."

Belding fetched a pail of water and a basin from the kitchen. His wife followed him out, and, upon seeing Dick's hand, was all solicitude. Then Dick heard light, quick footsteps, but he did not look up.

"Nell, this is Mr. Gale—Dick Gale, who came with the boys last night," said Belding. "He's got an awful hand. Got it punching that Greaser Rojas. I want you to dress it. . . . Gale, this is my stepdaughter, Nell Burton, of whom I spoke. She's some good when there's somebody sick or hurt. Shove out your fist, my boy, and let her get at it. Supper's nearly ready."

Dick felt that same strange, quickening heart throb, yet he had never been cooler in his life. More than anything else in the world he wanted to look at Nell Burton; however, divining that the situation might be embarrassing to her, he refrained from looking up. She began to bathe his injured knuckles. He noted the softness, the deftness of her touch, and then it seemed her fingers were not quite as steady as they might have been. Still, in a moment they appeared to become surer in their work. When she sat down beside him and rested his injured hand in her lap as she cut bandages, she was so thrillingly near that he yielded to an irrefragable desire to look up. She had a sweet, fair face warmly tinted with that same healthy golden-brown sunburn. Her hair was light gold and abundant, a waving mass. Her eyes were shaded by long, downcast lashes, yet through them he caught a gleam of blue.

Despite the stir within him, Gale, seeing she was now absorbed in her task, critically studied her with a second closer gaze. She was a sweet, wholesome, joyous, pretty girl.

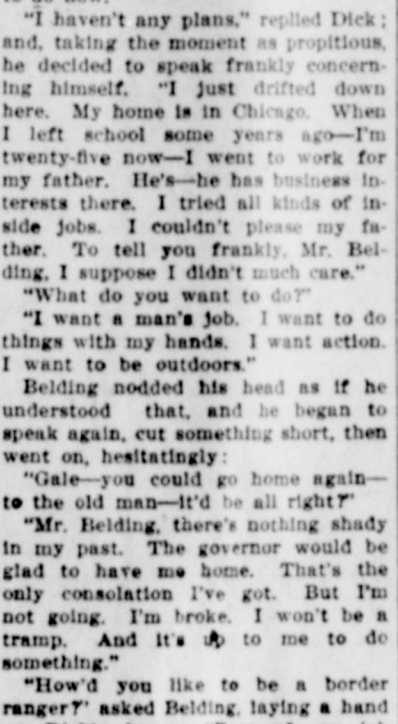

"Shore it musta hurt!" inquired Laddy, who sat an interested spectator.

"Yes, I confess it did," replied Dick slowly, with his eyes on Nell's face. "But I didn't mind."

The girl's lashes swept up swiftly in surprise. She had taken his words literally. But the dark-blue eyes met his for only a fleeting second. Then the warm tint in her cheeks turned as red as her lips. Hurriedly she finished tying the bandage and rose to her feet.

"I thank you," said Gale, also rising. With that Belding appeared in the doorway, and, finding the operation concluded, called them in to supper. After the meal, having a favorable opportunity when for a moment no one was at hand, Dick went out through the yard, past the gardens and fields, and climbed the first knoll.

Westward the setting sun glided a spiked, frost-colored, limitless expanse of desert. It awoke Gale. What a strange, gray, amber place! There was a lighter strip of gray winding down between darker hues. This he realized presently was the river bed, and he saw now the pools of water narrowed and diminished in size till they lost themselves in gray sand. This was the rainy season, near its end, and here a little river struggled hopelessly, forlornly to live in the desert. He received a potent impression of the nature of that blasted expanse to give him strength and work and love.

Suddenly, Sweetly, She Blushed.

"It was indescribably sweet and provocative of thoughts—"

(TO BE CONTINUED.)

Domestic Animals Necessary.

Man couldn't get along without domesticated animals. The world now has one sheep and one head of cattle for each five people, and one head of swine for each 12 people. America, with only a sixteenth of the world's population, has a sixth of the world's cattle, a tenth of the sheep and three-sevenths of the swine. We are the greatest meat eaters on earth. Yet we are the most peaceful people. Militant Japan's diet is based on rice. It is an uncomfortable contrast for the theorists who preach that meat-eating makes people ferocious or savagely emotional.

Uncongenial.

Miss Gush (to popular novelist)—I suppose you just live with your characters.

Novelist—Oh, dear, no. They're rather an unpleasant lot.

Ancient City of Carthage.

Carthage was founded by the Phoenicians about 850 B. C.

"That fellow Jones is the worst liar I ever met."

"What now?"

"He says he took his car to the garage man and the fellow found there wasn't much the matter with it and actually fixed it—fixed it, mind you—and didn't charge him a cent for the trouble."

The Nonchalant Aviator.

"Are you hurt?" asked the excited farmer, as he rushed up to an aviator whose plane had been wrecked in his corn field.

"No."

"Then what are you swearing about?"

"I've just discovered that I'm out of cigarettes."

His Daily Diet.

Judge—You're accused of stealing some swords and fencing fells from a pawnshop—and you'll probably tell me you did it because you were hungry.

The Accused—Yes, your honor! I'm the sword swallower at the circus!

Near Tragedy.

Voice (in darkness)—Rastus, you black rascal, get out of that chicken coop. I've got a shotgun aimed at you.

Voice From Chicken Coop—Po' de Lawd's sake, colonel, don't shoot! You might kill a chicken—American Mutual Magazine.

Testing It.

"Young man," said the boss, impressively, "what you want to learn is that perseverance wins, perseverance, sticking everlastingly at it!"

"Yes, sir," said the youth. "That's what you told me the last time, and I'm here again the way you said it, asking for that raise!"

The Feeling Was Mutual.

Benny—That fellow Wilkins is just crazy about you. He told me that he was starving for love.

Jenny—Yes, both of us are. He hasn't taken me out to dinner once in the last year.

Suddenly, Sweetly, She Blushed.

TEMPORARY INCREASE

"Did you gain in weight during your hunting trip?"

"Only temporarily. I went back as soon as the doctor removed the shot."

No Fair Exchange.

When our farmers take positions. Voting statesmanlike alarm. We hope our politicians Will not have to run the farm.

Bad Any Time.

Dad—Son, there's nothing worse than to be old and broken.

Young Hopeful—Yes, father—to be young and broke—Punch Bowl.

Sparing His Feelings.

"I want a word of advice."

"Well?" replied Mr. Wadleigh, grimly.

"What is the best way to approach you for a loan?"

"If you are sensitive, you had better write for it, and when you get my reply tear it up without reading it."

Just the Thing.

DON'T FUSS WITH MUSTARD PLASTERS!

Musterole Works Without the Blister—Easier, Quicker

There's no sense in mixing a mess of mustard, flour and water when you can easily relieve pain, soreness or stiffness with a little clean, white Musterole. Musterole is made of pure oil of mustard and other helpful ingredients, combined in the form of the present white ointment. It takes the place of mustard plasters, and will not blister. Musterole usually gives prompt relief from sore throat, bronchitis, tonsillitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, lumbago, pains and aches of the back of joints, sprains, sore muscles, bruises, chilblains, frost-bitten feet, colds of the chest (it may prevent pneumonia). 35c and 65c, jars and tubes.

Better than a mustard plaster

INDIGESTION!!! UPSET STOMACH, GAS, GAS, GAS

Chew a few Pleasant Tablets, Instant Stomach Relief

Pape's DIAPESPIN FOR INDIGESTION

Instant relief from sourness, gases or acidity of stomach; from indigestion, flatulence, palpitation, headache or any stomach distress.

The moment you chew a few "Pape's Diapepsin" tablets your stomach feels fine.

Correct your digestion for a few cents. Pleasant! Harmless! Any drug store.

Forever the effort goes on to "regulate" the foolish. Being foolish, they can't be regulated.

Is Just Like a New Baby Says Fond Mother

One of the most remarkable features about Teethina is the quick relief so often observed soon after getting it to a sick and fretful child. "She was just like a new baby in a few minutes after giving her Teethina," writes Mrs. W. M. Murray, of 1329 Cassier avenue, Gadsden, Ala. "In fact," continues Mrs. Murray, "I couldn't go to sleep at night without knowing I had Teethina in the house."

Mrs. Murray states an important fact that should interest other mothers who worry because of their little ones' fretfulness. With Teethina at hand she can banish all fears and take her own rest with the assurance that baby is well guarded and is safe from trouble.

Teethina is sold by all druggists, or send 30c to the Moffett Laboratories, Columbus, Ga., and get a package of Teethina and a wonderful free booklet about Baby—Advertisement.

Off Form.

Intelligence, Character, Courage Are Alone the Property of Individuals

By HERBERT HOOVER, in "American Individualism."

The social force in which I am interested... springs from the one source of human progress—that each individual shall be given the chance and stimulation for the best with which he has been endowed.

Intelligence, character, courage and the divine spark of the human soul are alone the property of individuals. Those do not lie in agreements, in organizations, in institutions, in masses or in groups.

Production both of mind and hand rests upon impulses in each individual.

No civilization could be built or can endure solely upon the groundwork of unrestrained and intelligent self-interest.

The day has not arrived when any economic or social system will function and last if founded upon altruism alone.

The will-o'-the-wisp of autocracy in any form is that it supposes that the good Lord endows a special few with all the divine attributes.

We in America have had too much experience of life to fool ourselves into pretending that all men are equal in ability, in character, in intelligence, in ambition.

Of the twelve men comprising the President, vice president, and cabinet, nine have earned their way in life without economic inheritance and eight of them started with manual labor.

Progress is almost solely dependent upon the creative minds of those individuals with imaginative and administrative intelligence. No race possesses more than a small percentage of those minds in a single generation. They can rise solely through the selection that comes from the free-running mills of competition.

It is the individual alone who can function in the world of intellect and in the field of leadership.

Leadership cannot, no matter how brilliant, carry progress far ahead of the average of the mass of individual units.

Ideas that lead to progress are born out of the womb of the individual mind. The crowd only feels; it has no mind of its own with which it can plan.

While we build our society upon the attainment of the individual, we shall safeguard to every individual equality of opportunity to take that position in the community to which his intelligence, character, and ambitions entitle him; that we keep the social solution free from the frozen strata of classes; that we shall stimulate the effort of each individual to achievement; that through an enlarging sense of responsibility and understanding we shall assist him in this attainment; while he in turn must stand up to the emery wheel of competition.

I went to the Orient in 1916, and after leaving the port of Honolulu in four months' time I saw the American flag aloft only four times.

The fourth time I saw it was on my way home, and I want you to get this picture. We were crossing back to America in a British ship having 52 passengers, 50 of whom were American citizens and 2 of whom were Britishers. About 10 days out, one day, having seen nothing, we observed a little smudge of smoke in the distance. Naturally, everyone was alive in a moment, and we watched that little smudge as it grew through the glasses. The captain of our ship was a typical Britisher, a full-faced, noisy, good-hearted British seaman, and finally that little tub, for such she proved to be, a little American steam schooner coming from Puget Sound over to Japan, bobbing up and down on the face of the ocean like a cork, broke out the American flag, and what did the British captain say?

I shall never forget it as long as I live, and it is one reason that I am in favor of this bill. He said, "Oh, by Jove, she's an American! I wonder what she's doing so far away from shore." There you have it!

"She's an American. I Wonder What She's Doing So Far Away From Shore"

By REPRESENTATIVE T. H. MACLAFFERTY, of California.

I went to the Orient in 1916, and after leaving the port of Honolulu in four months' time I saw the American flag aloft only four times.

The fourth time I saw it was on my way home, and I want you to get this picture. We were crossing back to America in a British ship having 52 passengers, 50 of whom were American citizens and 2 of whom were Britishers. About 10 days out, one day, having seen nothing, we observed a little smudge of smoke in the distance. Naturally, everyone was alive in a moment, and we watched that little smudge as it grew through the glasses. The captain of our ship was a typical Britisher, a full-faced, noisy, good-hearted British seaman, and finally that little tub, for such she proved to be, a little American steam schooner coming from Puget Sound over to Japan, bobbing up and down on the face of the ocean like a cork, broke out the American flag, and what did the British captain say?

I shall never forget it as long as I live, and it is one reason that I am in favor of this bill. He said, "Oh, by Jove, she's an American! I wonder what she's doing so far away from shore." There you have it!

We Are a Hundred Years Behind Even in Methods of Musical Education

By PROF. P. W. DYKEMA, University of Wisconsin.

I have some good things to say for jazz. It is not the principle of the thing that is bad, it is more often the performers. Jazz has a new rhythm, a new arrangement of tones, a piquancy, a verve and stimulating qualities which are a real contribution to music. Jazz is being wrecked by nerve-racking devices. Cow-bells, rattles and foghorns are drowning out its merits. Jazz is the victim of its wild, modern devotees, who are as bad as the voodoo worshippers of darkest Africa.

We are a hundred years behind even in methods of musical education. More free public musical education is the solution of this barbaric condition. One hundred years ago education had to be secured through personal expenditure. Now every child is provided with education as a public duty and necessity. The same principle should be and will be applied to musical training.

We are musically undernourished; America needs good music as badly as good food.

Hard Manual Labor the Rest of His Life for the Necessities of Life

By SENATOR H. L. MYERS, of Montana.

Every dollar of the German kaiser's fortune should be taken away from him by the entente allies; he should be stripped of every dollar that he has and rendered penniless and required to go out and work at hard manual labor the remainder of his life for the necessities of life.

The German kaiser is marrying, making merry, eating, drinking, feasting and dancing, while his victims writhe in torture or suffer the pangs of hunger and untold want. He is reputed to be one of the richest men in the world.

I repeat that every dollar of his money should be taken away from him; he should be stripped of every penny of his fortune, and it should be applied to the reparations due France and other countries wronged by Germany and to the payment of damages to this country for the sinking of the Lusitania and various other indignities and losses inflicted unlawfully upon our people by Germany.

NATIONAL CAPITAL AFFAIRS

Senate Approves More U. S. Farm Loans

WASHINGTON—Enactment into law of the Lenroot rural credits bill, as passed by the senate, will mean an expansion of the activities of the present farm loan system into a new field.

The bill does not interfere in any way with the farm mortgage business of the present 12 federal land banks or the 67 joint stock land banks, but will establish as an adjunct to the 12 federal land banks new farm credit agencies dealing in so-called personal credits. Loans, discounts and debentures of the new agencies, which are designated as farm credits departments of the land banks, will be based on warehouse receipts, live stock, or agricultural security other than farm land.

The loans of the present land banks and the joint stock land banks are based on land mortgages and are designed to help tenant farmers purchase their farms. The new agencies are intended to aid in financing the production and marketing of crops and the fattening and marketing of live stock.

The federal farm loan board, which will have supervision of the entire system, will become an even more important factor in the financial affairs of the country.

The present 12 federal land banks are co-operative institutions, the borrowers having gradually acquired stock originally subscribed by the government. The original stock of each bank was \$750,000. The present capitalization of the 12 banks is \$395,997,950, of which only about \$3,000,000 is still held by the government. Under the Lenroot bill the government will subscribe an initial capital of \$5,000,000 for a new farm credits department in each of the 12 banks. The total government capital for the 12 may run to \$120,000,000.

The joint stock land banks are privately financed and managed, but with the same tax exemption privileges for their bonds enjoyed by the federal land banks. The 67 joint stock land banks are scattered among 33 states.

Hoover Would Survey Rubber Supply

PROPOSAL that the American government investigate the rubber production possibilities of the Philippines and South America was endorsed publicly by Secretary Hoover after he had conferred with representatives of British rubber-producing interests and American consumers.

Secretary Hoover endorsed the proposal in a letter to Senator McCormick (Rep., Ill.) in spite of assurances from the British representatives that the only object of recent British legislation restricting rubber production in the colonies was to establish a price to insure reasonable returns and expansion of rubber plantations.

Representatives of the American consumers of crude rubber said they were desirous of obtaining an adequate return to the producing industry, but feared that the restriction plan would stimulate speculation and runaway prices, which would be disastrous to British producers by again stimulating overproduction with ultimate collapse in prices. This, they said, would in turn injure American consumers through speculation and losses.

The British representatives replied that the restrictive legislation had been necessitated by the virtual collapse of the industry, owing to prices below cost of production. They said their association would do all in its power to prevent runaway prices.

After pointing out in his letter that the United States consumes 75 per cent of the crude rubber produced in the world, while most of the rubber-producing properties are controlled by the British, Secretary Hoover said: "It is highly desirable that this department (the Department of Commerce) should be placed in position where we can make an exhaustive investigation covering a wide variety of subjects, such as areas of possible production, land and labor laws, labor supply, transportation, taxation, production costs, profits, security of investment, etc."

Forest Service Wants Alaska a State

historic policies and precedents, have always been recognized by congress as entitling continental territory and people to self-government in the Union.

"It is becoming evident the solution of the Alaska problem is local self-government. Apparently, what the people of Alaska want is not the power to run the government's business or property in Alaska, but power to run their own business. They want to make their own laws, levy their own taxes and spend their own public money. Just as do the people in the states.

"In short, what Alaska wants is not that the Union should be ousted from the territory, but that Alaska should be admitted to the Union."

The encouragement and assistance given by the Department of Agriculture, through the forest service and bureau of public roads, in building up an export lumber trade, the basic work going forward to the establishment of the pulp and paper industry, and the large expenditures which are being made on forest roads, together with a decentralized local administration, Colonel Greeley says, are contributing largely to the growth and prosperity of the territory.

Panama Wants New Deal With America

THE State department has been informed by the Panamanian government that in forthcoming negotiations for a new treaty to supplant the Taft agreement covering Canal Zone relationships, the right of the Panamanian government under the original treaty over foreign commerce in the Canal Zone will be asserted.

The point has been made by the Panamanian authorities that assurances were given by President Roosevelt that the United States had no intention of making the zone an independent colony in the middle of the republic of Panama. The representations to the State department are understood to declare plainly that the government of Panama would be unable to accept any new agreement which might bring about such a result.

So far as known the terms of the draft treaty prepared in recent conferences between State and War department officials, including Governor Morrow of the Canal Zone, has not yet been communicated to the Panama authorities.

Nor will officials here discuss what notice will be taken in these negotiations of various matters in which the people of Panama are held by their government to have been adversely affected through American activities in the zone.

Among these points is the question of acquisition of further lands for the canal or its fortifications. The Panamanian authorities have put forth the view that the canal should be pronounced by treaty a completed project, and the existing authority for taking over additional lands should be nullified.

The Panama government desires also to establish its own customs service at canal terminals to deal with passengers or commodities bound for the adjacent cities of Panama and Colon.

A variety of other questions has been raised by Panama for settlement in the treaty negotiations.

Texas News

In the bond election as to whether Gonzales should issue \$25,000 in bonds for replacing the present time warrants, the issue was defeated.

The attorney general has approved \$14,000 city of Cameron sewer extension bonds, serials at 6 per cent.

An election, held in the Grapeland independent school district for raising the school tax to \$1 was carried by a vote of 101 to 25.

The state, which has been on a deficiency since Sept. 1, 1922, probably will return to a cash basis on March 1, according to information from the state treasury.

The Lovelady Independent School District voted \$25,000 bonds to build a new school building. The vote was 96 for the bonds to 62 against. The district also voted a 50c additional maintenance tax.

A committee from the Cleburne chamber of commerce is working with a like committee from the Hillsboro chamber looking to the construction of an electric interurban railway line between these cities.

Electric light and power wires and poles are being removed from the streets in the business section of Temple and concentrated in alleys. An ordinance to this effect was adopted by the city commissioners recently.

Twice as many acres will be planted to cotton in El Paso county this year as were planted in 1922, according to an estimate made at the county farm agent's office. It is estimated that 24,000 acres will be planted in 1923.

The tax collector of the Hempstead Independent School District has been instructed to levy on and sell at public auction personal property of delinquent school tax payers, sufficient to cover the amount of taxes due, penalties and cost of collection.

Truck growers in the Aransas Pass section state prospects for a bumper crop were never brighter. Tomatoes and cucumbers will be the principal crops, with quite a large acreage of peppers, beans and melons. The recent rains and cold weather have been beneficial.

Contracts for the construction of embankments, culverts and bridges for the 34-mile concrete highway through Liberty County has been awarded. Work will start April 2 and, according to the specifications of the contract, must be completed in 300 working days.

More than 2000 acres of land in Grimes county around Courtney, White Hall and Lynn Grove, and including some of the richest land of that section, has been terraced this year under the direction of W. Z. Miller, agricultural-vocational teacher in the rural schools, who came to Grimes county last summer under the Smith-Hughes act.

Liquified petroleum gas and casing head gasoline in tank cars when consigned to petroleum oil refineries for use in the manufacture of refined petroleum products, has been made subject to rates on petroleum oil by an order of the railroad commission. The 25c per 100-pound maximum will be applicable under the order, which is effective March 10.

The prison relocating committee provided for by the last legislature reports that it was unable to find a site suitable within the 75-mile limit of Austin as provided for in the legislative act. Included in the report was a separate report by Land Commissioner J. T. Robinson recommending that the penitentiary system be relocated on the Guadalupe river in the San Marcos vicinity.

The International-Great Northern Railroad Company has begun laying ninety-pound rails north of Austin. It is understood this heavy track is to be built to Valley Junction, eighty-five miles north, where the main line intersects the road extending from Spring to Fort Worth via Waco. This is one of the material improvements following the termination of the receivership and the acquisition of the property by the Frisco system.

Governor Neff appointed the board of directors for the Texas Technological college to be established in West Texas under provisions of an act passed recently by the legislature. Nine members were appointed, three for six years, three for four years, and three for two years. Members appointed for six years follow: W. P. Hobby, Beaumont; J. W. Carpenter, Dallas and C. W. Meadows, Waco. For four years: Amon G. Carter, Fort Worth; R. A. Underwood, Plainview; Mrs. Charles De Groff, El Paso. For two years: Clifford B. Jones, Spur; J. E. Nunn, Amarillo and Mrs. Frank N. Drane, Corsicana.

The next meeting of the Texas Daily Press league will be held in Galveston in June, in connection with the Texas Press association, the executive committee of the league decided this week. Problems connected with publishing a daily newspaper, advertising and proposed laws pending in the legislature which would affect their business were discussed by members of the committee at the session in Dallas. Resolutions commending the work of Lowry Martin of the Corsicana Sun, president of the league, were adopted.

BASKETBALL IS PLAYED IN WATER

The latest in sports is water basketball. The new game which was introduced in Boston a short time ago has taken the Hub city by storm and in nearly every public swimming pool in the city teams can be seen in action. Six men play on a side and the same rules governing regulation basketball are abided by. Players can swim underneath the water in jockeying for position, but no unfair tactics can be employed.

Ball in Donkey's Ear.

There's a story "radloed" from Cork, Ireland, telling of how a golfer, one J. W. McEvoy, drove off the third tee at the Middleton links there, his ball entering the ear of a donkey on the course. The donkey stood still for a time, but when the players approached to within a few yards the animal took to its heels and tossed its head. The ball came rolling to the ground. It cost McEvoy one stroke when the argument was ended although there were those who suggested that such a unique shot as that should be considered in the same class as a "hole in one."

Coach Henderson

Elmer C. Henderson, head coach at the University of Southern California, spends his time between one football season and another playing golf. When "Gloomy Gus" is not supplying strategy for his championship Trojan football machines, he can always be seen on a course attempting to lower his handicap. Henderson piloted his team to victory over Penn State New Year's day.

Sporting Squibs of All Kinds

One governing body for light harness racing sport is advocated by many followers of the game.

In Sam Crawford's new baseball college on the coast doubtless a PHD is a Doctor of Pinch Hits.

Jim Pyott, University of Chicago's star football and track man, has been barred from track activity by his doctor.

Golf for all is the aim of Charles O. McEl of Memphis, Tenn., the new president of the Western Golf association.

George Burns, veteran outfielder of the Cincinnati Reds, has refused to accept the presidency of the new players' union.

New owners of the Spartanburg club of the South Atlantic announce that Bernard Kelly will be retained as manager of the Spartans.

The Rochester club of the International last week purchased Third Baseman Johnny Jenkins from the Rockford club of the Three-I.

Forrest Cobb, the college outfielder who was with Rochester of the International, all last season, has been released to the Norfolk club of the Virginia league.

Jole Ray, crack distance man of the Illinois A. C., will retire from track competition following the present indoor season. Jole plans to give all his attention to business.

COACH FISHER HAS NO FEARS

Former Yankee Pitcher Announces His Earnings Exceed Salary in American League.

Fifty the poor former professional baseball star who needs must retire and depend upon coaching for a living. Ray Fisher, once with the Yankees, announces that his earnings for nine months at the University of Michigan the past year, combined with three months in semi-professional circles, have netted him a sum in excess of anything he ever landed in the big leagues. Jeff Tesreau, director of baseball at Dartmouth, has the same kind of story to tell.

RUNS IN SWEETSER FAMILY

Cousin of Jesse Captures Golf Championship at Exeter Academy—Defeats Paul Sadler.

Alan C. Sweetser of Wakefield, Mass., a cousin of Jesse Sweetser of Sivanoy, national amateur golf champion, is following in the footsteps of his famous relative. Alan won the golf championship of Phillips Exeter academy by defeating Paul Sadler of Nashua, N. H., who held the title last year, by 5 and 4 in the final match. Jesse Sweetser won the Exeter championship when he was a student at the academy. His cousin has another year at Exeter.

USE SLOW MOTION PICTURES

Tennis Authorities Decide Upon New Method as Part of Educational Work for Novices.

The United States Lawn Tennis association, as part of educational work, plans to take a series of slow moving pictures of various leading experts in action on the court, and send them throughout the country in order to show the methods and styles of the leading players in a manner that will reach all those interested in studying the game.

Cornell Loses Star

Cornell track hopes have suffered a severe blow in the withdrawal from the university of David W. Kimball, the most promising hurdler on Jack Mookley's team. Kimball decided to leave college and go into business in Chicago, his home. Until he was injured last March at the indoor intercollegiate games in New York, Kimball was one of the best hurdlers in the East.

WILL NOT GO TO AUSTRALIA

Scottish Football Authorities Decline Invitation to Send Representative Team.

The Scottish Football association has declined an invitation to send a representative team to Australia, but has announced that it will grant every facility to any Scottish team willing to make the trip.

It has been decided that the Scotland vs. England match shall be played on April 14, at Hampden park, Glasgow.

Louis Pasteur: World Benefactor

Celebration of His Centenary is International

BUST OF PASTEUR BY ANTONIO

PASTEUR IN 1870 International Photo

Two contrary laws stand today opposed, one a law of blood and death, which, inventing daily new means of combat, obliges the nations to be ever prepared for battle, the other, a law of peace, of labor, of salvation, which strives to deliver man from the scourges which assail him. One looks only for violent conquest, the other for the relief of suffering humanity. The one would sacrifice hundreds of thousands of lives to the ambition of a single individual; the other places a single human life above all victories. The law of which we are the instruments essays even in the midst of carnage to heal the wounds caused by the law of war. — Louis Pasteur, at dedication of Pasteur Institute in Paris, November 14, 1888.

By JOHN DICKINSON SHERMAN

THE name of Louis Pasteur is enrolled among the immortals. The international observance of the centenary of his birth proves this. Though the anniversary of his birth was December 27, 1822, learned social and commercial societies, organizations and associations are still paying tribute to his services to mankind. All the world is paying homage to him as one of the greatest benefactors of the human race. A glance at the proceedings of two American memorial meetings will show how widespread the appreciation.

At the Philadelphia meeting Jules Jusserand, the French ambassador, spoke of Pasteur as the "greatest of the immortals of France." President Harding sent this message: "The wonderful advance of medicine and surgery are the direct results of Pasteur's life and work. Already many infectious diseases have been conquered and as a result the length of human life has increased. America has been among the first nations to apply Pasteur's work to practical use. The building of the Panama canal was made possible by knowledge of the germs of yellow fever."

Former President Wilson's message said in part: "I can see that it is his (Pasteur's) immortal distinction that he not only broadened the thought and enlightened the practice of the great medical profession in the treatment of certain diseases, but also erected barriers against all disease."

Pasteur was hailed as "one of the greatest benefactors of the human race in all history" by Chief Justice Taft. Dr. Etienne Burnett, director of the Pasteur Institute at Tunis, Africa, was a special representative of the French government.

The program of a meeting in Denver was under the auspices of the American Chemical Society (Colorado division), the Medical Society of the City and County of Denver, the State Historical and Natural History Society, the Colorado Scientific Society, and the Denver Philosophical Society.

Pasteur gave to the world perhaps the greatest discoveries in the realms of scientific research ever made by any one man, according to the six eminent speakers. His work was invaluable, not only in and of itself, but because of the width of its application to other problems; because of its impetus to further investigation along new lines, and because of its benefit to the welfare of humanity, speakers asserted.

The speakers were M. P. Berthier of Paris, who described the place

which Pasteur holds in the hearts of his countrymen; Dr. W. D. Engle, head of the department of chemistry and vice chancellor of the University of Denver, who outlined the contribution of the French scientist to the study of chemistry and the effects of this contribution in modern industry; Prof. T. D. A. Cockerell of the department of zoology, University of Colorado, who spoke of the subject, "Pasteur a Practical Biologist;" Dr. Carroll E. Edson, eminent Denver physician, who told of the influence of Pasteur's researches in the field of medicine; Dr. Horace G. Wetherill, who compared the uncertainties of surgery 60 years ago with the sureness of the science today, since the introduction of sanitation brought about through Pasteur's demonstrations of the germ theory, and Rev. William O'Ryan, pastor of St. Leo's Catholic church, who described Pasteur not as a "scientist," but as "a man."

Louis Pasteur was born at Dole in the Jura mountains, the son of a tanner. He got a school and college education and entered the normal school of Paris where he chose chemistry for a career. His public career began at Dijon, in 1848; in 1849 he was transferred to Strasbourg. In 1850 he went to Lille as dean of the faculty of science. In 1857 he was appointed director of scientific studies at the Ecole Normale de Paris.

His studies in fermentation revolutionized the wine industry of France and the procedure now universally known as pasteurization was later applied to countless other articles of consumption.

He saved the silk industry of France by discovering a cure for the silkworm disease.

After he was sixty, and after an apoplectic stroke which crippled him, he experimented with anthrax and chicken cholera and formulated the principles of immunization from disease by introducing into the system a serum of attenuated virus.

His fame became worldwide upon his discovery of a method of preventing rabies in 1885.

In 1888 the Pasteur Institute, built by popular contribution and endowed for future usefulness, was finished and dedicated. Pasteur lived seven years more, loved and revered by co-workers and disciples and by everyone.

"A pliprick was a door open to death," wrote a famous surgeon of Pasteur's later years. "That open door widened before the smallest operation; the lancing of an abscess or a whitlow sometimes had such a serious consequence that surgeons hesitated before the slightest use of the bistoury. It was much worse when a major surgical operation was necessary, though, through the irony of things, the immediate success of the most difficult operation was now guaranteed

by the progress of skill and the precious discovery of anesthesia. The patient, his will and consciousness suspended, awoke from the most terrible operations as from a dream. But at that very moment, when the surgeon's art was evidenced by being able to disregard pain, it was arrested, disconcerted and terrified by the fatal failures which supervened after almost every operation. The words pyemia, gangrene, erysipelas, septicaemia, purulent infection, were by-words in those days."

Pasteur was the precursor of Lister, the noted British surgeon. The latter wrote to him from Edinburgh in 1874: "I do not know whether the records of British surgery ever meet your eye. If so, you will have seen from time to time notices of the antiseptic system of treatment which I have been laboring for the past nine years to bring to perfection. Allow me to take this opportunity to tender you my most cordial thanks for having by your brilliant researches, demonstrated to me the truth of the germ theory of putrefaction, and thus furnished me with the principle upon which alone the antiseptic system can be carried out. Should you at any time visit Edinburgh, it would, I believe, give you sincere gratification to see at our hospital how largely mankind is being benefited by your labors."

M. Pasteur did visit Edinburgh and was given a remarkable reception by the scientific world gathered there at the university's tercentenary.

Pasteur's popular fame is largely due to his successful treatment of rabies. It was one of the most significant and important discoveries in the whole history of medicine. Its importance lies, even more than in the number of lives saved, in its scientific significance. It was the second discovery of a method for the specific prevention of an infectious disease affecting human beings, the first being the discovery of vaccination for the prevention of smallpox. The discoveries of the methods of preventing typhoid fever, diphtheria, yellow fever and cholera came at a much later date.

It was only after exhaustive researches in the causation and prevention of rabies in animals that Pasteur ventured to subject a human being to his treatment. Rabies is a dread disease. It inflicts terrible sufferings, and it invariably proves fatal. On the other hand, only a comparatively small percentage of those bitten by rabid dogs develop rabies. Bites about the head and neck, however, almost invariably result in rabies.

July 6, 1885, a boy, Joseph Meister, from Alsace, was brought by his parents to Pasteur for treatment. The boy had been badly bitten about the face and hands, and had not received any treatment. The treatment was applied and was successful.

Appropriately Named. Mr. and Mrs. Barr, a young married couple, were devoted to their respective hobbies. He was an enthusiastic cyclist, while his better half played the piano.

In course of time they had a little son, and both desired to christen the youngster with a name that would embrace their favorite pursuits.

After much thought the desired cognomen was evolved and the son and heir rejoiced in the name of "Handel Barr."

Improve Fair Grounds. Gonzales, Tex.—Workmen have been busy the past few days beautifying the fair grounds by setting out trees and shrubbery.

Lieutenant Colonel Slays Self. Manila.—Lieutenant Colonel Charles L. Lanham of the army finance department in the Philippines, committed suicide Friday by shooting. Lieutenant Colonel Lanham had been in poor health for some time.

Gravel for Resurfacing Road. Orange, Tex.—The hauling of gravel for the resurfacing of the Mauriceville road and materials for the bridges is going forward rapidly.

Road Work Progresses. Orange, Tex.—The first concrete work done by Frank P. McElwath, the principal contractor, under the \$700,000 road bond issue contract, has been finished.

Much Farm Land Broken. Millican, Tex.—Ninety-five per cent. of the land to be farmed at Millican this season has been broken and is in good condition for planting.

Appointed Cattle Loan Examiner. Fort Worth, Tex.—A. C. Williams, former assistant secretary of the Texas Cattle Raisers' Association, and now president of a cattle loan company, has been appointed a cattle loan examiner in the office of the war finance corporation at Washington.

Texas Postmasters Nominated. Washington.—Texas postmasters nominated: Thomas M. Welch, Palestine; Harry Reast, Whitesboro.

CONGRESS ASKED FOR AID FOR HOSPITALS

Mellon Requests \$8,768,500 Appropriation for Buildings and Repairs.

Washington.—Secretary Mellon asked congress Friday for an appropriation of \$8,768,500 for construction and repair of marine hospitals and quarantine stations. Included in the estimates were proposals for new hospitals at San Francisco, Seattle, New Orleans and at a point contiguous to Galveston and Port Arthur, Texas.

A new quarantine station to cost \$500,000 was recommended for Sabine Pass, Texas.

The new hospitals contemplated would call for expenditures of \$1,645,000 at New Orleans, \$1,190,000 at San Francisco, \$1,000,000 at Seattle, and \$500,000 for the combined Galveston-Port Arthur institution.

Modern 350-bed hospitals for New Orleans and San Francisco were recommended. The Seattle institution would contain 200 beds.

Mr. Mellon also recommended large appropriations for existing marine hospitals in order to increase their capacity, replace temporary structures and make large repairs.

An appropriation of \$535,000 was asked for the Norfolk hospital for new buildings, and \$1,700,000 was recommended for similar work at Stapleton, N. Y., where it is proposed to enlarge the facilities so as to care for 500 persons. Other estimates included: Chicago, \$236,000; Carville, La., \$25,000, and St. Louis, \$95,000.

LOCAL BILLS BECOME LAWS WITHOUT NEFF SIGNATURE

Austin, Tex.—Governor Neff Thursday filed the following sixteen local bills with the secretary of state, to become laws without the approval of the governor:

Authorizing Falls County or a political subdivision thereof to vote bonds for the purpose of constructing permanent roads.

Creating pilot boards in navigation districts containing cities of 100,000 population or more.

Regulating the organization of the county courts of Dallas County at law, and judges thereof.

Providing more efficient road laws for Bexar County.

Relating to traveling and other expenses of district judges and district attorneys when in discharge of official duties.

Creating Sour Lake Independent School District.

Creating the Deats Independent School District.

Amending an act creating Sudan Independent School District of Lamb County; providing for the validation of certain bond issues.

Reorganizing the thirteenth judicial district, providing for terms of courts and the organization of juries.

Reorganizing the thirteenth judicial district and fixing time of holding courts in said district.

Creating the Schwartner Independent School District, Williamson County.

Creating the Village Mills Independent School District, Hardin County.

Restoring to the county court of Sutton County the civil and criminal jurisdiction belonging to said court under the constitution and statutes.

Creating and incorporating the Meadow Higgins Independent School District, Terry County.

Creating the Higgins Independent School District, in Lipscomb County.

Creating the Crawford Independent School District, McLennan County.

Many Die in Kansas City Fire. Kansas City, Kan.—Thirteen persons, trapped in a rooming house were burned to death early Saturday in a fire which destroyed a two-story frame building on Kansas avenue in the Armourdale district. All the bodies were recovered.

Alien Property Bill Passed. Washington.—The administration bill directing the return of as much as \$10,000 of each estate of former enemy aliens held by the alien property custodian was passed by the house Friday.

Road Work Progresses. Orange, Tex.—The first concrete work done by Frank P. McElwath, the principal contractor, under the \$700,000 road bond issue contract, has been finished.

Gravel for Resurfacing Road. Orange, Tex.—The hauling of gravel for the resurfacing of the Mauriceville road and materials for the bridges is going forward rapidly.

Lieutenant Colonel Slays Self. Manila.—Lieutenant Colonel Charles L. Lanham of the army finance department in the Philippines, committed suicide Friday by shooting. Lieutenant Colonel Lanham had been in poor health for some time.

Improve Fair Grounds. Gonzales, Tex.—Workmen have been busy the past few days beautifying the fair grounds by setting out trees and shrubbery.

Much Farm Land Broken. Millican, Tex.—Ninety-five per cent. of the land to be farmed at Millican this season has been broken and is in good condition for planting.

Appointed Cattle Loan Examiner. Fort Worth, Tex.—A. C. Williams, former assistant secretary of the Texas Cattle Raisers' Association, and now president of a cattle loan company, has been appointed a cattle loan examiner in the office of the war finance corporation at Washington.

Texas Postmasters Nominated. Washington.—Texas postmasters nominated: Thomas M. Welch, Palestine; Harry Reast, Whitesboro.

Daddy's Evening Fairy Tale

BY MARY GRAHAM BONNER

AIR SCHOOL

Nick was interested in airplanes, and Daddy had said that when he grew up he might be allowed to go up in one if by that time they were perfectly safe. And so, thinking ahead of the day when he was sure Daddy would let him go up in the air, Nick was ready to be a good sport and to wait and to keep his promise to Daddy that he would not go up until he was much older.

Going up into the air had always seemed to Nick like a free, adventurous thing to do; but, like everything else, it appeared to Nick that there had to be a school with studies to be mastered in order that going up into the air could be accomplished. For Daddy had promised Nick that he would take him to see an air school, and Nick was thrilled with the idea.

There was a wonderful school where the men were taught all about the machinery they must understand in aviation or in air piloting, and this was the school Daddy was going to show to Nick.

There were many courses to be followed, and Nick said that he had no idea flying was such a job!

One course taught the men how they could understand the motors used in the airships. Nick was taken into a big shop where the men were studying and working with power machine tools, and he was told that these men were learning to understand how to repair airship motors as well as automobile engines.

Nick thought perhaps he'd like to take this course some day, and so understand all about machinery and its wonderful workings.

Then he went into the shop where the men were being trained to understand all about the wood parts of an

"Nick Was Interested."

airship and how they could be repaired and how they were used and put into an airship.

It was fascinating to him to see all the different sections of an airship being made. He thought this course would be fun.

Then there was a wonderful course to be taken in every kind of a repair that might be needed in an airship, and there was a course to train men to become finished in coppersmith work.

In this they learned how to put things together and insert tubes and pipes and how to fix everything that a perfect coppersmith would have to do, and then Nick thought he would love to be a coppersmith.

He was interested next in the work of training men to understand wires and how they should be used and how to put together the different parts of an airplane or a balloon.

He was quite sure he would like to know how to put the different parts of an airplane together more than anything else.

Then, instead of just understanding a little part of the work very perfectly, he would simply have to understand how everything was put together, and then, when he finished his work, it would seem as though he had finished so much!

An airplane all put together looked so much more than one little part done just right. Yes, he thought, this would be the most interesting course of all, and yet it would be awfully hard to put a whole airplane together so it would stay—he felt sure of that—and it certainly was important that it should stay together!

Well, perhaps he would think over whether this would be his favorite course or not to take. He was quite fascinated by the course where the men were learning all the fine points about repairing parts of machines, delicate, wonderful work which required the use of strange-looking instruments.

Then there was a general course in the understanding of power and everything that had to do with the engineering part of air piloting, too. Yes, Nick dreamed of a future when he could be graduated from one or all of these courses and would be given a diploma—possibly a medal—and then could understand not only going up in the air but everything about an airplane.

Oh, Nick had a beautiful time visiting the air school, and so interesting was it that he forgot that it was a school until, in thinking about it afterward, he said: "Well, it did look like awfully hard work, and I guess I'm just as glad I promised Daddy to leave the air alone until I'm grown up, though I did enjoy seeing how much has to be done to make these human birds."

GOVERNOR APPOINTS DEPARTMENT HEADS

All the Present Heads of Departments Reappointed for Next Two Years.

Austin, Tex.—Governor Neff Thursday sent to the senate for confirmation a long list of appointments for the next two years. All the present heads of departments were reappointed and no changes were made in the personnel of the state live stock sanitary commission or the state highway commission.

The complete list of appointments sent to the senate are:

S. L. Staples, Smithville, secretary of state; J. L. Chapman, McKinney, commissioner of insurance and banking; A. A. Stiles, Austin, state reclamation engineer; Thomas D. Barton, Amarillo, adjutant general; George W. Tilley, Waco, state fire marshal; John G. Wilacy, San Antonio, tax commissioner; W. W. Boyd, Decatur, game, fish and oyster commissioner; Joseph W. Myers, Fort Worth, labor commissioner; R. G. Storey, Tyler, assistant attorney general, court of criminal appeals; Walker Sayle, Breckenridge, member board of prison commissioners; R. H. Hubbard, New Boston; W. W. McCrory, San Antonio; D. E. Martin, Itasca, members of the state highway commission; J. E. Boog-Scott, Coleman; Paul L. Smith, Gilmer; B. Murrah, San Antonio, members of the live stock sanitary commission; F. M. Law, Houston, member of the board of directors A. and M. College, succeeding himself.

Bird White, Lancaster, member of the board of directors of A. and M. College, succeeding T. N. Jones, whose term has expired.

H. O. Flowers, Lockhart, succeeding himself as member of the board of regents of the state normal schools.

R. R. Watkins, Dallas, member of the board of regents of the state normal schools to fill the vacancy caused by the death of his father, A. D. Watkins.

Mrs. Sallie E. Capps, Fort Worth, successor to herself as a member of the board of regents of the College of Industrial Arts.

Miss Eleanor Brackner, San Antonio, successor to herself as a member of the board of regents of the College of Industrial Arts.

W. H. Beasley, Lufkin, state health officer.

W. P. Hobby, Beaumont; John W. Carpenter, Dallas; G. W. Meadows, Waco; Dr. J. E. Nunn, Amarillo; Cliff Ford Jones, Spur; Mrs. Frank H. Drane, Corsicana; Amon G. Carter, Fort Worth; R. A. Underwood, Plainview; Mrs. Charles De Groff, El Paso, members of the board of directors of the Texas Technological College.

EXTRA PRECAUTIONS TAKEN BY FRANCO-BELGIAN AUTHORITIES

Essen.—Extra precautions to guard public utilities throughout the Ruhr have been taken by the Franco-Belgian authorities, because of an order issued by General Wilhelm Groener, German minister of transportation, to the striking railroad workers to cut off gas and water and electric power where possible.

According to information in the hands of the French intelligence staff the strikers have been given a peremptory order to perpetrate acts of sabotage of this kind immediately at various points so as to hinder in every conceivable way the force of occupation.

The German customs houses in the Ruhr were taken over Saturday, the German officials being replaced by customs officers from France. At Spier however, the German customs chief refused to vacate his office. He was arrested by French guards and taken to the German prison. The German authorities refused to accept the prisoner whereupon the prison director himself was arrested by French soldiers and locked in his own jail with the customs chief as a companion.

County Depository Selected. Hallettsville, Tex.—The First State Bank of Hallettsville has been selected as the depository for the county funds.

200 Cattle Die on Ranch. Orange, Tex.—More than 200 head of cattle died on the Henry Gray ranch in the vicinity of the pines on the Louisiana shore of Sabine Lake during the recent blizzard.

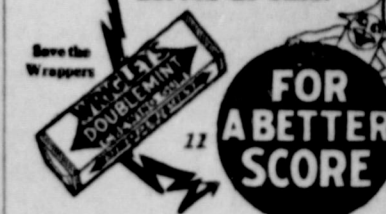

Much Farm Land Broken. Millican, Tex.—Ninety-five per cent. of the land to be farmed at Millican this season has been broken and is in good condition for planting.

Appointed Cattle Loan Examiner. Fort Worth, Tex.—A. C. Williams, former assistant secretary of the Texas Cattle Raisers' Association, and now president of a cattle loan company, has been appointed a cattle loan examiner in the office of the war finance corporation at Washington.

Texas Postmasters Nominated. Washington.—Texas postmasters nominated: Thomas M. Welch, Palestine; Harry Reast, Whitesboro.

After Every Meal WRIGLEYS

In work or play, it gives the poise and steadiness that mean success. It helps digestion, allays thirst, keeps the mouth cool and moist, the throat muscles relaxed and pliant and the nerves at ease.

FOR A BETTER SCORE

GET RID OF THAT "TIRED FEELING"

Do you feel run down and half-sick all the time? Are you thin, pale, easily tired—no energy, no ambition, no "pep"?

Now is the time to take Gude's Pepto-Mangan. It will brace you up, give you a delightful feeling of vigor and ambition, enrich your blood, build firm, solid flesh, and bring the healthy color back to your skin.

Your druggist has Gude's—Liquid or solid, as you prefer.

CHILDLESS HOMES MADE HAPPY

Presence of Little Ones a Great Blessing

Four Interesting Letters

Cortland, N. Y.—"I took Lydia E. Pinkham's Vegetable Compound because I was weak and wanted to become strong and have a child. My husband read about it in the 'Cortland Standard' and thought it might help me. It certainly did for I now have a lovely boy fifteen months old who weighs forty pounds. I recommend Lydia E. Pinkham's Vegetable Compound to my friends and you can certainly use my testimonial in your little books and in the newspapers, as it might help to make some other childless home happy by the presence of little ones as it has done mine."—Mrs. CLAUDE P. CANFIELD, 10 Salisbury St., Cortland, N. Y.

A Message to Mothers
Hamilton, Ohio.—"I have known about Lydia E. Pinkham's Vegetable Compound since girlhood, having taken it when I was younger and suffering from a weakness and backache. Later I have taken it again to strengthen me before the birth of my child, as I was troubled with pains in my back and a lifeless, weak feeling. I think if mothers would only take your wonderful medicine they would not dread childbirth as they do. I recommend the Vegetable Compound to every woman."—Mrs. JOS. FALCÓN, JR., 562 S. 11th Street, Hamilton, Ohio.

St. Louis, Mo.—"I want to tell you what Lydia E. Pinkham's Vegetable Compound did for me seven years ago. I was run down and had a weakness such as women often have. I took Lydia E. Pinkham's Vegetable Compound and after being married sixteen years became the mother of a sweet little girl. I now have four lovely children—three fine boys and the little girl six years old. I had longed for children all the while and wept many a day and envied every woman with a child. I was 36 years old when my first baby was born. I recommend Lydia E. Pinkham's Vegetable Compound to any woman who is ailing with female weakness."—Mrs. J. NAUMANN, 1517 Benton St., St. Louis, Mo.

Was Weak and Run Down
St. Louis, Mo.—"My mother took Lydia E. Pinkham's Vegetable Compound when I was a girl, and when I was troubled with cramps I took it, and later when I married I again took it to make me strong as the doctor said I was weak and run down and could not have children. I took it and got along fine and now I have three girls. So you know why I keep the Compound in the house. I am a well woman and do my work and sewing too."—Mrs. JULIUS HARTMAN, 2501 W. Dodder St., St. Louis, Mo.

Disordered Stomach

Take a good dose of Carter's Little Liver Pills—then take 2 or 3 for a few nights after.

You will relish your meals without fear of trouble to take your regular medicine. Millions of all ages take them for Biliousness, Dizziness, Sick Headache, Upset Stomach and for Sallow, Pimply, Bloated Skin. They end the misery of Constipation.

CARTER'S LIVER PILLS

Small Pill, Small Dose, Small Price

A man is never sure whether a woman believes what he tells her, or only makes believe.

Roman Eye Balsam is an antiseptic, astringent, and a wash. It heals the inflamed surface, preventing prompt relief. Advertisement.

DRIVING CAR ON SLIPPERY ROADS

Main Cause of Skidding Is Due to Action of Brakes Operating on Rear Wheels.

PLAN TO PREVENT MOVEMENT

Rough Tread Tires and Chains Are Designed to Avoid Slips and Are Generally Considered Absolutely Essential.

Why an automobile skids is of interest to the motorist, but what to do to prevent skidding and what to do when the car is skidding are equally important topics.

The main cause of skidding of rear wheels of motorcars is due to the action of the brakes operating through the rear wheels. Skidding, of course, normally occurs only when the roads are slippery.

An automobile wheel rotates and progresses over the highway in but one direction or plane. This direction for the rear wheels is determined by the front wheels under control of the driver.

Rear Wheels Control Direction.
While the rear wheels grip the ground and rotate they control the direction of the car. However, as soon as the rear wheels are locked by the brakes they begin to slide, and as they slide sideways practically as easily as forward, they lose the power to direct the car.

It takes comparatively little brake friction to lock and slide rear wheels on slippery roads, because there is little friction between the tires and the road surface. When once the driving wheels begin to slip the car is kept in motion by the force of inertia acting at the car's center of gravity or mass. This forward motion is opposed by the resistance of all four wheels on the ground, a resistance that is greater in the rotating front wheels than in the sliding rear wheels.

Unless the combined ground resistance of all the wheels tending to stop the car, acts on the same point as the force of inertia tending to carry the car forward, there results what is called a "force couple" which causes the car to skid or spin around.

After the wheels once start to slip a very small "force couple" will produce skidding, and the skid distance is dependent upon the magnitude of the "force couple," which, in turn, depends on car speed and weight. Turning the front wheels in the direction of the rear wheel skid helps to reduce skidding, because it reduces the magnitude of the "force couple." Also periodically releasing and reapplying the brake so the rear wheels can get a grip offsets forward slip and consequently side skid.

Means to Prevent Skidding.
Two means are employed to prevent skidding in motor vehicles. The use of non-skid or rough tread tires and of anti-skid chains. Non-skid tires are designed to give forward traction and to prevent side slip. As long as there is traction the rear wheels will turn, and as long as the rear wheels turn there will be no serious side slip, unless the front wheels are blocked.

Non-skid tires furnish reliability and safety in driving—reliability, in permitting the vehicle to operate successfully over almost any kind of road and during all seasons of the year, and safety by permitting the vehicle to hold the road at all speeds and allowing the brakes to be most effective.

Non-skid treads on tires were first used on rear wheels and are now considered absolutely essential for such uses. Later non-skid tires were placed on front wheels because the treads prevented front wheel skidding, as well as permitted the rotation or exchange of the front and rear tires.

Non-skid chains accomplish the same purpose as the non-skid tire tread, that is, give additional traction and reduce side slip. Non-skid chains should supplement non-skid tires only when road conditions absolutely require them.

Because they make available in road friction the total weight of the car instead of only half the car weight, four-wheel brakes are coming into use, especially in continental Europe. Not only can cars be stopped more quickly, but they can be driven safely on wet days and in ice and snow without chains. In stopping a car equipped with four-wheel brakes, all four wheels may slide and the car as a whole slip forward. However, there appears to be little or no side skidding. This is especially true if the brakes are connected diagonally in pairs, that is, left front wheel and right hand rear wheel. With this arrangement opposite wheels are able to roll freely retaining their directing qualities.

Breakage is Caused by Loose Axle Clips, Incorrect Heat Treatment and Fatigue of Metal—Rust Doesn't Cause Break.

Many complaints about the average car can be traced to the neglect of the springs. Hard riding, squeaks and rattles, excessive side-way, occasional spring breakage, hard steering and locked brakes come of this neglect.

Springs perform very definite functions. They soften and scatter road shocks and hold the axle in alignment, thereby having considerable influence on the steering, wheel alignment, tire wear, and to a degree, side-way.

In certain cars the driving effort and the breaking reaction are transmitted to the frame through the springs.

Lack of lubrication may make the springs too stiff, and cause hard riding. Comparatively little oiling is needed to offset rust, due to entrance of water, and to keep the springs flexible. However, excessive lubrication may reduce the friction to the extent that the springs may become too lively.

Spring breakage is caused mainly by loose axle clips, incorrect heat treatment, fatigue of metal, tight shackles bolts and incorrect design, and not by rust, as many suppose. In fact, rust seldom causes a spring to break, for a rusty spring acts as a solid mass, and when it cannot deflect, it is not likely to break, unless possibly under a very severe shock, when it may snap off at the outer end of the main leaf or plate.

As to broken leaves, if the spring is comparatively new, it will pay only to replace the one or two broken leaves, that is provided that you are able to obtain them. Oftentimes it is rather hard to secure duplicate leaves, and if the owner needs his car badly, it is better to buy a new spring rather than wait.

However, if the spring is an old one, or has settled more than about an inch, it is more advisable to get a new spring rather than only the broken leaves.

A periodical spring inspection followed by regular adjustment will assure easy riding.

NEGLECTED SPRINGS CAUSE HARD RIDING

They Are Intended to Soften and Scatter Road Shocks.

MR. CROW'S REVENGE

MR. CROW had been watching for a chance to pay Mr. Dog for upsetting his plans that day in the cornfield, when he had barked so loudly that Mr. Man came out with his gun and, before Mr. Crow could fly away, the gun went "Pop" and greatly upset the nerves of Mr. Crow.

What Mr. Dog was barking about really wasn't on account of Mr. Crow at all. He had not noticed him, for

Mr. Crow Told Mr. Towser.

under the stone wall Mr. Dog had seen Mr. Rabbit hop out of his sight and also his reach. But the barks had brought Mr. Man with his gun and, seeing only Mr. Crow, he popped the gun at him.

But this did not matter at all to Mr. Crow. He did not know anything

A LINE O' CHEER

By John Kendrick Bangs.

FRIENDS ALL

ONE time I knew a bed-ridden woman who could not hold herself upright. Yet was a fount of golden light. She held the sun and stars as friends Who came to visit her week-ends, And bring her smiling dividends. The sunbeams were her playmates dear Who never failed to bring her cheer. Even in the winter of the year. And when the bird-notes came to her From out the early morning air Each songster was God's messenger. (© by McClure Newspaper Syndicate.)

"What's in a Name?"

By MILDRED MARSHALL

FACTS about your name; its history; meaning; whence it was derived; significance; your lucky day and lucky jewel

JULIA

ONE of the oldest and most classical of names is Julia. The fortunate woman who bears it may be assured that famous women of unrevealed centuries have answered to it, for it exceeds Rome in antiquity. Like its masculine counterpart, Julia, it had its origin in the Julian gens that preceded Roman civilization. Various legends are put forth to account for "Julius" and historians differ widely, but the generally accepted theory is that Julius is the diminutive of "Julus," meaning divine, and was evolved in the same manner that Zeus, father of the gods, came to be the Roman Jupiter. If such is the case, Julia may fairly be called a daughter of the gods.

Just as the masculine Julius was famed through Julius Caesar and became hereditary throughout the empire, so the feminine counterpart was accepted as hereditary and was adopted as an ornamental name in other countries when classical names came into fashion. The "Julie" of Rousseau's "Nouvelle Heloise" made Julie very popular in France, England, Spain and Portugal kept her intact as Julia, but

GETTING A FIT

Neverwed—What a tiny little woman your wife is.

Justwed—She's just that. But then, apartment rents are so high I can't afford house room for anything larger than a gnom.

Renee Chemet

Her striking beauty and brilliant playing has thrown Renee Chemet, the young Parisian violinist, into the spotlight of the music-loving world. She will start an American tour in the fall. Three of Mme. Chemet's phonograph records were recently selected to be placed in the hermetically sealed vault along with three made by Caruso. These records, with others of today, will be taken from the vault 100 years hence, to demonstrate to forthcoming generations the highest type of music in the several fields in 1922.

meantime Mr. Crow had a feast in the cornfield, and when he went to bed that night he felt he had done a good day's work.

It was some time after that Mr. Crow, who was on the watch, saw Mr. Dog scratching and digging where he had buried the bone, and acting in the most excited manner because he could not find it.

"Caw, caw," cried Mr. Crow. "The next time you see me in the cornfield perhaps you will not bark and try to get me shot; caw, caw, caw."

But though Mr. Dog heard him, he did not in the least know what Mr. Crow meant, and that is the way it often happens, that those who work hard to get revenge for some fancied wrong fall as far short of getting it as Mr. Crow did. For what he really wanted was that Mr. Dog should know he was to blame for the bone being gone and Mr. Dog never did know it.

The Friendly Path

Walter L. Robbins

CHRISTIAN WORKERS

Go out into the byways and highways and compel them to come in.

DELEGATES to the World's Christian Endeavor convention in New York some time ago had this command in mind when they formed 100 gospel teams and held revival services in Wall street and in other public streets in Manhattan. Impressive scenes were witnessed in all parts of the great city, crowds assembling rapidly when they heard the young Christian workers singing "Onward Christian Soldiers" and other inspiring songs.

Enthusiasm aroused by the big meetings under the Cross of Calvary during the New York convention doubtless was carried "back home" by the young people to all parts of the world. Much good, doubtless, will result from the inspiration for doing good which these young soldiers will give the hundreds of thousands of Christian workers. Those who love God and wish to see His work carried on with greater success will have good reason to be glad because of the wider interest the convention aroused for the Master's cause.

But the greatest enjoyment will come to those who actively engage in leading their fellows into the right path. It is not alone sufficient to think good and to live good if one desires to enjoy to the fullest the happiness which should be his. Far more pleasure comes through helping others into doubtless a kingdom and through preventing sin and misery than can be experienced when one devotes all his time to thinking and working for his own personal salvation and happiness.

Wickedness is found in every town and hamlet, no matter how small. Opportunities for revival meetings are by no means confined to the big cities. And, while we would not depreciate the value of the many meetings held on street corners during the convention in New York, we do believe that as great opportunities for similar work may be found wherever humans live.

The only reason such a large number prefer to neglect worship in order to enjoy other pleasures, is that they haven't learned of the wonderful happiness which may be experienced through devoting a little time to divine services and constantly mixing opportunities to increase the world's smiles by uplifting work.

**Made in Tailored Millinery;
Style in New Season's Coats**

THE way of the mode, in all kinds of spring millinery, leads to elaboration; hats are intricate, and there is much work on them. Even the tailored hat which is expected to be somewhat plain as compared with its dressy companion, is an affair of elaborately made ornaments or braiding or tucking, and of unusual shapes. At least half of the shapes, whether for street, sports or dressy wear, are covered with highly lustrous fabrics.

coats has an interesting cast in which "Line" appears to play the leading role and "Fur" is an actor of much increased prominence. Fabrics are as they have been, soft and velvety—styles in the main simple, but so well managed that the new season's coats are flattering affairs. They have a smartness and a vivacity that will endure them to their wearers. Summer furs have established themselves as a part of the play in the

DIVERSITY SHOWN IN THIS GROUP OF HATS

These are mostly peculiarly millinery fabrics, although taffeta silk, and some other silks, bear them company. The majority of hats have drooping brims founded on the bell and the poke shapes. But there are off-the-face shapes, tricorns, turbans and toques so that the choice is wide enough to insure a becoming style to everyone. Something of the diversity which promises to give everyone a hat a little different from that of her intimates, appears in the group of early spring models pictured. A pretty model at the top of the group is of brown baronet haircloth with tan soutache braid decorating the flaring and interesting brim, turned upward at the back. Below it, at the left, a black milan makes a background for a huge

spring wardrobe and their becomingness brings grit to the mill of the designer of coats. Privileged to use them in the first spring models for collars, they appeared in the earliest showing—and received the glad hand of welcome. Other models have followed, with cuffs as well as collars of fur. Two models have been chosen for illustration here—both with a bit of fur in their make-up and styled with an eye to becomingness as well as practical all-round wearing qualities. The coat at the left has a short yoke, supporting a straight-line body that has sufficient fullness for comfort and achieves long, graceful unbroken lines, emphasized by the wide, loose strap trim at each side. The short-haired

STYLED WITH AN EYE TO BECOMINGNESS

cocarde of narrow grosgrain ribbon with metal edges, which is braided about the crown. At the right a hat of henna, suede-finished cloth is trimmed with loops and quilting of grosgrain ribbon to match. A large hat of French blue taffeta is covered with tucks and supports three silk roses in harmonious colors. The group is finished by a hat of rosebud green haircloth having a large bunch of variegated green silk flowers trailing over its brim. The drama of the styles in spring

fur collars on coats of this character are usually in the same color as the coat. A more youthful model appears at the right with surplice front opening fastening with a handsome ornament. White fur banded with silk makes a novel collar and cuffs for it.

PROPER PLAN TO TEST INCUBATOR

It Often Happens That an Old Machine Needs a Good Overhauling Before Used.

CLEAN WITH SOAP AND WATER

Be Careful to See that Thermostat is in Working Order and Provide Suitable Stand for Thermometer—Wipe Off Grease.

Often the incubator to be used is an old machine and needs a general overhauling before it is operated. The following directions will be a guide in this respect:

1. Body:
 - (a) Clean thoroughly with soap and water;
 - (b) Disinfect interior;
 - (c) Examine tray and replace with a new bottom if necessary;
 - (d) Dust diaphragms, recover if necessary;
 - (e) Clean sand trays and supply with fresh sand.
2. Regulatory Device:
 - (a) Test thermostat and see that all parts are working freely. (Screw nut until nearly all the play is taken up.

A Splendid Hatch From a Well-Operated Incubator.

Then hold a lighted match several inches below thermostat. The disc over the lamp should raise quickly.

(b) See that disc is hanging evenly over the vent in lamp.

3. Thermometer:

- (a) Test incubator thermometer against a standard clinical thermometer from 95 degrees to 105 degrees F. Place thermometers side by side in egg chamber with bulbs on same level. Note any variation.
- (b) See that thermometer is provided with suitable stand or hanging device if either of these are to be used.

4. Lamp and Lamp Box:

- (a) Clean out all soot from lamp box and flues. This is important as soot may drop upon flame, causing a "smoke up" later.
- (b) Pour out kerosene (if any) in lamp and refill three-quarter full in order to allow for expansion of oil if it becomes heated.
- (c) Examine burner and if not in good condition replace with new. A dirty burner may be cleaned by boiling in water containing some baking soda or washing powder.
- (d) Put in a new wick. A soggy or dirty wick may be cleaned as above.
- (e) Clean lamp chimney and see that it fits on burner.
- (f) Adjust seat of lamp so chimney fits properly in flue.
- (g) Wipe off all oil or grease from lamp.

Level the machine to secure proper distribution of heat. If a carpenter's level is not available, one can be devised by filling a long glass bottle with water, leaving only a small bubble.—O. C. Ufford, in Colorado Extension Bulletin 186-A, on "Principles of Incubator Operation."

CONDENSED PRUNING RULES

Trim Fall-Set Trees Early in Spring Before Buds Swell—Low Heads Are Most Favored.

Someone has given the following general, condensed rules for pruning of young trees: "Prune fall-set trees early in the spring, before the buds swell; prune spring-set trees as soon as planted. Cut out entirely all weak, broken or bruised limbs, keeping the head properly balanced; then shorten the remaining shoots to three or four buds at the base. Do not shorten cherry trees. When planting peach trees, cut off all limbs, leaving a stick, and cut this back to 18 to 24 inches from the ground. Head the tree right when you plant it. Low heads are best."

BEST LOCATION FOR ORCHARD

Has Much to Do With Question as to Whether Trees Should Be Trained to Open Heads.

The location of the orchard has much to do in regard to whether or not the trees should be trained to open or closed heads. In a damp locality where moss appears on the sides of the trees, it is well to train to an open head so that sunlight can be thrown into the tops. In hot or dry localities, or where the sun shines unusually bright it is better to leave a close head to protect the fruit from the direct rays of the sun.

FARM LIVE STOCK

SUCCESS IN WEANING COLTS

Important That Young Animals Become Accustomed to Various Feeds of Mother.

On my farm from three to six colts are raised every year, and I never attempt to wean them until they are at least five months old. I prefer more to less age. The three-month-old colt will live, of course, when weaned at that age and properly cared for; but when five months have passed by the operation is performed with less danger and worry to both the colt and its mother. It is the most convenient age to bring about the separation. I always prepare my colts for the critical time of weaning by getting them acquainted with feeds that will be proper when the mother is taken away.

In vogue there are two methods of weaning where the separation may be either sudden or prolonged. In the latter case the mother is brought back three times daily and the colt allowed to nurse. This operation is soon lessened to twice daily and then to once a day, which soon culminates in complete separation. When the weaning is done suddenly it is very important to milk the mare by hand as often as required.

During the time of weaning the colt should be confined in a comfortable, roomy box stall, containing no manger or boxes with which the youngster may become entangled. Low walls are particularly dangerous, as the colt may rear up and in an attempt to get over become caught in some way and injure itself. When a few days have passed a run outdoors at night in a high-fenced yard will be helpful. Sudden changes of diet are detrimental to all class of live stock, and no less so for the colt. All colts ought to

An English Prize-Winning Mare and Her Filly.

be taught to eat bran, chop and hay, and these habits will come naturally if they are running with grain-fed mother, for a colt is nibbling at its mother's feed long before weaning time arrives.

Finely chopped oats are good and should make up a large portion of the ration. The oats are better if steamed. At first bran should be fed two or three times a week. One or two carrots a day will also afford the colt something to nibble at and be beneficial. Along with this the youngster should be given all the well-cured clover hay it will eat, and for this purpose second-growth clover is good if not improperly cured. Good results can be obtained by feeding cow's milk to the colt, starting with two or three quarts per day, and increasing slightly after the first week, taking care never to overfeed. This article of diet is not usually available for the feeding of colts, however, and does not often figure in the ration.

"MAKING PROFIT FROM SHEEP

Farmers Feeding Alfalfa Hay and Paying Attention to Lamb Crop Make Most Money.

It is what goes into the sheep's stomach that determines how the owner will close his books at the end of the year. During the past year 27 owners of fine woolled flocks kept strict accounts of their herds. From these accounts it was shown that farmers feeding a limited amount of good alfalfa hay and giving attention to the lamb crop, received profits, even with wool and mutton prices at the level they have been this past year. The five farms where wool was produced most economically showed an average cost of 19.4 cents per pound. The remaining 22 farms required 37.5 cents to produce each pound. The best farms raised 41 lambs per 100 head of sheep, while the flocks that lost money raised an average of 30 lambs per 100 sheep. These records were taken in Morgan and Noble counties, Ohio.

Ration for Stallion.

A young stallion should have a ration that will stimulate bone and muscle development. Whole oats is the best grain to use, but the feed can be cheapened by letting corn form a third of the ration. Many horsemen like to feed bran.

Time When Feed Counts.

A thrifty sow is able to feed a good-sized litter of pigs in fine shape during the first few weeks of their life, but this is just the time when it is very necessary that they be fed well.

SINGS WITH JOY WHILE AT WORK

Mrs. Banes Says Tanlac Ended Indigestion, Sourness and Palpitations and Made Labors Light.

"Tanlac has helped me so much I wish everyone suffering like I did would follow my suggestion to use it," said Mrs. Sadie Banes, 2037 Washington St., Kansas City, Mo., the other day. "Before I took Tanlac my appetite was so poor it seemed beyond cultivation, and the little I managed to eat gave me indigestion and caused awful sourness and palpitation. I was simply miserable from nervous headaches, dizziness and knife-like pains in my back, always slept poorly, and felt so bad that at times I just had to quit my housework and lie down.

"Tanlac was so well suited to my case that it has only taken three bottles, half of the full treatment, to restore me to perfect health. It makes me so happy to be without an ache, pain or trouble of any kind that I go about my work humming and singing. I just can't help rejecting over what Tanlac has done for me."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.—Advertisement.

Where "Flapper" Idea Came From.

It is said that the original flapper was the Haytian girl who adopted short skirts decades ago and who used to "roll her own" as far back as 1915. The girls of that island make regular trips to market and it is their custom to ride on the back of burros. They carry their stockings and slippers under their arms until they reach the outskirts of the city and then as they ride along they don their footwear, the stockings being held in place by a deft twist about the tops just as our girls have been doing lately. As they return home the footwear is removed and laid away.

Cuticura Soap for the Complexion.

Nothing better than Cuticura Soap daily and Ointment now and then as needed to make the complexion clear, soap clean and hands soft and white. Add to this the fascinating, fragrant Cuticura Talcum, and you have the Cuticura Toilet Trio.—Advertisement.

His "Surgical Operations."

Will Campbell of Cotter performed two quick surgical operations on himself recently when in stepping from his house he slipped and fell. As he was falling he twisted his body, throwing one shoulder out of joint. When he hit the ground the dislocated shoulder flopped back into place. He did not know what had happened until he consulted a physician.—Arkansas Gazette.

FOR OVER 40 YEARS

HALL'S CATARRH MEDICINE has been used successfully in the treatment of CATARRH. HALL'S CATARRH MEDICINE consists of an Ointment which quickly Relieves by local application, and the Internal Medicine, a Tonic, which acts through the Blood on the Mucous Surfaces, thus reducing the inflammation. Sold by all druggists. F. J. Cheney & Co., Toledo, Ohio.

His Occupation.

"Howdy, Gap?" saluted an acquaintance. "Been to town lately?" "Well—p'tn—no; not to say right lately," replied Gap Johnson of Rumpus Ridge. "I was there about a week ago, 'orter stomping holes in the sidewalk."—Kansas City Star.

Best Judges of human nature would rather make money out of it than make fun of it.

MOVE SICK CHILD'S BOWELS WITH "CALIFORNIA FIG SYRUP"

MOTHER! Even Bilious, Upset, Tongue-Coated Children Love this Pleasant, Harmless Laxative

A teaspoonful of "California Fig Syrup" now will thoroughly clean the little bowels and in a few hours you have a well, playful child again. Even if cross, feverish, constipated, or full of cold, children love its "fruity" taste, and mothers can rest easy because it never fails to work all the souring food and nasty bile right out of the stomach and bowels without gripping or upsetting the child. Tell your druggist you want only the genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother, you must say "California." Refuse any imitation.

Spohn's Distemper Compound
HORSES COUGHING? USE Spohn's Distemper Compound to break the cough and get them back in condition. Thirty years' use has made "SPOHN'S" indispensable in treating Coughs and Colds, Influenza and Distemper with their resulting complications, and all diseases of the throat, nose and lungs. Acts marvelously as a preventive; acts equally well as a cure. Sold in two sizes at all drug stores. SPOHN MEDICAL COMPANY GOSHEN, INDIANA

WINTERSMITH'S CHILL TONIC

IF SICK, BILIOUS! START YOUR LIVER

Don't Take Calomel! "Dodson's Liver Tone" Acts Better and Doesn't Grip, Salivate or Make You Sick—Don't Lose a Day's Work—Read Guarantee!

Ugh! Calomel makes you sick. It's horrible! Take a dose of the dangerous drug tonight and tomorrow you may lose a day's work. Calomel is mercury or quicksilver which causes necrosis of the bones. Calomel, when it comes into contact with sour bile crashes into it, breaking it up. This is when you feel that awful nausea and cramping. If you are sluggish and "all knocked out," if your liver is torpid and bowels constipated or you have headache, dizziness, coated tongue, if breath is bad

or stomach sour, just try a spoonful of harmless Dodson's Liver Tone tonight. Here's my guarantee—Go to any drug store and get a bottle of Dodson's Liver Tone for a few cents. Take a spoonful and if it doesn't straighten you right up and make you feel fine and vigorous I want you to go back to the store and get your money. Dodson's Liver Tone is destroying the sale of calomel because it is entirely vegetable, therefore it can not salivate or make you sick.

Small Cars and the World's Most Popular Tire

The largest factory of its kind in the world is devoted solely to the production of Goodyear Tires, sizes 30x3, 30x3 1/2, and 30x4. Isn't this immense production, day after day, a positive indication to you of Goodyear's high ability and honesty of purpose in building the best Clincher tire on the market. THINK IT OVER. These tires, as well as other sizes, are here for your inspection. They cost no more than ordinary tires. Our helpful tire service will increase your mileage. It costs you nothing and saves you money.

MUSSEY BROS.

DRYDEN NEWS

(By our regular correspondent)

Mesdames Willie and W. J. Banner visited the family of Chas. Thomas this week.

J. K. Fulton has been confined to his bed for several days with grippe.

Mrs. Chas. Thomas is on the sick list this week.

Miss Helen Latimer visited her parents Sunday.

A. D. Brown was in from the ranch Thursday on business.

Mrs. Art Chandler from Sanderson visited friends and relatives here last week.

Misses Evelylin and Jewel Goode were in from the ranch Saturday on business.

Mr. and Mrs. Willie Banner came in from the ranch the first of the week on business.

S. H. Martin and his men finished the store building for Edmond Jones on Wednesday afternoon, and left Thursday for the A. D. Brown ranch to put up a building for Mr. Brown.

ATTENTION RANCHMEN:

You will shortly need KID ROPES AND SWIVELS. Place your order now.

The Roach McLymont Co.
 Del Rio, Texas.

OIL NEWS

The Times has been informed that there will be one, and probably two, oil wells started in Terrell county this month. One company that controls about 30,000 acres of land in Terrell county lying south of the railroad have had a field man going over their property for the past two weeks making a preliminary survey for a drilling site. It is reported that this company will begin the drilling of a well on their holdings within the next few weeks. Two other companies that have leases on large tracts of land in Terrell county, situated both north and south of the railroad tracks, are reported to be figuring on a drilling campaign in the near future.

The Southwest Texas Oil and Gas Company, who are operating in the Watkins oil field in the southeast part of Terrell county, are at present working one shift.

Deacon Dubbs will be in person at the school auditorium, Friday, March 9, at 8.30 p. m. Don't fail to take advantage of this chance to see a delightful and amusing character.

School Notes

(This department is edited by students of the Sanderson High School)

Next Friday night, March 9th, immediately after the senior play there will be an exhibition of some of the boys work in manual training.

The girls of the cooking class may also exhibit some of their work in the form of a lunch. Everybody is invited to inspect the work and equipment of both these departments that night. Come out and see what your boys and girls are doing.

RATTLE OF THE RAIL.

Brakeman C. H. Mulkey was off duty several days the past week on account of sickness.

Switchman W. R. Qualtrough made a trip to Del Rio this week.

We understand quite a lot of improvements are to be made in the roadbed of the G. H. & S. A. between Strobel and Alpine. Quite a number of curves are to be cut out and new fills put in. This work is to be done immediately as the track is being ballasted with the rock taken from the Toronto quarry, and these improvements are to be made before the track is ballasted.

Fireman R. D. Stallings returned to El Paso the first of the week.

The wrecking outfit went to Langtry Sunday to install a new boiler at the rock crusher there.

Fireman G. S. Richards came up from Del Rio Sunday to work on the extra list.

Engineer H. B. Slocumb has returned to El Paso.

Engineer T. Kent came up from Del Rio Saturday to work on the regular board.

Brakeman Dixon spent several days in San Antonio.

Madison Turner is now employed as tonnage clerk at the depot.

Your clothes will always look neat and clean if you have them pressed and cleaned at the Royal Tailor Shop. Phone No. 6, and we will call for your package and deliver when finished.

The Common Goat

There are a large number of people in the United States and even in the southwest country, who think about a goat as being just some sort of common dumb animal. In reality people of the southwest are beginning to realize that the goat is to be their bread-winner and in time their fortunes, so are doing a large advertising boom to show the world that the goat is one of the best eating meats going and also to show that they pay for themselves. A ranchman of Terrell county handed us a letter giving the prices a New York importer and manufacturer paid him for seven pounds of a part of a fleece off of a 20 month old nanny goat; the prices ran as follows:

- 1 lb. 12 inch at \$2 lb. \$ 2.00.
- 2 1/2 lbs. 14 inch at \$4 lb. 10.00.
- 14 lbs. 16 inch at \$8 lb. 12.00.
- 1 lb. 18 inch at \$9 lb. 9.00.
- 1 lb. 20 inch at \$10 lb. 10.00.

Total... \$43.00

It would be a wise and also a profitable idea for goat owners to breed up their goats and watch their flocks bring in better and larger incomes.

FOR SALE CHEAP.

Two sections of school land, 4 miles from Dryden; section 4, block A 2, abstract 2455; section 20, block A 2, abstract 2456. \$1200 due state in 40 years, 5 per cent. For sale or lease by the owner, E. B. Dobbins, San Marcos, Texas.

A. B. STOKES

A telegram was received late Saturday afternoon, by Mrs. Harry Sharp announcing the death of her brother, A. B. Stokes at Somerset, Texas.

Mr. Stokes, age 22 years, is the son of Mr. and Mrs. S. H. Stokes of Sonora. He was employed as bookkeeper by an oil refinery company at Somerset, Texas. Not very much information has been obtainable on the accident. It seems as though Mr. Stokes had just left the office to go out to look over a well that the company was drilling. Just as he passed under the derrick a beam fell striking Mr. Stokes and killing him instantly.

Mrs. Harry Sharp left Sunday morning on No. 110, for Del Rio, where she met the body. The body was carried over to Sonora Monday where funeral services took place Tuesday from the home of his parents.

The Times joins with the many friends of the bereaved ones in extending sympathy.

Phone No. 6, for cleaning and pressing in the most up-to-date and satisfactory manner, and at greatly reduced prices. Clothes called for and delivered.

Presiding Elder Coming

Presiding Elder, Rev. S. E. Ellison, of the El Paso District will be in Sanderson Sunday, March 4th instead of Saturday March 3rd, and will preach at 11:00 a. m. and 7:30 p. m. A conference will be held after the evening services. Anyone wishing to have their babies baptised please bring them to the morning services.

Rev. Joe W. Bickley, Pastor.

Hemstitching and picoting silk 10c and cotton 8c per yard, also braiding. Mrs. Walter DuBose, Box 442, Uvalde, Texas.

Mrs. E. McLaughlin who has been with her husband at Alpine for the past month, returned home Monday. Mr. McLaughlin is on the work train between Toronto and Altuda.

BORN--Saturday, February 24, 1923, to Mr. and Mrs. R. N. Allen, a good looking husky boy, weight 9 1/2 pounds. Mother and babe both doing well and Mr. Allen is being looked after by the sheriff.

BORN--to Mr. and Mrs. Sid Stewart, Monday, February 26th, 1923, an eight pound girl.

REDUCED PRICES

The following reductions in prices have been made in my line: Soles, nailed, \$1.00 pair, Soles, sewed, \$1.50 pair, Rubber heels, 50c pair, 1/2 Rubber heels 35c pair. All work strictly guaranteed, a trial will convince you.

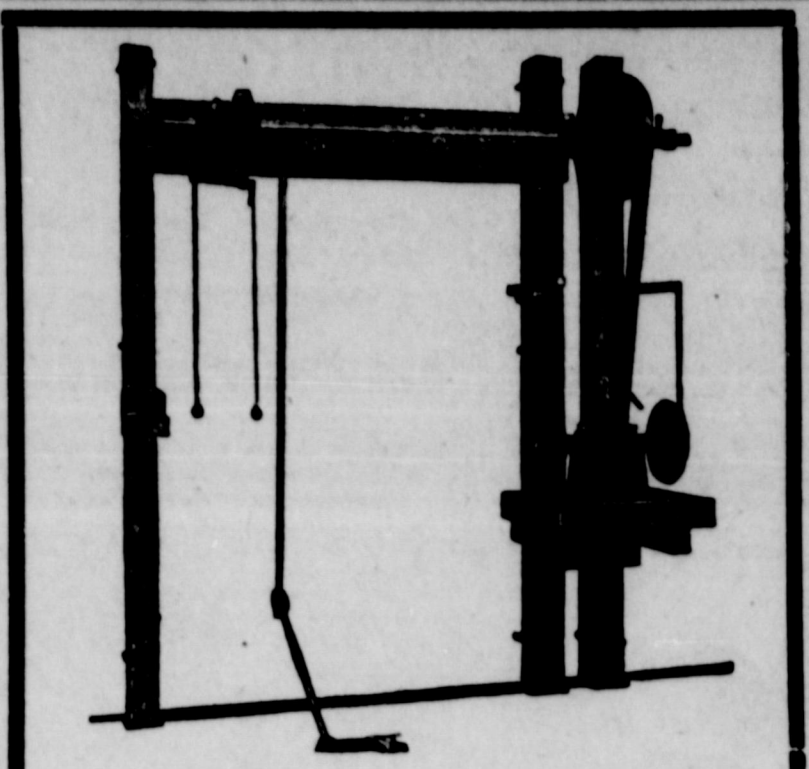

W. L. Harper.

Geo. Newton and wife spent several days here this week with the family of John Green.

Mr. A. E. Burns of Edgewood, Texas came in Monday to accept a position as bookkeeper for the Kerr Mercantile Company.

For Sale--Five room house, cement walled cistern, good grassy lawn, two lots. Good home nicely located and for a reasonable price. For particulars write Box B, Sanderson, Texas.

John Trent was in town several days this week from his ranch between here and Fort Stockton. Mr. Trent reports a fine rain all the way between here and Fort Stockton.

Ready to Shear, Mr. Ranchmen?

The shearing season is close at hand and you are, of course, anxious to get the last ounce of profit from your wool. The solution to this question is

Stewart's Enclosed Sheep Shearing Machinery

The machine that (1) gets more wool, (2) Secures the best wool, (3) Shears faster, (4) makes shearing faster work.

Write or call for particulars

The Roach McLymont Co.
